Elijah is also the champion of that social righteousness enjoined by law on his people. Naboth owns a vineyard desired by Ahab. The king offers to purchase the vineyard at a good price, but the owner refuses to sell on good legal grounds (cf Lv 25^{23}, Nu 36^{8}). Ahab sulks, feeling there is nothing more he can do. But Jezebel has other ideas. At her suggestion false witnesses are bribed to swear that Naboth had cursed God and the king. The citizens, thus deceived, stone their fellow-townsman to death. Ahab, on his way to take possession of his ill-gotten estate, meets his old antagonist, who pronounces the judgment of God upon him, including the imminent end of his dynasty (21$^{15-24}$). These predictions, although delayed for a time on account of the repentance of Ahab, were all fulfilled (21^{27ff} 22^{38}, 2 K 9$^{25f, 30-37}$ 10$^{7-14}$).

Ahaziah is a true son of Ahab and Jezebel. Having suffered a serious accident, he sends messengers to Ekron to inquire concerning his recovery of Ekron's god Baal-zebub (more correctly Baal-zebul), a deity closely related to Jezebel's god, Baal-Melkart. Elijah intercepts the emissaries of the king, bidding them return to their master with this word from Y″: 'Is it because there is no god in Israel that you are sending to inquire of Baal-zebub, the god of Ekron? Therefore you shall not come down from the bed to which you have gone, but shall surely die.' Ahaziah recognizes the giver of this message, and sends soldiers to apprehend the prophet, who escapes twice, miraculously. Finally, at God's bidding, the prophet allows himself to be brought before the ailing king and reiterates the message of doom with impunity (2 K 1).

Like all the events of his life, the end of this powerful personality left a dramatic impression in the tradition. Accompanied by his faithful follower Elisha, he passes from Bethel to Jericho, then across the Jordan, after having parted the waters by striking them with his mantle. As the two of them go on their way conversing, there suddenly appears a chariot of fire with horses of fire; and Elijah goes up by a whirlwind to heaven (2$^{1-12}$).

In the history of prophecy Elijah holds a prominent position. Prophetism had two important duties to perform: (1) to extirpate the worship of heathen deities from Israel, and (2) to raise the religion of Yahweh to a higher ethical level. To the former of these two tasks Elijah addressed himself with zeal, though not with complete success (cf 10$^{29, 31}$); the latter was left mainly to his successors in the following century. In his battle against Baal, he used inevitably some of the violent methods, the 'assassination technique,' of his enemies. It was a mighty struggle in an uncouth age; no quarter was given by either side. For example, Hazael was to be made king of Syria because he would afflict and punish Israel from without more than Ben-hadad had done; Jehu was chosen to attempt to kill every worshipper of Baal within Israel. Such drastic methods weakened the country without accomplishing their purpose. Hosea repudiated Jehu's acts of slaughter (Hos 1^{4}). All of the later prophets adopted a 'preaching technique,' so to speak: they warned of the judgment of God, even by the sword, but they did not themselves take the sword in hand. Prophecy had thus to be refined before it could give its greatest messages to the world. In the process the kingdom of Israel fell, never to rise again, while true prophecy lives for ever.

Elijah figures largely in later tradition: he is the harbinger of the Day of the Lord (Mal 4^{5}); in the NT he is looked upon as the herald of the Messiah, and the prediction of his coming is fulfilled in the advent of John the Baptist (Mt 11$^{7-14}$). On the Mount of Transfiguration he appears as the representative of OT prophecy (Mt 17^{3}, Mk 9^{4}, Lk 9^{30}). The prophet whose 'word burned like a torch' (Sir 48^{1}) was a favourite with the later Jews; a host of Rabbinical legends grew up around his name. Elijah was to precede the Messiah, to restore families to purity, to settle controversies, and perform miracles (cf *JE*, article 'Elijah' and Klausner, *Messianic Idea*, 451 ff). Origen (on Mt 27^{9}) mentions an apocryphal work, *The Apocalypse of Elijah*, and maintains that 1 Co 2^{9} is a quotation from it. Elijah is also found in the Qur'an (vi. 85, xxxvii. 123–130), and many legends concerning him are current in Arabic literature.

2. A Benjamite chief, 1 Ch 8^{27} (AV **Eliah**). **3.** A priest who had married a foreign wife, Ezr 10^{21}. **4.** A layman who had married a foreign wife, Ezr 10^{26} (AV **Eliah**), 1 Es 9^{27} (AV, RV **Aedias**). **5.** An ancestor of Judith, Jth 8^{1} (AV **Eliu**, RV **Elihu**). J. A. K.—W. F. S.

ELIKA.—One of David's 'Thirty,' 2 S 23^{25}.

ELIM.—One of the stations in the wanderings of the children of Israel, Ex 15^{27}, Nu 33^{9}; apparently the fourth station after the passage of the Red Sea, and the first place where the Israelites met with fresh water. It was also marked by an abundant growth of palm trees (cf Ex 15^{27}, twelve wells and seventy palms). If the traditional site of Mount Sinai be correct, the likeliest place for Elim is the *Wâdī Gharandel*, where there is a good deal of vegetation, especially stunted palms, and a number of water-holes in the sand.

ELIMELECH.—The husband of Naomi and father of Mahlon and Chilion, Ephrathites of Bethlehem in Judah, Ru 1^{2}. He migrated to Moab and there died, 1^{3}. He was a kinsman of Boaz (2$^{1, 3}$ 4^{3}), who bought some land in Bethlehem which still belonged to Elimelech and his family, 4^{9}.

ELIOENAI.—**1.** A Simeonite chief, 1 Ch 4^{36}. **2.** A Benjamite, 1 Ch 7^{8}. **3.** A descendant of David who lived after the Exile, 1 Ch 3^{23f}. **4.** A son of Pashhur who had married a foreign wife, Ezr 10^{22}, 1 Es 9^{22} (AV, RV **Elionas**). **5.** A son of Zattu who had committed the same offence, Ezr 10^{27}, 1 Es 9^{28} (AV, RV **Eliadas**). **6.** A priest, Neh 12^{41}. **7.** 1 Ch 26^{3} (AV); see ELIEHOENAI, **1.**

ELIONAS.—1. 1 Es 9[22] (AV, RV); see ELIOENAI, **4.** **2.** One who had married a foreign wife, 1 Es 9[32]; called **Eliezer** in Ezr 10[31].

ELIPHAL.—One of David's heroes, 1 Ch 11[35]; perhaps the same as **Eliphelet, 2.**

ELIPHALAT.—1. 1 Es 8[39] (RV); see ELIPHELET, **4.** **2.** 1 Es 9[23] (AV, RV); see ELIPHELET, **5.**

ELIPHALET.—1. 2 S 5[16], 1 Ch 14[7] (AV); see ELIPHELET, **1.** **2.** 1 Es 8[39] (AV); see ELIPHELET, **4.**

ELIPHAZ.—1. Eliphaz appears in the Edomite genealogy of Gn 36 (and hence 1 Ch 1[35f]) as son of Esau by Adah (vv.[4, 10]), and father of Amalek by his Horite concubine Timna (v.[12]). **2.** See JOB [BOOK OF].

ELIPHELEH, 1 Ch 15[18, 21] (AV).—See ELIPHELEHU.

ELIPHELEHU.—A doorkeeper, 1 Ch 15[18, 21] (AV **Elipheleh**).

ELIPHELET.—1. One of David's sons, 2 S 5[16], 1 Ch 14[7] (both AV **Eliphalet**), 1 Ch 3[6, 8]; called **Elpelet** in 1 Ch 14[5] (AV **Elpalet**). The double occurrence of the name in Chronicles (14[5, 7]), as if David had had two sons named Eliphelet, is probably due to a scribal error. **2.** One of David's mighty men, 2 S 23[34]; perhaps the same as **Eliphal** (q.v.). **3.** A descendant of Jonathan, 1 Ch 8[39]. **4.** One of the sons of Adonikam who returned from exile, Ezr 8[13], 1 Es 8[39] (AV **Eliphalet**, RV **Eliphalat**). **5.** A son of Hashum who had married a foreign wife, Ezr 10[33], 1 Es 9[33] (AV, RV **Eliphalat**).

H. H. R.

ELISABETH, Lk 1[5ff] (AV, RV).—See ELIZABETH.

ELISEUS.—The AV form of **Elisha** (q.v.) in NT.

ELISHA.—Elisha was a native of Abel-meholah, situated, according to Jerome, in the Jordan valley 10 Roman miles S. of Scythopolis (OT Beth-shean or Beth-shan, modern *Beisān*). The exact location is uncertain, though it was certainly near Jabesh-gilead, E. of the Jordan. Elisha's father was a well-to-do farmer, and thus he represented the newer form of Hebrew society, in contrast to Elijah. On his return from Horeb, Elijah cast his mantle upon the younger man, as he was engaged in extensive ploughing operations on his father's estate. Elisha at once recognized the call from God. Following a hastily devised farewell feast, he left the parental abode (1 K 19[19ff]), and ever after he was known as the man 'who poured water on the hands of Elijah' (2 K 3[11]). His devotion to, and his admiration for, his master are apparent from the tradition of the closing scenes of the latter's life. A double portion of Elijah's spirit is the *summum bonum* which he craved (cf the right of the firstborn to a double portion of the patrimony). In order to receive this boon he must be a witness of the translation of the mighty hero of Yahweh; and as Elijah is whirled away in the chariot of fire, his mantle falls upon his disciple, who immediately makes use of it in parting the waters of the Jordan. After Elisha has recrossed the river, he is greeted by 'the sons of the prophets' (members of the prophetic order) as their leader (2 K 2[9–15]).

It is impossible to reduce the incidents of Elisha's life to any chronological sequence. His ministry covered half a century (roughly 850–800 B.C.), and during this period four monarchs, Jehoram, Jehu, Jehoahaz, and Joash, sat on the throne of Israel (2 K 3[1ff], cf 13[14ff]). The story of Elisha was taken by the author of the Book of Kings from some cycle of prophetic stories of the Northern Kingdom, and probably rearranged according to subject-matter. In our canonical Book of Kings, the larger part of Elisha's activities is placed within the reign of Jehoram (2 K 3[1ff], cf 9[1ff]). He may have reached the zenith of his influence at the end of these few years with the making of a new king and dynasty, but all the recorded events of his life cannot be crowded into this short period.

His name, *Elisha* (= 'God is salvation'), like that of his master, tersely describes his character and expresses his mission. Elisha is a somewhat gentler and more gracious man than Elijah. He loves the haunts of men, and resides in cities like Dothan and Samaria. His miracles are often deeds of mercy. We find him at the headquarters of the prophetic order making his benign presence felt. He sweetens a spring of brackish water at Jericho (2 K 2[19ff]); he renders a poisonous mess of pottage harmless for the members of the prophetic order (4[38ff]); he multiplies the oil for the poor widow of a prophet (4[1ff]); he multiplies a few loaves of bread to feed a great company (4[42–44], cf the NT miracle of the loaves and fishes, Mk 6[34–44] and elsewhere). The sympathy of the prophet goes out in a practical way for the man who has lost his axe (6[1–7]). One of the most beautiful stories in Scripture is that of the relationship of Elisha to the home of the Shunammite woman. Her hospitality and the prophet's gratitude form a charming picture. In the restoration of her son to life, Elisha performs one of his greatest miracles (4[8–37] 8[1–6]). In his treatment of the Syrian (Aramaean) troops which had been despatched to capture him he showed a most generous spirit (6[11–23]). The familiar incident of the healing of the leprosy of Naaman not only gives an idea of the influence and power of the prophet, but the story is suggestive of the profoundest spiritual truths (5[1–19]).

The contrast between the spirit of master and disciple must not be overemphasized. Elisha could be as stern as Elijah: on the way to Bethel he shows no mercy to the mocking children (2[23f]), though this story seems out of harmony with the rest of the tradition; and no touch of pity can be detected in the sentence that falls on Gehazi (5[27]). The estimate of Ben-Sira is in accord with the OT narrative: 'in all his days he did not tremble before any ruler, and no one brought him into subjection' (Sir 48[12]). This severer side of the prophet's character appears mostly in his public rather than in his private life. In the campaign against Moab, the allied kings seek his counsel. His greeting to Jehoram of Israel, 'What have I to do with you? Go to the prophets of your father and the prophets of your mother,' indicates that Elisha had not forgotten the past and the conflicts of his master (3[13]). Later, the relations between the reigning monarch and the prophet seem more cordial, for the man of God reveals the plans of the Syrians to Israel's king (6[8ff]). This change of attitude on the part of the prophet may be due to the fact that Jehoram attempted to do away with Baal worship (3[2]); but Elisha had not forgotten the doom pronounced on the house of Ahab by Elijah. While Jehu is commanding the forces besieging Ramoth-gilead, Elisha sends one of the members of the prophetic order to anoint the general as king, and thus he executes the commission which Elijah received from Yahweh at Horeb (1 K 19[16], 2 K 9[1ff]).

Elisha's relations with the Syrians are exceedingly interesting. On one occasion he appears to be as much at home in Damascus as in Samaria. Benhadad, suffering from a severe ailment, hears of the prophet's presence in his capital, and sends Hazael to the man of God to inquire concerning the outcome of the illness. The prophet reads the mind of the messenger, and predicts both the king's recovery and his assassination by Hazael (2 K 8[7–15]). Nothing is said of a formal anointing, but again Elisha seems to have carried out a commission received by Elijah (1 K 19[15, 17]). The severe siege of Samaria (2 K 6[24–7:20]) probably falls in the reign of Jehoahaz. That the prophet is held by the king to be responsible for the plight of the city is an eloquent tribute to his political influence; and Elisha's prediction of deliverance is speedily fulfilled, though later the nation again falls to a low estate (13[7]). Joash, the next king, weeps over the prophet as he lies on his deathbed: 'My father, my father! The chariots of Israel and its horsemen' (13[14]). Directing the monarch to perform a symbolic act, the dying man of God gives the king assurance of victory (13[15ff]). Even after his burial his bones were said to have had the power to give life miraculously (13[20f]).

An incident in Elisha's life throws light on prophetic

psychology and practice. Before declaring the result of the campaign to the three kings, he asks for a minstrel to play a stringed instrument. The music induces an ecstatic state, in which the prophet gives his oracle (3^{15ff}). It was an age of ecstatic prophecy; but this gentler, more artistic, more urbane method of inducing the ecstatic state was in keeping with the character and personality of Elisha (cf 1 S 10^{5}). We are reminded of the use of this method to alleviate the emotional instability of Saul (1 S 16$^{14-23}$; see *Interpreter's Bible* iii, 200 f). J. A. K.—W. F. S.

ELISHAH.—The eldest 'son' of Javan (Gn 10^{4}, 1 Ch 1^{7}), whence the Tyrians obtained the purple dye (Ezk 27^{7}). The latter favours identification with South Italy and Sicily, or Carthage and N. African coast, both districts famous for the purple dye. Elissa, or Dido, the traditional foundress of Carthage, may indicate Elissa as an early name of Carthage, and Syncellus gives the gloss 'Elissa, whence the Sikeloi.' The Targum on Ezekiel gives 'the provinces of Italy.' The Tell el-Amarna tablets include letters to the king of Egypt from the king of *Alashia*, Egyptian *Alsa*, which has been identified with Cyprus; known to Sargon, king of Assyria, as the land of the Ionians, Javan. There are difficulties in all these identifications, possibly because the name itself denoted different districts at different epochs, and no certainty can yet be attained. Cf J. Simons, *Geographical and Topographical Texts of OT*, 1959, 28 f. C. H. W. J.—**H. H. R.**

ELISHAMA.—1. A prince of the tribe of Ephraim at the census in the wilderness, son of Ammihud and grandfather of Joshua, Nu 1^{10} 2^{18}, 1 Ch 7^{26}. **2.** One of David's sons, born in Jerusalem, 2 S 5^{16}, 1 Ch 3^{8} 14^{7}. **3.** In 1 Ch 3^{6} by mistake for **Elishua** of 2 S 5^{15}, 1 Ch 14^{5}. **4.** A descendant of Judah, father of Jekamiah, 1 Ch 2^{41}. **5.** The father of Nethaniah, and grandfather of Ishmael, of the royal family, who killed Gedaliah at the time of the Exile, 2 K 25^{25}, Jer 41^{1}. **6.** A secretary to Jehoiakim, Jer 36$^{12, 20f}$. **7.** A priest sent by Jehoshaphat to teach the Law in the cities of Judah, 2 Ch 17^{8}.

ELISHAPHAT.—One of the captains who helped Jehoiada to install king Joash, 2 Ch 23^{1}.

ELISHEBA.—Daughter of Amminadab and wife of Aaron, Ex 6^{23}.

ELISHUA.—A son of David, 2 S 5^{15}, 1 Ch 14^{5}; called **Elishama** in 1 Ch 3^{6}.

ELISIMUS, 1 Es 9^{28} (AV).—See ELIASHIB, **3.**

ELIU, Jth 8^{1} (AV).—See ELIHU, **6.**

ELIUD.—An ancestor of Jesus (Mt 1^{15}).

ELIZABETH.—The wife of Zechariah (AV, RV Zacharias) and mother of John the Baptist, Lk 1^{5ff} (AV, RV **Elisabeth**). The Hebrew form of the name is *Elisheba* (Ex 6^{23}). Elizabeth was of a priestly family, 'the kinswoman' of Mary (Lk 1^{36}), whom she greeted as the mother of the Messiah (v.^{43}).

ELIZAPHAN.—1. A chief of the Kohathites, Nu 3^{30}, 1 Ch 15^{8}, 2 Ch 29^{13}; called **Elzaphan** in Ex 6^{22}, Lv 10^{4}. **2.** Zebulun's representative for dividing the land, Nu34^{25}.

ELIZUR ('God is a rock,' cf *Zuriel*).—Prince of Reuben at the first census, Nu 1^{5} 2^{10} 7$^{30, 35}$ 10^{18}.

ELKANAH ('God hath acquired').—**1.** A son of Korah, Ex 6^{24}. **2.** An Ephraimite, husband of Peninnah and Hannah (1 S 1^{1f}); by the former he had several children, but Hannah was for many years childless. Her rival mocked her for this as they went up year by year with Elkanah to sacrifice in Shiloh (v.^{6}). Elkanah loved Hannah more than Peninnah, and sought, in vain, to comfort her in her distress (v.^{8}). At length Hannah conceived, and bore a son, Samuel (v.^{20}). Afterwards three sons and two daughters were born to them (see HANNAH, and SAMUEL). **3.** The son of Assir, 1 Ch 6^{23}. **4.** The father of Zophai (Zuph), a descendant of **3,** 1 Ch 6$^{26, 35}$. **5.** A Levite who dwelt in a village of the Netophathites, 1 Ch 9^{16}. **6.** One of the mighty men who came to David to Ziklag, 1 Ch 12^{6}. **7.** A doorkeeper for the Ark, 1 Ch 15^{23}. **8.** A high official, 'next to the king,' at the court of Ahaz, 2 Ch 28^{7}.

ELKIAH.—An ancestor of Judith, Jth 8^{1} (AV **Elcia**).

ELKOSHITE.—See NAHUM.

ELLASAR.—Arioch king of Ellasar was allied with Chedorlaomer in the campaign against the kings of the plain, Gn 14^{1}. He has been identified with Rim-sin, king of Larsa, and consequently 'Ellasar' is thought to be for *al-Larsa*, 'the city of Larsa.' Larsa, modern *Senkereh* in Lower Babylonia on the east bank of the Euphrates, was celebrated for its temple and worship of the sun-god Shamash. Böhl proposed an alternative identification of Arioch with the Hurrian name *Arriwuk*, known from the Mari texts (*BiOr* ii, p. 66), in which case Ellasar may be *Ilanzura*. But this is doubtful (cf Noth, *VT* i, 136 ff).

ELM.—In Hos 4^{13} AV has this mistranslation for **terebinth** (q.v.), as in RV, RSV. See also PLANE TREE.

ELMADAM.—An ancestor of Jesus (Lk 3^{28}).

ELNAAM.—The father of two of David's mighty men, 1 Ch 11^{46}.

ELNATHAN.—1. The father of Nehushta, the mother of Jehoiachin, 2 K 24^{8}. **2.** The son of Achbor, the chief of those sent to Egypt to fetch Uriah, who had offended Jehoiakim by his prophecy (Jer 26^{22f}); and one of those who had entreated the king not to burn the roll (36^{25}). It is possible that he is identical with **1.** **3.** The name occurs no fewer than three times in the list of those sent for by Ezra when he encamped near Ahava (Ezr 8^{16}). In 1 Es 8^{44} there are only two corresponding names (AV **Alnathan** and **Eunatan**; RV **Elnathan** and **Ennatan**).

ELOHIM.—See GOD.

ELOHIST.—See PENTATEUCH.

ELOI, ELOI, LAMA SABACHTHANI.—The words, both in Mk 15^{34} and Mt 27^{46}, are an attempt to transliterate an Aramaic rendering of the opening words of Ps 22. Under the physical distress of crucifixion Jesus began to recite this Psalm of an Israelite in distress, reciting it, however, not in Hebrew, but in His native Galilean Aramaic, *Elâhi, Elâhi, lemā shebaqtani*, 'My God, my God, why hast Thou abandoned me?' The Greek MSS, as might be expected in a case of transliteration, present variant spellings of all three words. The commonly accepted text in Matthew has *Eli*, which is the Hebrew form, but was also widely used in Aramaic. Either word might easily have been mistaken for *Eliyah*, the local name for Elijah. The scribe of Codex Bezae (D), followed by some Latin MSS, writes *Elei, Elei, lama zaphthanei*, which is an attempt to transliterate the original Hebrew of the phrase. A. J.

ELON ('terebinth').—**1.** Of the tribe of Zebulun, one of the minor judges, Jg 12^{11f}. All that is told of him is simply that he judged Israel for ten years, that he died, and was buried in Elon in Zebulun. **2.** A son of Zebulun, Gn 46^{14}, and Nu 26^{26} where the gentilic name **Elonites** occurs. **3.** A Hittite, the father-in-law of Esau, Gn 26^{34} 36^{2}.

ELON.—1. A town in the territory of Dan, now unknown, Jos 19^{43}. **2.** A place mentioned in 1 K 4^{9}; perhaps the same as **Aijalon.** EV combine with the following name to give **Elon-beth-hanan.** **3.** In Jg 12^{12}, where EV have **Aijalon** as a site in Zebulun, LXX reads **Elon,** probably rightly. Its site is unknown.

ELON-BETH-HANAN.—See preceding article.

ELOTH.—See ELATH.

ELPAAL.—A Benjamite family, 1 Ch 8$^{11f, 18}$.

ELPALET, 1 Ch 14^{5} (AV).—See ELPELET.

ELPARAN (Gn 14^{6}).—See PARAN.

ELPELET.—One of David's sons, 1 Ch 14^{5} (AV **Elpalet**); called **Eliphelet** in 2 S 5^{16}.

EL-SHADDAI.—See GOD.

ELTEKE.—See ELTEKEH.

ELTEKEH.—A town in Dan associated with Ekron and Gibbethon (Jos 19[44]), probably the *Altaqū* mentioned by Sennacherib as the locality of his defeat of the Philistines and Egyptians in the time of Hezekiah just before his capture of Ekron. It was a Levitical city, Jos 21[23] (RV, RSV **Elteke**). It is possibly modern *Kh. el-Muqanna'*.

ELTEKON.—A town of Judah, noticed with Maarath and Beth-anoth, Jos 15[59]; possibly modern *Kh. ed-Deir*.

ELTOLAD.—A town in the extreme south of Judah, Jos 15[30]. It was assigned to Simeon, 19[4]. It is called **Tolad** in 1 Ch 4[29]. The site is unknown.

ELUL (Neh 6[15], 1 Mac 14[27]).—See TIME.

ELUZAI.—One of the mighty men who joined David at Ziklag, 1 Ch 12[5].

ELYMAIS.—This name, which represents the OT **Elam**, was given to a district of Persia, lying along the southern spurs of Mt. Zagros, S. of Media and N. of Susiana. In 1 Mac 6[1], according to the common reading, which is adopted by the RSV, Elymais is named as a rich city in Persia. No such city, however, is mentioned elsewhere, except by Josephus, who is simply following 1 Mac. It may be, therefore, that we should correct the text and read with RV, 'in Elymais in Persia there was a city.' The variant readings appear to support this.

ELYMAS.—See BAR-JESUS.

ELZABAD.—1. A Gad chief who joined David, 1 Ch 12[12]. **2.** A Korahite doorkeeper, 1 Ch 26[7].

ELZAPHAN.—A chief of the Kohathites, Ex 6[22], Lv 10[4]; called **Elizaphan** in Nu 3[30], 1 Ch 15[8], 2 Ch 29[13].

EMADABUN (1 Es 5[58]).—One of the Levites who superintended the restoration of the Temple. The name does not occur in the parallel Ezr 3[9]: it is probably due to a repetition of the name which follows, *Iliadun*.

EMATHEIS, 1 Es 9[29] (RV).—See EMATHIS.

EMATHIS.—A Jew who had married a foreign wife, 1 Es 9[29] (AV **Amatheis,** RV **Ematheis**); called **Athlai** in Ezr 10[28].

EMBALMING.—This specifically Egyptian (non-Israelitish) method of treating dead bodies is mentioned in Scripture only in the cases of Jacob and Joseph (Gn 50[2f, 26]).

EMBROIDERY AND NEEDLEWORK.—Embroidery is the art of working patterns or figures on textile fabrics with woollen, linen, silk, or gold thread by means of a needle. The process was exactly described by the Romans as painting with a needle (*acu pingere*).

The Hebrew word for embroidery (*riḳmāh*) is rendered by AV in Jg 5[30] and Ps 45[14] by '**needlework,**' for which RV substitutes 'embroidery,' 'broidered work,' and in Ezk 16[10, 13, 18] 26[16] 27[7, 16, 24] by '**broidered** work' or 'broidered garments,' which RV retains. RSV has 'embroidered work' or 'embroidered cloth,' save in Ps 45[14], where it has 'many coloured robes.' Similarly in connexion with certain fabrics of the Tabernacle and the high priest's girdle, where a form from the same Hebrew root is used, for 'wrought with needlework' RV has the more literal rendering 'the work of the **embroiderer**' (Ex 26[36] 27[16] 28[39] etc.; RSV 'embroidered with needlework'), whom AV and RSV also introduce in 35[35] 38[23]. (The word *riḳmāh* is used of variegated plumage in Ezk 17[3] and of varicoloured stones in 1 Ch 29[2].)

An entirely different root, *sh-b-ṣ*, is used for weaving in patterns or the woven settings of jewels on clothing. This also is rendered in AV by 'embroider' (Ex 28[39]), for which RV and RSV have 'weave in **checker work**' (for which see SPINNING AND WEAVING). So for a 'broidered coat' (Ex 28[4]) RV and RSV have 'a coat of checker work.'

The art of embroidery was an invention of the Babylonians, from whom it passed, through the medium of the Phrygians, to the Greeks and the other nations of the West. Mummy cloths are still preserved showing that the art was also practised in Egypt. No actual specimens of Babylonian embroidery have survived, but the sculptures of Assyrian palaces, notably a sculptured figure of Ashurnazirpal, show the royal robes ornamented with borders of the most elaborate embroidery. The various designs are discussed, with illustrations, by Perrot and Chipiez, *Hist. of Art in Chaldaea and Assyria*, ii. 363 ff.

If, as is generally believed, the Priest's Code was compiled in Babylonia, we may trace the influence of the latter in the embroideries introduced into the Tabernacle screens and elsewhere (references above). In the passages in question the work of 'the embroiderer' (*rōḳēm*) is distinguished from, and mentioned after, the work of the 'designer' (*ḥōshēbh*), who appears to have woven his designs *into* the fabric after the manner of tapestry (see SPINNING AND WEAVING). The materials used by both artists were the same, linen thread dyed 'blue, purple, and scarlet,' and fine gold thread, the preparation of which is minutely described, Ex 39[3].

An illustration in colours of the sails which Tyre imported from Egypt, 'of fine embroidered linen' (Ezk 27[7]), may be seen in the frontispiece to Wilkinson's *Ancient Egyptians*, vol. ii. A. R. S. K.

EMEK-KEZIZ.—A place mentioned among the towns of Benjamin, apparently near Jericho, Jos 18[21] (AV 'the valley of Keziz'). The site is unknown.

EMERALD.—See JEWELS AND PRECIOUS STONES.

EMERODS.—See MEDICINE.

EMIM.—Primitive inhabitants of Moab (AV 'Emims'), mentioned in Dt 2[10f] and Gn 14[5]; they were of gigantic stature and associated with the Rephaim (q.v.).

EMMANUEL.—See IMMANUEL.

EMMAUS.—The objective of Cleopas and his companion, said to be sixty stadia from Jerusalem (Lk 24[13]). Those who rely on the estimate of distance and considerations of time in the narrative seek it at el-Iqbēbeh, NW. of the city. But the name is a safer guide. The name comes from *Ḥammā*, 'warm well,' and there are none such at the place mentioned. Emmaus is clearly the *Ammaous* of Josephus, called Nicopolis in Eusebius' time and to-day *Amwās*. Here there are several warm-water wells. As it is twenty miles from Jerusalem, rather than seven as suggested by Luke, this causes perplexity for those who would press the details of the story. The *Codex Sinaiticus* reads '160 stadia' instead of sixty. Emmaus was on the road to Jaffa. It was the scene of an engagement between Judas Maccabaeus and Gorgias (1 Mac 3[40, 57] 4[3-27]) and was fortified by Bacchides (1 Mac 9[50]). The supposed other *Ammaous* where Vespasian settled veterans (*BJ* VII. vi. 6 [217]) is probably miswritten from *Ammosa*—the Mozah of Jos 18[26]. E. G. K.

EMMER, 1 Es 9[21] (AV, RV).—See IMMER, **1.**

EMMERUTH (1 Es 5[24] RV).—A corruption of **Immer** in Ezr 2[37]. See AMARIAH, **7,** and IMMER, **1.**

EMPEROR WORSHIP.—The cult of the abstract goddess Roma and eventually of the Roman Emperors, living and dead, which arose spontaneously in western Asia Minor. It was at first a recognition of the order and stability which Roman intervention had brought to a land long accustomed to the greed and rapacity of boundary-jumping petty princes and of corrupt officials; in time it developed into a definite State religion throughout the Roman Empire.

The earliest definite evidence of what was thus to become a State cult was the erection in Smyrna in 195 B.C. of a temple to *Roma*, in grateful appreciation of Rome's support against the inroads of the Seleucid King Antiochus the Great. The practice of hailing victorious Roman generals, and subsequently even pro-consuls, as saviour deities was widespread in the newly constituted province of Asia; so also was the creation of a new goddess, *Roma*, who personified the might and power of their conquerors and liberators.

EMPEROR WORSHIP

The East had long been accustomed to regard its rulers as divine. In Egypt the Pharaoh was king because he was a god. In Assyria, Babylonia, and Persia the practice of regarding and designating the sovereign a 'son of god' was long established. Alexander the Great, in consequence of his amazing and spectacular conquests, fell heir to this not unnatural practice and zealously cultivated it as an effective means of welding together into some sort of unity the varied and disparate regions which he had overrun and conquered. In Egypt he had been hailed a son of Zeus (or Amon Rē); at Susa he had sat on the throne of the 'king of kings.' Upon his death similar titles were bestowed upon or demanded by his successors. Thus in Egypt, Ptolemy I. was styled 'Saviour and God' (*sōtēr kai theos*) in an inscription (*c* 306 B.C.) found at Halicarnassus, while various of the Seleucids bore similar epithets, of which the one affected by Antiochus IV., *Epiphanēs* (*i.e.* God Manifest), is revealing.

With the triumph of Octavian at Actium (31 B.C.) and the subsequent rise of the Roman Empire, the worship of Rome and her emperors received fresh stimulus. The same reasons which had led to considering Alexander divine were effective for Octavian: after a century of chaos and confusion he had brought peace and security. Surely a divine power or *genius* was in him. Within two years of Actium, temples to *Roma* and to the deceased Julius Caesar had been erected in Ephesus and Nicaea; Roman citizens who resided in those areas were directed by the victor to worship at these shrines. At Pergamum in Asia and at Nicomedia in Bithynia, Augustus permitted temples to be erected for the joint worship of *Roma* and himself. For forty years this temple in Asia Pergamum was the sole seat of what can now be literally styled emperor worship. This proud privilege of the Asian metropolis explains the bitter epithet, 'Satan's seat,' which the author of Rev 2^{13} bestows upon this city. As the years passed other prominent cities of wealth and importance were granted the right to dedicate similar temples and thus make claim to the proud title *Neōkoros*.

In Rome, Augustus and his obedient Senate were rather more cautious. Well did Augustus remember the price which his uncle Julius had paid for his too great popularity. By the people at large the latter had been commonly regarded, even during his lifetime, as virtually divine. A statue with the inscription 'to the invincible god' had been set up on the Quirinal in his honour in 45 B.C.; a few months later he had had his own temple, with the title Jupiter Julius. Then had come his assassination, followed, to be sure, by his official apotheosis, which transformed him into a real god—had not a dazzling comet appeared in the midst of the rites, thus proving that he had been received among the immortals! (Pliny, *Nat. Hist.* II. 24).

Nevertheless, Julius had been assassinated. Augustus was properly wary lest his own amazing triumphs should lead to a similar fate. While he was well aware of the superlative political value of this spontaneous acclamation of himself as the living embodiment of the *genius* which the awed and grateful East recognized, as the bond of unity among peoples of widely diverse stocks and traditions, he had not the slightest intention of letting it get out of control. Actually it was this ability of ever seeming forced to accept, always with reluctance, one dignity or badge of authority after another which is Augustus' chief claim to genius. In the eastern provinces he permitted the erection of a few temples to himself, but only when they were to be dedicated jointly to himself and Rome, and only, in the case of the provincial cult, when the province itself made the overture. There seem to have been two distinct types of emperor worship: the municipal and the provincial. For the former, official permission from Rome was not necessary. The temple might be erected and the rites performed in honour of the various emperors, living and dead, on the initiative of the city itself and with little apparent control even by the provincial governor. A provincial cult, however, could be established only upon the direct authorization of the emperor, and regularly only in the provincial centre. The various cities of the province sent delegates to form a provincial assembly and elected the chief priest, styled variously Asiarch (q.v.), Galatarch, Bithyniarch. To be permitted to be the seat of this all-important worship was the source of great pride to the city so honoured. And Augustus was astute enough to see that the honour was not lessened by over-frequent bestowal. See AUGUSTUS.

But it should not be forgotten, despite the values which successive emperors saw in this very effective cult of patriotism, and despite their efforts to keep it such, that it was not imposed on the provincials by Rome herself; instead, it sprang from the voluntary desire of the provincials themselves. In addition, Augustus and the more astute of his successors—Tiberius, Claudius, Vespasian—were most cautious, even reluctant, in permitting even such honours for themselves while living. Caligula, Nero, and especially Domitian were less restrained, and at times encountered serious difficulties because of their too-ready acceptance of the proffered heady drink. Caligula's ill-starred attempt to set up a statue of himself in the Jewish temple in Jerusalem is only one conspicuous example of a danger Augustus and Tiberius had carefully avoided. (See GAIUS.)

In Rome, Augustus and his early successors were still more cautious, resolutely forbidding divine honours of too conspicuous a sort to be rendered them while still alive. The former did accept with proper reluctance the honorific title *Augustus*, welcomed the *Augustalia* (sacred rites and games), and permitted the month of August to be dedicated to him; but no temple in Rome was to be so dedicated. It was only after his death that the city might officially enshrine him among the immortals.

All this was no mere flattery or kowtowing. It was the expression of genuine gratitude for the definite reality of the *pax Romana*. The emperor had done what their local rulers had been unable to do. Tyranny, irresponsible and costly war, and banditry were over; highways were open and safe for trade and travel; earlier abuses by rapacious governors were effectively checked. It is not surprising that to people long accustomed to regard their rulers as of more than common clay this amazing betterment could be explained only in terms of a divine genius to whom glad tribute was only proper: 'The birthday of God has brought to the world glad tidings. . . . From his birthday a new era begins'—so reads the inscription in honour of Augustus found in Priene (Dittenberger, *Orientis Graeci Inscriptiones Selectae*, 458).

Nor was this attitude restricted to the East. In Italy, too, peace and prosperity had followed the awful years of bloodshed and confusion which attended the dying republic. The future loomed bright and propitious. This widespread attitude is clear in the so-called Messianic *Fourth Eclogue* of Virgil: the end of the age of iron has at last come; the age of gold is even now rising for the whole world.

As the emergence of emperor worship was the natural and spontaneous expression of real appreciation and also, in no small part, of genuine gratitude—not the invention of power-mad tyrants—so too the cult never regarded itself as a substitute for other religions. It neither sought to replace them nor to quarrel with them. For a man living in Asia or Bithynia to burn a bit of incense to the emperor was essentially the same thing as removing one's hat to the flag or rising for the national anthem is to a normal American or Briton. The appreciative recognition of a new goddess *Roma* in no wise interfered with obligations or loyalties to other deities. Actually, as the years went by and the earlier gratitude to Rome, whose blessings had then seemed so immediate, tended to lapse, it was not unnatural that more and more the visible embodiment of the now somewhat abstract *Roma*—that is, the living emperor—tended to come increasingly to the fore. But he too did not oust or even replace the other local deities. Rather

he became associated with them. Thus in the 2nd cent. many inscriptions, notably on coins, reveal the virtual identification of the divine emperor with this or that local god: Artemis, Persephone, Zeus, Nemesis, Asklepios. The State cult did not owe its success to the decay or destruction of older religions; instead, it was its natural alliance with them that actually assured its triumph.

While not imposed from above, but a spontaneous outgrowth from below, refusal to perform the normal rites or, even more, open hostility to them, meant serious trouble. For the most part there seems to have been little such hostility. To be sure, Tacitus (*Annals*, IV. 36) recounts that the citizens of Cyzicus lost their privileges because they had let the ceremonies in honour of Augustus lapse; but this was most unusual, and his subsequent remark (*ib.*, IV. 56), 'Eleven cities rivalled each other, not in power or opulence, but with equal zeal contending for the preference [*i.e.* the authorization to build a temple to the reigning emperor],' is far more indicative of the normal attitude at home as well as abroad. Few people, save Jews and Christians, had any objection to divine humanity. For centuries, Greeks had been placidly making gods in their own image from heroes, alike living and dead. In the East, the apotheosis of dead rulers was not regarded as the way they became divine; rather, it was the natural consequence of their already possessed divinity.

To the Jew and the Christian alone it was an intolerable and blasphemous outrage. Occasionally the Jews had suffered for their refusal to join in the common acclaim, but this was rare. Caligula, the first of the emperors to demand the title *Dominus et Deus Noster*, had sought by a bloody persecution of Jews in Alexandria to force them to join in the common rites. The attempt signally failed, and Claudius promptly sent an edict to the Egyptian viceroy approving the Jews' refusal to regard the emperor as a god and empowering them to maintain their ancestral attitudes and practices unmolested. This edict, repeated throughout the Roman domain and in keeping with the toleration regularly granted them from the days of the grateful Julius, ensured them, as a *religio licita*, immunity from retribution for their unusual refusal. Rome had the sense to recognize that this refusal was no evidence of disloyalty, but simply a traditional inheritance far antedating the establishment of the State cult; and it was a mark of Roman genius for administration to be unwilling to permit local customs or *mores*, however crude or boorish they might seem to the cultivated Roman himself, to become a political menace by unwise or too costly prohibition.

For the Christians, however, the outcome was very different. Inheriting the Jews' unwillingness to worship any pagan deity, and especially to accord divine honours to any human being, whatever his worldly status, they speedily came into open conflict with the state. So long as they were regarded as merely an obscure sect within Judaism, they appear to have enjoyed immunity. But when the ways parted and the Christians became independent, their immunity ceased. It was not true that the new religion was only one more cult; instead, it was all too clear that it regarded itself as the only true religion and divinely directed to oppose all others. That spelled trouble. In addition, unlike Judaism, it had a central figure, Jesus Christ, who was the real and only king. Many of the titles such as saviour, lord, son of god, god, god manifest, which were commonly bestowed upon the Roman ruler, were in Christian eyes solely and uniquely Christ's. Thus to the Christian, regardless of his political feelings, emperor worship was blasphemy, and must always be refused and attacked. From the days of the Antonines, when the cult of the living emperor had become the universal practice, and when refusal to conform was regarded as deliberate rebellion and treason, Christians were constantly liable to arrest and even death. It is not surprising that the better the emperor, notably Marcus Aurelius, the more real the danger. But actually, while occasional reprisals took place, it was not until the middle of the 3rd cent. that any deliberate attempt was made by the Roman government to blot out the new religion. This reluctance, in view of the many deliberately provocative gestures and acts by zealous Christians, is really remarkable. Hitherto, it had been, so to speak, always an open season. A Christian head, whenever raised, was in danger; but it was not until Decius that a deliberate attempt to crush this upstart faith was seriously and methodically undertaken. During the earlier period, it is safe to say, it had not been the Roman emperors, nor even the Roman proconsuls or other administrative officials, but the priests of the several imperial cult centres who were most hostile and the leading instigators of local persecution. In a word, it was the Asiarch or the Bithyniarch, not the emperor, who was the real antagonist to be feared. And it may well be added that Jewish hostility to the new movement —which had arrogated to itself the claim to be the only true Judaism and the sole rightful heir and interpreter of the ancient scriptures—was one of the most constant aids and incentives to this zeal on the part of local priests of the imperial cult. But with the astutely convenient conversion of Constantine came the public and official recognition and endorsement of the Christian cult. It had now finally triumphed over all its rivals, not alone over Mithras but even over Caesar himself. Virgil's early line, *Deus nobis haec otia fecit* (Ecl. 1), which had been prompted by Octavian's first successes, was now seen to be fulfilled in the Lord Jesus Christ, who was the real and only king and emperor before whom every knee must bow. M. S. E.

ENAIM.—A place mentioned only in Gn $38^{14, 21}$ (AV 'an open place,' 'openly'). From the narrative we gather that it lay between Adullam and Timnah. Its site is unidentified. It is probably the same as **Enam.**

ENAM.—A town of Judah in the Shephelah, Jos 15^{34}; possibly the same as **Enaim** (q.v.).

ENAN.—Prince of Naphtali at the first census, Nu 1^{15} 2^{29} $7^{78, 83}$ 10^{27}.

ENASIBUS, 1 Es 9^{34} (AV, RV).—See ELIASHIB, **4.**

ENCAMPMENT BY THE SEA.—One of the stations in the itinerary of the children of Israel, where they encamped after leaving Elim, Nu 33^{10}. If the position of Elim be in the *Wâdī Gharandel*, then the camp by the sea is on the shore of the Gulf of Suez, somewhere south of the point where the *Wâdī eṭ-Ṭaiyibeh* opens to the coast. The curious return of the line of march to the seashore is a phenomenon that has always arrested the attention of travellers to Mt. Sinai: and if Mt. Sinai be really in the so-called Sinaitic peninsula, the camp can be located within a half-mile.

ENCHANTMENT.—See MAGIC, DIVINATION, AND SORCERY.

EN-DOR.—A town of Manasseh in the territory of Issachar, Jos 17^{11}; the home of a woman with a familiar spirit consulted by Saul on the eve of the battle of Gilboa, 1 S 28^{7ff}; and, according to a psalmist (83^{10}), the scene of the rout of Jabin and Sisera. It is probably modern *Endôr*, S. of Mount Tabor, where are several ancient caves.

EN-EGLAIM.—A locality on the Dead Sea, mentioned along with En-gedi, Ezk 47^{10}. It has not been identified, but is not improbably *ʿAin Feshkhah*, near *Qumrân*. Alternatively *ʿAin-el-Ḥajlah* has been suggested.

ENEMESSAR.—Name of a king of Assyria in Greek MSS and in AV and RV of To 1^{2}, where the Syriac and Latin give *Shalmaneser*, who is probably meant; so RSV. The corruption is best accounted for by the loss of *Sh* and *l* and the transposition of *m* and *n*; but naturally many explanations may be offered without conviction.

ENENEUS, 1 Es 5^{8} (RV).—One of the twelve leaders of the return from Babylon under Zerubbabel (AV **Enenius**). The name is omitted in the parallel list in Ezr 2, which gives only eleven leaders; but answers to **Nahamani** or **Bigvai** of Neh 7^{7} (RSV reads the latter).

ENENIUS, 1 Es 5[8] (AV).—See ENENEUS.

EN-GANNIM ('spring of gardens').—**1.** A town of Judah, mentioned with Zanoah and Eshtaol, Jos 15[34]; possibly modern *Beit Jemâl*. **2.** A Levitical city of Issachar, Jos 19[21] 21[29]. The parallel list in 1 Ch 6[73] has **Anem** (q.v.). In NT times it was called **Ginaea** (Josephus, *BJ* III. iii. 4 [48]); modern *Jenîn*, which has a fine spring, gardens, and palms.

EN-GEDI ('spring of the kid').—A place in the wilderness in the tribe of Judah (Jos 15[62]), where David maintained himself for a time when he fled from Saul (1 S 23[29] 24[1]). Here the Moabites and Ammonites came against Jehoshaphat (2 Ch 20[2]). The Shulammite compares her beloved to henna flowers in En-gedi (Ca 1[14]); and in Ezekiel's vision of the healing of the Dead Sea waters, he visualizes fishers spreading their nets here (Ezk 47[10]). An alternative name **Hazazon-tamar** is given in 2 Ch 20[2], which is also mentioned in Gn 14[7]. There is no doubt of the identification of En-gedi with *'Ain Jidi*, a spring of warm water that rises 330 feet above the level of the Dead Sea, about the middle of its W. side. The ancient settlement is to be particularly located at *Tell el-Jurn*, where the water of this spring was led by an aqueduct in the Roman period. The desert of En-gedi is mentioned by Pliny the Elder (*Hist. Nat.* v. xvii.) in connexion with Essene settlements, but the discovery of such settlements at *Khirbet Qumrân* and *'Ain Feshkha* make it uncertain whether Engedi itself was such a settlement. It is possible that the vision of Ezekiel determined the sectaries' choice of Engedi or its general vicinity as the site of their settlements.

ENGINE.—See FORTIFICATION, etc.

ENGLISH VERSIONS.—1. The history of the English Bible begins early in the history of the English people, though not quite at the beginning of it, and only slowly attains to any magnitude. The Bible which was brought into the country by the first missionaries, by Aidan in the north and Augustine in the south, was the Latin Bible; and for some considerable time after the first preaching of Christianity to the English no vernacular version would be required. Nor is there any trace of a vernacular Bible in the Celtic Church, which still existed in Wales and Ireland. The literary language of the educated minority was Latin; and the instruction of the newly converted English tribes was carried on by oral teaching and preaching. As time went on, however, and monasteries were founded, many of whose inmates were imperfectly acquainted with English or with Latin, a demand arose for English translations of the Scriptures. This took two forms. On the one hand, there was a call for word-for-word translations of the Latin, which might assist readers to a comprehension of the Latin Bible; and, on the other, for continuous versions or paraphrases, which might be read to, or by, those whose skill in reading Latin was small.

2. The earliest form, so far as is known, in which this demand was met was the poem of **Caedmon**, the work of a monk of Whitby in the third quarter of the 7th cent., which gives a metrical paraphrase of parts of both Testaments. The only extant MS of the poem (in the Bodleian) belongs to the end of the 10th cent., and it is doubtful how much of it really goes back to the time of Caedmon. In any case, the poem as it stands here does not appear to be later than the 8th cent. A tradition, originating with Bale, attributed an English version of the Psalms to Aldhelm, bishop of Sherborne († 707), but it appears to be quite baseless (see A. S. Cook, *Bibl. Quot. in Old Eng. Prose Writers*, 1878, pp. xiv–xviii). An Anglo-Saxon Psalter in an 11th cent. MS at Paris (partly in prose and partly in verse) has been identified, without any evidence, with this imaginary work. The well-known story of the death of **Bede** (in 735) shows him engaged on an English translation of St. John's Gospel [one early MS (at St. Gall) represents this as extending only to Jn 6[9]; but so abrupt a conclusion seems inconsistent with the course of the narrative]; but of this all traces have disappeared. The scholarship of the monasteries of Wearmouth and Jarrow, which had an important influence on the textual history of the Latin Vulgate, did not concern itself with vernacular translations; and no further trace of an English Bible appears until the 9th cent. To that period is assigned a word-for-word translation of the Psalter, written between the lines of a Latin MS (Cotton MS Vespasian A.I., in the British Museum), which was the progenitor of several similar glosses between that date and the 12th cent.; and to it certainly belongs the attempt of **Alfred** to educate his people by English translations of the works which he thought most needful to them. He is said to have undertaken a version of the Psalms, of which no portion survives, unless the prose portion (Ps 1–50) of the above-mentioned Paris MS is a relic of it; but we still have the translation of the Decalogue, the summary of the Mosaic law, and the letter of the Council of Jerusalem (Ac 15[23–29]), which he prefixed to his code of laws. To the 10th cent. belongs probably the verse portion of the Paris MS and the interlinear translation of the Gospels in Northumbrian dialect inserted by the priest Aldred in the **Lindisfarne Gospels** (British Museum), which is repeated in the Rushworth Gospels (Bodleian) of the same century, with the difference that the version of Matthew is there in the Mercian dialect. This is the earliest extant translation of the Gospels into English.

3. The earliest independent version of any of the books of the Bible has likewise generally been assigned to the 10th cent., but if this claim can be made good at all, it can apply only to the last years of that century. The version in question is a translation of the Gospels in the dialect of Wessex, of which six MSS (with a fragment of a seventh) are now extant. It was edited by W. Skeat, *The Holy Gospels in Anglo-Saxon* (1871–1877); two MSS are in the British Museum, two at Cambridge, and two (with a fragment of another) at Oxford. From the number of copies which still survive, it must be presumed to have had a certain circulation, at any rate in Wessex, and it continued to be copied for at least a century. The earliest MSS are assigned to the beginning of the 11th cent.; but it is observable that Aelfric the Grammarian, abbot of Eynsham, writing about 990, says that the English at that time 'had not the evangelical doctrines among their writings, . . . those books excepted which King Alfred wisely turned from Latin into English' (preface to Aelfric's *Homilies*, edited by B. Thorpe, London, 1843–46). In a subsequent treatise (*Treatise concerning the Old and New Testament*, ed. W. Lisle, London, 1623) also (the date of which is said to be about 1010, see Dietrich, *Zeitsch. f. hist. Theol.* 1856, quoted by Cook, *op. cit.*, p. lxiv) he speaks as if no English version of the Gospels were in existence, and refers his readers to his own homilies on the Gospels. Since Aelfric had been a monk at Winchester and abbot of Cerne, in Dorset, it is difficult to understand how he could have failed to know of the Wessex version of the Gospels, if it had been produced and circulated much before 1000; and it seems probable that it only came into existence early in the 11th cent. In this case it was contemporaneous with another work of translation, due to **Aelfric** himself. Aelfric, at the request of Aethelweard, son of his patron Aethelmaer, ealdorman of Devonshire and founder of Eynsham Abbey, produced a paraphrase of the Heptateuch, homilies containing epitomes of the Books of Kings and Job, and brief versions of Esther, Judith, and Maccabees. These have the interest of being the earliest extant English version of the narrative books of the OT. [The Heptateuch and Job were printed by E. Thwaites (Oxford, 1698). For the rest, see Cook, *op. cit.*]

4. The Norman Conquest checked for a time all the vernacular literature of England, including the translations of the Bible. One of the first signs of its revival was the production of the *Ormulum*, a poem which embodies metrical versions of the Gospels and Acts, written about the end of the 12th cent. The main

Biblical literature of this period, however, was French. For the benefit of the Norman settlers in England, translations of the greater part of both OT and NT were produced during the 12th and 13th cents. Especially notable among these was the version of the Apocalypse, because it was frequently accompanied by a series of illustrations, the best examples of which are the finest (and also the most quaint) artistic productions of the period in the sphere of book-illustration. Nearly 90 MSS of this version are known, ranging from the first half of the 12th cent. to the first half of the 15th [see S. Berger, *La Bible Française au moyen âge*, p. 78 ff; L. Delisle and P. Meyer, *L'Apocalypse en Français* (Paris, 1901); and *New Palaeographical Society*, part 2, plates 38, 39], some having been produced in England, and others in France; and in the 14th cent. it reappears in an English dress, having been translated apparently about that time. This English version (which at one time was attributed to Wycliffe) is known in no less than 16 MSS, which fall into at least two classes [see Miss A. C. Paues, *A Fourteenth Century English Biblical Version* (Cambridge, 1902), pp. 24–30]; and it is noteworthy that from the second of these was derived the version which appears in the revised Wycliffite Bible, to be mentioned presently.

5. The 14th cent., which saw the practical extinction of the general use of the French language in England, and the rise of a real native literature, saw also a great revival of vernacular Biblical literature, beginning apparently with the Book of Psalms. Two English versions of the Psalter were produced at this period, one of which enjoyed great popularity. This was the work of **Richard Rolle**, hermit of Hampole, in Yorkshire (d 1349). It contains the Latin text of the Psalter, followed verse by verse by an English translation and commentary. Originally written in the northern dialect, it soon spread over all England, and many MSS of it still exist in which the dialect has been altered to suit southern tastes. Towards the end of the century Rolle's work suffered further change, the commentary being re-written from a strongly Lollard point of view, and in this shape it continued to circulate far into the 16th cent. Another version of the Psalter was produced contemporaneously with Rolle's, somewhere in the West Midlands. The authorship of it was formerly attributed to William of Shoreham, vicar of Chart Sutton, in Kent, but for no other reason than that in one of the two MSS in which it is preserved (Brit. Mus. Add. MS 17376, the other being at Trinity College, Dublin) it is now bound up with his religious poems. The dialect, however, proves that this authorship is impossible, and the version must be put down as anonymous. As in the case of Rolle's translation, the Latin and English texts are intermixed, verse by verse; but there is no commentary. [See K. S. Bülbring, *The Earliest Complete English Prose Psalter* (Early English Text Society), 1891.]

6. The Psalter was not the only part of the Bible of which versions came into existence in the course of the 14th cent. At Magdalene College, Cambridge (Pepys MS 2498), is an English narrative of the Life of Christ, compiled out of a re-arrangement of the Gospels for Sundays and holy days throughout the year. Quite recently, too, a group of MSS, which (so far as they were known at all) had been regarded as belonging to the Wycliffite Bible, has been shown by Miss Anna C. Paues [*A Fourteenth Century English Biblical Version* (Cambridge, 1902)] to contain an independent translation of the NT. It is not complete, the Gospels being represented only by Mt 1^1–6^8, and the Apocalypse being altogether omitted. The original nucleus seems, indeed, to have consisted of the four larger Catholic Epistles and the Epistles of St. Paul, to which were subsequently added 2 and 3 John, Jude, Acts, and Mt 1^1–6^8. Four MSS of this version are at present known, the oldest being one at Selwyn College, Cambridge, which was written about 1400. The prologue narrates that the translation was made at the request of a monk and a nun by their superior, who defers to their earnest desire, although, as he says, it is at the risk of his life. This phrase seems to show that the work was produced after the rise of the great party controversy which is associated with the name of Wycliffe.

7. With **Wycliffe** (1320–1384) we reach a landmark in the history of the English Bible, in the production of the first complete version of both OT and NT. It belongs to the last period of Wycliffe's life, that in which he was engaged in open war with the Papacy and with most of the official chiefs of the English Church. It was connected with his institution of 'poor priests,' or mission preachers, and formed part of his scheme of appealing to the populace in general against the doctrines and supremacy of Rome. The NT seems to have been completed about 1380, the OT between 1382 and 1384. Exactly how much of it was done by Wycliffe's own hand is uncertain. The greater part of the OT (as far as Bar 3^{20}) is assigned in an Oxford MS to Nicholas Hereford, one of Wycliffe's principal supporters at that university; and it is certain that this part of the translation is in a different style (more stiff and pedantic) from the rest. The NT is generally attributed to Wycliffe himself, and he may also have completed the OT, which Hereford apparently had to abandon abruptly, perhaps when he was summoned to London and excommunicated in 1382. This part of the work is free and vigorous in style, though its interpretation of the original is often strange, and many sentences in it can have conveyed very little idea of their meaning to its readers. Such as it was, however, it was a complete English Bible, addressed to the whole English people, high and low, rich and poor. That this is the case is proved by the character of the copies which have survived (about 30 in number). Some are large folio volumes, handsomely written and illuminated in the best, or nearly the best, style of the period; such is the fine copy, in two volumes (now Brit. Mus. Egerton MSS 617, 618), which once belonged to Thomas, Duke of Gloucester, uncle of Richard II. Others are plain copies of ordinary size, intended for private persons or monastic libraries; for it is clear that, in spite of official disfavour and eventual prohibition, there were many places in England where Wycliffe and his Bible were welcomed. Wycliffe, indeed, enjoyed advantages from personal repute and influential support such as had been enjoyed by no English translator since Alfred. An Oxford scholar, at one time Master of Balliol, holder of livings successively from his college and the Crown, employed officially on behalf of his country in controversy with the Pope, the friend and protégé of John of Gaunt and other prominent nobles, and enjoying as a rule the strenuous support of the University of Oxford, Wycliffe was in all respects a person of weight and influence in the realm, who could not be silenced or isolated by the opposition of bishops such as Arundel. The work that he had done had struck its roots too deep to be destroyed, and though it was identified with Lollardism by its adversaries, its range was much wider than that of any one sect or party.

8. Wycliffe's translation, however, though too strong to be overthrown by its opponents, was capable of improvement by its friends. The difference of style between Hereford and his continuator or continuators, the stiff and unpopular character of the work of the former, and the imperfections inevitable in a first attempt on so large a scale, called aloud for revision; and a second Wycliffite Bible, the result of a very complete revision of its predecessor, saw the light not many years after the Reformer's death. The authorship of the second version is doubtful. It was assigned by Forshall and Madden, the editors of the Wycliffite Bible, to **John Purvey**, one of Wycliffe's most intimate followers; but the evidence is purely circumstantial, and rests mainly on verbal resemblances between the translator's preface and known works of Purvey, together with the fact that a copy of this preface is found attached to a copy of the earlier version which was once Purvey's property. What is certain is that the second version is

based upon the first, and that the translator's preface is permeated with Wycliffite opinions. This version speedily superseded the other, and in spite of a decree passed, at Arundel's instigation, by the Council of Blackfriars in 1408, it must have circulated in large numbers. Over 140 copies are still in existence, many of them small pocket volumes such as must have been the personal property of private individuals for their own study. Others belonged to the greatest personages in the land, and copies are still in existence which formerly had for owners Henry VI., Henry VII., Edward VI., and Elizabeth.

9. At this point it seems necessary to say something of the theory which has been propounded by the well-known Roman Catholic historian, Abbot Gasquet, to the effect that the versions which pass under the name of 'Wycliffite' were not produced by Wycliffe or his followers at all, but were translations authorized and circulated by the heads of the Church of England, Wycliffe's particular enemies [*The Old English Bible*, 1897, pp. 102–178]. The strongest argument adduced in support of this view is the possession of copies of the versions in question both by kings and princes of England, and by religious houses and persons of unquestioned orthodoxy. This does, indeed, prove that the persecution of the English Bible and its possessors by the authorities of the Catholic Church was not so universal or continuous as it is sometimes represented to have been, but it does not go far towards disproving the Wycliffite authorship of versions which can be demonstratively connected, as these are, with the names of leading supporters of Wycliffe, such as Hereford and Purvey; the more so since the evidence of orthodox ownership of many of the copies in question dates from times long after the cessation of the Lollard persecution. Dr. Gasquet also denies that there is any real evidence connecting Wycliffe with the production of an English Bible at all; but in order to make good this assertion he has to ignore several passages in Wycliffe's own writings in which he refers to the importance of a vernacular version (to the existence of his own version he could not refer, since that was produced only at the end of his life), and to do violence alike to the proper translation and to the natural interpretation of passages written by Wycliffe's opponents (Arundel, Knyghton, and the Council of Oxford in 1408) in which Wycliffe's work is mentioned and condemned. Further, Dr. Gasquet denies that the Lollards made a special point of the circulation of the Scriptures in the vernacular, or were charged with so doing by the ecclesiastical authorities who prosecuted them; and in particular he draws a distinction between the versions now extant and the Bible on account of the heretical nature of which (among other charges) one Richard Hun was condemned by the Bishop of London in 1514. It has, however, been shown conclusively that the depositions of the witnesses against the Lollards (which cannot be regarded as wholly irrelevant to the charges brought against them) constantly make mention of the possession of vernacular Bibles; and that the charges against Richard Hun, based upon the prologue to the Bible in his possession, are taken verbatim from the prologue to the version which we now know as Purvey's. It is true that Dr. Gasquet makes the explicit statement that 'we shall look in vain in the edition of Wyclifite Scriptures published by Forshall and Madden for any trace of these errors' (*i.e.* the errors found by Hun's prosecutors in the prologue to his Bible); but a writer in the *Church Quarterly Review* (Jan. 1901, pp. 292 ff) has printed in parallel columns the charges against Hun and the corresponding passages in Purvey's prologue, which leave no possibility of doubt that Hun was condemned for possessing a copy of the version which is commonly known as Purvey's, or as the later Wycliffite version. The article in the *Church Quarterly Review* must be read by everyone who wishes to investigate Dr. Gasquet's theory fully; the evidence there adduced is decisive as to the unsoundness of Dr. Gasquet's historical position. It is impossible to attribute to the official heads of the English Church a translation the prologue to which (to quote but two phrases) speaks of 'the pardouns of the bisschopis of Rome, that ben opin leesingis,' and declares that 'to eschewe pride and speke onour of God and of his lawe, and repreue synne bi weie of charite, is matir and cause now whi prelatis and summe lordis sclaundren men, and clepen hem lollardis, eretikis, and riseris of debate and of treson agens the king.' In the face of this evidence it will be impossible in future to deny that the Wycliffite Bible is identical with that which we now possess, and that it was at times the cause of the persecution of its owners by the authorities of the Church. That this persecution was partial and temporary is likely enough. Much of it was due to the activity of individual bishops, such as Arundel; but not all the bishops shared Arundel's views. Wycliffe had powerful supporters, notably John of Gaunt and the University of Oxford, and under their protection copies of the vernacular Bible could be produced and circulated. It is, moreover, likely, not to say certain, that as time went on the Wycliffite origin of the version would often be forgotten. Apart from the preface to Purvey's edition, which appears only rarely in the extant MSS, there is nothing in the translation itself which would betray its Lollard origin; and it is quite probable that many persons in the 15th and early 16th cent. used it without any suspicion of its connexion with Wycliffe. Sir Thomas More, whose good faith there is no reason to question, appears to have done so; otherwise it can only be supposed that the orthodox English Bibles of which he speaks, and which he expressly distinguishes from the Bible which caused the condemnation of Richard Hun, have wholly disappeared, which is hardly likely. If this be admitted, the rest of More's evidence falls to the ground. The history of the Wycliffite Bible, and of its reception in England, would in some points bear re-statement; but the ingenious, and at first sight plausible, theory of Abbot Gasquet has failed to stand examination, and it is to be hoped that it may be allowed to lapse.

10. With the production of the second Wycliffite version the history of the manuscript English Bible comes to an end. Purvey's work was on the level of the best scholarship and textual knowledge of the age, and it satisfied the requirements of those who needed a vernacular Bible. That it did not reach modern standards in these respects goes without saying. In the first place, it was translated from the Latin Vulgate, not from the original Hebrew and Greek, with which there is no reason to suppose that Wycliffe or his assistants were familiar. Secondly, its exegesis is often deficient, and some passages in it must have been wholly unintelligible to its readers. This, however, may be said even of some parts of the AV, so that it is small reproach to Wycliffe and Purvey; and on the whole it is a straightforward and intelligible version of the Scriptures. A few examples of this, the first complete English Bible, and the first version in which the English approaches sufficiently near to its modern form to be generally intelligible, may be given here:

Jn 14^{1-7}. Be not youre herte affraied, ne drede it. Ye bileuen in god, and bileue ye in me. In the hous of my fadir ben many dwellyngis: if ony thing lasse I hadde seid to you, for I go to make redi to you a place. And if I go and make redi to you a place, eftsone I come and I schal take you to my silf, that where I am, ye be. And whidir I go ye witen: and ye witen the wey. Thomas seith to him, Lord, we witen not whidir thou goist, and hou moun we wite the weie. Ihesus seith to him, I am weye truthe and liif: no man cometh to the fadir, but bi me. If ye hadden knowe me, sothli ye hadden knowe also my fadir: and aftirwarde ye schuln knowe him, and ye han seen hym.

2 Co 1^{17-20}. But whanne I wolde this thing, whether I uside unstidfastnesse? ether tho thingis that I thenke, I thenke aftir the fleische, that at me be it is and it is not. But god is trewe, for oure word that was at you, is and is not, is not thereinne, but is in it. Forwhi ihesus crist the sone of god, which is prechid among you bi us, bi me

and siluan and tymothe, ther was not in hym is and is not, but is was in hym. Forwhi hou many euer ben biheestis of god, in thilke is ben fulfillid. And therfor and bi him we seien Amen to god, to oure glorie.

Eph 3^{14-21}. For grace of this thing I bowe my knees to the fadir of oure lord ihesus crist, of whom eche fadirheed in heuenes and in erthe is named, that he geue to you aftir the richessis of his glorie, vertu to be strengthid bi his spirit in the ynner man; that criste dwelle bi feith in youre hertis; that ye rootid and groundid in charite, moun comprehende with alle seyntis whiche is the breede and the lengthe and the highist and the depnesse; also to wite the charite of crist more excellent thanne science, that ye be fillid in all the plente of god. And to hym that is myghti to do alle thingis more plenteuousli thanne we axen, or undirstande bi the vertu that worchith in us, to hym be glorie in the chirche and in crist ihesus in to alle the generaciouns of the worldis. Amen.

11. The English manuscript Bible was now complete, and no further translation was issued in this form. The Lollard controversy died down amid the strain of the French wars and the passions of the wars of the Roses; and when, in the 16th cent., religious questions once more came to the front, the situation had been fundamentally changed through the invention of printing. The first book that issued from the press was the Latin Bible (popularly known as the Mazarin Bible), published by Fust and Gutenberg in 1456. For the Latin Bible (the form in which the Scriptures had hitherto been mainly known in Western Europe) there was indeed so great a demand, that no less than 124 editions of it are said to have been issued before the end of the 15th cent.; but it was only slowly that scholars realized the importance of utilizing the printing press for the circulation of the Scriptures, either in their original tongues, or in the vernaculars of Europe. The Hebrew Psalter was printed in 1477, the complete OT in 1488. The Greek Bible, both OT and NT, was included in the great Complutensian Polyglot of Cardinal Ximenes, printed in 1514–1517, but not published till 1522. The Greek NT (edited by Erasmus) was first published by Froben in 1516, the OT by the Aldine press in 1518. In the way of vernacular versions, a French Bible was printed at Lyons about 1478, and another about 1487; a Spanish Pentateuch was printed (by Jews) in 1497; a German Bible was printed at Strassburg by Mentelin in 1466, and was followed by eighteen others (besides many Psalters and other separate books) between that date and 1522, when the first portion of Luther's translation appeared. In England, Caxton inserted the main part of the OT narrative in his translation of the *Golden Legend* (which in its original form already contained the Gospel story), published in 1483; but no regular English version of the Bible was printed until 1525, with which date a new chapter in the history of the English Bible begins.

12. It was not the fault of the translator that it did not appear at least as early as Luther's. **William Tyndale** (*c* 1490–1536) devoted himself early to Scripture studies, and by the time he had reached the age of about 30 he had taken for the work of his life the translation of the Bible into English. He was born in Gloucestershire, where his family seems to have used the name of Hutchins or Hychins, as well as that of Tyndale, so that he is himself sometimes described by both names; and he became a member of Magdalen Hall (a dependency of Magdalen College) at Oxford, where he definitely associated himself with the Protestant party and became known as one of its leaders. He took his degree as B.A. in 1512, as M.A. in 1515, and at some uncertain date he is said (by Foxe) to have gone to Cambridge. If this was between 1511 and 1515, he would have found Erasmus there; but in that case it could have been only an interlude in the middle of his Oxford course, and perhaps it is more probable that his visit belongs to some part of the years 1515 to 1520, as to which there is no definite information. About 1520 he became resident tutor in the house of Sir John Walsh, at Little Sodbury in Gloucestershire, to which period belongs his famous saying, in controversy with an opponent: 'If God spare my life, ere many years I will cause a boy that driveth the plough shall know more of the Scripture than thou doest.' With this object he came up to London in 1523, and sought a place in the service of Tunstall, bishop of London, a scholar and patron of scholars, of whom Erasmus had spoken favourably; but here he received no encouragement. He was, however, taken in by Alderman Humphrey Monmouth, in whose house he lived as chaplain and studied for six months; at the end of which time he was forced to the conclusion 'not only that there was no room in my lord of London's palace to translate the New Testament, but also that there was no place to do it in all England.'

13. About May 1524, therefore, Tyndale left England and settled in the free city of Hamburg, and in the course of the next twelve months the first stage of his great work was completed. Whether during this time he visited Luther at Wittenberg is quite uncertain; what is certain, and more important, is that he was acquainted with Luther's writings. In 1525, the translation of the NT being finished, he went to Cologne to have it printed at the press of Peter Quentel. Three thousand copies of the first ten sheets of it, in quarto, had been printed off when rumours of the work came to the ears of John Cochlaeus, a bitter enemy of the Reformation. To obtain information he approached the printers (who were also engaged upon work for him), and having loosened their tongues with wine he learnt the full details of Tyndale's enterprise, and sent warning forthwith to England. Meanwhile Tyndale escaped with the printed sheets to Worms, in the Lutheran disposition of which place he was secure from interference, and proceeded with his work at the press of Peter Schoeffer. Since, however, a description of the Cologne edition had been sent to England, a change was made in the *format*. The text was set up again in octavo, and without the marginal notes of the quarto edition; and in this form the first printed English NT was given to the world early in 1526. About the same time an edition in small quarto, with marginal notes, was also issued, and it is probable (though full proof is wanting) that this was the completion of the interrupted Cologne edition. Three thousand copies of each edition were struck off; but so active were the enemies of the Reformation in their destruction, that they have nearly disappeared off the face of the earth. One copy of the octavo edition, complete but for the loss of its title-page, is at the Baptist College at Bristol, whither it found its way from the Harley Library, to which it once belonged; and an imperfect copy is in the library of St. Paul's Cathedral. Of the quarto, all that survives is a fragment consisting of eight sheets (Mt 1^{1}–22^{12}) in the Grenville Library in the British Museum.

14. The hostility of the authorities in Church and State in England was indeed undisguised. Sir T. More attacked the translation as false and heretical, and as disregarding ecclesiastical terminology. Wolsey and the bishops, with Henry's assent, decreed that it should be burnt; and burnt it was at Paul's Cross, after a sermon from Bishop Tunstall. Nevertheless, fresh supplies continued to pour into England, the money expended in buying up copies for destruction serving to pay for the production of fresh editions. Six editions are said to have been issued between 1526 and 1530; and the zeal of the authorities for its destruction was fairly matched by the zeal of the reforming party for its circulation. It was, in fact, evident that the appetite for an English Bible, once fairly excited, could not be wholly balked. In 1530 an assembly convoked by Archbishop Warham, while maintaining the previous condemnation of Tyndale, and asserting that it was not expedient at that time to divulge the Scripture in the English tongue, announced that the king would have the NT faithfully translated by learned men, and

published ' as soon as he might see their manners and behaviour meet, apt, and convenient to receive the same.'

15. Tyndale's first NT was epoch-making in many ways. It was the first English printed NT ; it laid the foundations, and much more than the foundations, of the AV of 1611 ; it set on foot the movement which went forward without a break until it culminated in the production of that AV ; and it was the first English Bible that was translated directly from the original language. All the English manuscript Bibles were translations from the Vulgate ; but Tyndale's NT was taken from the Greek, which he knew from the editions by Erasmus, published in 1516, 1519, and 1522. As subsidiary aids he employed the Latin version attached by Erasmus to his Greek text, Luther's German translation of 1522, and the Vulgate ; but it has been made abundantly clear that he exercised independent judgment in his use of these materials, and was by no means a slavish copier of Luther. In the marginal notes attached to the quarto edition his debt to Luther was greater ; for (so far as can be gathered from the extant fragment) more than half the notes were taken direct from the German Bible, the rest being independent. It is in this connexion with Luther, rather than in anything to be found in the work itself, that the secret of the official hostility to Tyndale's version is to be found. That the translation itself was not seriously to blame is shown by the extent to which it was incorporated in the AV, though no doubt to persons who knew the Scriptures only in the Latin Vulgate its divergence from accuracy may have appeared greater than was in fact the case. The octavo edition had no extraneous matter except a short preface, and therefore could not be obnoxious on controversial grounds ; and the comments in the quarto edition are generally exegetical, and not polemical. Still, there could be no doubt that they were the work of an adherent of the Reformation, and as such the whole translation fell under the ban of the opponents of the Reformation.

16. Tyndale's work did not cease with the production of his NT. Early in 1530 a translation of the Pentateuch was printed for him by Hans Luft, at Marburg in Hesse. The colophon to Genesis is dated Jan. 17, 1530. In England, where the year began on March 25, this would have meant 1531 according to our modern reckoning ; but in Germany the year generally began on Jan. 1, or at Christmas. The only perfect copy of this edition is in the British Museum. The different books must have been set up separately, since Genesis and Numbers are printed in black letter, Exodus, Leviticus, and Deuteronomy in Roman ; but there is no evidence that they were issued separately. The translation was made (for the first time) from the Hebrew, with which language there is express evidence that Tyndale was acquainted. The book was provided with a prologue and with marginal notes, the latter being often controversial. In 1531 he published a translation of the Book of Jonah, of which a single copy (now in the British Museum) came to light in 1861. After this he seems to have reverted to the NT, of which he issued a revised edition in 1534. The immediate occasion of this was the appearance of an unauthorized revision of the translation of 1525, by one George Joye, in which many alterations were made of which Tyndale disapproved. Tyndale's new edition was printed by Martin Empereur of Antwerp, and published in Nov. 1534. One copy of it was printed on vellum, illuminated, and presented to Anne Boleyn, who had shown favour to one of the agents employed in distributing Tyndale's earlier work. It bears her name on the fore-edge, and is now in the British Museum. The volume is a small octavo, and embodies a careful revision of his previous work. Since it was intended for liturgical use, the church lections were marked in it, and in an appendix were added, ' The Epistles taken out of the Old Testament, which are read in the church after the use of Salisbury upon certain days of the year.' These consist of 42 short passages from the OT (8 being taken from the Apocrypha), and constitute an addition to Tyndale's work as a translator of the OT. The text of the NT is accompanied throughout by marginal notes, differing (so far as we are in a position to compare them) from those in the quarto of 1525, and very rarely polemical. Nearly all the books are preceded by prologues, which are for the most part derived from Luther (except that to Hebrews, in which Tyndale expressly combats Luther's rejection of its Apostolic authority).

17. The edition of 1534 did not finally satisfy Tyndale, and in the following year he put forth another edition ' yet once again corrected.' [The volume bears two dates, 1535 and 1534, but the former, which stands on the first title-page, must be taken to be that of the completion of the work.] It bears the monogram of the publisher, Godfried van der Haghen, and is sometimes known as the GH edition. It has no marginal notes. Another edition, which is stated on its title-page to have been finished in 1535, contains practically the same text, but is notable for its spelling, which appears to be due to a Flemish compositor, working by ear and not by sight. These editions of 1535, which embody several small changes from the text of 1534, represent Tyndale's work in its final form. Several editions were issued in 1536, but Tyndale was not then in a position to supervise them. In May 1535, through the treachery of one Phillips, he was seized by some officers of the emperor, and carried off from Antwerp (where he had lived for a year past) to the castle of Vilvorde. After some months' imprisonment he was brought to trial, condemned, and finally strangled and burnt at the stake on October 16, 1536, crying ' with a fervent, great, and a loud voice, " Lord, open the King of England's eyes." '

18. Coverdale's Bible (1535).—Tyndale never had the satisfaction of completing his gift of an English Bible to his country ; but during his imprisonment he may have learnt that a complete translation, based largely upon his own, had actually been produced. The credit for this achievement, the first complete printed English Bible, is due to Miles Coverdale (1488–1569), afterwards bishop of Exeter (1551–1553). The details of its production are obscure. Coverdale met Tyndale abroad in 1529, and is said to have assisted him in the translation of the Pentateuch. His own work was done under the patronage of Cromwell, who was anxious for the publication of an English Bible ; and it was no doubt forwarded by the action of Convocation, which, under Cranmer's leading, had petitioned in 1534 for the undertaking of such a work. It was probably printed by Froschover at Zürich ; but this has never been absolutely demonstrated. It was published at the end of 1535, with a dedication to Henry VIII. By this time the conditions were more favourable to a Protestant Bible than they had been in 1525. Henry had finally broken with the Pope, and had committed himself to the principle of an English Bible. Coverdale's work was accordingly tolerated by authority, and when the second edition of it appeared in 1537 (printed by an English printer, Nycolson of Southwark), it bore on its title-page the words, ' Set forth with the Kinges moost gracious licence.' In thus licensing Coverdale's translation, Henry probably did not know how far he was sanctioning the work of Tyndale, which he had previously condemned. In the NT, in particular, Tyndale's version is the basis of Coverdale's, and to a somewhat less extent this is also the case in the Pentateuch and Jonah ; but Coverdale revised the work of his predecessor with the help of the Zürich German Bible of Zwingli and others (1524–1529), a Latin version by Pagninus, the Vulgate, and Luther. In his preface he explicitly disclaims originality as a translator, and there is no sign that he made any noticeable use of the Greek and Hebrew ; but he used the available Latin, German, and English versions with judgment. In the parts of the OT which Tyndale had not published he appears to have translated mainly from the Zürich Bible [Coverdale's Bible of 1535 was reprinted by Bagster (1838)].

19. In one respect Coverdale's Bible was epoch-making, namely, in the arrangement of the Books of the

OT. In the Vulgate, as is well known, the books which are now classed as Apocrypha are intermingled with the other books of the OT. This was also the case with the LXX, and in general it may be said that the Christian Church had adopted this view of the Canon. It is true that many of the greatest Christian Fathers had protested against it, and had preferred the Hebrew Canon, which rejects these books. The Canon of Athanasius places the Apocrypha in a class apart; the Syriac Bible omitted them; Eusebius and Gregory Nazianzen appear to have held similar views; and Jerome refused to translate them for his Latin Bible. Nevertheless the Church at large, both East and West, retained them in its Bible, and the provincial Council of Carthage (A.D. 397), under the influence of Augustine, expressly included them in the Canon. In spite of Jerome, the Vulgate, as it circulated in Western Europe, regularly included the disputed books; and Wycliffe's Bible, being a translation from the Vulgate, naturally has them too. On the other hand, Luther, though recognizing these books as profitable and good for reading, placed them in a class apart, as 'Apocrypha,' and in the same way he segregated Hebrews, James, Jude, and Revelation at the end of the NT, as of less value and authority than the rest. This arrangement appears in the table of contents of Tyndale's NT in 1525, and was adopted by Coverdale, Matthew, and Taverner. It is to Tyndale's example, no doubt, that the action of Coverdale is due. His Bible is divided into six parts—(1) Pentateuch; (2) Joshua–Esther; (3) Job–'Solomon's Balettes' (*i.e.* Cant.); (4) Prophets; (5) 'Apocripha, the bokes and treatises which amonge the fathers of olde are not rekened to be of like authorite with the other bokes of the byble, nether are they founde in the Canon of the Hebrue'; (6) NT. This represents the view generally taken by the Reformers, both in Germany and in England, and so far as concerns the English Bible, Coverdale's example was decisive. On the other hand, the Roman Church, at the Council of Trent (1546), adopted by a majority the opinion that all the books of the larger Canon should be received as of equal authority, and for the first time made this a dogma of the Church, enforced by an anathema. In 1538, Coverdale published a NT with Latin (Vulgate) and English in parallel columns, revising his English to bring it into conformity with the Latin; but this (which went through three editions with various changes) may be passed over, as it had no influence on the general history of the English Bible.

20. Matthew's Bible (1537).—In the same year as the second edition of Coverdale's Bible another English Bible appeared, which likewise bore upon its title-page the statement that it was 'set forth with the Kinges most gracyous lycence.' It was completed not later than Aug. 4, 1537, on which day Cranmer sent a copy of it to Cromwell, commending the translation, and begging Cromwell to obtain for it the king's licence; in which, as the title-page prominently shows, he was successful. The origin of this version is slightly obscure, and certainly was not realized by Henry when he sanctioned it. The Pentateuch and NT are taken direct from Tyndale with little variation (the latter from the final 'GH' revision of 1535). The books of the OT from Ezra to Malachi (including Jonah) are taken from Coverdale, as also is the Apocrypha. But the historical books of the OT (Joshua–2 Chronicles) are a new translation, as to the origin of which no statement is made. It is, however, fairly certain, from a combination of evidence, that it was Tyndale's (see Westcott[3], pp. 169–179). The style agrees with that of Tyndale's other work; the passages which Tyndale published as 'Epistles' from the OT in his NT of 1534 agree in the main with the present version in these books, but not in those taken from Coverdale; and it is expressly stated in Hall's *Chronicle* (completed and published by Grafton, one of the publishers of Matthew's Bible) that Tyndale, in addition to the NT, translated also 'the v bookes of Moses, Josua, Judicum, Ruth, the bookes of the Kynges and the bookes of Paralipomenon, Nehemias or the fyrst of Esdras, the prophet Jonas, and no more of ye holy scripture.' If we suppose the version of Ezra-Nehemiah to have been incomplete, or for some reason unavailable, this statement harmonizes perfectly with the data of the problem. Tyndale may have executed the translation during his imprisonment, at which time we know that he applied for the use of his Hebrew books. The book was printed abroad, at the expense of R. Grafton and E. Whitchurch, two citizens of London, who issued it in London. On the title-page is the statement that the translator was Thomas Matthew, and the same name stands at the foot of the dedication to Henry VIII. Nothing is known of any such person, but tradition identifies him with **John Rogers** (who in the register of his arrest in 1555 is described as 'John Rogers *alias* Matthew'), a friend and companion of Tyndale. It is therefore generally believed that this Bible is due to the editorial work of John Rogers, who had come into possession of Tyndale's unpublished translation of the historical books of the OT, and published them with the rest of his friend's work, completing the Bible with the help of Coverdale. It may be added that the initials I. R. (Rogers), W. T. (Tyndale), R. G. and E. W. (Grafton and Whitchurch), and H. R. (unidentified, ? Henricus Rex), are printed in large letters on various blank spaces throughout the OT. The arrangement of the book is in four sections: (1) Genesis–Canticles, (2) Prophets, (3) Apocrypha (including for the first time the Prayer of Manasses, translated from the French of Olivetan), (4) NT. There are copious annotations, of a decidedly Protestant tendency, and Tyndale's outspoken Prologue to the Romans is included in it. The whole work, therefore, was eminently calculated to extend the impulse given by Tyndale, and to perpetuate his work.

21. Taverner's Bible (1539).—Matthew's Bible formed the basis for yet another version, which deserves brief mention, though it had no influence on the general development of the English Bible. Richard Taverner, formerly a student of Cardinal College [Christ Church], Oxford, was invited by some London printers ('John Byddell for Thomas Barthlet') to prepare at short notice a revision of the existing Bible. In the OT his alterations are verbal, and aim at the improvement of the style of the translation; in the NT, being a good Greek scholar, he was able to revise it with reference to the original Greek. The NT was issued separately in two editions, in the same year (1539) as the complete Bible; but the success of the official version next to be mentioned speedily extinguished such a personal venture as this. Taverner's Bible is sometimes said to have been the first English Bible completely printed in England; but this honour appears to belong rather to Coverdale's second edition.

22. The Great Bible (1539–1541).—The fact that Taverner was invited to revise Matthew's Bible almost immediately after its publication shows that it was not universally regarded as successful; but there were in addition other reasons why those who had promoted the circulation and authorization of Matthew's Bible should be anxious to see it superseded. As stated above, it was highly controversial in character, and bore plentiful evidence of its origin from Tyndale. Cromwell and Cranmer had, no doubt, been careful not to call Henry's attention to these circumstances; but they might at any time be brought to his notice, when their own position would become highly precarious. It is, indeed, strange that they ever embarked on so risky an enterprise. However that may be, they lost little time in inviting Coverdale to undertake a complete revision of the whole, which was ready for the press early in 1538. The printing was begun by Regnault of Paris, where more sumptuous typography was possible than in England. In spite, however, of the assent of the French king having been obtained, the Inquisition intervened, stopped the printing, and seized the sheets. Some of the sheets, however, had previously been got away to England; others were re-purchased from a tradesman to whom they had been sold; and ultimately, under Cromwell's direction,

printers and presses were transported from Paris to London, and the work completed there by Grafton and Whitchurch, whose imprint stands on the magnificent title-page (traditionally ascribed to Holbein) depicting the dissemination of the Scriptures from the hands of Henry, through the instrumentality of Cromwell and Cranmer, to the general mass of the loyal and rejoicing populace. [A special copy on vellum, with illuminations, was prepared for Cromwell himself, and is now in the library of St. John's College, Cambridge.]

23. The first edition of the Great Bible appeared in April 1539, and an injunction was issued by Cromwell that a copy of it should be set up in every parish church. It was consequently the first (and only) English Bible formally authorized for public use; and contemporary evidence proves that it was welcomed and read with avidity. No doubt, as at an earlier day (Ph 1^{15}), some read the gospel 'from envy and rivalry, but others from good will'; but in one way or another, for edification or for controversy, the reading of the Bible took a firm hold on the people of England, a hold which has never since been relaxed, and which had much to do with the stable foundation of the Protestant Church in Great Britain. Nor was the translation, though still falling short of the perfection reached three-quarters of a century later, unworthy of its position. It had many positive merits, and marked a distinct advance upon all its predecessors. Coverdale, though without the force and originality, or even the scholarship, of Tyndale, had some of the more valuable gifts of a translator, and was well qualified to make the best use of the labours of his predecessors. He had scholarship enough to choose and follow the best authorities, he had a happy gift of smooth and effective phraseology, and his whole heart was in his work. As the basis of his revision he had Tyndale's work and his own previous version; and these he revised with reference to the Hebrew, Greek, and Latin, with special assistance in the OT from the Latin translation by Sebastian Münster published in 1534–1535 (a work decidedly superior to the Zürich Bible, which had been his principal guide in 1534), while in the NT he made considerable use of Erasmus. With regard to the use of ecclesiastical terms he followed his own previous example, against Tyndale, in retaining the familiar Latin phrases; and he introduced a considerable number of words and sentences from the Vulgate, which do not appear in the Hebrew or Greek. The text is divided into five sections —(1) Pentateuch, (2) Joshua–Job, (3) Psalms–Malachi, (4) Apocrypha, here entitled 'Hagiographa,' though quite different from the books to which that term is applied in the Hebrew Bible, (5) NT, in which the traditional order of the books is restored in place of Luther's. Coverdale intended to add a commentary at the end, and with this view inserted various marks in the margins, the purpose of which he explains in the Prologue; but he was unable to obtain the sanction of the Privy Council for these, and after standing in the margin for three editions the sign-post marks were withdrawn.

24. The first edition was exhausted within twelve months, and in April 1540 a second edition appeared, this time with a prologue by Cranmer (from which fact the Great Bible is sometimes known as **Cranmer's Bible**, though he had no part in the translation). Two more editions followed in July and November, the latter (Cromwell having now been overthrown and executed) appearing under the nominal patronage of Bishops Tunstall and Heath. In 1541 three editions were issued. None of these editions was a simple reprint. The Prophets, in particular, were carefully revised with the help of Münster for the second edition. The fourth edition (Nov. 1540) and its successors revert in part to the first. These seven editions spread the knowledge of the Bible in a sound, though not perfect, version broadcast through the land; and one portion of it has never lost its place in the liturgy. In the first Prayer Book of Edward VI. the Psalter (like the other Scripture passages) was taken from the Great Bible. In 1662, when the other passages were taken from the version of 1611, a special exception was made of the Psalter, on account of the familiarity which it had achieved, and consequently Coverdale's version has held its place in the Book of Common Prayer to this day, and it is in his words that the Psalms have become the familiar household treasures of the English-speaking peoples.

25. With the appearance of the Great Bible comes the first pause in the rapid sequence of vernacular versions set on foot by Tyndale. The English Bible was now fully authorized, and accessible to every Englishman in his parish church; and the translation, both in style and in scholarship, was fairly abreast of the attainments and requirements of the age. We hear no more, therefore, at present of further revisions of it. Another circumstance which may have contributed to the same result was the reaction of Henry in his latter years against Protestantism. There was talk in Convocation about a translation to be made by the bishops, which anticipated the plan of the Bible of 1568; and Cranmer prompted Henry to transfer the work to the universities, which anticipated a vital part of the plan of the Bible of 1611; but nothing came of either project. The only practical steps taken were in the direction of the destruction of the earlier versions. In 1543 a proclamation was issued against Tyndale's versions, and requiring the obliteration of all notes; in 1546 Coverdale's NT was likewise prohibited. The anti-Protestant reaction, however, was soon terminated by Henry's death (Jan. 1547); and during the reign of Edward VI., though no new translation (except a small part of the Gospels by Sir J. Cheke) was attempted, many new editions of Tyndale, Coverdale, Matthew, and the Great Bible issued from the press. The accession of Mary naturally put a stop to the printing and circulation of vernacular Bibles in England; and, during the attempt to put the clock back by force, Rogers and Cranmer followed Tyndale to the stake, while Coverdale was imprisoned, but was released, and took refuge at Geneva.

26. The Geneva Bible (1557–1560).—Geneva was the place at which the next link in the chain was to be forged. Already famous, through the work of Beza, as a centre of Biblical scholarship, it became the rallying place of the more advanced members of the Protestant party in exile, and under the strong rule of Calvin it was identified with Puritanism in its most rigid form. Puritanism, in fact, was here consolidated into a living and active principle, and demonstrated its strength as a motive power in the religious and social life of Europe. It was by a relative of Calvin, and under his own patronage, that the work of improving the English translation of the Bible was once more taken in hand. This was W. Whittingham, a Fellow of All Souls' College, Oxford, and subsequently dean of Durham, who in 1557 published the NT at Geneva in a small octavo volume, the handiest form in which the English Scriptures had yet been given to the world. In two other respects also this marked an epoch in the history of the English Bible. It was the first version to be printed in Roman type, and the first in which the division of the text into numbered verses (originally made by R. Stephanus for his Graeco-Latin Bible of 1551) was introduced. A preface was contributed by Calvin himself. The translator claims to have made constant use of the original Greek and of translations in other tongues, and he added a full marginal commentary. If the matter had ended there, as the work of a single scholar on one part of the Bible, it would probably have left little mark; but it was at once made the basis of a revised version of both Testaments by a group of Puritan scholars. The details of the work are not recorded, but the principal workers, apart from Whittingham himself, appear to have been Thomas Sampson, formerly dean of Chichester, and afterwards dean of Christ Church, and A. Gilby, of Christ's College, Cambridge. A version of the Psalter was issued in 1559 [four copies are known to exist, one (incomplete) formerly belonging to Mr. Aldis Wright and now in Trinity College Library, Cambridge, one formerly belonging to the Earl of Ellesmere and now in the Huntington Library, San

Marino, one in Aberdeen University Library, and one owned by the Massachusetts Historical Society, Boston], and in 1560 the complete Bible was given to the world, with the imprint of Rowland Hall, at Geneva. The Psalter in this was the same as that of 1559; but the NT had been largely revised since 1557. The book was a moderate-sized quarto, and contained a dedication to Elizabeth, an address to the brethren at home, the books of the OT (including Apocrypha) and NT in the same order as in the Great Bible and our modern Bibles, copious marginal notes (those to the NT taken from Whittingham with some additions), and an apparatus of maps and woodcuts. In type and verse-division it followed the example of Whittingham's NT.

27. The Genevan revisers took the Great Bible as their basis in the OT, and Matthew's Bible (*i.e.* Tyndale) in the NT. For the former they had the assistance of the Latin Bible of Leo Juda (1544), in addition to Pagninus (1527), and they were in consultation with the scholars (including Calvin and Beza) who were then engaged at Geneva in a similar work of revision of the French Bible. In the NT their principal guide was Beza, whose reputation stood highest among all the Biblical scholars of the age. The result was a version which completely outdistanced its predecessors in scholarship, while in style and vocabulary it worthily carried on the great tradition established by Tyndale. Its success was as decisive as it was well deserved; and in one respect it met a want which none of its predecessors (except perhaps Tyndale's) had attempted to meet. Coverdale's, Matthew's, and the Great Bible were all large folios, suitable for use in church, but unsuited both in size and in price for private possession and domestic study. The Geneva Bible, on the contrary, was moderate in both respects, and achieved instant and long-enduring popularity as the Bible for personal use. For a full century it continued to be the Bible of the people, and it was upon this version, and not upon that of King James, that the Bible knowledge of the Puritans of the Civil War was built up. Its notes furnished them with a full commentary on the sacred text, predominantly hortatory or monitory in character, but Calvinistic in general tone, and occasionally definitely polemical. Over 160 editions of it are said to have been issued, but the only one which requires separate notice is a revision of the NT by Laurence Tomson in 1567, which carried still further the principle of deference to Beza; this revised NT was successful, and was frequently bound up with the Genevan OT in place of the edition of 1560. [The Geneva Bible is frequently called (in booksellers' catalogues and elsewhere) the 'Breeches' Bible, on account of this word being used in the translation of Gn 3^{7}.]

28. The Bishops' Bible (1568).—Meanwhile there was one quarter in which the Geneva Bible could hardly be expected to find favour, namely, among the leaders of the Church in England. Elizabeth herself was not too well disposed towards the Puritans, and the bishops in general belonged to the less extreme party in the Church. On the other hand, the superiority of the Genevan to the Great Bible could not be contested. Under these circumstances the old project of a translation to be produced by the bishops was revived. The archbishop of Canterbury, Matthew Parker, was himself a scholar, and took up the task with interest. The basis of the new version was to be the authorized Great Bible. Portions of the text were assigned to various revisers, the majority of whom were bishops. The archbishop exercised a general supervision over the work, but there does not appear to have been any organized system of collaboration or revision, and the results were naturally unequal. In the OT the alterations are mainly verbal, and do not show much originality or genius. In the NT the scholarship shown is on a much higher level, and there is much more independence in style and judgment. In both, use is made of the Geneva Bible, as well as of other versions. The volume was equipped with notes, shorter than those of the Geneva Bible, and generally exegetical. It appeared in 1568, from the press of R. Jugge, in a large folio volume, slightly exceeding even the dimensions of the Great Bible. Parker applied through Cecil for the royal sanction, but it does not appear that he ever obtained it; But Convocation in 1571 required a copy to be kept in every archbishop's and bishop's house and in every cathedral, and, as far as could conveniently be done, in all churches. The Bishop's Bible, in fact, superseded the Great Bible as the official version, and its predecessor ceased henceforth to be reprinted; but it never attained the popularity and influence of the Geneva Bible. A second edition was issued in 1569, in which a considerable number of alterations were made, partly, it appears, as the result of the criticisms of Giles Laurence, professor of Greek at Oxford. In 1572 a third edition appeared, of importance chiefly in the NT, and in some cases reverting to the first edition of 1568. In this form the Bishops' Bible continued in official use until its supersession by the version of 1611, of which it formed the immediate basis.

29. The Rheims and Douai Bible (1582–1609).—The English exiles for religious causes were not all of one kind or of one faith. There were Roman Catholic refugees on the Continent as well as Puritan, and from the one, as from the other, there proceeded an English version of the Bible. The centre of the English Roman Catholics was the English College at Douai, the foundation (in 1568) of William Allen, formerly of Queen's College, Oxford, and subsequently cardinal; and it was from this college that a new version of the Bible emanated which was intended to serve as a counterblast to the Protestant versions, with which England was now flooded. The first instalment of it appeared in 1582, during a temporary migration of the college to Rheims. This was the NT, the work mainly of Gregory Martin, formerly Fellow of St. John's College, Oxford, with the assistance of a small band of scholars from the same university. The OT is stated to have been ready at the same time, but for want of funds it could not be printed until 1609, after the college had returned to Douai, when it appeared just in time to be of some use to the preparers of King James' version. As was natural, the Roman scholars did not concern themselves with the Hebrew and Greek originals, which they definitely rejected as inferior, but translated from the Latin Vulgate, following it with a close fidelity which is not infrequently fatal, not merely to the style, but even to the sense in English. The following short passage (Eph 3^{6-12}), taken almost at random, is a fair example of the Latinization of their style.

'The Gentils to be coheires and concorporat and comparticipant of his promis in Christ Jesus by the Gospel: whereof I am made a minister according to the gift of the grace of God, which is given me according to the operation of his power. To me the least of al the sainctes is given this grace, among the Gentils to evangelize the unsearchable riches of Christ, and to illuminate al men what is the dispensation of the sacrament hidden from worldes in God, who created al things; that the manifold wisedom of God may be notified to the Princes and Potestats in the celestials by the Church, according to the prefinition of worldes, which he made in Christ Jesus our Lord. In whom we have affiance and accesse in confidence, by the faith of him.'

The translation, being prepared with a definite polemical purpose, was naturally equipped with notes of a controversial character, and with a preface in which the object and method of the work were explained. It had, however, as a whole, little success. The OT was reprinted only once in the course of a century, and the NT not much oftener. In England the greater part of its circulation was due to the action of a vehement adversary, W. Fulke, who, in order to expose its errors, printed the Rheims NT in parallel columns with the Bishops' version of 1572, and the Rheims annotations with his own refutations of them; and this work had a considerable vogue. Regarded from the point of view of scholarship, the Rheims and Douai Bible is of no importance, marking retrogression rather than advance; but it needs mention in a history of the English Bible, because it is one of the

versions of which King James' translators made use. The AV is indeed distinguished by the strongly *English* (as distinct from Latin) character of its vocabulary; but of the Latin words used (and used effectively), many were derived from the Bible of Rheims and Douai.

30. The Authorized Version (1611).—The version which was destined to put the crown on nearly a century of labour, and, after extinguishing by its excellence all rivals, to print an indelible mark on English religion and English literature, came into being almost by accident. It arose out of the Hampton Court Conference, held by James I. in 1604, with the object of arriving at a settlement between the Puritan and Anglican elements in the Church; but it was not one of the prime or original subjects of the conference. In the course of discussion, Dr. Reynolds, president of Corpus Christi College, Oxford, the leader of the moderate Puritan party, referred to the imperfections and disagreements of the existing translations; and the suggestion of a new version, to be prepared by the best scholars in the country, was warmly taken up by the king. The conference, as a whole, was a failure; but James did not allow the idea of the revision to drop. He took an active part in the preparation of instructions for the work, and to him appears to be due the credit of two features which went far to secure its success. He suggested that the translation should be committed in the first instance to the universities (subject to subsequent review by the bishops and the Privy Council, which practically came to nothing), and thereby secured the services of the best scholars in the country, working in co-operation; and (on the suggestion of the bishop of London) he laid down that no marginal notes should be added, which preserved the new version from being the organ of any one party in the Church.

31. Ultimately it was arranged that six companies of translators should be formed, two at Westminster, two at Oxford, and two at Cambridge. The companies varied in strength from 7 to 10 members, the total (though there is some little doubt with regard to a few names) being 47. The Westminister companies undertook Genesis–2 Kings and the Epistles, the Oxford companies the Prophets and the Gospels, Acts, and Apocalypse, and the Cambridge companies 1 Chronicles–Ecclesiastes and the Apocrypha. A series of rules was drawn up for their guidance. The Bishops' Bible was to be taken as the basis. The old ecclesiastical terms were to be kept. No marginal notes were to be affixed, except for the explanation of Hebrew or Greek words. Marginal references, on the contrary, were to be supplied. As each company finished a book, it was to send it to the other companies for their consideration. Suggestions were to be invited from the clergy generally, and opinions requested on passages of special difficulty from any learned man in the land. 'These translations to be used when they agree better with the text than the Bishops' Bible, namely, Tyndale's, Matthew's, Coverdale's, Whitchurch's [*i.e.* the Great Bible], Geneva.' The translators claim further to have consulted all the available versions and commentaries in other languages, and to have repeatedly revised their own work, without grudging the time which it required. The time occupied by the whole work is stated by themselves as two years and three-quarters. The several companies appear to have begun their labours about the end of 1607, and to have taken two years in completing their several shares. A final revision, occupying nine months, was then made by a smaller body, consisting of two representatives from each company, after which it was seen through the press by Dr. Miles Smith and Bishop Bilson; and in 1611 the new version, printed by R. Barker, the king's printer, was given to the world in a large folio volume (the largest of all the series of English Bibles) of black letter type. The details of its issue are obscure. There were at least two issues in 1611, set up independently, known respectively as the 'He' and 'She' Bibles, from their divergence in the translation of the last words of Ru 3^{15}; and bibliographers have differed as to their priority, though the general opinion is in favour of the former. Some copies have a wood-block, others an engraved title-page, with different designs. The title-page was followed by the dedication to King James, which still stands in our ordinary copies of the AV, and this by the translators' preface (believed to have been written by Dr. Miles Smith), which is habitually omitted. [It is printed in the present King's Printers' Variorum Bible, and is interesting and valuable both as an example of the learning of the age and for its description of the translators' labours.] For the rest, the contents and arrangement of the AV are too well known to every reader to need description.

ENGLISH VERSIONS

32. Nor is it necessary to dwell at length on the characteristics of the translation. Not only was it superior to all its predecessors, but its excellence was so marked that no further revision was attempted for over 250 years. Its success must be attributed to the fact which differentiated it from its predecessors, namely, that it was not the work of a single scholar (like Tyndale's, Coverdale's, and Matthew's Bibles), or of a small group (like the Geneva and Douai Bibles), or of a larger number of men working independently with little supervision (like the Bishops' Bible), but was produced by the collaboration of a carefully selected band of scholars, working with ample time and with full and repeated revision. Nevertheless, it was not a new translation. It owed much to its predecessors. The translators themselves say, in their preface: 'We never thought from the beginning that we should need to make a new translation, nor yet to make of a bad one a good one, . . . but to make a good one better, or out of many good ones one principal good one, not justly to be excepted against; that hath been our endeavour, that our mark.' The description is very just. The foundations of the AV were laid by Tyndale, and a great part of his work continued through every revision. Each succeeding version added something to the original stock, Coverdale (in his own and the Great Bible) and the Genevan scholars contributing the largest share; and the crown was set upon the whole by the skilled labour of the Jacobean divines, making free use of the materials accumulated by others, and happily inspired by the gift of style which was the noblest literary achievement of the age in which they lived. A sense of the solemnity of their subject saved them from the extravagances and conceits which sometimes mar that style; and, as a result, they produced a work which, from the merely literary point of view, is the finest example of Jacobean prose, and has influenced incalculably the whole subsequent course of English literature. On the character and spiritual history of the nation it has left an even deeper mark, to which many writers have borne eloquent testimony; and if England has been, and is, a Bible-reading and Bible-loving country, it is in no small measure due to her possession of a version so nobly executed as the AV.

33. The history of the AV after 1611 can be briefly sketched. In spite of the name by which it is commonly known, and in spite of the statement on both title-pages of 1611 that it was 'appointed to be read in churches,' there is no evidence that it was ever officially authorized either by the Crown or by Convocation. Its authorization seems to have been tacit and gradual. The Bishops' Bible, hitherto the official version, ceased to be reprinted, and the AV no doubt gradually replaced it in churches as occasion arose. In domestic use its fortunes were for a time more doubtful, and for two generations it existed concurrently with the Geneva Bible; but before the century was out its predominance was assured. The first quarto and octavo editions were issued in 1612; and thenceforward editions were so numerous that it is useless to refer to any except a few of them. The early editions were not very correctly printed. In 1638 an attempt to secure a correct text was made by a small group of Cambridge scholars. In 1633 the first edition printed in Scotland was published. In 1701 Bishop Lloyd superintended the printing of an

edition at Oxford, in which Archbishop Ussher's dates for Scripture chronology were printed in the margin, where they thenceforth remained. In 1717 a fine edition, printed by Baskett at Oxford, earned bibliographical notoriety as 'The Vinegar Bible' from a misprint in the headline over Lk 20. In 1762 a carefully revised edition was published at Cambridge under the editorship of Dr. T. Paris, and a similar edition, superintended by Dr. B. Blayney, appeared at Oxford in 1769. These two editions, in which the text was carefully revised, the spelling modernized, the punctuation corrected, and considerable alteration made in the marginal notes, formed the standard for subsequent reprints of the AV, which differ in a number of details, small in importance but fairly numerous in the aggregate, from the original text of 1611. One other detail remains to be mentioned. The Nonconformists took much objection to the Apocrypha, and in 1644 the Long Parliament forbade the reading of lessons from it in public; but the lectionary of the English Church always included lessons from it. It was omitted from many editions, however. The first edition printed in America (apart from a surreptitious edition of 1752), in 1782, is without it. In 1826 the British and Foreign Bible Society, which has been one of the principal agents in the circulation of the Scriptures throughout the world, decided never in future to print or circulate copies containing the Apocrypha; and this decision has been carried into effect ever since.

34. So far as concerned the translation of the Hebrew and Greek texts which lay before them, the work of the authors of the AV, as has been shown above, was done not merely well but excellently. There were, no doubt, occasional errors of interpretation; and in regard to the OT in particular the Hebrew scholarship of the age was not always equal to the demands made upon it. But such errors as were made were not of such magnitude or quantity as to have made any extensive revision necessary or desirable even now, after a lapse of three hundred and fifty years. There was, however, another defect, less important (and indeed necessarily invisible at the time), which the lapse of years ultimately forced into prominence, namely, in the text (and especially the Greek text) which they translated. Criticism of the Greek text of the NT had not yet begun. Scholars were content to take the text as it first came to hand, from the late MSS which were most readily accessible to them. The NT of Erasmus, which first made the Greek text generally available in Western Europe, was based upon a small group of relatively late MSS, which happened to be within his reach at Basle. The edition of Stephanus in 1550, which practically established the 'Received Text' which held the field till the 19th cent., rested upon a somewhat superficial examination of 15 MSS, mostly at Paris, of which only two were uncials, and these were but slightly used. None of the great MSS which now stand at the head of our list of authorities was known to the scholars of 1611. None of the ancient versions had been critically edited; and so far as King James' translators made use of them (as we know they did), it was as aids to interpretation, and not as evidence for the text, that they employed them. In saying this there is no imputation of blame. The materials for a critical study and restoration of the text were not then extant; and men were concerned only to translate the text which lay before them in the current Hebrew, Greek, and Latin Bibles. Nevertheless it was in this inevitable defectiveness of text that the weakness lay which ultimately undermined the authority of the AV.

35. The Revised Version (1881–1895).—It was not until the progress of criticism had revealed the defective state of the received Greek text of the NT that any serious movement was set on foot for the revision of the AV. About the year 1855 the question began to be mooted in magazine articles and motions in Convocation, and by way of bringing it to a head a small group of scholars [Dr. Ellicott, afterwards bishop of Gloucester, Dr. Moberly, head master of Winchester and afterwards bishop of Salisbury, Dr. Barron, principal of St. Edmund Hall, Oxford, the Rev. H. Alford, afterwards dean of Canterbury, and the Rev. W. G. Humphrey; with the Rev. E. Hawkins, secretary of the S.P.G., and afterwards canon of Westminster, as their secretary] undertook a revision of the AV of John, which was published in 1857. Six of the Epistles followed in 1861 and 1863, by which time the object of the work, in calling attention to the need and the possibility of a revision, had been accomplished. Meanwhile a great stimulus to the interest in textual criticism had been given by the discovery of the Codex Sinaiticus, and by the work of Tischendorf and Tregelles. In Feb. 1870 a motion for a committee to consider the desirability of a revision was adopted by both Houses of the Convocation of Canterbury; and definite motions in favour of such a revision were passed in the following May. The Convocation of York did not concur, and thenceforward the Southern Houses proceeded alone. A committee of both Houses drew up the lists of revisers, and framed the rules for their guidance. The OT company consisted of 25 (afterwards 27) members, the NT of 26. The rules prescribed the introduction of as few alterations in the AV as possible consistently with faithfulness; the text to be adopted for which the evidence is decidedly preponderating, and when it differs from that from which the AV was made, the alteration to be indicated in the margin (this rule was found impracticable); alterations to be made on the first revision by simple majorities, but to be retained only if passed by a two-thirds majority on the second revision. Both companies commenced work at Westminister on June 22, 1870. The NT company met on 407 days in the course of eleven years, the OT company on 792 days in 15 years. Early in the work the co-operation of American scholars was invited, and in consequence two companies of 15 and 16 members respectively were formed, which began work in 1872, considering the results of the English revision as each section of it was forwarded to them. The collaboration of the English and American companies was perfectly harmonious; and by agreement those recommendations of the American Revisers which were not adopted by the English companies, but to which the proposers nevertheless wished to adhere, were printed in an appendix to the published Bible. Publication took place, in the case of the NT, on May 17, 1881, and in the case of the canonical books of the OT almost exactly four years later. The revision of the Apocrypha was divided between the two English companies, and was taken up by each company on the completion of its main work. The NT company distributed Sirach, Tobit, Judith, Wisdom, 1 and 2 Maccabees among three groups of its members, and the OT company appointed a small committee to deal with the remaining books. The work dragged on over many years, involving some inequalities in revision, and ultimately the Apocrypha was published in 1895.

36. In dealing with the OT the Revisers were not greatly concerned with questions of text. The Massoretic Hebrew text available in 1870 was substantially the same as that which King James' translators had before them; and the criticism of the LXX version was not sufficiently advanced to enable them safely to make much use of it except in marginal notes. Their work consisted mainly in the correction of mistranslations which imperfect Hebrew scholarship had left in the AV. Their changes as a rule are slight, but tend very markedly to remove obscurities and to improve the intelligibility of the translation. The gain is greatest in the poetical and prophetical books (poetical passages are throughout printed as such, which in itself is a great improvement), and there cannot be much doubt that if the revision of the OT had stood by itself it would have been generally accepted without much opposition. With the new version of the NT the case was different. The changes were necessarily more numerous than in the OT, and the greater familiarity with the NT possessed by readers in general made the alterations more

conspicuous. The NT Revisers had, in effect, to form a new Greek text before they could proceed to translate it. In this part of their work they were largely influenced by the presence of Drs. Westcott and Hort, who were keen and convinced champions of the type of text of which the best representative is the Codex Vaticanus. At the same time Dr. Scrivener, who took a less advanced view of the necessity of changes in the Received Text, was also a prominent member of the company, and it is probably true that not many new readings were adopted which had not the support of Tischendorf and Tregelles, and which would not be regarded by nearly all scholars acquainted with textual criticism as preferable to those of the AV. To Westcott and Hort may be assigned a large part of the credit for leading the Revisers definitely along the path of critical science; but the Revisers did not follow their leaders the whole way, and their text (edited by Archdeacon Palmer for the Oxford Press in 1881) represents a more conservative attitude than that of the two great Cambridge scholars. Nevertheless the amount of textual change was considerable, and to this was added a very large amount of verbal change, sometimes (especially in the Epistles) to secure greater intelligibility, but oftener (and this is more noticeable in the Gospels) to secure uniformity in the translation of Greek words which the AV deliberately rendered differently in different places (even in parallel narratives of the same event), and precision in the representation of moods and tenses. It was to the great number of changes of this kind, which by themselves appeared needless and pedantic, that most of the criticism bestowed upon the RV was due; but it must be remembered that where the words and phrases of a book are often strained to the uttermost in popular application, it is of great importance that those words and phrases should be as accurately rendered as possible. On the whole, it is certain that the RV marked a great advance on the AV in respect of accuracy, and the main criticisms to which it is justly open are that the principles of classical Greek were applied too rigidly to Greek which is not classical, and that the Revisers, in their careful attention to the Greek, were less happily inspired than their predecessors with the genius of the English language. It should be remembered, too, that renderings which appear in the margin not infrequently represent the views of more than half the Revisers, though they failed to obtain the necessary two-thirds majority. This is perhaps especially the case in the OT, where the RV shows a greater adherence to the AV than in the NT.

37. The American Standard Version (1901) and **The Revised Standard Version** (1946–1957).—Reference has already been made to the co-operation of two American companies in the production of the RV and to the agreement whereby such of their recommendations as did not commend themselves to the English companies were printed in an appendix. The agreement was for a term of fourteen years only, and when it expired the surviving members of the American companies published in 1901 what was in effect an 'inverted' RV. Those readings in the RV appendix which still seemed preferable to the Americans, together with some others subsequently agreed upon, were incorporated into the text and the readings so displaced were relegated to a new appendix. The resulting 'Standard' edition of the RV Bible attained a far greater popularity in America than the RV ever attained in England. In 1928 the copyright passed to the International Council of Religious Education (later included in the National Council of Churches), a body in which the educational boards of all the major Protestant churches of the United States and Canada were associated, and an American Standard Bible Committee, consisting entirely of scholars under the chairmanship of Luther A. Weigle of the Yale Divinity School, was appointed to have charge of the text and undertake any further revision that might seem desirable. For more than two years the Committee discussed their commission in all its aspects and eventually reported in favour of a thoroughgoing revision of the version of 1901. At first the work was hampered by lack of funds; but in 1937 the necessary budget was provided and the revision proceeded with the authority of a vote from the International Council that 'There is need for a version which embodies the best results of modern scholarship as to the meaning of the Scriptures, and expresses this meaning in English diction which is designed for use in public and private worship and preserves those qualities which have given to the King James version a supreme place in English literature. We, therefore, define the task of the American Standard Bible Committee to be that of revision of the present American Standard Bible in the light of the results of modern scholarship . . . and to be in the diction of the simple, classic English style of the King James Version.' The Committee worked in two sections, one dealing with the OT and the other with the NT: altogether 31 members served at one time or another; and it is interesting to note that the regulations governing procedure laid down that all changes in the text were to be agreed upon by a two-thirds majority of the total membership of the Committee—a more conservative ruling than had governed procedure hitherto, which required only a two-thirds majority of those present at any particular meeting. The NT of the new 'Revised Standard Version' appeared in 1946, and the OT in 1952. After publication had been completed the Committee was asked by the General Convention of the Protestant Episcopal Church to prepare a revision of the Apocrypha, and a special Apocrypha section was constituted consisting of 5 members of the Committee with 4 additional members. The same general principles were followed, and the Apocrypha appeared in 1957.

38. The New English Bible (1961–).—In the same year that the NT portion of the RSV was published in America (1946) the General Assembly of the Church of Scotland circularized the other churches of the British Isles in favour of a completely new translation into contemporary English, on the ground that the archaic language of both the AV and the RV seriously hindered the churches' work. After discussion, the Church of Scotland's proposal was accepted. In 1947 representatives of all the churches met (other than Roman Catholic) and formed a Joint Committee of direction, which in turn appointed three panels of translators (one for the NT, one for the OT, and one for the Apocrypha) as well as a special panel of advisers on literary style. The general procedure adopted was that the various Biblical books were divided among the three translation panels and each member of a panel was asked to prepare a draft translation of a book or group of books. His draft, when ready, was sent to the other members of his panel, which then met and discussed it. When agreement was reached within the panel the result was forwarded to the literary panel, who, after expressing their views, returned it to the translators. The final form of the version accordingly represents agreement between the literary panel and the appropriate translation panel. So far, only the NT has been published (March 14, 1961); and it is obviously too soon to attempt anything more than a provisional assessment of the version's worth as a whole. One thing, however, is clear enough—that, whatever its merits as literature may be, not only its declared aim to be 'contemporary' in its English, but also its manifest concern to avoid at all costs any trace of literalism in its renderings, make it a far less satisfactory basis for serious study of the Bible than either the RV or the RSV.

39. Finally, a few words must be added about modern versions published by individuals. The most important are those of Ferrar Fenton (Romans, 1882; Epistles, 1884; NT, 1895; whole Bible, 1903), R. F. Weymouth (*The New Testament in Modern Speech*, 1902), and James Moffatt (NT, 1913; OT, 1924; revised edition of the whole Bible, 1935). In 1940 R. A. Knox was commissioned by the English Roman Catholic authorities to produce a new translation of the Vulgate which

could be read by Catholics alongside the Rheims and Douai Bible of 1582–1609. The NT (' authorized by the Archbishops and Bishops of England and Wales ') was published in 1945 : the OT (' for private use only ') in 1949. Of the stylistic excellence and general readability of the Knox version there can be no doubt ; but it is very far from being an exact rendering of the Vulgate. F. G. K.—H. F. D. S.

EN-HADDAH.—A city of Issachar noticed with En-gannim and Remeth, Jos 19[21] ; it is perhaps modern *el-Hadetheh*.

EN-HAKKORE (' spring of the partridge ' ; cf 1 S 26[20], Jer 17[11] *ḳōrē'*).—The name of a fountain at Lehi, Jg 15[19]. The narrator of the story characteristically connects *haḳḳōrē'* with the word *yiḳrā'* (' he called ') of v.[18], and evidently interprets '*En-haḳḳōrē'* as ' the spring of him that called ' (cf AVm, RVm, RSVm). The whole narrative is rather obscure, and the translation in some instances doubtful. The situation of En-haḳḳore is also quite uncertain.

EN-HAZOR (' spring of Hazor ').—A town of Naphtali, Jos 19[37] ; perhaps modern, *Kh. Ḥaṣîreh*, near *Ḥazzûr*, on the W. slopes of the mountains of Upper Galilee, W. of Kedesh.

EN-MISHPAT (' spring of judgment ').—A name for Kadesh (Gn 14[7]), probably Kadesh-barnea. See KADESH.

ENNATAN, 1 Es 8[44] (RV) —See ELNATHAN, 3.

ENOCH (Heb. *Ḥ[a]nôkh*) is the ' seventh from Adam ' (Jd 14) in the Sethite genealogy of Gn 5 (see vv.[18–24]). In the Cainite genealogy of 4[17ff] he is the son of Cain, and therefore the third from Adam. The resemblances between the two lists seem to show that they rest on a common tradition, preserved in different forms by J (ch. 4) and P (ch. 5), though it is not possible to say which version is the more original.—The notice which invests the figure of Enoch with its peculiar significance is found in 5[24] ' Enoch walked with God ; and he was not, for God took him.' The idea here suggested—that because of his perfect fellowship with God this patriarch was ' translated ' to heaven without tasting death (cf Sir 44[16] 49[14], He 11[5])—appears to have exerted a certain influence on the OT doctrine of immortality (see Ps 49[15] 73[24]).—A much fuller tradition is presupposed by the remarkable development of the Enoch legend in the Apocalyptic literature, where Enoch appears as a preacher of repentance, a prophet of future events, and the recipient of supernatural knowledge of the secrets of heaven and earth, etc. The origin of this tradition has probably been discovered in a striking Babylonian parallel. The seventh name in the list of ten antediluvian kings given by Berosus is Evedoranchus, which (it seems certain) is a corruption of Enmeduranki, a king of Sippar who was received into the fellowship of Shamash (the sun-god) and Ramman, was initiated into the mysteries of heaven and earth, and became the founder of a guild of priestly diviners. When or how this myth became known to the Jews we cannot tell. A trace of an original connexion with the sun-god has been suspected in the 365 years of Enoch's life (the number of days in the solar year). At all events it is highly probable that the Babylonian legend contains the germ of the later conception of Enoch as embodied in the apocalpytic Book of Enoch (see PSEUDEPIGRAPHA, **1** (*a*)), and the later Book of the Secrets of Enoch (see PSEUDEPIGRAPHA, **1** (*b*)).—A citation from the Book of Enoch occurs in Jd 14[ff] (=En 1[9] 5[4], 27[2]). J. S.

ENOS.—See ENOSH.

ENOSH.—The name is a poetical word, meaning ' man.' It was borne by the son of Seth, and grandson of Adam, Gn 4[26] 5[6ff]. As the time of Cain was marked by sin and violence, so that of Seth was marked by piety. In the days of Enosh men began to ' call with the name of Y″,' *i.e.* to use His name in invocations. The name Y″ having been known practically from the beginning of human life, the writer (J) always employs it in preference to the title ' Elohim.' In E (Ex 3[14]) and P (6[2f]) it is not used until after the revelation to Moses. The name stands in Lk 3[38] as **Enos.** A. H. McN.

EN-RIMMON (' spring of pomegranate ').—One of the settlements of the Judahites after the return from the Exile, Neh 11[29]. In Jos 15[32], 1 Ch 4[32], Ain and Rimmon appear as two towns, but we should read En-rimmon ; in Jos 19[7] RSV so reads, where AV, RV read as two towns ; modern *Khirbet Umm er-Ramāmîn*, NNE. of Beersheba.

EN-ROGEL (' spring of the fuller ').—In the border of the territory of Judah (Jos 15[7]) and Benjamin (18[16]). It was outside Jerusalem ; and David's spies, Jonathan and Ahimaaz, were here stationed in quest of news of the revolt of Absalom (2 S 17[17]). Here Adonijah made a feast ' by the stone of **Zoheleth,**' when he endeavoured to seize the kingdom (1 K 1[9]). The identification of this spring is usually made with *Bîr Ayyûb* (' Job's Well ') ; some have argued for the Virgin's Fountain. The strongest argument for the latter is its proximity to a cliff face called *Zaḥweileh*, in which an attempt has been made to recognize Zoheleth. This, however, is uncertain, as *Zaḥweileh* is a cliff, not an isolated stone. R. A. S. M.

ENSAMPLE.—' Ensample ' and ' example ' (both from Lat. *exemplum*) are both used in AV. Tyndale has ' ensample ' only, and so all the English versions until the Rheims appeared. That version used ' example ' probably as being nearer the Vulgate word *exemplum*. The AV frequently reveals the influence of the Rheims version.

EN-SHEMESH (' sun-spring ').—A spring E. of En-rogel, on the way to Jericho, Jos 15[7] 18[17]. It is believed to be modern '*Ain el-Ḥôḍ*, on the Jericho road, E. of Olivet.

ENSIGN.—See BANNER.

ENSUE.—The verb ' ensue ' is used intransitively, meaning to *follow*, in Jth 9[5] (AV, RV) ; and transitively, with the full force of *pursue*, in 1 P 3[11] (AV).

EN-TAPPUAH.—A place on the boundary of Manasseh, Jos 17[7] ; probably the same as **Tappuah, 2** (q.v.).

ENTREAT.—See INTREAT.

ENVOY.—See AMBASSADOR.

ENVY.—Envy leads to strife, division, railing, hatred, and sometimes to murder. The Bible classes it with these things (Mt 27[18], Ro 1[29] 13[13], 1 Co 3[3], 2 Co 12[20], Gal 5[21], 1 Ti 6[4], Tit 3[3], Ja 3[14, 16]). So does the Litany : ' envy, hatred, and malice.' It is the antithesis of Christian love. Envy loves not, and love envies not (1 Co 13[4]). Bacon closes his essay on ' Envy ' with this sentence : ' Envy is the vilest affection and the most depraved ; for which cause it is the proper attribute of the Devil, who is called, The envious man, that soweth tares amongst the wheat by night (Mt 13[25, 39]) ; as it always cometh to pass, that Envy worketh subtilly and in the dark, and to the prejudice of good things, such as is the wheat.' Chrysostom said : ' As a moth gnaws a garment, so doth envy consume a man, to be a living anatomy, a skeleton, to be a lean and pale carcass, quickened with a fiend.' These are Scriptural estimates. Envy is devilish, and absolutely inconsistent with the highest life. Cf Wis 2[24] ' Through the devil's envy death entered the world.' Examples abound in the Bible, such as are suggested by the relations between Cain and Abel, Jacob and Esau, Rachel and Leah, Joseph and his brothers, Saul and David, Haman and Mordecai, the elder brother and the prodigal son, the rival evangelists of Ph 1[15] and the Apostle Paul, and many others. D. A. H.—F. C. G.

EPAENETUS.—A beloved friend of St. Paul, greeted in Ro 16[5] ; he was ' the first convert in Asia for Christ.'

EPAPHRAS.—Mentioned by Paul in Col 1[7] 4[12], Phn 23 ; and described by him as his ' fellow-servant,' and also as a ' servant ' and ' faithful minister ' of Christ. He was apparently a native or inhabitant of

Colossae (Col 4[12]), and as Paul's representative (1[7]) founded the Church there (1[7]). The fact of his prayerful zeal for Laodicea and Hierapolis suggests his having brought the faith to these cities also (4[13]). He brought news of the Colossian Church to the Apostle during an imprisonment of the latter, perhaps undertaking the journey to obtain Paul's advice as to the heresies that were there prevalent. He is spoken of as Paul's 'fellow-prisoner' (Phn 23), a title probably meaning that his care of the Apostle entailed the *practical* sharing of his captivity. The Epistle to the Colossians was a result of this visit, and Epaphras brought it back with him to his flock. *Epaphras* is a shortened form of *Epaphroditus* (Ph 2[25]), but, as the name was in common use, it is not probable that the two are to be identified.

C. T. P. G.—J. K.

EPAPHRODITUS.—Mentioned by Paul in Ph 2[25-30] 4[18], and described by him as his 'brother, fellow-worker, and fellow-soldier' (2[25]). He was the messenger by whom the Philippians sent the offerings which fully supplied the necessities of Paul during an imprisonment (2[25] 4[18]). While with Paul he laboured so zealously for the Church and for the Apostle as to 'risk' his life (2[30]); indeed, he 'nearly died,' but God had mercy on him, and the Apostle was spared this 'sorrow upon sorrow' (v.[27]). News of his illness reached Philippi, and the distress thus caused his friends made him long to return (v.[26]). Paul was 'the more eager to send him,' thus to relieve their minds and at the same time lessen his own sorrow by his knowledge of their joy at receiving him back in health. Apparently the Epistle to the Philippians was sent by him.

C. T. P. G.—J. K.

EPHAH.—1. A son of Midian, descended from Abraham and Keturah (Gn 25[4], 1 Ch 1[33]), the eponymous ancestor of an Arabian tribe whose identity is uncertain. This tribe appears in Is 60[6] as engaged in the transport of gold and frankincense from Sheba. **2.** A concubine of Caleb, 1 Ch 2[46]. **3.** A Judahite, 1 Ch 2[47].

EPHAH.—See WEIGHTS AND MEASURES.

EPHAI.—A Netophathite (see NETOPHAH), whose sons were amongst the 'captains of the forces' who joined Gedaliah at Mizpah, Jer 40[8]; they were murdered by Ishmael, Jer 41[3].

EPHER.—1. The name of the second of the sons of Midian mentioned in Gn 25[4], 1 Ch 1[33], and recorded as one of the descendants of Abraham by his wife Keturah (Gn 25[1]). **2.** The name of one of the sons of Ezrah, 1 Ch 4[17]. **3.** The first of a group of five heads of fathers' houses belonging to the half tribe of Manasseh, 1 Ch 5[24].

EPHES-DAMMIM.—The place in Judah where the Philistines were encamped at the time when David slew Goliath, 1 S 17[1]. The same name appears in 1 Ch 11[13] (and probably originally in 2 S 23[9]) as **Pas-dammim.** The site is not known.

EPHESIANS, EPISTLE TO.—This Epistle belongs to the group of Epistles of the Captivity, and if genuine, was written by Paul and sent by Tychicus at the same time as the Epistles to the Colossians and to Philemon (see COLOSSIANS).

1. Destination.—To whom was it addressed? That it was specifically written to the Ephesian Church is improbable, for two reasons—(1) The words 'at Ephesus' in 1[1] are absent from two of the earliest MSS, and apparently from the Epistle as known to Marcion (A.D. 140), who refers to it as addressed to the Laodiceans. Origen also had access to a copy of the Epistle from which they were absent. (2) The Epistle is almost entirely devoid of the personal touches—references to St. Paul's long stay at Ephesus, greetings to friends, etc.—that we should expect to find in an Epistle to a Church with which the Apostle's relations had been as close as they had been with the Ephesian Church. On the other hand, early tradition, as shown in the title, associated the Epistle with Ephesus, and, except Marcion, no early writer associated it with any other Church. Moreover, personal touches are not wholly absent. St. Paul has heard of the faith and love of those to whom he writes (1[15]); they had been saddened by news of his imprisonment (3[13]), they apparently know Tychicus (6[21f]). Many have concluded that the best explanation of all the facts is to be found in the suggestion made by Ussher, and adopted by Lightfoot (*Biblical Essays*), that the Epistle is really a circular-letter to the Churches of Asia (cf the First Epistle of St. Peter). Possibly the space where 'at Ephesus' now appears was left blank for Tychicus to fill in as he left copies of the letter at the various churches on his line of route. If this solution is the true one, this Epistle is most probably the letter referred to in Col 4[16].

It is more widely held, however, that the Epistle was a general letter addressed, not to any particular church or group of churches, but to Christians everywhere. In line with this understanding is the general character of the Epistle. Unlike most of Paul's letters, it does not appear to have been written with a view to any particular controversy or problem of Church life. Of all the Pauline Epistles it has most the character of a treatise or homily. Its keynote is the union of the Christian body, Jewish and Gentile, in Christ, in whom all things are being fulfilled.

2. Authenticity.—The authenticity of the Epistle is well attested by external testimony, but has been disputed during the last century on internal grounds. The chief of these are—(1) *Diœrence of style from the earlier Epistles.* This is very marked, as any reader will quickly see. (2) *Doctrinal diœrences.* The chief of these are: (*a*) the prominence given to the 'Catholic' idea of the Church; (*b*) the doctrine of the pre-existent Christ as the agent of creation; (*c*) the substitution of the idea of the gradual fulfilment of the Divine purpose for the earlier idea of an imminent return (*Parousia*) of Christ. (3) *The references to 'apostles and prophets'* in 3[5] 4[11], which seem to suggest that the writer is looking back on the Apostolic age from the standpoint of the next generation. (4) *The writer of the Epistle seems to have been dependent upon the other letters of Paul, especially Colossians, in a way Paul himself would not naturally have been.* Those who defend the Pauline authorship of the Epistle acknowledge these difficulties but discount the third and fourth and appeal to possible developments in Paul's thought and literary style in countering the other two. They also emphasize the strength of the external evidence.

A mediating view, defended particularly by E. J. Goodspeed, sees Ephesians as the work of whoever collected the letters of Paul. This collection seems to have occurred near the end of the 1st cent. Since the letters had all been addressed to particular churches, whereas the collection itself was being presented as the message of Paul for the whole church, the collector and editor would have wished a general epistle as a kind of preface or 'covering letter.' This he, or some contemporary of his, composed for the purpose, using the nine genuine letters as sources and models. This helps to account for the genuinely Pauline features of the Epistle—its true authenticity—and since this introductory Epistle would have achieved a wide circulation as early as any of the church letters, the strength of the external evidence is also understandable.

3. Characteristics.—The following are among the distinctive lines of thought of the Epistle. (1) The stress laid on the idea of *the Church as the fulfilment of the eternal purpose of God*—the body of which Christ is the head (1[23] 2[16] 3[6] 4[12, 16]), the building of which Christ is the corner-stone (2[20-22]), the bride (5[23-27]). (2) *The cosmic significance of the Atonement* (1[10, 14] 2[7] 3[10]). (3) The prominence given to *the work of the Holy Spirit* (1[13, 17] 2[18] 3[16] 4[3, 30] 5[9]). In this the Epistle differs from Colossians, and resembles 1 Corinthians. (4) Repeated exhortations to *unity*, and the graces that make for unity (4[1-7, 13, 25-32] 5[2] etc.). (5) The conception of the Christian *household* (5[22-6[9]]) and of the Christian *warrior* (6[10-18]).

4. Relation to other books.—The Epistle has lines of thought recalling 1 Corinthians. See, *e.g.* in 1 Corinthians the idea of the riches (1[5]) and the mystery (2[7-10]) of the gospel, the work of the Spirit (2[10f] 12[4]*J*), the building (3[9-11,16]), the one body (10[17] 12[4-6,12-16]), all things subjected to Christ (15[24-28]). The relation to Colossians is very close. 'The one is the general and systematic exposition of the same truths which appear in a special bearing in the other' (Lightfoot). Cf the relation of Galatians and Romans. Ephesians and Philippians have many thoughts in common. See, *e.g.* the Christian citizenship (Eph 2[12,19], Ph 1[27] 3[20]), the exaltation of Christ (Eph 1[20], Ph 2[9]), the true circumcision (Eph 2[11], Ph 3[3]), unity and stability (Eph 2[18]*J* 4[3] 6[13], Ph 1[27]). Cf also Eph 6[18] with Ph 4[6], and Eph 5[2] with Ph 4[18]. In regard to Romans and Ephesians, 'the unity at which the former Epistle seems to arrive by slow and painful steps is assumed in the latter as a starting-point, with a vista of wondrous possibilities beyond' (Hort).

There is a close connexion between this Epistle and 1 Peter, not so much in details as in 'identities of thought and similarity in the structure of the two Epistles as wholes' (Hort). If there is any direct relation, it is probable that the author of 1 Peter used this Epistle, as he certainly used Romans. In some respects this Epistle shows an approximation of Pauline thought to the teaching of the Fourth Gospel. See, *e.g.* the teaching of both on grace, on the contrast of light and darkness, on the work of the pre-incarnate Logos; and compare Jn 17 with the whole Epistle. Cf also Rev 21[10,14] with Eph 2[20f], Rev 19[7] with Eph 5[25-27], and Rev 13[8] with Eph 3[11]. J. H. B. M.—**J. K.**

EPHESUS.—The capital of the Roman province Asia; a large and ancient city at the mouth of the river Cayster. The origin of the name, which is native and not Greek, is unknown. It stood at the entrance to one of the four clefts in the surrounding hills. It is along these valleys that the roads through the central plateau of Asia Minor pass. The chief of these was the route up the Maeander as far as the Lycus, its tributary, then along the Lycus towards Apamea. It was the most important avenue of civilization in Asia Minor under the Roman Empire. **Miletus** had been in earlier times a more important harbour than Ephesus, but the track across from the main road to Ephesus was much shorter than the road to Miletus, and was over a pass only 600 feet high. Consequently Ephesus replaced Miletus before and during the Roman Empire, especially as the Maeander had silted up so much as to spoil the harbour at the latter place. It became the great emporium for all the trade N. of Mount Taurus.

Ephesus was on the main route from Rome to the East, and many side roads and sea-routes converged at it (Ac 19[21] 20[1,17], 1 Ti 1[3], 2 Ti 4[12]). The governors of the provinces in Asia Minor had always to land at Ephesus. It was an obvious centre for the work of St. Paul, as influences from there spread over the whole province (Ac 19[10]). Corinth was the next great station on the way to Rome, and communication between the two places was constant. The ship in Ac 18[19], bound from Corinth for the Syrian coast, touched first at Ephesus.

Besides Paul, Tychicus (Eph 6[21f]) and Timothy (according to 1 Ti 1[3], 2 Ti 4[9]), John Mark (Col 4[10], 1 P 5[13]), and the writer of the Apocalypse (1[11] 2[1]) were acquainted with Asia or Ephesus.

The harbour of Ephesus was kept large enough and deep enough only by constant attention. The alluvial deposits were (and are) so great that, when once the Roman Empire had ceased to hold sway, the harbour became gradually smaller and smaller, so that now Ephesus is four miles from the sea. Even in St. Paul's time there appear to have been difficulties about navigating the channel, and ships avoided Ephesus except when loading or unloading was necessary (cf Ac 20[16]). The route by the high lands, from Ephesus to the East, was suitable for foot passengers and light traffic, and was used by St. Paul (Ac 19[1]; probably also 16[6]). The alternative was the main road through Colossae and Laodicea, neither of which St. Paul ever visited (Col 2[1]).

In the open plain, about 5 miles from the sea, S. of the river, stands a little hill which has always been a religious centre. Below its SW. slope was the temple sacred to Artemis (q.v.). The Greek city Ephesus was built at a distance of 1–2 miles SW. of this hill. The history of the town turns very much on the opposition between the free Greek spirit of progress and the slavish submission of the Oriental population to the goddess. Croesus the Lydian represented the predominance of the latter over the former, but Lysimachus (295 B.C.) revived the Greek influence. Ephesus, however, was always proud of the position of 'Warden of the Temple of Artemis' (Ac 19[35]). The festivals were thronged by crowds from the whole of the province of Asia. St. Paul, whose residence in Ephesus lasted 2 years and 3 months (Ac 19[8,10]), or, roughly expressed, 3 years (Ac 20[31]), at first incurred no opposition from the devotees of the goddess; but when his teaching proved prejudicial to the money interests of the people who made a living out of the worship, he was at once bitterly attacked. Prior to this occurrence, his influence had caused many of the famous magicians of the place to burn their books (Ac 19[13-19]). The riot of 19[32] was no mere passing fury of a section of the populace. The references to Ephesus in the Epistles show that the opposition to Christianity there was as long-continued as it was virulent (1 Co 15[32] 16[9], 2 Co 1[8-10]).

The scene in Ac 19[23ff] derives some illustration from an account of the topography and the government of the city. The ruins of the theatre are large, and it has been calculated that it could hold 24,000 people. It was on the western slope of Mount Pion, and overlooked the harbour. The Asiarchs (see ASIARCH), who were friendly to St. Paul, may have been present in Ephesus at that time on account of a meeting of their body (Ac 19[31]). The town-clerk (q.v.) or secretary of the city appears as a person of importance, and this is exactly in accordance with what is known of municipal affairs in such cities. The Empire brought decay of the influence of popular assemblies, which tended more and more to come into the hands of the officials, though the assembly at Ephesus was really the highest municipal authority (Ac 19[39]), and the Roman courts and the proconsuls (Ac 19[38]) were the final judicial authority in processes against individuals. The meeting of the assembly described in Acts was not a legal meeting. Legal meetings could be summoned only by the *Roman* officials, who had the power to call together the people when they pleased. The secretary tried to act as intermediary between the people and these officials, and save the people from trouble at their hands. The temple of Artemis which existed in St. Paul's day was of enormous size. Apart from religious purposes, it was used as a treasure-house: as to the precise arrangements for the charge of this treasure we are in ignorance.

There is evidence outside the NT also for the presence of Jews in Ephesus. The twelve who had been baptized with the baptism of John (Ac 19[3]) may have been persons who had emigrated to Ephesus before the mission of Jesus began. When St. Paul turned from the Jews to the population in general, he appeared, as earlier in Athens, as a lecturer in philosophy, and occupied the school of Tyrannus out of school hours. The earlier part of the day, beginning before dawn, he spent in manual labour. The actual foundation of Christianity in Ephesus may have been due to Priscilla and Aquila (Ac 18[19]).

'Ephesian' occurs as a variant reading in the 'Western' text of Ac 20[4] for the words 'of Asia,' as applied to Tychicus and Trophimus. Trophimus was an inhabitant of Ephesus (Ac 21[29]), capital of Asia; but Tychicus was probably merely an inhabitant of the province Asia; hence they are coupled under the only adjective applicable to both.

The city of Ephesus was an object of exploration on

the part of J. T. Wood, who determined the location of the temple of Artemis in 1877, NE. of the city at the foot of the hill *Ayassoluk*, on which Justinian built the church dedicated to St. John the Divine. This temple, now deeply buried in the ground, was one of the seven wonders of the ancient world. An Austrian expedition did research and excavation at Ephesus (1906–1937). The reconstruction of the *Arkadiane*, the wide street leading from the theatre to the Harbour Gate, is one of its achievements. This street was flanked by colonnades and shops. Much archaeological work remains to be done at Ephesus. A. So.—E. G. K.

EPHLAL.—A descendant of Judah, 1 Ch 2^{37}.

EPHOD.—1. Father of Hanniel, Nu 34^{23}. **2.** See DRESS, **2** (*c*), and PRIESTS AND LEVITES, **1** (*d*). **3.** The 'ephod' of Jg 8^{27} 17^{15} 18$^{14, 17, 20}$ is probably an image.

EPHPHATHA (or with some MSS and Jerome, *ephphetha*) in Mk 7^{34} is an attempt at transliterating an Aramaic word, the imperative of either the Ithpa'al or the Ithpe'el from the verb *p'thaḥ* 'to open.' In either case it means 'Be thou opened.' Since the imperative meant seems to be masculine singular, Jesus' command was doubtless addressed to the man who, being a deaf mute, had been closed and was now to be opened. It might, however, have been addressed either to the mouth or the ears, which in Aramaic are at times spoken of as being 'opened' (cf Lk 1^{64} and the Targum to Is 50^{4}). A. J.

EPHRAIM.—Brother of Manasseh and second son of Joseph by Asenath, the daughter of Potiphera, priest of On (Gn 41^{50ff}), and eponym of the tribe of Ephraim. Popular etymology connected his name with the Hebrew root 'to be fruitful' (Gn 41^{52}), reflecting the strength and prosperity of the tribe. It is clear from passages such as Jos 16^{10}, Jg 1^{29} 8$^{1–9}$5^{7}, and the story about Shechem in Gn 34 that Ephraim was of mixed Canaanite-Hebrew blood and originally worshipped a deity called Baal-berith (Lord of the Covenant). In Gn 48^{13ff} we have the story of the adoption of Ephraim and Manasseh by Jacob (Israel), and in the blessing that follows Jacob gives precedence to Ephraim as against the older but less powerful Manasseh. In the early period the three tribes, Ephraim, Manasseh, and Benjamin, constituted a single group under the title of 'Joseph' or 'house of Joseph.' As late as 2 S 19^{20} Benjamin apparently is still a member of the group, and by the time of the Blessing of Jacob (Gn 49) Joseph still comprised Ephraim and Manasseh, but Benjamin had become a separate tribe, and this is the situation also in the Blessing of Moses (Dt 33). In the Song of Deborah (Jg 5) Ephraim is mentioned along with Benjamin and Machir, the first-born of Manasseh (Jos 17^{1}, Gn 50^{23}), but not Manasseh himself. Even as late as Solomon it was an Ephraimite, Jeroboam, who was answerable for the whole 'house of Joseph' (1 K 11^{28}). Exactly how and when Joseph broke up into its component parts we have no means at present of knowing. It was probably a loose organization that kept the group together, and they may have come in and out of the union more or less at will.

Ephraim occupied north-central Palestine (Jos 16$^{5–10}$), but not a word is said in the records about the conquest of that region, manifestly because it was already in the hands of Hebrews or of people so friendly to them that they joined the invaders without a struggle. Joshua himself was an Ephraimite (Jos 19^{50}). Shechem, the capital city, was the scene of the gathering of the tribes for the covenant ceremonies (Jos 8$^{30–35}$), and again after the conquest was completed (Jos 24$^{1–22}$). The early and important sanctuary of Shiloh was within its borders, and likewise the equally important sanctuary of Shechem, which city became the capital. Being rich and powerful, Ephraim was rather domineering throughout its history and jealous of its authority. It quarrelled with Gideon (Jg 8$^{1–3}$) and with Jephthah (Jg 12$^{1–6}$). After Saul's death Ephraim helped to set up Ishbosheth as king in opposition to David and the tribe of Judah (2 S 2^{8ff}), and it was an Ephraimite, Jeroboam, who revolted against Solomon, and was eventually made king over all Israel (1 K 12^{20}). As a result Ephraim, along with Israel, became the name of the northern kingdom, and its capital, originally Tirzah (1 K 14^{17}) and later Samaria (1 K 16^{24}), was situated in Ephraimite territory. Because Ephraim dominated the economic and political scene, there was a tendency, particularly among the prophets, to call the whole country Ephraim. See also TRIBES OF ISRAEL. T. J. M.

EPHRAIM.—A town in the vicinity of Baal-hazor (q.v.) mentioned in 2 S 13^{23} as the scene of Absalom's plot against Amnon. It may be identical with the Ephraim named in the *Onomasticon*, although the distance of 20 Roman miles N. of Jerusalem is doubtless too great if its proximity to Baal-hazor is correct. It also designated a larger area in the region of Shechem where the descendants of Ephraim settled (Jos 16^{4}, Jg 5^{14}). The name of the town probably gave its name in later times to the district of Samaria called *Aphairema* (1 Mac 11^{34} [AV **Apherema**, RV **Aphaerema**]; Jos. *Ant.* XIII. iv. 9 [127]). Most scholars identify the town with the Ephraim 'near the wilderness' to which Jesus retired after the raising of Lazarus (Jn 11^{54}). The *Onomasticon* mentions an 'Efraim' 5 Roman miles E. of Bethel. The description of Vespasian's march against Jerusalem refers to his capture of 'Bethel and Ephraim, two small cities' (Jos. *War* IV. ix. 9 [551]) as if they were close together. Two modern sites which have been proposed as Ephraim are *et-Ṭaiyibeh*, about 4 miles NE. of *Beitîn* (ancient Bethel), and *Samieh*, in the same region but closer to the Jordan valley. Both give evidence of occupation in Biblical times. See also EPHRON.

The Forest of Ephraim (Heb. *ya'ar 'Ephrayim*) was probably not a forest in our sense of the term, but a stretch of rough country such as the Arabs still call *wa'r*, abounding in rocks and thickets of brushwood. The location is not known, but it must have been E. of the Jordan, in the neighbourhood of Mahanaim. It was the scene of Absalom's defeat and death (2 S 18^{6ff}; cf 17$^{22, 24, 26f}$). The origin of the name is also uncertain, although it possibly preserves the memory of some association of the Ephraimites with the district (cf Jg 12^{1ff}).

Mount Ephraim (Heb. *har 'Ephrayim*) is the name given to that part of the central range of Western Palestine occupied by Ephraim, corresponding in part to the modern *Jebel Nâblus*, the region near modern *Nâblus* and the site of ancient Shechem. Because the region so designated might better be described as hilly in character rather than a single mountain, the RV and RSV use the phrase 'the hill country of Ephraim' instead of the 'mount Ephraim' of the AV (cf Jos 17^{15}, Jg 3^{27}, 1 S 1^{1} etc.). W. E.—W. L. R.

EPHRAIM GATE.—See JERUSALEM, GATES OF.

EPHRAIN, 2 Ch 13^{19} (AV).—See EPHRON, **4.**

EPHRATH, EPHRATHAH.—See BETHLEHEM, and CALEB-EPHRATHAH.

EPHRATHITE.—1. A native of Bethlehem, Ru 1^{2}, 1 S 17^{12}. **2.** An Ephraimite, Jg 12^{4} (where EV render **Ephraimite**), 1 S 1^{2}, 1 K 11^{26} (AV, RSV Ephraimite in both cases).

EPHRON.—1. The Hittite from whom Abraham purchased the field or plot of ground in which was the cave of Machpelah, Gn 23^{8ff}. The purchase is described with great particularity; and the transactions between Ephron and Abraham are conducted with an elaborate courtesy characteristic of Oriental proceedings. Ephron received 400 shekels' weight of silver (23^{15}): coined money did not exist at that time. If we compare the sale of the site with other instances (Gn 33^{19}, 1 K 16^{24}), Ephron seems to have made a good bargain. **2.** A mountain district, containing cities, on the border of Judah, between Nephtoah and Kiriath-jearim, Jos 15^{9}. It is probably modern *et-Ṭaiyibeh*, SE. of the Sea of Galilee. **3.** A strong fortress in the W. part of Bashan

between Ashteroth-karnaim and Bethshean (1 Mac 5^{46ff}, 2 Mac 12^{27}). The site is unknown. **4.** A place mentioned in 2 Ch 13^{19} (AV **Ephrain**); probably the same as **Ephraim, 2** (q.v.).

EPICUREANS.—St. Paul's visit to Athens (Ac 17^{15-34}) led to an encounter with 'some of the Epicurean and Stoic philosophers,' representatives of the two leading schools of philosophy of that time.

Epicureanism took its name from its founder Epicurus, who was born in the island of Samos in the year 341 B.C. In 306 B.C. he settled in Athens, where he died in 270 B.C. A man of blameless life and of a most amiable character, Epicurus gathered around him, in the garden which he had purchased at Athens, a brotherhood of attached followers, who came to be known either as Epicureans or 'the philosophers of the Garden.' His aim was a practical one. He regarded 'pleasure'—really happiness, not sensual enjoyment—as the absolute good. He did not restrict it, as the earlier Cyrenaic school had done, to immediate bodily pleasures. Whatever may have been the practical outcome of the system, Epicurus and his more worthy followers must be acquitted of the charge of sensuality. What he advocated and aimed at was the happiness of a tranquil life as free from pain as possible, undisturbed by social conventions or political excitement or superstitious fears—such as the fear of capricious and malevolent gods or the terrors of the life to come.

To deliver men from 'the fear of the gods' was the chief endeavour and, according to his famous follower the Roman poet Lucretius, the crowning service of Epicurus. Thus it may be said that, at one point at least, the paths of the Christian Apostle and the Epicurean philosopher touched each other. Epicurus sought to achieve his end by showing that in the physical organization of the world there is no room for the interference of such beings as the gods of the popular theology. There is nothing which is not material, and the primal condition of matter is that of atoms which, falling in empty space with an inherent tendency to swerve slightly from the perpendicular, come into contact with each other, and form the world as it appears to the senses. All is material and mechanical. The gods—he does not deny the existence of gods—have no part or lot in the affairs of men. They are relegated to a realm of their own in the spaces between the worlds. Further, since the test of life is feeling, death, in which there is no feeling, cannot mean anything at all, and is not a thing to be feared either in prospect or in fact.

One of the most attractive summaries of Epicurean teaching is the fugitive *tetractys* found among the fragments of Epicurus's work *On Nature* recovered from the ruins of Herculaneum: *Nothing to fear in God–Nothing to feel in death–Good can be attained–Evil can be endured.* In a world of scepticism and superstition, such convictions were 'on the side of the angels' and helped prepare the way for the Christian gospel. Yet the total effect of Epicureanism was negative, especially in its later Roman form. Its wide-spread and powerful influence must be accounted for by the personal charm of its founder, and by the conditions of the age in which it appeared and flourished. It takes its place as one of the negative but widening influences, leading up to 'the fulness of time' which saw the birth of Christianity.

W. M. McD.—F. C. G.

EPIGRAPHY.—The study of **inscriptions** (q.v.). Like many another traditional term it is chiefly one of convenience and fails to satisfy. It arose at a time when surviving monumental inscriptions were found to give valuable supplementary information for the knowledge of classical antiquity. The discovery of ancient texts written in the same characters on papyrus, leather, parchment, and clay has made it rather impracticable to isolate the monumental inscriptions as a separate field of study. Nevertheless, when the word epigraphy is used it should be reserved for texts that were done by the stone cutter, the engraver, or the maker of casts, rather than by the scribe or wielder of the stylus. Assyriologists of a former generation often spoke of inscriptions, when meaning only clay tablets. The word epigraphy requires further definition by the language or group of languages with which one is concerned. Thus North Semitic Epigraphy (cf M. Lidzbarski, *Handbuch der nordsemitischen Epigraphik*, 1898) is used to cover inscriptions in the Canaanitic and Aramaic dialects. South Semitic Epigraphy applies especially to the South Arabian dialects. Greek and Latin Epigraphy (cf W. Larfeld, *Handbuch der griechischen Epigraphik*, 1907, R. Cagnat, *Cours élémentaire d'épigraphie Latine*, 3rd ed. 1898) are self-explanatory terms. A particular slant may be stressed, as when one speaks of Early Christian Epigraphy (cf C. M. Kaufmann, *Handbuch der altchristlichen Epigraphik*, 1917); in that case the language is generally Greek or Latin, but the subject matter looms so important it crowds out mention of the languages.

E. G. K.

EPILEPSY.—See MEDICINE.

EPIPHI (3 Mac 6^{38}).—See TIME.

ER.—1. The eldest son of Judah by his Canaanitish wife, the daughter of Shua. For wickedness, the nature of which is not described, 'Y" slew him,' Gn 38^{3-7}, Nu 26^{19}. **2.** A son of Shelah the son of Judah, 1 Ch 4^{21}. **3.** An ancestor of Jesus, Lk 3^{28}.

ERAN.—Grandson of Ephraim, Nu 26^{36}. Patronymic, **Eranites**, *ib.*

ERASTUS.—The name occurs thrice in NT among the Pauline company. An Erastus sends greetings in Ro 16^{23}, and is called 'the treasurer (AV 'chamberlain') of the city' (Corinth). The Erastus who was sent by St. Paul from Ephesus to Macedonia (Ac 19^{22}), and who later remained in Corinth (2 Ti 4^{20}), is perhaps the same.

A. J. M.

ERECH.—An ancient city of Babylonia, called *Uruk* in Babylonian and Assyrian texts, mentioned in Gn 10^{10} amongst Nimrod's cities; modern *Warka*, S. of Babylon. Some of the inhabitants were deported as colonists to Samaria by Ashurbanipal, and are mentioned in Ezr 4^{9} (RSV 'men of Erech'; AV, RV '**Archevites**'). The deportation may indicate that Erech sided with Babylon in the revolt of Shamash-shum-ukin against the Assyrian king.

ERI.—Son of Gad, Gn 46^{16}, Nu 26^{16}. Patronymic **Erites**, Nu 26^{16}.

ERUPTION.—See MEDICINE.

ESAIAS.—The familiar AV spelling of **Isaiah** in Apocrypha and NT; it is retained by RV only in 2 Es 2^{18}, but is not found in RSV.

ESARHADDON, son and successor of Sennacherib (2 K 19^{37}, Is 37^{38}), reigned over Assyria 680–669 B.C. He practically re-founded Babylon, which Sennacherib had destroyed, and was a great restorer of temples. He was also a great conqueror, making three expeditions to Egypt, and finally conquered the whole North, garrisoning the chief cities and appointing vassal kings. He subdued all Syria, and received tribute from Manasseh, and Ezr 4^{2} mentions his colonization of Samaria. He ruled over Babylonia as well as Assyria, which explains the statement of 2 Ch 33^{1} that Manasseh was carried captive there.

ESAU.—1. The name is best explained as meaning 'hairy' (Gn 25^{25}, cf 27^{11}); **Edom** or 'ruddy' was sometimes substituted for it (v.^{30}), and Esau is represented as the progenitor of the Edomites ($36^{9, 43}$, Jer 49^{7ff}, Ob ^{8}). He displaced the Horites from the hilly land of Seir, and settled there with his followers (Gn 32^{3} 36^{8}, Dt 2^{12}). His career is sketched briefly but finely by weaving incidents collected from two sources (J and E; in the early part, chiefly the former), whilst the Priestly writer is supposed to have contributed a few particulars (Gn 26^{34f} 28^{9} 36). The standing feature of Esau's history is rivalry with Jacob, which is represented as even preceding the birth of the twins (Gn 25^{22f}, Hos 12^{3}). The facts may be collected into four groups. The sale of the birthright (Gn 25^{29ff}) carried with it the loss of precedence after the father's death (27^{29}), and probably loss of the domestic priesthood (Nu 3^{12f}), and

of the double portion of the patrimony (Dt 21^{17}). For this act the NT calls Esau 'irreligious' (He 12^{16}; AV, RV 'profane'), thus revealing the secret of his character; the word (Gr. *bebēlos*) suggests the quality of a man to whom nothing is sacred, whose heart and thought range over only what is material and sensibly present. To propitiate his parents, Esau sought a wife of his own kin (Gn 28^{8f}), though already married to two Hittite women (26^{34f}). His father's proposed blessing was diverted by Jacob's artifice; and, doomed to live by war and the chase (27^{40}), Esau resolved to recover his lost honours by killing his brother. Twenty years later the brothers were reconciled (33^{4}); after which Esau made Seir his principal abode, and on the death of Isaac settled there permanently (35^{29} 36^{6}, Dt 2^{4f}, Jos 24^{4}).

By a few writers Esau has been regarded as a mythical personage, the personification of the roughness of Idumaea. It is at least as likely that a man of Esau's character and habits would himself choose to live in a country of such a kind (Mal 1^{3}); and mere legends about the brothers, as the early Targums are a witness, would not have made Esau the more attractive man, and the venerated Jacob, in comparison, timid, tricky, and full of deceits. Against the historicity of the record there is really no substantial evidence.

2. 1 Es 5^{29} (AV, RV); see ZIHA. R. W. M.

ESCHATOLOGY is that department of theology which is concerned with the 'last things.' Though the term is not itself a Biblical one, it relates to such matters as the consummation of the Divine purpose in history, the final judgment, the estate of individuals after death, and the like, all of which occupy important places in the theology of the Bible.

1. The Beginnings of Eschatology in Pre-Exilic Israel.—Whether or not one describes the future hope of pre-exilic Israel as an eschatology is purely a question of definition. If by eschatology is meant a developed doctrine, or complex of ideas, relating to the end of the age and the estate of individuals after death, as in Judaism or Christianity, then it must be admitted that eschatology makes its appearance only late in the OT period. But this is probably too narrow a definition to be fully useful. Since Israel's faith from earliest times exhibited the profound conviction that Yahweh acted purposefully in history, guiding events toward the fulfilment of promise (beyond which there was no need to look), it can be said to have had an eschatological orientation from the beginning. In the future hope of old Israel the beginnings of a fully developed eschatology are to be found.

Though the origins of this future hope are disputed, it probably represents a development of a primitive feature in Israel's faith. It was scarcely essentially a borrowing from the pagan environment, since the ancient paganisms lacked any sense of history or of a divine purpose in history. Moreover, though Israel's future hope was given shape in the cult, and lent intensity by the frustration of national ambition, it hardly owed its origin to these things but to certain distinctive elements in Israel's faith itself. The belief that their God had promised them land and progeny seems, in fact, to have been an original feature in the religion of Israel's semi-nomadic ancestors. It is scarcely surprising, therefore, that a note of promise for the future should have distinguished Israel's faith from the beginning. Moreover, the covenant which made Israel a people, which was patterned on a suzerainty treaty between overlord and vassal, while it laid stringent demands on its recipients, implicitly carried the assurance that if the covenant stipulations were met the divine Overlord's favour would be endlessly continued. In any event, we may see in Israel's earliest literature (*e.g.* Gn 49, Nu 23–24, Dt 33, Jg 5, Ps 68) a robust confidence that she would be assured possession of her land, given material blessings by her God and made victorious over her foes.

The reign of David must have seemed to many Israelites virtually the fulfilment of promise. But its glories did not last. After they had slipped away (by the 8th cent., but almost certainly earlier) Israel's future hope began to assume certain definite forms. Important among these was the expectation of the Day of Yahweh, of which we hear for the first time in Amos (5^{18ff}), but which, since it was then an established popular belief, was certainly older. Though the origins of this belief are disputed, it entailed the expectation of a coming day when Yahweh would intervene definitively in behalf of His people and, judging His foes and theirs, make the promises actual. Certain features in the official cult of the Jerusalem Temple, which under David and Solomon had been made the national religious centre, likewise played an important part in shaping Israel's future hope. There the notion quite early entrenched itself that Yahweh had chosen Zion as His earthly seat and had promised to the Davidic dynasty an eternal rule. As certain Psalms indicate (*e.g.* Ps 2, 72, 89, 110, 132; cf 2 S 7^{4-17} 23^{1-7}), the promises to the dynasty and the dynastic ideal were reaffirmed in the cult. We may suppose that as this theology was cultically reiterated, especially as difficult times made it seem less of a present reality, the hope of a future improvement of the national fortunes and of the coming of a Davidide (perhaps the next one) under whom the promises to David would be realized.

This national hope was radically transmuted by the great prophets of the 8th and 7th cents. The first of these was Amos who, denouncing Israel's sin, declared that the Day of Yahweh would come as no glad day of national victory, but as the day of Divine judgment. Like Amos, the other pre-exilic prophets viewed the Day of Yahweh as the day of Yahweh's vengeance upon the nation for its sins; and they expected this to be accomplished through the historical agent of Yahweh's judgment, whether Assyria or Babylon. This meant, since these prophets did not surrender hope for the future, that hope was pushed ahead beyond the Day of Yahweh and, in the process, given various new forms. Particularly important in this connexion is Isaiah, who, building on the promises of the official theology, but stressing the note of chastisement for sin inherent in it, viewed Yahweh's judgment as a purge out of which He would bring forth a purified remnant of His people (1^{21-26} etc); his classic descriptions (9^{2-7} 11^{1-9}; cf Mic 5^{2ff}) of the coming ideal David laid the basis for Israel's hope of the Messiah. Equally important is Jeremiah, who, developing a note found already in Hosea, declared that the nation, having by its sins broken covenant with Yahweh, was doomed; hope, for him, lay in the farther future, in a new act of the Divine grace which would give to Israel a new covenant (31^{31-34}). Yet, in spite of the fact that the prophets pushed hope beyond calamity and beyond the existing order, as long as the nation endured the popular mind continued to envision the future in terms of a continuation and consummation of the national history.

2. Eschatology in Later OT Literature and in Judaism.—The Exile, here as elsewhere, marked a great watershed. The national hope could no longer be held in its old form. Instead, exiled Jews looked forward to a new and definitive act whereby Yahweh would redeem His people from bondage and restore them to their land. This took various forms: the expectation of the Day of Yahweh as the day when Babylon would be destroyed and the Jews released (*e.g.* Is 13^{1}–14^{23}); the hope of a national resurrection and a restored Davidic state (Ezk 37 etc.); the vision of a sacral community reconstituted about the restored Temple and its cult (Ezk 40–48), etc. Second Isaiah, in particular, hailed Cyrus as the agent of Yahweh's purpose and viewed the coming deliverance as a new Exodus experience which would mark a great turning point in history, leading to the triumphant establishment of Yahweh's rule in the earth and the turning of all nations to His worship; in the figure of the suffering Servant of Yahweh he described both Israel's mission and destiny and the pattern of the coming redemption.

The restoration of the Jewish community under the Persian kings gave these hopes at best only partial

fulfilment. The result was a heightened stress on eschatological expectations, but with these thrust forward into a new future and divorced ever more completely from the existing order. In post-exilic literature some of the forms in which hope had previously expressed itself play little part. After the disappointment of the Messianic hopes attached to Zerubbabel by Haggai and Zechariah, the figure of the Davidic king is seldom mentioned, though expectation of the Messiah of course continued and was much to the fore in NT times. The Servant of Yahweh likewise plays little part, save apparently as a model of humble piety. As for the ideal of the new covenant, it is probable that most Jews (cf Ps 37^{31} 40^{8}) felt that it had been realized in the reconstituted law community. The dominant eschatological pattern in post-exilic literature is that of the Day of Yahweh. This is described in various forms (*e.g.* Ezk 38 f, Joel, Zec 14, Is 24–27), but always as Yahweh's catastrophic intervention to judge the world and the nations and to establish His triumphant rule over His people. Though eschatological expectations still have a this-worldly context, they are not conceived of in terms of a continuation, or even a radical improvement, of the existing order, but as the intrusion into it of a new and different order.

In the 2nd cent. B.C. and after Jewish eschatology began to express itself in a novel form known as apocalyptic. Though the Book of Daniel is the only true apocalypse in the OT, a profusion of similar works were produced which did not gain admittance to the canon. Apocalyptic draws many of its motifs from concepts originally at home in Iranian religion, or in ancient Oriental myth, as these had been developed in popular Jewish thought. Its theology, however, is essentially Jewish with its roots in the eschatology of Judaism as this had been developed through the post-exilic period. Apocalypse means 'revelation.' Normally making use of the device of pseudonymity, apocalyptic literature seeks to set forth in cryptic language the programme of the end events. It was believed that the present age was drawing to a close, and that current happenings indicated that the climactic struggle between God and evil, light and darkness was beginning. Definite dualistic tendencies are in evidence, with angelic and demonic powers arrayed against one another. Apocalyptic is characterized by the manipulation of numbers, the division of history into world periods, the description of world powers in the guise of beasts, the reinterpretation of the words of earlier prophets, and the like. It expects no longer a mere dramatic turning point in history, but a supra-historical consummation and the coming of a new age. In apocalyptic literature we encounter the figure of the Son of Man. Though in Dn 7^{13f} the Son of Man appears to be a corporate designation for the vindicated saints of the Most High, in later portions of 1 Enoch he is thought of as a pre-existent heavenly deliverer who comes to rule over the saints in the last days.

Jewish eschatological expectations in NT times were varied and unsystematized. Some Jews (especially more worldly minded Sadducees) were little concerned with eschatology at all; others were nationalists who hoped for the coming of a political Messiah; still others (the Pharisees), though they looked for the redemption of Israel, were chary both of apocalyptic speculations and nationalistic enthusiasm. Apocalyptic appears to have been developed particularly in sectarian circles, as is seen from the scrolls of Qumrân. Here we see a sect (probably the Essenes) which, with a peculiar interpretation of the law, a peculiar religious calendar and a quasi-monastic discipline, regarded itself as the people of the New Covenant. It awaited the imminent consummation of the age; it looked (cf also Test. XII. Pat.) for the Messiah of Israel who would stand beside, but yield pre-eminence to, the Messiah of Aaron (the anointed priest).

Note must be made here of eschatological beliefs as they concerned the individual. Early Israel, while it did not suppose that death meant extinction, had no belief either in a resurrection or in rewards and punishments after death. It was thought that the dead, good and bad alike, pursued a shadowy existence in Sheol and, in general, that good conduct and bad received a material reward in this life; what immortality the individual might be said to have had lay in his seed and in the nation. The post-exilic period, however, witnessed the beginnings of a belief in the resurrection of the dead and in rewards and punishments after death. This belief owed its development perhaps partly to concepts of Iranian origin, but perhaps even more than has been supposed to ancient native notions regarding the cult of the dead which normative Yahwism had suppressed. In particular, however, it arose from the necessity of harmonizing the divine justice with the facts of experience; whatever the orthodox teaching might be, it had become obvious to many that individuals did not always receive their just deserts in this life. Hints of belief in a future life in the OT are, however, few and ambiguous (Ps 49^{14f} 73^{23ff}, Is 26^{19}, etc., have been suggested). Only in Dn 12^{1f} is resurrection both of righteous and wicked explicit, and even here the resurrection is selective rather than universal. It is probable that the Maccabaean struggle, when many godly Jews lost their lives for the faith, cast the deciding vote and made belief in future awards imperative. In any event, as contemporary literature shows, belief in a resurrection and a final judgment had become well established by NT times, though some (the Sadducees) continued to deny it (*e.g.* Mk 12^{18-27}, Ac 23^{6-10}).

3. Eschatology in the NT.—Though many points regarding the eschatology of the NT are in dispute, particularly the relationship of the teachings of the Evangelists and other NT writers on the subject to Jesus' own understanding of Himself and His mission, there can be no doubt that the theology of the NT (and of Jesus Himself) is one in which eschatology is the controlling factor. The NT writers consistently affirm that all the hope of Israel had been given fulfilment in Christ, and that in Him the power of the age to come had intruded into this age. The primitive *kērygma* of the earliest church, which we see reflected in various passages (*e.g.* Ac 3^{12ff} 10^{36ff}, Ro 1^{1ff}, 1 Co 15^{3ff}) stresses this thought, while Jesus' own preaching seems to have been concerned to announce the imminent approach, indeed the actual presence, of the Kingdom of God in His person (Mk 1^{15} etc.). The Gospel writers understood Jesus' ministry, specifically His mighty works, as evidences of the power of the new age in conflict with the power of Satan (*e.g.* Mt 12^{28}, Lk 10^{18} 11^{20}). John, in particular, using categories borrowed from sectarian Judaism, described Jesus' ministry in terms of the eschatological conflict of light with darkness (Jn 1^{1ff} 8^{12} 12^{35ff}). The NT views the cross and resurrection as the decisive victory in that conflict and the defeat of the powers of evil—indeed as the event by which the whole course of human history since Adam has been reversed (Ro 5^{12ff}).

In announcing Jesus as the fulfilment of the hope of Israel, the various forms in which that hope had expressed itself were taken over and applied to Him; He is hailed as Messiah (Christ is the Greek equivalent of the Hebrew Messiah: 'the anointed one'), as Son of Man (*e.g.* Christ as the New Adam: 1 Co $15^{20ff, 45ff}$), and as Servant of the Lord (*e.g.* Ph 2^{5ff}). To what degree these identifications were made by Jesus Himself, to what degree by the early Church, is disputed; but this was certainly done both early and consistently. Indeed, it is not unreasonable to suppose that Jesus, though refusing to be the political Messiah whom the people expected, saw it as His mission to give the Messianic hope of Israel fulfilment and, moreover, suffusing this and other eschatological patterns with the concept of vicarious sacrifice, set out to do so in the form of the Suffering Servant (cf Lk 4^{17ff}) spoken of by the prophet.

Viewing its Lord as the bringer of the new age, the Church saw itself as living in the end time, as an eschatological community (*e.g.* Ac 2^{16ff}). It believed itself to be the true remnant of Israel spoken of by Isaiah (*e.g.* Ro 9^{6ff} $11^{5, 17ff}$, Gal 6^{16}, 1 P 2^{9f}), and the recipient of the

new covenant spoken of by Jeremiah (cf the words at the Last Supper ; also 2 Co 3^{4ff}, He 8^{6ff} etc.). The Christian believer already had eternal life (John, *passim* ; Ro 5^{21} 6^{23} etc.), for he lived already in the age to come as one whose citizenship was in heaven (*e.g.* Gal 1^{4}, Ph 3^{20}, He 6^{5}). On his death he would partake of the resurrection (1 Co 15)—though it is not altogether clear whether it was believed that this would transpire immediately or (1 Th 4^{15ff}) at the Lord's return.

Yet in spite of the affirmation of the NT that the hope of Israel had been fulfilled in Christ, the Church could not view eschatology as something wholly ' realized,' for it was evident that the victory of Christ's kingdom lay still in the future. It therefore awaited, and prayed for (1 Co 16^{22} etc.), the return of the Lord in glory (*e.g.* Ac 1^{11}, 1 Th 4^{15ff}, Tit 2^{13}) and the final victory when all powers celestial and terrestrial would bow at His feet (*e.g.* Ac 3^{21}, 1 Co 15^{25}, Ph 1^{6}). This consummation, at least at first, was expected to come soon and suddenly (*e.g.* Ro 13^{11}, 1 Co 7^{29} 15^{51ff}, 1 Th 4^{17} 5^{1ff}), and its postponement evoked tension. The eschatological orientation of the gospel was, however, never lost ; it finds classical expression in the final book of the canon, Revelation. This book is an apocalypse which utilizes various elements drawn from Jewish apocalyptic eschatology in the interests of the Christian faith, and which seeks to set forth in detail the programme of the last events. The conflict of the two ages, which is both celestial and terrestrial, is described ; there is a resurrection of the saints, a period during which Satan is bound, a final conflict and the last judgment, followed by a picture of the new heaven and the new earth. The NT Church continued to live in tension between eschatology fulfilled and unfulfilled ; and so, theologically speaking, the Church does, and must do, even yet. J. Br.

ESCHEW.—In the older English versions of the Bible ' eschew ' is common. In AV it occurs only in Job $1^{1, 8}$ 2^{3} of Job himself, as 1^{1} ' one that feared God, and eschewed evil,' and in 1 P 3^{11} ' Let him eschew evil, and do good.' The meaning is ' turn away from ' (as RV at 1 P 3^{11} and RSV everywhere).

ESDRAELON.—The name of the great plain N. and E. of Mount Carmel. The word is a transliteration of the Greek name which is itself thought to be derived from the Hebrew **Jezreel** (q.v.). Although the name Esdraelon as such does not appear in the Hebrew of the OT or the Greek of the NT, and is found in the Apocrypha only in Jth 1^{8}, 3^{9} 4^{6} 7^{3}, it has come to be the best-known designation of the great plain. The Arabic name is *Merj Ibn ʿÂmir* ; its territory was divided in 1948 between Israel and the Kingdom of the Jordan. It is probable that the name of the city Jezreel (q.v.) was applied to its adjacent plain (Jos 17^{16}, Jg 6^{33}, Hos 1^{5}), and then to the entire plain. Similarly, the name of the city Megiddo was applied to the plain (2 Ch 35^{22}, Zec 12^{11}), although in both cases it is difficult to determine whether the names apply to all or to a part of the great plain.

It is roughly triangular in shape covering an area of about 20 miles NW. to SE., and 14 miles NE. to SW. From the sea-coast to the Bay of ʿAkkā (and modern Haifa) it affords passage into the mountainous interior of Palestine. It is drained by the Kishon (q.v.) and is, over nearly all its area, remarkably fertile, although in the rainy seasons it has become marshy. Great cities such as Megiddo and Taanach (q.v.) lined its borders, and it served as a bread-basket for a much larger region.

Under the various names discussed above, the plain is frequently referred to as a battlefield. Here Deborah and Barak routed the armies of Jabin and Sisera (Jg 4), and here Gideon defeated the Midianites (7). Saul here fought his last battle with the Philistines (1 S 28–31). Josiah here attacked Pharaoh Neco on his way to Mesopotamia and was slain (2 K 23^{30}). It was the scene of the encampment of Holofernes (Jth 7^{3}), and of Saladin in 1186. Napoleon defeated an army of Arabs here in 1799, and General Allenby won a decisive victory over the Turks here in 1917. The plain was referred to by the Apocalyptic writer (Rev 16^{16}) as Armageddon (q.v.), the scene of the final battle between the cosmic forces of good and evil.

R. A. S. M.—W. L. R.

ESDRAS.—See Apocrypha, **1, 2,** and Pseudepigrapha, **7.**

ESDRIS.—Mentioned only in 2 Mac 12^{36}. The text is probably corrupt. AV has *Gorgias*, and this is likely enough to be correct.

ESEBRIAS, 1 Es 8^{54} (AV).—See Sherebiah.

ESEK (' contention ').—A well dug by Isaac in the region near Rehoboth and Garar, Gn 26^{20}. The site is unknown.

ESEREBIAS, 1 Es 8^{54} (RV).—See Sherebiah.

ESHAN.—A town of Judah, in the Hebron mountains, noticed with Arab and Dumah, Jos 15^{52} (AV **Eshean**). The site is unknown.

ESHBAAL.—See Ishbosheth.

ESHBAN.—An Edomite chief, Gn 36^{26}, 1 Ch 1^{41}.

ESHCOL.—1. The brother of Mamre and Aner, the Amorite confederates of Abraham, who assisted the patriarch in his pursuit and defeat of Chedorlaomer's forces, Gn $14^{13, 24}$). He lived in the neighbourhood of Hebron, Gn 13^{18} ; and possibly gave his name to the valley of Eshcol, which lay a little to the N. of Hebron, Nu 13^{23}. **2.** A wady, with vineyards and pomegranates, apparently near Hebron, Nu 13^{23f} 32^{9}, Dt 1^{24}. *Eshcol* is usually rendered ' bunch of grapes.' The name has not been recovered.

ESHEAN, Jos 15^{52} (AV).—See Eshan.

ESHEK.—A descendant of Saul, 1 Ch 8^{39}.

ESHTAOL.—A lowland city of Judah (Jos 15^{33}) on the borders of Dan (19^{41}), near which Samson began to feel ' the spirit of the Lord ' (Jg 13^{25}), and was buried (16^{31}) ; the home of some of the Danites who attacked Laish ($18^{2, 11}$). It is possibly modern *Eshwāʿ*, near *ʿAin Shems*. The **Eshtaolites** are enumerated among the Calebites, 1 Ch 2^{53} (AV **Eshtaulites**).

ESHTEMOA.—A Levitical city in the district of Hebron (Jos 21^{14}, 1 Ch 6^{57}), to which David sent a share of the spoil of the Philistines (1 S 30^{28}) ; called **Eshtemoh** in Jos 15^{50}. It is treated as a person in 1 Ch $4^{17, 19}$. It is probably modern *es-Semūʿ*, about 8 miles S. of Hebron.

ESHTEMOH.—A town of Judah 15^{50} ; elsewhere called **Eshtemoa** (q.v.).

ESHTON.—A Judahite, 1 Ch 4^{11f}.

ESLI.—An ancestor of Jesus (Lk 3^{25}).

ESRIL, 1 Es 9^{34} (AV).—See Azarel, **4.**

ESSENES.—To the student of NT times the Essenes present a problem of extreme difficulty. The very existence of a monastic order within the pale of Judaism is an extraordinary phenomenon. Until the discovery of the Dead Sea Scrolls (q.v.) it was almost incredible. In India such things would have been a matter of course. But the deep racial consciousness and the tenacious national will of the Jews make it hard to account for. When, approaching the subject in this mood, the student straightway finds as features of the order the habit of worshipping towards the sun and the refusal to share in the public services of the Temple, he is tempted to explain Essenism by foreign influences. Yet the Essenes were Jews in good standing. They were inside, not outside, the pale of strictest Judaism. Hence they give the student a problem as interesting as it is difficult.

No small part of the difficulty is due to the character of our witness. Unless the sect of Qumrân, which produced the Dead Sea Scrolls is to be identified with the Essenes, we are dependent upon brief descriptions given by outsiders whose understanding was limited. Essenism was the first form of organized monasticism in the Mediterranean world. The Greeks who followed Alexander to India marvelled at the Ascetics or Gymnosophists. But not until Essenism took shape did the

men of the Mediterranean world see monasticism at close quarters. Wonderment and the children of wonderment—fancy and legend—soon set to work on the facts, colouring and distorting them. One of our sources, Pliny (*HN* v. 17), is in part the product of the imagination. Another, Philo (*Quod omnis probus liber*, 12 f, and in Euseb. *Praep. Ev.* VIII. ii. 1), writes in the mood of the preacher to whom facts have no value except as texts for sermons. And even Josephus (*Ant.* XIII. v. 9 [171 ff], XV. x. 4, 5 [371 ff], XVIII. i. 2, 5 [11, 18 ff]; *Vita*, 2 [10 f]; *BJ* II. viii. 2–13 [119 ff], our best source, is at times under suspicion. But a rough outline of the main facts is discernible.

The foundations of Essenism were laid in the half-century preceding the Maccabaean War. The high priesthood was disintegrating. In part this was due to the fact that the loose-jointed Persian Empire had been succeeded by the more coherent kingdom of the Seleucids. With this closer political order, which made Jewish autonomy more difficult of attainment, went the appealing and compelling forces of Hellenism, both as a mode of life and as a reasoned view of the world. The combined pressure of the political, the social, and the intellectual elements of the Greek over-lordship went far towards disorganizing and demoralizing the ruling class in Jerusalem.

But a deeper cause was at work, the genius of Judaism itself (see PHARISEES). When the Hebrew monarchy fell, the political principle lost control. To popularize monotheism, to build up the OT Canon, organize and hold together the widely separated parts of the Jewish people—this work called for a new form of social order which mixed the ecclesiastical with the political. The man whom the times required in order to carry this work through was not the priest, but the Bible scholar. And he was necessarily an intense separatist. Taking Ezra's words, 'Separate yourselves from the people of the land' (Ezr 10^{11}) as the keynote of life, his aim was to free God's people from all taint of heathenism. In the critical period of fifty years preceding the War this class of men was coming more and more into prominence. They stood on the Torah as their platform; the Law of Moses was both their patrimony and their obligation. In them the genius of Judaism was beginning to sound the rally against both the good and the evil of Hellenism, against its illumining culture as well as against the corroding Graeco-Syrian morality. The priestly aristocracy of Palestine being in close touch with Hellenism, it naturally resulted that the high priesthood, and the Temple which was inseparable from the high priesthood, suffered a fall in religious value.

Into this situation came the life-and-death struggle against the attempt of Antiochus to Hellenize Judaism. In the life of a modern nation a great war has large results. Far greater were the effects of the Maccabaean War upon a small nation. It was a supreme point of precipitation wherein the genius of Judaism reached clear self-knowledge and definition. The Essenes appear as a party shortly after the war. It is not necessary to suppose that at the outset they were a monastic order. It is more likely that they at first took form as small groups or brotherhoods of men intent on holiness, according to the Jewish model. This meant a kind of holiness that put an immense emphasis on Levitical precision. To keep the Torah in its smallest details was part and parcel of the very essence of morality. The groups of men who devoted themselves to the realization of that ideal started with a bias against the Temple as a place made unclean by the heathenism of the priests. This bias was strengthened through the assumption of the high priesthood by the Hasmonaean house, an event which still further discounted the sacramental value of the Temple services. So these men, knit into closely coherent groups, mainly in Judaea, found the satisfactions of life in deepening fellowship, and an ever more intense devotion to the ideal of Levitical perfection. In course of time, as the logic of life carried them forward into positions of which they had not at first dreamed, the groups became more and more closely knit, and at the same time more fundamentally separatistic regarding the common life of the Jews. So we find, possibly late in the 1st cent. B.C., the main group of Essenes colonizing near the Dead Sea, and constituting a true monastic order.

The stricter Essenes abjured private property and marriage in order to secure entire attention to the Torah. The Levitical laws of holiness were observed with great zeal. An Essene of the higher class became unclean if a fellow-Essene of lower degree so much as touched his garment. They held the name of Moses next in honour to the name of God. And their Sabbatarianism went to such lengths that the bowels must not perform their wonted functions on the Seventh Day.

At the same time, there are reasons for thinking that foreign influences had a hand in their constitution. They worshipped towards the sun, not towards the Temple. This may have been due to the influence of Parsism. Their doctrine of immortality was Hellenic, not Pharisaic. Foreign influences in this period are quite possible, for it was not until the wars with Rome imposed on Judaism a hard-and-fast form that the doors were locked and bolted. Yet, when all is said, the foreign influence gave nothing more than small change to Essenism. Its innermost nature and its deepest motive were thoroughly Jewish.

It is possible that John the Baptist was affected by Essenism. It is possible that our Lord and the Apostolic Church may have been influenced to a certain extent. But influence of a primary sort is out of the question. The impassioned yet sane moral enthusiasm of early Christianity was too strong in its own kind to be deeply touched by a spirit so unlike its own. The Dead Sea Scrolls on the whole confirm these impressions. Whether the sect which produced them was identical with the Essenes or a distinct but closely related group, what has been said here applies to it as well as to the people described by Josephus, Philo, and Pliny. The Scrolls, however, give us an incomparably richer and more authentic picture of the sect. H. S. N.—**M. B.**

ESTATE.—'State' and 'estate' occur in AV almost an equal number of times, and with the same meaning. Cf Col 4^{7} 'All my state shall Tychicus declare unto you,' with the next verse, 'that he might know your estate.' In Ac 22^{5} 'all the estate of the elders' (Gr. 'all the presbytery') means all the members of the Sanhedrin. The plural occurs in the Preface to AV, and in Ezk 36^{11} 'I will settle you after your old estates,' *i.e.* according to your former position in life. The heading of Ps 37 is 'David persuadeth to patience and confidence in God, by the different estate of the godly and the wicked.' It occurs nine times in RSV (OT and NT): twice meaning property, seven times condition or position.

ESTHER ('star').—The Jewish name, of which this is the Persian (or Babylonian) form, is **Hadassah** (Est 2^{7}), which means 'myrtle.' The form Esther may have some connexion with the name of the common Semitic goddess, *Ishtar*. She was the daughter of Abihail, of the tribe of Benjamin, and was brought up, an orphan, in the house of her cousin **Mordecai**, in Susa. When the Persian king, Xerxes, banned Vashti the queen from his presence he had the most beautiful girls of the kingdom found for him. Among them was Esther, who, owing to her beauty, became a favourite and eventually succeeded Vashti. The combined wisdom of Mordecai and courage of Esther became the means of doing a great service to the very large number of Jews living under Persian rule; for, owing to the craft and hatred of Haman, the chief court favourite, the Jews were in danger of being massacred *en bloc*; but Esther, instigated by Mordecai, revealed her Jewish nationality to the king, who realized thereby that she was in danger of losing her life, owing to the royal decree, obtained by Haman, to the effect that all those of Jewish nationality in the king's dominions were to be put to death. Esther's action brought about

an entire reversal of the decree. Haman was put to death, and Mordecai was honoured by the king for saving him from a plot on his life (ch. 2). Esther's own position was strengthened and the Jews were permitted to take revenge on those who had sought their destruction. Mordecai and Esther sent out two decrees: first, that the 14th and 15th days of the month Adar were to be kept annually as 'days of feasting and gladness, and of sending portions one to another, and gifts to the poor' (Est 9^{22}); and, second, that a day of mourning and fasting should be observed in memory of the sorrow which the king's first decree had occasioned to the Jewish people (9^{29-32}, cf 4^{1-3}).

Attempts have been made to identify the chief characters with known historical persons, but, apart from the king Ahasuerus, they almost necessarily fail since the book is undoubtedly a historical novel (see the next article). W. O. E. O.—L. H. B.

ESTHER, BOOK OF.—1. Place in Canon.—In the Hebrew Canon the book is found among the 'Writings' and is one of the *Megilloth* or 'Rolls' (*i.e.* Canticles, Ruth, Lamentations, Ecclesiastes, Esther). It was not without much discussion that it was admitted into the Canon. As late as the 2nd cent. A.D. some Jewish scholars denied its canonicity and it was not recognized as Scripture by some early Christian scholars. Neither Athanasius († 373) nor Gregory of Nazianzus († 391) included it in lists of the canonical books made towards the end of the 4th cent. A.D. Luther said, 'I am so hostile to the book and to Esther that I wish they did not exist at all; for they Judaize too much and have much heathen perverseness' (*Tischreden*, Weimar ed. XXII. 2080). It is clear that Esther was not universally accepted as a book of the Bible until a late date.

2. Date and authorship.—The language of Esther points unmistakably to a late date. The Hebrew style is laboured as though it were the work of one who was trying to imitate a classical style. The author was clearly familiar with Aramaic and there are several words of Persian origin. Further, the Persian empire is spoken of as belonging to a period of history long since past (cf 'in those days,' 1^{2}); the words, 'There is a certain people scattered abroad and dispersed among the peoples in all the provinces of your kingdom' (3^{8}) show that the dispersion had already for long been an accomplished fact. Moreover, the spirit of the book points to a time when great bitterness and hatred had been engendered between Jew and Gentile. The probability, therefore, is that Esther belongs to the earlier half of the 2nd cent. B.C. Of its authorship we know nothing further than that the writer was a Jew who must have been in some way connected with Persia. His racial prejudice was much stronger than his religious fervour; the name of God nowhere occurs in the book, which was clearly one of the reasons for its tardy acceptance as canonical.

3. Contents.—The book, which may be described as a historical novel, offers an account of how the Jewish feast of *Purim* ('Lots') first originated. Xerxes, king of the Medes and Persians, gives a great feast to the nobles and princes of the 127 provinces over which he rules; the queen, Vashti, also gives a feast to her women. On the seventh day of the feast the king commands Vashti to appear before the princes in order that they may see her beauty. On her refusing to obey, the king, acting on advice from his courtiers, chooses the Jewess Esther to take her place. Esther is the adopted daughter of a Jew named **Mordecai** who had been the means of saving the king from the hands of assassins (2^{19-23}). But Mordecai falls out with the court favourite, **Haman**, on account of his refusing to bow down and do reverence to the latter. Haman resolves to avenge himself for this insult; he has lots cast in order to find out which is the most suitable day for presenting a petition to the king; the day being appointed, the petition is presented and granted, the promised payment of ten thousand talents of silver into the royal treasury (3^{9}) no doubt contributing towards this. The petition was that a royal decree should be put forth to the effect that all Jews were to be killed, and their belongings treated as spoil. On this becoming known, there is great grief among the Jews. Esther, instructed by Mordecai, undertakes to interpose for her people before the king. She invites both the king and Haman to a banquet, and repeats the invitation for the next day. Haman, believing himself to be in favour with the royal couple, determines to gratify his hatred for Mordecai in a special way, and prepares a gallows on which to hang him (5^{14}). In the night after the first banquet, Xerxes (Ahasuerus), being unable to sleep, commands that the book of memorable deeds be brought; in this he finds the account of Mordecai's former service (2^{19-23}) which has never been rewarded. Haman is sent for, and the king asks him what should be done to the man whom the king delights to honour; Haman, thinking that it is he himself who is uppermost in the king's mind, describes how such a man should be honoured. The king thereupon directs that all that Haman has said is to be done to Mordecai. Haman returns in grief to his house. While consulting his friends, the king's chamberlains come to escort him to the queen's second banquet (6^{14}). During this Esther makes her petition to the king on behalf of her people, as well as for her own life, which is threatened, for the royal decree is directed against all Jews and Jewesses within his domains; she also discloses Haman's plot against Mordecai. The king, as the result of this, orders Haman to be hanged on the gallows which he had prepared for Mordecai, the latter receiving the honours which had before belonged to Haman. Esther then has letters sent in all directions in order to avert the threatened destruction of her people; but the attempt is yet made by the enemies of the Jews to carry out Haman's intentions. The Jews defend themselves with success, and a great feast is held on the 14th of Adar, on which the Jews 'rested and made that a day of feasting and gladness.' Moreover, two days of feasting are appointed to be observed for all time; they are called *Purim*, because of the lot (*pûr*) which Haman cast for the destruction of the Jews (chs. 8, 9). The book concludes with a further reference to the power of Ahasuerus and the greatness of his favourite, Mordecai.

4. Historicity of the book.—There are several reasons for concluding that this a historical romance. The book is full of improbabilities: if Mordecai was carried into exile in 597 B.C. he would be well over 110 years of age in the reign of Xerxes (485–465 B.C.); it is improbable that a Persian king would choose a Jewess for his consort, although it should be added that the story of Nehemiah does not preclude the possibility of both Esther and Mordecai obtaining favoured positions at court. Again, a specific purpose of the book is to glorify the Jewish nation and to ridicule the Gentiles. Close reading of the narrative reveals many small inconsistencies that are more likely to occur in fiction than in history. Some scholars have seen similarities between proper names in the book and the names of deities—Haman = Human, Esther = Ishtar, Vashti = Mashti, Mordecai = Marduk—and have suggested that the story embodies a well-known myth and tried thereby to prove Babylonian origin for the book. The equations are not conclusive however; Esther may be a Persian name meaning 'star,' while Mordecai may either be an abbreviated theophorous name, or it may be another Persian name meaning 'kind.' All that can safely be said of the origin of the book is that the festival of Purim is almost certainly of pagan origin and that the book may have been written outside Israel in the land where Purim was first adopted by the Israelites. The fact that it is celebrated on the two days following Nicanor's day (1 Mac 7^{49}, 2 Mac 15^{36}) has led to its connexion with the Maccabaean wars.

5. Purim. The feast is said to derive its name from the word *pûr* (of which *pûrîm* is a plural form) meaning 'lot,' a word that appears to be Akkadian in origin. Nothing is said in the book that throws any light on the origin of the feast. The command to celebrate it with

rejoicing and feasting was often taken very literally, so much so that a 'Babylonian authority of the fourth century, Raba, took it that a man should drink till he cannot distinguish between Cursed be Haman! and Blessed be Mordecai!' (Moore, *Judaism* ii, p. 53). The book of Esther was the proper reading for the festival, either in public or in private.

W. O. E. O.—L. H. B.

ESYELUS, 1 Es 1[8] (RV).—See JEHIEL, 6.

ETAM.—1. An altogether obscure place name, applied to a rock in a cleft of which Samson took refuge (Jg 15[8]), and whence he was dislodged by the Judahites (vv.[11ff]), and therefore presumably in Judahite territory. **2.** A town in Judah, mentioned in Jos 15[59] (LXX, but not in Hebrew or EV); it was fortified by Rehoboam, 2 Ch 11[6]. It is perhaps modern *Kh. el-Khôkh*, SW. of Bethlehem, near *'Ain 'Aṭân*. **3.** A place included in the territory of Simeon, 1 Ch 4[32]; its site is unknown. **4.** A descendant of Judah, 1 Ch 4[3].

ETERNAL LIFE.—See IMMORTALITY, and LIFE.

ETHAM.—The station to Succoth in the wanderings, Ex 13[20], Nu 33[6ff]. It lay 'on the edge of the wilderness,' evidently at the E. end of the *Wâdī Ṭumilât*. The name is not known in Egyptian, and its location is uncertain. The 'wilderness of Ethan' (Nu 33[8]) lay to the E. of Etham.

ETHAN.—1. 'The Ezrahite' of 1 K 4[31] and Ps 89 (title). In the first of these passages he is mentioned along with other contemporaries (?) of Solomon, who were all surpassed in wisdom by the Jewish monarch. In 1 Ch 2[6] he is said to have been a Judaean of the family of **Zerah**, which is probably another form of *Ezrah* (hence the patronymic *Ezrahite*). Instead of 'the Ezrahite' it has been proposed to render *'ezrāḥî* of 1 K 4[31] 'the native,' *i.e.* the *Israelite*, in opposition to some of the other wise men named, who were *foreigners*. **2.** An ancestor of Asaph, 1 Ch 6[42]. In v.[21] he is apparently called **Joah**. **3.** The eponymous ancestor of a guild of Temple-singers, 1 Ch 6[44] 15[17, 19] etc.

ETHANIM.—The name of a month, 1 K 8[2]; see TIME.

ETHANUS.—One of the five scribes trained to write rapidly, who wrote at the dictation of Ezra (2 Es 14[24]).

ETHBAAL ('with Baal,' *i.e.* enjoying his favour and protection).—King of the Sidonians, and father of Jezebel, wife of Ahab king of Israel (1 K 16[31]).

ETHER.—1. A town of Judah, mentioned with Libnah, Jos 15[42]; possibly modern *Khirbet el-'Ater*. **2.** A town of Simeon, mentioned with En-rimmon, Jos 19[7]; apparently S. of **1**, and perhaps modern *Khirbet 'Attîr*. **Athach** (q.v.) may be the same place.

ETHICS.—The present article will be confined to Biblical Ethics. As there is no systematic presentation of the subject, all that can be done is to gather from the Jewish and Christian writings the moral conceptions that were formed by historians, prophets, poets, apostles. The old history culminates in the story of the perfect One, the Lord Jesus Christ, from whom there issued a life of higher order and ampler range.

1. OT Ethics.—As the dates of many of the books are uncertain, special difficulty attends any endeavour to trace with precision the stages of moral development amongst the Hebrews. The existence of a moral order of the world is assumed; human beings are credited with the freedom, the intelligence, etc., which make morality possible. The term 'conscience' does not appear till NT times, and perhaps it was then borrowed from the Stoics; but the thing itself is conspicuous enough in the records of God's ancient people. In Gn 3[5] we have the two categories 'good' and 'evil'; the former seems to signify in 1[31] 'answering to design' and in 2[18] 'conducive to well-being.' These terms—applied sometimes to ends, sometimes to means—probably denote ultimates of consciousness, and so, like pain and pleasure, are not to be defined. Moral phenomena present themselves, of course, in the story of the patriarchs; men are described as mean or chivalrous, truthful or false, meritorious or blameworthy, long before legislation—Mosaic or other—takes shape.

1. In Hebrew literature the *religious aspects of life* are of vital moment, and therefore morals and worship are inextricably entangled. God is seen; there is desire to please Him; there is a shrinking from aught that would arouse His anger (Gn 20[6] 39[9]). Hence the immoral is sinful. Allegiance is due—not to an impersonal law, but to a Holy Person, and duty to man is duty also to God. Morality is under Divine protection: are not the tables of the Law in the Ark that occupies the most sacred place in Y"'s shrine (Ex 40[20], Dt 10[5], 1 K 8[9], He 9[4])? The commandments, instead of being arbitrary, are the outflowings of the character of God. He who enjoins righteousness and mercy calls men to possess attributes which He Himself prizes as His own peculiar glory (Ex 33[18f] 34[6f]). Hosea represents the Divine love as longing for the response of human love, and Amos demands righteousness in the name of the Righteous One. Man's goodness is the same in kind as the goodness of God so that both may be characterized by the same terms; as appears from a comparison of Pss 111 and 112.

2. The OT outlook is *national* rather than individual. The elements of the community count for little, unless they contribute to the common good. A man is only a fractional part of an organism, and he may be slain with the group to which he belongs, if grievous sin can be brought home to any part of that group (Jos 7[19–26]). It is Israel—the people as a whole—that is called God's son. Prayers, sacrifices, festivals, fasts, are national affairs. The highest form of excellence is willingness to perish if only Israel may be saved (Ex 32[31f], Jg 5[15–18]). Frequently the laws are such as only a judge may administer: thus the claim of 'an eye for an eye, and a tooth for a tooth' (Dt 19[21]), being a maxim of fairness to be observed by a magistrate who has to decide between contending parties, is too harsh for guidance outside a court of law (Mt 5[38f]). When Israel sinned, it was punished; when it obeyed God, it prospered, It was not till Hebrew national life was destroyed that individual experiences excited questions as to the equity of Providence (Job, Pss 37, 73) and in regard to personal immortality. In the later prophets, even when the soul of each man is deemed to be of immense interest (Ezk 18), national ideals have the ascendency in thought. It is the nation that is to have a resurrection (Is 25[8], Ezk 37[1–14], Hos 13[14], Zec 8[1–8]). This ardent devotion to corporate well-being—a noble protest against absorption in individual interests—is the golden thread on which the finest pearls of Hebrew history are strung.

3. The *Covenant* is always regarded as the *standard* by which conduct is to be judged. Deference to the Covenant is deference to God (Hos 6[7] 8[1], Am 3[1–3]). As God is always faithful, His people prosper so long as they observe the conditions to which their fathers gave solemn assent (Ex 24[3, 7]). The Decalogue, which is an outline of the demands made by the Covenant on Israel, requires in its early clauses faith, reverence, and service; then (Ex 20, Commandments 5 to 9) the duty of man to man is set forth as part of man's duty to Y", for Moses and all the prophets declare that God is pleased or displeased by our behaviour to one another. The Tenth Commandment, penetrating as it does to the inward life, should be taken as a reminder that all commandments are to be read in the spirit and not in the letter alone (Lv 19[17f], Dt 6[5f], Ps 139, Ro 7[14]). Human obligations—details of which are sometimes massed together as in Ex 20–23, Ps 15 and 24—include both moral and ceremonial requirements. Nothing is more common in the prophets than complaints of a disposition to neglect the former (Is 1[11f], Jer 6[20] 7[21f], Hos 6[6], Am 5[21f]). The requirements embrace a great number of particulars, and every department of experience is recognized. Stress is laid upon kindness to the *physically defective* (Lv 19[14]), and to the *poor* and to *strangers* (Dt 10[18f] 15[7–11] 24[17ff], Job 31[16ff, 32], Ps 41[1],

Is 58[6ff], Jer 7[5ff]. 22[3], Zec 7[9f]). *Parents* and *aged* persons are to be reverenced (Ex 20[12], Dt 5[16], Lv 19[32]). The education of *children* is enjoined (Ex 12[26f] 13[8, 14], Dt 4[9] 6[7, 20–25] 11[19] 31[12f] 32[46], Ps 78[5f]). In Proverbs emphasis is laid upon *industry* (6[6–11]), *purity* (7[6] etc), *kindness* to the needy (14[21]), *truthfulness* (17[7] etc.), *forethought* (24[27]). The claims of *animals* are not omitted (Ex 23[11], Lv 25[7], Dt 22[4, 6] 25[4], Ps 104[11f] 148[10], Pr 12[10], Jon 4[11]). Occasionally there are charming pictures of special characters (the housewife, Pr 31 ; the king, 2 S 23[3f] ; the priest, Mal 2[5ff]). God's rule over man is parallel with His rule over the universe, and men should feel that God embraces all interests in His thought, for He is so great that He can attend equally to the stars and to human sorrows (Ps 19, 33, 147[3–6]).

4. The *sanctions* of conduct are chiefly temporal (harvests, droughts, victories over enemies, etc.), yet, as they are national, self-regard is not obtrusive. Moreover, it would be a mistake to suppose that no Hebrew minds felt the intrinsic value of morality. The legal spirit was not universal. The prophets were glad to think that God was not limiting Himself to the letter of the Covenant, the very existence of which implied that Y", in the greatness of His love, had chosen Israel to be His peculiar treasure. By grace and not by bare justice Divine action was guided. God was the compassionate Redeemer (Dt 7[8], Hos 11[1] 14[4]). Even the people's disregard of the Law did not extinguish His forgiving love (Ps 25[6ff] 103[8ff], Is 63[9], Jer 3[12] 31[3] 33[7f], Mic 7[18f]). In response to this manifested generosity, an unmercenary spirit was begotten in Israel, so that God was loved for His own sake, and His smile was regarded as wealth and light when poverty and darkness had to be endured. 'Whom have I in heaven but thee?' 'Oh, how I love thy law!' are expressions the like of which abound in the devotional literature of Israel, and they evince a disinterested devotion to God Himself and a genuine delight in duty. To the same purport is the remarkable appreciation of the beauty and splendour of wisdom recorded in Pr 8.

II. NT Ethics.—While admitting many novel elements (Mt 11[11] 13[17, 35, 52], Mk 2[21f], Jn 13[34], Eph 2[15], He 10[20], Rev 2[17] 3[12] 5[9]), Christianity reaffirmed the best portions of OT teaching (Mt 5[17], Ro 3[31]). Whatsoever things were valuable, Christ conserved, unified, and developed. The old doctrine acquired wings, and sang a nobler, sweeter song (Jn 1[17]). But the glad and noble life which Jesus came to produce could come only from close attention to man's actual condition.

1. Accordingly, Christian Ethics takes full account of *sin*. The guilty state of human nature, together with the presence of temptations from within, without, and beneath, presents a problem far different from any that can be seen when it is assumed that men are good or only unmoral. Is our need met by lessons in the art of advancing from good to better? Is not the human will defective and rebellious? The moral ravages in the individual and in society call for Divine redemptive activities and for human penitence and faith. Though the sense of sin has been most conspicuous since Christ dwelt among men, the Hebrew consciousness had its moral anguish. The vocabulary of the ancient revelation calls attention to many of the aspects of moral disorder. Sin is a ravenous beast, crouching ready to spring (Gn 4[7]) ; a cause of wide-spreading misery (Gn 3[15–19] 9[25] 20[9], Ex 20[5]) ; is universal (Gn 6[5] 8[21], 1 K 8[46], Ps 130[3] 143[2]) ; is folly (Proverbs *passim*) ; a missing of the mark, violence, transgression, rebellion, pollution (Ps 51). This grave view is shared by the NT. The Lord and His Apostles labour to produce contrition. It is one of the functions of the Holy Spirit to convict the world of sin (Jn 16[8]). It is not supposed that a good life can be lived unless moral evil is renounced by a penitent heart. The fountains of conduct are considered to have need of cleansing. It is always assumed that great difficulties beset the soul in its upward movements, because of its past corrupt state and its exposure to fierce and subtle temptations.

2. In harmony with the doctrine of depravity is the distinctness with which *individuality* is recognized. Sin is possible only to a person. Ability to sin is a mark of that high rank in nature denoted by 'personality.' Christianity has respect to a man's separateness. It sees a nature ringed round with barriers that other beings cannot pass, capacities for great and varied wickednesses and excellencies, a world among other worlds, and not a mere wave upon the sea. A human being is in himself an end, and God loves us one by one. Jesus asserted the immense value of the individual. The Shepherd cares for the one lost sheep (Lk 15[4–7]), and has names for all the members of the flock (Jn 10[14]). The Physician, who (it is conceivable) could have healed crowds by some general word, lays His beneficent hands upon each sufferer (Lk 4[40]). Remove from the Gospels and the Acts the stories of private ministrations, and what gaps are made (Jn 1[35ff] 3, 4, Ac 8[26–39] 16 etc.). Taking the individual as the unit, and working from him as a centre, the NT Ethic declines to consider his deeds alone (Mt 6, Ro 2[28f]). Actions are looked at on their inner side (Mt 5[21f. 27f] 6[1, 4, 6, 18] 12[34f] 23[5, 27], Mk 7[2–8, 18–23], Lk 16[15] 18[10–14], Jn 4[23f]). This is a prolongation of ideas present to the best minds prior to the Advent (1 S 16[7], Ps 7[9] 24[3f] 51[17] 139[2f, 23], Jer 17[10] 31[33]).

3. The *social* aspects of experience are not overlooked. Everyone is to bear his own burden (Ro 14[4], Gal 6[5]), and must answer for himself to the Judge of all men (2 Co 5[10]) ; but he is not isolated. Regard for others is imperative ; for an unforgiving temper cannot find forgiveness (Mt 6[14f] 18[23–35]), worship without brotherliness is rejected (Mt 5[23f]), and Christian love is a sign of regeneration (1 Jn 5[1]). The mere absence of malevolent deeds cannot shield one from condemnation ; positive helpfulness is required (Mt 25[41–45], Lk 10[25–37] 16[19–31], Eph 4[28f]). This helpfulness is the new ritualism (He 13[16], Ja 1[27]). The family with its parents, children, and servants (Eph 5[22–6][9], Col 3[18–4][1]) ; the Church with its various orders of character and gifts (Ro 14, 15, Gal 6[1f], 1 Co 13, 14, 15) ; the State with its monarch and magistrates (Mk 12[14–17], Ro 13[1–7], 1 Ti 2[1f]), provide the spheres wherein the servant of Christ is to manifest his devotion to the Most High. 'Obedience, patience, benevolence, purity, humility, alienation from the world and the "flesh," are the chief novel or striking features which the Christian ideal of practice suggests' (Sidgwick), and they involve the conception that Christian Ethics is based on the recognition of sin, of individuality, or social demands, and of the need of heavenly assistance.

4. The Christian *standard* is *the character of the Lord Jesus Christ*, who lived perfectly for God and man. He overcame evil (Mt 4[1–11], Jn 16[33]), completed His life's task (Jn 17[4]), and sinned not (Jn 8[46], 2 Co 5[21], He 4[15], 1 P 2[22], 1 Jn 3[5]). His is the pattern life, inasmuch as it is completely (1) filial, and (2) fraternal. As to (1), we mark the upward look, His readiness to let the heat of His love burst into the flame of praise and prayer, His dutifulness and submissiveness : He lived 'in the bosom of the Father,' and wished to do only that which God desired. As to (2), His pity for men was unbounded, His sacrifice for human good knew no limits. 'Thou shalt love God' ; 'thou shalt love man.' Between these two poles the perfect life revolved. He and His teachings are one. It is because the moral law is alive in Him that He must needs claim lordship over man's thoughts, feelings, actions. He is preached 'as Lord' (2 Co 4[5]), and the homage which neither man (Ac 10[25f]) nor angel (Rev 22[8f]) can receive He deems it proper to accept (Jn 13[13]). Could it be otherwise? The moral law must be supreme, and He is it. Hence alienation from Him has the fatal place which idolatry had under the Old Covenant, and for a similar reason, seeing that idolatry was a renunciation of Him who is the righteous and gracious One. Since Jesus by virtue of His filial and fraternal perfectness is Lord, to stand apart from Him is ruinous (Lk 10[13–16], Jn 3[18] 8[24] 15[22–24] 16[8f], He 2[3] 6[4–8] 10[26]). Wife or child or life itself must not be preferred to the claims of truth and righteousness, and therefore must not

be preferred to Christ, who is truth and righteousness in personal form (Mt 10[37-39], Lk 9[59f] 14[26f]). To call oneself the bond-servant of Jesus Christ (Ro 1[1], Ja 1[1], 2 P 1[1]) was to assert at once the strongest affection for the wise and gracious One, and the utmost loyalty to God's holy will as embodied in His Son. The will of God becomes one's own by affectionate deference to Jesus Christ, to suffer for whom may become a veritable bliss (Mt 5[10-12], Ac 5[41], 2 Co 4[11], Ph 1[29], 1 Th 2[14], He 10[32-34]).

5. Christian Ethics is marked quite as much by *promises of assistance* as by loftiness of standard. The kindliness of God, fully illustrated in the gift and sacrifice of His Son, is a great incentive to holiness. Men come into the sunshine of Divine favour. Heavenly sympathy is with them in their struggles. The virtues to be acquired (Mt 5[1-16], Gal 5[22f], Col 3[12-17], 2 P 1[5ff], Tit 2[12]) and the vices to be shunned (Mk 7[21f], Gal 5[19ff], Col 3[5-9]) are viewed in connexion with the assurance of efficient aid. There is a wonderful love upon which the aspirant may depend (Jn 3[16], Ro 5[7f], 2 Co 5[19f]). The hearty acceptance of that love is faith, ranked as a virtue and as the parent of virtues (2 P 1[5], Ro 5[1f], 1 Co 13, He 11). Faith, hope, love, transfigure and supplement the ancient virtues—temperance, courage, wisdom, justice—while around them grow many gentle excellences not recognized before Christ gave them their true rank; and yet it is not by its wealth of moral teaching so much as by its assurance of ability to resist temptation and to attain spiritual manhood that Christianity has gained pre-eminence. Christ's miracles are illustrations of His gospel of pardon, regeneration, and added faculties (Mt 9[5f]). The life set before man was lived by Jesus, who regenerates men by His Spirit, and takes them into union with Himself (Jn 3[3, 6] 8[36] 15[1-10], Ro 8[2, 9, 29], 1 Co 1[30], 2 Co 5[17], Gal 5[22f], Ph 2[5, 12f], Col 3[1-4], Ja 1[18], 1 P 2[21], 1 Jn 2[6]). The connexion between the Lord and the disciple is permanent (Mt 28[20], Jn 14[3, 19] 17[24], He 2[11-18], 1 Jn 3[1-3]), and hence the aspiration to become sober, righteous, godly (relation to *self*, *man*, and *God*, Tit 2[12-14]) receives ample support. Sanctity is not only within the reach of persons at one time despised as moral incapables (Mk 2[16f], Lk 7[47] 15, 19[8f] 23[42f], 1 Co 6[11], Eph 2[1-7]), but every Christian is supposed to be capable, sooner or later, of the most precious forms of goodness (Mt 5[1-10]), for there is no caste (Col 1[28]). Immortality is promised to the soul, and with it perpetual communion with the Saviour, whose image is to be repeated in every man He saves (Ro 8[37ff], 1 Co 15[49-58], 2 Co 5[8], Ph 3[8-14], 1 Th 4[17], 1 Jn 3[2f], Rev 22[4]).

The objections which have been made to Biblical Ethics cannot be ignored, though the subject can be merely touched in this article. Some passages in the OT have been stigmatized as immoral; some in the NT are said to contain impracticable precepts, and certain important spheres of duty are declared to receive very inadequate treatment.

(i) As to the OT, it is to be observed that we need not feel guilty of disrespect to inspiration when our moral sense is offended; for the Lord Jesus authorizes the belief that the Mosaic legislation was imperfect (Mt 5[21ff] Mk 10[2-9]), and both Jeremiah and Ezekiel comment adversely on doctrines which had been accepted on what seemed to be Divine authority (cf Ex 20[5] with Jer 31[29f] and Ezk 18[2f, 19f]). It is reasonable to admit that if men were to be improved at all there must have been some accommodation to circumstances and states of mind very unlike our own; yet some of the laws are shocking. While such institutions as polygamy and slavery, which could not be at once abolished, were restricted in their range and stripped of some of their worst evils (Ex 21[2ff], Lv 25[42-49], 1 Ch 2[35], Pr 17[2]), there remain many enactments and transactions which must have been always abhorrent to God though His sanction is claimed for them (Ex 22[18-20] 31[14f] 35[2f], Lv 20[27], Nu 15[32-36] 31, Dt 13[5, 16] 17[1-5] 18[20] 21[10-14], 2 S 21[1-9]). Had men always remembered these illustrations of the fact that passions and opinions utterly immoral may seem to be in harmony with God's will, the cruelties inflicted on heretics in the same name of God would not have disgraced the Church's history; and, indeed, these frightful mistakes of OT days may have been recorded to teach us to be cautious lest while doing wrong we imagine that God is served (Jn 16[2]). The limited area of the unworthy teaching would be noticed if care were taken to observe that (1) some of the wicked incidents are barely recorded, (2) some are reprobated in the context, (3) some are evidently left without comment because the historian assumes that they will be immediately condemned by the reader. In regard to the rest, it is certain that the Divine seal has been used contrary to the Divine will. It must be added that the very disapproval of the enormities has been made possible by the book which contains the objectionable passages, and that it is grossly unfair to overlook the high tone manifested generally throughout a great and noble literature, and the justice, mercy, and truth commended by Israel's poets, historians, and prophets, generation after generation.

(ii) As to the NT, it is alleged that, even if the Sermon on the Mount could be obeyed, obedience would be ruinous. This, however, is directly in the teeth of Christ's own comment (Mt 7[24-27]), and is due in part to a supposition that every law is for every man. The disciples, having a special task, might be under special orders, just as the Lord Himself gave up all His wealth (2 Co 8[9]) and carried out literally most of the precepts included in His discourse. The paradoxical forms employed should be a sufficient guard against a bald construction of many of the sayings, and should compel us to meditate upon principles that ought to guide all lives. It is the voice of love that we hear, not the voice of legality. The Christian Ethic is supposed to be careless of social institutions, and Christianity is blamed for not preaching at once against slavery, etc. Probably more harm than good would have resulted from political and economic discourses delivered by men who were ostracized. But it is improbable that the Christian mind was sufficiently instructed to advance any new doctrine for the State. Moreover, the supposition that the world was near its close must have diverted attention from social schemes. The alienation from the world was an alienation from wickedness, not indifference to human pain and sorrow. The poverty of believers, the scorn felt for them by the great, the impossibility of attending public functions without countenancing idolatry, the lack of toleration by the State, all tended to keep the Christian distinct from his fellows. Mob and State and cultured class, by their hatred or contempt, compelled Christianity to move on its own lines. At first it was saved from contamination by various kinds of persecution, and the isolation has proved to be a blessing to mankind; for the new life was able to gather its forces and to acquire knowledge of its own powers and mission. The new ideal was protected by its very unpopularity. Meanwhile there was the attempt to live a life of love to God and man, and to treasure Gospels and Epistles that kept securely for a more promising season many sacred seeds destined to grow into trees bearing many kinds of fruit. The doctrine of the Divine Fatherhood implicitly condemns every social and political wrong, while it begets endeavours directed to the promotion of peace among nations, and to the uplifting of the poor and ignorant and depraved of every land into realms of material, intellectual, and moral blessing. There is no kind of good which is absent from the prayers: 'Thy kingdom come'; 'Thy will be done on earth as it is in heaven.

W. J. He.

ETHIOPIA is a translation of the Hebrew **Cush**, which is derived from *Kôsh*, the Egyptian name of Nubia (beginning at the First Cataract). The cultivable land in this region is very meagre. The scanty and barbarous population of the valley and the deserts on either side was divided in early times among different tribes, which were completely at the mercy of the Egyptians. Individually, however, the Sudanese were sturdy warriors,

and were constantly employed by the Pharaohs as mercenary soldiers and police. In the time of the New Kingdom, Cush, S. to Napata, was a province of Egypt, dotted with Egyptian temples and governed by a viceroy.

With the weakening of the Egyptian power Cush grew into a separate kingdom, with Napata as its capital. Its rulers were perhaps of Egyptian descent; they are represented as being entirely subservient to Amon, *i.e.* to his priests, elected by him, acting only upon his oracles, and ready to abdicate or even to commit suicide at his command. We first hear of a king of Ethiopia about 725 B.C., when a certain Piankhi, reigning at Napata and already in possession of the Egyptian Thebaid, added most of Middle Egypt to his dominions and exacted homage from the princes of the Delta. A little later an Ethiopian dynasty (the 25th) sat on the throne of the Pharaohs for nearly fifty years (715–656 B.C.). The last of these, Tirhakah (q.v.), intrigued with the kinglets of Syria and Phoenicia against the Assyrians, but only to the ruin of himself and his dynasty. Tirhakah and his successor Tanutamon were driven into Ethiopia by the Assyrian invasions, and Egypt became independent under the powerful 26th Dynasty.

For the Persian period it is known that Ethiopia, or part of it, was included in one satrapy with Egypt under Darius. In the 3rd cent. B.C. king Ergamenes freed himself from the power of the priests of Amon by a great slaughter of them. From about this time forward Meroë, the southern residence, was the capital of Ethiopia. The worship of Amon, however, as the national god of 'Negroland,' as Ethiopia was then called, still continued. In 24 B.C. the Romans invaded Ethiopia in answer to an attack on Egypt by queen Candace, and destroyed Napata, but the kingdom continued to be independent. The Egyptian culture of Ethiopia had by that time fallen into a very barbarous state. Inscriptions exist written in a special script known as Meroitic and in the native language, as yet only partially deciphered; others are in a debased form of Egyptian hieroglyphic.

The name of Cush was familiar to the Hebrews through the part that its kings played in Egypt and Syria from 730–664 B.C., and the Aramaic papyri from Elephantine prove that there were Jewish settlements on the Ethiopian border at Syene by the 6th cent. B.C. See also CUSH. F. Ll. G.—R. J. W.

ETHIOPIAN EUNUCH.—Ac 8[26-39] recounts how the deacon Philip met, near Gaza, an Ethiopian eunuch, treasurer to one of the CANDACE rulers of Meroë, who was on his way home from a visit to Jerusalem. Hearing him reading aloud in his carriage from a copy of Isaiah the passage 53[7ff], Philip preached to him the Christian gospel, converted him, and by the wayside baptized him. He may have been a Jew from Meroë, or a proselyte, but he may have been a pagan sent with a gift to the Jerusalem shrine. There would be nothing unusual in such a person studying a Greek scroll of Isaiah. V. 37, though an interpolation, seems to be an early baptismal formula. A. J.

ETHIOPIAN WOMAN.—According to Nu 12[1], when the children of Israel were at Hazeroth, Miriam and Aaron 'spoke against' Moses on account of his marriage with an Ethiopian (RV, RSV 'Cushite') woman. As the 'Ethiopian woman' is mentioned nowhere else, and the death of Moses' wife Zipporah is not recorded, some of the early interpreters thought the two must be identical; and this view is favoured by the Jewish expositors. But it is more likely that a black slave-girl is meant, and that the fault found by Miriam and Aaron was with the indignity of such a union. It may perhaps be inferred from the context that the marriage was of recent occurrence.

ETHIOPIC VERSIONS OF OT.—See GREEK VERSIONS OF OT, 11.

ETH-KAZIN.—A town on the E. frontier of Zebulun, whose site has not been identified, Jos 19[13] (AV **Ittah-kazin**).

ETHMA, 1 Es 9[35] (AV).—See NEBO, 3.

ETHNAN.—A Judahite, 1 Ch 4[7].

ETHNARCH.—Governor of an ethnic unit, usually administered according to its own laws even though surrounded by or subject to, an alien people. Cf the *exilarch* of Babylonian Jewry. In 2 Co 11[32] the term is used of the 'governor' of Damascus serving 'under King Aretas.' Applied to Simon Maccabaeus it denoted wide administrative authority: he is said to have 'consented to fill the office of high-priest, and to be captain and governor'—1 Mac 14[47] (cf 15[1f]; Jos. *Ant.* XIII. vi. 6 [212]). Julius Caesar appointed Hyrcanus II. 'high-priest and ethnarch' (Jos. *Ant.* XIV. viii. 5 [143]), offices which he promised to him and his descendants 'for ever' (Jos. *Ant.* XIV. x. 2 [191 ff]). One who held these combined offices became official spokesman for Jews throughout the Roman Empire. Refusal of the diadem by Pompey to this Hyrcanus (Jos. *Ant.* XX. x. 4 [244]) and later by Augustus to Herod's son Archelaus (Jos. *Ant.* XVII. xi. 4 [317]); *BJ* II. vi. 3 [93]) would seem to have affected only prestige. Archelaus was also given the title 'ethnarch.' But the powers it conferred had to do with taxes and keeping the peace rather than administration of the Judaean Temple state; Josephus informs us that even during the time of Herod and Archelaus certain high-priests had served as 'political governors of the people' (Jos. *Ant.* XX. x. 5 [251]). After the removal of Herod by death and his son by banishment, the powers of the high-priesthood were still further extended: 'The government became an aristocracy, and the high-priests were entrusted with dominion over the nation' (*ibid.*).

In the relations between Caiaphas and Pilate, as earlier between Hyrcanus and Antipas, the ethnarch appears to have outranked the procurator in all matters that did not affect the safety of the state—a fact of no small importance for assessing the true nature of the crime attributed to Jesus. See PROCURATOR. J. S. K.

ETHNI.—An ancestor of Asaph, 1 Ch 6[41]; called **Jeatherai** in v.[21] (AV **Jeaterai**).

EUBULUS.—A leading member of the Christian community at Rome, who sends greeting to Timothy through St. Paul (2 Ti 4[21]). His name is Greek, but nothing further is known of him.

EUCHARIST.—This is the earliest title for the sacrament of the body and blood of Christ. It is found in Ignatius and the *Didache*, and is based upon the *eucharistia* or giving of thanks with which our Lord set apart the bread and wine at the Last Supper as memorials of Himself (Mt 26[27], Lk 22[17, 19], 1 Co 11[24]). The name **Lord's Supper**, though legitimately derived from 1 Co 11[20], is not there applied to the sacrament itself, but to the Love-feast or *Agape*, a meal commemorating the Last Supper, and not yet separated from the Eucharist when St. Paul wrote. The irregularities rebuked by the Apostle (11[21, 29]) are such as could only have accompanied the wider celebration, and doubtless contributed to the speedy separation of the essential rite from the unnecessary accessories. The title **Communion** (q.v.) comes from 1 Co 10[16], where, however, the word is a predicate not used technically (RSV, 'participation'). The breaking of (the) bread (Ac 2[42, 46]) probably refers to the Eucharist (cf 20[7], Lk 24[35]?), but until modern times does not seem to have been adopted as a title.

1. The institution is recorded by each of the Synoptic Gospels, but not by St. John. A fourth account appears in 1 Corinthians.

Mk 14[22-25]

And as they were eating, he took bread, and blessed, and broke it, and gave it to them, and said, 'Take; this is my body.' [23] And he took a cup, and when he had given thanks he gave it to them, and they all drank of it. [24] And he said to

Mt 26[26-29]

Now as they were eating, Jesus took bread, and blessed, and broke it, and gave it to the disciples and said, 'Take, eat; this is my body.' [27] And he took a cup, and when he had given thanks he gave it to them, saying, 'Drink of it,

them, ' This is my blood of the covenant, which is poured out for many. 25 Truly, I say to you, I shall not drink again of the fruit of the vine until that day when I drink it new in the kingdom of God.'

Lk 22[14-20]

And when the hour came, he sat at table, and the apostles with him. 15 And he said to them, ' I have earnestly desired to eat this passover with you before I suffer; 16 for I tell you I shall never eat it again until it is fulfilled in the kingdom of God.' 17 And he took a cup, and when he had given thanks he said, ' Take this, and divide it among yourselves; 18 for I tell you that from now on I shall not drink of the fruit of the vine until the kingdom of God comes.' 19 And he took bread, and when he had given thanks he broke it and gave it to them, saying, ' This is my body [*which is given for you. Do this in remembrance of me.*' 20 *And likewise the cup after supper, saying,* ' *This cup which is poured out for you is the new covenant in my blood.*']

all of you; 28 for this is my blood of the covenant, which is poured out for many for the forgiveness of sins. 29 I tell you I shall not drink again of this fruit of the vine until that day when I drink it new with you in my Father's kingdom.'

1 Cor 11[23-25]

For I received from the Lord what I also delivered to you, that the Lord Jesus on the night when he was betrayed took bread, 24 and when he had given thanks, he broke it, and said, ' This is my body which is broken for you. Do this in remembrance of me.' 25 In the same way also the cup, after supper, saying, ' This cup is the new covenant in my blood. Do this, as often as you drink it, in remembrance of me.'

Lk 22[19b-20], italicized and bracketed above, is omitted by D it (Codex Bezae and some of the Old Latin MSS); the Old Syriac rearranges the text, Syr^{c} reading it in the order 19, 17, 18, Syr^{s} reading 19a+' after the dinner '+17+' This my blood is the new covenant '+18; the Peshitta omits 17–18; Old Latin *b e* reads 19a, 17, 18—all evidently in an effort to harmonize the ' longer ' text with the parallels in Matthew, Mark, and 1 Corinthians (see Westcott and Hort's note). But the grounds for preferring the shorter text are not primarily these later changes, but the improbability that the longer text was written by Luke. *Prima facie*, vv.[19b-20] looks like harmonization, where it now stands in Luke. Equally important is the historical improbability. For it seems scarcely credible that at a supreme moment, like that in which a sacred rite was being established, our Lord should have created the possibility of confusion by solemnly delivering two of the Paschal cups, dividing between them the words which, according to the other Synoptics, belong, as it would seem appropriately, to one. Nor, if He were about to hallow a succeeding cup as Eucharistic, is it likely that He would have spoken of the fulfilment of the Paschal wine in relation to another (v.[17]). In spite, therefore, of the fact that the majority of MSS and Versions favour its inclusion, Westcott and Hort and other modern editors are probably right in regarding the passage inclosed in brackets above as an interpolation. With this omitted, the narrative is assimilated to the other Synoptics. The inversion of bread and cup, which now becomes apparent and which probably belongs not to Luke but to his source, is perhaps due to the fact that the writer, dwelling on the Lord's intention that the Passover should be fulfilled in a Messianic rite, records at the opening of his narrative a declaration similar to that which Matthew and Mark assign to a later stage, the delivery of the cup (Mt 26[29], Mk 14[25]). These words, though referring more particularly to the Eucharistic bread, yet, as extending to the whole meal (' this passover '), require no mention of the action that would accompany them; whereas the companion statement concerning the fruit of the vine (Lk 22[18]) necessitates the mention of the cup (v.[17]). The first half of v.[19] (the consecration of the bread), which, if the account were symmetrical, would appear before v.[15], is then added to complete the institution. A copyist, assuming a part of the narrative to be wanting, would then introduce, probably from a contemporary liturgical formula, the second half of v.[19] and v.[20], which bear a striking resemblance to the Pauline account, of which Luke is otherwise independent. A similar inversion is found in the *Didache* (ch. 9).

2. From the Synoptic record the following inferences may be drawn: (1) *The words of institution cannot themselves determine the meaning of the rite.* Luke (unless v.[20] be genuine) omits ' This is my blood of the covenant.' [Notice also that the other traditional form varies the phrase—' the new covenant in my blood ' (1 Co 11[25])]. This may be due to the fact that Luke introduces the cup primarily in relation to our Lord's utterance concerning the fruit of the vine. But the sentence may be an interpretation of Christ's action, based on its correspondence with the hallowing of the bread. Moreover, the sentence, if original, would have lacked a verb: in Aramaic it would have been simply, ' This my body,' ' This my blood,' without any word corresponding to *is*. Matthew further amplifies by adding the words, ' for the forgiveness of sins ' (Mt 26[28]). It is clear that although formulas were probably already in use, the language was not yet stereotyped. We cannot, therefore, be certain of the precise form of words that our Lord used.

(2) *The rite, like the gospel of which it is an ordinance, is Apostolic.* All of the Twelve, but no others, are present with Jesus (Mk 14[17]‖). Judas had not yet gone out (Lk 22[21]). The significant relation of the Apostles to the congregation of the spiritual Israel, prominent from the first, is not only emphasized by their seclusion with Jesus in this supreme hour, but explicitly stated by Luke (22[24-34]). Although, therefore, there is nothing beyond the form of the record itself to indicate the permanent character of the institution, yet the place which from the first the rite assumed as the bond of Christian fellowship, and for which Christians like Ignatius in the sub-Apostolic age claimed the authority of the Apostles, accords with and interprets the Synoptic narrative. To go behind the Apostolic Eucharist is no more possible for historic Christianity than to separate the actual Christ from the Apostolic witness.

(3) *The origin of the rite.*—As presented in the Synoptic gospels, the Eucharist is Paschal in origin and idea. Yet it is unnecessary to determine whether the Last Supper was in fact a Passover meal, as the Synoptists assume, or anticipated the Jewish feast by one day, as the Fourth Gospel presupposes. Paul does not describe the scene as a Passover, though he may have assumed it. No mention is made of the lamb, in the four narratives, and the identification of Christ's body and blood with the bread and wine, rather than with the lamb, suggests that the lamb was absent. The bread is presumably ordinary *artos*, not the unleavened bread (*azyma*) required at the Passover meal. Moreover, the frequent observance of the Supper in the early Church, rather than once a year, suggests that in its origin the rite had an even broader basis, and must be sought in the ordinary and repeated meals of Jesus and His disciples, including the Feedings of the Multitude (which are narrated in eucharistic language in the gospels), and that only the *Last* Supper took its strongly sacrificial tone from the Passover meal with which it was associated in the early gospel tradition. Many modern scholars find the origin of the rite in the ' Kiddush ' or ' Sanctification ' of the day which was about to begin at sundown—ordinarily the sabbath, but in this case the Passover. In this observance, a group of men would gather in the afternoon to read and study the Bible, exchanging comments on it, and finally concluding with prayers and a simple meal of bread and

wine. Where evidence is so scanty or entirely lacking, no one can affirm positively that this hypothesis is correct; but it meets many of the conditions and solves most of the problems involved in the narratives of the Institution.

3. *St. Paul's account of the Institution* (see above) was written not later than A.D. 58, and is therefore older than the Synoptics. He claims to have received it as part of the inviolable deposit of the gospel (1 Co 11^{23}), which he must hand on unimpaired to those to whom he ministers the word. The phrase 'from the Lord' can hardly imply, as some have maintained, that a direct revelation was given to himself, extending to the form of words; but only that the record is part of that original message of which the Apostles were the guardians rather than the interpreters (1 Co 15^{3}, Gal 1^{6-9}). The form of tradition here produced brings out explicitly the fact that the Eucharist was regarded in the Apostolic Church as an ordinance to be observed in Christian congregations till the Lord's Coming ('as often as you drink,' with comment v.^{26}). St. Paul is the only NT writer who introduces the command, 'Do this in remembrance of me' (v.^{24}), an expression fruitful in controversy. It has been urged that the word rendered 'do' means 'offer,' and that the Eucharist is, therefore, by its terms sacrificial. Not only is this an uncommon use of the Greek, unsuspected by the Greek commentators themselves, but the word 'this' (Greek neuter) which follows can only be 'this action,' not 'this bread,' which would require the masculine form of the Greek pronoun. Clearly, however, the phrase refers to the whole Eucharistic action, not to the particular acts of eating and drinking, the latter of which is differentiated from it in v.^{26}. It is further argued that the word used for 'remembrance' (*anamnēsis*, vv.^{24f}) implies a ritual memorial before God. The word, however, almost invariably used in the LXX with this signification is different (*mnēmosynon*, Lv $2^{2, 9, 16}$ 5^{12}, Nu 5^{26}; *anamnēsis* is found in Lv 24^{7} and Nu 10^{10}). And, though the form of words in which, according to the traditional ritual, the housefather recalled the redemption from Egypt is probably present to the Apostle's mind, it is uncertain whether this recital of Divine deliverance was directed towards God. As now used it would seem to be intended to carry out the injunction of the Law given in Ex 12^{26f} (see the *Haggadah for Passover*). The same uncertainty attaches to St. Paul's explanatory statement—'you proclaim the Lord's death'—though the natural interpretation of the Greek is in favour of the idea suggested by the RV, viz. announcement to men rather than commemoration before God (cf 1 Co 9^{14}). The evidential value, not the mystical significance, of the rite is here asserted.

4. The *sacrificial character* of the Eucharist is implied in the declaration that the bread broken is a communion of the body, the cup of blessing a communion of the blood, of Christ (1 Co 10^{16}). The table of the Lord is contrasted with the table of demons (v.^{21}) through the medium of the sacrificial system of the OT, of which it is a fundamental principle that to eat of the offerings is to have communion with the altar (v.^{18}). The words 'Lord's table' and 'altar' are found as synonyms in Malachi ($1^{7, 12}$). The Levitical code includes many forms of oblation in which feeding on the sacrifice, if it ever existed, has disappeared; but provision is made for it in the case of the peace-offerings (Lv 7^{15-21}). A closer study of the OT brings into greater prominence the connexion between sacrifice (q.v.) and feasting (Ex 32^{6ff}, Dt $12^{5, 12}$ 26^{10f}, 1 S 13^{ff} $16^{2, 11}$). The end of sacrifice in Israel, as among other nations, is the union of the worshipper with the object of worship, through the covering which the priest supplies (W. R. Smith, *RS*^{2} Lect. xi.). This is especially evident in the Passover, which is a sacrifice (Ex 12^{27} 34^{25}, Nu $9^{7, 13}$), and, as including a repast, should rank among the peace-offerings. The Eucharist, therefore, is a sacrifice, not as the commemoration of the death of Christ, but as the means of participation in the Paschal Lamb slain for us (1 Co 5^{7}), in the offering of the body of Christ once made on the Cross (He 10^{10}; cf Jn 19^{36}, 1 Co 10^{17}). The crucifixion of Christ's natural body resulted in the institution of the sacramental body, in respect of which the unworthy partaker is guilty (1 Co 11^{27}, but see below), and through which the faithful have fellowship with Christ in His mystical body (10^{16f}). The transition from one application of the word 'body' to the others—'one bread, one body'—is very subtle, and they are no doubt so vitally connected in the mind of St. Paul as hardly to be capable of exact distinction. But it is unlikely that in a passage where the argument would have been satisfied by the use of one word—'body'—on the analogy of the common pagan identification of the god with the sacrifice, he should have used the longer phrase—'communion of the body'—if he had not felt that the single word would have failed to give the exact meaning. The sense of the whole passage depends upon the reality of the gift conveyed through the feast in which it is symbolically presented. St. Paul holds that there is a real communion in the sacrificial feasts of the heathen, though in this case with demons (v.^{20}), whose presence is incompatible with that of Christ (v.^{21}).

5. The crucial words of the second passage (11^{17-34}) are 'without discerning the body.' 'Lord's' is an interpolation of the TR, which the RV and RSV properly reject (v.^{29}). The RV also brings out the fact that the verb translated 'discern' (v.^{29}) is again used in v.^{31}—'if we judged ourselves truly'—thus showing that the word does not mean 'perceive' but 'discriminate.' 'Body' is left undefined, including, as it apparently does, the mystical body which the unworthy despise in the Church of God, the sacramental elements which they dishonour by profane use, and the sacrifice of Christ with which they reject communion, thereby becoming guilty in respect of each (vv.$^{21f. 26f}$).

6. Both passages express what is implicit in the division of the sacrament into two kinds. It is the body and blood as separated in death through which communion is attained. In 1 Co 10^{16}, by placing the cup first, as in St. Luke's account of the institution, St. Paul emphasizes the sacrificial death of Christ as a necessary element in the Eucharistic feast. The Epistle to the Hebrews shows that access to the Holy Place is gained through the offered body and sprinkled blood (He 10^{19-22}); St. John, that union with Christ is found in that Living Bread which implies death because it is flesh and blood (Jn 6^{52-58}). There is nothing to warrant the inference that the phrase 'flesh and blood' is equivalent to 'personality,' and that therefore 'the whole Christ' is *sacramentally* present in the Eucharistic elements. But it does imply vital union with Him who became dead and is alive for evermore (Rev 1^{18}), a Lamb 'as though it had been slain' (5^{6}), a Priest upon His throne (Zec 6^{13}; cf He 8^{1}), who through the one offering of Himself has perfected for ever (10^{14}) those who come to God through Him.

7. In conclusion, however, it must be frankly admitted that, while one view of the sacrament may seem on the whole to express more fully than others the general tenor of NT teaching on the subject, none of the explanations which have divided Christendom since the 16th cent., not even the theory of transubstantiation when precisely defined, can be regarded as wholly inconsistent with the language of Scripture. See LOVE FEAST.

J. G. S.—F. C. G.

EUERGETES (Prologue to Sirach).—See BENEFACTOR.

EUMENES II.—The king of Pergamum, to whom Rome gave a large slice of the territory of Antiochus III., king of Syria (190 B.C.), including, not 'India' (1 Mac 8^{6-8}), but the greater part of Asia north of the Taurus (Liv. xxxvii. 44). J. T.

EUNATAN, 1 Es 8^{44} (AV).—See ELNATHAN, 3.

EUNICE.—The Jewish mother of Timothy (2 Ti 1^{5}, Ac 16^{1}), married to a Gentile husband, and dwelling at Lystra. She had given her son a careful religious training, but had not circumcised him. A. J. M.

EUNUCH.—In the proper sense of the word a eunuch is an emasculated human being (Dt 23^{1}), but it is not absolutely certain that the Hebrew *sārîs* always has this

signification, and the uncertainty is reflected in our English translation, where **'officer'** and **'chamberlain'** are frequently found. It is interesting to note that the group of scholars who rendered Jeremiah for the AV adhered to 'eunuch' throughout: unhappily the Revisers have spoiled the symmetry by conforming Jer 52^{25} to 2 K 25^{19}. The following reasons, none of which is decisive, have been advanced in favour of some such rendering of *sārîs* as 'officer' or 'chamberlain.' **1.** That Potiphar (Gn 37^{36}) was married. But actual eunuchs were not precluded from this (see Ter. *Eun.* 4, 3, 24; Juv. vi. 366; Sir 20^{4} 30^{20} etc.). It may be that the words in Gn 39^{1} which identify Joseph's first master with the husband of his temptress are an interpolation. **2.** That in 2 K 25^{19} etc. 'eunuchs' hold military commands, whereas they are generally unwarlike (*imbelles*, Juv. *l.c.*). But there have been competent commanders amongst them. **3.** That the strict meaning cannot be insisted on at Gn $40^{2,7}$. Yet even here it is admissible.

The kings of Israel and Judah imitated their powerful neighbours in employing eunuchs (1) as guardians of the harem (2 K 9^{32}, Jer 41^{16}); Est 1^{12} 4^{4} are instances of Persian usage; (2) in military and other important posts (1 S 8^{15}, 1 K 22^{9}, 2 K 8^{6} 23^{11} $24^{12,15}$ 25^{19}, 1 Ch 28^{1}, 2 Ch 18^{8}, Jer 29^{2} 34^{19} 38^{7}; cf Gn 37^{36} $40^{2,7}$, Ac 8^{27}. Dn 1^{3} does not of necessity imply that the captives were made eunuchs). For the services rendered at court by persons of this class and the power which they often acquired, see Jos. *Ant.* xvi. viii. 1 (230). But their acquisitions could not remove the sense of degradation and loss (2 K 20^{18}, Is 39^{7}). Dt 23^{1} excluded them from public worship, partly because self-mutilation was often performed in honour of a heathen deity, and partly because a maimed creature was judged unfit for the service of Yahweh (Lv 21^{20} 22^{24}). The author of Is 56^{4f} insists that holding fast to the ethical demands of the covenant cancels this ban. Eusebius (*HE* vi. 8) relates how Origen misunderstood the figurative language of Mt 19^{12}; Origen's own comment on the passage shows that he afterwards regretted having taken it literally and acted on it. See also ETHIOPIAN EUNUCH.

J. T.—N. H. S.

EUODIA.—This is clearly the correct form of the name, not *Euodias* as AV (Ph 4^{2f}), for a woman is intended. St. Paul beseeches her and **Syntyche** to be reconciled; perhaps they were deaconesses at Philippi.

EUPATOR.—See ANTIOCHUS V.

EUPHRATES, one of the rivers of Eden (Gn 2^{14}), derives its name from the Assyrian *Purattu*, which became *Ufrâtu* in Persian, where the prosthetic vowel was supposed by the Greeks to be the word *eu*, 'good.' In the OT the Euphrates is generally known as 'the river.' It rises in the Armenian mountains from two sources, the northern branch being called the Frat or Kara-su, and the southern and larger branch the Murad-su (the *Arsanias* of ancient geography). The present length of the river is 1780 miles. The salt marshes through which it passed were called *nâr Marratu* (**Merathaim** in Jer 50^{21}), where the Aramaean Chaldaeans lived. The alluvial plain between the Euphrates and the Tigris constituted Babylonia, the water of the annual inundation (which took place in May, and was caused by the melting of the snows in Armenia) being regulated by means of canals and barrages. The Hittite city of Carchemish stood at the point where the Euphrates touched Northern Syria, and commanded one of the chief fords over the river; south of it came the Balikh and Khabur, the last affluents of the Euphrates. The promise made to the Israelites that their territory should extend to 'the great river' (Gn 15^{18} etc.) was fulfilled through the conquests of David (2 S 8^{3} 10^{16-19}, 1 K 4^{24}). A. H. S.—T. F.

EURAQUILO (Ac 27^{14} RV; RSV 'the northeaster').—There is some doubt as to the reading. The Greek MSS which are esteemed to be the best read *Eurakylon*; so do the Bohairic Version, which was made in Egypt in the 6th or 7th cent. from a MS very like these, and the Sahidic Version made in the 3rd cent.; the Vulgate Latin revision, made towards the close of the 4th cent., reads *Euroaquilo*, which points to a Greek original reading *Euroakylon*. Our later authorities, along with the Pesh. and Hark. Syriac, read *Euroclydon* (so AV). No doubt *Eur(o)akylon* is the correct name, and the other is an attempt to get a form capable of derivation. The word is, then, a sailor's word, and expresses an ENE. wind, by compounding two words, a Greek word (*euros*) meaning E. wind, and a Latin word (*aquilo*) meaning NE. wind. This is exactly the kind of wind which frequently arises in Cretan waters at the present day, swooping down from the mountains in strong gusts and squalls. The *euraquilo* which drove St. Paul's ship before it was the cause of the shipwreck. A. So.

EUROCLYDON, Ac 27^{14} (AV) = **Euraquilo** (q.v.).

EUTYCHUS.—A young man who fell down from a third storey window while asleep during St. Paul's sermon at Troas, and was 'taken up dead' (Ac 20^{9}). St. Paul bent over him and, embracing him, declared his life to be in him. It is not actually said that Eutychus was dead, but that seems at least to have been the general belief. The incident is described in parallel terms with the raising of Dorcas and of Jairus' daughter. A. J. M.

EVANGELIST ('one who proclaims good tidings' ['evangel,' 'gospel']).—The word occurs three times in NT (Ac 21^{8} Eph 4^{11}, 2 Ti 4^{5}), and in each case with reference to the proclamation of the *Christian* gospel.

Ac 21^{8} gives what appears to be the primary Christian use of the word. Philip, one of the Seven (cf Ac 6^{1-6}), is there called 'the evangelist,' presumably because after Stephen's martyrdom he left Jerusalem and 'preached the gospel' (literally *evangelized*) in Samaria, in the wilderness, and in all the cities of the coastland between Azotus and Caesarea (Ac $8^{4f.\ 12,\ 35,\ 40}$). In the first place, then, the evangelist was a travelling Christian missionary, one who preached the good news of Christ to those who had never heard it before.

In Eph 4^{11} apostles, prophets, evangelists, pastors, and teachers (or, pastoral teachers) are all named as gifts bestowed on the Church by the ascended Christ. St. Paul in 1 Co 12^{28} and Ro 12^{7f} does not mention 'evangelists.' If Ephesians be sub-Pauline, a later disciple may have thought (because of Philip?) that evangelists should find a place in the list; and yet it seems unlikely that there was any distinctive function or office that could be described as that of an evangelist, even during the 2nd cent. St. Paul himself, while discharging the exceptional functions of the apostolate, was equally an evangelist and teacher. Some have concluded, therefore, that the evangelist as such was not an official but simply one who had a gift for proclaiming the gospel.

That 'evangelist' denotes the function of preaching the gospel and not a special office in a local congregation or in the Church at large may be confirmed by 2 Ti 4^{5} ('do the work of an evangelist'). In his earlier life, Timothy, as St. Paul's travel-companion (Ac 16^{1ff} 19^{22} 20^{4}, Ro 16^{21} etc.), had been an evangelist of the journeying type (cf Epaphras, Col 1^{7} 4^{12}). But in the Pastorals Timothy and Titus are rather the settled pastors and stated teachers, who watch over the morals of the flock and attend to their upbuilding in sound doctrine. It is significant, however, that the author of the letters includes the task of preaching the gospel to the unbelievers in the commission to Timothy as an apostolic delegate; and that the bishop-elders, who must be apt to teach, are not so commissioned. This marks a transition phase in the establishment of the Church at a time when heresy was a real danger within the community of faith. But Christianity never ceased to be a missionary religion.

The special use of 'evangelist' in the sense of an author of a *written* 'Gospel' or narrative of Christ's life, and specifically the author of one of the four canonical Gospels, is much later than the NT, no instance being found till the 3rd cent. J. C. L.—G. J.

EVE (Hebrew *Ḥawwāh*; the name probably denotes

'life'; other proposed explanations are 'life-giving,' 'living,' 'kinship,' and some would connect it with an Arabic word for 'serpent').—**1.** Eve is little more, in Genesis, than a personification of human life which is perpetuated by woman, Gn 3[20] 4[1]. See ADAM. **2.** In the NT Eve is mentioned in 2 Co 11[3], 1 Ti 2[13-15]. The former is a reference to her deception by the serpent. The latter teaches that since 'Adam was formed first, then Eve,' women must live in quiet subordination to their husbands. And a second reason seems to be added, *i.e.* that Adam was 'not deceived,' in the fundamental manner that Eve was, for 'the woman was deceived and became a transgression.' Here St. Paul distinctly takes Eve to be a personification of all women. The personification continues in v.[15], which is obscure, and must be studied in the commentaries.

EVENING.—See TIME.

EVI.—One of the five kings of Midian slain, Nu 31[8], Jos 13[21].

EVIDENTLY.—Ac 10[3] AV 'He saw in a vision evidently about the ninth hour of the day' (RSV 'clearly'); Gal 3[1] 'before whose eyes Jesus Christ hath been evidently set forth' (RSV 'publicly'). Cf *Robinson Crusoe* (Golden Treasury ed. p. 250), 'He saw evidently what Stock of Corn and Rice I had laid up.'

EVIL.—This concept is not easily made precise in Biblical thought, for it is hard to distinguish between what we would call sin on one hand and what we would call disaster on the other. Knowledge of good and evil is a characteristic of judges and governors, 1 K 3[9], and of course of divine beings. This power of distinction was not innate in man but was assumed in disobedience to God and in the aspiration to be more like him; but the power now exists in man (Gn 2–3). One can hardly say the OT explains the origin of evil; but it connects it with the power to distinguish evil. Afterwards, however, evil and violence become characteristic of human life (Gn 6[5, 11f.] 8[21]). Evil in the OT is, however, a more comprehensive term than deliberate moral depravity. A man may be eaten by an evil beast; catastrophe may fall on a city, and this is evil, which God must have done (Am 3[6]); God is indeed creator of evil or woe as well as of welfare, Is 45[7]. There are spirits of evil, who are, however, under God's control (Jg 9[23], 1K 22[22], Job 1–2). The true Israelite, however, is one who turns away from evil and seeks God.

In the Qumrân texts we see the spirit of lies and evil become much more prominent, with the doctrine of the two spirits in man. The spirit of error leads men into all kinds of evil, and this evil has its seat in their flesh. The members of the community are conscious of the assault of evil against them, and of how nearly they have succumbed to it; but they are confident of cleansing from it. There is an epoch of evil now permitted at the end of which evil will be unmasked and purified away.

In the NT the evil spirits are also prominent, causing all kinds of sickness and destruction, and Jesus makes His attack on evil by casting them out and healing the sick. The 'Evil One' is the prince or controller of this world, which lies 'in the Evil One'; he is judged, condemned, and destroyed by Christ (1 Jn 5[19], Jn 16[11]). For deliverance from evil or the Evil One the disciples pray, for evil attacks and tempts them continually. Words, thoughts, desires, the heart of unbelief, the conscience, may all be evil; but the Church should and must be cleansed by the work of Christ. Meanwhile pain and suffering, which in the OT would be included under 'evil,' continue in the fleshly existence of the Church's members, but are turned to good by God and made to show forth His goodness, as did also the evil of the Cross. The full destruction of evil and the evil powers awaits the consummation (Mt 25[41], 2 Th 2, Rev 20). For 'evil eye' see EYE. J. Ba.

EVIL-MERODACH, the *Amel-Marduk* of the Babylonians, son and successor of Nebuchadrezzar on the throne of Babylon (2 K 25[27-30], Jer 52[31-34]), released Jehoiachin in the thirty-seventh year of his captivity. He reigned 561–560 B.C. Berosus describes him as reigning lawlessly and without restraint, and he was put to death by his brother-in-law Neriglissar, who succeeded him.

EVIL-SPEAKING in the Bible covers sins of untruthfulness as well as of malice. It includes abuse, thoughtless talebearing, imputing of bad motives, slander, and deliberate false witness. Warnings against it are frequent; it is forbidden in the legislation of the OT (Ninth Commandment; cf Dt 19[16-19]) and of the NT (Mt 5[22] 12[32] 15[19]). Christians must expect this form of persecution (Mt 5[11]), but must be careful to give no handle to it (Ro 14[16], Ti 2[8], 1 P 2[12] 3[16]). C. W. E.

EVIL SPIRITS.—As a natural synonym for **demons** or devils, this phrase is used in the NT only by St. Luke (7[21] 8[2], Ac 19[12f., 15f.]), and presents no difficulty. But in the OT, especially the historical books, reference is made to an evil spirit as coming from or sent by God; and the context invests this spirit with personality. The treachery of the men of Shechem is so explained (Jg 9[23]), though in this case the spirit may not be personal but merely a temper or purpose of ill-will. Elsewhere there is not the same ground for doubt: 'an evil spirit from the Lord' is the alleged cause of Saul's moodiness (1 S 16[14], where notice the antithetical 'the spirit of the Lord'), and of his raving against David (1 S 18[10] 19[9]). Similarly Micaiah speaks of 'a lying spirit' from God (1 K 22[21-23], 2 Ch 18[20-23]). It has been suggested that in all these cases the reference is to God Himself as exerting power, and effecting good or evil in men according to the character of each. The nearest approach to this is perhaps in Ex 12[13, 23], where Yahweh and the destroyer are apparently identified, though the language admits equally of the view that the destroyer is the agent of Yahweh's will (cf 2 S 24[16]). But the theory is inconsistent with what is known to have been the current demonology of the day (see DEVIL), as well as with the natural suggestion of the phrases. These spirits are not represented as constituting the personal energy of God, but as under His control, which was direct and active according to some of the writers, but only permissive according to others. The fact of God's control is acknowledged by all, and is even a postulate of Scripture; and in using or permitting the activity of these spirits God is assumed or asserted to be punishing people for their sins. In this sense He has 'a company of destroying angels' (Ps 78[49]), who may yet be called 'angels of the Lord' (2 K 19[35], Is 37[36]), as carrying out His purposes. Micaiah evidently considered Zedekiah as used by God in order to entice Ahab to his merited doom. Ezekiel propounds a similar view (14[9]), that a prophet may be deceived by God, and so made the means of his own destruction and of that of his dupes, much as David was moved to number Israel through the anger of the Lord against the people (2 S 24[1]). As the conception of God developed and was purified, the permitted action of some evil spirit is substituted for the Divine activity, whether direct or through the agency of messengers, considered as themselves ethically good but capable of employment on any kind of service. Accordingly the Chronicler represents Satan as the instigator of David (1 Ch 21[1]). Jeremiah denies the inspiration of lying prophets, and makes them entirely responsible for their own words and influence (23[16, 21, 25f.]); they are not used by God, and will be called to account. They speak out of their own heart, and are so far from executing God's justice or anger upon the wicked that He interposes to check them, and to protect men from being misled.

An evil spirit, therefore, wherever the phrase occurs in a personal sense in the earlier historical books of the OT, must be thought of simply as an angel or messenger of God, sent for the punishment of evil (cf 1 S 19[9] RVm). His coming to a man was a sign that God's patience with him was approaching exhaustion, and a prelude of doom. Gradually the phrase was diverted from this use to denote a personal spirit, the 'demon' of the NT (RVm

and RSV), essentially evil and working against God, though powerless to withdraw entirely from His rule.
R. W. M.

EXCELLENCY, EXCELLENT. — These English words are used for a great variety of Hebrew and Greek expressions, a complete list of which will be found in Driver's *Daniel* (Cambridge Bible), pp. 32–34. The words (from Lat. *excello*, 'to rise up out of,' 'surpass') formerly had the meaning of *pre-eminence* and *pre-eminent*, and were thus good equivalents for the Hebrew and Greek expressions. But since 1611 they have become greatly weakened; and, as Driver says, 'it is to be regretted that they have been retained in RV in passages in which the real meaning is something so very different.' The force of 'excellency' may be clearly seen in AVm at Gn 4^{7}, where 'have the excellency' is suggested for 'be accepted' in the text; or the margin at Ec 2^{13}, where instead of 'wisdom excelleth folly' is suggested 'there is an excellency in wisdom more than in folly.' In Dn 1^{20} it is said that 'in all matters of wisdom and understanding, that the king inquired of them, he found them ten times better than all the magicians and astrologers that were in all his realm'; and this is summed up in the heading of the chapter in the words, 'their excellency in wisdom.' The force of Hamilton's *Catechism*, 'Of the pre-eminent and excellent dignitie of the Paternoster'; or from Sir John Mandeville, *Travels*, p. 1, 'the Holy Land, . . . passing all other lands, is the most worthy land, most excellent, and lady and sovereign of all other lands.' RSV occasionally retains the use of the word 'excellent' in the sense of 'surpassing,' 'pre-eminent,' *e.g.* Dn 5$^{12, 14}$ 6^{3}.

EXCHANGER.—See Money-Changer.

EXCOMMUNICATION.—Israel as a covenanted community required penalties for breach of civil or religious law (Gn 12^{14}, Dt 27^{15ff}). In the case of man the ancient Hebrew *ḥērem*, **curse** or **ban**, involved death, in the case of property devotion or destruction (Lv 27^{29}). 'To be cut off from the people' is the Priestly Code phrase (Ezr 10^{8}; cf Ex12^{15} 30^{32f}, Lv 17^{9} 20^{18f}, Ps 109^{13}). Conversely, proselytes and eunuchs faithful to the covenant are assured of acceptance (Is 56$^{3, 5}$). The forms said to be in vogue in Jesus' day were: (1) *nᵉẓiphāh*, a light punishment; (2) *niddûy* and *shammattâ'*, exclusion from fellow-Jews other than immediate family, though not from the cult or synagogue worship. The initial period of thirty days could be extended to ninety; (3) *ḥērem*, which could mean death, the sentence to be executed by the Gentile rulers as in the case of Jesus (Mk 15, Gal 3^{13}), but not Stephen (Ac 7^{58ff}). Power to excommunicate was confined probably to the Sanhedrin, unless for minor synagogal discipline. Among the Essenes excommunication was a dreadful thing bound to lead to apostasy or death (Jos. *BJ* II. viii. 8 [143 f]). At Qumrân penalties ranged from 10 days to 2 years for dishonesty, revenge, slander against a brother, and voluntary withdrawal followed by return. For slander against the *Yaḥadh*, and for betrayal by a member of 10 years' standing the punishment was eternal exile (1 QS 6^{23}–7^{25}, CD 9$^{1, 16ff}$). The horror of the curse hangs over the OT (Mal 4^{6}, Zec 14^{11}). *Anathema*, the LXX equivalent of *ḥērem* (*e.g.* in Dt 7^{26}, Jos 6^{17}, Nu 21^{3}), appears in 1 Co 16^{22} (which refers, as does also Gal 1^{8}, to a permanent exclusion from the Church and doubtless from the Kingdom of God) and in 1 Co 12^{3} (with which cf the twelfth Jewish Benediction against the heretics or apostates, *Berak.* 20b). References in the NT to some form of Jewish procedure are: Lk 6^{22}, Jn 9^{22} 12^{42} 16^{2}.

Christian discipline was founded on Jewish precedents and on such a word of Jesus as Mk 3^{29} (the sin against the Holy Spirit is unpardonable). Peter had authority to interpret, according to Mt 16^{19}. Mt 18$^{15–17}$ (probably not authentic) reflects primitive Jewish Christian practice: private admonition, charges in the presence of two or three witnesses, and finally formal accusation before the Church (cf He 10^{28}, Tit 3^{10}). Efforts to win back the offenders are mandatory (Ja 5^{19f}, 1 Jn 5^{16a}). The curious story of Ananias and his wife (Ac 5^{4ff}) suggests a special position for Peter and a virtual sentence of death rather than mere superstitious fear in the accused.

Remedial principles prevailed in the Pauline churches too. Paul sternly advises that Christian should not prosecute Christian in pagan courts (1 Co 6$^{1–6}$). Reasons for discipline included idleness, disobedience to the Apostle, or rejection of his teaching (2 Th 3$^{6, 14f}$); immorality, greed, idolatry, slander (as at Qumrân), drunkenness, and theft (1 Co 5$^{9–13}$; cf He 13^{4}, Jd 22^{f}, Rev 21$^{4f, 20}$ 22^{15}). Paul's leading opponent at Corinth was dealt with at a meeting of the congregation (RSV 'majority' may represent *rabbîm*, technical in Qumrân literature for the congregation), but details are lacking; presumably he was excommunicated for a limited time. Later the Church was admonished to forgive the offender, as Paul himself had done, 'to keep Satan from gaining the advantage over us' (2 Co 2$^{6–11}$ 7$^{8–13}$), *i.e.* lest the man or the congregation fall prey to 'worldly grief' or even death, and thus be cut off from Christ in his Body. A quite different case is discussed in 1 Co 5$^{1–5}$, that of a Corinthian who 'has' a wife of his father (cf Dt 22^{30} 27^{20}). It is uncertain whether the father was then alive, and also whether the wife was pagan or Christian. So serious, however, was the offence that it demanded, apparently, the death penalty: 'deliver this man to Satan for the destruction of the flesh, that his spirit may be saved in the day of the Lord Jesus,' *i.e.* at the *Parousia* (with 1 Co 5^{13}; cf Dt 13^{5} 17^{7} 22^{24}). The death penalty could be enforced either by terror (1 Co 11^{30}), starvation caused by the excommunication, or by prosecution in a Gentile court since he had become an 'outsider.' This view is challenged by those who interpret 'flesh' even here as meaning man's creaturely, sinful nature.

Excommunication for apostasy appears in He 6$^{4–6}$ 10$^{26–31}$; it is permanent and leads to yet more awful divine judgment. 1 Jn 5^{16b} may refer to this too, or to heresy (cf 2 Jn 10). Diotrephes expelled the Elder's adherents (3 Jn 10), perhaps as presiding presbyter of a local church. (1 Jn 2^{19} implies excommunication of the orthodox in a schism.) 'Delivery to Satan' (1 Ti 1^{20}) recalls 1 Co 5^{5} and certainly means excommunication, but there seems to be no implication of a death sentence. The cause was heresy (2 Ti 2^{17}) or at least departure from the apostolic tradition in its Pauline form. The loss of social and spiritual fellowship was intended to lead, in such cases, to recantation of opinions, as in others to repentance for sin. F. R. M. H.—G. J.

EXILE.—See Israel, I., 22.

EXODUS.—The book tells the story of the leadership of Moses and the exodus from Egypt, of the stay in the wilderness and the erection of the Tabernacle. There are four focal points in the narrative in its present form: (*a*) the revelation of Yahweh by name to Moses (chs. 3 and 6); (*b*) the Exodus and the institution of the Passover in commemoration of it; (*c*) the revelation of Yahweh to the people at Mount Sinai and the covenant then made which found expression ultimately in a code of laws of which three different collections are incorporated in the book [20$^{1–17}$ 21^{1}–23^{19} (this is capable of subdivision into two parts, (i) Judgments, 21^{1}–22^{17}, and (ii) sundry laws relating to worship and festivals, moral and social evils, 22^{18}–23^{19}); 34$^{11–28}$ 35$^{1–3}$ hints at yet a fourth collection which has evidently been lost or placed elsewhere, except for a fragment in the law of the sabbath]; (*d*) the erection of a tabernacle and the manufacture of its equipment.

But the narrative is a composite one and shows many marks of editorial activity in the binding together of its component material. A clear result of an editor's work may be seen in the apparent intrusion of chs. 32–34 between the command to build a tabernacle and the description of its completion. We may note also the broken sequence between 10^{29} and 11^{8b}, and the awkward transition from 19^{25} to 20^{1}. In the main it is the product

of the fusion of three separate accounts, although the limits assigned to each, in particular those designated J and E, cannot be delineated with any great certainty.

1. The narrative of P, which can be most surely distinguished, is given first.

Beginning with a list of the sons of Israel (1[1-5]), it briefly relates the oppression (1[7, 13f] 2[23b-25]), and describes the call of Moses, which takes place in Egypt, the revelation of the name *Yahweh*, and the appointment of Aaron (6[2]–7[13]). The plagues (7[19, 20a, 21b, 22] 8[5-7, 15b-19] 9[8-12] 11[9f]), which are wrought by Aaron, form a trial of strength with Pharaoh's magicians. The last plague introduces directions for the Passover, the feast of unleavened bread, the sanctification of the firstborn, and the annual Passover (12[1-20, 28, 40-51] 13[1f]). Emphasis is laid, not on the blood-sprinkling, but on the eating, which was the perpetual feature.

The route to the Red Sea (which gives occasion to a statement about the length of the sojourn, 12[40f]) is represented as deliberately chosen in order that Israel and Egypt may witness Yahweh's power over Pharaoh (12[37] 13[20] 14[1-4]). When Moses stretches out his hand, the waters are miraculously divided and restored (14[8f, 15a, 16b-18, 21ac, 22f, 26, 27a, 28a] 15[19]).

Between the Red Sea and Sinai the names of some halting-places are given (16[1-3] 17[1a] 19[2a]). Ch. 16 is also largely (vv.[6-13a, 16-24, 31-36]) from P. But the mention of the Testimony, *i.e.* the divine charge contained in the Ten Words, shows that the story belongs to a later date than Sinai at which, according to tradition, the Ten Words were revealed.

On the arrival at Sinai, Yahweh's glory appears in a fiery cloud on the mountain. As no priests have been consecrated, and the people must not draw near, Moses ascends alone to receive the tables of the testimony (24[15b-18a]) written by Yahweh on both sides. He remains (probably for 40 days) to receive plans for a sanctuary, with Yahweh's promise to meet with Israel (in the Tent of Meeting) and to dwell with Israel (in the Tabernacle) (25[1]–31[18a] 32[15]). He returns (34[29-35]), deposits the testimony in an Ark he has caused to be prepared, and constructs the Tabernacle (35–40). The differing order in the plans as ordered and as executed, and the condition of the text in the LXX, prove that these sections underwent alterations before reaching their present form.

This account was evidently written to provide the background for the annual celebration of the Passover and to demonstrate the antiquity of the institution of the Sanctuary and its appurtenances.

2. The narrative of JE.—The rest of the book is substantially from JE (with an occasional inclusion of material from older traditions such as 4[24-26] 24[1f, 9-11], which seem to belong to neither J nor E), but it is extremely difficult to distinguish J from E. For (1) with the revelation of the name of Yahweh, one of our criteria, the avoidance of this name by E disappears; (2) special care has been taken to weld the accounts of the law-giving together, and it is often difficult to decide how much is the work of the editor. We give the broad lines of the separation, but remark that in certain passages this must remain tentative.

A. *Israel in Egypt.*

According to J, the people are cattle-owners, living apart in Goshen, where they increase so rapidly as to alarm Pharaoh (1[6, 8-12]). Moses, after receiving his revelation and commission in Midian (2[11-22] 3[2-4a, 5, 7f, 16-20] 4[1-16, 19, 20a, 24-26a, 29-31]) demands from Pharaoh liberty to depart three days' journey to sacrifice (5[3, 5-23]). The specification of time suggests that a definite place was in mind, which might well have been Kadesh. On Pharaoh's refusal the plagues, which are natural calamities brought by Yahweh, and which are limited to Egypt, follow Moses' repeated announcement (7[14, 16, 17a, 18, 21a, 24f] 8[1-4, 8-15a, 20–97, 13-35] 10[1-11, 13b, 14b, 15a, 15c-19, 24-26, 28f] 11[4-8]). In connexion with the Passover (12[21-27]), blood-sprinkling, not eating, is insisted on. The escape is hurried (29-34, 37-39), and so a historical meaning is attached to the use of unleavened bread (13[3-16] [based on J]).

According to E, the people live among the Egyptians as royal pensioners and without cattle. Their numbers are so small that two midwives suffice for them (1[15-20a, 21f]). Moses (2[1-10]), whose father-in-law is Jethro (3[1]), receives his revelation (3[6, 9b-15, 21f]) and commission (4[17f, 20-23, 27f]) on Horeb. Obeying, he demands that Israel be freed (5[1f, 4]) in order to worship their God on this mountain—a greater distance than three days' journey. E's account of the plagues has survived merely in fragments, but from these it would appear that Moses speaks only once to Pharaoh, and that the plagues follow his mere gesture, while the miraculous element is heightened (7[15, 17b, 20b, 23] 9[22-25] 10[12, 13a, 14a, 15b, 20-23, 27]). The Israelites, however, have no immunity except from the darkness. The Exodus is deliberate, since the people have time to borrow from their neighbours (11[1-3] 12[35f]).

B. *The Exodus.*

According to J, an unarmed host is guided by the pillar of fire and cloud (13[21f]). Pharaoh pursues to recover his slaves (14[5f]), and when the people are dismayed, Moses encourages them (14[10-14, 19b, 20b]). An east wind drives back the water, so that the Israelites are able to cross during the night (14[21b, 24, 25b, 27b, 28f, 30f]), but the water returns to overwhelm the Egyptians. Israel offers thanks in a hymn of praise (15[1]); but soon in the wilderness tempts Yahweh by murmuring for water (vv.[22-25a, 27] 17[3, 2b, 7]).

According to E, an armed body march out in so leisurely a fashion that they are able to bring Joseph's bones. For fear of the Philistines they avoid the route of the isthmus (13[17-19]). Pharaoh pursues (14[9a, 10b]), but the people, protected by an angel, cross when Moses lifts his rod (vv.[15b, 16a, 19a, 20a, 25a, 29]). The women celebrate the escape (15[2-18, 20f]); and in the wilderness Yahweh tests Israel, whether they can live on a daily provision from Him (16[4, 15a, 19a, 16a, 19b-21, 35a]). Water, for which they murmur, is brought by Moses striking the rock with his rod (17[1b, 2a, 4-6, 7b]). Jethro visits and advises Moses (ch. 18 [in the main from E]). The condition of the account of the journey between the Red Sea and Sinai, and the fact that events of a later date have certainly come into P's account, make it likely that JE had very little on this stage, the account of which was amplified with material from the wilderness journey after Sinai.

C. *At Sinai* [here the accounts are exceptionally difficult to disentangle, and the results correspondingly tentative].

According to J, Yahweh descends on Sinai in fire (19[2b, 18]), and commands the people to remain afar off, while the consecrated priests approach (vv.[11b, 12, 20-22, 24f]). Aaron, Nadab, Abihu, and seventy elders ascend (24[1f]) and celebrate a covenant feast (vv.[9-11]). This is probably an older tradition of communion with God which has been incorporated here so as to include representatives of the people in the ratification of the covenant. Moses then goes up alone and stays forty days and forty nights during which he writes the words of the covenant, the ten commandments, on the tables of stone. This probably here refers to the so-called ritual decalogue found embedded in ch. 34. It is a traditional code appropriated by J but of unknown origin.

This code is the outcome of the earliest effort to embody the essential observances of the Yahweh religion. The feasts are agricultural festivals without the historical significance given them in Deuteronomy, and the observances are of a ceremonial character, for, according to J, it is the priests who are summoned to Sinai. Efforts have been frequently made (since Goethe suggested it) to prove that this is J's decalogue—a ceremonial decalogue. Any division into ten laws, however, has always an artificial character.

According to E, Yahweh descends in a cloud before the whole people (19[3-11a]), whom Moses therefore

sanctifies (vv.14-17). They hear Yahweh utter the Decalogue (v.19 20$^{1-17}$), but, as they are afraid (20$^{18-21}$), the further revelation with its covenant is delivered to Moses alone (20^{22}–23^{33} in part). The people, however, assent to its terms (24$^{3-8}$). Moses ascends the Mount with Joshua to receive the stone tables, on which Yahweh has inscribed the Decalogue (24^{12-15a}), and remains forty days (v.18b) to receive further commands. He returns with the tables (31^{18b}), to discover and deal with the outbreak of idolatry (32$^{1-6, 16-24}$). On his intercession he receives a promise of angelic guidance (vv.30–35). The account in Dt 10^{1ff} of the events which followed Moses' intercession has given rise to the conjecture that Ex 33 originally had some reference to the making of the Ark and the Tent of Meeting and that the stripping off of ornaments (33$^{4, 6}$) was for the purpose of adorning them.

E's account thus contains three of the four collections of laws found in Exodus, for 21–23 consists of two codes, a civil (21^{1}–22^{17}) and a ceremonial (22^{18}–23^{33} [roughly]). Probably the ceremonial section was originally E's counterpart to ch. 34 in J, while the civil section may have stood in connexion with ch. 18. As it now stands, E is the prophetic version of the law-giving. The basis of the Yahweh religion is the Decalogue with its clearly marked moral and spiritual character. (Cf article DEUTERONOMY.) This is delivered not to the priests (like ch. 34 in J), but to the whole people. When, however, the people shrink back, Moses, the prophetic intermediary, receives the further law from Yahweh. Yet the ceremonial and civil codes have a secondary place, and are parallel. The Decalogue, a common possession of the whole nation, with its appeal to the people's moral and religious sense, is fundamental. On it all the national institutions, whether civil or ceremonial, are based. Civil and ceremonial law have equal authority and equal value. As yet, however, the principles which inform the Decalogue are not brought into conscious connexion with the codes which control and guide the national life. The Book of Deuteronomy proves how at a later date the effort was made to penetrate the entire legislation with the spirit of the Decalogue, and to make this a means by which the national life was guided by the national faith. A. C. W.—L. H. B.

EXORCISM.—The word may be defined as denoting the action of expelling an evil spirit by the performance of certain rites, including almost always the invocation of a reputedly holy name. An anticipation of the later methods occurs in David's attempt to expel Saul's melancholia by means of music (1 S 16$^{16, 23}$); and in the perception of the benefit of music may possibly be found the origin of the incantations that became a marked feature of the process. A more complicated method is prescribed by the angel Raphael (To 6^{16f} 8^{2}). In NT times the art had developed; professional exorcists had become numerous (Ac 19$^{13, 19}$), whilst other persons were adepts, and practised as occasion needed (Mt 12^{27}, Lk 11^{19}). An old division of the Babylonian religious literature (cf *Cuneif. Texts from Tablets in Brit. Mus.*, pts. xvi, xvii) contains many specimens of incantations; and the connexion of the Jews with that country, especially during the Exile, is an obvious explanation of the great extension both of the conception of the influence of demons and of the means adopted for their treatment. Exorcism was a recognized occupation and need in the Jewish life of the 1st cent., as it became afterwards in certain sections of the Christian Church.

In the procedure and formulae of exorcism, differences are traceable in the practice of the Jews, of Christ, and of His disciples. An illustration of the Jewish method may be found in Josephus (*Ant.* VIII. ii. 5 [45]), who claims Solomon for its author, and describes a case that he had himself witnessed. Other instances occur in the papyri (*e.g.* Dieterich, *Abraxas*, 138 ff), and in the Talmud (*e.g. Berakhoth*, 51*a*; *Pesachim*, 112*b*). The vital part of the procedure was the invocation of a name (or a series of names) of a deity or an angel, at the mention of which the evil spirit was supposed to recognize the presence of a superior power and to decline a combat, as though a spell had been put upon him. Christ, on the other hand, uses no spell, but in virtue of His own authority bids the evil spirits retire, and they render His slightest word unquestioning obedience. Sometimes He describes Himself as acting 'by the finger of God' (Lk 11^{20}) or 'by the Spirit of God' (Mt 12^{28}), and sometimes His will is indicated even without speech (Lk 13$^{13, 16}$); but the general method is a stern or peremptory command (Mt 8^{16}, Mk 1^{25} 9^{25}, Lk 8^{29}). He does not require any previous preparation on the part of the sufferer, though occasionally (Mt 9^{23f}) He uses the incident to excite faith on the part of the relatives. His own personality, His mere presence on the scene, are enough to alarm the evil spirits and to put an end to their mischief. In the case of His disciples, the power to exorcise was given both before and after the resurrection (Mt 10$^{1, 8}$, Mk 3^{15} 16^{17}, Lk 9^{1}), and was successfully exercised by them (Mk 6^{13}, Lk 10^{17}, Ac 5^{16} 8^{7} 19^{12}); but the authority was derived, and on that ground, if not by explicit command (cf 'In my name,' Mk 16^{17}), the invocation of the name of Jesus was probably substituted for His direct command. That was clearly the course adopted by St. Paul (Ac 16^{18} 19$^{13-16}$), as by St. Peter and the Apostles generally in other miracles (Ac 3^{6} 4^{10}, Ja 5^{14}). The name of Jesus was not recited as a spell, but appealed to as the source of all spiritual power, as not only the badge of discipleship but the name of the ever-present Lord of spirits and Saviour of men (Mt 28^{19f}, Jn 14^{13}). R. W. M.

EXPECT.—'From henceforth expecting' (He 10^{13}) becomes 'then to wait' in RSV. In the Douai Version the comment on Sir 11^{8} is: 'Expect the end of another man's speech before you begin to answer. Expect also if anie that is elder, or better able, will answer first.'

EXPERIENCE.—This word, which plays so large a part in modern philosophy and religion, occurs four times (including 'experiment') in AV. Of these instances only one survived in RV, viz., Ec 1^{16}, where 'hath had great experience of'='hath seen much of (wisdom),' etc. In Gn 30^{27} 'I have learnt by experience' (='experiment') becomes 'I have divined,' the Hebrew verb being the same as in Gn 44$^{5, 15}$, Dt 18^{10}. RSV uses the word five times, twice in OT (Jg 3^{1}, Ec 1^{16}), thrice in NT (2 Co 1^{6}, Gal 3^{4}, 1 P 5^{9}). The verb 'experienced' occurs four times. In Ro 5^{4} (RV 'probation') 'experience,' and in 2 Co 9^{13} (RV 'proving') 'experiment,' was the AV rendering of a Greek word borrowed from the assaying of metal, which signified the *testing*, or *test*, of personal worth; the same noun appears in AV as 'trial' (RV 'proof') in 2 Co 2^{9} 8^{2}, and 'proof' in 2 Co 13^{3} and Ph 2^{22}. 'Christian experience,' in modern phraseology, covers what is spoken of in Scripture as the knowledge of God, of Christ, etc., and as 'the seal' or 'witness (testimony) of the Holy Spirit,' of our conscience,' etc., or as peace, assurance, salvation, and the like. Cf next article. G. G. F.—F. C. G.

EXPERIMENT.—In 2 Co 9^{13} AV 'experiment' means *proof*: 'by the experiment of this ministration they glorify God.' Prefer RSV, 'under the test of this service.' It is proof arising out of experience, as in Hall, *Works*, iii. 467: 'We have known, indeed, some holy souls, which out of the general precepts of piety, and their own happy experiments of God's mercy, have, through the grace of God, grown to a great measure of perfection this way; which yet might have been much expedited and compleated, by those helps which the greater illumination and experience of others might have afforded them.' Cf preceding article.

EXPIATION.—1. Plan and Terminology.—The word 'expiation' appears in the RSV in certain important NT passages (Ro 3^{25}, 1 Jn 2^{2} 4^{10}) where AV had 'propitiation.' 'Expiation' seems better here, since it implies an action directed towards the removal of sin, while 'propitiation' suggests primarily the appeasement of an offended God (see PROPITIATION). The Greek words here translated have their background however in

a Hebrew expression which is sometimes translated by RSV 'expiate' (*e.g.* 1 S 3[14]) or 'make expiation' (Dt 32[43]) but more commonly 'make atonement' as in AV (Lv 1[4] and frequently). Since the terms 'expiation' and 'atonement' go back to the same Hebrew terms and are not readily distinguishable, it seems best to deal with them together here. The scope of this article therefore will be the technical vocabulary for the removal of sin, including 'expiation' and 'atonement' as used in the RSV, along with other relevant terms. This material is not repeated in the article ATONEMENT, which deals with the more general and theological understanding of the problem.

2. The Expiatory Offerings.—Within the Levitical sacrificial system we find two offerings which have a special relation to the removal of sin and may be called 'expiatory' in a peculiar sense. These are the *ḥaṭṭā'th*, or 'sin offering,' and the *'āshām*, or guilt offering (AV 'trespass offering'). The basic codes for these offerings may be found in Lv 4[1–6:7] 6[24–7:7], and the two have a number of points of ritual in common in which they differ from other offerings (for details, see SACRIFICE AND OFFERING).

We further have to determine what was the extent of the sins expiated by these offerings. For the sin offering it is explicitly stated that it applies to sins committed 'in error' (RSV 'unwittingly') (Lv 4[2]) and that he who sins 'with a high hand' is cut off from the community (Nu 15[30]), and his iniquity is upon him, *i.e.* it is unexpiated and remains a burden upon him. It is clear that the sins expiated by the sin offering would in most cases be ritual and ceremonial offences rather than what we would call moral faults. It should be remembered, on the other hand, that the distinction of moral and ritual offences is foreign to the Levitical legislation; to regard the latter as insignificant compared to the former is to use a modern standard. It is also important that 'error' in this context hardly means simply 'accident,' a concept hardly known to the ancient Hebrews, but may go as far as the blind superhuman drive or 'infatuation'; for the same word is used for the infatuation of the lover, the uncontrolled words and deeds of the drunkard, of Saul's fanatical pursuit of David (1 S 26[21]). (Cf the interesting remarks of Quell, *ThWB* i, 274–5.)

Along with the sin offering we may usefully mention the use of the verb 'to sin' in its intensive form with a privative sense which we can perhaps render as 'to unsin' hence 'cleanse, purify.' It is used for one who has been defiled by contact with a corpse, Nu 19[19], and for the purifying of the altar with the blood of a sin offering, Lv 8[15]. The related noun, the same as used of a sin offering, is found for an expiatory or purificatory object or ritual which is not however an altar sacrifice like the sin offering. Such is the cleansing after contact with a corpse, Nu 19[19], or the ritual of the red cow by which is produced a water 'for the removal of sin,' Nu 19[1–10].

The guilt offering or *'āshām*, on the other hand, is prescribed in the Levitical system for cases involving restitution, *e.g.* when a man finds something lost and keeps it, refuses to return a deposit, or swears falsely in property questions (Lv 6[1–7] EV). In these cases restitution is made (with an addition of one fifth as compensation), and the restitution is accompanied by the guilt offering to Yahweh. We note also from a much earlier time the guilt offering of the Philistines when they make restitution of the Ark to Israel, in this case a gift of restitution rather than a sacrifice (1 S 6[1–9]). The occasion of the sacrifice may then reasonably be held to be restoration or reintegration to normality of life after an offence. In this case the offences are mostly what we would call moral offences, but the distinguishing of the moral nature of the offence is no more the point here than in the sin offering. The interpretation of the sacrifice as one of reintegration fits with such passages as Ezr 10[19] (for priests after putting away foreign wives), Nu 6[12] (for the Nazirite as he resumes his period of consecration after its interruption by contact with the dead), Lv 14 (restoration of the leper). In Lv 19[20–22] the offering is explicitly connected with cleansing or forgiveness of 'the sin which he has committed' (intercourse with a slave woman); such a formula is recurrent in Lv 4–5. In Lv 5[17–19] the guilt offering is related like the sin offering to unconscious sins.

We may conclude then that, with due reservation concerning the conception of 'sin' involved, which differs so much from our modern conception, the sacrificial system in its developed form contained a category of specially expiatory offerings, the sin and guilt offerings. On certain solemn occasions we have a combination of the expiatory with other categories of sacrifice, and then the expiatory type normally appears first, *e.g.* the order expiatory offering—burnt offering—peace offering in Lv 9.

3. The phrase 'to make expiation.'—The word intended here is the Hebrew *kippēr*, commonly translated 'to make expiation' or 'to make atonement' (see above, **1**). For a case where it is used of appeasement of one man by another, see PROPITIATION.

The derivation of this word has been much in dispute, and its original sense has been given as either 'cover' or 'wipe.' The sense 'wipe' is adopted here as the more probable, especially since it may well have meant both 'wipe on' and 'wipe off,' and the first of these could perhaps satisfy the cases where 'cover' is suggested. In any case it is doubtful if the original etymology can do much to determine the exact sense in Israelite usage, where in the overwhelming majority of cases it is a technical sacrificial term meaning 'to expiate.' It is followed by a preposition indicating the person or object or sin for which expiation is made, or by the direct object, or without any complement. The fact that the object of this verb, or the content of the prepositional phrase following it, is never God, seems decisive against the interpretation of it as propitiation or appeasement of God rather than expiation, although it is likely that the sense of appeasement has been more important in the earlier history of the word. In one early case, 2 S 21[3–4], expiation by money payment seems to be thought of, and in Ex 32[30] it is not clear by what means Moses hoped he might 'perhaps make expiation'—in these two passages the technical sacrificial sense is not yet quite dominant.

We have already mentioned the connexion of the expiatory sacrifices with forgiveness, and it is in fact in the codes for this group that a phrase with *kippēr* ('and he shall make expiation' or the like) is linked with forgiveness (Lv 4[20] etc.). This conjunction of expiation and forgiveness is not found in the codes for sacrifices of other types.

The great importance of the phrase 'to make expiation,' however, is that in the present form of the Levitical system it has been extended far beyond the specifically expiatory offerings to a large number of other rituals and actions. Typical examples are: 1. Burnt offerings, Lv 1[4], with the phrase 'it shall be accepted for him to make expiation for him.' 2. The ritual for cleansing a 'leprous' house with two birds, Lv 14[53]. 3. Such events in narrative as the incense offered by Aaron in the plague (Nu 16[46]), the execution of evildoers by Phinehas (Nu 25[13]), the presentation of the Midianite booty (Nu 31[50]). 4. Murder is expiated only by the blood of the murderer, Nu 35[33]. 5. The half-shekel tax or 'atonement money' of Ex 30[11–16] should perhaps be reckoned with 'ransom' rather than with expiation, and this might apply to the case of the Midianite booty as well. 6. All sacrificial blood is regarded as expiatory upon the altar, Lv 17[11]. This is of primary importance, and although He 9[22] accurately notes that almost all purification in the OT is by blood, and not absolutely all, it is equally right in seeing the central expiatory virtue in rituals which include the shedding of blood. This is not to say that all sacrificial killing is itself expiatory in purpose; but the life is in the blood, and the casting of the blood on the altar seems to be the returning of the life to its creator with expiatory effect. A distinguishing

feature of the sin offering is the more elaborate blood ritual, including its application to the horns of the altar.

It will be noticed that in a number of the cases of 'expiate' in narrative contexts (Nu 16^{46} 25^{9-11}, Ex 30^{12}), mention is made of the impending anger of God or of the plague as its manifestation. It has seemed best, for reasons given at the beginning of this article, not to translate *kippēr* as 'propitiate,' since God never appears as object of this verb. But in a more general sense it is clear that there is an apotropaic sense in the cases mentioned, an awareness that the anger of God follows closely on the offence done and will not be turned away unless proper expiation is made. In such cases it may be that no absolute distinction can be made between expiation and propitiation as the general purpose of the action as a whole.

No full treatment will be given here of the great day of expiation on 10th Tishri (Lv 16; see ATONEMENT, DAY OF). Its importance was that it was the time of expiation and purification for the sanctuary and the priestly house, themselves the centres of expiation and purity for nation and individual. Even the most holy could not be left without expiation. A heavy emphasis is laid on the sin offerings and their complicated blood ritual, in this case including the taking of the blood not only to the altar but into the most holy place itself. The sending out of the so-called scapegoat is not, curiously enough, described as expiation or atonement, and indeed takes place after the high priest has finished the task of expiation for the sanctuary (Lv 16^{20}); but it is beyond doubt that it is a ritual for the removal of sin, and represents a culmination of the day's ceremonies, after which the burnt offerings can follow.

4. Other OT material.—Mention should here be made of the golden slab which was laid on top of the Ark in the Priestly accounts, and which was called *kappōreth*, from the same root as the word to expiate. The customary English translation is 'mercy-seat.' Its name may be taken from its place in the Day of Atonement ritual (Lv 16^{13f}), and it was at any rate so understood by the LXX, which translated it *hilastērion*, 'place of expiation,' from the verb *hilaskesthai*, with which it translated *kippēr*. Its importance includes its value for the interpretation of Ro 3^{25} where the word occurs again used of Jesus Christ.

Another word related to Hebrew *kippēr* is *kōpher*, 'price' with the sense of either 'ransom' or 'bribe.' This seems to have no close connexion in the OT with the terminology of expiation, although a certain degree of propinquity may be seen in the cases of the half-shekel and the Midianite booty mentioned above. No sacrificial act is called a 'ransom.' But in Job 33^{24} the ransom has the effect of averting Divine anger and catastrophe such as we have seen in some cases of expiation. In the NT the image of the 'ransom' reappears in description of the work of Christ (Mk 10^{45}).

The term *'āshām*, guilt offering, reappears in one quite isolated but very important passage, the Servant Song of Is 53 (in v.^{10}). The Servant makes himself, or may be made, a guilt offering (the text presents some difficulties). It is not easy to see precisely what is meant, especially since the term probably did not always carry the precise sense of the Levitical code. But the interpretation is helped by the mention of 'sin-bearing' in vv.^{11f}, and most probably it is meant that the suffering of the Servant is a vicarious expiation.

5. Christ as expiation.—In Ro 3^{25} Christ is described as the one whom God put forward or displayed as a *hilastērion* in His blood. The reference could be to the 'mercy-seat' or cover of the Ark, which is represented by this word in the LXX; or it could be in a more general way the 'place of propitiation,' which is the way LXX interprets the ledge of the altar, in Ezk $43^{14, 17}$. But since Paul does not seem to be discussing the technicalities of sacrificial methods here, it is more likely that the word means generally 'of expiatory virtue, expiation.' Christ, then, is the expiation set forth by God, and as in most expiation the blood is of central importance.

In 1 Jn 2^{2} 4^{10} Christ is called the *hilasmos* for our sins. This is from the same root and again probably means 'expiation,' although it would be possible to relate it more precisely to one of the expiatory offerings (sin or guilt offering) for which it is sporadically used in the LXX. Again the general sense seems more probable, and all these three NT passages may then be regarded as reflecting the sense of Hebrew *kippēr*. It would be over-precision to say that the altar or place of expiation, or the sacrificial animal, or any particular expiatory ritual, is specially meant. The act of expiation, in which all these are involved, and the centre of expiation, are in Christ. The scope of the expiation is in the Johannine passages explicitly stated as 'our sins' and 1 Jn 2^{2} adds 'not for our sins only, but also for the whole world.' The expiation is not a limited one for a certain area only. In none of these passages is it clear that the expiatory work is related to any single act or time in the mission of Jesus, except that the mention of blood in Ro 3^{25} will refer especially to the death of Christ; but if the tense of the verb in the Johannine passages may be pressed so far, it would seem that Christ 'is' and not only 'has been' an expiation for us. The continual availability of expiation through Christ seems to be indicated by the connexion of 1 Jn 2^{1-2}.

Some remarks may now be made about the 'guilt offering' of the Servant in Is 53. The LXX translated as 'for sin,' along with other changes in the structure of the sentence (the Isaiah LXX often misrepresented the text badly). 'For sin' is a common LXX rendering for the sin offering, and thus in Is 53 as in a number of places the distinction of sin and guilt offerings was not preserved precisely by LXX. The phraseology 'for sin' or 'for sins' in the sense of 'the sin offering' occurs in LXX quotations in the NT (*e.g.* He 10^{6}) and may have some effect on the more general phraseology of expiation or atonement 'for sin' (preposition *peri*), *e.g.* 1 P 3^{18}; but it seems excessively precise to translate these 'as a sin offering.'

The most thorough development of the theme of expiation in the NT is the letter to the Hebrews, where a comparison is made between the Levitical expiation which had to be repeated and the final and perfect expiation made by Christ. The centre of interest is the Day of Atonement and the entry of the High Priest into the most holy place. Christ is the High Priest, who is to make expiation for the sins of the people, He 2^{17}. The task of priesthood is understood as essentially expiatory, 5^{1}, and the existence in ancient Israel of sacrifices which were not predominantly expiatory in purpose, if at all, is overlooked or left aside for the present purpose. Blood is the centre of expiation, and occupies more attention than the killing of the victim. This is because the centre of attention is the entry of the High Priest to the holiest place with blood. Christ the priest goes in not with the blood of animals but with His own blood. The emphasis on the finality of the expiation by Christ carries with it a certain depreciation of the OT sacrifices on the grounds that their repeatedness indicates their impotence and that animal blood cannot make real expiation. The OT system does not lead to a finality where the consciousness of sins would remain no more, but rather brings sin to mind, 10^{2-3}. The OT expiation, like the OT worship as a whole, is a shadow of what is to come, 10^{1}. In 13^{11-14}, in a rather different connexion, mention is made of the victims of that class of sin offerings from which the blood was taken into the holiest place. These victims were not burned on the altar (except for certain parts) but were taken outside of the camp (Lv 4); so Christ suffered outside the city, and His followers must be ready to go outside with Him.

In 2 Co 5^{21}, 'he made him to be sin who knew no sin,' it is also possible to interpret as 'He made Him a sin offering on our behalf,' on the basis of passages like Lv 4^{24} LXX, where *hamartia* 'sin' is in fact the sin offering. This however is not certain. But in any case

it is hardly in doubt that the content of the verse intends the expiation of sin.

This may suffice as a study of the terminology of expiation proper in the NT. Expiation is a real and essential element in the NT's understanding of the work of Christ, and is based on the OT sacrificial expiatory system. As so often in the NT, however, the lines of connexion with one section of the OT background are linked and crossed by lines from other aspects of that background, so that the full place which expiation takes in the work of Christ can be seen only when the field of study is made wider. For a study of these more general contexts of the removal of sin in the NT, see the article ATONEMENT. J. Ba.

EYE.—The eye was supposed to be the organ or window by which light had access to the whole body (Mt 6^{22}). For beauty of eyes cf 1 S 16^{12} (RSV), Ca 1^{15} 5^{12}, and the name Dorcas (='gazelle,' so called because of its large bright eyes) in Ac 9^{36}; in Gn 29^{17} the reference seems to be to Leah's *weak* eyes (so RSV). The wanton or alluring eyes of women are referred to in Pr 6^{25}, Is 3^{16}. Their beauty was intensified by painting, **antimony** being used for darkening the eyelashes (2 K 9^{30}, Jer 4^{30}, Ezk 23^{40}). *Keren-happuch* (Job 42^{14}) means 'horn of eyepaint.' Pr 23^{29} speaks of the drunkard's redness of eye. In Dt 6^{8} 14^{1} 'between the eyes' means 'on the forehead' (so RSV in latter passage). Shaving the eyebrows was part of the purification of the leper (Lv 14^{9}).

'Eye' is used in many *figurative phrases*: as the avenue of temptation (Gn 3^{6}, Job 31^{1}); of spiritual knowledge and blindness; as indicating feelings—pride (2 K 19^{22}), favour [especially God's providence (Ps 33^{18})], hostility (Ps 10^{8}). An *evil eye* implies envy (Mk 7^{22}, RSV 'envy'; cf 1 S 18^{9}, the only use of the verb in this sense in English) or niggardliness (Dt 15^{9}, Pr 28^{22} [literally 'he that hath an evil eye,' RSV 'a miserly man'], and probably Mt 6^{22}, where the 'sound' eye may mean 'liberality'; cf Pr 22^{9}). In Rev 3^{18} **eye-salve** or collyrium is a Phrygian powder mentioned by Galen, for which the medical school at Laodicea seems to have been famous. (See Ramsay, *Seven Churches*, p. 419). The reference is to the restoring of spiritual vision.

EZEKIEL (='Yahweh strengthens').—I. THE MAN. Ezekiel, son of Buzi, was both priest (1^{3}) and prophet. He was a contemporary of Jeremiah and suffered exile in Babylon. The date of his birth is not known, but we have dated prophecies which show a prophetic activity extending over a period of twenty-two years, from the fifth year of the exile of king Jehoiachin until the twenty-seventh year, *i.e.* from 593 to 571 B.C. His priestly interests show clearly in chs. 40–48 where the reconstituted Temple, city and state are described. His prophetic activity is patent throughout the book and was clearly the stronger force in his life. The vision of a book roll, written on front and back with lamentations and mourning and woes (2^{8}–3^{3}), which he was told to eat, may be regarded as an inaugural vision for his prophetic ministry, especially that part of it which preceded the fall of Jerusalem, a ministry in which he felt called upon to denounce the sins of the people and impress upon them their personal and individual responsibility. The chariot vision (ch. 1) on the other hand, may also be regarded as an inaugural vision, but its main purpose was to show the prophet that whatever may have happened to His Temple and city in Palestine, Yahweh was still with His people even though they were exiled in Babylon. It may be felt that Ezekiel needed to have his call to prophecy confirmed in this way when it became clear that God was left without an abiding home in Jerusalem. Ezekiel's prophetic work before the fall of Jerusalem in 586 B.C. was mainly, if not entirely, directed towards the people in Judaea. His task was to convince them of their sin and to preach of the calamity that would befall them. After 586 B.C. he turned to the more distant future and felt himself called to be a watchman (3^{17ff}, 33^{7-9}) heralding the new age that would dawn for the next generation. Very little indeed is known of his personal life. We may imagine him to have been a well-known figure, partly on account of the acted prophecies which are one of the striking features of his ministry, and partly on account of a liability to suffer sudden seizures or fits which would temporarily deprive him of speech. Nine of his symbolic actions are recorded, $4^{1-3, 7}$ 4^{4-8} $4^{10f, 16f}$ $4^{9, 12-15}$ 5^{1-17} $12^{1-16, 17-20}$ 24^{15-24} 37^{15-17}; the last but one of these (24^{15-24}) shows him refraining from mourning the death of his wife as a symbol of the way the people will behave when Jerusalem and the Temple are reduced to ruins. This, though incidental, is the only reference to his wife. Another of the symbols, 4^{4-8}, may have been a utilization of his proneness to cataleptic fits, for he lay on his left side for 190 days (so LXX, Hebrew 390) and on his right side for forty days, symbolizing the exile of northern Israel and of Judah, a day for a year. The loss of speech from which he suffered (3^{25-27} 24^{25-27}) may also have been a symptom of his pathological condition which he was able to bring into service in his prophetic work. These things would in themselves compel an audience, if only out of curiosity, but he seems to have been gifted with a manner of speech that was in itself a pleasure to listen to (33^{32}: 'like one who sings love songs with a beautiful voice and plays well on an instrument'). During the exile he was a recognized leader in the community in Babylon and regularly held meetings of the elders in his own home (8^{1} 14^{1} 20^{1}).

II. THE BOOK.—**1. Contents and message.**—The book falls roughly into two parts separated by a collection of foreign oracles. The division coincides with the siege and fall of Jerusalem (ch. 24). Chs. 1–24 in the main contain denunciations of sin and predictions of judgment. Then follow eight chapters of oracles concerning foreign peoples, and then the second part (chs. 33–48) are occupied with hopes for the future. In the first part, after the introduction (1^{1}–3^{21}) there follows a series of prophecies in act and word (3^{22}–7^{27}), a strong denunciation of idolatrous practices in Jerusalem (8–11) and the remaining chapters (12–24) contain denunciations of sin, warnings of the consequences, and an appeal to each member of the community to accept his responsibility. The chapters against foreign peoples begin with a threat of punishment on the Ammonites, Moabites, Edomites, and Philistines for their malice towards Israel (25) then there are two chapters about Tyre, one of which (27) includes the poem depicting Tyre as a stately ship, a further chapter on the princes of Tyre and finally four chapters concerning Egypt (29–32). The second part (33–48) begins with the announcement of the fall of the city and the call to Ezekiel to become a watchman (the appointment as watchman was anticipated in 3^{17ff}, perhaps placed there by an editor). Then the shepherds who have misled the people are denounced and the people promised comfort, and a new shepherd of Davidic descent will be given them (34). Ch. 35 is a prophecy against Seir and in the next chapter the mountains of Israel are addressed with a promise of restoration. Ch. 37 predicts the resurrection of the nation, under the figure of a valley full of dry bones, and goes on to promise the re-union of Israel and Judah and the return of a Davidic prince. Chs. 38 and 39 telling of the invasion and defeat of Gog from the land of Magog foretell the final catastrophe and overthrow of the enemies of Israel. (The chapters break the sequence of

the theme of restoration and may have been inserted here by a later editor. It is generally thought that they were written later; their apocalyptic nature suggests a later date.) Finally in chs. 40–48 there is a detailed plan for the new state, city, and Temple, with the priesthood as the most important body within it.

Ezekiel's verdict on the national history is of unmixed severity. From their starting-point in Egypt the people had behaved ill (cf 20^{5-13} with Jer 2^{2}). Jerusalem—to him almost synonymous with the nation—was pagan in origin and character (16). The root of their wickedness was an inveterate love of idolatry (5^{11} 7^{20} etc.). Even Ezekiel's own contemporaries longed to be heathens: their God could hold them back only by extreme violence (20^{32-38}). The exiles were somewhat less guilty than their brethren in Jerusalem (14^{22f}). But, on the whole, princes, priests, and people were an abandoned race. They loved the worship of the high places, which, according to Ezekiel, had always been idolatrous and illegitimate. They ate flesh with the blood in it, disregarded the Sabbath, polluted the Temple with ceremonial and moral defilements, committed adultery and other sexual abominations, were guilty of murder, oppression, the exaction of usury, harshness to debtors. The list can be paralleled from other prophetic writings, but the stress is here laid on offences against God. And this is in accordance with the strong light in which Ezekiel always sees God's claims. The vision with which the book opens points to God's transcendent majesty. The title 'son of man' by which the prophet is addressed nearly 100 times, marks the gulf between the creature and his maker. The most regrettable result of Israel's calamities is that they seem to suggest impotence on Yahweh's part to protect His own. The motive which has induced Him to spare them hitherto, and will, hereafter, ensure their restoration, is the desire to vindicate His own honour. In the ideal future the prince's palace shall be built at a proper distance from Yahweh's, and not even the prince shall ever pass through the gate which has been hallowed by the returning glory of the Lord. Hence it is natural that the reformation and restoration of Israel are God's work. He will sprinkle clean water on them, give them a new heart, produce in them humility and self-loathing. He will destroy their foes and bless their land with supernatural fertility. Yet the people have their part to play. Ezekiel protests against the traditional notion that the present generation were suffering for their ancestors' faults: to acquiesce in that is to deaden the sense of responsibility and destroy the springs of action. Here he joins hands with Jeremiah (Jer 31^{29f}), both alike coming to close quarters with the individual conscience. He pushes almost too far the truth that a change of conduct brings a change of fortune (33^{14-16}). But there is immense practical value in his insistence on appropriate action, his appeal to the individual, and the tenderness of the appeal ($18^{23, 31}$ 33^{11}). Nowhere is Yahweh's longing for the deliverance of His people more pathetically expressed. And, notwithstanding their continual wrongdoing, the bond of union is so close that He resents as a personal wrong the spitefulness of their neighbours (25–32, 35). The heathen, as such, have no future, although individual settlers will share common privileges (47^{22f}).

The concluding chapters, 40–48, are a carefully elaborated sketch of the polity of repatriated Israel—Israel, *i.e.* not as a nation, but as an ecclesiastical organization. In the foreground is the Temple and its services. Its position, surroundings, size, arrangements, are minutely detailed; even the place and number of the tables on which the victims must be slain are settled. The ordinances respecting the priesthood are precise; none but the Zadokites may officiate; priests who had ministered outside Jerusalem are reduced to the menial duties of the sanctuary (cf Dt 18^{6-8}). Adequate provision is made for the maintenance of the legitimate priests. Rules are laid down to ensure their ceremonial purity. The office of high priest is not recognized. And there is no real king. In ch. 37 the ruler, of David's line, seems to count for something; not so here. True, he is warned against oppressing his subjects (45^{9} 46^{16-18}), but he has no political role. A domain is set apart to provide him a revenue, and his chief function is to supply the sacrifices for the festivals. The country is divided into equal portions, one for each tribe, all of whom are brought back to Palestine. No land is to be permanently alienated from the family to which it was assigned. God's glory returns to the remodelled and rebuilt sanctuary, and Ezekiel's prophecy reaches its climax in the concluding words, 'The name of the city from that day shall be, Yahweh is there.' This picture of the ideal state had a profound effect on subsequent thought and practice. Some details, such as the equal division of the land, the arrangements respecting the position and revenue of the prince, the relation of the tribes to the city, were impracticable. But the limitation of the priesthood to a particular class, the introduction of a much more scrupulous avoidance of ceremonial defilement, the eradication of pagan elements of worship, the exclusion of all rival objects of worship, went a long way towards creating Judaism. And whilst this has been the practical result, the chapters in question, together with Ezekiel's vision of the chariot and the cherubim, have had no little influence in the symbolism and imaginative presentation of Jewish apocalyptic literature and Christian views of the unseen world.

2. Literary criticism of the book.—The plan of the book is so simple and straightforward that until the present century scholars were prepared to accept it as a product of Ezekiel's own hand, both in its contents and its arrangement, assigning only isolated fragments (apart from chs. 38 and 39) to subsequent editors. This view of the book is still accepted by some scholars. But there are some problems which have made other scholars hesitant to accept the traditional view. Despite the apparent care with which the book was compiled and equipped with a clear scheme of dating (1^{1f} 8^{1} 20^{1} 24^{1} 26^{1} $29^{1, 17}$ 30^{20} 31^{1} $32^{1, 17}$ 33^{21} 40^{1}) nearly all in chronological order, there are several difficulties that have emerged during more recent study of the book. Two things stand out clearly, first, there are many duplications and repetitions (cf 3^{16-21} and 33^{7-9}, 7^{2-4}, and 7^{5-9}, 43^{1-12} and 44^{1-8} etc.) which seem to be due to a later editor rather than to the prophet himself as editor; second, although the opening verses of the book imply that the prophet was in Babylon for the whole of his prophetic life, the prophecies in the first part of the book are addressed to the rebellious house of Israel and show first hand knowledge of the prevailing situation in Jerusalem and Judaea. The symbolic acts were necessarily performed before an audience; some of them indeed would lose their point if not performed in the presence of the very people concerned, notably the symbol of removal into exile. If one forgets the method of visionary transport (8^{3} $11^{1, 24}$) one forms the impression on reading the book that the prophet is actually in Jerusalem seeing the things he describes and denounces, and that as the time of the siege draws near he moves out of the city to a neighbouring town (12^{3}) whither they bring him news of the city's fall (24^{26} 33^{21}). Thereafter the prophetic work recorded in the book was undoubtedly carried out in Babylon. The first of these problems, the duplications and repetitions, is readily explained as due to the editorial work that was done on the book, whether by the prophet himself with only a few later additions, or by subsequent editors. How much of the material is to be ascribed to the editor or editors depends on the point of view from which the book is treated. One scholar (Hölscher) limited the work of the prophet himself to the poetical parts of the book; this is an extreme view but it does at least recognize that Ezekiel, like other prophets, expressed his message often in poetic language. Other scholars, whilst accepting the fact that Ezekiel may have been his own first editor and may himself have put in the dated sections which, with the exception of 26^{1} and 29^{17}, are in chronological sequence, think that there has been further editing;

varying amounts of secondary material are then laid to the editors' responsibility. As regards the prophet's place of residence, the book in its present form places him in Babylon from 597 B.C. onwards and enables him to have contact with Palestine through clairvoyance and through spiritual transport. Another possibility, however, and one that has commended itself to several scholars since it was first published (Bertholet, 1936) is to regard those passages that place him in Babylon before 586 B.C. as editorial. This means that the prophet had, in effect, two periods of ministry, the first from 593 to 586 B.C. when he lived and prophesied in Jerusalem and Judaea and the second in Babylon from 586 B.C. to the end of his active life (the last date given is 571 B.C.). On this view the Judaean ministry may be thought to have been inaugurated by the vision of a roll of a book (2^{8}–3^{5}) and the Babylonian by the chariot vision in ch. 1. That vision gains much in meaning if it is thought to take place *after* the fall of the Temple when Yahweh would no longer have a home in the sanctuary in Jerusalem; in a vision rich in symbolism He showed the prophet that, although His people were removed to Babylon in exile, He was still with them in all His power and majesty. (For a survey of other recent views on Ezekiel, see H. H. Rowley, *The Book of Ezekiel in Modern Study*, *BJRL* xxxvi (1953–1954), 146 ff.)

J. T.—L. H. B.

EZEL.—The spot where Jonathan arranged to meet David before the latter's final departure from the court of Saul, 1 S 20^{19} (AV, RV). The place is not mentioned elsewhere, and it is now generally admitted that the Hebrew text of this passage is corrupt. The true reading seems to have been preserved by the LXX, following which RSV reads in v.^{19} 'yonder stone heap,' and in v.^{41} 'from beside the stone heap.'

EZEM ('bone').—A town of Judah or Simeon, Jos 15^{29} 19^{3} (AV **Azem**), 1 Ch 4^{29}; possibly modern *Umm el-ʿAzam*, SE. of Beersheba.

EZER.—1. A Horite 'duke,' Gn 36^{21}, 1 Ch 1^{38} (AV **Ezar**). **2.** An Ephraimite who, according to 1 Ch 7^{21} was slain by the men of Gath. **3.** A Judahite, 1 Ch 4^{4}. **4.** A Gadite chief who joined David, 1 Ch 12^{9}. **5.** A son of Jeshua who helped to repair the wall, Neh 3^{19} **6.** A priest who officiated at the dedication of the walls, Neh 12^{42}.

EZERIAS, 1 Es 8^{1} (AV).—See AZARIAH, **9.**

EZIAS, 1 Es 8^{2} (AV).—See UZZI, **1.**

EZION-GEBER, later called Elath, still later Berenice (Jos. *Ant.* VIII. vi. 4 [163]).—A port on the Red Sea (Gulf of ʿAqaba) used by Solomon for his commerce (1 K 9^{26}). A great copper refinery was uncovered here by Nelson Glueck (*The Other Side of the Jordan* [1940]), dating from the 10th–9th cents. B.C. It was rebuilt under the name of Elath by Uzziah, king of Judah, in the 8th cent. (2 K 14^{22}). According to tradition, the Israelites encamped here on the journey through the wilderness (Nu 33^{35}, Dt 2^{8}). It is the modern *Tell el-Kheleifeh*.

A. J. M.—D. N. F.

EZNITE.—In 2 S 23^{8} AV and RV have 'Adino the Eznite.' The text is corrupt and in RSV it is restored from the parallel 1 Ch 11^{11}. Both 'Adino' and 'Eznite' thus disappear.

EZORA.—In 1 Es 9^{34} RV 'the sons of Ezora' (AV **Ozora**) appear to replace **Machnadebai** (q.v.) in the list of those who had married foreign wives; but RSV substitutes **Machnadebai** for RV **Mamnitanemus** (q.v.).

EZRA (perhaps an abbreviation of *Azariah*='Yahweh helps').—**1.** A Jewish exile in Babylon in the reign of Artaxerxes (which Artaxerxes is not stated), who is on record as having played a very notable part in the critical period of reform associated with the governorship of Nehemiah. Our sources of information regarding him are (1) the autobiographical narratives embodied in Ezr 7–10 and Neh 8–10; and (2) later tradition as embodied in the narrative of the compiler of Ezra-Nehemiah, and the accounts in the apocryphal books.

According to Ezr 7^{1-5}, Ezra was of priestly descent, and in fact a member of the high-priestly family (a 'Zadokite'). But his priestly descent has been called in question. His work and achievements rather suggest the character of the 'scribe' (*sōphēr*) *par excellence*. He is described as 'Ezra the priest, the scribe of the law of the God of heaven,' in Ezr 7^{11-21}; as 'Ezra the priest, the scribe,' in Neh 8^{9} 12^{26}; and as 'the priest' alone in Ezr $10^{10, 16}$, Neh 8^{2}.

In order to form a just estimate of Ezra's work and aims, we must picture him as a diligent student of the Law. He doubtless stood at the head—or, at any rate, was a leading figure—of a new order which had grown up in the Exile among the Jews of the 'Golah' or captivity in Babylonia. Among these exiles great literary activity apparently prevailed during the later years of the Exile and onwards. The so-called 'Priestly Code'—which must be regarded as the work of a whole school of writers—was formed, or at least the principal part of it, probably between the closing years of the Exile and the arrival of Ezra in Jerusalem, and was doubtless the 'law of God' which Ezra brought with him to Jerusalem. The centre of Jewish culture, wealth, and leisure was at this time—and for some time continued to be—Babylonia, where external circumstances had become (since the Persian supremacy) comparatively favourable for the Jews. In this respect the position of the Jerusalem community, during these years, afforded a painful contrast. The tiny community in Judah had to wage as a whole a long and sordid struggle against poverty and adverse surroundings. Its religious condition was much inferior to that of the 'Golah.' Moved by religious zeal, and also, it would seem, with the statesman-like view of making Jerusalem once more the real spiritual metropolis of Judaism, Ezra conceived the idea of infusing new life and new ideals into the Judaean community, by leading a fresh band of zealously religious exiles from Babylonia back to Judah on a mission of reform. With the aid, possibly, of Jews at court, he enlisted the good-will of Artaxerxes, and secured an Imperial firman investing him with all the authority necessary for his purpose. This edict is recorded in Ezr 7^{12-26}. All Jews who so wished could depart from Babylon; offerings were to be carried to the Temple in Jerusalem and the Law of God was to be enforced. While many scholars accept this edict as trustworthy, others criticize its obviously Jewish terminology, and refuse to believe that the Persian government of that day would ever have given such powers as are specified in the firman to one who was not a public official. In the seventh year of Artaxerxes Ezra collected a band of 1496 men (Ezr 8^{1-14}; in 1 Es 8^{28-41} the number is given as 1690), besides women and children, and started on his journey across the desert. In four months they reached their destination.

Here, after the sacred gifts had been offered in the Temple, Ezra soon learned of the lax state of affairs that prevailed in the holy city, and among the Judaean villages. The 'holy seed' (including even priests and Levites) had 'mingled themselves with the peoples of the lands,' and 'the hand of the princes and deputies' had 'been first in this trespass' (Ezr 9^{2}). Ezra's consequent prayer and confession, in the presence of a large assemblage of the people, lead to drastic measures of reform. A general congregation of the community authorizes the establishment of a divorce court, presided over by Ezra, which finishes its labours after three months' work, many innocent women and children being made to suffer in the process.

In the present form of the narrative Ezra is also said to have acted in association with Nehemiah, after the latter had arrived in Jerusalem and re-erected and dedicated the city walls. Thereafter it is stated that the Book of the Law was read by Ezra before the people in solemn assembly, and they pledged themselves to obey it. But Neh 8–10, within which this record is found, is undated; its authenticity has been seriously questioned and the view has been propounded that these chapters

have as their purpose the greater honour of the Chronicler's hero Ezra (see NEHEMIAH, BOOK OF).

The sequence of events as described above is not without difficulties. How is the long interval between Ezra's arrival in Jerusalem (if 458 B.C.) and the promulgation of the Law (444 B.C.) to be explained? It may be, as Stade has suggested, that the compulsory divorce proceedings alienated a considerable body of the people, and that the opportune moment for introducing the code was in consequence postponed. But strong reasons have been advanced for placing Ezra's work in Jerusalem subsequent to Nehemiah's governorship. As has been mentioned above, the Artaxerxes named in the text is not precisely specified; if it was Artaxerxes I., Ezra's arrival in Jerusalem must have been in 458 B.C.; but, if it was Artaxerxes II., in 397 B.C. The following considerations have been adduced in support of the later date: Nehemiah in his day found the city of Jerusalem deserted (7^4), while Ezra found the city wall (although the word used is not the common one for 'city wall') rebuilt and the city itself populous (Ezr 9^9 10^1); the measures adopted by Ezra against foreign wives (10^{3-5}, 10^{8}) were much more stringent than those of Nehemiah (13^{25}); Nehemiah was a contemporary of the high priest Eliashib (Neh $3^{1, 20}$ etc.), and Ezra of Eliashib's grandson Johanan (Ezr 10^6), and there seems to be available supporting evidence for this argument from one of the Elephantine Papyri (cf A. Cowley, *Aramaic Papyri of the Fifth Century B.C.*, 108 ff; see further H. H. Rowley, *The Servant of the Lord and Other Essays on the Old Testament*, pp. 131–159).

By investing the Law with a sanctity and influence that it had never before possessed, and making it the possession of the entire community, Ezra endowed the Jewish people with a cohesive power which was proof against all attacks from without.

2. Eponym of a family which returned with Zerubbabel (Neh $12^{1, 13, 33}$).

3. 1 Ch 4^{17} (AV); see EZRAH. G. H. B.—J. Ma.

EZRA, BOOK OF.—Our present Book of Ezra, which consists of ten chapters, is really part of a composite work, Ezra-Nehemiah, which, again, is the continuation of Chronicles. The entire work—Chronicles–Ezra–Nehemiah—is a compilation made by the Chronicler. See further, NEHEMIAH (BOOK OF), **1.**

1. Analysis of the book.—The Book of Ezra falls into two main divisions: (*a*) chs. 1–6; (*b*) chs. 7–10.

(*a*) Chs. 1–6 give an account of the Return and the rebuilding of the Temple. Ch. 1 tells how Cyrus, after the capture of Babylon in 538 B.C., issued an edict permitting the exiles to return, and commanding his Babylonian subjects to contribute to the cost of the Temple—a most unlikely thing for the newly established king to do. It should be noted that 6^{3-5} contains another form of the edict in Aramaic, giving instructions that the cost of rebuilding of the Temple is to be defrayed from the royal treasury. Since the issue of this decree was affirmed in the days of Darius (6^{1ff}) it has sometimes been objected that the Jews would never have built so poor a Temple as Haggai mentions (Hag 2^3) if such official help had been available to meet the cost of building; but the reluctance to build and the mediocrity of the finished structure may have been due to lack of religious faith and of moral strength rather than lack of funds. 40,000 of the exiles availed themselves of the opportunity to return to Judah under Joshua the high priest and Zerubbabel, a member of the royal Davidic family, who was appointed governor (*pehāh*) by Cyrus 538–537 B.C. Ch. 2 contains a list of those who returned and of their offerings for the building of the Temple; it is a copy of Neh 7^{6-73a}, which is a register of the province of Judah in the 5th cent. Ch. 3 describes how in October 537 B.C. the altar of burnt-offering was re-erected on its ancient site, the foundation-stone of the Temple laid (May 536 B.C.), and the work of rebuilding begun. Ch. 4 tells that, owing to the unfriendly action of neighbouring populations, the building of the Temple was suspended during the rest of the reigns of Cyrus and Cambyses. It contains the correspondence between Rehum, Shimshai, and their companions, and king Artaxerxes. In 5^{1-5} we are informed that, as a consequence of the earnest exhortations of the prophets Haggai and Zechariah, the building of the Temple was energetically resumed in the second year of Darius I. (520 B.C.). In chs. 4 and 5 there seems to be considerable confusion. 3^8 and 5^{16} state that the foundation stone of the Temple was laid immediately after the return of the Jews from Babylon in terms of the edict of Cyrus; but 5^{1f} says it took place in 520; possibly not unrelated to that apparent contradiction, 4^{24} says that the work on the Temple was stopped until 520, but 5^5 seems to say that there was no such stoppage; 4^{6-23} refers to the building of the city walls in the time of Artaxerxes, while 4^{24}, immediately following, makes mention of the interruption in the building until 520, and 5^3, by its use of the words 'to build this house and to finish this structure,' might refer to both Temple and walls. In 5^{6}–6^{12} we have the correspondence between the satrap Tattenai and Darius. We read in 6^{13-22} of how the Temple was successfully completed on the 3rd March 515 B.C.

(*b*) Chs. 7–10 deal with Ezra's personal work (which is concluded in Neh 7^{73b}–10^{39}). In ch. 7 the silence of many years is broken, when Ezra, the *teacher of the Law*, at the head of a fresh band of exiles, leaves Babylonia bearing a commission from Artaxerxes to bring about a settlement in the religious condition of the Judaean community. Ch. 8 gives a list of the heads of families who journeyed with him, and tells of their arrival in Jerusalem. Ch. 9 describes the proceedings against the foreign wives, and contains Ezra's penitential prayer. In ch. 10 we read that an assembly of the whole people appointed a commission to deal with the mixed marriages. The narrative abruptly breaks off with an enumeration of *the men who had married strange women.*

2. Sources of the book.—In its present form the Book of Ezra-Nehemiah is, as has been pointed out, the work of the Chronicler. The compilation, however, embraces older material. The most important parts of this latter are undoubtedly the autobiographical sections, which have been taken partly from Ezra's, partly from Nehemiah's, personal memoirs.

(*a*) *Extracts from Ezra's memoirs embodied in the Book of Ezra.*—The long passage Ezr 7^{27}–9^{15} (except 8^{35f}) is generally admitted to be an authentic extract from Ezra's memoirs. The abrupt break which takes place at 9^{15} must be due to a compiler. [It is probable that an even larger excerpt from these memoirs is to be seen in Neh 9^{6}–10^{40}.] But the association of Ezra and Nehemiah in 444 B.C., which is described in Neh 8–9, has been seriously questioned (see EZRA above).

It seems probable that these memoirs were not used by the Chronicler in their original form, but in a form adapted and arranged by a later hand, to which Ezr 10 is due. This latter narrative is of first-rate importance and rests upon extremely good information. It was probably written by the same hand that composed the main part of Neh 8–10 (see NEHEMIAH [BOOK OF], **2**).

(*b*) *Other sources of the book.*—The other most important source used by the Chronicler was an *Aramaic* one, written, perhaps, not long after 450 B.C., which contained a history of the building of the Temple, the city walls, etc., and cited original documents. From this authority come Ezr 4^{8-22} 5^{1}–6^{16} 7^{12-26}.

The Chronicler, however, partly misunderstood his Aramaic source. He has misconceived 4^6, and assigned a false position to the document embodied in 4^{7-23}.

(*c*) *Passages written by the Chronicler.*—The following passages bear clear marks of being the actual composition of the Chronicler: Ezr 1, 3^{2}–4^{7} 4^{24} 6^{17}–7^{11} 8^{35f}.

3. Separation of Ezra from Chronicles.—It would appear that after the great work of the Chronicler had been completed (1 and 2 Chronicles, Ezra-Nehemiah), the part which contained narratives of otherwise unrecorded events was first received into the Canon. Hence, in the Jewish Canon, Ezra-Nehemiah precedes

the Book of Chronicles. In the process of separation certain verses are repeated (Ezr 1^{1-3a}=2 Ch 36^{22f}); v.23 seems to have been added in 2 Ch 36 to avoid a dismal ending (v.21).

For the historical value of the book cf what is said under NEHEMIAH [BOOK OF], **3.** G. H. B.—**J. Ma.**

EZRAH.—A Judahite, 1 Ch 4^{17} (AV **Ezra**).

EZRAHITE.—A name given to Heman in the title of Ps 88, and to Ethan (q.v.) in Ps 89. It is used of Ethan also in 1 K 4^{31}.

EZRI.—David's superintendent of agriculture, 1 Ch 27^{26}.

EZRIL, 1 Es 9^{34} (RV).—See AZAREL, **4.**

F

FABLE.—Like parable, a didactic narrative, differing from the latter, however, in that its actors are not human but animals or plants that behave or talk like human beings. Both are distinct from allegory, which is concerned with the recorded events (actual or imaginative) not in themselves, but only as symbols of another level of meaning (cf Gal 4^{22-31}). Fables are mentioned in AV in 1 Ti 1^4 4^7, 2 Ti 4^4, Tit 1^4, 2 P 1^{16}; but RSV in each case correctly reads 'myths.' Reference is not at all to the true fable, but the writers have chosen a term expressive of contempt for some aspects of contemporary Jewish and Gentile thought that was making an appeal to certain Christians. Notwithstanding the large and famous bulk of parables in the Gospels, the NT contains little fable, and that little is not immediately apparent. Paul's postulated debate among the members of the human body (1 Co 12^{14-26}) echoes a fable known in an Egyptian source of approximately the 9th cent. B.C. and probably widely disseminated, with variations, through the orient. Since our text is a schoolboy's copy, it must have been already well known and was probably of considerable antiquity.

By contrast the word fable is absent from the OT—Biblical Hebrew has no specific equivalent, though *māshāl* (commonly rendered 'proverb,' but in Ezk 24^3 'allegory' in RSV) might cover the meaning, as perhaps it does in 1 K 4^{32}—but the reality is present in Jotham's speech to the men of Shechem (Jg 9^{7-15}) and Jehoash's retort to Amaziah (2 K 14^9). Further, the reference in 1 K 4^{33} is clearly an allusion to plant and animal fables which perhaps were a part of Solomon's 'three thousand proverbs' (v.32) and expressive of his function as a 'wise man.' Yet this is not all; some of the illustrations employed by the prophets approach the status of fable, such as Isaiah's poem about a vineyard, which though not represented as speaking is almost endowed with a conscious will in antagonism to its owner (Is 5^{1-7}), and the poem about a lioness and her whelps in Ezk 19^{2-9}, and, less directly, that about a vine in vv.$^{10-14}$; farther away is the oracle about a great eagle in 17^{3-10}. The intimate relation of simile and metaphor, and of both in turn with fable is suggested by passages such as Job 8^{11-13} 12^{7-9}, Ps 1^{4-6}, Pr $30^{18f, 24-31}$, Ezk 15^{1-5}. They imply also the didactic purpose which was the objective of the fable—and of the teaching of the wise men.

Such pervasive consciousness, and use or near-use, of the fable is not at all surprising; approached from the direction of thought and literary expression in the wider Near East it is seen that Israel's familiarity with this teaching device is only one further aspect of the nation's normal place in its world and its dependence on the literature and thinking of its time. The similarities and differences of human and animal conduct had long attracted the interest of thoughtful persons; the fable was an obvious expression of this and at the same time a ready tool for the wise men's concern with the good life and modes of conduct conducing thereto.

We possess a considerable bulk of literary and artistic remains of this centuries-long activity. It is no novel idea that Aesop's fables are actually of oriental origin. In addition there exists the considerable collection known as Kalila wa-Dimna, or the Bidpai Fables. Much older than either and richly evidencing the widespread use of the fable in the ancient world are the numerous stories and literary vignettes in Egyptian, Sumerian, and Akkadian literatures. There exist also Egyptian graphic illustrations of satiric animal situations, such as a mouse in his chariot pursuing an army of cats, which may point to fables otherwise lost, and emphasize the currency of this form of teaching in the ancient world (see Ronald J. Williams, 'The Fable in the Ancient Near East' in *A Stubborn Faith* (1956), ed. Edward C. Hobbs). W. A. I.

FACE is used freely of animals, as well as of men; also of the surface of the wilderness (Ex 16^4), of the earth, of the waters or deep, of the sky. It is used of the front of a house (Ezk 41^{14}), of a porch (40^{15} 41^{25}), of a throne (Job 26^9). *Covering the face* in 2 S 19^4 is a sign of mourning (cf covering the head); it is also a mark of reverence (Ex 3^6, 1 K 19^{13}, Is 6^2). In Gn 24^{65} it indicates modesty. Otherwise it is used simply of blindfolding, literal (Mk 14^{65}), or metaphorical (Job 9^{24}). *To fall on the face* is the customary Eastern obeisance, whether to man or to God. *Spitting in the face* is the climax of contempt (Nu 12^{14}, Dt 25^9, Mt 26^{67}). The Oriental will say, 'I spit in your face,' while he actually spits on the ground. The face naturally expresses various emotions—fear, sorrow, shame, or joy. The 'fallen face' (Gn 4^5) is used of displeasure; 'hardening the face' of obstinate sin (Pr 21^{29}, Jer 5^3). The face was 'disfigured' in fasting (Mt 6^{16}). It may be the expression of favour, particularly of God to man (Nu 6^{25}, Ps 31^{16}), or conversely of man turning his face to God (Jer 2^{27} 32^{33}); or of disfavour, as in the phrase 'to set the face against' (Ps 34^{16}, Jer 21^{10}, and often in Ezekiel), or 'to hide the face.' [*N.B.* In Ps 51^9 the phrase is used differently, meaning to forget or ignore, cf Ps 90^8.] Closely related are the usages connected with 'beholding the face.' This meant to be admitted to the presence of a potentate, king, or god (Gn 33^{10} $43^{3, 5}$, 2 K 25^{19}, Est 1^{14} $4^{11, 16}$; cf 'angel(s) of the face or presence,' Is 63^9, To 12^{15}, Rev 8^2, and often in apocalyptic literature). So 'to look upon the face' is to accept (Ps 84^9), 'to turn away the face' is to reject (Ps 132^{10}, 1 K 2^{16} RVm). To 'behold the face' of God may be used either literally of appearing before His presence in the sanctuary or elsewhere (Gn 32^{30} [*Peniel* is 'the face of God'], Ex 33^{11}, Ps 42^2; the 'showbread' is 'the bread of the face or presence'), or with a more spiritual reference to the inward reality of communion which lies behind (Ps 17^{15}); so 'seeking the face' of God (Ps 24^6 27^8). There are instances, however, where *pānîm* (face) with a suffix is used as a periphrasis for the personal pronoun (1 S 17^{11}). Further, *pānîm* is also used (cf 'place,' 'heaven,' 'name') as a substitute for the Divine Name, in a specially personal way; *e.g.* 'the bread of the Presence' may mean 'Yahweh's personal bread,' placed on His very own table. On the other hand, in 2 K 14^8 'see face to face' is used in a sinister sense of meeting in battle.

The Hebrew word for 'face' is used very freely, both alone and in many prepositional phrases, as an idiomatic periphrasis, *e.g.* 'honour the face of the old man' (Lv 19^{32}), 'grind the face of the poor' (Is 3^{15}), or the

common phrase ' before my face ' (Dt 8^{20}, Mk 1^{2}), or ' before the face of Israel ' (Ex 14^{25}). Many of these usages are disguised in our versions, not being in accordance with English idioms; the pronoun is substituted, or ' presence,' ' countenance ' are used, ' face ' being often indicated in AVm or RVm (Gn 1^{20}, 1 K 2^{16}); so in the phrase ' respect persons ' (Dt 1^{17}). On the other hand, ' face ' is wrongly given for ' eye ' in AV of 1 K $20^{38, 41}$, where ' ashes on face ' should be ' headband over eye '; in 2 K 9^{30}, Jer 4^{30}, the reference is to painting the eye; in Gn 24^{47} RV substitutes ' nose,' in Ezk 38^{18} ' nostrils.' On the use of ' face ' as an expression of personality cf A. R. Johnson, *The Vitality of the Individual in the Thought of Ancient Israel*, 1949, pp. 42 ff. C. W. E.—N. H. S.

FAIR HAVENS.—A harbour on the south coast of Crete, near Lasea, where St. Paul's ship took shelter on the voyage to Rome (Ac 27^{8}). It still retains its name.

FAITH.—General.—It is common in modern English usage to take faith in God to mean something more than belief in God, faith meaning a personal trust and commitment, belief only an intellectual or impersonal acceptance or credence, or a traditional dogmatic statement. In older English, however, ' belief ' was used for trusting or confiding in a person or thing (so *OED*), and even in modern usage the verb ' believe ' corresponds frequently to the noun ' faith,' although one may emphasize the personal relation by using ' trust.' In any case our task is not to define ' faith ' abstractly or to demarcate it by definition from other terms such as ' belief,' but by investigating Biblical usage to give it its proper content as it stands within its Biblical context. The scope of this article is roughly the NT Greek word-group *pistis* ' faith,' *pisteuō* ' believe,' with related words, and the various Hebrew words which form the relevant OT background.

1. In OT.—In the NT the word-group ' faith ' occupies a quite central and controlling position,as expressing the proper and characteristic relationship of man to God. We can hardly say that any one word takes so central a place in the OT. On the one hand a number of words exist which express that trust of God which is the inner life of the true worshipper. On the other hand this inner life is often expressed not only by terms for trust but by terms for fear. It might indeed be suggested that the terms for trust and those for fear might be taken together to give something in the OT which would roughly correspond to faith in the NT.

The central Hebrew term for ' believe ' comes from the root *'āman*. The original sense of this is commonly taken to have been that of ' firmness,' but in usage the basic senses are of trust and constancy. One of its best-known forms is the familiar *Amen*, ' it is sure.' One form of the verb (the *hiph'il*) means ' put one's trust in ' (*Hiph'il* for the entering into, and continuing in, a state, cf Gesenius-Kautzsch-Cowley, *Hebrew Grammar*, § 53e). The reflexive on the other hand means ' be reliable, constant, well-founded,' and appears as ' be established ' in Is 7^{9}. Thus God is reliable or trustworthy, Dt 7^{9}; David will have a reliable or well-established or permanent house, 2 S 7^{16}; a future priest will be reliable in the sense of personal trustworthiness, and his family will be constant or permanent in the priesthood, 1 S 2^{35}. The same form may also mean a trust committed, *e.g.* to Moses, Nu 12^{7}, perhaps also to Samuel, 1 S 3^{20}. The nouns from the same stem have a general sense between ' faithfulness ' and ' truth,' *e.g.* Ps 19^{9} $25^{5, 10}$ 26^{3}; the sense of ' honesty ' appears in 2 K 22^{7}.

This then is the most important component of the OT background of the NT ' faith,' although as indicated above it is used on a rather narrower front. It is used mainly where the interest is not on an inward trust or feeling of safety but on a placing of confidence in the person, the words, the office of another. The usage is not necessarily religious: *e.g.* we have ' constant ' or ' lasting ' plagues and sicknesses in Dt 28^{59}; or again, we hear that the Queen of Sheba ' did not believe ' the stories of Solomon's court until she visited it.

The sense of inward trust and the feeling of security are expressed in the OT rather by the verb *bāṭaḥ*, ' be secure, feel secure, trust in.' In Jg 18^{7} a city which has taken no defensive measures is described with this root as ' in security ' and ' unsuspecting.' The noun means ' safety, security,' and is frequent with the verb ' dwell,' especially in the prophets, in whose time insecurity was so commonly the mark of Israel's life. The verb is frequent in the Psalms, *e.g.* 4^{5} 9^{10} 13^{5}. It is realized, however, and especially by the prophets, that the sense of security may be falsely grounded, and many passages point out the futility of a sense of security based on human power, on military defence, on false gods (*e.g.* Jer 5^{17} $7^{4, 8, 14}$ 9^{4} $17^{5, 7}$, Is 42^{17}).

Another relevant and fairly frequent word is *ḥāsāh*, ' seek or take refuge, shelter '; especially in the Psalms we hear of the worshipper as one whose refuge and shelter is God, *e.g.* 2^{11} 5^{11} 7^{1} 46^{1}. This word brings out strongly the position of dependence of the person, and is seldom used of false security. We must also mention the place of the various terms approximately meaning ' hope.' As in the NT, hope and trust are closely similar, and the aspect of hope appears where there is a reference to the future and a contrast with a present dark or unhappy situation; *e.g.* Ps $42^{5, 11}$ 43^{5}, 2 K 6^{33}, Is 8^{16-17} 40^{27-31}. Finally, there is the important word *ḥesedh*. Although this hardly corresponds to ' faith ' in its usual senses, and is part of the background rather for the NT word ' grace,' it frequently means ' loyalty ' or ' faithfulness ' and the actions expressive of these; and especially in a covenant relation between persons or families, particularly when the more powerful person shows loyalty by fulfilling the obligations involved; so David to the house of Saul, 1 S 20^{15}, 2 S 9^{1} (RSV ' kindness '), and God to His servants, Ex 20^{6} etc.

We may say then that one of the contributions which the OT makes to the Biblical notion of faith is the way in which its conception of trust is connected with the trustworthiness and reliability of what is trusted. Clearly the general thought is of trust rather than of faith as belief in true doctrine or the like. For what we would call belief of this kind they would use rather verbs like ' hearing and doing.'

We may now ask what was the importance of this trust in Yahweh within the wider structure of OT religion. We should not think here of ' faith ' in an absolute sense as a ' source ' of understanding of God and man's relation to him. The trust is rather the proper recognition of God as He is known in the tradition of Israel. Certain situations may be indicated which called forth this recognition. Clearly one was the attitude of worship, where the worshipper takes refuge in God, like one claiming hospitality-protection, or like one seeking asylum at the sanctuary. Inwardly he recognizes that his security lies in God. Another situation was that of warfare. In the sacral warfare of old Israel it was God who controlled and won the battles, and Israel had to trust in Him. Does trust then mean passivity? Not in old stories like Jg 5, where Israel had to ' come to the help of the Lord.' Even so victory is recognized in old traditions to depend not on heaping up the maximum human forces, but on following the Divine directions. Some late traditions increase the element of human passivity in order to enhance the effect of Divine power (*e.g.* 2 Ch 20^{20-24}). When in the time of the prophets the attacks of foreign powers are understood as the instrument of God in chastising His people, there is a repeated challenge to faith with, in particular, a repudiation of military alliances as a means of defence (Is 30, especially v.^{15} 31^{1-5}). Another situation which called for trust was the giving of promises and visions of the future, and this occurs in the two important passages Gn 15^{1-6}, Hab 2^{1-4}.

Special mention must be given briefly to the special contribution made in this matter by Isaiah. The famous 7th chapter of that prophet begins with a challenge for trust in Divine protection; and it is when this way of trust is rejected that the sign of the coming birth is

announced. Without trust there will be no stability for the house of David (7[9], using two different forms of the same verb, as described above). The stability or permanence here in question probably refers to the traditional promise of permanence to the Davidic house, 2 S 7[16] etc. The question of trust during this difficult situation is a test of the destiny of the Messianic house.

In later Judaism, with the growing concentration upon the law, more attention is given to belief in the statutes and commands of God, an aspect which appears already *e.g.* in Ps 119[66]. Sir 32[24] places in parallel 'he that believes in the law' and 'he that trusts in the Lord,' and 33[3] speaks of the corresponding trustworthiness of the law. The faith of the Jews appears in their persecutions, *e.g.* 4 Mac 15[24] 16[22], and non-Jews, becoming convinced of the greatness of the God of Israel, are said to 'come to believe in God,' *e.g.* Jth 14[10].

In the Qumrân texts the OT terms for trust and faith are rather less prominent than one might expect, considering the strong sense of dependence on God which we find in their thought. In particular the Qumrân hymns use these terms considerably less than the OT Psalms. There is, however, much mention of the truth, faithfulness, and steadfast love of God. But in general the typical term for the ideal members of the community is not so much 'those who believe or trust' as 'those who hold fast to or stick to or walk in' the true statutes of God. The Habakkuk commentary, however, says of the enemies of the sect that they did not 'believe the covenant of God' and did not 'believe when they heard what was coming upon the last generation' (ii. 4, 6); the important text Hab 2[4] is interpreted of the pious whom God will deliver 'because of their toil and their faith in the teacher of righteousness' (viii. 2–3); faith or belief in these cases seems most probably to be acceptance as truth of the teachings and interpretations mentioned.

J. Ba.

2. In NT.—The NT use of *pistis*, *pisteuō* is based on that of common Greek, where persuasion is the radical idea of the word. From this sprang two principal notions, meeting in the NT conception: (*a*) the ethical notion of confidence, trust in a person, his word, promise, etc., and then mutual trust, or the expression thereof in a pledge—a usage with only a casual religious application in non-Biblical Greek; and (*b*) the intellectual notion of conviction, belief (in distinction from knowledge), covering all the shades of meaning from practical assurance down to conjecture, but always connoting sincerity, a belief held in good faith. The use of 'faith' in Mt 23[23] belongs to OT phraseology (cf Dt 32[20]); also in Ro3[3] and Gal 5[22] *pistis* is understood to mean 'faithfulness,' as often in classical Greek. In sense (*b*) *pistis* came into the language of Greek theology, the gods being assigned (*e.g.* by Plutarch as a religious philosopher) to the province of faith, since they are beyond the reach of sense-perception and logical demonstration.

(1) In this way faith came to signify the religious faculty in the broadest sense—a generalization foreign to the OT. Philo Judaeus, the philosopher of Judaism, thus employs the term; quoting Gn 15[6], he takes Abraham for the embodiment of faith so understood, viewing it as the crown of human character, 'the queen of the virtues'; for faith is, with Philo, a steady intuition of Divine things, transcending sense and logic. It is, in fact, the highest knowledge, the consummation of reason. This broad Hellenistic meaning is conspicuous in Hebrews (11[1] 6[27] etc.) and appears in St. Paul (2 Co 4[18] and 5[7]: 'We walk by faith, not by sight'). There is nothing distinctively Christian about faith understood in the bare significance of 'seeing the invisible'—since 'even the demons believe and shudder'; the belief that contains no more is the 'dead faith' which condemns rather than justifies (Ja 2[14–26]). Abraham, beyond the 'belief that God is,' recognized what God is and yielded Him a loyal trust, which carried the whole man with it and determined character and action. His faith included sense (*a*) of *pisteuō* (which is inherent in the Hebrew verb 'believe') along with sense (*b*). In this combination lies the rich and powerful import of NT 'believing'; it is a spiritual apprehension joined with personal commitment—the recognition of truth and the placing of trust in the Unseen. In this twofold sense 'man believes with his heart and so is justified' (Ro 10[10]). Those familiar with the spirit of the OT could not use the word *pistis* in relation to God without attaching to it, besides the rational idea of supersensible apprehension, the warmer consciousness of moral trust and allegiance bound up with it already in human relationships.

(2) Contact with Jesus Christ gave to the word a greatly increased use and a heightened power. 'Believing' meant to Christ's disciples something new and different since they had Him to believe in; and 'believers' became a common name for His followers (cf Ac 2[44] 5[14] 15[5] 19[18], 1 Co 14[22], 1 Th 1[7], 1 Ti 4[12]). Some members of the Church seem to have been given a special endowment of the capacity for this 'faith' (cf 1 Co 12[9]). Faith was Jesus' principal and constant demand from men; He preached and did mighty works so as to elicit and direct it. That faith which was attracted initially by 'signs and wonders' could be a stepping-stone to a much higher faith in the Person and teaching of God's Messiah. The miracles of Jesus were conditioned by one injunction: 'Only believe!' 'All things are possible to him who believes' (Mk 9[23]). There was a faith in Jesus, real so far as it went but not sufficient for true discipleship, since it attached itself to His miracle-working power and failed to recognize His character and spiritual aims (cf Jn 2[23] 4[48] 6[14] 7[31] 8[30] 11[45] 12[11]); this Jesus rejected. Closely related to it, though more active, is the faith that calls him 'Lord' and 'removes mountains' in His name, but which Jesus disowns because it does not in love do the Father's will (Mt 7[21ff], 1 Co 13[2]). Following the Baptist, Jesus begins His ministry with the summons: 'Repent, and believe in the Gospel,' *i.e.* the good news that 'the Kingdom of God is at hand' (Mk 1[15]). Like Moses, He expects Israel to recognize His mission as from God, showing 'signs' which belief will see as proof (cf Jn 2[11] 3[2] 4[54] 6[14] etc.; Ac 2[22], He 4[2]). As Jesus' teaching unfolds, it becomes clear that He requires an unparalleled faith in Himself along with His message, that the Kingdom of God of which He speaks centres in His Person and that in fact He is Himself 'the word' of God He brings, the light and life whose coming He announces, 'the bread from heaven' that He has to give to a starving world (Jn 6[33ff] 8[12] 11[25] 14[6]). For those 'who received him,' who 'believed in his name' in this complete sense, faith acquired an entirely new scope; it signified the unique attachment which gathered around the Person of Jesus—a human trust, in its purity and intensity such as no other man had ever elicited, which grew up into and identified itself with its possessor's belief in God, transforming that belief in doing so, and which drew the whole being of the believer into the will and life of His Master. When Thomas hails Jesus as 'My Lord and my God!' (Jn 20[28]), he has believed. The two faiths are now welded inseparably. The Son is known through the Father and the Father through the Son, and Thomas gives his full allegiance to both in one. As Jesus was exalted, God in the same degree became nearer to these men; and their faith in God became richer in content and more firmly grasped. So sure and direct was the communion with the Father opened by Jesus to His disciples, that the word 'faith,' as commonly used, failed to express it. 'Henceforth you know him (the Father) and have seen him,' says Jesus (Jn 14[7]). The Fourth Evangelist uses the verb 'believe' more than any other NT writer (seventy-nine times), but the related noun 'faith' is found only once in the Johannine Gospel and Epistles (1 Jn 5[4]). To know God is the Christian's highest privilege. The departure of Jesus and the shock and trial of His death were needed in order to perfect the disciples' faith (Jn 16[7]), removing its earthly supports and breaking its links with all materialistic Messianism. As Jesus 'goes to the Father,' they realize that He and the Father are

one. Their faith rests no longer, in any degree, on a Christ 'regarded from a human point of view' (2 Co 5[16]). They are ready to receive and to be empowered by the Spirit whom Jesus sends to them 'from the Father.' Jesus is henceforth linked with the spiritual and eternal order. To the faith which thus acknowledges Him He gives the benediction: 'Blessed are those who have not seen and yet believe' (Jn 20[29]; cf 1 P 1[8]). To define this specific faith a new grammatical construction appears in NT Greek. One does not simply believe Jesus or believe on or in Him; one commits himself to Him or His name (which contains the import of His Person and office) as in Mt 18[6], regularly in John (1[12] 2[11, 23] 3[16, 18, 36] 4[39] 6[29, 35]) and also in Paul (Ro 10[14], Gal 2[16], Ph 1[29]). The construction suggests a kind of belief that causes the disciple to come to Him, realizing what He is. That the mission of Jesus Christ was an appeal for faith, with His own Person as its chief ground and matter, is assumed in Jn 20[21]: 'These (signs) are written that you may believe that Jesus is the Christ, the Son of God, and that believing you may have life in his name.' Christian faith is the decisive action of the whole inner man—understanding, feeling, and will; it is the trustful and self-surrendering acknowledgment of God in Christ. For Paul faith springs from the intimate relationship between the believer and the Lord Jesus Christ. It leads to perfect trust in God and so produces obedience to His commands. Faith 'justifies,' as the works of the Law could never do (Ro 1[17]). In the Epistle to the Hebrews (11[1]) faith is seen as firm knowledge of a reality which stands behind the evidence of the physical senses and which is supremely demonstrated in Jesus Christ.

(3) Further, Jesus called on the world to believe the good news of His mission of redemption. This role, suggested in OT prophecy and related to His birth (Lk 1[68-79]) and baptism (Jn 1[29]), Jesus connected with His death throughout His ministry (cf Mk 2[19f] 8[31] 9[12] 10[38, 45] 12[1-12], Lk 13[32f] 18[25], Jn 2[19-22] 3[14f]). The words of Jesus at the Last Supper (Mk 14[22-25]||Mt 26[26-29]||Lk 22[15-20]; cf 1 Co 11[23-25]) make it clear that He regarded His death as the culmination of His mission. He stands ready to offer His 'blood' to ratify 'the [new] covenant' under which 'forgiveness of sins' will be universally guaranteed (cf Jer 31[31-34]). Having concentrated on Himself the faith of men, giving to it thereby a new meaning and power, He finally directed that faith to a consideration of His death. In the early Church it was seen that by His death Jesus had 'entered into his glory' and 'received from the Father the promise of the Spirit,' in the strength of which His followers are commissioned to 'preach to all nations repentance and forgiveness of sins' (Ac 2[22-38]; cf Lk 24[46-48]). The Apostles understood and proclaimed their Master's death as the pivotal point of the relations between God and man that centre in Christ. The cross was regarded as the means of deliverance from sin and the revelation of God's saving purpose toward the race (Ac 3[18f] 20[28], 1 Co 1[18-25], 2 Co 5[14-21], 1 P 3[18], Rev 1[5f]). Faith in the resurrection of Jesus was logically antecedent to faith in His sacrificial death, for His rising from the dead set His dying in its true perspective (Ac 4[10-12]), as a full expiation for the sins of men (He 2[9]; Ro 4[25]). To 'confess with one's lips that Jesus is Lord and believe in one's heart that God raised him from the dead' was therefore to fulfil the essential conditions of Christian salvation (Ro 10[9]), since the resurrection and exaltation of Jesus give assurance of the peace with God won by His perfect sacrifice (He 7[25] 9[11-14] 10[19, 22]). His rising from the dead is the vindication of His divine Sonship and verification of His claims on man's allegiance (Ro 1[4], Ac 2[36], 1 P 1[21]). It is the guarantee of 'the redemption of our bodies' and the consummated salvation that is in Christ Jesus both for the individual and the Church (1 Co 15[20-28], Ro 8[15-23], Eph 1[16-23], Ac 17[31]). The Christian faith is to 'believe that Jesus died and rose again' (1 Th 4[14])—that in dying He atoned for human sin and in rising He abolished death. St. Paul was the chief exponent and defender of this 'word of the Cross' which is at the same time 'the word of faith' (Ro 10[8]). Its various aspects and issues appear under the terms (q.v.) JUSTIFICATION, ATONEMENT, EXPIATION, GRACE, LAW (in NT). The redeeming work of Jesus is also focused in the Cross in 1 Peter, I John, and Revelation. According to the whole purport of the NT, the forgiving grace of God there meets the sin of mankind. Faith is the hand reached out to accept God's gifts of mercy extended from the cross of Christ. The faculty of faith, understood in its fundamental meaning as the spiritual sense and consciousness of God, is in no wise narrowed or diverted when it fixes itself on 'Jesus Christ and him crucified,' for, as St. Paul insists, 'God shows his love for us in that Christ died for us,' and 'God was in Christ reconciling the world to himself.' The 'glory of God' shines in our hearts, His nature becomes for the first time fully revealed, and faith is complete and satisfied when God is beheld 'in the face of Christ' (Ro 5[8], 2 Co 4[6] 5[18-21]). G. G. F.—H. M. S.

FAITHLESS.—Wherever this word occurs in AV, it means, not untrustworthy, but unbelieving, just as in the *Merchant of Venice* Shylock is called 'a faithless Jew,' simply because he was an unbeliever in Christ.

FALCON.—RV and RSV translation of *'ayyāh* in Lv 11[14] (AV 'kite'), Job 28[7] (AV 'vulture'). In Dt 14[13] RV has 'falcon,' while AV and RSV have 'kite.' See KITE.

FALL.—The story of the Fall in Gn 3 is the immediate sequel to the account of man's creation with which the Yahwistic document opens (see CREATION). It tells how the first man and woman, living in childlike innocence and happiness in the Garden of Eden, were tempted by the subtle serpent to doubt the goodness of their Creator, and aim at the possession of forbidden knowledge by tasting the fruit of the one tree of which they had been expressly charged not to eat. Their transgression was speedily followed by detection and punishment; on the serpent was laid the curse of perpetual enmity between it and mankind; the woman was doomed to the pains of child-bearing; and the man to unremitting toil in the cultivation of the ground, which was cursed on account of his sin. Finally, lest the man should use his newly acquired insight to secure the boon of immortality by partaking of the tree of life, he was expelled from the garden, which appears to be conceived as still existing, though barred to human approach by the cherubim and the flaming sword.

It is right to point out that certain incongruities of representation suggest that one or more originally separate traditions have been combined in the source from which the passage is taken (J). The chief difficulty arises in connexion with the two trees on which the destiny of mankind is made to turn. In 2[9] the tree of life and the tree of the knowledge of good and evil grow together in the midst of the garden; in 2[17] the second alone is made the test of man's obedience. But ch. 3 (down to v.[22]) knows of only one central tree, and that obviously (though it is never so named) the tree of knowledge. The tree of life plays no real part in the story except in 3[22, 24]; and its introduction there creates embarrassment; for if this tree also was forbidden, the writer's silence regarding the prohibition is inexplicable, and if it was not forbidden, can we suppose that the Divine prerogative of immortality was placed within man's reach during the period of his probation? While these incongruities may, as some think, indicate a two-fold recension of the Paradise story, they more probably arise for the most part out of the long history of oral transmission through which the material passed before reaching the hand of the Yahwist, in the course of which originally disparate traditions were combined without always being harmonized. We may suppose that the tree of knowledge and the tree of life represent traditions of different origin, the latter playing a relatively minor role in the narrative as the Yahwist has shaped it.

It is unnecessary to regard this profoundly suggestive narrative as a literal record of a historic occurrence. It is, rather, supra-historical: a theological explanation of creation and of man's predicament. It is probable that the Yahwist has made use of mythological traditions current among the ancient Semites and, purging them of mythological traits and shaping them for his own purposes, has made of them a vehicle for setting forth in terms appropriate to Israel's faith the purposes of God for man in Creation, and the manner in which man betrayed those purposes. It is true that no complete extra-Biblical parallel to these stories has yet been discovered; the utmost that can be claimed is that particular elements or motives of the Biblical story seem to be reflected in some of the Babylonian myths, and still more in the religious symbolism displayed on the monuments (tree of life, serpent, cherubim, etc.). Reminiscences of similar myths are to be seen elsewhere in the Bible (*e.g.* Is 14^{4-21}, Ezk 28^{1-19}). These coincidences are sufficiently striking to suggest the inference that a mythical account of man's original condition and his fall existed in Babylonia, and had obtained wide currency in the East. It is a reasonable conjecture that such a myth, 'stripped of its primitive polytheism, and retaining only faint traces of what was probably its original mythological character, formed the material setting which was adapted by the [Biblical] narrative for the purpose of exhibiting, under a striking and vivid imaginative form, the deep spiritual truths which he was inspired to discern' (Driver). These spiritual truths, in which the real significance of the narrative lies, we must endeavour very briefly to indicate.

(1) The story offers, on the face of it, an explanation of the outstanding ills that flesh is heir to: the hard, toilsome lot of the husbandman, the travail of the woman and her subjection to man, the universal fate of death. These evils, it is taught, are inconsistent with the ideal of human life, and contrary to the intention of a good God. Man, as originally created, was exempt from them; and to the question, Whence came they? the answer is that they are the effect of a Divine curse to which the race is subject; though it is to be noted that no curse is pronounced on the first pair, but only on the *serpent* as the organ of temptation, and the *ground* which is cursed *for man's sake*.

(2) The consequences of the curse are the penalty of a single sin, by which man incurred the just anger of God. The author's conception of sin may be considered from two points of view. Formally, it is the transgression of a Divine commandment, involving distrust of the wisdom and goodness of the Almighty, and breaking the harmony which had subsisted between man and his Maker. The process by which these evil thoughts are insinuated into the mind of the woman is described with a masterly insight into the psychology of temptation which is unsurpassed in literature. A reason for the Divine injunction, and a reason for man's transgression of it, is clearly suggested in the story. To eat of the tree would make man like God, knowing good and evil; and God does not wish man to be like Himself. The essence of sin is therefore presumption, an overstepping of the limits of creaturehood, and an encroachment on the prerogatives of the Deity. Nevertheless, the Yahwist does not seem greatly interested in discussing these questions. As he tells the story, the fact that God gave the command is its sufficient reason; it is not to be argued with or discussed. As one scholar (von Rad) says, it was the serpent who first suggested that it was possible to discuss it. According to the narrative, then, the condition of life in Paradise is unquestioning obedience to the Divine command.

(3) What, then, is meant by the 'knowledge of good and evil,' which was acquired by eating of the tree? Does it mean simply an enlargement of experience such as the transition from childhood to maturity naturally brings with it, and of which the feeling of shame (3^{7}) is the significant index? Or is it, as has generally been held, the experimental knowledge of moral distinctions, the awaking of the conscience, the faculty of discerning between right and wrong? While it is not easy to say which of these interpretations expresses the thought in the mind of the writer, it is in accordance with Hebrew idiom to hold that knowledge of good and evil is equivalent to knowledge in general. Though it is not entirely certain that that is the sense in which the phrase is here used, there is nothing to show that it refers to the moral sense; and the fact that neither of the ways in which the newly acquired faculty manifests itself (the perception of sex, and insight into the mystic virtue of the tree of life, v.[22]) is a distinctively ethical cognition, rather favours the opinion that the knowledge referred to is the power to discern the secret meanings of things and utilize them for human ends, regardless of the will and purpose of God —the knowledge, in short, which is the principle of a godless civilization. The idea may be that succinctly expressed by the writer of Ecclesiastes: 'God made man upright; but they have sought out many devices' (Ec 7^{29}).

(4) One specific feature of the story remains to be considered, namely, the rôle assigned to the serpent, and his character. The identification of the serpent with the devil appears first in the Apocryphal literature (Wis 2^{24}); in the narrative itself he is simply the most subtle of the creatures that God has made (3^{1}), and there is not the slightest reason to suppose that he is there regarded as the mouthpiece of the evil spirit. At the same time it is impossible to escape the impression that the serpent is conceived as a malevolent being, designedly insinuating suspicion of God into the minds of our first parents, and inciting them to an act which will frustrate the Divine purpose regarding mankind. There is thus a certain ambiguity in the representation of the serpent, which may have its source in some more primitive phase of the story; but which also points the way, under the influence of a deeper apprehension of the nature of moral evil than had been attained in the time of the writer, to that identification of the serpent with the Evil One which we find in the NT (Ro 16^{20}, Rev 12^{9} 20^{2}). In the same way, and with the same justification, the reflection of later ages read into the curse on the serpent (v.[15]) the promise of ultimate redemption from the power of evil through the coming of Christ. Strictly interpreted, the words imply nothing more than a perpetual antagonism between the human race and the repulsive reptiles which excite its instinctive antipathy. It is only the general scope of the passage that can be thought to warrant the inference that the victory is to be on the side of humanity; and it is a still higher flight of religious inspiration to conceive of that victory as culminating in the triumph of Him whose mission it was to destroy the works of the devil.

J. S.—**J. Br.**

FALLOW-DEER.—This word occurs in the AV among the clean animals (Dt 14^{5}), and in the list of game furnished for Solomon's daily table (1 K 4^{23}). In each list *'ayyāl*, *ṣᵉbhî*, and *yaḥmûr* occur in the same order. The first is correctly translated, in EV, 'hart' (see HART). The second is incorrectly translated in AV 'roebuck,' and correctly in RV and RSV 'gazelle' (see GAZELLE). The third is incorrectly translated in AV 'fallow-deer,' and correctly in RV and RSV 'roebuck' (see ROE, ROEBUCK).

FAMILIAR.—The expression 'familiar spirit' was taken into the AV from the Geneva Version, as the translation of Hebrew *'ôbh* (RSV 'medium'). See MAGIC, etc. The word is also used as a substitute in Jer 20^{10}, 'All my familiars watched for my halting' (RV, RSV 'familiar friends,' Hebrew 'men of my place').

FAMILY.—1. Character of the family in OT.—'Family' in the OT has a wider significance than that which we usually associate with the term. The word translated 'household' (Gn 7^{1}) approaches most nearly to our word 'family': but a man's 'household' might consist of his mother; his wives and wives' children; his concubines and their children; sons-in-law and

daughters-in-law, with their offspring; illegitimate sons (Jg 11[1]); dependants and aliens; and slaves of both sexes. Polygamy was in part the cause of the large size of the Hebrew household; in part the cause of it may be found in the insecurity of early times, when safety lay in numbers, and consequently not only the married sons and daughters dwelt, for the sake of protection, with their father, but remote relatives and even foreigners ('the sojourners within your gates') would attach themselves, with a similar object, to a great household. The idea of the family sometimes had an even wider significance, extending to and including the nation, or even the whole race of mankind. Of this a familiar illustration is the figure of Abraham, who was regarded as being in a very real sense the father of the nation. So also the same feeling for the idea of the family is to be found in the careful assigning of a 'father' to every known nation and tribe (Gn 10). From this it is easily perceived that the family played an important part in Hebrew thought and affairs. It formed the base on which the social structure was built up; its indistinguishable merging into the wider sense of clan or tribe indicates how it affected the political life of the whole nation.

Polygamy and bigamy were recognized features of the family life. From the Oriental point of view there was nothing immoral in the practice of polygamy. It was the means of ensuring the survival of the family by providing male children. Concubinage with slave women had the same object. Female slaves were in every respect the property of their master, and became his concubines, except in certain cases, when they seem to have belonged exclusively to their mistress, and could not be appropriated by the man except by her suggestion or consent (Gn 16[2f]). The slave-concubines were obtained as booty in time of war (Jg 5[30]), or bought from poverty-stricken parents (Ex 21[7]); or, possibly, in the ordinary slave traffic with foreign nations. In addition to his concubines a man might take several wives, and from familiar examples in the OT it seems that it was usual for wealthy and important personages to do so; Abraham, Jacob, David, Solomon, occur as instances. Elkanah, the husband of Hannah and Peninnah, is an interesting example of a man of no particular position who nevertheless had more than one wife; this may be an indication that bigamy, at least, if not polygamy, was not confined to the very wealthy and exalted. At all events, polygamy was an established and recognized institution from the earliest times. The gradual evolution in the OT of monogamy as the ideal is therefore of the highest interest. The earliest codes attempt in various ways to regulate the custom of polygamy. The Deuteronomic code in particular actually forbids kings to multiply wives (Dt 17[17]); this is the fruit, apparently, of the experience of Solomon's reign. In the prophetic writings the note of protest is more clearly sounded. Not only Adam but also Noah, the second founder of the human race, represents monogamy, and on that account recommends it as God's ordinance. It is in the line of Cain that bigamy is first represented, as though to emphasize the consequences of the Fall. Reasons are given in explanation of the bigamy of Abraham (Gn 16) and of Jacob (29[23]). Hosea and other prophets constantly dwell upon the thought of a monogamous marriage as being a symbol of the union between God and His people; and denounce idolatry as unfaithfulness to this spiritual marriage-tie.

2. Position of the wife.—Side by side with the growth of the recognition of monogamy as the ideal form of marriage, polygamy was practised even as late as NT times. The natural accompaniment of such a practice was the subordinate position of the wife. She was ordinarily regarded as a piece of property, as the wording of the Tenth Commandment testifies. Also her rights and privileges were necessarily shared with others. The relative positions of wives and concubines were determined mainly by the husband's favour. The children of the wife claimed the greater part, or the whole, of the inheritance; otherwise there does not seem to have been any inferiority in the position of the concubine as compared with that of the wife, nor was any idea of illegitimacy, in our sense of the word, connected with her children.

The husband had supreme authority over the wife. He was permitted by the Deuteronomy code to divorce her with apparently little reason. The various passages (Dt 22[13, 19, 28f], Is 50[1], Jer 3[8], Mal 2[16]) referring to and regulating divorce, indicate that it was of frequent occurrence. Yet wives, and even concubines who had been bought in the first place as slaves, might not be sold (Ex 21[7–11], Dt 21[14]). Indeed, the Law throughout proves itself sympathetic towards the position of the wife, and desirous of improving her condition (Dt 21[10–17]). This very attitude of the Law, however, indicates that there was need of improvement. The wife seems to have had no redress if wronged by the husband; she could not divorce him; and absolute faithfulness, though required of the wife, was not expected of the husband, so long as he did not injure the rights of any other man.

The wife, then, in theory was the mere chattel of her husband. A woman of character, however, could improve her situation and attain to a considerable degree of importance and influence as well as of personal freedom. Thus we read not only of Hagars, who were dealt hardly with and were obliged to submit themselves under the hands of their masters and rivals, but also of Sarahs and Rebekahs and Abigails, who could act independently and even against the wishes of their husbands in order to gain their own ends. And the Book of Proverbs testifies to the advantage accruing to a man in the possession of a good wife (19[14] 31[10ff]), and to the misery which it is in the power of a contentious woman to inflict (19[13] etc.). The position the wife enjoyed depended in part on her own gifts, but also, no doubt, on the strength of her own family to see that she was not wronged.

3. Children.—In a household consisting of several families, the mother of each set of children would naturally have more to do with them than the father, and the maternal relationship would usually be more close and affectionate than between the father and his children. Although it was recognized to be disastrous for a household to be divided against itself, yet friction between the various families could hardly have been avoided. 'One whom his mother comforts' (Is 66[13]) must have been a sight common enough—a mother consoling her injured son for the taunts and blows of her rivals' children. Thus the mother would have the early care and education of her children under her own control. The father, on the other hand, had complete power over the lives and fortunes of his children, and would represent to them the idea of authority rather than of tenderness. He it was who arranged the marriage of his sons (Gn 24[4] 28[2], Jg 14[2]), and he had the right to sell his daughters (Ex 21[7]). The father seems even to have had powers of life and death over his children (Jg 11[39]); and the Law provided that an unworthy son might be stoned to death upon the accusation of his parents (Dt 21[18–21]). The Decalogue commands respect towards both parents, and death is the penalty laid down for striking (Ex 21[15]) and for cursing (Ex 21[17], Lv 20[9]) father or mother. See also CHILD.

4. Family duties.—The claims of the family upon the various members of it were strongly felt. Many laws provide for the vengeance and protection of the injured and defenceless by their next-of-kin, called the *gō'ēl*. Brothers were the guardians of their sisters (Gn 34). A childless widow could demand, though not enforce, re-marriage with her brother-in-law (Dt 25[5–10]). Boaz, after a nearer relative had renounced his rights, performed the duty of a *gō'ēl* to Ruth. Lv 20[21] prohibits a man from marrying his brother's wife, but this is to be regarded as the general rule to which Dt 25[5ff] gives the exception, for levirate marriage seems to have been practised at the time of Christ (Mt 22[23ff]). In the OT

its purpose appears to be the preservation of the particular branch of the family rather than the advantage of the widow herself, though that end was also served. In any case it illustrates the strong sense of duty towards the family as a whole.

Children owed obedience and respect to their parents. Even a married man would consider himself still under the authority of his father, whether living with him or not; and his wife would be subject to her father-in-law even after her husband's death.

To an Israelite, 'family' conveyed the notions of unity, security, order, and discipline. These conceptions were nourished by the religious customs and observances in the home. In the patriarchal times, the head of each family offered sacrifice on his own altar. The Passover was celebrated as a family rite. Later it became the responsibility of the family to see that all its members were instructed in the Law of Y" (Dt 6^{7}). Such observances, no doubt, helped to bind the members of the family in close religious and spiritual sympathies. The strong bonds of kinship and common concern tended to keep the family together, and contributed to the survival of the Jewish nation through centuries of political insignificance. E. G. R.—A. G. McL.

FAMINE.—In Palestine, famine is usually due to failure of the rainfall (Lv 26^{19}, Am 4^{6f}). Both crops and pasturage depend on the proper amount falling at the right time, the 'early rain' in October–November, the 'latter' in March–April. Its importance and uncertainty caused it to be regarded as the special gift of God (Dt 11$^{11, 14}$). Accordingly famine is almost always a direct judgment from Him (1 K 17^{1}, Ezk 5, and continually in the Prophets; Ja 5^{17}). Hence we find it amongst the terrors of the eschatological passages of NT (Mk 13^{8}, Rev 18^{8}). The idea is spiritualized in Am 8^{11} 'a famine of hearing the words of the Lord.' In Egypt, famine is due to the failure of the annual inundation of the Nile, which is ultimately traceable to lack of rain in the Abyssinian highlands of the interior.

Crops may be destroyed by other causes—hail and thunder-storms (Ex 9^{31}, 1 S 12^{17}); locusts and similar pests (Ex 10^{15}, Jl 1^{4}, Am 4^{9}). Further, famine is the usual accompaniment of war, the most horrible accounts of famines being connected with sieges (2 K 6^{25} 25^{3}, Jer 21^{9}, La 4^{10}).

These passages should be compared with the terrible description of Dt 28$^{49-57}$, and with Josephus' account of the last siege of Jerusalem (*BJ* v. x. 3 [429 ff]). So in Rev 6^{5} scarcity, connected with the black horse, follows on bloodshed and conquest; but a maximum price is fixed for wheat and barley, and oil and wine are untouched, so that the full horrors of famine are delayed. A natural result of famine is pestilence, due to improper and insufficient food, lack of water, and insanitary conditions. The two are frequently connected, especially in Ezekiel and Jeremiah (1 K 8^{37}, Jer 21^{9}, Lk 21^{11} [not Mt 24^{7}]).

Famines are recorded in connexion with Abraham (Gn 12^{10}) and Isaac (26^{1}). There is the famous seven years' famine of Gn 41 ff, which included Syria as well as Egypt. It apparently affected cereals rather than pasturage, beasts of transport being unharmed (cf *per contra* 1 K 18^{5}). The device by which Joseph warded off its worst effects is illustrated by Egyptian inscriptions. In one, Baba, who lived *about* the time of Joseph, says: 'I collected corn, as a friend of the harvest-god, and was watchful at the time of sowing. And when a famine arose, lasting many years, I distributed corn to the city each year of famine' (see Driver, *Genesis*, p. 346). Other famines, besides those already referred to, are mentioned in Ru 1^{1}, 2 S 21^{1}. The famine of Ac 11^{28} is usually identified with one mentioned by Josephus (*Ant.* xx. ii 5 [51–53], v. 2 [101], which is dated A.D. 45. But famines were characteristic of the reign of Claudius (Suetonius mentions 'assiduae sterilitates'), so that the exact reference remains uncertain. C. W. E.

FAN.—The fan of Scripture (Is 30^{24}, Mt 3^{12}, Lk 3^{17}) is the five- or six-pronged wooden **winnowing-fork** (so RSV) for which see AGRICULTURE, 3. The corresponding verb is rendered '**winnow**,' Is 30^{24}, Ru 3^{2}, but 'fan' elsewhere (RSV has 'winnow' throughout); the **fanners** of Jer 51^{2} (AV, RVm) are the 'winnowers' (RSV). Fanning or winnowing is a frequent figure for the Divine sifting and chastisement, Jer 4^{11} 15^{7} etc.

FANG.—See GRINDER.

FARTHING.—See MONEY, 7.

FASTING.—1. In the OT.—The discipline of fasting, in the sense of abstinence from food, was widespread throughout the religions of the world. The earliest motive was possibly the fear of demons, who were thought to exercise power over men in the process of eating. In the OT, fasting is sometimes a preparation for theophany, as in the case of Moses (Ex 34^{28}, Dt 9^{9}) and Daniel (9^{3} 10$^{2f, 12}$). But more generally, it is a sign of humility before God, as is clearly shown in the parallel expression 'to afflict the soul,' *i.e.* 'to humble oneself' in Lv 16$^{29, 31}$ 23$^{27, 32}$, Nu 29^{7} 30^{13}; cf Ps 35^{13}, Is 58$^{3, 5}$. It accompanied mourning (1 S 31^{13}; cf Zec 7^{3}), or repentance (1 K 21^{27}). In times of necessity or danger, it was appropriate for an individual or for the whole community to fast (2 S 12^{16ff}, Ps 35^{13} 69^{11}, Jg 20^{26}, 1 S 7^{6}, Jer 36$^{6, 9}$ etc.). Fasting, so to speak, reinforced urgent prayer. How seriously it might be taken up, to the extent that an earnest man of prayer might become weak and thin through lack of nourishment, is shown by Ps 109^{24}.

After the fall of Jerusalem in 586 B.C, fasting took on a new importance, and became one of the special notes of the religious life of the period that followed. It is probable that a form of public confession can be found within the prophecies that are collected under the name of Isaiah (ch. 59), while the previous chapter (58) deals with the question, 'Why have we fasted and thou seest not?' Evidently the fasts are those which commemorated the fall of Jerusalem, for which the five laments of the book of Lamentations had probably been composed, and of which there is plain evidence in Zec 7$^{3-5}$ 8^{9}. But most important of all was the annual Day of Atonement (Lv 16^{29ff} 23^{27ff}, Nu 29^{7}, 'the Fast' of Ac 27^{9}), designed to cover the otherwise unexpiated sins of the whole people for the whole year (*i.e.*, of course, those sins for which atonement was possible). A prophetic protest was raised against the easy assumption that fasts were an *opus operatum* (Jer 14^{12}, Is 58^{12}, Zec 7^{5ff} 8^{19}, Jl 2^{13}).

In the Judaism of NT times and after, the Jews were noted, as a people, for their fasts. There is frequent mention of fasting in the intertestamental literature. Occasional voices insisted on the uselessness of fasting without a corresponding inner disposition (Sir 34^{26}), but the Pharisees made much of it (Ps Sol 3^{8}, Mk 2^{18}, Lk 18^{12}), and regarded fasting as a work of merit. It became the custom of the specially devout to fast on Mondays and Thursdays, though there is no evidence that this was binding on all. In addition to the fasts of the calendar, fasts might be appointed by authority in case of famine, plague or war. If a man undertook a fast, his fast took precedence of sacrificial offerings and was regarded as more efficacious than almsgiving. 'He who prays and gets no answer must fast.'

2. In the NT.—Jesus laid down no specific injunctions to fast. But while He denounced the ostentation of the Pharisees, He seems to have assumed that His disciples would fast (Mt 6^{16f}). He introduced a new note, emphasizing secrecy, as though to stress that fasting is not so much a meritorious work as a sign of a contrite heart. His own fasting in the wilderness was for a period of forty days, and took place not *before* revelation, as with Moses, but *after* His baptismal experience, as a preparation for His messianic office. It is not stated that He fasted during His public ministry, but His general conduct makes it likely that He observed the public fasts. His most striking teaching is given in relation to the fasting of the disciples of John the Baptist (Mk 2^{18f}).

There, it is made plain that while fasting is excluded in the presence of the bridegroom, yet between the breaking in of the Kingdom (in His own life and death) and the End (*i.e. between the times*), fasting will have its place.

There is no NT evidence that fasts were part of the *regular* life of the apostolic church. But St. Paul certainly undertook fasts (2 Co 6^5 11^{27}), which may have been private; and there was a tendency for the Church to practise spontaneous fasting at times of special importance, as when Barnabas and Saul were ordained for their missionary labours (Ac 13^3), and when elders were appointed (14^{23}). The absence of any *problem* of fasting in the letters of St. Paul suggests that it was not a prominent question in the hellenistic churches. It may well have been comprehended in the Apostle's general teaching on Christian askesis or training in 1 Co 9^{24}.

D. R. J.

FAT.—See FOOD, **10**, SACRIFICE AND OFFERING, **12**.

FAT.—The same word as **vat** (RSV), a large vessel for holding liquids, but in OT and NT only in connexion with the making of wine. See WINE AND STRONG DRINK, **2**.

FATE.—The word 'fate' is found a number of times in RSV, but an examination of the context shows that nowhere is a blind fatalism presented. Sometimes the reference is to the common lot of men, and sometimes to the doom which men bring on themselves or which is brought on the community. Cf Nu 16^{29} (AV, RV 'common death'), Ps 49^{13} (AV, RV 'way') 81^{15} (AV, RV 'time'), Ec 2^{14} 9^{2f} (AV, RV 'event') 3^{19} (AV, RV 'that which befalleth'), Jer 49^{20} 50^{15} (AV and RV quite different), La 3^{50} (AV, RV 'because of').

FATHER.—See FAMILY, GENEALOGY, **1**.

FATHERHOOD OF GOD.—See GOD, **12**.

FATHERLESS.—See ORPHAN.

FATHOM.—See WEIGHTS AND MEASURES.

FAUCHION (Jth 13^6 AV; RV '**scimitar**'; RSV '**sword**').—The English word denoted originally 'a broad sword more or less curved on the convex side'; but in later use and in poetry it signified a sword of any kind.

FAVOUR.—The English word 'favour' is used in AV in the modern sense of 'goodwill'; but in 'well-favoured' and 'ill-favoured' we see the older meaning of personal appearance. RSV substitutes 'lovely,' 'graceful,' 'handsome' in references to persons, and 'sleek' or 'gaunt' for animals. In Jos 11^{20} the word seems to be used in the old sense of 'mercy' (so RSV)—'that he might utterly destroy them, that they might have no favour' (AV, RV)—as in Elyot, *The Governour*, ii. 298: 'And they, which by that lawe were condemned, were put to dethe without any fauour.' For the theology of the word see GRACE.

FAWN.—See ROE, **3**.

FEAR.—In the Bible the word 'fear' is, of course, often used to connote physical or moral fear in the usual sense of these terms, but it is the phrase 'the fear of the Lord' which is particularly noteworthy. It may signify a self-regarding feeling or attitude on the part of a man who knows he has fallen short of God's requirements and fears the penalty. The more God's demands are made known, the more can a man become filled with the fear that he will never merit God's favour. So the sinner, under condemnation of the Law, is in 'bondage unto fear' (Ro 8^{15}) and, inasmuch as 'the sting of death is sin' (1 Co 15^{56}), he is also 'through fear of death . . . subject to lifelong bondage' (He 2^{15}). But 'the fear of the Lord' can have a more positive connotation, meaning reverence, religious faith, or piety. Thus Job is told by one of his friends that his 'fear' in this sense ought to be his ground of assurance (4^6). The Law-giving at Sinai, where God revealed Himself in glory and majesty, implanted this fear in the hearts of the Israelites (Dt 4^{10}); it is the response of man the creature to God the Creator, who is also God of righteousness and of judgment, and the life of obedience and faithfulness which flows from that response and gives expression to it.

Only those who in some degree know God can experience this fear; the fool who says in his heart that there is no God (Ps 14^1 53^1) knows nothing of it. Not only did the early Christians walk in the fear of the Lord (Ac 9^{31}) but there is mentioned with them a class of 'God-fearers' who were fundamentally religious, although they were not yet Christians (Ac 10^2 etc). The law of love revealed in Jesus Christ delivers men from that bondage to fear (Ro 8^5) which was represented by the Law and gives them the adoption of sons (Jn 15^{15}, Ro 8^{15}, Gal 4^{5f}); perfect love casts out fear (1 Jn 4^{18}). So men can be delivered from the fear of judgment and from the fear caused by the hard-taskmaster conception of God (Mt 25^{24}, Lk 19^{22}), but not from that attitude of reverence and awe (q.v.) which is proper for the creature before the Creator. Those who know that fear and who know also the love of God in Jesus Christ are constrained by that love to persuade others to be reconciled to God (2 Co 5^{11ff}).

J. G. T.—J. Ma.

FEARFULNESS.—The adjective 'fearful' is often used in AV in the sense, not of causing fear, but of feeling it; and 'fearfulness' always denoted the emotion of fear. Thus Mt 8^{26} 'Why are ye fearful (AV and RV; RSV 'afraid), O ye of little faith?'; Ps 55^5 'Fearfulness (AV and RV; RSV 'fear') and trembling are come upon me.' In the RV of the NT the only meaning of 'fearful' is full of fear, the Revisers, Westcott tells us, having purposely retained this use in order that 'fear,' 'fearful,' and 'fearfulness' might all agree in meaning. They have accordingly changed 'fearful sights' in Lk 21^{11} into 'terrors' (so RSV). The Revisers of the OT, however, had no such thought, and they have left the word unchanged. RSV retains 'fearfulness' in the sense of 'fear' in Ezk 4^{16} 12^{18f}, and 'fearful' in the sense of 'afraid' in Dt 20^8, Jg 7^3, Is 35^4, Jer 51^{46}.

FEASTS.—*Introductory.*—The sacred festivals of the Jews were primarily occasions of rejoicing, treated as a part of religion. To 'rejoice before God' was synonymous with 'to celebrate a festival.' In process of time this characteristic was modified, and a probably late institution, like the Day of Atonement, could be regarded as a feast, though its prevalent note was not one of joy. But the most primitive feasts were marked by religious merriment; they were accompanied with dances (Jg 21^{21}), and, as it seems, led to serious excesses in many cases (1 S 1^{13}, Am 2^7, 2 K 23^7, Dt 23^{18}). Most of the feasts were only local assemblies for acts and purposes of sacred worship; but the three great national festivals were the occasions for general assemblies of the people, at which all males were supposed to appear (Ex $23^{14, 17}$ 34^{23}, Dt 16^{16}).

I. FEASTS CONNECTED WITH THE SABBATH.—These were calculated on the basis of the sacred number 7, which regulated all the great dates of the Jewish sacred year. Thus the 7th was the sacred month, the feasts of Unleavened Bread and Tabernacles each lasted for 7 days, Pentecost was 49 days after the Feast of Unleavened Bread, Passover and Tabernacles each began on the 14th day of their respective months, and there were 7 days of holy convocation in the year.

1. The Sabbath and the observances akin to it were lunar in character (cf Am 8^5, Hos 2^{11}, Is 1^{13}, 2 K 4^{23}). The sabbath ordinances are treated in Ex 20^{11} 31^{17} as designed to commemorate the completion of creation, but Dt 5^{14f} connects them with the redemption from Egypt, and Ex 23^{12} ascribes them to humanitarian motives. On this day work of all sorts was forbidden, and the daily morning and evening sacrifices were doubled. Sabbath-breaking was punishable with death (Nu 15^{32-36}, Ex 31^{14f}). No evidence of Sabbath observance is traced in the accounts of the patriarchal age, and very little in pre-exilic records (Is $56^{2, 6}$ 58^{13}, Jer 17^{20-24}, Ezk $20^{12f. 16, 20}$). But after the Captivity the rules were more strictly enforced (Neh $13^{15, 22}$), and

in later times the Rabbinical prohibitions multiplied to an inordinate extent. See SABBATH.

2. At the **New Moon** special sacrifices were offered (Nu 28^{11-15}), and the silver trumpets were blown over them (Nu 10^{10}). All trade and business were discontinued, as well as work in the fields (Am 8^5). It appears also that this was the occasion of a common sacred meal and family sacrifices (cf 1 S $20^{5f.\ 18,\ 24}$), and it seems to have been a regular day on which to consult prophets (2 K 4^{23}).

3. The Feast of Trumpets took place at the New Moon of the 7th month, Tishri (October). See TRUMPETS.

4. The Sabbatical year.—An extension of the Sabbath principle led to the rule that in every 7th year the land was to be allowed to lie fallow, and fields were to be neither tilled nor reaped. See SABBATICAL YEAR.

5. By a further extension, every 50th year was to be treated as a **year of Jubilee,** when Hebrew slaves were emancipated and mortgaged property reverted to its owners. See SABBATICAL YEAR.

II. GREAT NATIONAL FESTIVALS.—These were solar festivals and mostly connected with different stages of the harvest. The Jews also ascribed to them a commemorative significance and traditionally referred their inauguration to various events in their national history. They were :

1. The Passover followed immediately by the **Feast of Unleavened Bread** (*Maṣṣôth*). These two feasts were of different origin (Lv 23^{5f}, Nu 28^{16f}) and Josephus distinguishes between them. *Pesaḥ* or Passover is a survival from Israel's nomadic days and *Maṣṣôth* or Unleavened Bread is a Canaanite feast of the barley harvest when unleavened cakes were eaten. For the characteristic features of these two festivals see PASSOVER.

2. The Feast of Weeks or **Pentecost** was a purely agricultural celebration. It fell in summer with the beginning of wheat harvest which followed (at least theoretically) seven weeks after cutting of first stalks of barley (see PENTECOST).

3. The Feast of Ingathering or **Tabernacles** (*Sukkôth*).—This feast eclipsed the others and was frequently referred to as ' the feast.' It would appear that in the Temple at Jerusalem where it was cut off from its close association with the vintage this autumn festival assumed the character of a New Year celebration and absorbed many Canaanite elements. At this feast the king appears to have played a leading rôle and through him and his proper discharge of the elaborate ritual God's blessing was assured to the people and the land for another year. Whatever be the precise nature of this feast ' at the turn of the year ' it seems to have been marked by thanksgiving for the harvest safely ingathered and petition for continued blessing (see TABERNACLES).

III. MINOR HISTORICAL FESTIVALS.—**1. The Feast of Purim,** dating from the Persian period of Jewish history, commemorated the nation's deliverance from the intrigues of Haman (see PURIM).

2. The Feast of Dedication (*Ḥ^{a}nukkāh*) recalled the purification of the Temple after its desecration by Antiochus Epiphanes (168 B.C.). See DEDICATION.

3. The Feast of the Wood Offering or of the Wood-carriers, on the 15th day of Abîb (April) marked the last of the nine occasions on which offerings of wood were brought for the use of the Temple (Neh 10^{34} 13^{31}).

Besides these there were certain minor feasts, alluded to in Josephus and the Apocrypha, but these do not appear to have been generally observed or to have attained any religious importance. Such are : *The Feast of the Reading of the Law* (1 Es 9^{50}, cf Neh 8^9 ; *the Feast of Nicanor* on 13th day of Adar (March) (1 Mac 7^{49} ; see PURIM) ; *the Feast of the Captured Fortress* (1 Mac 13^{50-52}).

A. W. F. B.—**J. Pn.**

FELIX, ANTONIUS.—The procurator who kept the Apostle Paul in prison for two years, either in hope of a bribe or as a favour to ' the Jews ' (Ac 24^{26f}). His commission originally to Samaria was extended in A.D. 52 to include the whole of Palestine less four Galilean cities assigned to Agrippa II. An ex-slave and presumably a Greek, he belonged to the new bureaucracy staffed mostly by freedmen whom the emperor Claudius found more dependable than the Roman knighthood for administering his affairs. To his brother Pallas, one of the three powerful freedmen who administered the government, he must have owed his appointment as he did later his reprieve (see FESTUS). The snobbish Tacitus found in the slave origin of Felix the source of his alleged cruelty and tyranny (*Hist.* v. 9 ; *Ann.* xii. 54). Felix was ruthless. But even to men of moderation ruthlessness must have appeared to be the only means by which to cope with the rising tide of Messianism. According to Josephus, ' Of the brigands [the standard term for Zealot patriots] whom he crucified, and of the common people who were convicted of complicity with them and punished by him, the number was incalculable ' (*BJ* II. xiii. 2 [253]). Yet when numbers are specified they may even suggest moderation. Thus of the ' 30,000 ' who are said to have gathered at the instigation of an Egyptian prophet on the Mount of Olives for a miraculous assault on Jerusalem, the alleged casualties totalled only 400 killed and 200 captured. In his handling of the riots at Caesarea there was a needless slaughter and plunder of Jews, which but for the entreaty of his brother Pallas could have entailed his own serious punishment (*Ant.* xx. viii. 7, 9 [177, 182] ; cf *BJ* II. xiii. 7 [270]). But here too Felix knew when to check his soldiers and he left decisions with the Emperor. His endeavour to crush Messianism failed. Through treachery he caught and sent to Rome a patriotic leader named Eleazar ben Dinai who ' for twenty years ' had terrorized the foes of independence ; but the more he attempted to repress such ' brigands,' the more their movement spread (*BJ* II. xii. 4 [235] ; xiii. 2 [253] ; *Ant.* xx. vi. 1 [121] ; viii. 5 [161]). Driven under cover, extremer nationalists, the *Sicarii* (' men of the dagger '), now had recourse to wholesale assassinations. Their chief foes were the pro-Roman aristocracy (*BJ* II. xiii. 3 f [254 ff] ; *Ant.* xx. viii. 6–9 [167 ff]). Their first victim was the high-priest Jonathan, whose recommendation had led to Felix's appointment as procurator of Judaea. That Felix himself instigated the murder is dubious : although Josephus asserts it in his *Antiquities,* he fails to make the charge in his earlier work. Nevertheless, some friction between the high-priest as governor and a procurator as ruthless as Felix was inevitable (see PROCURATOR). Thus it appears that the prosecuting attorney at the trial of the Apostle Paul could hardly have chosen more ironical words with which to address Felix than those imputed to him by the author of Acts, ' through you we enjoy much peace ' (Ac 24^2). He had failed to achieve even the Oriental sort of ' peace ' —the levelling of opposition. His ineptitude appears further in selecting for his third marriage a certain Drusilla, mentioned in Ac 24^{24}. She was a Jewess, the sister of Agrippa II. At the time when Felix seduced her she was the wife of Azizus, the Judaizing king of Emesa. Such conduct inevitably fed the spirit of revolt.

J. S. K.

FELLOW.—This English word is used in AV with the meaning either (1) of companion, or (2) of person. Thus (1) Ps 45^7 ' God, thy God, hath anointed thee with the oil of gladness above thy fellows' (retained in RV, RSV) ; (2) Mt 26^{71} ' This *fellow* was also with Jesus of Nazareth ' (RV, RSV ' man ' ; there is no word in the Greek). Cf Tyndale's translation of Gn 39^2 ' And the LORDE was with Joseph, and he was a luckie fellowe.' Although the word when used in AV for *person* may have a touch of disparagement, nowhere is it used to express strong contempt as now.

FELLOWSHIP (Gr. *koinōnia*).—*Koinōnia* occurs some twenty times in the NT. In RSV it is translated ' fellowship ' in nine (AV, twelve ; RV, fifteen) of these occurrences. While ' fellowship ' is frequently the most satisfactory of the alternative renderings which the English language offers, it is not always adequate (as the translators have recognized) to convey the rich meanings associated with *koinōnia.* It is desirable, therefore, to give individual attention to the more important usages

of this word which is so pregnant with meaning both for early and for contemporary Christianity.

Koinōnia comes from an adjective which means 'common' and literally means a *common* participation or sharing in something. Similarly, in the NT the concrete noun *koinōnos* is used of a partner in the ownership of a fishing boat (Lk 5[10]); the verb *koinōnein* of sharing something with another, whether by way of giving (Ro 12[13], Gal 6[6]) or of receiving (Ro 15[27]); and the adjective *koinōnikos* (1 Ti 6[18]) is rendered 'generous' in RSV ('willing to communicate' in AV, RV).

1. *Koinōnia* meets us first in Ac 2[42]: 'They devoted themselves steadfastly to the apostles' teaching and (the) *fellowship*, to the breaking of bread and the prayers.' While the abstract idea of brotherly unity is clearly to be understood here, the presence of the definite article in Greek (omitted in AV, RV, RSV) may indicate that the word is here being used in a technical sense with reference to the particular socio-economic practice of the Jerusalem community of Christians. The reference probably is to that 'having all things in common' which is referred to immediately after (v.[44f]), and the nature and extent of which St. Luke explains more fully at a later stage (4[32–54]). It is possible that the *koinōnia* was the regular expression for that 'community of goods' which was a marked feature of the Christianity of the first days, and which owed its origin not only to the unselfish enthusiasm of that Pentecostal period and the expectation of the Lord's imminent return, but to the actual needs of the poorer Christians in Jerusalem, cut off from the means of self-support by the social ostracism attendant on ex-communication from the synagogue (Jn 9[22, 34] 12[42] 16[2]).

2. The type of *koinōnia* described in Ac 2 seems to have disappeared very soon, but its place was taken by an organized *diakonia*, a daily 'distribution' to the poor (6[1, 2]). When the Church spread into a larger world free from the hostile influences of the synagogue, those social conditions were absent which in Jerusalem had seemed to make it necessary that Christ's followers should have all things in common. But it was a special feature of St. Paul's teaching that Christians everywhere were members one of another, sharers in each other's wealth whether material or spiritual. In particular he pressed upon the wealthier Gentile churches the duty of taking part in the *diakonia* carried on in Jerusalem in behalf of the poor saints. In this connexion we find him in 2 Co 8[4] using the striking expression 'the *koinōnia* of the *diakonia* ('the fellowship of the ministering,' AV) to the saints.' The Christians of Corinth might have fellowship with their brethren in Jerusalem by imparting to them out of their own abundance. Hence, by a natural process in the development of speech, *koinōnia*, from meaning a common participation and sharing, came to be applied to the gifts which enabled that participation to be realized. In Ro 15[26] and 2 Co 9[13], accordingly, the word is properly enough rendered 'contribution.' And yet in the Apostolic Church it could never be forgotten that a contribution for the poor brethren was a form of Christian fellowship.

3. From the first, however, *koinōnia* had a larger and deeper sense than those technical ones on which we have been dwelling. It was out of the consciousness of a common participation in certain great spiritual blessings that Christians were impelled to manifest their fellowship in these specific ways. According to St. Paul's teaching, those who believed in Christ enjoyed a common participation in Christ Himself which bound them to one another in a holy unity (1 Co 1[9]; cf v.[10ff]). In the great central rite of their faith this common participation in Christ, and above all in His death and its fruits, was visibly set forth: the cup of blessing was a 'participation' ('communion,' AV, RV, RSVm) in the blood of Christ; the broken bread a 'participation' in the body of Christ (1 Co 10[16]). Flowing again from this common participation in Christ, there was a common participation in the Holy Spirit, for it is from the love of God as manifested in the grace of Christ that there results that 'fellowship of the Holy Spirit' which is the strongest bond of unity and peace (2 Co 13[14], cf v.[11], Ph 2[1f]). Thus the fellowship of the Christian Church came to mean a fund of spiritual privilege which was common to all the members but also peculiar to them, so that the admission of a man to the fellowship or his exclusion from it was his admission to, or exclusion from, the Church of Christ itself. When the Jerusalem apostles gave 'the right hand of fellowship' to Paul and Barnabas (Gal 2[9]), that was a symbolic recognition on their part that these missionaries to the uncircumcision were true disciples and apostles of Christ, sharers with themselves in all the blessings of the Christian faith.

4. We have seen that in its root-meaning *koinōnia* is a partnership either in giving or in receiving. Hence it was applied to Christian duties and obligations as well as to Christian privileges. The right hand of fellowship given to Paul and Barnabas was not only a recognition of grace received in common, but mutual pledges of an Apostolic service to the circumcision on the one hand and the Gentiles on the other (Gal 2[9]). St. Paul thanks God for the 'partnership' of the Philippians in the furtherance of the gospel (Ph 1[5]), and prays on behalf of Philemon that the 'sharing' of his faith may become effectual (Phn 6), *i.e.* that the Christian sympathies and charities inspired by his faith may come into full operation. It is the same use of *koinōnia* that we find in He 13[16], where the rendering in RSV is: 'Do not neglect to do good and *to share what you have*.' Here also the *koinōnia* means the acts of charity that spring from Christian faith, with a special reference perhaps to the technical sense referred to above, as a sharing of one's material wealth with the poorer brethren.

5. In all the foregoing passages the *koinōnia* seems to denote a mutual sharing, whether in privilege or in duty, of Christians with one another. But there are some cases in which the 'fellowship' evidently denotes a more exalted partnership, the partnership of a Christian with Christ or with God. This is what meets us when St. Paul speaks in Ph 3[10] of the *koinōnia* of Christ's sufferings. He means a drinking of the cup of which Christ drank (cf Mt 20[22f]), a moral partnership with the Redeemer in His pains and tears (cf Ro 8[17]). But it is St. John who brings this higher *koinōnia* before us in the most absolute way when he writes, 'Our fellowship is with the Father and with his Son Jesus Christ' (1 Jn 1[3], cf v.[6]), and makes our fellowship one with another depend upon this previous fellowship with God (v.[7], cf v.[6]). Yet, though the *koinōnia* or fellowship is now raised to a higher power, it has still the same meaning as before. It is a mutual sharing, a reciprocal giving and receiving. And in his Gospel St. John sets the law of this fellowship clearly before us when he records the words of the Lord Himself, 'Abide in me, and I in you' (Jn 15[4]). The fellowship of the human and the Divine is a mutual activity, which may be summed up in the two words *grace* and *faith*. For grace is the spontaneous and unstinted Divine giving as revealed and mediated by Jesus Christ, while faith in its ideal form is the action of a soul which, receiving the Divine grace, surrenders itself without any reserve unto the Lord.

J. C. L.—H. L. R.

FENCE.—Ps 62[3] is the only occurrence of the substantive, and probably the word there has its modern meaning (Coverdale 'hedge'). But the participle **'fenced'** (used of a city; see also DEFENCED) always means 'fortified' (so RSV). See FORTIFICATION.

FERRET (*'anāḳāh*).—An unclean animal, Lv 11[30], RV, RSV **'gecko.'** Rabbinical writers suggest the hedgehog, but this is unlikely. See LIZARD.

FESTUS, PORCIUS.—Procurator of Judaea A.D. 60 to 62, after FELIX (q.v.). The date is important to NT studies as it fixes the time when the Apostle Paul was sent to Rome (Ac 25 f). An earlier date, such as the A.D. 56 of Eusebius, claims support from the acquittal of Felix through 'the importunate supplications of his brother Pallas' (Jos. *Ant.* xx. viii. 9 [182]); Pallas was

dismissed as Claudius' financial secretary in A.D. 55. But the downgrading—by Seneca, not by Nero, who as yet took little interest in politics—does not seem to have affected the cordial relations with his imperial master for another six years. Felix bequeathed to Festus the prodigious task of curbing Messianism, which was to culminate in A.D. 66 in war with Rome. Even though historians have pictured Festus as less tyrannical in repressing civil disorders than his predecessor Felix, there appears to have been little difference in their methods. Josephus speaks of the arrest and execution of large numbers of Jewish patriots—'brigands,' he calls them—and the exterminating of 'a certain impostor along with his followers, who looked for God's miraculous deliverance in the desert' (*BJ* II. xiv. 1 [271]; *Ant.* XX. viii. 10 [188]). The friendship of Festus for Agrippa II., reflected in Ac 25^{13ff}, is confirmed by his siding with him against the Temple priesthood who had built a wall to prevent Agrippa from viewing Temple activities from a vantage point. Nero settled the controversy against Agrippa and Festus, 'in order to gratify Poppea, Nero's wife' (*Ant.* XX. viii. 11 [195 f]). Josephus knew her personally. She had become the wife of Nero in A.D. 62.

J. S. K.

FETTER.—See CHAIN.

FEVER.—See MEDICINE.

FIERY SERPENT.—See SERPENT, SERAPHIM.

FIG (*t^{e}'ēnāh*).—The common fig, fruit of the *Ficus carica*, is cultivated from one end of Palestine to the other, especially in mountainous regions, occupying a place to-day as important as in Bible times. The failure of fig and grape harvest still brings distress (Jer 5^{17}, Hab 3^{17}). Although figs are all of one genus, the *fellahīn* distinguish many varieties according to quality and colour.

The summer foliage is thick, excelling other trees for its cool and grateful shade—particularly to the traveller at midday. In summer, owners of gardens may be seen sitting, like Nathanael, in the shadow of their fig trees. The references in Mic 4^{4}, Zec 3^{10} may be to this, or to the not uncommon custom of having fig trees overhang rural dwellings. But when erstwhile rural districts become urban the trees often fail to bear fruit. So too self-sown fig trees are usually barren and are known as wild or 'male.' Trees are of medium height, but some specimens reach to over 25 feet. The fruiting of the tree is interesting and peculiar and is naturally earlier in the plains. The trees, which during the winter months have lost all their leaves, begin putting forth the tender leaf buds about the end of March (Mk 13^{28f}, Mt 24^{32f}, Lk 21^{29ff}). At the junction of the old wood with these new leaves tiny figs may also appear, the branch being *hapalos* or full of sap. The little figs develop along with the leaves to about the size of a cherry; but with every gust of wind the majority fall to the ground. These immature figs are known as *taksh*, and are eaten by the *fellahīn* and may even be on sale in the Jerusalem market. Unripe fruit of different kinds is not unwelcome to the Palestinian palate. These figs would be the *paggim* of Ca 2^{13}; and perhaps the *olynthoi* of Rev 6^{13}. RSV calls these 'winter fruit,' which falls off because of the spring-time working of the sap. Van Dyck in his edition of the Arabic NT (1857) uses *suqat* ('droppings'), used also in respect of the unripe dates of palm trees. The AV 'untimely' seems the most inclusive rendering. The *paggîm* which remain to reach ripeness in June are called *dafūr* (mentioned in Is 28^{4}, Jer 24^{2}, Hos 9^{10}, Mic 7^{1}, as *bikkūrāh*, a common Semitic root for anything 'early'). These, esteemed for their delicate flavour, may have the ripening process accelerated by the application of olive oil.

Already, however, the buds of the next crop begin to appear higher up the branches. These steadily develop and form the real harvest of the fig season, reaching its height in August. This Luke likens to the Kingdom of God. He knew the fig harvest in the eastern Mediterranean. In the much discussed 'miracle' of our Lord (Mk 11$^{12-14, 20f}$, Mt 21^{18ff}) there cannot have been the expectation of *dafūr*, or *olynthoi*—the latter would be untimely but not unripe. In April, however, the possibility of *taksh* is present (certainly in the Jerusalem area as has been noticed this century). The young leaves are on the fig trees. Any tree likely to bear fruit at all will have some *taksh*, though the proper season of figs 'is not yet.' Mark's Greek implies the possibility only. Such figs are not ripe, but would be reckoned edible by any Palestinian. They are a guarantee of the harvest to come. The tree in the gospel story had no promise of future usefulness. It was this condition that lent itself to the picture of the 'want of fruitfulness in the Jewish nation.' This tree was prejudged as 'barren.' It should be noted too that in May fig trees may be found round Jerusalem, which have dropped their green figs, so that none ripen as *dafūr*, and yet have no sign of the buds of the summer crop.

The fig is welcome as fruit and as medicine, not only fresh but dried. The fruit is threaded on to long strips for convenience. It is also pressed into a solid cake that can be cut in slices (Is 25^{18} 30^{12}, 1 Ch 12^{40}). A lump of such was used as a poultice for Hezekiah's boil (2 K 20^{7}, Is 28^{21}). Just as dates in this dried or 'lumpy' condition are known as *'ajweh*, figs are called *quttain*. In many countries where figs are a staple diet when dried, they are packed as well as pressed for export. The generic Arabic word is *tīneh* (the Hebrew *'āleph* becoming a long vowel).

E. W. G. M.—E. F. F. B.

FILE.—Only 1 S 13^{21}, but the passage is very corrupt. The word probably means 'the act of filing,' 'sharpening,' and RSV renders 'the charge (sc for sharpening) was a pim.'

FILLET.—A technical term found in Ex 27^{10f} 36^{38} 38$^{10-12, 17, 19, 28}$ for the silver rings which bound the pillars of the Tabernacle together.

FINE.—The verb 'to fine' (modern 'refine') is used in Job 28^{1} 'Surely there is a vein for silver, and a place for gold where they fine it' (RV, RSV 'which they refine'). 'Fining pot' occurs in Pr 17^{3} 27^{21} (AV, RV; RSV 'crucible'); and 'finer' in Pr 25^{4} (AV, RV; RSV 'smith'). See REFINER.

FINES.—See CRIMES AND PUNISHMENTS, **8.**

FIR.—1. *b^{e}rôsh* is rendered 'fir tree' in AV and RV (but *cypress* in RVm in many places), while RSV has normally '**cypress**' (q.v.), but 'fir' in 2 S 6^{5} (RSVm), Ezk 27^{5} 31^{8}, Ps 104^{17}. The *b^{e}rôsh* was a tree of large growth (2 K 19^{23}, Ezk 31^{8}), evergreen (Hos 14^{8}), a chief element in the glory of Lebanon (Is 60^{13}), and associated with cedars (Ps 104^{16f}, Is 14^{8}, Zec 11^{2}). The timber of the *b^{e}rôsh* ranked with the cedar for house- and ship-building (1 K 5$^{8, 10}$ etc.). Cypress is accepted by most modern authorities, but *b^{e}rôsh* may have included also several varieties of pine.

2. *'ōren* is rendered by 'fir' in RV in Is 44^{14} (AV, RVm '**ash**'; RSV reads *'erez* and renders 'cedar'). See also ASH.

E. W. G. M.—H. H. R.

FIRE.—See HOUSE, **7**, and next article.

FIREPAN.—1. A pan of bronze (Ex 27^{3} etc.), silver (Mishnah, *Yōma*, iv. 4), or gold (1 K 7^{50} etc.), for removing charcoal, and probably ashes also, from the altar of burnt-offering. According to the Mishnah (*loc. cit.*), the fire-pans or coal-pans were of various sizes, there given, and were each furnished with a long or a short handle. They seem, therefore, to have resembled ladles, or the now obsolete bed-warmers.

When used to hold live charcoal for the burning of incense the coal-pan becomes a **censer** (Lv 10^{1} 16^{12} etc.). Hence in Nu 4^{14}, 1 K 7^{50}, 2 Ch 4^{22} RV and RSV have 'firepans' for AV 'censers,' there being no reference in these passages to incense. The same utensil was used for removing the burnt portions of the lamp-wicks of the golden 'candlestick' or lamp-stand, although rendered snuff-dishes (AV, RV; RSV 'trays'), for which Tyndale has rightly 'firepans.' See SNUFF DISHES.

2. In Zec 12[6] RV there is mention of 'a pan (AV hearth) of fire'; in other words, a **brazier.** See COAL; HOUSE, 7. A. R. S. K.

FIRKIN.—See WEIGHTS AND MEASURES.

FIRMAMENT.—According to the Hebrew conception of the universe, the earth is surmounted by a rigid vault called the firmament, above which the waters of a heavenly ocean are spread. The Hebrew word for firmament, *rāḳîa'*, comes from a root meaning 'to beat out'; cf Ex 39[3], where it is used of beating out thin plates of gold. It was therefore thought of as a solid vault.

FIRSTBORN.—1. The **dedication of the firstborn** of men and beasts was probably a primitive nomadic custom, and therefore earlier than the offering of first-fruits, which could not arise until the Israelites had settled into agricultural life in Canaan. The origin of the belief that a peculiar value attached to the firstborn cannot be definitely traced; but it would be a natural inference that what was valuable to the parent would be valuable to his God. And thus the word 'firstborn' could be used figuratively of Israel as the firstborn of Y" among the nations (Ex 4[22], cf Jer 31[9]), and the seed of David among dynasties (Ps 89[28]). The law of the dedication of the firstborn is found in JE (Ex 13[11–16] 22[29b, 30] 34[19f]), D (Dt 15[19–23]), P (Ex 13[1f], Nu 3[11–13, 40–51] 18[15–18]). It is not impossible that in very primitive times firstborn sons were sometimes actually sacrificed (cf 2 K 3[27], Mic 6[7]), but the practice would soon grow up of 'redeeming' them by money or payments in kind.

2. The firstborn (*bᵉkhōr*) enjoyed the **birthright** (*bᵉkhōrāh*). He succeeded his father as head of the family, and took the largest share of the property; this was fixed in Dt 21[17] as a 'double portion.' [In 2 Ch 21[3] the principle of the birthright is extended to the succession to the throne. But this is a late passage, and it is not certain that the firstborn was necessarily the heir apparent]. If a man died without children, the heir was the firstborn of his widow by his brother or next-of-kin (Dt 25[5–10]). The right of the firstborn, however, was often disturbed, owing to the jealousies and quarrels arising from the polygamy practised in Israel. The law in Dt 21[15–17] is directed against the abuse. Reuben, although the son of Leah, the less favoured of Jacob's two wives, was considered the firstborn, and lost the right only because of his sin (Gn 49[3f], 1 Ch 5[1]). But Ishmael was allowed no share at all in the father's property (Gn 21[10]); and the superiority of Jacob over Esau (symbolizing the superiority of Israel over Edom) is described as having been foretold before their birth (25[23]), and as brought about by Esau's voluntary surrender of the birthright (vv.[29–34]). And other instances occur of the younger being preferred to the elder, *e.g.* Ephraim (48[13–20]), Solomon (1 K 1), Shimri (1 Ch 26[10]).

3. The **death of the firstborn** was the last of the punishments sent upon Egypt for Pharaoh's refusal to let the Israelites go. Moses gave him due warning (Ex 11[4–8]), and on his continued refusal the stroke fell (12[29f]). The event is referred to in Ps 78[51] 105[36] 135[8] 136[10], He 11[28]. It is probable (see PLAGUES OF EGYPT) that the stories of all the other plagues have been founded on historical occurrences, and that the Egyptians suffered from a series of 'natural' catastrophes. If this is true of the first nine, it is reasonable to assume it for the last, and we may suppose that a pestilence raged which created great havoc, but did not spread to the Israelite quarter. The growth of the tradition into its present form must be explained by the 'aetiological' interest of the Hebrew writer—the tendency to create idealized situations in a remote past for the purpose of explaining facts or institutions whose origin was forgotten. Thus the Feast of Booths was accounted for at a late date by the dwelling of the Israelites in booths after the Exodus (Lv 23[43]), the Feast of Unleavened Cakes by the haste with which they departed from Egypt (Ex 12[34] 13[7f]), the Feast of the Passover by the passing over of the houses marked with blood at the destruction of the firstborn (12[12f, 23, 27]). And similarly the singling out of the firstborn for destruction was itself connected with the ancient practice of offering to God annually in spring the firstlings of beasts. Moses demanded release in order to offer the sacrifice (10[25f]), and because Pharaoh refused to allow them to offer their firstlings, Y" took from the Egyptians their firstborn. This explanation, though not explicitly given, is implied in the close connexion of the dedication of the firstborn with the Passover (13[11–13], Dt 15[19] 16[1–8]). In a redactional passage (Ex 4[22f]) a different explanation is offered. The death of the firstborn would be a punishment for refusal to release Israel, who was Y"'s firstborn.

4. In the NT the term 'firstborn' (*prōtotokos*) is used of Christ (Ro 8[29], Col 1[15, 18], He 1[6], Rev 1[5]), and of Christians who have died (He 12[23]); see the commentaries. A. H. McN.

FIRSTFRUITS.—See SACRIFICE AND OFFERING.

FISH would appear to have always been a favourite article of diet among the Hebrews (Nu 11[5] and references in the Gospels), as it is to-day. Fish are found in enormous numbers in all the inland waters of Palestine, and especially in the Lake of Galilee, Lake Huleh, and the 'meadow lakes' of Damascus. The extraordinary feature of these fish is the number of species peculiar to the Jordan valley. Out of a total of forty-three species found in the region, no fewer than fourteen are peculiar to this district. Many of these are quite small. The chief edible fish are members of the *Chromides* and of the *Cyprinidae* (carps). The cat-fish, *Clarias macracanthus*, not being a scaly fish, cannot be eaten by the Jews (Dt 14[9]), though considered a delicacy by the Christians of Damascus. It is thought by some to be the 'bad fish' of Mt 13[47f]. In NT times fish-curing was extensively carried on at Taricheae on the Lake of Tiberias. Some of the native fish is still salted to-day. The '*fish*-pools' of Ca 7[4] (AV; RV, RSV 'pools') and the 'ponds for *fish*' in Is 19[10] (AV; RSV 'will be grieved,' cf RV) are both mistranslations. See also FOOD, 6. E. W. G. M.

FISH GATE.—See JERUSALEM, GATES OF.

FITCHES.—1. *Ḳeṣaḥ* (Is 28[25, 27]), RVm '**black cummin**' (RSV '**dill**'), the seeds of the aromatic herb *Nigella sativa*, commonly used to-day in Palestine as a condiment, especially on the top of loaves of bread. The contrast between the staff for the 'fitches' and the rod for the cummin is the more instructive when the great similarity of the two seeds is noticed. **2.** *kussemeth*, 'fitches' in Ezk 4[9] (AV; AVm, RV, RSV 'spelt'), and 'rie' in Ex 9[32], Is 28[25] (AV; RV and RSV 'spelt'). **Spelt** (*Triticum spelta*) is an inferior kind of wheat, the grains of which are peculiarly adherent to the sheath. E. W. G. M.

FLAG.—1. *'āḥû*, Job 8[11], is rendered 'flag' in AV and RV (RSV 'reeds'). In Gn 41[2, 18] the same word is rendered 'meadow' in AV (RV, RSV 'reed grass'). It denotes marsh grasses or reeds. **2.** *sûph* is rendered by 'flags' in AV and RV in Ex 2[3, 5] (RSV 'reeds'), Is 19[6] (RSV 'rushes'). In Jon 2[5] it is rendered by 'weeds' in AV, RV, and RSV, and *yam sûph*, or 'Reed Sea,' is the Hebrew name which is rendered 'Red Sea.' The word denotes sedgy plants.

FLAGON.—This word occurs five times in AV, but in only one of these instances is the translation retained by RV and RSV, namely, Is 22[24]. Here it is a large earthenware storage jar. The same word is elsewhere rendered by AV and RV 'bottle' and by RSV 'jar' (*e.g.* Jer 48[12]). On the other hand RV and RSV introduce 'flagons' in two instances where AV has 'covers,' namely, Ex 25[29] 37[16]. To these RSV adds Nu 4[7], where RV has 'cups' (AV 'covers') for the same word. In the remaining four instances where AV has 'flagons' (2 S 6[19], 1 Ch 16[3], Hos 3[1], Ca 2[5]), the meaning of the Hebrew word is a 'pressed cake . . . composed of meal, oil, and *dibs*' (W. R. Smith, *OTJC*[1] 434, n. 7). Hence RV and RSV render by 'cake of **raisins**,' or 'raisins' in all these cases.

FLASK.—**1.** Hebrew *pakh*, 2 K 9[1, 3] (AV '**box**'; RV '**vial**'). The same word is rendered 'vial' in 1 S 10[1] in AV, RV, and RSV. **2.** *baḳbūḳ*, Jer 19[1, 10] (AV, RV 'bottle'). The same word is rendered 'jar' in 1 K 14[3] (AV, RV 'cruse'). **3.** Greek *angeion*, Mt 25[4] (AV, RV 'vessel'). **4.** *alabastron*='alabaster flask,' Lk 7[37] (so RVm; AV 'alabaster box'; RV 'alabaster cruse'). The same word is rendered 'alabaster jar' in Mt 26[7], Mk 14[3] (AV and RV as in Lk 7[37]).

FLAX (*pishtāh*).—The plant *Linum usitatissimum*, and the prepared fibres used for making linen. It was early cultivated in Palestine (Jos 2[6]); the failure of the flax was one of God's judgments (Hos 2[9]). The plant is about two to three feet high, with pretty blue flowers; the flax is said to be 'bolled' (RSV 'in bud'; Ex 9[31]) when the seed vessels reach maturity and the plant is ready for gathering. The stalks were dried on the housetops (Jos 2[6]), and then soaked in water and the fibre combed out (Is 19[9] RV, RSV). The 'tow' of Is 43[17] (AV; RV 'flax,' RSV 'wick') is teased-out flax. The oil of the seeds is the well-known linseed oil.
E. W. G. M.

FLEA (*par'ōsh*).—The common flea, *Pulex irritans*, is a universal pest in Palestine. It is mentioned in 1 S 24[14] and in AV and RV in 26[20] (RSV has 'my life'). Fleas are present in incredible numbers in the dust of caves to which goats resort. RVm has 'fleas' for 'lice' (AV, RV) in Ex 8[16] (RSV 'gnats').

FLESH.—In the OT man is flesh, *bāśār*; animals also are flesh. What is not flesh is God or belongs to His celestial realm of 'spirit' (Is 31[3]). The soul or *nephesh* of man is not independent of his flesh, nor is it a governing power active upon the flesh; rather it is the life of the flesh, the blood, the self of the fleshly person. Sometimes flesh and soul come very close together, and what happens to one happens to the other (Ps 84[2] 16[9f]); there is no soul without flesh, but they can be distinguished. The flesh is not individualized, but communities share their flesh; man and woman in marriage become one flesh; a family shares its flesh, 'all flesh' is all humanity, or indeed all living creation. The term 'body' is almost lacking in the OT (apart from a corpse, for which words exist), and we hear rather of the part of the man which is especially active, hand or ear or eye as it may be, or of the flesh of a group of men in common. There is no suggestion that human existence is sinful because it is fleshly; on the contrary, it could not exist except in flesh, and man and woman were flesh in the garden of Eden (Gn 2[23f]). But at an early stage all flesh had corrupted its way (Gn 6[12] etc.). All flesh then is living creation seen as other than God; upon all flesh He executes judgment, Is 66[16]. But flesh as such is in no way incapable of finding communion with God, Ps 16[9]. Flesh is weak and mortal compared with spirit, Gn 6[3], Job 34[15]; but God pities man because he is flesh, Ps 78[39]. God so acts that all flesh may see and know, Is 40[5], Ezk 21[5].

The word is of course very frequent for flesh as food, what we would call meat.

In Rabbinic Judaism 'flesh and blood' is a common designation for mankind; cf Sir 14[18]. In the Qumrân texts man is often called 'flesh,' and in statements of the frailty of man and his weakness compared with God this is often associated with the term 'clay.' In the *Manual of Discipline*, xi. 9, 'I belong to mankind of evil, to the company of flesh of iniquity'; xi. 12 considers 'if I stumble in the iniquity of flesh.' Flesh is a realm not only of weakness in comparison with God but of proneness to sin against Him. The OT contrast of flesh and spirit is retained, but is complicated because there are two spirits of truth and error ruling in men. The member of the community, redeemed and secured, still feels his belonging to weak and sinful flesh. Evil meanwhile has a hidden seat in the flesh, but at the end of the period of evil God (*Manual*, iv. 20) 'will purify with his truth all the deeds of man and refine for himself the frame of each man, to consume all spirit of iniquity from the inward parts of his flesh.' By submission of soul to God's statutes 'his flesh will be cleansed, that he may be sprinkled with water for impurity' (iii. 8–9). It is impossible here to distinguish 'moral,' 'neutral,' and 'physical' senses of the word; the whole point is that these run into one another and belong together, though one aspect may be more prominent at any time.

In the NT we have 'flesh and blood' again for man as he is, with his own resources, in contrast to God (Mt 16[17], 1 Co 15[50]). The being of mankind is flesh, and the incarnation is the word becoming flesh (Jn 1[14]). The continuities and relationships of man are flesh, *e.g.* kinship (Ro 4[1]). On the other hand, as in OT flesh can be contrasted with spirit and seen as the typically sinful continuum of human life, so that the mind or aspiration of the flesh is enmity against God, Ro 8[7]. But this fleshly sinfulness does not simply mean bodily sins (sexual or greedy appetites) as we would call them, but mental attitudes, Gal 5[19–21]. In Ephesians evil can have 'spiritual' elements, 6[12], so that there is no question of flesh as such being evil, just because it is not spirit (cf also 2 Co 7[1]).

In Paul 'body' and 'flesh' are related but are not the same. We have 'body of sin' and 'flesh of sin,' Ro 6[6] 8[3]; flesh and body are alike involved in sin, 8[13]; the body dies through sin, 8[10]. But the resurrection is thought of as a renewal and transformation of the body rather than the flesh (1 Co 15), and the Church is the body and not the flesh of Christ; its knowledge of Christ is no longer 'according to flesh' as it once was, 2 Co 5[16] (RSV 'from a human point of view').

Flesh is related to sin, to death, and to law (Ro 7[5]). Christ in His passion submitted Himself to the power of these, in a likeness made of flesh of sin, literally, Ro 8[3], in His body of flesh, Col 1[22]; thus He condemned sin in the flesh and defeated it, Ro 8[3]. His fleshly coming and suffering thus overcomes the sin which is seated in the flesh. The risen Christ after His triumph is no ghost, but has flesh and bones, Lk 24[39]; but the resurrection is more commonly understood through the term 'body.' Following Him, Christians have crucified the flesh and its lusts, Gal 5[24], and can no longer live for the flesh but for and by the Spirit. But the OT understanding of fleshly community and solidarity remains for the relation of man and wife, Christ and Church, Eph 5[22–33].
J. Ba.

FLESH-HOOK.—The flesh-hooks (RSV 'forks') of bronze and gold mentioned in connexion with the Tabernacle (Ex 27[3] 38[3]) and Temple (1 Ch 28[17], 2 Ch 4[16]) were probably three-pronged forks, like that used by the priest's servant at Shiloh (1 S 2[13]).

FLESHLY, FLESHY.—There is a distinction preserved in the AV between these words. 'Fleshly' is that which belongs to the flesh, *carnal*, as Col 2[18] 'fleshly mind,' RSV 'sensuous,' as opposed to 'spiritually minded' (cf Ro 8[6]). 'Fleshy' is that which is made of flesh, *tender*, as 2 Co 3[3] 'written . . . not on tablets of stone but on tablets of human hearts' (RSV).

FLESHPOTS (Ex 16[3]).—See HOUSE, 9.

FLINT.—See MINING AND METALS.

FLOAT, 1 K 5[9] (AV), 2 Ch 2[16] (RV).—See SHIPS AND BOATS.

FLOCK.—See SHEEP.

FLOOD.—In addition to *mabbûl* (*i.e.* the flood in the time of Noah, see DELUGE) several words for river and stream are translated by flood in AV, *e.g.* Is 44[3] 'floods upon the dry ground' (RV and RSV 'streams'). In a few psalms and hymns RV (and less frequently RSV) has retained 'flood' or 'floods' (Ps 24[2] 93[3] 98[8], Ex 15[8], Ca 8[7], Jon 2[3]), but mostly RV and RSV use 'river' or 'stream.'

Where it occurs in the AV it refers sometimes to the Euphrates, Jos 24[2, 14f] (where RSV has 'Euphrates'), sometimes to the Nile, Jer 46[7f], Am 8[8] 9[5] (RSV 'Nile'),

and perhaps also the Jordan in Ps 66[6]. In Ps 69[2] the word used is *shibbōleth* (which the Ephraimites pronounced *sibbōleth*); AV and RV have 'floods,' RSV 'flood.' L. H. B.

FLOOR.—Used in AV (*a*) in the primary sense of a house-floor, and (*b*) in the secondary sense of a threshing-floor, the Hebrew words for which are quite distinct. Under (*a*) we have the earthen floor of the Temple, 1 K 6[15] (see HOUSE, 4). By 'from floor to floor,' 7[7] (RV), is meant 'from floor to ceiling,' a sense implied in the better reading 'from floor to rafters' (RSV); cf 6[15] (RSV). In Am 9[3] our EV have obscured the figure 'the floor of the sea.'

(*b*) Where 'floor' occurs in the sense of 'threshing-floor' (see AGRICULTURE, 3), the latter has been substituted by RV except in three passages (Gn 50[11], Is 21[10], Jl 2[24]). In two of these (Gn 50[11], Jl 2[24]) RSV has 'threshing floor,' but in the third (Is 21[10]) it substitutes 'my winnowed one' for 'corn of my floor.' The same word (*gōren*) appears as **barnfloor** (2 K 6[27] AV; RV, RSV 'threshing floor') and **cornfloor** (Hos 9[1] AV, RV; RSV 'threshing floor'). A. R. S. K.

FLOTE, 2 Ch 2[16] (AV).—See SHIPS AND BOATS.

FLOUR.—See BREAD, FOOD, 2, MILL.

FLOWERS.—**1.** *nēṣ*, Gn 40[10], used of vine blossom. **2.** *niṣṣāh*, Job 15[33], used of olive blossom. **3.** *niṣṣān*, Ca 2[12], used of flowers generally. **4.** *peraḥ*, Ex 25[33], Nu 17[8], 1 K 7[26], Is 5[24] 18[5], Nah 1[4], used of buds (including those of Aaron's rod) or of the flowers in the ornamentation of the Tabernacle or the Temple. **5.** *ṣiṣ*, Nu 17[8], Is 28[1, 4] 40[6], Job 14[2], used of the flowers on Aaron's rod or of flowers generally, usually with some reference to their ephemeral nature. All of these are general terms. For specific flowers see under their individual names. Flowers are one of the attractive features of Palestine; they come in the early spring (Ca 2[12]), but fade all too soon, the brilliant display being a matter of but a few short weeks. Hence they are an appropriate symbol of the evanescence of human life (Job 14[2], Ps 103[15] etc.). The 'lilies of the field' of Mt 6[28] may have been a comprehensive term for the brilliant and many-coloured anemones, the irises, the gladioli, etc., which lend such enchantment to the hillsides in March and April. E. W. G. M.

FLUTE.—See MUSIC AND MUSICAL INSTRUMENTS.

FLUX.—The expression 'a bloody flux' (1611 'bloody-flixe') is used in AV for Greek *dysenterion* (Ac 28[8]; RV and RSV 'dysentery'). This translation is first found in Wycliffe, who offers the alternative 'dissenterie, or flix.' See MEDICINE.

FLY.—**1.** *ʿebhûbh*, Ec 10[1], Is 7[18]; also Baal-zebub (q.v.). **2.** *ʿārōbh*, Ex 8[21ff], Ps 78[45] 105[31], the insects of one of the plagues of Egypt, thought by some to have been cockroaches. Flies of many kinds, mosquitoes, 'sand-flies,' etc., swarm in Palestine and Egypt. In summer any sweet preparation left uncovered is at once defiled by flies falling into it (Ec 10[1]). Flies carry ophthalmia and infect food with the micro-organisms of other diseases, *e.g.* cholera, enteric fever, etc. They frequently deposit their eggs in unclean wounds and discharging ears, and these eggs develop into maggots. Special flies, in Africa at any rate, carry the *trypanosoma*, which produce fatal disease in cattle and 'sleeping sickness' in man. Mosquitoes, which may have been included in the *ʿārōbh* (the 'swarms of flies') in Egypt, are now known to be the carriers of the poison of malaria, the greatest scourge of parts of Palestine. E. W. G. M.

FODDER (*beʿelîl*).—Job 6[5] (AV, RV, RSV) 24[6] (RSV; AV 'corn,' RV 'provender'), Jg 19[21] (RV; AV, RSV 'provender'). See PROVENDER.

FOLK.—This English word is used in the NT indefinitely for 'persons,' there being no word in the Greek (Mk 6[5], Jn 5[3], Ac 5[16]). But in the OT the word has the definite meaning of *nation* or *people*, even Pr 30[26] 'The conies are but a feeble folk,' having this meaning. The word is found in RSV only in Jer 6[11] ('old folk') 25[20] ('foreign folk'). In the metrical version of Ps 100[3], 'flock' should be 'folk,' corresponding to 'people' in the prose version. So the author wrote—

> 'The Lord ye know is God in dede
> With out our aide, he did us make:
> We are his folck, he doth us fede,
> And for his shepe, he doth us take.'

FOLLOW.—This English verb means now no more than to come after, but in older English it was often equivalent to pursue. Now it states no more than the relative place of two persons, formerly it expressed purpose or determination. Tyndale translates Lv 26[17] 'ye shal flee when no man foloweth you,' and Dt 28[22] 'they [the diseases named] shall folowe the, intyll thou perishe.' In AV 'to follow' is sometimes 'to imitate,' as 2 Th 3[7] 'For yourselves know how ye ought to follow us' (RV, RSV 'imitate').

FOOD.—This article will deal only with foodstuffs, in other words with the principal articles of food among the Hebrews in Bible times, the preparation and serving of these being reserved for the complementary article MEALS.

1. The food of a typical Hebrew household in historical times was almost exclusively vegetarian. For all but the very rich the use of meat was confined to some special occasion—a family festival, the visit of an honoured guest, a sacrificial meal at the local sanctuary, and the like. According to the author of the Priest's Code, indeed, the food of men and beasts alike was exclusively herbaceous in the period before the Deluge (Gn 1[29f]), permission to eat the flesh of animals, under stipulation as to drawing off the blood, having been first accorded to Noah (9[3ff]). In Isaiah's vision of the future, when 'the lion shall eat straw like the ox' (11[7]), a return is contemplated to the idyllic conditions of the first age of all.

Some idea of the basic foods of the ancient Hebrew is afforded by the Gezer calendar, a small limestone plaque of *c* the 10th cent. B.C., upon which are listed, perhaps by a schoolboy, the chief crops and the months in which the farmer worked them. Aside from flax, all mentioned are food crops: olives, grapes, summer fruit (figs, pomegranates, etc.), barley, other grains (wheat, spelt, etc.), and 'late planting' (summer crops: millet, sesame, vegetables, etc.). These items supplied the staple diet of the average Israelite. The growth of luxury under the monarchy (cf Am 6[4ff] and similar passages) is well illustrated by a comparison of 2 S 17[28f] with 1 K 4[22f]. In the former there is brought for the entertainment of David and his followers 'wheat, barley, meal, parched grain, beans and lentils, honey and curds and sheep and cheese from the herd'; while, according to the latter passage, Solomon's daily provision was 'thirty measures of fine flour and sixty measures of meal, ten fat oxen, and twenty pasture-fed cattle, a hundred sheep, besides harts, gazelles, roebucks, and fatted fowl.'

2. The first place in the list of Hebrew foodstuffs must be given to the various cereals included under the general name of 'corn'—in RSV, ARV always 'grain'—the two most important of which were **wheat** and **barley. Millet** (Ezk 4[9]) and **spelt** (see FITCHES, RIE), are only casually mentioned. The most primitive method of using corn was to pluck the 'fresh ears' (Lv 23[14] ARV, RV, 2 K 4[42]) and remove the husk by rubbing in the hands (Dt 23[25], Mt 12[1] etc.). When bruised in a mortar, these ears yielded the 'crushed grain' of Lv 2[14, 16] RSV. A favourite practice in all periods down to the present day has been to roast the ears on an iron plate or otherwise. The result is the **parched grain** so frequently mentioned in OT. Parched corn and bread with a light sour wine furnished the midday meal of Boaz's reapers (Ru 2[14]). The chief use, however, to which wheat and barley were put was to supply the household with **bread** (q.v.). Wheaten and barley '**meal**' (RV) were prepared by rubbing the

grain between two stones, frequently pieces of coarse black basalt. Excavations show that these simple rubbing stones survived the introduction of the quern or hand-mill (for references to illustrations of both, see MILL). The **'fine flour'** of our EV was obtained from the coarser variety by bolting the latter with a fine sieve. **Barley bread** (Jg 7^{13}, Jn $6^{9,13}$) was the usual bread, indeed the principal food, of the poorer classes. (For details of break-making, see BREAD). The word rendered 'coarse meal' in Nu 15^{20}, Neh 10^{37}, Ezk 44^{30} (RSV, RV, and ARVm) is obscure; some believe that it denoted flour mixed with water, *i.e.* 'dough' (so AV, RV) in the first stage of making.

3. Next in importance to wheat and barley as foodstuffs may be ranked the seeds of various members of the pulse family (**Leguminosae**), although only two leguminous plants (**lentils** and **beans**) are mentioned by name in OT. The **pulse** (AV, RV) of Dn $1^{12,16}$ denotes edible herbs generally (so RVm); RSV reads 'vegetables.' The 'parched (pulse)' of 2 S 17^{28} (AV, RV), on the other hand, is due to a mistaken rendering of the word for 'parched grain' here repeated by a copyist's slip. Of red lentils Jacob made his fateful **pottage** (Gn 25^{29ff}), probably a stew in which the lentils were flavoured with onions and other ingredients, as is done at the present day in Syria. Lentils and beans (the 'beans' of OT were actually coarse horse-beans) were occasionally ground to make bread (Ezk 4^{9}).

Next to its fish, the Hebrews in the wilderness looked back wistfully on the 'cucumbers, melons, leeks, onions and garlic' of Egypt (Nu 11^{5}), all of them subsequently cultivated by them in Palestine. It is to the agricultural treatises of the Mishnah, however, that the student must turn for fuller information regarding the rich supplies available either for a 'dinner of herbs' (Pr 15^{17}) alone, or for supplementing a meat diet. At least four varieties of bean, for example, are named, also the chickpea (which the Vulgate substitutes for the 'parched pulse' above referred to), various species of chicory and endive —the **bitter herbs** of the Passover ritual (Ex 12^{8})— mustard (Mt 13^{31}), radish, and many others.

4. Passing now to the 'food-trees' (Lv 19^{23}), we may follow the example of Jotham in his parable (Jg 9^{8ff}), and begin with the **olive,** although as it happens, the olive 'berry' (Is 17^{6}) is never expressly mentioned in Scripture as an article of diet. Apart, however, from their extensive use in furnishing **oil** (q.v.), itself an invaluable aid in the preparation of food, olives were not only eaten in the fresh state, but were at all times preserved for later use by being soaked in brine. Such pickled olives were, and still are, used as a relish with bread by rich and poor alike.

Next to the olive in rank, Jotham's parable places the fig tree, whose 'sweetness' and 'good fruit' it extols (Jg 9^{11}). The great economic importance of the **fig** need not be emphasized. From Is 28^{4}, Jer 24^{2} it appears that the 'first ripe fig,' *i.e.* the early fig which appears on last year's wood, was regarded as a special delicacy. The bulk of the year's fruit was dried for use out of the season, as was the case also among the Greeks and Romans, by whom dried figs were the most extensively used of all fruits. When pressed in a mould they formed **'cakes of figs'** (1 S 25^{18}, 1 Ch 12^{40}). A fig cake, it will be remembered, was prescribed by Isaiah as a poultice (AV 'plaister,' RSV 'apply it') for Hezekiah's boil (Is 38^{21}=2 K 20^{7} RV). In the Râs Shamra texts it is recommended as a medicine for horses!

With the fig Hebrew writers constantly associate the **grape,** the 'fruit of the vine' (Mt 26^{29} ||). Like the former, grapes were not only enjoyed in their natural state, but also, by exposure to the sun after being gathered, dried into **raisins,** the 'dried grapes' of Nu 6^{3}. In this form they were better suited for the use of travellers and soldiers (1 S 25^{18}, 1 Ch 12^{40}). The word in 2 S 6^{19}, Is 16^{7}, Hos 3^{1} rendered by AV 'flagon of wine' or) 'foundation'!) is best understood as denoting a 'raisin-cake' (so RV, RSV). By far the greater part of the produce of the vineyards was used for the manufacture of **wine** (q.v.). Probably 'honey' on occasion is actually a syrup of figs or grapes or other fruit; see HONEY.

Dates are only once mentioned in AV, and that without any justification, as the marginal alternative of 'honey,' 2 Ch 31^{5}; yet the 'palm tree' is mentioned a number of times (*e.g.* Ps 92^{12}, Jl 1^{12}), and from the Mishnah we learn that dates, like the fruits already discussed, were not only eaten as they came from the palm, but were dried in clusters and also pressed into cakes for convenience of transport.

For other less important fruits, such as the pomegranate, the *tappûaḥ*—the 'apple' of EV, according to others the *quince* (see APPLE)—the fruit of the sycamore or fig-mulberry, associated with Amos the prophet, and the **husks** (Lk 15^{16}), or rather pods of the carob tree (RSV 'pods'), reference must be made to the separate articles. To these there fall to be added here **almonds** and **nuts** of more than one variety.

5. As compared with the wide range of foods supplied by the cereals, vegetables and fruits above mentioned, the supply of flesh-food was confined to such animals and birds as were technically described as 'clean.' For this important term, and the principles underlying the distinction between clean and unclean, see CLEAN AND UNCLEAN. The clean animals admitted to the table according to the 'official' lists in Lv 11^{2-23}, Dt 14^{4-20} (conveniently arranged in parallel columns for purposes of comparison in Driver's *Deut. ad. loc.*), may be ranged under the two categories, **domestic animals,** which alone were admitted as sacrifice to the 'table of Yahweh' (Mal $1^{7,12}$), and **game.** The former comprised the two classes of 'the flock,' *i.e.* sheep and goats, and 'the herd.'

The flesh of the **goat,** and especially of the 'kid of the goats,' was eaten by the ancient Hebrews as it is by the present inhabitants of Palestine, though the goat was more valued then, as to-day, for its milk. A kid, as less valuable than a well-fleeced lamb, was the most frequent and readiest victim, especially among the poor, a fact which gives point to the complaint of the Elder Son in the parable (Lk 15^{29f}). The thrice-repeated injunction against boiling a kid in its mother's milk (Ex 23^{19}||) must be understood in the light of a reference in the Râs Shamra texts to cooking a kid in milk, as a prohibition of an otherwise unknown Canaanite sacrificial custom.

Regarding the **sheep** as food, it may be noted that in the case of the fat-tailed breed the tail was regarded as a great delicacy (cf 1 S 9^{24}, where the words 'upper portion' [RSV], 'that which was upon it' [AV, RV] should be translated 'the fat tail') and as such, according to the Priest's Code at least, had to be offered with certain other portions of the fat (see **10** below) upon the altar (Ex 29^{22}, Lv 3^{9}, both RV and RSV). Of the neat **cattle,** the flesh of females as well as of males was eaten, the Hebrews not having that repugnance to cow's flesh which distinguished the Egyptians of antiquity, as it does the Hindus of to-day. Calves, of course, supplied the daintiest food, and might be taken directly from the herd, as was done by Abraham (Gn 18^{7}, cf 1 K 4^{23}), or specially fattened for the table. The 'fatted calf' of Lk 15^{23} will be at once recalled, also the 'fatlings' and the 'stalled,' *i.e.* stall-fed (RSV 'fatted') ox (Pr 15^{17}) of OT. 'One ox and six choice sheep' were Nehemiah's daily portion (Neh 5^{18}); Solomon's has already been given (**1**). From the females of the herd and of the flock (Dt 32^{14}), especially from the she-goat (Pr 27^{27}), in nomadic society also from the milch-camel (Gn 32^{15}), came the supply of **milk** and its preparations, butter, curds, and cheese, for which see MILK.

Of the seven species of game mentioned in Dt 14^{15}, it is evident from 12^{15} that the **gazelle** and the **hart** were the typical animals of the chase hunted for the sake of their flesh. They are also named along with the **roebuck** in Solomon's list, 1 K 4^{23}. One or more of these, doubtless, supplied the game (AV, RV 'venison') from which Esau was wont to make the 'savoury food' which his father loved (Gn 25^{28} 27^{5f}). Among the unclean animals

which were taboo to the Hebrews the most interesting are the swine (Lv 11[7], Dt 14[8]; cf Mt 8[30ff]||), the camel, the hare, and the ass (but see 2 K 6[25]).

6. In the Deuteronomic list above cited, the permitted and forbidden quadrupeds are followed by this provision regarding **fish**: 'of all that are in the waters you may eat these: whatever has fins and scales you may eat, and whatever does not have fins and scales you shall not eat; it is unclean for you' (Dt 14[9f] RSV; cf Lv 11[9–12]). No particular species of fish is named in OT, either as food or otherwise, although no fewer than forty-three species are said to be found in the Jordan system alone. Yet we may be sure that the fish which the Hebrews enjoyed in Egypt 'for nothing' (Nu 11[5] RSV) had their successors in Canaan. Indeed, it is usual to find in the words of Dt 33[19], 'they suck the affluence of the seas,' a contemporary reference to the fisheries possessed by the tribes of Zebulun (cf Gn 49[13]) and Issachar. In the days of Nehemiah a considerable trade in cured fish was carried on by Tyrian, *i.e.* Phoenician, merchants with Jerusalem (Neh 13[16]), where a market must have been held at or near the Fish-gate (3[3] etc.). In still later times, as is so abundantly testified by the Gospels and Josephus, the Sea of Galilee was the centre of a great fishing industry. In addition to the demand for fresh fish, a thriving trade was done in the salting and curing of fish for sale throughout the country. The fish of our Lord's two miracles of feeding were almost certainly of this kind, fish cleaned, split open, salted, and finally dried in the sun, having been at all times a favourite form of provision for a journey.

7. Regarding the 'clean' **birds**, all of which were allowed as food (Dt 14[11]), no definite criterion is prescribed, but a list of prohibited species is given (Lv 11[13–19], Dt 14[11–18]), mostly birds of prey, including the bat. In the ritual of various sacrifices, however, **pigeons** and **turtle doves**, and these only, find a place, and are therefore to be reckoned as 'clean' for ordinary purposes as well. The early domestication of these birds is shown by the reference to the 'windows' of the dove-cotes in Is 60[8], while the Mishnah has much to say regarding various breeds of domestic pigeons, their 'towers,' feeding, etc. Domestic **poultry** and eggs did not become common until the Persian period (2 Es 1[30], Mt 23[37] 26[34]||), although a drawing of a rooster on a seal of *c* 600 B.C. found at *Tell en-Naṣbeh*, 8 m. N. of Jerusalem, shows that chickens were known earlier. Though it is not certain that the **fatted fowl** for Solomon's table (1 K 4[23]) were **geese** as some have supposed, geese together with poultry and house-pigeons are frequently named in the Mishnah. Roast goose was a favourite food of the Egyptians, and has, indeed, been called their national dish.

Among the edible game birds mention is made of the **partridge** and the **quail** (qq.v.). Most or all of these were probably included in the 'fowls' (literally birds) which appeared on Nehemiah's table (5[18]). The humble **sparrow** (Mt 10[29], Lk 12[6]) would have been beneath the dignity of a Persian governor. The **eggs** of all the clean birds were also important articles of food (Dt 22[6], Is 10[14], Lk 11[12]).

8. Under the head of animal food must also be reckoned the various edible insects enumerated, Lv 11[22f], apparently four species of the **locust** family (see LOCUST). Locusts were regarded as delicacies by the Assyrians, formed part of the food of John the Baptist (Mt 3[4], Mk 1[6]), and are still eaten by the Arabs. By the latter they are prepared in various ways, one of the commonest being to remove the head, legs, and wings, and to fry the body in *samn* or clarified butter. Locusts may also be preserved by salting. This is the place, further, to refer to the article HONEY for information regarding that important article of food.

9. Nothing has as yet been said on the subject of **condiments. Salt**, the chief of condiments, will be treated separately (see SALT). Of the others it has been said that, 'before pepper was discovered or came into general use, seeds like cummin, the coriander, etc., naturally played a more important role.' Of these the greyish-white seeds of the **coriander** are named in Ex 16[31], Nu 11[7]; these are still used in the East as a spice in bread-making and to flavour sweetmeats. Similarly the seeds of the **black cummin** (Is 28[25] RVm) are sprinkled on bread like caraway seeds among ourselves. For the other condiments, **mint, anise** (RSV 'dill'), **cummin,** and **rue,** see the separate articles; to these may be added **mustard** (Mt 13[31]). Pepper is first mentioned in the Mishnah. The **caper-berry** (Ec 12[5] RV, ARVm) was eaten before meals as an appetizer, rather than used as a condiment.

10. Reference has already been made to the restrictions laid upon Hebrews in the matter of animal food by the all-important distinction between 'clean' and 'unclean,' as applied not only to quadrupeds, but to fish, birds, and winged creatures generally. All creatures technically 'unclean' were taboo, to use the modern term (see ABOMINATION, CLEAN AND UNCLEAN). There were other food taboos, however, which require a brief mention here. The chief of these was the absolute prohibition of the **blood** even of 'clean' beasts and birds, which occupies a prominent place in all the stages of the Hebrew dietary legislation (Dt 12[16, 23, 25] 15[23], Lv 17[10ff] [H] 3[17] 7[26f] [P], etc.). Its antiquity is attested by the incident recorded 1 S 14[32ff]. According to P, indeed, it is coeval with the Divine permission to eat animal food (Gn 9[4]). All sacrificial animals had therefore to be drained of their blood before any part could be offered to God or man, and so with all animals slaughtered for domestic use only (Dt 12[15f]), and with all game of beast and bird taken in the chase (Lv 17[13]).

Closely associated with the above (cf Lv 3[17]) is the taboo imposed upon certain specified portions of the intestinal **fat** of the three sacrificial species, the ox, the sheep, and the goat (Lv 3[3ff] 7[22ff] etc.), to which, as we have seen, the fat tail of the sheep was added. There was forbidden, further, the flesh of every animal that had died a natural death (Dt 14[21], Lv 17[15]), or had been done to death by a beast of prey (Ex 22[31], Lv 17[15]); in short, all flesh was rigidly taboo except that of an animal which had been ritually slaughtered as above prescribed. For another curious taboo, see Gn 32[32]. The Jews of the present day eat only such meat as has been certified by their own authorities as *kosher, i.e.* as having been killed in the manner prescribed by Rabbinic law.

The intimate association in early times between flesh-food and sacrifice explains the abhorrence of the Hebrew for all food prepared by the heathen, as illustrated by Daniel (Dn 1[8]), Judas Maccabaeus (2 Mac 5[27]), Josephus (*Vita* 3 [14]), and their associates (cf also Ac 15[20, 29], 1 Co 8[1–10] 10[19, 28]).

11. A word finally as to the sources of the Hebrew food-supply. Under the simpler conditions of early times the exclusive source of supply was the householder's own herd (Gn 18[7]) or flock (27[9]), his vineyard and oliveyard or his 'vegetable garden' (1 K 21[2]). As the Hebrews became dwellers in cities their foodstuffs naturally became more and more articles of commerce. The bakers, for example, who gave their name to a street in Jerusalem (Jer 37[21]), not only fired the dough prepared in private houses, as at the present day, but, doubtless, baked and sold bread to the public, as did their successors in the 1st and 2nd cents. (see Mishnah, *passim*). An active trade in food is attested for Nehemiah's day (13[15f]), when we hear of the 'fish gate' (3[3]) and the 'sheep gate' (3[1]), so named doubtless, from their respective markets. The disciples were accustomed to buy provisions as they journeyed through the land (Jn 4[8]; cf 13[29]); and Corinth, we may be sure, was not the only city of the time that had a meat-market (1 Co 10[25]). In Jerusalem, again, cheese was to be bought in the Cheesemakers' Valley (Tyropoeon), and oil at the oil-merchants (Mt 25[9]), and so on. In the early morning especially, the streets near the city gates on the north and west, which led to the country, were doubtless then, as now, transformed into market-places, lined with men and women offering for sale the produce of their farms and gardens. Even the outer court of the Temple itself

had in our Lord's day become a 'house of trade' (Jn 2[16]). A. R. S. K.—J. Br.

FOOL.—The Hebrew language is rich in words which express various kinds of folly. **1.** The *kᵉsîl* is glib of tongue, 'his mouth is his ruin' (Pr 18[7]; cf 9[13] 14[33]); in Ec 5[1f] 'the sacrifice of fools' is offered by him who is rash with his mouth. But such an one is 'light-hearted, thoughtless and noisy rather than vicious.' **2.** The *sākhāl* manifests his folly not in speech, but in action; it was after David had numbered the people that he reproached himself for acting 'very foolishly' (2 S 24[10]). Consequences prove that fools of this class have blundered in their calculations (Gn 31[28], 1 S 13[13], Is 44[25]). **3.** The *ʾᵉwîl* is stupid, impatient of reproof, often sullen and quarrelsome. He despises wisdom and instruction (Pr 1[7], cf 15[5]), is soon angry (Pr 12[16] 27[3]), and may sometimes be described as sinful (Pr 5[22f] 24[9]). **4.** The folly of the *nābhāl* is never mere intellectual deficiency or stupidity; it is a moral fault, sometimes a crime, always a sin. 'To commit folly' is a euphemism for gross unchastity (Dt 22[21], Jer 29[23]); the word is used also of sacrilege (Jos 7[15]; RSV 'a shameful thing'), of blasphemy (Ps 74[18]; RSV 'impious people'), as well as of impiety in general (Dt 32[6], Ps 14[1]). These words are sometimes employed in a more general sense; to determine the shade of meaning applicable in any passage, a study of the context is essential. For further details see Kennedy, *Hebrew Synonyms*, pp. 29 ff.

In the NT the Greek words for 'fool' describe him as 'deficient in understanding' (Lk 24[25]), 'unwise' (Eph 5[15]), 'senseless' (Lk 12[20]), 'unintelligent' (Ro 1[21]). The Greek word which corresponds to the 'impious fool' of the OT is fod win Mt 5[22]: *Raca* expresses 'contempt for a man's head=you stupid!' But 'fool' (*mōre*) expresses 'contempt for his heart and character=you scoundrel!' (Bruce, *EGT*, *in loc.*). If *mōre* were 'a Hebrew expression of condemnation' (RVm), it would 'enjoy the distinction of being the *only* pure Hebrew word in the Greek Testament' (Field, *Notes on the Translation of NT*, p. 3). A '*pure* Hebrew word' means a word not taken from the LXX and not Aramaic. J. G. T.

FOOT.—Is 3[16, 18] refers to the ornaments of women's feet. Most of the metaphorical or figurative usages are connected with the idea of the feet as the lowest part of the body, opposed to the head; hence falling at a man's feet, as the extreme of reverence or humility, kissing the feet (Lk 7[38]), sitting at the feet, as the attitude of the pupil (Lk 10[39], Ac 22[3]). The foot was literally placed on the neck of conquered foes (Jos 10[24]), as may be seen in Egyptian monuments. Hence 'under foot' is used of subjection (Ps 8[6], 1 Co 15[27]). In Dt 11[10] the reference is to some system of irrigation in vogue in Egypt, either to the turning of a water-wheel by the foot, or to a method of distributing water from a canal 'by making or breaking down with the foot the small ridges which regulate its flow' (Driver, *ad loc.*). Other usages arise from the feet as stained or defiled in walking. The shaking of dust from the feet (Mt 10[14], Ac 13[51]) was the sign of complete rejection; the land was as a heathen land, and its dust unclean. So the sandals were removed as a sign of reverence (Ex 3[5], Jos 5[15]; cf covering the feet, Is 6[2]). To remove the sandal was also the sign of the renunciation of a right (Dt 25[9], Ru 4[8]). To *walk* barefoot was the symbol of mourning (2 S 15[30]), or slavery (Is 20[2]). Jer 2[25] 'Keep your foot from going unshod,' *i.e.* do not wear the shoes off your feet in running after strange gods.

Washing the feet stained with the dust of the road was part of the regular duty of hospitality (Gn 18[4], Ex 30[19], 2 S 11[8], Ca 5[3], Lk 7[44]). The use of ointment for this purpose was the sign of the penitent's lavish love (Lk 7[38], Jn 12[3]). **The washing of the feet at the Last Supper** is primarily connected with this custom (Jn 13). Christ 'the Lord and Master' assumes the garb and does the work of a slave (13[4]). The lesson is not merely one of humility (cf the dispute in Lk 22[24]), but of ready and self-sacrificing service. An interesting Rabbinic parallel is quoted on Ezk 16[9]: 'Among men the slave washes his master; but with God it is not so.' Edersheim further sees in the act a substitute for the washing of hands which was part of the Paschal ceremonial; and there may be a reference to the proverb, connected with the Greek mysteries, that a great undertaking must not be entered upon 'with unwashed feet.' The service of the Kingdom of heaven (or in particular the crisis of that night) is not to be approached in the spirit of unthinking pride shown in the dispute about precedence (see D. Smith, *The Days of His Flesh*, p. 440). Besides the lesson of humility, there is also the symbolism of purification. St. Peter, at first protesting, afterwards characteristically accepts this as literal. Christ's reply takes up the figure of one who has walked from the bath to his host's house, and needs only to have the dust of his journey removed. Broadly, they are clean by their consecration to Him, but they need continual cleansing from the defilements of daily life. 'It seems impossible not to see in the word "bathed" a foreshadowing of the idea of Christian baptism' (Westcott, *ad loc.*). The same or other commentaries should be consulted for later imitations of the ceremony (cf 1 Ti 5[10]). C. W. E.

FOOTMAN.—This word is used in two different senses: **1.** *A foot-soldier*, always in plural 'footmen,' foot-soldiers, infantry. Footmen probably composed the whole of the Israelite forces (1 S 4[10] 15[4]) before the time of David. In RSV the word is retained only in 2 K 13[7]. **2.** *A runner on foot*: 1 S 22[17] (AV; AVm, RV, RSV 'guard'). '**Runners**' would be the literal, and at the same time the most appropriate rendering. The king had a body of runners about him, not so much to guard his person as to run his errands and do his bidding. They formed a recognized part of the royal state (1 S 8[11], 2 S 15[1]); they served as executioners (1 S 22[17], 2 K 10[25]); and, accompanying the king or his general into battle, they brought back official tidings of its progress or event (2 S 18[19]). In Jer 12[5] both the Hebrew and the English (footmen) seem to be used in the more general sense of racers *on foot* (so RSV).

FOOTSTOOL.—See HOUSE, **8.**

FORBEARANCE.—See LONGSUFFERING.

FORD.—Of the numerous 'fords' or passages of the Jordan, two in ancient times were of chief importance; that opposite Jericho near Gilgal (Jos 2[7], Jg 3[28]), and that at Bethany beyond Jordan (Jn 1[28] RV, RSV; AV Bethabara, q.v.). Bridges are now used in crossing the Jordan. In 2 S 15[28] 17[16] the AV has 'plain' for 'fords' (RV, RSV), and in Jg 12[5f] 'passages' (RV, RSV 'fords'). Other fords were those of the Jabbok (Gn 32[22]) and the Arnon (Is 16[2]). G. L. R.

FOREHEAD.—In Jer 3[3] a harlot's forehead (RSV 'brow') is a type of shamelessness; in Ezk 3[8f] the forehead stands for obstinacy. In 9[4] the righteous receive a mark, probably the letter *Tāw*, on their foreheads. Hence the symbolism in Rev 7[3] etc., where the mark is the Divine signet. It is doubtful what is the mark of the beast (Rev 13[16]); see Swete, *ad loc.* 17[5] is a probable allusion to a custom of Roman harlots. Shaving the forehead in sign of mourning is forbidden (Dt 14[1]). In Ezk 16[12] read 'nose' with AVm, RV, RSV. See also MARKS. C. W. E.

FOREIGNER.—See NATIONS, STRANGER.

FOREKNOWLEDGE.—See PREDESTINATION.

FOREORDINATION.—See PREDESTINATION.

FORERUNNER.—The English word gives the exact sense of the Greek *prodromos*, which, in its classical usage, signifies 'one who goes before'; it may be as a scout to reconnoitre, or as a herald to announce the coming of the king and to make ready the way for the royal journey.

1. John the Baptist was our Lord's 'forerunner.' The word is never applied to him in the NT, but he was the 'messenger' sent 'before the face' of the Lord 'to prepare his way' (Mt 11[10], Mk 1[2], Lk 7[27]; cf Mal 3[1]), and to exhort others to 'make his paths straight' (Mk 1[2]; cf Is 40[3ff]).

2. Only in He 6^{20} is the word 'forerunner' found in the EV (Wycliffe 'the bifor goer,' Rheims 'the precursor'). Instead of the AV 'whither the forerunner has for us entered, even Jesus,' the RSV rightly renders: 'where Jesus has gone as a forerunner on our behalf.' The change is important. To the readers of this Epistle it would be a startling announcement that Jesus had entered the Holy of Holies *as a forerunner*. Thither the Jewish High Priest, one day in the year, went alone (He 9^{7}). He was the people's representative, but he was not their forerunner, for none might dare to follow him. The key-note of the Epistle is that all believers have access with boldness to the presence of the Most Holy God 'in the blood of Jesus'; they have the boldness because their High Priest has inaugurated for them a fresh and living way (10^{19ff}). Already within the veil hope enters with assurance for Jesus has 'gone that we may follow too.' As the Forerunner of His redeemed He has inaugurated their entrance, He makes intercession for them, and He is preparing for them a place (Jn 14^{2}).

J. G. T.—F. W. G.

FOREST.—1. *ya'ar* (root meaning a 'rugged' place), Dt 19^{5}, Jer 46^{23}, Mic 3^{12} (RSV 'wooded height'), etc.; sometimes rendered 'wood'; *e.g.* 2 K 2^{24}. **2.** *hōresh*, a 'wooded place,' 2 Ch 27^{4} (RSV 'wooded hills'), etc.; translated 'wood' 1 S 23^{15} (RSV **Horesh**, a proper name). **3.** *pardēs*, a Persian loan-word, meaning a 'park,' Neh 2^{8} (AV, RV, RSV 'forest'; RVm 'park'). From the many references it is clear that Palestine had more extensive forests in ancient times than to-day—indeed, within living memory there has been a vast destruction of trees for fuel. Considerable patches of woodland still exist, *e.g.* on Tabor and Carmel, in parts of N. Galilee, around Bāniās, and specially in Gilead between *es-Salṭ* and the Jabbok.

E. W. G. M.

FORGETFULNESS.—Ps 88^{12} 'Are thy wonders known in the darkness, or thy saving help in the land of forgetfulness?' The meaning is general, as Coverdale 'the londe where all thinges are forgotten,' but probably more passive than active, that the person is forgotten rather than that he forgets. So Wis 17^{3}; but in Wis 14^{26} 16^{11} the word expresses the tendency to forget (so also Sir 11^{25} AV, RV).

FORGIVENESS.—Like many other words employed to convey ideas connected with the relations of God and man, this covers a variety of thoughts. In both OT and NT we have evidences of a more elastic vocabulary than the EV would lead us to suppose. **1.** The OT has at least three different words all translated 'forgiveness' or 'pardon,' referring either to God's actions with regard to men (cf Ex 34^{7}, Ps 86^{5}, Neh 9^{17}) or to forgiveness extended to men by each other (cf Gn 50^{17}, 1 S 25^{28}). At a very early period of human, or at least of Jewish, history, some sense of the need of forgiveness by God seems to have been felt. This will be especially evident if the words of despairing complaint put into the mouth of Cain be translated literally (see Driver, *The Book of Genesis*, on 4^{13}, cf RVm). The power to forgive came to be looked on as inherent in God, who not only possessed the authority, but loved thus to exhibit His mercy (Dn 9^{9}, Neh 9^{17}, Jer 36^{3}). In order, however, to obtain this gift, a corresponding condition of humiliation and repentance on man's part had to be fulfilled (2 Ch 7^{14}, Ps 86^{5}), and without a conscious determination of the transgressor to amend and turn towards his God, no hope of pardon was held out (Jos 24^{19}, 2 K 24^{4}, Jer $51^{5, 7}$). On the other hand, as soon as men acknowledged their errors, and asked God to forgive, no limit was set to His love in this respect (1 K $8^{36, 50}$, Ps 103^{3}; cf Dt 30^{1-10}). Nor could this condition be regarded as unreasonable, for holiness, the essential characteristic of the Divine nature, demanded an answering correspondence on the part of man made in God's image. Without this correspondence forgiveness was rendered impossible, and that, so to speak, automatically (cf Lv 19^{2}, Jos 24^{19}; see Nu 14^{18}, Job 10^{14}, Nah 1^{3}).

According to the Levitical code, when wrong was done between man and man, the first requisite in order to secure Divine pardon was restitution, which had to be followed up by a service of atonement (Lv 6^{2-7}). Even in the case of sins of ignorance, repentance and its outward expression in sacrifice had to precede forgiveness (Lv 4^{13ff}, Nu 15^{23ff} etc.). Here the educative influence of the Law must have been powerful, inculcating as it did at once the transcendent holiness of God and the need of a similar holiness on the part of His people (Lv 11^{44}). Thus the Pauline saying, 'The law was our custodian until Christ came' (Gal 3^{24}), is profoundly true, and the great priestly services of the Temple, with the solemn and ornate ritual, must have given glimpses of the approach by which men could feel their way and obtain the help indispensable for the needs adumbrated by the demands of the Mosaic institutions. The burden of the prophetic exhortations, 'Turn back, turn back . . . why will you die?' (Ezk 33^{11}; cf Is 44^{22}, Jer 35^{15} 18^{11}, Hos 14^{1}, Jl 2^{13} etc.), would be meaningless if the power to obey were withheld, or the way kept hidden. Indeed, these preachers of moral righteousness did not hesitate to emphasize the converse side of this truth in dwelling on the 'repentance' of God and His returning to His afflicted but repentant people (Jon 3^{9}, Mal 3^{7} etc.). The resultant effect of this mutual approach was the restoration to Divine favour of those who had been alienated, by the free act of forgiveness on the part of God (Ps 85^{4}, Is 55^{7} 59^{20}, Jer $13^{17, 24}$ etc.).

2. We are thus not surprised to learn that belief in the forgiveness of sins was a cardinal article of the Jewish faith in the time of Jesus (Mk 2^{7} || Lk 5^{21}, cf Is 43^{25}). Nor was the teaching of Jesus in any instance out of line with the national belief, for, according to His words, the source of all pardon was His Father (Mk 11^{25f}, Mt 6^{14f}; cf His appeal on the cross, 'Father, forgive them,' Lk 23^{34}). It is true that 'the Son of Man has authority on earth to forgive sins' (Mk 2^{10} || Mt 9^{6} || Lk 5^{24}), but the form of the expression shows that Jesus was laying claim to a delegated authority (cf Lk 7^{48}, where, as in the case of the palsied man, the words are declaratory rather than absolute; see Plummer, *ICC*, *in loc.*). This is more clearly seen by a reference to NT epistolary literature, where again and again forgiveness and restoration are spoken of as mediated 'in' or 'through' Christ (Eph 4^{32}, Col 2^{12ff}, 1 P 5^{10}; cf Eph 1^{7}, Rev 1^{5}, 1 Jn 2^{12} etc.). Here, as in OT, only more insistently dwelt on, the consciousness of guilt and of the need of personal holiness is the first step on the road to God's forgiveness (1 Jn 1^{9}, cf Ps 32^{5} 51^{3} etc.); and the open acknowledgment of these feelings is looked on as the natural outcome of their existence (Ac 19^{18}; cf Ro 10^{10}, 1 Jn 1^{9}). The hopelessness which at times seemed to have settled down on Jesus, when confronted by Pharisaic opposition, was the result of the moral and spiritual blindness of the religious teachers to their real position (Jn 9^{40f}).

3. Again, following along the line we have traced in the OT, only more definitely and specifically emphasized, the NT writers affirm the necessity for a moral likeness between God and man (cf Mt 5^{48}). It is in this region, perhaps, that the most striking development is to be seen. Without exhibiting, in their relations to each other, the Divine spirit of forgiveness, men need never hope to experience God's pardon for themselves. This, we are inclined to think, is the most striking feature in the ethical creations of Jesus' teaching. By almost every method of instruction, from incidental postulate (Mt 6^{12} || Lk 11^{4}, Mk 11^{25}) to deliberate statement (Mt 18^{21ff} 6^{15}, Mk 11^{26}, Lk 17^{4}) and elaborate parable (Mt 18^{23-35}), He sought to attune the minds of His hearers to this high and difficult note of the Christian spirit (cf Col 3^{13}, 1 Jn 4^{11}). Once more, Jesus definitely asserts the limitation to which the pardon and mercy even of God are subjected. Whatever may be the precise meaning attaching to the words 'an eternal sin' (Mk 3^{29}), it is plain that some definite border-line is

referred to as the line of demarcation between those who may hope for this evidence of God's love and those who are outside its scope (Mt 12[32]). See article SIN, III. 1.

4. We have lastly to consider the words, recorded only by St. John, of the risen Jesus to His assembled disciples (Jn 20[23]). It is remarkable that this is the only place in the Fourth Gospel where the word translated 'forgive' (RV) occurs, and we must not forget that the incident of conferring the power of absolution on the body of believers, as they were gathered together, is peculiar to this writer. At the same time, it is instructive to remember that nowhere is St. John much concerned with a simple narrative of events as such; he seems to be engaged rather in choosing those facts which he can subordinate to his teaching purposes. The choice, then, of this circumstance must have been intentional, as having a particular significance, and when the immediately preceding context is read, it is seen that the peculiar power transmitted is consequent upon the gift of the Holy Spirit. On two other occasions somewhat similar powers were promised, once personally to St. Peter as the great representative of that complete faith in the Incarnation of which the Church is the guardian in the world (Mt 16[19]), and once to the Church in its corporate capacity as the final judge of the terms of fellowship for each of its members (Mt 18[18]). In both these instances the words used by Jesus with regard to this spiritual power differ from those found in the narrative of the Fourth Gospel, and the latter is seen to be more definite, profound, and far-reaching in its scope than the former. The abiding presence of the living Spirit in the Church is the sure guarantee that her powers in judging spiritual things are inherent in her (cf 1 Co 2[12-15]) as the Body of Christ. Henceforth she carries in her bosom the authority so emphatically claimed by her Lord, to declare the wondrous fact of Divine forgiveness (Ac 13[38]) and to set forth the conditions upon which it ultimately rests (see Westcott, *Gospel of St. John, in loc.*). Closely connected with the exercise of this Divinely given authority is the rite of Baptism, conditioned by repentance and issuing in 'the forgiveness of sins' (Ac 2[38]). It is the initial act in virtue of which the Church claims to rule, guide, and upbuild the life of her members. It is symbolic, as was John's baptism, of a 'death unto sin and a new birth unto righteousness' (Mk 1[4]=Lk 3[3]; cf Ro 6[4], Col 2[12]). To some it is more than symbolic, for by it, as by visible channel, the living and active Spirit of God is conveyed to the soul, where the fruition of the promised forgiveness is seen in the fulness of the Christian life (Ac 2[38], cf 10[43, 47] 19[5f]).

5. On more than one occasion St. Paul speaks of the forgiveness of sins as constituting the redemption of the human race effected by the death of Christ ('through his blood' Eph 1[7], cf Col 1[14]); and the author of the Epistle to the Hebrews emphasizes this aspect of the atoning work of Jesus by showing its harmony with all with which previous revelation had made us familiar, for 'without the shedding of blood there is no forgiveness' (9[22]). The same writer, moreover, asserts that once this object has been accomplished, nothing further remains to be done, as 'there is no longer any offering for sin' (10[18]) than that which the 'blood of Jesus' (10[19]) has accomplished. The triumphant cry of the Crucified, 'It is finished' (Jn 19[30]), is for this writer the guarantee not only that 'the death of Christ is the objective ground on which the sins of men are remitted' (Dale, *The Atonement*, pp. 430 f); it is also the assurance that forgiveness of sin is the goal of the life and death of Him whose first words from the cross breathed a prayer for the forgiveness of His tormentors.

FORMER RAIN.—See RAIN.

FORNICATION.—See CRIMES AND PUNISHMENTS, 3.

FORTIFICATION AND SIEGECRAFT.—Except in so far as armies might be sent out to engage an invading enemy in open battle (1 K 20), defensive tactics of both Israelites and their predecessors seem to have been based on withdrawal to their walled cities (Heb. *'ārê mibhṣār*), where, until the Assyrians developed the art of siegecraft, the inhabitants were usually safe (2 S 5[6]), unless provisions or water gave out (2 K 6[24-29]), or there was a traitor within the gates (Jg 12[4f] and perhaps Jos 2[18]); however, the OT does record successful attacks on fortified buildings and cities even with very primitive methods (Jg 9[46-49], 2 S 12[26-28]—though 'city of waters' probably means the fort guarding the water supply, so that Rabbath Ammon was perhaps forced to capitulate owing to the loss of its water supply). Main reliance, after utilizing any natural advantages such as a rock outcrop or a sufficiently large mound, was put on encircling **walls,** frequently double (Gibeah), sometimes in several concentric rings (Samaria). The main wall was called *ḥômāh*; the outer **rampart** (or ditch?), *ḥêl*. At *Tell en-Naṣbeh* (Mizpah?) which Judah fortified against Israel *c* 900 B.C. it is estimated that the wall may have been well over 25 feet high; but no Canaanite or Israelite city wall has survived in its original height; many were realigned, strengthened, or destroyed at different stages of their history, so that their reconstruction for any given period is not always possible. We are told that the mound of Jericho contains traces of fourteen different walls or wall-components, even though almost everything later than 2000 B.C. (long before Joshua) has disappeared. Walls might be very differently built; thickness depending partly on material and ultimate height, partly on the site and on the labour available. Several Hyksos settlements show the use of earthen ramparts combined with a ditch. Extensive use of brick may show Egyptian influence, as in the 23-feet thick wall built around Sharuhen, possibly by Shishak himself (1 K 14[25]), and in the 20 feet thick summit wall of Lachish, fortified by Rehoboam (2 Ch 11[9]); though in the revetment lower down the mound stone as well as brick is used. Very often the upper courses of a stone wall were continued in brick, and might even be topped with wooden battlements, as appears to have been the case at Lachish. Stone walling might be megalithic or cyclopean, *i.e.*, using extraordinarily big blocks, as in Shechem, *Tell en-Naṣbeh* and Jericho [the wall of the temple enclosure at Jerusalem still contains stones over 30 feet by 8 feet by 3½ feet, weighing more than 80 tons]; but we find also the use of rough stone, occasionally plastered to hinder climbing, as at *Tell en-Naṣbeh*. As stone working technique and tools improved, or finances allowed, we find an extending use of ashlar, first merely for the more exposed parts such as corners (so in the 9th cent. fort of Hazor), but then to face complete walls, as in the massive Jebusite (?) wall of Jerusalem, which is still 27 feet thick at its highest surviving level, and maybe even 40 feet at its base. Particularly worthy of mention are the defences of Samaria, of which it has been said, 'the stone masonry is of such superb workmanship that nothing has ever been found in Palestine that surpasses it' (G. E. Wright, *Biblical Archaeology*, p. 153). A popular Israelite technique, possibly borrowed from Hittite examples, was the casemate system, in which the 'rooms' in a double wall with cross partitions were filled with packed rubble, as in the Solomonic wall of Hazor.

Attacks on the walls were met by building out **bastions** along their length, especially at the corners (2 Ch 26[15], Zeph 1[16] RVm), spaced not more widely than double bow or sling shot. Danger from calcination (Jg 9[49]) and ramming (Is 7[6]) was minimized by having a sloping revetment along the foot of the wall, as at Lachish. An important precaution, not always sufficiently observed, was to take the foundations down to bedrock, as in Samaria, or at least, well down into earlier strata of the *tell*.

The **gates** were an obvious point of weakness; in troubled times one, or at most, two is the usual number,

but in Nehemiah's Jerusalem the names of nine gates are recorded (Neh 3[1-32]). Even the simplest gates usually had bastions or **gate towers** on each side (2 Ch 26[9]), and it was customary to have a gate on the outer and inner face of the wall, as at Mahanaim, where David is found sitting 'between the two gates' (2 S 18[24]). Here we further learn that there was a stair leading up to an upper storey in the gate tower (v.[33]), the roof of which was apparently on a level with the top of the city wall (v.[24]). In *Tell Beit Mirsim* (Debir or Kiriath-sepher) the two 'entrances were so constructed that one approached with his left side to the city wall, passed in through one gate, and then turned at right angles to enter the city itself by a second gate, an indirect mode of ingress which is still to be seen in the Damascus and Jaffa gates in Jerusalem' (C. C. McCown, *The Ladder of Progress in Palestine*, p. 94). One of these gateways was sufficiently wide to admit a chariot, but the other was no more than 3 feet wide. Many city entrances had three sets of doors, with guardrooms opening off each bay, so giving a plan reminiscent of two E's opposed, 'E∃' (*e.g.* the NW. gate of Shechem).

The gate itself, the 'door of the gate' (Neh 6[1]), consisted ordinarily of two leaves (Is 45[1]) of wood. For greater security against fire these were often overlaid with bronze (Ps 107[16], Is 45[2]). The leaves were hung on pivots which turned in sockets in sill and lintel, and were kept closed by bolts let into the former. A strong bar, or bars, of wood, bronze (1 K 4[13]), or iron (Ps 107[16], Is 45[2]) secured the whole gate, passing transversely into sockets in the gate-posts, as we learn from Samson's exploit at Gaza (Jg 16[1-3]), and proved by the discovery of the actual running slot in one gate-post and the receiver in the other at *Tell en-Naṣbeh*. 'To have charge of the gate' (2 K 7[17]) was a military post of honour. In war-time, at least, a sentinel was posted on the roof of the gate-house or tower (2 S 18[24], 2 K 9[17]). [Plans, etc., may be found in *ANEP*, figs. 711–721.]

It remains to deal briefly with the **siegecraft** of the Hebrews and their contemporaries. A fortified (RV 'fenced') place might be captured in three ways: (*a*) by assault or storm, (*b*) by a blockade, or (*c*) by a regular siege. (*a*) The first method was most likely to succeed in the case of places of moderate strength, or where treachery was at work (cf Jg 1[23ff]). The assault was directed against the weakest point of the *enceinte*, particularly the gates (cf Is 28[6]). Before the Hebrews learned the use of the battering-ram, entrance to an enemy's city or fortress was obtained by setting fire to the gates (Jg 9[49, 52]), and by scaling the walls by means of scaling-ladders, under cover of a shower of arrows and sling-stones. According to 1 Ch 11[6], Joab was the first to scale the walls of the Jebusite fortress of Zion, when David took it by assault. Although **scaling-ladders** are explicitly mentioned only in 1 Mac 5[30]—a prior reference may be found in Pr 21[22]—they are familiar objects in the Egyptian representations of sieges from an early date, as well as in the later Assyrian representations, and may be assumed to have been used by the Hebrews from the first. In early times, as is plain from the accounts of the capture of Ai (Jos 8[10ff]) and Shechem (Jg 9[42ff]), a favourite stratagem was to entice the defenders from the city by a pretended flight, and then a force placed in ambush would make a dash for the gate.

(*b*) The second method was to surround the city, and by preventing ingress and egress, to starve it into surrender. This was evidently the method adopted by Joab at the **blockade** of Rabbath-Ammon (see above).

(*c*) In conducting a regular **siege**, which of course included both blockade and assault, the first step was to '**cast up a mound**' (2 S 20[15], 2 K 19[32], Is 37[33]—AV '**bank**,' RV '**mount**'). This was of earth which was gradually advanced till it reached the walls, and was almost equal to them in height, and from which the besiegers could meet the besieged on more equal terms. The 'mound' is first met with in the account of Joab's siege of Abel of Beth-maacah (2 S 20[15ff]). Joab is represented as 'battering' (RVm, 'undermining') the wall, but the text is here in some disorder. **Battering-rams** are first mentioned in Ezekiel, and are scarcely to be expected so early as the time of David. The Egyptians used a long pole, with a metal point shaped like a spear head, which was not swung but worked by hand, and could only be effective, therefore, against walls of crude brick (see illustration in Wilkinson, *Anc. Egypt*, i, 242).

The **battering rams** (Ezk 26[9]; RV 'battering engines'; AV 'engines of war') of the Assyrians were called 'rams' by the Hebrews (Ezk 4[2] 21[22]), from their butting action, although they were without the familiar ram's head of the Roman *aries*. The Assyrian battering-ram ended either in a large spear-head, as with the Egyptians, or in a flat head shod with metal, and was worked under the shelter of large wooden towers mounted on four or six wheels, of which there are many representations in the Assyrian sculptures (illustrated in Toy's *Ezekiel*, 102). These towers were sometimes of several storeys, in which archers were stationed, and were moved forward against the walls on the mounds described above.

When Nebuchadnezzar laid siege to Jerusalem, his troops are said to have 'built **siegeworks** against it round about' (2 K 25[1], cf Ezk 4[2]), but the original term is obscure, though probably to be understood in the sense of a siege-wall or *circumvallatio*—the 'bank' of Lk 19[43]—for the purpose of making the blockade effective. On the other hand, the siegeworks of Dt 20[20], also Ec 9[14], which had to be made of wood other than 'trees for food,' properly denote wooden forts or other **siege works** (Is 29[3]) built for the protection of the besiegers in their efforts to storm or undermine the walls.

The Assyrian sculptures give life-like pictures of the various operations of ancient siegecraft (see *ANEP*, Section IV). Here we see the massive battering rams detaching the stones or bricks from an angle of the wall, while the defenders, by means of a grappling chain, are attempting to drag the ram from its covering tower. There the archers are pouring a heavy fire on the men upon the wall, from behind large rectangular shields or **screens** of wood or wickerwork, standing on the ground, with a small projecting cover. These are intended by the 'shield' of 2 K 19[32], the 'roof of shields' of Ezk 26[8], and the '**mantelet**' of Nah 2[5], all named in connexion with siege works. In another place **miners** are busy undermining the wall with picks, protected by a curved screen of wickerwork supported by a pole (illustrations of both screens in Toy, *op. cit.*, 149; cf Wilkinson, *op. cit.* i, 243).

The monuments also show that the Assyrians had machines for casting large stones long before the *tormenta*, or siege-artillery, are said to have been invented in Sicily in 399 B.C. By the 'artillery' of 1 S 20[40] AV is, of course, meant the ordinary bow and arrows; but Uzziah is credited by the Chronicler with having 'made **engines**, invented by skilful men, to be on the towers and the corners, to shoot arrows and great stones' (2 Ch 26[15]). The Books of the Maccabees show that by the 2nd cent. at least, the Jews were not behind their neighbours in the use of the **artillery** (1 Mac 6[51f] AV) of the period, 'engines of war, and instruments for casting fire and stones, and pieces to cast darts and slings.' (A detailed description, with illustrations, of these *catapultae* and *ballistae*, as the Romans termed them, will be found in the article 'Tormentum' in Smith's *Dict. of Gr. and Rom. Antiq.*). At the siege of Gezer (such is the best reading, 1 Mac 13[43]) Simon is even said to have used effectively a piece of the most formidable siege-artillery then known, the *helepolis* (literally 'city-taker,' RV 'engine of siege'), which Titus also employed in the siege of Jerusalem (for description see 'Helepolis' in Smith, *op. cit.*). In this siege the Jews had 300 pieces for discharging arrows or rather bolts (*catapultae*), and 40 pieces for casting stones (*ballistae*), according to Josephus, who gives a graphic account of the working of these formidable 'engines of war' in his story of the siege of Jotapata (*BJ* III. vii. 23 [240 ff]).

The aim of the besieged was by every artifice in their power to counteract the efforts of the besiegers to scale

or to make a breach in the walls (Am 4^3), and in particular to destroy their siege works and artillery. The battering-rams were rendered ineffective by letting down bags of chaff and other fenders from the battlements, or were thrown out of action by grappling chains, or by having the head broken off by huge stones hurled from above. The mounds supporting the besiegers' towers were undermined, and the towers themselves and the other engines set on fire (1 Mac 6^{13}; cf the 'flaming darts' or arrows of Eph 6^{16}).

In addition to the efforts of the bowmen, slingers, and javelin-throwers, who manned the walls, boiling oil was poured on those attempting to place the scaling-ladders, or to pass the boarding bridges from the towers to the battlements. Of all these and many other expedients the *Jewish War* of Josephus is a familiar repertoire. There, too, will be found the fullest account of the dire distress to which a city might be reduced by a prolonged siege (cf 2 K 6^{25ff}). See also BULWARK, CITADEL.

A. R. S. K.—D. R. Ap-T.

FORTRESS.—See CITADEL.

FORTUNATUS.—The name of a member of the household of Stephanas, and a Corinthian. With Stephanas and Achaicus he visited St. Paul at Ephesus (1 Co 16^{17}); he had probably been baptized by the Apostle himself (1^{16}).—The former view that he is identical with the Fortunatus mentioned in 1 Clem 65 has been abandoned: this other Fortunatus had always lived at Rome (63) and nothing suggests that this name belongs to a Corinthian. E. H.

FORTUNE.—See GAD (tribe and god).

FOUNDATION.—Great importance was attached to the laying of the foundation. It was accompanied by human sacrifice, as may be seen in the Babylonian records; a possible trace occurs in the story of Hiel (1 K 16^{34}; but see *ICC, ad loc.*). Hence the stress on the size and splendour of the foundation, as in Solomon's Temple (7^9). It is a natural metaphor for the ultimate basis on which a thing rests (Job 4^{19}, Ezk 13^{14}, Mt 7^{25}, Lk 6^{48}). Righteousness and judgment are the foundation of God's throne (Ps 89^{14} 97^2 RV and RSV). 'The city which has foundations' is the type of the real and eternal (He 11^{10}). The Apostles themselves are the foundation of the New Jerusalem, formed of all manner of precious stones (Rev $21^{14, 19}$). 'The Apostolic Church is conditioned through the ages by the preaching and work of the Apostolate' (Swete, *ad loc.*; cf Is 28^{16}, Mt 16^{18}, Eph 2^{20}). In 1 Co 3^{10} the metaphor is slightly different, the preaching of Jesus Christ being the one foundation (cf Is 19^{10} RVm, where the word is used of the chief men of the State [RV 'pillars'; RSV 'the pillars of the land']). In the frequent phrase 'from the foundation of the world,' the word is active, meaning 'founding.' 'Foundations' occurs similarly in a passive sense, the earth being more or less literally conceived of as a huge building resting on pillars, etc. (Ps $18^{7, 15}$ 24^2, Is 24^{18}). In Ps 11^3 75^3 82^5, Ezk 30^4, the idea is applied metaphorically to the 'fundamental' principles of law and justice on which the moral order rests. In 2 Ch 3^3, Is 6^4 16^7, Jer 50^{15}, RV or RSV should be followed. In 2 Ch 23^5 the 'gate of the foundation' is obscure; possibly we should read 'the horse-gate.' See also HOUSE, 3. C. W. E.

FOUNDATION, GATE OF THE.—See JERUSALEM, GATES OF.

FOUNTAIN.—A word applied to living springs of water as contrasted with cisterns (Lv 11^{36}; RSV 'spring'); specifically of Beer-lahai-roi (Gn 16^7; RSV 'spring'), Elim (Nu 33^9; RV, RSV 'spring'), Nephtoah (Jos 15^9; RSV 'spring'), and Jezreel (1 S 29^1; so RSV here). The porous chalky limestone of Palestine abounds in good springs of water, which, owing to their importance in a country rainless half the year, were eagerly coveted (Jg 1^{15}). In many springs the flow of water has been directed and increased by enlarging tunnels the fissures through which the water trickled; many of these tunnels are of considerable length. Specimens exist at 'Urtas, Bittîr, and other places near Jerusalem. R. A. S. M.

FOUNTAIN GATE.—See JERUSALEM, GATES OF.

FOWL.—The word 'fowl' is used in AV and RV for any kind of bird, *e.g.* Gn 1^{20} (RSV 'birds'), where the Hebrew word is *'ôph*. RSV retains 'fowl' for this word only at Lv 7^{26}. Sometimes the two words 'bird' and 'fowl' are employed in AV simply for the sake of variety, or perhaps to distinguish two different words in the original. Thus Gn 15^{10} 'the birds (Heb. *ṣippōr*) divided he not,' 15^{11} 'when the fowls (Heb. *'ayiṭ*) came down' (RV, RSV 'birds' and 'birds of prey'); Jer 12^9 'the birds (Heb. *'ayiṭ*) round about' (RV, RSV 'birds of prey'), Ps 8^8 'the fowl (Heb. *ṣippōr*) of the air' (so RV; RSV 'birds'). In 1 K 4^{23} RSV retains from AV and RV 'fatted fowl' for *barbūrîm*, which denotes some kind of table bird which cannot be certainly identified. See BIRD.

FOWLER.—See SNARES.

FOX.—**1.** *shû'āl* is rendered 'fox' in AV and RV (but RVm 'jackal' except Ezk 13^4, Ca 2^{15}), while RSV has 'fox' in Jg 15^4, Ezk 13^4, Ca 2^{15}, Neh 4^3, but 'jackal' in Ps 63^{10}, La 5^{18}. See JACKAL. **2.** *alōpēx* (Gr.), Mt 8^{20}, Lk 9^{58} 13^{32}. In the NT there is no doubt that the common fox and not the jackal is intended. It is noted in Rabbinical literature and in Palestinian folk-lore for its cunning and treachery. It burrows in the ground (Lk 9^{58}). The small Egyptian fox (*Vulpes nilotica*) is common in S. Palestine, while the Tawny fox (*V. flavescens*), a larger animal of lighter colour, occurs farther north.

FRANKINCENSE (Heb. *lᵉbhônāh*; Gr. *libanos* Mt 2^{11}, Rev 18^{13}).—Frankincense is in six passages (Is 43^{23} 60^6 66^3, Jer 6^{20} 17^{26} 41^5) mistranslated in AV '**incense**' but correctly in RV (RSV retains 'incense' in the last of these). It is a sweet-smelling gum, obtained as a milky exudation from various species of *Boswellia*, the frankincense tree, an ally of the terebinth. The gum was imported from S. Arabia (Is 60^6, Jer 6^{20}); it was a constituent of incense (Ex 30^{34}); it is often associated with myrrh (Ca 3^6 4^6, Mt 2^{11}); it was offered with the showbread (Lv 24^7). E. W. G. M.

FRAY.—This obsolete English verb is found in AV, Zec 1^{21} and 1 Mac 14^{12} ('every man sat under his vine and his fig tree, and there was none to fray them'); and 'fray away' occurs in Dt 28^{26}, Jer 7^{33}, Sir 22^{20} ('whoso casteth a stone at the birds frayeth them away'). It is a shortened form of 'afray,' of which the past participle 'afraid' is still in use.

FREE.—In the use of this adjective in the English Bible notice 1 P 2^{16} 'as free men, yet without using your freedom as a pretext for evil; but live as servants of God,' that is, free from the Law, yet servants (slaves) to the higher law of love to God. Ps 88^5 'free among the dead,' is a difficult passage; the probable meaning of the Hebrew is 'forsaken among.' Ac 22^{28} AV 'I was free born,' that is, as a Roman citizen. 2 Th 3^1 'Pray for us, that the word of the Lord may have free course' (Greek literally 'may run,' as AVm and RV='speed on and triumph' (RSV). 'Free' means 'unhindered' as in Shakespeare's *Love's Labour's Lost*, v. ii. 738, 'For mine own part, I breathe free breath.' Ps 51^{12} 'uphold me with thy free spirit' (RVm and ARV 'willing,' RSV 'a willing'): the word means generous, noble, and the reference is to the man's own spirit (RV 'with a free spirit').

FREEDMEN.—Ac 6^9 mentions a synagogue 'of the Freedmen (as it was called), and of the Cyrenians, and of the Alexandrians.' According to this text the 'Freedmen' (AV '**Libertines**') of Rome could have been descendants of those Jews of Jerusalem whom Pompey had carried away as slaves. But the Armenian text reads 'Libyans,' and this would tally with the two other African groups. E. H.

FREEDOM.—See LIBERTY.

FREELY.—The use to observe is when 'freely' means 'gratuitously,' as Nu 11[5] 'We remember the fish, which we did eat in Egypt freely' (RSV 'for nothing'; Vulgate *gratis*); Mt 10[8] 'freely ye received, freely give' (RSV 'without pay').

FREEWILL.—See PREDESTINATION.

FRESHET.—Found only in Job 6[15] RSV, where it renders *'aphîḳ neḥālîm*, a combination of two words elsewhere rendered 'stream' or 'brook'; see BROOK. AV has 'stream of brooks,' and RV 'channel of brooks.'

FRINGES.—In Nu 15[37ff] (AV) the Hebrews are commanded to 'make them fringes (Heb. *ṣîṣîth*) in the borders of their garments' (RSV 'tassels on the corners of their garments'). A similar ordinance is found in Dt 22[12]: 'You shall make yourself tassels (RVm 'twisted threads,' Heb. *gedhîlîm*) on the four corners of your cloak with which you cover yourself' (RSV). The 'cloak' (Heb. *kesûth*, literally 'covering') here referred to is the upper garment of the Hebrews, as is evident from Ex 22[27], where the same word is defined as the *śimlāh* or 'mantle,' the upper garment in question, as described under DRESS, 4 (*a*).

The 'fringes' made for this garment, however, are not to be considered a continuous fringe (or row of tassels) all around, like those portrayed on Assyrian reliefs, but with RSV as tassels of twisted or plaited threads fastened to the four corners of the outer garment. It was further required 'to put upon the tassel of each corner a cord of blue' (Nu 15[38] RSV). The precise meaning of this injunction is uncertain. It is usually taken to mean that each tassel was to be attached by means of this cord of blue, actually blue-purple or violet (see COLOURS, **5**), to a corner of the garment.

That this ordinance was observed by the Jews of NT times is probably to be seen in the reference to the 'long fringes' of the Pharisees in Mt 23[5]. The references to the significance of the 'fringe' (AV 'hem' or 'border'; RV 'border') of our Lord's upper garment (Mt 9[20] 14[36], Mk 6[56], Lk 8[44]) may point up the continued observance of the ancient ordinance. In the passage of Numbers it is expressly said that the object of this ordinance was to furnish the Hebrews with a visible reminder of the obligation resting upon them as Yahweh's chosen people to walk in His law and to keep all His commandments. Since tasselled garments are known through representations on the walls of Egyptian tombs and elsewhere to have been used much earlier than the time of the Hebrews, it is altogether probable that the object of the Hebrew legislation was 'to make a deeply rooted custom serve a fitting religious purpose' (G. B. Gray, *Numbers*, ICC, 183 f).

These tassels are still worn by orthodox Jews, attached to the tallith or prayer-shawl, and to the smaller tallith, a kind of undergarment covering the chest and the upper part of the back. The addition of the blue thread is no longer necessary. (For details and illustrations, see Hastings' *DB* i, 627[a]; ii, 69[a]; *Jewish Ency.* xi, 677; *Universal Jewish Ency.* iv, 461.) A. R. S. K.—W. F. S.

FROCK.—In the Greek text of Sir 40[4] the poor man's dress is said to be of unbleached linen, paraphrased in AV as 'a linen' and in RV as 'a hempen frock,' RSV 'burlap.' The Hebrew original has, 'he that wraps himself in a mantle of hair' (Smend) for which see DRESS, 4 (*c*).

FROG.—**1.** Heb. *ṣepharde'a*, Ex 8[2-14], Ps 78[45] 105[30]—one of the plagues of Egypt. **2.** Greek *batrachos*, Rev 16[13f], a type of uncleanness. The edible frog and the little green tree-frog are both common all over the Holy Land.

FRONTLETS.—See ORNAMENTS, **2**; PHYLACTERIES.

FROWARD.—'Froward' is a dialectic form of 'fromward'; it is the opposite of 'toward,' as we say 'to and fro' for 'to and from.' Thus its meaning is *perverse*. The word is used chiefly in Proverbs, AV. In NT it occurs only once, 1 P 2[18] (RSV 'overbearing'), where the Greek means literally tortuous like the course of a river, and then is applied to conduct that is not straightforward. **Frowardly** is found in Is 57[17] 'and he went on frowardly (RSV 'backsliding') turning away,' as AVm. **Frowardness** occurs only in Proverbs (2[14] 6[14] 10[32]). Barlowe says 'Moyses the most faythfull seruaunte of God was partely by their frowardnes debarred fro the plesaunte lande of behest.'

FRUIT.—See FOOD, **4.**

FRYING PAN.—See HOUSE, **9.**

FUEL.—The principal 'fuel [literally 'food'] of fire' (Is 9[5, 19]) in use among the Hebrews was undoubtedly wood, either in its natural state or, among the wealthier classes, as charcoal (see COAL). The trees which furnished the main supply (cf Is 44[14ff]) probably differed little from those so employed in Syria at the present day, for which see *PEFSt.*, 1891, 118 ff. Among other sources of supply were shrubs and undergrowth of all kinds, including the broom (Ps 120[4] RVm, RSV; AV, RV 'juniper') and the buck-thorn (58[9]); also chaff and other refuse of the threshing-floor (Mt 3[12]); and withered herbage, the 'grass' of Mt 6[30]. The use of dried animal dung as fuel, which is universal in the modern East, was apparently not unknown to the Hebrews (cf Ezk 4[12-15]). See further, HOUSE, **7.**

FULFIL.—This verb is used in the Bible in several senses.

1. To denote the completion of a fixed time, as the time of pregnancy (Gn 25[24], Lk 2[6] [RV]), or of a period ordained by God (Ex 23[26], Mk 1[15], Lk 21[24]).

2. To express the satisfying of a request (Ps 20[5], Est 5[8]) or desire (Ps 145[19], Pr 13[19]).

3. To denote the execution of a vow (Lv 22[21], Nu 15[3]).

4. To express perfect obedience to the law of Moses (Ro 13[10]) or of Christ (Gal 5[13f] 6[2], Ja 2[8]), or to the demands of righteousness (Mt 3[15]).

5. To indicate the correspondence of events with the prior announcement or promise of God (1 S 3[12], 1 K 12[15], 2 Ch 36[21], Jer 29[10]). The NT frequently notes the fulfilment of the hope or promise of the OT in Christ (Mt 14[49], Lk 24[44], Jn 18[9] 19[24, 36], Ac 3[18] 13[27, 32f]), especially in Matthew (1[22] 2[15, 17, 23] 4[14] 8[17] 12[17] 13[14, 35] 21[4] 26[54, 56] 27[9]). The idea of the fulfilment of the hope or promise of the OT in Christ is often present when the term is not used (Lk 24[27, 32], Ac 17[2f] 28[23], 1 Co 15[3f]).

FULLER.—See ARTS AND CRAFTS, **6.**

FULLER'S FIELD.—An unidentified spot near Jerusalem. Beside the conduit in the highway leading to it Isaiah met Ahaz (Is 7[3]), and here the messengers of Sennacherib stood to demand the surrender of the city (2 K 18[17], Is 36[2]).

FULNESS.—See PLEROMA.

FURLONG.—See WEIGHTS AND MEASURES.

FURNACE.—EV translation of **1.** *kibhshān* in Gn 19[28] (also AV and RV in Ex 9[8] etc.; RSV 'kiln'); **2.** *'alîl* in Ps 12[6]; **3.** *kûr* in Dt 4[20], 1 K 8[51] etc.; **4.** *'attûn* in Dn 3[6, 11] etc. These all stand for either a brick-kiln or a smelting furnace. **5.** *tannûr* in Is 31[9] (also AV and RV in Gn 15[17] [RSV 'firepot']; RV in Mal 4[1] [AV and RSV 'oven'] and Ps 21[9] [AV and RSV 'oven']). This is better rendered 'oven' (as in EV in Ex 8[3], Lv 2[4] etc., La 5[10], Hos 7[4, 6]). See BREAD.

At Ezion-geber (q.v.) Nelson Glueck uncovered the furnaces of a great copper refinery, probably dating from the time of Solomon.

FURNACES, TOWER OF THE.—See JERUSALEM [GATES OF].

FURNITURE.—In the AV 'furniture' is used in the general sense of furnishings, just as Bunyan speaks of 'soldiers and their furniture' (*Holy War*, p. 112). **1.** For the details of house furniture, see HOUSE, **8.** In this sense we read also of 'the furniture of the tabernacle' (Ex 31[7] AV and RV [RSV 'furnishings]', Nu 3[8] RV

[AV ' instruments,' RSV ' furnishings ']), and elsewhere. For the less appropriate ' furniture ' of the table of showbread and of ' the candlestick ' (Ex 31^{8f}), RV has ' vessels ' and RSV ' utensils.'

2. The ' camel's furniture ' of Gn 31^{34} AV and RV (RSV ' saddle ') was a ' camel-palankeen ' (*Oxf. Heb. Lex.*, p. 1124), ' a crated frame, with cushions and carpets inside, and protected by an awning above, fastened to the camel's saddle ' (Driver, *Genesis, in loc.*), still used by women travellers in the East. A. R. S. K.

G

GAAL, son of Ebed (Jg 9^{26ff}), organized the rising against Abimelech by the discontented in Shechem. Zebul, Abimelech's officer there, warned his master, who came with a strong force, and defeated the rebels under Gaal outside the city. Gaal and his brethren were driven out of Shechem, and terrible vengeance was taken upon the disaffected city. See ABIMELECH, 2.
W. E.

GAASH.—A mountain in Ephraim (Jos 24^{30}, Jg 2^{9}), near Timnath-serah (q.v.). The brooks of Gaash are mentioned in 2 S 23^{30}, 1 Ch 11^{32}.

GABA.—AV form of **Geba** (q.v.) in Jos 18^{24}, Ezr 2^{26}, Neh 7^{30}.

GABAEL.—1. A distant ancestor of Tobit (To 1^{1}). **2.** A friend and kinsman of Tobit, residing at Rages in Media. To him Tobit, when purveyor to the king of Assyria, once entrusted, as a deposit, ten talents of silver (To 1^{14}). When blindness and poverty came on Tobit in Nineveh, he recollected, after prayer, the long-forgotten treasure (To 4^{1}), and wished his son Tobias to fetch it (v.^{20}). Tobias found a guide, Raphael in disguise, who said he had lodged with Gabael (To 5^{6}). When Tobias married Sarah in Ecbatana, he sent Raphael for the deposit (9^{2}).

GABATHA.—One of two eunuchs whose plot against Artaxerxes (the Ahasuerus, *i.e.* Xerxes, of canonical Esther) was discovered and frustrated by Mordecai (AV, RV Mardocheus), Ad. Est 12^{1}. In Est 2^{21} he is called **Bigthan** and in 6^{2} **Bigthana.**

GABBAI.—A Benjamite (Neh 11^{8}, but text doubtful).

GABBATHA (Jn 19^{13}).—The meaning of this word is ' height ' or ' elevation.' It is the Aramaic word rendered by the Greek *lithostrōton* or **' pavement.'** Tradition has identified as Gabbatha an extensive sheet of Roman pavement excavated near the Ecce Homo Arch. It certainly covered a large area, and the blocks of stone composing it are massive, the average size being 4 ft. by 3 ft. 6 in. and nearly 2 ft. thick. The pavement is in parts roughened for the passage of animals and chariots, but over most of the area it is smooth. The paved area was on a lofty place, the ground rapidly falling to east and west, and was in close proximity to, if not actually included within, the Antonia, the Roman fortress north of the Temple. E. W. G. M.—**E. G. K.**

GABBE, 1 Es 5^{20} (RV).—See GEBA, **1.**

GABDES, 1 Es 5^{20} (AV).—See GEBA, **1.**

GABRIAS.—The *brother* of the Gabael to whom Tobit entrusted ten talents of silver (To 1^{14}; in 4^{20} AV, RV, and RSV following LXX have ' Gabael the *son* of Gabrias ').

GABRIEL (' man of God ' or perhaps ' God has shown himself mighty ').—Appears in the Bible four times. To Daniel he explains the vision of the ram and the he-goat, Dn 8$^{15-26}$, and relates the decree of the seventy weeks of years, Dn 9$^{21-27}$. In Lk 1$^{11-20}$, Gabriel announces to Zechariah the birth of a son John to Elizabeth, in 1$^{26-35}$ to Mary the birth to her of a son Jesus. Gabriel is regarded as one of the first seven angels on the basis of such passages as To 12^{15}, En 90^{21}, Rev 8^{2}. He is also named as one of the first four, En 9^{1} 40^{9} 54^{6}, and is probably included as one of the first three in En 90^{31}. He ranks next to Michael. According to the Bible he stands before God, Lk 1^{19}, and reveals His will and purpose to men. In the extra-biblical literature in addition he prays and intercedes for mankind, at the same time destroying the wicked, including Sodom and Sennacherib's host. He presides over ' all the powers,' particularly fire, thunder, and the ripening processes of nature. C. C. Ro.

GAD.—A god whose name appears in Gn 30^{11} (' by the help of Gad '; so in v.^{13} ' by the help of Asherah '); in the place-names Baal-gad (Jos 11^{17} 12^{7} 13^{5}) and Migdal-gad (Jos 15^{37}); and in the personal name Azgad (Ezr 2^{12}, Neh 7^{17} 10^{15}). In Is 65^{11} Gad (RV, RSV ' Fortune ') and Meni (RV, RSV ' Destiny ') are named as two demons with whom the Israelites held communion (see MENI). Gad was probably an appellative before it became a personal name for a divinity, and is of Aramaean, Arabian, and Syrian provenance, but not Babylonian. He was the god who gave good fortune (Gr. *Tyche*), and presided over a person, house, or mountain. W. F. C.

GAD.—' The seer ' (1 Ch 29^{29}), ' David's ' or ' the king's seer ' (2 S 24^{11}, 1 Ch 21^{9}, 2 Ch 29^{25}), or ' the prophet ' (1 S 22^{5}, 2 S 24^{11}), who acted as David's counsellor in peril during the period when David dwelt in ' the stronghold ' (1 S 22^{5}), and who announced the Divine condemnation on the royal census and advised the erection of an altar on Araunah's threshing-floor (2 S 24^{11ff}, 1 Ch 21^{9ff}). The Chronicler names him as having written an account of some part of his master's reign (1 Ch 29^{29}). A late conception associated him with the prophet Nathan in the task of planning some of the king's regulations with reference to the musical part of the service (2 Ch 29^{25}).

GAD.—The first son of Zilpah, Leah's maid, by Jacob, and full brother to Asher (Gn 30^{9ff} 35^{26}). According to 30^{11} the name, meaning ' Fortune,' was given to the child by Leah because his birth had brought her good fortune. It is, despite this popular etymology, most probably the name of a deity referred to in Is 65^{11}. Gn 49^{19} implies that the name means a raiding troop and connects it with the tribe's experience in border warfare. Similarly in Dt 33^{20} the tribe is compared to ' a lion that tears the arm and the crown of the head,' and in 1 Ch 12$^{8, 14}$ the Gadites who joined David are described as leonine in appearance and incomparable in combat: ' Their faces are as the faces of lions, the smallest is equal to a hundred and the greatest to a thousand ' (RV, a translation preferable to that of RSV).

Gad and Asher were respectively eponyms of an east-Jordan tribe and of a tribe bordering on Tyre in the north. It has been suggested that the reason for their association as the two sons of Zilpah was that, like Gad, Asher was the name of a deity. Present-day scholars are, however, inclined to question this; and even if it were so, it would leave unexplained the figure of Zilpah, whose children were reckoned as children of Leah her mistress (cf Gn 30^{3}). Possibly some light is thrown upon the problem by Leah's words in Gn 30$^{11, 13}$, ' Good fortune ' and ' happy am I.' These curiously ignore the fact that she had already borne Jacob four sons; and this may suggest that the author of the birth chronicle of Jacob's children at this point incorporated in his narrative an independent tradition of the births of Gad and Asher,

in which their close association reflected some historical or legendary relationship, unconnected with Israelite history, and therefore simply ignored in the context of the Jacob legend. (Cf the article on SIMEON where it is suggested that the close association of Simeon and Levi reflected in Gn 34^{25ff} 49^{5ff} may possibly reflect the tradition of a relationship which ante-dated their inclusion among the sons of Jacob.) If this is the case it is not impossible that the Asher in this tradition was another figure than the eponym of the Israelite tribe with whom he was secondarily identified by the author of the birth chronicle. (Cf the article on CAIN where it is suggested that the Cain of Gn 4^{13-15} was originally another figure than the Cain of vv.^{3ff}.)

It appears that Gad, notwithstanding the genealogy, was a late tribe. In the Song of Deborah the two east-Jordan groups referred to are Reuben and Gilead; Gad is not mentioned.

The families of Gad are given by P in Gn 46^{16} and Nu 26^{15ff}. 1 Ch 5^{11ff} repeats them with variations. In the Sinai census they had 46,650 men of war (Nu 1^{24f}); in the census in the plains of Moab they numbered 40,500 (26^{15ff}). In the lists of the tribes in Numbers, the position of Gad varies: 11th in 1^{14}; 6th in 2^{14f}; 3rd in 10^{20}.

The reason assigned by the tradition for the settlement of Gad and Reuben east of the Jordan is that they were pastoral tribes, with large herds and flocks, and that they found the land pre-eminently adapted to their needs. They therefore obtained from Moses permission to settle there on condition that they first helped the west-Jordan tribes in the work of the conquest (Nu 32^{1-33}, Dt 3^{18}, Jos 13^{8ff} 22^{1ff}). Nu 32^{34-38} lists eight towns lying within the territory of Gad. The most southerly, Aroer, lay upon the Arnon; the most northerly, Jogbehah, not far from the Jabbok. Ataroth, another of these towns, is mentioned on the Moabite stone (see MESHA), and the 'men of Gad' are there said to have dwelt within it 'from of old.' Within this region six towns, clustering around Heshbon, are assigned to Reuben. But in Jos 13^{15ff} Reuben has all to the south of Heshbon, and Gad all to the north of it. The fact is there was no clearly marked boundary between the two tribes and Gad ultimately absorbed Reuben. The boundary between Gad and the half-tribe of Manasseh was similarly unstable.

In the time of the Judges, Gilead (including the territory of Gad) was threatened, if not occupied, by the Ammonites until Jephthah defeated them (Jg 11). According to 1 Ch $12^{1, 8-15}$, the Gadites supported David against Saul; no mention is made of this in 1 Samuel, however, so that the Chronicler's statement should be received with the utmost caution. 1 K 12^{25} says that Jeroboam built (that is rebuilt) Penuel which was in the territory of Gad. Some have interpreted the passage as meaning that Jeroboam moved his capital to Penuel, but there is no suggestion of this elsewhere in 1 Kings. Possibly he withdrew there temporarily in the face of Shishak's invasion of Palestine (cf 1 K 14^{25}).

In 734 Tiglath-pileser III., intervening against Rezin of Syria and Pekah of Israel, following the appeal of Ahaz of Judah for help (2 K 16^{7ff}), seized the territory of Gad, and 'carried the people captive to Assyria' (2 K 15^{29}). While it is impossible to determine the actual extent of the deportation it is significant that Gad henceforth played no part in the history of Israel.

J. A. C.—C. A. Si.

GAD (VALLEY OF).—Mentioned only in 2 S 24^{5} (AVm, RV; AV 'river of Gad'), and there the text should read 'in the midst of the valley *toward* Gad' (so RVm, RSV), the valley (*wady*) here being the Arnon (q.v.).

GADARA.—A town on the Yarmuk river about six miles SE. of the Lake of Galilee, which is visible from it. Its territory may have extended to the Lake. On some of its coins a ship is portrayed. The ancient name has clung to some caves among the ruins, but in general the place is called *Muqēs*. The site is a large one and has never received much exploration. The name indicates that it was a Semitic settlement. Its capture by Antiochus III. (218 B.C.) is the first mention of it in history. It was taken by the Jews under Alexander Jannaeus (103–76 B.C.), but liberated by Pompey in 63 B.C. It joined the federation of Greek cities called the Decapolis. Temporarily it lost that status when Augustus granted it to Herod the Great. It was famous for its hot springs at nearby Hammath Geder (*el-Ḥammeh*). The region belonging to Gadara is the scene of the healing of the man possessed by a demon (Mt 8^{28}). In the parallel texts (Mk 5^{1}, Lk 8^{26}) the best MSS read Gerasenes, others Gergesenes and some Gadarenes. The Gergesenes are a dubious entity—the linking of that name with a place called *Kurseh* on the eastern shore of the Lake of Galilee is unwarranted. The territory of Gerasa did not reach to the lake, while that of Gadara easily could have done so. The reading Gadarenes thus must be accounted as the most probable.

E. G. K.

GADARENES.—See GADARA.

GADDI (? 'my fortune').—**1.** The Manassite spy, Nu 13^{11}. **2.** The surname of Johanan or John, the eldest brother of Judas Maccabaeus, 1 Mac 2^{2} (AV **Caddis**, RV **Gaddis**).

GADDIS, 1 Mac 2^{2} (RV).—See GADDI, **2.**

GADDIEL.—The Zebulunite spy, Nu 13^{10}.

GADI.—Father of Menahem king of Israel, 2 K $15^{14, 17}$.

GADITES.—See GAD (tribe).

GAHAM.—A son of Nahor by his concubine Reumah, Gn 22^{24}.

GAHAR.—A family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2^{47}, Neh 7^{49}, 1 Es 5^{30} (AV, RV **Geddur**).

GAI.—Given as a proper name in RV of 1 S 17^{52} 'until thou comest to Gai,' where AV has 'until thou comest to the valley.' The LXX, as is noted in RVm, has *Gath* (and so RSV), and this would suit the context.

GAIUS.—This name is mentioned in five places of NT. One Gaius was St. Paul's host at Corinth, converted and baptized by him (Ro 16^{23}, 1 Co 1^{14}). He was perhaps the same as 'Gaius of Derbe' who accompanied the Apostle from Greece to Asia (Ac 20^{4}); if so, he would be a native of Derbe, but a dweller at Corinth. The Gaius of Macedonia, St. Paul's 'companion in travel' who was seized in the riot at Ephesus (Ac 19^{29}), and the Gaius addressed by St. John (3 Jn ^{1}), were probably different men.

A. J. M.

GAIUS.—As emperor Gaius Caesar Augustus Germanicus, born A.D. 12 (and nicknamed Caligula, 'Boots,' from the soldier's uniform made for him as a boy), the son of Tiberius' popular nephew Germanicus, succeeded his grand-uncle as emperor in A.D. 37, although without experience of public life. At first well-intentioned, he became arbitrary and despotic, and took with insane seriousness the formal ascription to him of divinity. Though friend and patron of Herod Agrippa (q.v.), he was increasingly hostile to the monotheistic Jews; only his death on Jan. 24, A.D. 41 (at the hands of officers of the praetorian guard whom he had alienated) prevented execution of an order for the erection of his statue in the Temple at Jerusalem. This threatened profanation may well be the 'desolating sacrilege' (RSV; AV 'abomination of desolation') referred to in Mk 13^{14}, paralleling the similar action of Antiochus Epiphanes (q.v.; Dn 11^{31f}).

E. R. H.

GALAL.—The name of two Levites, 1 Ch 9^{15f}, Neh 11^{17}.

GALATIA is a Greek word, derived from *Galatae* the Greek name for the **Gauls** who invaded Asia Minor in the year 278–277 B.C. (Lat. *Gallograeci* [='Greek Gauls'], to distinguish them from their kindred who lived in France and Northern Italy). These Gauls had been ravaging the south-eastern parts of Europe, Greece,

Macedonia, and Thrace, and crossed into Asia Minor at the invitation of Nicomedes, king of Bithynia. Part of the same southward tendency appears in their movements in Italy and their conflicts with the Romans in the early centuries of the Republic. Those who entered Asia Minor came as a nation with wives and families, not as mercenary soldiers. After some fifty years' raiding and warring, they found a permanent settlement in north-eastern Phrygia, where the population was unwarlike. Their history down to the time of the Roman Empire may be studied in Wm. Ramsay's *Histor. Com. on Galatians*, pp. 45 ff. They continued throughout these two centuries to be the ruling caste of the district, greatly outnumbered by the native Phrygian population, who, though in many respects an inferior race, had a powerful influence on the religion, customs, and habits of the Gauls, as subject races often have over their conquerors. The earlier sense of the term *Galatia* is, then, the country occupied by the Gaulish immigrants, the former north-eastern part of Phrygia, and the term *Galatae* is used after the occupation to include the subject Phrygians as well as the *Galatae* strictly so called (*e.g.* 1 Mac 8^2, where RSV reads 'Gauls').

About 160 B.C. the Gauls acquired a portion of Lycaonia on their southern frontier, taking in Iconium and Lystra. About the same time also they had taken in Pessinus in the NW. These and other expansions they ultimately owed to the support of Rome. From 64 B.C. Galatia was a client state of Rome. At the beginning of that period it was under three rulers; from 44 B.C. it was under one only. Deiotarus, the greatest of the Galatian chiefs, received Armenia Minor from Pompey in 64 B.C. Mark Antony conferred the eastern part of Paphlagonia on Castor as sole Galatian king in 40 B.C., and at the same time gave Amyntas a kingdom comprising Pisidic Phrygia and Pisidia generally. In 36 B.C., Castor's Galatian dominions and Pamphylia were added to Amyntas' kingdom. He was also given Iconium and the old Lycaonian tetrarchy, which Antony had formerly given to Polemon. After the battle of Actium in 31 B.C., Octavian conferred on Amyntas the additional country of Cilicia Tracheia. He had thus to keep order for Rome on the south side of the plateau and on the Taurus mountains. He governed by Roman methods, and, when he died in 25 B.C., he left his kingdom in such a state that Augustus resolved to take the greater part of it into the Empire in the stricter sense of that term, and made it into a province which he called *Galatia*. This is the second sense in which the term Galatia is used in ancient documents, namely, the sphere of administrative responsibility which included the ethnic districts, Paphlagonia, Pontus Galaticus, Galatia (in the original narrower sense), Phrygia Galatica, and Lycaonia Galatica (with 'the Added Land,' part of the original Lycaonian tetrarchy). Galatia, as a province, means all these territories together, under one Roman governor, and the inhabitants of such a province, whatever their race, were, in conformity with invariable Roman custom, denominated by a name etymologically connected with the name of the province. Thus *Galatae* ('Galatians') has a second sense, in conformity with the second sense of the term *Galatia*: it is used to include all the inhabitants of the province (see the first map in the above-mentioned work of Ramsay).

The word 'Galatia' occurs three times in the NT (1 Co 16^1, Gal 1^2, and 1 P 1^1). A possible fourth case (2 Ti 4^{10}) must be left out of account, as the reading there is doubtful. There is an alternative 'Gallia,' which, even if it be not the original, suggests that the word 'Galatia' there should be taken in the sense of 'Gallia' (that is, France). It is beyond doubt that in the passage of 1 Peter the word must be taken in the sense of the province. The bearer of the letter evidently landed at some port on the Black Sea, perhaps Sinope, and visited the provinces in the order in which they appear in the address of the letter:—Pontus, Galatia, Cappadocia, Asia, and Bithynia, taking ship again at the Black Sea for Rome. The Taurus range of mountains was always conceived of as dividing the peninsula of Asia Minor into two parts, and St. Peter here appears as supervising or advising the whole body of Christians north of the Taurus range. (The effect of taking 'Galatia' in the other sense would be to leave out certain Pauline churches, Derbe, Lystra, Iconium, and Pisidian Antioch, and perhaps these alone, in all that vast region: which is absurd). With regard to the two passages in St. Paul, the case is settled by his unvarying usage. It has been noted that, proud of his Roman citizenship, he invariably uses geographical terms in the *Roman* sense, and that he even does violence to the Greek language by forcing the Latin names for 'Philippians' (Ph 4^{15}) and 'Illyricum' (Ro 15^{19}) into Greek, and passes by the proper Greek term in each case. We are bound, therefore, to believe that he uses 'Galatia' in the Roman sense, namely in the meaning of the Roman province as above defined. (This province had, as we have seen, 'Galatia' in the narrower and earlier sense as one of its parts). It follows, therefore, that he uses 'Galatians' (Gal 3^1) also in the wider sense of all (Christian) inhabitants of the province, irrespective of their race, as far as they were known to him.

In order to discover what communities in this vast province are especially addressed by the Apostle in his Epistle, it is necessary to make a critical examination of the only two passages in Acts which afford us a clue (16^6 18^{23}). It is important to note that St. Luke never uses the term 'Galatia' or the term 'Galatians,' but only the adjective 'Galatic' (16^6 18^{23}). In 16^6 the rules of the Greek language require us to translate:—'the Phrygo-Galatic region' or 'the region which is both Phrygian and Galatian'; that is, 'the region which according to one nomenclature is Phrygian, and according to another is Galatian.' This can be none other than that section of the province Galatia which was known as Phrygia Galatica, and which contained Pisidian Antioch and Iconium, exactly the places we should expect St. Paul and his companions to go to after Derbe and Lystra. In 18^{23} the Greek may be translated either 'the Galatico-Phrygian region' or 'the Galatian region and Phrygia,' preferably the latter, as it is difficult otherwise to account for the order in the Greek. 'The Galatian region,' then, will cover Derbe and Lystra; 'Phrygia' will include Iconium and Pisidian Antioch. We conclude then that, whether any other churches are comprised in the address of the Epistle to the Galatians or not—and a negative answer is probably correct—the churches of Derbe, Lystra, Iconium, and Pisidian Antioch are included. There is not a scrap of evidence that St. Paul had visited any other cities in that great province. A. So.

GALATIANS, EPISTLE TO THE.—1. Occasion of the Epistle.—From internal evidence we gather that St. Paul had, when he wrote, paid two visits to the Galatians. On the first visit, which was due to an illness (4^{13}), he was welcomed in the most friendly way; on the second he warned them against Judaizers (1^9 5^3 'again,' cf 4^{13} 'the former time,' though this *may* be translated 'formerly'). After the second visit Judaizers came among the Galatians, and persuaded them that they must be circumcised, that St. Paul had changed his mind and was inconsistent, that he had refrained from preaching circumcision to *them* only from a desire to be 'all things to all men,' but that he had preached it (at any rate as the better way) to others. It is doubtful if the Judaizers upheld circumcision as necessary to salvation, or only as necessary to a complete Christianity—*i.e.* in order to be 'perfect,' those 'led by the Spirit' must also keep the Mosaic Law, which is still the divinely ordained body of commandments 'whereby a man shall live and not die.' It depends on whether we fix the date before or after the Council of Ac 15, which of these views we adopt (see **4**). Further, the Judaizers disparaged St. Paul's authority as compared with that of the Twelve. On hearing this the Apostle hastily wrote the Epistle to check the evil, and (probably) soon followed up the Epistle with a personal visit.

2. To whom written. The North Galatian and South Galatian theories.—It is disputed whether the inhabitants of N. Galatia are addressed (Lightfoot, Salmon, the older commentators, Schmiedel in *Encyc. Bibl.*, Moffatt, *et al.*), or the inhabitants of Pisidian Antioch, Iconium, Lystra, and Derbe, which lay in the S. part of the Roman province Galatia (Ramsay, Sanday, Zahn, Renan, Pfleiderer, Burton, *et al.*). Those who hold the N. Galatian theory take Ac 16^6 18^{23} as indicating that St. Paul visited Galatia proper, making a long detour. They press the argument that he would not have called men of the four cities by the name 'Galatians,' as these lay outside Galatia proper, and that 'Galatians' must mean men who are Gauls by blood and descent; also that 'by writers speaking familiarly of the scenes in which they had themselves taken part' popular usage rather than official is probable, and therefore to call the Christian communities in the four cities 'the churches of Galatia' would be unnatural. On the other hand, the N. Galatian theory creates Churches unheard of elsewhere in 1st cent. records; it is difficult on this hypothesis to understand the silence of Acts, which narrates all the critical points of St. Paul's work. But Acts does tell us very fully of the foundation of the Church in S. Galatia. Then, again, on the N. Galatian theory, St. Paul nowhere in his Epistles mentions the four cities (mentioned once by the Paulinist author of 2 Ti 3^{11})—a silence made more remarkable by the fact that in the collection of the alms he *does* mention 'the churches of Galatia' (1 Co 16^1). If the four cities are not here referred to, why were they omitted? The main argument of the N. Galatian theory, given above, is sufficiently answered by taking into account St. Paul's relation to the Roman Empire (see LUKE-ACTS; also PAUL, 7).

With regard to the nomenclature, we notice that St. Luke sometimes uses popular non-political names like 'Phrygia' or 'Mysia' (Ac 2^{10} 16^8); but St. Paul, as a Roman citizen, uses place-names in their Roman sense throughout, *e.g.* 'Achaia' (which in Greek popular usage had a much narrower meaning than the Roman province, and did not include Athens, while St. Paul contrasts it with Macedonia, the only other Roman province in Greece, and therefore clearly uses it in its Roman sense, Ro 15^{26}, 2 Co 9^2 11^{10}, 1 Th 1^{7f}; cf 1 Co 16^5), 'Macedonia,' 'Illyricum' (Ro 15^{19} only; the Greeks did not use this name popularly as a substantive, and none but a Roman could so denote the province; 'Syria and Cilicia' (one Roman province), and 'Asia' (the Roman province of that name, the W. part of Asia Minor, including Mysia). We may compare the nomenclature in 1 P 1^1, where the the author is so much influenced by Pauline ideas that he designates all Asia Minor north of the Taurus by enumerating the Roman provinces. St. Paul, then, calls all citizens of the province of Galatia by the honourable name 'Galatians.' To call the inhabitants of the four cities 'Phrygians' or 'Lycaonians' would be as discourteous as to call them 'slaves' or 'barbarians.' The Roman colonies like Pisidian Antioch were most jealous of their Roman connexion.

The S. Galatian theory reconciles the Epistle and Acts without the somewhat violent hypotheses of the rival theory. The crucial passages are Ac 16^6 18^{23}, which are appealed to on both sides. In 16^6 St. Paul comes from Syro-Cilicia to Derbe and Lystra, no doubt by land, through the Cilician Gates [Derbe being mentioned first as being reached first, while in 14^6 Lystra was reached first and mentioned first], and then 'they went through (*v.l.* going through) the region of Phrygia and Galatia,' literally 'the Phrygian and Galatic region' [so all the best MSS read these last words]. This 'region,' then probably a technical term for the subdivision of a province), was a single district to which the epithets 'Phrygian' and 'Galatic' could both be applied; that is, it was that district which was part of the old country of Phrygia, and also part of the Roman province of Galatia. But no part of the old Galatia overlapped Phrygia, and the only district satisfying the requirements is the region around Pisidian Antioch and Iconium; therefore in 16^6 a detour to N. Galatia is excluded. Moreover, no route from N. Galatia to Bithynia could bring the travellers 'over against Mysia' (16^7). They would have had to return almost to the spot from which they started on their hypothetic journey to N. Galatia. Attempts to translate this passage, even as read by the best MSS, as if it were 'Phrygia and the Galatic region,' as the AV text (following inferior MSS) has it, have been made by a citation of Lk 3^1, but this appears to be a mistake; the word translated there 'Ituraea' is really an adjective 'Ituraean,' and the meaning probably is 'the Ituraean region which is also called Trachonitis.'

In the other passage, Ac 18^{23}, the grammar and therefore the meaning are different. St. Paul comes, probably, by the same land route as before, and to the same district; yet now Derbe and Lystra are not mentioned by name. St. Paul went in succession through 'the Galatic region' and through 'Phrygia' (or '[the] Phrygian [region]'). The grammar requires two different districts here. The first is the 'Galatic region' [of Lycaonia]—that part of old Lycaonia which was in the province Galatia, *i.e.* the region round Derbe and Lystra. The second is the 'Phrygian region' [of Galatia], *i.e.* what was in 16^6 called the Phrygo-Galatic region, that around Antioch and Iconium. In using a different phrase St. Luke considers the travellers' point of view; for in the latter case they leave Syrian Antioch, and enter, by way of non-Roman Lycaonia, into Galatic Lycaonia ('the Galatic region'), while in the former case they start from Lystra and enter the Phrygo-Galatic region near Iconium.

All this is clear on the S. Galatian theory. But on the other theory it is very hard to reconcile the Epistle with Acts. The S. Galatian theory also fits in very well with incidental notices in the Epistle, such as the fact that the Galatians evidently knew Barnabas well, and were aware that he was the champion of the Gentiles (2^{13} '*even* Barnabas'); but Barnabas did not accompany Paul on the Second Missionary Journey, when, on the N. Galatian theory, the Galatians were first evangelized. Again, Gal 4^{13} fits in very well with Ac 13^{14} on the S. Galatian theory; for the very thing to do, if attacked by an illness in the low-lying lands of Pamphylia, would be to go to the high uplands of Pisidian Antioch. This seems to have been an unexpected change of plan (one which perhaps caused Mark's defection). On the other hand, if a visit to Galatia proper had been part of the plan in Ac 16 to visit Bithynia, Gal 4^{13} would have been unintelligible.

3. St. Paul's autobiography.—In chs. 1, 2 the Apostle vindicates his authority by saying that he received it direct from God, and not through the older Apostles, with whom the Judaizers compared him unfavourably. For this purpose he tells of his conversion, of his relations with the Twelve, and of his visits to Jerusalem; and shows that he did not receive his commission from men. Wm. Ramsay urged with much force that it was essential to Paul's argument that he should mention all visits paid by him to Jerusalem between his conversion and the time of his evangelizing the Galatians. In the Epistle we read of two visits (1^{18} 2^1), the former three years after his conversion (or after his return to Damascus), to visit Cephas, when of the Apostles he saw only James the Lord's brother besides, and the latter fourteen years after his conversion (or after his first visit), when he went 'by revelation' with Barnabas and Titus and privately laid before the Twelve (this probably is the meaning of 'them' in 2^2: James, Cephas, and John are mentioned) the gospel which he preached among the Gentiles. We have, then, to ask, To which, if any, of the visits recorded in Acts do these correspond? Most scholars agree that Gal 1^{18}=Ac 9^{26ff}, and that the word 'Apostles' in the latter place may mean Peter and James only. But there is much diversity of opinion concerning Gal 2^1. A majority of scholars identify this visit with that of Ac 15^2 (the Jerusalem Council). A minority identify the visit with that of Ac 11^{30}, since otherwise St. Paul would be suppressing a point which would tell

in favour of his opponents, it being essential to his argument to mention all his visits.

It should be noted that a solution of the major critical problems, *i.e.* whether the churches addressed by Paul were located in north or south Galatia and how the biographical data of Galatians are to be reconciled with Acts, is of relatively minor importance so far as the interpretation of the letter itself is concerned. On the south Galatian hypothesis, now held by most scholars, we may identify the churches addressed in Galatia with the cities named in Acts (see article GALATIA). Acts tells us so little about these churches, however, that little light is thrown upon the Epistle.

4. Date and place of writing.—Upholders of the N. Galatian theory, understanding Ac 16^{6} 18^{23} to represent the two visits to the Galatians implied in Gal 4^{13}, usually fix on Ephesus as the place of writing, and suppose that the Epistle dates from the long stay there recorded in Ac 19^{8ff}, probably early in the stay (cf Gal 1^{6} 'you are *so quickly* deserting'); but J. B. Lightfoot postponed the date for some two years, and thought that the Epistle was written from Macedonia (Ac 20^{1}), rather earlier than Romans and after 2 Corinthians. He gaves a comparison of these Epistles, showing the very close connexion between Romans and Galatians: the same use of OT, the same ideas and same arguments, founded on the same texts; in the doctrinal part of Galatians we can find a parallel for almost every thought and argument in Romans. It is generally agreed that the latter, a systematic treatise, is later than the former, a personal and fragmentary Epistle. (See also Hans Lietzmann.) The likeness is much less marked between Galatians and 1 and 2 Corinthians; but in 2 Corinthians the Apostle vindicates his authority much as in Galatians. The opposition to him evidently died away with the controversy about circumcision. Thus it is clear that these four Epistles hang together and are to be separated chronologically from the rest.

On the S. Galatian theory, the Epistle was written from Antioch. Ramsay puts it at the end of the Second Missionary Journey (Ac 18^{22}). Timothy, he thinks, had been sent to his home at Lystra from Corinth, and rejoined Paul at Syrian Antioch, bringing news of the Galatian defection. Paul wrote off hastily, dispatched Timothy back with the letter, and as soon as possible followed himself (Ac 18^{23}). On this supposition the two visits to the Galatians implied by the Epistle would be those of Ac 13 f and 16. The intended visit of Paul would be announced by Timothy, though it was not mentioned in the letter, which in any case was clearly written in great haste. It is certainly strange, on the Ephesus or Macedonia hypothesis, that Paul neither took any steps to visit the erring Galatians, nor, if he could not go to them, explained the reason of his inability. Ramsay's view, however, has the disadvantage that it separates Galatians and Romans by some years. Yet if St. Paul kept a copy of his letters, he might well have elaborated his hastily sketched argument in Galatians into the treatise in Romans, at some little interval of time. Ramsay gives A.D. 53 for Galatians, the other three Epistles following in A.D. 56 and 57.

Another view is that of V. Weber, who also holds that Syrian Antioch was the place of writing, but dates the Epistle *before* the Council (see Ac 14^{28}). He agrees with Ramsay as to the two visits to Jerusalem; but he thinks that the manner of the Judaizers' attack points to a time before the Apostolic decree. Gal 6^{12} ('compel') suggests that they insisted on circumcision as necessary *for salvation* (1). If so, their action could hardly have taken place after the Council. A strong argument on this side is that St. Paul makes no allusion to the decision of the Council. The chronological difficulty of the fourteen years (2^{1}) is met by placing the conversion of St. Paul in A.D. 32. Weber thinks that 5^{2} could not have been written after the circumcision of Timothy; but this is doubtful. The two visits to the Galatians, on this view, would be those of Ac 13, on the outward and the homeward journey respectively. The strongest argument against Weber's date is that it necessitates such a long interval between Galatians and Romans.

5. Abstract of the Epistle.—Chs. 1, 2. Answer to the Judaizers' disparagement of Paul's office and message. Narrative of his life from his conversion onwards, showing that he did not receive his Apostleship and his gospel through the medium of other Apostles, but direct from God.

3^{1}–5^{12}. Doctrinal exposition of the freedom of the gospel, as against the legalism of the Judaizers. Abraham was justified by faith, not by the Law, and so are the children of Abraham. The Law was an inferior dispensation, though good for the time, and useful as educating the world for freedom; the Galatians are bent on returning to a state of tutelage, and their present attitude is retrogressive.

5^{13}–6^{10}. Hortatory. 'Hold fast by freedom, but do not mistake it for licence. Be forbearing and liberal.'

6$^{11-18}$. Conclusion. Summing up of the whole in Paul's own hand, written in large characters (6^{11} RV) to show the importance of the subject of the autograph.

6. Genuineness of the Epistle.—The genuineness of Galatians, together with Romans and 1 and 2 Corinthians, has seldom been questioned. As for the testimony, Clement of Rome explicitly mentions and quotes 1 Corinthians, and his date cannot be brought down later than A.D. 100. Our Epistle is probably alluded to or cited by Barnabas, Hermas, and Ignatius (five times); certainly by Polycarp (four times), the *Epistle to Diognetus*, Justin Martyr, Melito, Athenagoras, and the *Acts of Paul and Thecla*. It is found in the Old Latin and Syriac versions and in the Muratorian Fragment (*c* A.D. 180–200). It was used by 2nd cent. heretics, alluded to by adversaries like Celsus and the writer of the *Clementine Homilies*, and quoted by name and distinctly (as their fashion was) by Irenaeus, Clement of Alexandria, and Tertullian, at the end of the 2nd cent. But, apart from this external testimony, the spontaneous nature of the Epistle is decisive in favour of its genuineness. There is no possible motive for forgery. An anti-Jewish Gnostic would not have used expressions of deference to the Apostles of the Circumcision; an Ebionite would not have used the arguments of the Epistle against the Mosaic Law (thus the *Clementine Homilies*, an Ebionite work, clearly hits at the Epistle in several passages); an orthodox forger would avoid all appearance of conflict between Peter and Paul. After A.D. 70 there never was the least danger of the Gentile Christians being made to submit to the Law. A. J. M.—A. C. P.

GALBANUM (Heb. *helbᵉnāh*).—One of the ingredients of the sacred incense (Ex 30^{34}). It is a brownish-yellow, pleasant-smelling resin from various species of *Ferula*; it is imported from Persia.

GALEED ('cairn of witness').—The name which, according to Gn 31^{47}, was given by Jacob to the cairn erected on the occasion of the compact between him and Laban. There is evidently a characteristic attempt also to account in this way for the name *Gilead*. The respective proceedings of Jacob and of Laban are uncertain, for the narrative is not only of composite origin, but has suffered through the introduction of glosses into the text. It is almost certain that we should read 'Laban' instead of 'Jacob' in v.^{45}. The LXX seeks unsuccessfully to reduce the narrative to order by means of transpositions.

GALILEE.—1. Position.—Galilee was the region of Palestine N. of Samaria. It was bounded southward by the Carmel range and the southern border of the plain of Esdraelon, whence it stretched eastward by Bethshean (Scythopolis, *Beisān*) to the Jordan. Eastward it was limited by the Jordan and the western bank of its expansions (the Sea of Galilee and Lake Semechonitis). Northward and to the north-west it was bounded by Syria and Phoenicia; it reached the sea only in the region round the bay of *'Akkā* and immediately north of it. Its maximum extent therefore was

somewhere about 60 miles north to south, and 30 east to west.

2. Name.—The name *Galilee* is of Canaanitic or Hebrew origin, and signifies a 'ring' or 'circuit.' The name may be a contraction of a fuller expression, preserved by Is 9^1, namely, 'Galilee of the nations' though the possibility that the fuller expression is an expansion cannot be ruled out. It could originally have described a ring of cities lying about the hill country. The Hebrew form *gālîl* is found Aramaized as *Galila* in the Greek Zenon Papyri (259 B.C.); the form *Galilaia* is a gentilic derived from Galila.

3. History.—In the system of tribal allotments in the Book of Joshua the territory of Galilee was divided among Asher, Naphtali, Zebulun, and part of Issachar. In the OT history the tribal designations are generally used when subdivisions of the country are denoted; this is no doubt the reason why the name 'Galilee' occurs so rarely in the Hebrew Scriptures—though Is 9^1, as well as the references to Kedesh and other cities 'in Galilee' (Jos 20^7 21^{32}, 1 K 9^{11}, 2 K 15^{29}, 1 Ch 6^{76}), show that the name was familiar and employed upon occasion. Some of the most important of the historical events of the early Hebrew history took place within the borders of Galilee. The region was devastated by Benhadad I. of Damascus (1 K 15^{20}), and again by Hazael (2 K 12^{18}). It was recovered by Jeroboam II. (2 K 13^{22}). From 2 K 15^{29} and from the Assyrian inscriptions we learn that in 732 B.C. Tiglathpileser III. annexed Galilee and made it part of the Assyrian province of Megiddo. It seems improbable that the whole population was deported. The ancient rulers were interested in having agriculture continue and provide revenues. Much of Galilee seems to have become crown-land.

An expedition to rescue Jews of Galilee took place under Judas Maccabaeus, but apparently only the region near Acco and Mount Carmel is meant (1 Mac 5^{21-23}). It was not till its conquest, by John Hyrcanus, that Galilee was included in Jewish territory. Under the pressure of Egyptian and Roman invaders the national patriotism developed rapidly, and it became as intensely Jewish as Jerusalem itself. Under the Roman domination Galilee was governed as a tetrarchate, held by members of the Herod family. Herod the Great was ruler of Galilee in 47 B.C., and was succeeded by his son Antipas, as tetrarch, in 4 B.C. In the 3rd cent. A.D., Galilee became the centre of Rabbinic life. Remains of Jewish synagogues of this era are to be seen among the ruins of Galilaean cities. But it is as the principal theatre of Jesus' life and work that Galilee commands its greatest interest. Almost the whole of His life was spent within its borders. The disciples no doubt were also natives of this area.

4. Physical Characteristics.—Owing to moisture derived from the Lebanon mountains, Galilee is the best watered district of Palestine, and abounds in streams and springs, though the actual rainfall is little greater than that of Judaea. The result of this enhanced water supply is seen in the fertility of the soil, which is far greater than anywhere in Southern Palestine. It was famous for oil, wheat, barley, and fruit, as well as cattle. The fisheries about the Sea of Galilee were also important. The formation of the country is limestone, broken by frequent dykes and outflows of trap and other volcanic rocks. Hot springs at Tiberias and elsewhere, and not infrequent earthquakes, indicate a continuance of volcanic and analogous energies.

5. Population.—Galilee in the time of Christ was inhabited by a mixed population. There was the Jewish element, grafted no doubt on a substratum of Israelites, Aramaeans, and Canaanites. Besides these there was the cultivated class—the inhabitants of the Greek cities and the military representatives of the dominant power of Rome. In Judaea the Galilaeans were looked down upon. 'Can any good thing come out of Nazareth?' (Jn 1^{46}) was one proverb. 'Out of Galilee ariseth no prophet' (7^{52}) was another. The Galilaeans spoke an Aramaic dialect differing from the dialects used in Samaria and Judaea. It betrayed Peter when he endeavoured to deny his discipleship (Mt 26^{73}).

GALILEE, SEA OF.—1. Situation, etc.—The Sea of Galilee is an expansion of the Jordan, 13 miles long, about 8 miles in maximum breadth; its surface is 680 feet below that of the Mediterranean; its maximum depth is about 150 feet. In shape it is like a pear, the narrow end pointing southward. Like the Dead Sea, it is set deep among hills, which rise on the east side to a height of about 2000 feet. At the emergence of the Jordan, however, the Lake impinges on the plain of the Ghōr.

2. Names.—The original name of the Sea seems to have been **Chinnereth** or **Chinneroth.** It takes its name from an old Canaanite city (Jos 11^2 19^{35}, 1 K 15^{20}), which lay at *Tell el 'Oreimeh* above its north-western shore. By this name it is referred to in assigning the border of the Promised Land (Nu 34^{11}), in stating the boundary of the trans-Jordanic tribes (Dt 3^{12}, Jos 13^{27}), and in enumerating the kings conquered by Joshua (Jos 12^3). The Lake is referred to also by the name *Gennesar* in Josephus (always), and in 1 Mac 11^{67} (AV). That is really the name of the plain stretching along the west side of the lake S. of Chinnereth. In the Gospels it is referred to under a variety of names: besides such general terms as 'the lake' (Lk 8^{22} etc.), or 'the sea' (Jn 6^{16}), we find **Lake of Gennesaret** (only in Lk 5^1, the final *et* probably being an error), **Sea of Tiberias** (Jn 21^1, and also as an explanatory or alternative name in Jn 6^1), but most frequently *Sea of Galilee.* The modern name is *Baḥr Ṭabarîyeh*, 'Lake of Tiberias.'

3. Importance in NT times.—The Sea in the time of Jesus was surrounded by a number of important cities. Such were Tiberias, Bethsaida, Capernaum, Chorazin, and Magdala. The fishing industry was important, and where now but a few small boats are to be seen, there evidently were formerly numerous fishing vessels. Owing to the great height of the mountains surrounding the Lake, differences of temperature are produced which give rise to sudden and violent storms. Two such storms are mentioned in the Gospels—one in Mt 8^{23}, Mk 4^{36}, Lk 8^{22}, the other in Mt 14^{22}, Mk 6^{45}, Jn 6^{16}.

R. A. S. M.—E. G. K.

GALL.—(1) *rōsh*, some very bitter plant, Dt 29^{18} AV, RV; RSV 'poisonous fruit'), La 3^{19}; 'water of gall' (AV, RV; RSV 'poisoned water'), Jer 8^{14} 9^{15}; translated 'hemlock,' Hos 10^4 (AV, RV; RSV 'poisonous weeds'), 'poison,' Job 20^{16}. Hemlock (*Conium maculatum*), colocynth (*Citrullus colocynthis*), and the poppy (*Papaver somniferum*) have all been suggested. (2) *mᵉrērāh* (Job 16^{13}) and *mᵉrōrāh* (Job $20^{14, 25}$) refer to the bile. The poison of serpents was supposed to lie in their bile (20^{14}). The gall (Gr. *cholē*) of Mt 27^{34} evidently refers to the LXX version of Ps 69^{21}, where *cholē* is a translation of *rōsh.*

E. W. G. M.

GALLERY.—1. AV in Ca 7^5 reads 'The king is held in the galleries.' The Hebrew is *barᵉḥāṭîm*, which, there is no reasonable doubt, means 'in the tresses' (so RV, RSV). The king is captivated, that is to say, by the tresses of this 'prince's daughter.' **2.** AV, RV, and RSV translation of *'attîḳ*, a word used in the description of Ezekiel's temple and whose etymology and meaning are both obscure, in Ezk $42^{3, 5}$; but in Ezk 41^{15} RSV has 'walls' and in 41^{16} 'recessed' (AV, RV both 'galleries').

GALLEY.—See SHIPS AND BOATS.

GALLIM ('heaps').—A place near Jerusalem (1 S 25^{44}). It is personified, along with Anathoth and other towns, in Is 10^{30}. It is generally placed to the N. of Jerusalem, and is perhaps *Kh. Ka'kūl*, near Anathoth.

GALLIO.—The elder brother of the philosopher Seneca. According to an inscription found at Delphi, Gallio was proconsul of Achaia in A.D. 51–52 or A.D. 52–53. The earlier date is the more probable; Paul left Corinth in the early autumn of the year A.D. 51. The Jews of Corinth had brought him before Gallio,

when Gallio reached Corinth, perhaps early in May. They did not yet know that the new governor was of an anti-Semitic family. He refused to accept the charge against Paul, and when the heathen mob beat the leader of the Jewish delegation, Gallio ' paid no attention to this ' (Ac 18^{12-17}). E. H.

GALLOWS.—This word occurs nine times in RSV (eight in AV and RV) in the book of Esther only (5^{14} etc.) as the rendering of the ordinary Hebrew word for ' tree ' (see margins). It is very doubtful if death by strangulation is intended—' tree ' in all probability having here its frequent sense of ' pole,' on which, as was customary in Persia, the criminal was impaled (see CRIMES AND PUNISHMENTS, **10**). A. R. S. K.

GAMAD (MEN OF).—Mentioned only in Ezk 27^{11} (RSV ; AV ' Gammadims,' RV ' Gammadim '). No place of this name is known, but a proper name is what the context seems to demand. RVm ' valorous men ' has not commended itself to the majority of scholars.

GAMAEL (1 Es 8^{29}) = **Daniel, 4** (Ezr 8^{2}).

GAMALIEL.—1. The son of Pedahzur, and ' prince of the children of Manasseh ' (Nu 1^{10} 2^{20} etc.). **2.** Gamaliel I., the grandson (or perhaps the son) of Hillel, was a Pharisee, and regarded as one of the most distinguished teachers of the Law in his age. He was a member of the Sanhedrin in the time of Jesus and Paul. To him have been ascribed views which were tolerant and large-hearted ; he emphasized the human side of the Law, relaxing somewhat the rigour of Sabbatical observance, regulating the customs of divorce so as the more to protect helpless women, and inculcating kindness on the part of Jews towards surrounding heathen. In Ac 5^{34-40} he urges the Sanhedrin to let the future disclose whether or not the Christian movement is blessed with God's favour. In 22^{3}, Paul is said to have sat at Gamaliel's feet. Historical scholars have questioned the reliability of both passages.

The *Clementine Recognitions* absurdly state that by the advice of the Apostles he remained among the Jews as a secret believer in Christ. A host of later legends even suppose that he became an open convert. The Mishnah deplores that ' with the death of Gamaliel I., reverence for the Divine Law ceased, and the observance of purity and piety became extinct.' C. T. P. G.—S. S.

GAMES.—I. AMONG THE ISRAELITES.—The Jews were essentially a serious people. What in other nations developed into play and games of various kinds, had with them a seriously practical and often a religious character. Their **dances** were a common form of religious exercise, which might indeed degenerate into disorderly or unseemly behaviour, but were only exceptionally a source of healthy social amusement (Ps 150^{4}, Ex $32^{6, 19}$, 2 S 6^{14ff}, Jer 31^{4}, Ec 3^{4}). **Music**, again, was especially associated with sacred song. Its secular use was condemned by Isaiah as a sign of extravagant luxury (Is 5^{12}). **Lots** and the like were used as a means of ascertaining the Divine will, not for amusement or profit. Even what with children might be called games of ' make believe ' became with some of the prophets vehicles of religious instruction. The symbolic object-lessons of Ezekiel were like the play of children, but at the same time adapted to a religious purpose (see especially ch. 4). Even this humour of the prophets, striking as it was, was intensely serious : witness the scathing ridicule of idolatry by Elijah and Deutero-Isaiah (1 K 18^{27}, Is 44^{12-20} 46^{1f}).

It is a matter of some dispute whether manly sports had any place in the social life of the Israelites. There was undoubtedly some sort of training in the use of weapons, particularly the **sling** (among the Benjamites especially) and the **bow**, for the purposes of warfare and the chase. We have a definite reference to the custom of practising at a mark in 1 S $20^{20, 35ff}$, and there are several metaphorical allusions to the same practice (Job 16^{12f}, La 3^{12}). Again, it has also been thought that we have in the heavy stone of Zec 12^{3} an allusion to a custom of **lifting a heavy stone** either as a test of strength or as a means of strengthening the muscles ; but there is no actual proof that there was any sort of competitive contest in such exercises. It may be suggested, however, on the other hand, that the practice of determining combats by selected champions, one or more, from either side, which we read of in 1 S 17^{10}, 2 S 2^{13-16}, and the expression used in the latter case, ' let the young men . . . arise and play before us,' makes it likely that friendly **tournaments** were not unknown.

Riddle-guessing is the one form of competition of which we have any certain proof. In Jg 14^{12-14} the propounding and guessing of riddles as a wager appears as part of the entertainment of a marriage feast. The questions put by the queen of Sheba to Solomon probably belong to the same category (1 K $10^{1, 3}$). Indeed, the propounding of ' dark sayings,' or ' riddles,' was a common element in proverbial literature (Ps 78^{2}, Pr 1^{6}).

Children's Games.—Games of play are so invariable an element of child life among all peoples, that it hardly needs proof that the Israelites were no exception to the rule. The playing of the boys and girls in the streets of the glorified Jerusalem (Zec 8^{5}) might indeed mean nothing more than kitten play ; but fortunately we have in Mt 11^{16f}||Lk 7^{31f} a most interesting allusion to the games (mock-weddings and mock-funerals) played in the market-place in our Lord's time, as they are played in Palestine at the present day.

We read in 2 Mac 4^{9-17} how Jason the high priest and the head of the Hellenizing party, having bribed Antiochus Epiphanes with 150 talents of silver, set up ' a place of exercise ' (gymnasium) for the training up of youths in Greek customs. The only game specifically mentioned is the **discus**. There is also mentioned in v.^{18} ' a game ' that was held every fifth year at Tyre—evidently an imitation of the Olympic games. Later, Herod the Great appears from Josephus (*Ant.* XV. viii. 1 [268]) to have provoked a conspiracy of the Jews by building a **theatre** and an amphitheatre at Jerusalem for the spectacular combats of wild beasts, and to have initiated very splendid games every five years in honour of Caesar. These included wrestling and chariot races, and competitors were attracted from all countries by the very costly prizes.

II. GAMES OF GREECE AND ROME.—Athletic contests formed a very important feature in the social life of the Greeks. They originated in pre-historic times, and were closely associated with religious worship. Thus the Olympic games were held in honour of Olympian Zeus in connexion with the magnificent temple at Olympia in Elis ; the Isthmian games on the Isthmus of Corinth in honour of Poseidon ; the Pythian were associated with the worship of the Pythian Apollo at Delphi ; the Nemean were celebrated at Nemea, a valley of Argolis, to commemorate the Nemean Zeus. These four games were great Pan-Hellenic festivals, to which crowds came from all parts, not only free-born Greeks, but also foreigners, although the latter, except the Romans in later times, were not allowed to compete. The most important of these games were the Olympic. They were held every four years, and so great was the occasion that from the year 264 B.C. events as far back as 776 were computed by them. The period between one celebration and another was called an Olympiad, and an event was said to have occurred in the 1st, 2nd, 3rd, or 4th year of such an Olympiad. The Isthmian games, which took place biennially in the first and third year of each Olympiad, seem to have been modelled on very much the same lines as the Olympic. To the Biblical student they have a more direct interest, as it is highly probable that the frequent allusions to such contests by St. Paul (see especially 1 Co 9^{24-27}) were due to his personal observation of these games, which may have taken place while he was at Corinth. As, however, our knowledge of the Olympic games, of which several ancient writers have left us particulars, is far more complete, it often happens that the language of St. Paul is more easily illustrated from them. It should be mentioned also in this connexion that besides these four great athletic contests, games of a local character, often in imitation of the Olympic, were held throughout Greece and her colonies in all towns of

importance, which had both their stadium and their theatre. The most important of these, from the Biblical student's point of view, were the games of Ephesus. With these St. Paul was certainly familiar, and, as will be seen below, allusions to games are remarkably frequent in writings connected with Ephesus.

The contests at Olympia included running, boxing, wrestling, chariot races, and other competitions both for men and for youths. The judges, who seem also to have acted as a sort of managing committee, with many dependents, were chosen by lot, one for each division of Elis. They held at once a highly honoured and a very difficult post, and were required to spend ten months in learning the duties of their office. For the last thirty days of this period they were required personally to superintend the training of the athletes who were preparing to compete. In addition to this, the athletes were required to swear before competing that they had spent ten months previously in training. We thus realize the force of such allusions as that of 1 Ti 4^{7f}, where St. Paul insists on the greater importance of the training in godliness than that of the body. These facts also add point to the allusions in 2 Ti 2^{5}. An athlete is not crowned unless he contend 'according to the rules.' These regulations required the disqualification not only of the disfranchized and criminals, but of those who had not undergone the required training. It is the last to which the passage seems especially to point.

The **prize,** while it differed in different places, was always a crown of leaves. At Olympia it was made of wild olive; in the Isthmus, in St. Paul's time, of pine leaves; at Delphi, of 'laurel'; at Nemea, of parsley. In addition to this, at Olympia, Delphi, and probably elsewhere, the victor had handed to him a palm-branch, as a token of victory. It is almost impossible to exaggerate the honour attached to winning the prize in these contests. The victor entered his native city in triumphal procession; he had conferred upon him many privileges and immunities, and his victory was frequently celebrated in verse. His statue might be, and often was, placed in the sacred grove of Elis, and he was looked upon as a public benefactor. St. Paul in 1 Co 9^{24-27} makes use of the spirit of these contests to illustrate to the Corinthians, to whom it must have specially appealed, the self-denial, the strenuousness, and the glorious issue of the Christian conflict, drawing his metaphorical allusions partly from the foot-race and partly from the boxing and wrestling matches. 'They do it to receive a perishable wreath, but we an imperishable. Well, I do not run aimlessly, I do not box as one beating the air; but I pommel my body and subdue it . . .'

There is a very interesting allusion to the games of Ephesus in 2 Ti 4^{7} 'I have fought the good fight, I have finished the race . . . henceforth there is laid up for me the crown of righteousness,' etc. This stands in striking contrast to Ph 3^{12-16} 'Not that I have already obtained this, or am already perfect; but I press on . . . forgetting what lies behind, and straining forward to what lies ahead, I press on toward the goal for the prize of the upward call of God in Christ Jesus.' Here again it is the intense eagerness of the athlete that is specially in St. Paul's mind. We have many other allusions by St. Paul to the **foot-race,** as in Ro 9^{16}, Gal 2^{2} 5^{7}, Ph 2^{16}, Ac 20^{24}. These generally refer to the 'course' of life and conduct. The last passage, it should be remembered, is addressed to the elders at Ephesus. The full significance of Ro 9^{16} is missed unless we realize the intensity of effort required by the racer. The supreme effort of the will is worthless without the grace of God.

We have allusions to the **wrestling match** certainly in Eph 6^{12}, where St. Paul speaks of wrestling against spiritual forces, and probably to boxing in 4^{27}, where 'giving place' means giving vantage-ground to the spiritual foe. In connexion with Ephesus we may notice also the allusion in Ac 19^{31} to the Asiarchs—the officers who superintended the games. The reference to fighting 'with wild beasts at Ephesus' in 1 Co 15^{32} is probably a metaphorical allusion to such contests as were common afterwards in the Colosseum at Rome. After the capture of Jerusalem Titus gave at Caesarea Philippi shows, in which a number of Jewish captives were thrown to wild beasts (Jos. *BJ* VII. ii. 1[23]).

Outside St. Paul's writings there is an important reference to athletic contests in He 12^{1-2}. Here the two points emphasized are: (1) the 'cloud of witnesses' (Gr. *martyres*), whose past achievements are to encourage the Christian combatants for the faith; (2) the self-sacrifice and earnestness needed in running the Christian race. The Christian athlete must lay aside every 'weight'—every hindrance to his work, just as the runner divested himself of his garments, having previously by hard training got rid of all superfluous flesh—and look only to Christ. Again, in Rev 7^{9} we have in the palms in the hands of the great company of martyrs a very probable reference to the palms given to the successful competitors in the games. Here, again, it should be borne in mind that it was to Ephesus and the surrounding towns, the district of the great Ephesian games, that the author of the Apocalypse was writing. F. H. W.—H. S. G.

GAMMADIM.—See GAMAD.

GAMUL ('weaned').—A chief of the Levites, and head of the 22nd course of priests, 1 Ch 24^{17}.

GANGRENE.—In 2 Ti 2^{17} (AVm, RV, RSV) this renders Greek *gangraina*, a medical term for spreading ulcers. AV has 'canker.'

GAR, 1 Es 5^{34} (AV).—See GAS.

GARDEN (Heb. *gan* ['enclosure'], *gannāh*, which, like the Persian [modern Armenian] *pardēs* [Neh 2^{8}, EV 'forest'], and the Arabic *jannah* and *bustān*, may mean a garden of vegetables [Dt 11^{10}, 1 K 21^{2} etc.], a fruit orchard [Jer $29^{5,28}$, Am 4^{9} etc.], or a park-like pleasure-ground [2 K 25^{4}, Est 1^{5} etc.]).—Flowers were cultivated (Ca 6^{2}), and doubtless, as in modern times, crops of grain or vegetables were grown in the spaces between the trees. In the long dry summer of Palestine the fruitfulness of the garden depends upon abundant water supply (Nu 24^{6}). Perennial fountains fleck the landscape with the luxuriant green and delicious shade of gardens, as *e.g.* at *Jenin* (Ca 4^{15}). Great cisterns and reservoirs collect the water during the rains, and from these, by numerous conduits, it is led at evening to refresh all parts of the garden. Failure of water is soon evident in withered leaves and wilted plants (Is 58^{11}, cf 1^{30}). The orange and lemon groves of Jaffa and Sidon are famous; and the orchards around Damascus form one of the main attractions of that 'earthly paradise.' The cool shade of the trees, the music of the stream, and the delightful variety of fruits in their season, make the gardens a favourite place of resort (Est 7^{7}, Ca 4^{16} etc.), especially towards evening; and in the summer months many spend the night there. In the sweet air, under the sheltering boughs, in the gardens of Olivet, Jesus no doubt passed many of the dark hours (Mk 11^{19} RV, Lk 21^{37}). From His agony in a garden (Jn $18^{1,26}$) He went to His doom.

The gardens, with their luxuriant foliage and soft obscurities, were greatly resorted to for purposes of idolatry (Is 65^{3}). There the Moslem may be seen to-day, spreading his cloth or garment under orange, fig, or mulberry, and performing his devotions. The garden furnishes the charms of his heaven (*el-jannah*, or *Firdaus*); see articles PARADISE, EDEN [GARDEN OF].

Tombs were often cut in the rock between the trees (2 K 21^{18} etc.): in such a tomb the body of Jesus was laid (Jn 19^{41}). W. E.

GARDEN HOUSE, 2 K 9^{27} (AV, RV).—See BETH-HAGGAN.

GAREB.—1. One of David's 'Thirty,' 2 S 23^{38}, 1 Ch 11^{40}. **2.** A hill near Jerusalem, Jer 31^{39}. Its situation is uncertain, being located by some to the SW., while others place it to the N. of the capital.

GARLAND.—The 'garlands' (Gr. *stemmata*) of Ac 14^{13} were probably intended to be put on the heads of the sacrificial victims. For the use of a garland (Gr.

stephanos) as a prize to the victor in the games, see article CROWN, **2**, and cf GAMES.

GARLIC (Nu 11^{5}).—The familiar *Allium sativum*, still a very great favourite in Palestine, especially with the Jews. Originally a product of Central Asia, and once a delicacy of kings, it is only in the East that it retains its place in the affections of all classes.

GARMENT.—See DRESS.

GARMITE.—A gentilic name applied in a totally obscure sense to Keilah in 1 Ch 4^{19}.

GARNER.—'Garner,' which is now archaic, and 'granary,' the form now in use, both come from Latin *granaria*, a storehouse for grain. RSV retains 'garner' in Ps 144^{13} (so AV, RV; Heb. *māzû*), but substitutes 'storehouses' in Jl 1^{17} for AV, RV 'garner, Hebrew *'ôṣār*. RV, RSV use the verb 'to garner' in Is 62^{9} for AV 'to gather' (Heb. *'āsaph*). In Mt 3^{12}, Lk 3^{17} RSV has 'granary' for AV, RV 'garner' (Gr. *apothēkē*; elsewhere rendered **barn** (q.v.) in AV, RV, RSV).

GARRISON.—**1.** Various words, all from the root *nṣb*, which means 'to stand,' are rendered 'garrison' in AV, RV, RSV in 1 S 13^{23} 14$^{1, 4, 6, 11, 15}$, 2 S 23^{14}; 1 S 14^{12}; 1 S 10^{5} 13^{3f}, 2 S 8$^{6, 14}$, 1 Ch 11^{16} 18^{13}, 2 Ch 17^{2}. From the same root comes *maṣṣēbhāh*, 'pillar,' which RV and RSV have in Ezk 26^{11}, where AV has 'garrisons' (RVm 'obelisks'). See PILLAR, **2** (*c*). RVm has 'garrison' in Jg 9^{6} for 'pillar' (AV, RV, RSV), and in Zec 9^{8} (AV 'because of the army,' RV 'against the army'), where RSV takes the same view and renders 'as a guard.' **2.** In 2 Co 11^{32} AV renders the Greek *phrourein* by 'keep with a garrison,' where RV and RSV have simply 'guard.'

GAS (1 Es 5^{34}).—His sons were among the 'temple servants' (Ezra and Nehemiah omit). AV has **Gar.**

GASHMU, Neh 6^{6} (AV, RV).—See GESHEM.

GATAM.—The son of Eliphaz (Gn 36^{11}=1 Ch 1^{36}), and 'duke' of an Edomite clan (Gn 36^{16}) which has not been identified.

GATE.—See CITY, FORTIFICATION AND SIEGECRAFT, JERUSALEM [GATES OF], TEMPLE.

GATH.—(Hebrew meaning, 'a wine-press.') A city of the Philistine Pentapolis. It is mentioned in Jos 11^{22} as a place where the Anakim took refuge; but Joshua is significantly silent about the apportioning of the city to any of the tribes. The Ark was brought here from Ashdod (1 S 5^{8}) and thence to Ekron (5^{10}). It was the home of Goliath (1 S 17^{4}, 2 S 21^{19}), and after the rout of the Philistines at Ephes-dammim, it was the limit of their pursuit (1 S 17^{52} [LXX]). David during his outlawry took refuge with its king, Achish (1 S 21^{10}). A bodyguard of Gittites was attached to David's person under the leadership of a certain Ittai; these remained faithful to the king after the revolt of Absalom (2 S 15^{18}). Shimei's slaves ran away to Gath, and he followed them there in disregard of Solomon's order not to leave Jerusalem (1 K 2^{40}). According to the Chronicler, Gath was captured by David (1 Ch 18^{1}), suggesting that he identified the unknown Methegh-ammah mentioned in 2 S 8^{1} with Gath. According to 2 Ch 11^{8}, the city was fortified by Rehoboam, was captured by Hazael of Syria (2 K 12^{17}) and later retaken from the Philistines by Uzziah (2 Ch 26^{6}). Amos, in a passage which is probably a later interpolation, refers to it in terms which imply that some great calamity has befallen it (6^{2}); the later prophets, though they mention other cities of the Pentapolis, are silent respecting Gath which dropped out of existence. Its final destruction was at the hands of Sargon the Assyrian invader who captured it along with other Philistine cities in 711 B.C. The original site of Gath has not yet been certainly identified. The topographical references in Scripture indicate a site in the Shephelah, near the borders of Hebrew territory, not far from Ekron in N. Philistia. Grollenberg proposes the modern *'Arâq el-Menshîyeh*, but others point to the great mound *Tell es-Ṣâfiyeh* as the most probable site for the identification of Gath. It stands at the mouth of the valley of Elah, and clearly represents a large and important town. Limited excavation has produced archaeological material going back to the early Canaanite period, but nothing definitely to identify the site with the ancient Gath. R. A. S. M.—**A. G. Mc.L**

GATH-HEPHER ('winepress of the well').—A place in Zebulun, Jos 19^{13} (AV wrongly *Gittah-hepher*, which is simply the form of the name with *He locale*). It was the home of the prophet Jonah, 2 K 14^{25}. It lay on the border of Zebulun, and is mentioned with Japhia and Rimmon—modern *Yâfā* and *Rummâneh*. It is now usually identified with *Kh. ez-Zurrâ'*.

GATH-RIMMON.—**1.** A city of Dan, near Jehud and Bene-berak, Jos 19^{45}. It was a Levitical city, assigned to the Kohathites (21^{24}), and reckoned to Ephraim, 1 Ch 6^{69}. Its site is possibly modern *Tell Jerîsheh*. **2.** A city of Manasseh, assigned as a Levitical city to the Kohathites, Jos 21^{25}. But the name may have come in by a scribal error from v.^{24}, and it should perhaps be replaced by **Bileam**=**Ibleam** (q.v.) which stands in the parallel 1 Ch 6^{7}. It is identified by some with modern *Rummâneh*.

GAULANITIS.—See GOLAN.

GAULS.—See GALATIA.

GAUZE.—Found only in Is 3^{23} RSV; see GLASS.

GAZA.—A city of the Philistine Pentapolis. It is referred to in Genesis (10^{19}) as a border city of the Canaanites, and in Jos 10^{41} as a limit of the south country conquered by Joshua; a refuge of the Anakim (Jos 11^{22}), theoretically assigned to Judah (15^{47}). Samson was here shut in by the Philistines, and escaped by carrying away the gates (Jg 16$^{1-3}$); he was, however, brought back here in captivity after being betrayed by Delilah, and here he destroyed himself and the Philistines by pulling down the temple (16$^{21-30}$). It formed the SW. boundary of Solomon's kingdom (1 K 4^{24}), but was never for long in Israelite hands. It was occupied by Pharaoh Neco (Jer 47^{1ff}), but withstood Alexander for two months in 332 B.C. (Jos. *Ant.* XI. viii. 4 [325]). In the 2nd cent. B.C. it was besieged and taken by Jonathan (1 Mac 11^{61f}). In 96 B.C. it was razed to the ground by Alexander Jannaeus after a year's siege (*Ant.* XIII. xiii. 3 [364]), but in 57 B.C. it was rebuilt by Gabinius on a new site (*Ant.* XIV. v. 3 [88]), the previous site being distinguished as 'Old' or 'Desert' Gaza (cf Ac 8^{26}). It was successively in Greek, Byzantine Christian (A.D. 402), Muslim (A.D. 635), and Crusader hands; it was finally lost by the Franks in 1244. A Crusaders' church remains in the town, now a mosque. It is now a city of about 16,000 inhabitants, and bears the name *Ghazzeh*. The gentilic is **Gazites,** Jos 13^{3} (RV; AV **Gazathites,** RSV 'men of Gaza'), Jg 16^{2}. For 1 Mac 13^{43ff} (AV) see GEZER.
R. A. S. M.—**H. H. R.**

GAZARA.—An important stronghold often mentioned during the Maccabaean struggle (1 Mac 4^{15} 7^{45} [AV **Gazera**] 9^{52} 13^{53} 14$^{7, 34}$ 15^{28} 16^{1}, 2 Mac 10^{32}). In *Ant.* XII. vii. 4 [308], XIV. v. 4 [91], *BJ* I. viii. 5 [170], it is called *Gadara*). It is the OT **Gezer** (q.v.).

GAZATHITES, Jos 13^{3} (AV).—See GAZA.

GAZELLE (Heb. *ṣᵉbhî*).—Mentioned in RV and RSV in 2 S 2^{18}, 1 Ch 12^{8} etc. (AV 'roe'), Dt 14^{5} (AV 'roebuck'). The gazelle (Arab. *ghazal*, also *ẓaby*) is one of the commonest of the larger animals of Palestine; it is one of the most beautiful and graceful of antelopes. It is fawn and white in colour; it is much hunted (Pr 6^{5}, Is 13^{14}); it is noted for its speed (2 S 2^{18}, 1 Ch 12^{8}); its flesh is considered, at least in towns, a delicacy.

Ghazaleh ('female gazelle') is a favourable name for a girl among the Yemen Jews, as *Dorcas* and *Tabitha*, with the same meaning, were in NT times (Ac 9$^{36, 40}$).
E. W. G. M.

GAZERA.—**1.** 1 Mac 4^{15} 7^{45} (AV); see GAZARA. **2.** 1 Es 5^{31} (AV, RV); see GAZZAM.

GAZEZ.—1. A son of Ephah, Caleb's concubine, 1 Ch 2[46]. **2.** In same verse a second Gazez is mentioned as a son of Haran, who was another of Ephah's sons.

GAZITES.—See GAZA.

GAZZAM.—A family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2[48], Neh 7[51], 1 Es 5[31] (RSV erroneously **Gazzan**; AR, RV **Gazera**).

GAZZAN.—See GAZZAM.

GEBA (Heb. *gebha'*, 'a hill').—A city of Benjamin, on the NE. frontier (Jos 18[24]), assigned to the Levites (Jos 21[17], 1 Ch 6[60]). It stands for the northern limit of the kingdom of Judah (2 K 23[8] 'from Geba to Beersheba'). In 2 S 5[25] we should probably read 'Gibeon' (so LXX) as in 1 Ch 14[16]. The position of Geba is fixed in 1 S 14[5] S. of the great *Wâdī Ṣuweinît*, over against Michmash, the modern *Mukhmâs*. This was the scene of Jonathan's famous exploit against the Philistines. Everything points to its identity with *Jeba'*, a village 6 miles N. of Jerusalem. It occupied an important position commanding the passage of the valley from the north. It was fortified by Asa (1 K 15[22]). It appears in Isaiah's picture of the approach of the Assyrian upon Jerusalem (10[28ff]). It is mentioned also as occupied after the Exile (Neh 11[31], Ezr 2[26], 1 Es 5[20] [AV **Gabdes**, RV **Gabbe**]). It seems to be confused with the neighbouring Gibeah in Jg 20[10] (Heb. *Geba*; EV *Gibeah*) [33] (Heb. *Geba*; so RSV; AV *Gibeah* with LXX, RV **Maareh-geba**, q.v.), 1 S 13[3] (EV Geba, following Hebrew; LXX *Gibeah*) [16] (see Driver, *Notes on . . . Samuel*[2], 1913, 101 f). **2.** A stronghold in Samaria, between which and Scythopolis Holofernes pitched his camp (Jth 3[10]). W. E.—H. H. R.

GEBAL.—1. A place apparently S. of the Dead Sea, whose inhabitants made a league with Edomites, Moabites, and the Bedouin of the Arabah against Israel, on some unknown occasion, Ps 83[7]. Its site is unknown. **2.** A Phoenician city, Ezk 27[9]. It was theoretically (never actually) within the borders of the Promised Land, Jos 13[5]; it provided builders for Solomon, 1 K 5[18] (AV 'stonesquarers'), and ships' caulkers for Tyre, Ezk 27[9]. The gentilic is **Gebalites**, Jos 13[5] (RV, RSV; AV **Giblites**). Its Greek name was Byblos, and it is the modern *Jebeil*. It has been excavated by Montet and Dunand and has yielded important finds, including the sarcophagus of Ahiram and inscriptions in prealphabetic script (cf M. Dunand, *Byblia grammata*, 1945).

GEBER.—1. 1 K 4[13] (AV); see BEN-GEBER. **2.** One of Solomon's twelve commissariat officers, 1 K 4[19], whose district lay E. of Jordan. At the end of the verse AV and RV read 'and he was the only officer which was in the land,' referring this clause to Geber. But the clause reads strangely. It has been suggested that we should render 'and one officer was over all the land,' *i.e.* there was one officer (*i.e.* Azariah; cf v.[5]) over all the other officers. Alternative suggestions are that a word has fallen out, and that we should read 'and there was one officer over the land of Gilead,' or 'of Gad,' or 'of Judah.' RSV adopts the last of these suggestions.

GEBIM.—A place N. of Jerusalem mentioned only in Is 10[31]. Its location is unknown.

GECKO.—See FERRET, LIZARD.

GEDALIAH.—1. Son of Ahikam (2 K 25[22ff]), who had protected Jeremiah from the anti-Chaldaean party (Jer 26[24]), and probably grandson of Shaphan, the pious scribe (2 K 22[3ff]). Gedaliah naturally shared the views of Jeremiah. This commended him to Nebuchadrezzar, who made him governor over the people who remained in the land (2 K 25[22]). His two months' rule and treacherous murder are detailed in Jer 40 f; cf 2 K 25[22-25]. The anniversary of Gedaliah's murder—the third day of the seventh month, Tishri (Zec 7[5] 8[19])—has ever since been observed as one of the four Jewish fasts. **2.** Eldest 'son' of Jeduthun, 1 Ch 25[3, 9]. **3.** A priest 'of the sons of Jeshua,' who had married a foreign wife, Ezr 10[18]; called **Jodan** in 1 Es 9[19] (AV, RV **Joadanus**). **4.** A priest of the sons of Pashhur who married a foreign wife, 1 Es 9[22] (RSV; AV, RV **Ocidelus**); called **Jozabad** in Ezr 10[22]. **5.** Son of Pashhur, a prince in the reign of Zedekiah, Jer 38[1]. **6.** Grandfather of the prophet Zephaniah, Zeph 1[1].

GEDDUR, 1 Es 5[30] (AV, RV).—See GAHAR.

GEDEON, He 11[32] (AV) = **Gideon** (q.v.).

GEDER.—A Canaanite town, whose king was amongst those conquered by Joshua, Jos 12[13]; possibly the same as **Beth-gader** (q.v.). The gentilic Gederite is used of Baal-hanan in 1 Ch 27[28].

GEDERAH.—A town of Judah, in the lowland, Jos 15[36]; probably modern *Kh. Jedîreh*. The same place is perhaps referred to in 1 Ch 4[23] (RV, RSV), where AV has 'those that dwelt among plants and hedges' for 'inhabitants of Netaim and Gederah.' The gentilic **Gederathite** occurs in 1 Ch 12[4] (RSV 'of Gederah').

GEDEROTH.—A town of Judah in the Shephelah, Jos 15[41]; captured by the Philistines in the time of Ahaz, 2 Ch 28[18]. Its location is unknown. Some have identified it with **Kedron** (q.v.); but cf J. Simons, *The Geographical and Topographical Texts of the OT*, 1959, p. 147).

GEDEROTHAIM occurs in Jos 15[36] as one of the fourteen cities of Judah that lay in the Shephelah. There are, however, fourteen cities without it, and it is probable that the name has arisen by dittography from the preceding **Gederah**. The subterfuge of the AVm 'Gederah *or* Gederothaim' is not permissible.

GEDOR.—1. A town of Judah, in the hill country, Jos 15[58], probably modern *Kh. Jedûr*. **2.** The district from which the Simeonites are said to have expelled the Hamite settlers, 1 Ch 4[39ff]. The LXX, however, reads **Gerar** (q.v.), and this well suits as to direction. **3.** A place in Judah ('son' of Penuel), mentioned in 1 Ch 4[4]. **4.** Another place in Judah ('son' of Jered), mentioned in 1 Ch 4[18]. Possibly either **3** or **4** should be identified with **1**. **5.** The town where the Benjamite Jeroham lived, 1 Ch 12[7]. Its site is unknown. **6.** A Benjamite, great-uncle of king Saul, 1 Ch 8[31] 9[37].

GE-HARASHIM ('valley of craftsmen').—Mentioned in 1 Ch 4[14] (AV 'valley of **Charashim**') and Neh 11[35] (EV 'the valley of craftsmen'). In the latter passage it occurs with Lod and Ono. Its location is unknown.

GEHAZI.—Of the antecedents of Gehazi we are told nothing. He is referred to by name as the 'servant' (*na'ar*; see SLAVE, **2**) of Elisha four times (2 K 4[12, 25] 5[20] 8[4]). If at 2 K 4[43] the reference is to Gehazi, it should be noted that a different Hebrew word is there translated 'servant' by RSV (AV 'servitor,' RVm 'minister'; the word as applied to Joshua is rendered by the RSV 'minister' at Nu 11[28], Jos 1[1], and 'servant' at Ex 24[13] 33[11]).

Gehazi appears in three narratives in 2 Kings. He is first introduced in the episode of the Shunammite woman (2 K 4[8-37]), where the prophet consults familiarly with him. Gehazi bears Elisha's message to her: 'See, you have taken all this trouble for us; what is to be done for you?' (2 K 4[13]). When she declines the suggested favours, Gehazi reminds his master that the woman is childless. Elisha promises that a son will be born to her 'at this season, when the time comes round' (v.[16]), and the prediction is fulfilled. Later, when the child dies and she comes in her grief to the prophet and clasps his feet, Gehazi would thrust her away, but instead he is bidden take the prophet's staff and go and lay it on the child's face. He does so and nothing happens, but where he fails his master succeeds (2 K 4[18-37]).

In the story of Naaman (q.v.) in 2 K 5 the prophet's refusal to receive any payment from the Syrian general for the cure which had been effected does not meet with the approval of Gehazi. He runs after Naaman, and, fabricating a message from his master, begs a talent of silver and two changes of raiment for two young men of the sons of the prophets, who are supposed to be on a

visit to Elisha. The fraud is revealed to the prophet, who pronounces his servant's punishment: 'Therefore the leprosy of Naaman shall cleave to you, and to your descendants for ever.' So he went out from his presence a leper, as white as snow (2 K 5^{27}).

The third narrative (2 K 8^{1-6}), about the position of which there is some doubt, is an epilogue to the story of the Shunammite woman. Having had to leave her home and land to escape famine, she now returns and petitions the king for the restoration of her possessions just as Gehazi is relating to him how Elisha had brought the dead to life. Gehazi recognizes her: 'My lord, O king here is the woman, and here is her son whom Elisha restored to life,' and the king grants her request.

In later Jewish writings Gehazi is depicted as denying the resurrection of the dead, a judgment which must derive from his failure with the prophet's staff (2 K 4^{31}). It is held too that the four lepers who entered the Syrian camp during the siege of Samaria and found it deserted (2 K 7) were Gehazi and his sons. There is a tradition that Elisha went to Gehazi at Damascus to persuade him to repent but was unsuccessful. Later Jewish thought considered that Elisha's treatment of his servant had been too severe. J. A. K.—W. D. McH.

GEHENNA.—A transcription of Hebrew *Gê-Hinnōm*, the name of the valley to the south of Jerusalem where the kings Ahaz and Manasseh are said to have offered their sons to the god Moloch (2 Ch 28^3 33^6, Jer 32^{35}). Polluted by Josiah in the course of his reform (2 K 23^{10}), it is thought subsequently to have become the city's garbage dump, where dead animals were thrown and refuse burned. Its sinister associations and the smoke that continually ascended from it made it an appropriate symbol of woe and judgment, and as such it figures in various prophetic oracles (*e.g.* Jer 7^{31} 19^6, Is 66^{24}). In Jewish apocalyptic it became the place of the final punishment of the wicked, which was to take place in the sight of the righteous (1 En 27, 90^{26f}).

In NT Gehenna (always translated 'hell') is the place of eternal punishment (Mt 5^{29} 10^{28}). It is not to be confused with **Hades** (also translated 'hell' in AV), which is the resting place of the dead pending the resurrection. Gehenna is a place of torment, of unquenchable fire and the consuming worm (Mt 18^{8f}, Mk 9^{44ff} etc.); it is a furnace (Mt 13^{42}), a lake of fire (Rev 20^{14}), outer darkness (Mt 8^{12} etc.). The word Gehenna occurs rarely (not even in all the passages just cited), and almost always on the lips of Jesus. But the concept of final punishment for those who reject Christ is common to all the NT and expressed in various ways: wrath (Ro 5^9), destruction (Ro 9^{22}), corruption (Gal 6^8), death (Jn 8^{21}), the second death (Rev $20^{6, 14}$), etc. In 2 P 2^4 the word rendered 'hell' is **Tartarus**, which to the Greeks was the place where the wicked are punished in the bowels of the earth far deeper than Hades. None of the NT writers delight to dwell on the miseries of the lost, or make any attempt to give exact descriptions of the place of punishment. While we need not literalize their descriptions of physical torment, we cannot explain the symbolism away and do justice to their teaching. NT speaks of Gehenna and perdition always with the purpose of warning and awakening responsibility. J. Br.

GELILOTH ('stone circles').—Mentioned in Jos 18^{17}; identical with the **Gilgal** of Jos 15^7, and possibly with the **Beth-gilgal** of Neh 12^{29}. It was a place on the border of Benjamin and Judah near the Ascent of Adummim. This last was probably in the neighbourhood of *Tal'at ed-Damm*, a hill near the so-called 'Inn of the Good Samaritan' on the carriage road to Jericho. The word *gᵉlîlôth* occurs also in the Hebrew in Jos 13^2 22^{10f} and Jl 3^4, and is translated in AV either 'borders' or 'coasts,' RV and RSV 'regions.' E. W. G. M.

GEM.—See Jewels and Precious Stones.

GEMALLI.—Father of the Danite spy, Nu 13^{12}.

GEMARA.—See Talmud.

GEMARIAH.—1. A son of Shaphan the scribe; he vainly sought to deter king Jehoiakim from burning the roll, Jer $36^{10ff, 25}$. **2.** A son of Hilkiah who carried a letter from Jeremiah to the captives at Babylon, Jer 29^3.

GENEALOGY.—The genealogies of the OT fall into two classes, national and individual, though the two are sometimes combined, the genealogy of the individual passing into that of the nation.

1. National genealogies.—These belong to a well-recognized type, by which the relationship of nations, tribes, and families is explained as due to descent from a common ancestor, who is often an 'eponymous hero,' invented to account for the name of the nation. The principle was prevalent in Greece (see Grote, *Hist.* vol. i. ch. iv. etc. and p. 416); *e.g.* Hellen is the '**father**' of Dorus, Aeolus, and Xuthus, who is in turn the 'father' of Ion and Achaeus, the existence of the various branches of the Greek races being thus explained. M'Lennan (*Studies in Ancient History*, 2nd series, ix) gives further examples from Rome (genealogies traced to Numa), Scotland, India, Arabia, and Africa; the Berbers ('barbarians') of N. Africa invented an ancestor Berr and connected him with Noah. The Arabs derived all their subdivisions from Nebaioth or Joktan. The genealogies of Genesis are of the same type. The groundwork of the Priestly narrative (P) is a series of interconnected genealogies, each beginning with the formula, 'These are the generations (*tôlᵉdhôth*) of . . .' (2^4 5^1 6^9 etc.). The gap between Adam and Noah is filled by a genealogy of ten generations (Gn 5), and in Gn 10 the nations of the world, as known to the writer, are traced in a genealogical tree to Noah's three sons. We find in the list plural or dual names (*e.g.* Mizraim, Ludim, Anamim), names of places (Tarshish, Sidon, Ophir) or of nations (the Jebusite, Amorite, etc.). An 'Eber' appears as the eponymous ancestor of the Hebrews. Sometimes the names might in form represent either individuals or nations (Asshur, Moab, Edom), but there can in most cases be little doubt that the ancestor has been invented to account for the nation. In later chapters the same method is followed with regard to tribes more or less closely related to Israel; the connexion is explained by deriving them from an ancestor related to Abraham. In Gn 22^{20} the twelve Aramaean tribes are derived from Nahor his brother; in 25^{12} twelve N. Arabian tribes, nearer akin, are traced to Ishmael and Hagar; six others, a step farther removed, to Keturah, his second wife, or concubine (25^1). The Edomites, as most nearly related, are derived from Esau (36). The frequent recurrence of the number 12 in these lists is a sign of artificiality. The same principle is applied to Israel itself. The existence of all the twelve sons of Jacob as individuals is on various grounds improbable; they represent tribes, and in many cases their 'descendants' are simply individual names coined to account for cities, clans, and subdivisions of the tribes (Gn 46^8, Nu 26). A good illustration is found in the case of Gilead. In Dt 3^{15} we are told that Moses gave Gilead to Machir, son of Manasseh. In Nu 26^{29} etc. Gilead has become the 'son' of Manasseh, and in Jg 11^1 'begets' Jephthah. So among the 'sons' of Caleb we find cities of Judah (Hebron, Tappuah, Ziph, Gibea, etc., 1 Ch 2^{42ff}), and Kiriath-jearim and Bethlehem are descendants of Hur (2^{51}). It is indeed obvious that, whether consciously or not, terms of relationship are used in an artificial sense. '**Father**' often means founder of a city; in Gn 4^{20} it stands for the originator of occupations and professions; members of a guild or clan are its 'sons.' The towns of a district are its 'daughters' (Jg 1^{27} RVm).

With regard to the *historical value* of these genealogies, two remarks may be made: (*a*) The records, though in most cases worthless if regarded as referring to individuals, are of the highest importance as evidence of the movements and history of peoples and clans, and of the beliefs entertained about them. Gn 10 gives geographical and ethnographical information of great value. A good example is found in what we learn of Caleb

and the Calebites. In the earliest tradition (Nu 32^{12}, Jos $14^{6, 14}$) he is descended from Kenaz, a tribe of Edom, and 'grandson' of Esau (Gn $36^{11, 42}$); in 1 S 25^{3} 30^{14} the Calebite territory is still distinct from Judah. But in 1 Ch 24^{ff} Caleb has become a descendant of Judah. We gather that the Calebites ('dog-tribe') were a related but alien clan, which entered into friendly relations with Judah at the time of the conquest of Canaan, and perhaps took the lead in the invasion. Ultimately they coalesced with Judah, and were regarded as pure Israelites. So generally, though no uniform interpretation of the genealogies is possible, a marriage will often point to the incorporation of new elements into the tribe, a birth to a fresh subdivision or migration, or an unfruitful marriage to the disappearance of a clan. Contradictory accounts of an individual in documents of different date may tell us of the history of a tribe at successive periods, as in the case of Calebites.

(*b*) Though the genealogical names usually represent nations, there is, no doubt, in certain cases a personal element as well. The patriarchs and more prominent figures, such as Ishmael and Esau and Caleb, were no doubt individuals, and their history is not entirely figurative. On this point see Driver, *Genesis*, pp. liv. ff; also see ABRAHAM, and TRIBES. We should note that the distinctive feature of the Greek genealogies, which traced national descent from the gods, is absent from the OT. A trace remains in Gn 6^{4} (cf Lk 3^{38}).

2. Genealogies of individuals.—Whatever view be taken of the genealogies of our Lord (see next article), their incorporation in the Gospels proves the importance attached to descent in the NT period; they also show that at that time records were kept which made the construction of such tables a possibility. St. Paul was conscious of his pure pedigree (Ph 3^{5}), and in several cases in the NT the name of a person's tribe is preserved. The hope of being the ancestor of the Messiah, and the natural pride of royal descent probably caused the records of the house of David to be preserved with great care. In the same way Josephus, in the opening chapter of his *Life*, sets out his genealogy as vouched for by the public records, though only as far back as his grandfather Simon. In *c. Apion.* i. 7 (30 ff), he speaks of the careful preservation of the priestly genealogies; and the story of Africanus (*ap.* Eus. *HE* i. 7, 13), that Herod the Great destroyed the genealogical records of the Jews in order to conceal his own origin, is at least an indication of the existence of such records and of the value attached to them. The Talmud speaks of professional genealogists, and in the present day many Jews, especially among the priests, treasure long and detailed family trees, showing their pure descent (cf, for an earlier period, 1 Mac 2^{1}, Bar 1^{1}, To 1^{1}).

There can be no doubt that this careful recording of genealogies received its main impetus in the time of Ezra. It was then that the line between the Jews and other nations became sharply drawn, and stress was laid on purity of descent, whether real or fictitious. After the return from Babylon, it was more important to be able to trace descent from the exiles than to be a native of Judah (Ezr 9). Certain families were excluded from the priesthood for lack of the requisite genealogical records (2^{61}, Neh 7^{63}). And in fact practically all the detailed genealogies of individuals as preserved in P, Chronicles, and kindred writings, date from this or a later period. No doubt the injunctions of Dt 23^{3} and the arrangements for a census (2 S 24) imply that there was some sort of registration of families before this, and the stage of civilization reached under the monarchy makes it probable that records were kept of royal and important houses. But the genealogical notes which really date from the earlier period rarely go further back than two or three generations, and the later genealogies bear many traces of their artificiality. The names are in many cases late and post-exilic, and there is no evidence outside the genealogies that they were in use at an earlier period. Of the twenty-four courses of the sons of Aaron in 1 Ch 24^{1ff}, sixteen names are post-exilic. Names of places and clans appear as individuals (2^{18-24} 7^{30-40}). Gaps are filled up by the repetition of the same name in several generations (*e.g.* 6^{4-14}). At a later time it was usual for a child to be named after his father or kinsman (Lk $1^{59, 61}$), but there are probably no cases where this is recorded for the pre-exilic period, except in the Chronicler's lists (see Gray, *HPN*). There are numerous discrepancies in the various lists, and there is a strongly marked tendency to ascribe a Levitical descent to all engaged in the service of the sanctuary, *e.g.* the guilds of singers and porters. So Samuel is made a Levite by the Chronicler ($6^{22, 33}$), almost certainly wrongly, as his story shows. In the same way the position of clans, such as Caleb and Jerahmeel, which in the early history appear as alien, is legitimized by artificial genealogies (1 Ch 2). In 25^{4} the names of the sons of Heman seem to be simply fragments of a hymn or psalm. In 6^{4} there are, including Aaron, twenty-three priests from the Exodus to the Captivity—an evidently artificial reconstruction; forty years is a generation, and $40 \times 12 = 480$ years to the building of the Temple (1 K 6^{1}), the other eleven priests filling up the period till the Exile, which took place in the eleventh generation after Solomon. Such marks of artificiality, combined with lateness of date, forbid us to regard the lists as entirely historical. No doubt in certain cases the genealogist had family records to work upon, but the form in which our material has reached us makes it almost impossible to disentangle these with any degree of certainty. W. R. Smith (*Kinship and Marriage in Early Arabia*, p. 6) gives an interesting parallel to this development of genealogizing activity at a particular period. The Arabian genealogies all date from the reign of Caliph Omar, when circumstances made purity of descent of great importance. C. W. E.

GENEALOGY OF JESUS CHRIST.—1. The two genealogies.—Both the First and Third Evangelists (Mt 1^{1-16}, Lk 3^{23-38}) give our Lord's ancestry, but they differ widely. Luke traces back the genealogy to Adam, Matthew to Abraham only. Both lists agree from Abraham to David, except that Aram or Ram in Mt 1^{3} = Arni in Lk 3^{33} (best text); but between David and Joseph the lists have only Shealtiel and Zerubbabel, and possibly two other names (see below), in common.

(*a*) *The Matthaean list* from Perez to David is taken almost verbatim from Ru 4^{18b-22} LXX (inserting Rahab and Ruth, and calling David 'the king'), and agrees with 1 Ch 2^{1-15}; it then gives the names of the kings to Jechoniah, from 1 Ch 3^{10-15}, but inserts 'the [wife] of Uriah' and omits kings Ahaziah, Joash, and Amaziah between Joram and Uzziah (=Azariah), and also Jehoiakim son of Josiah and father of Jechoniah (Coniah, Jer 22^{24}) or Jehoiachin (2 Ch 36^{8}). This last omission may be merely a mistake, for the list is made up of three artificial divisions of fourteen generations each, and Jechoniah appears both at the end of the second and at the beginning of the third division, being counted twice. Perhaps, then, originally Jehoiakim ended the second division, and Jehoiachin began the third, and they became confused owing to the similarity of spelling and were written alike (as in 1 Ch 3^{15}, Jer 52^{31} LXX); then the synonym Jechoniah was substituted for both. In the third division, the names Shealtiel, Zerubbabel (both in Luke also) are from Ezr 3^{2}, 1 Ch $3^{17, 19}$, but we notice that in Matthew and Ezra Zerubbabel is called son of Shealtiel, whereas in 1 Chronicles (except in some MSS of the LXX) he is his nephew. Both in Matthew and 1 Chronicles Shealtiel is called son of Jechoniah. Between Zerubbabel and Joseph the names are perhaps from some traditional list of the heirs of the kings, but some names here also have been omitted, for in Matthew ten generations are spread over nearly 500 years, while Luke gives nineteen generations for the same period. Matthew's genealogy ends with Matthan, Jacob, Joseph.

(*b*) *The Lucan list*, which inverts the order, beginning at Jesus and ending at Adam, takes the line from Adam

GENEALOGY OF JESUS CHRIST

to Abraham from Gn 5, 10[21-25] (to Peleg), 1 Ch 1[1-27], but inserts Cainan between Arphaxad and Shelah, as does the LXX in Genesis and 1 Chronicles; it practically agrees with Matthew (see above) from Abraham to David, but then gives the line to Shealtiel through David's son Nathan, making Shealtiel the son of Neri, not of king Jechoniah (see 2 below). The names between Nathan and Shealtiel are not derived from the OT, and those between Zerubbabel and Joseph are otherwise unknown to us, unless, as Plummer supposes (*ICC*, 'St. Luke,' p. 104), Joanan (Lk 3[27] RSV) = Hananiah son of Zerubbabel (1 Ch 3[19])—the name Rhesa being really a title ('Zerubbabel Rhesa' = 'Z. the prince'), misunderstood by some copyist before Luke—and Joda (Lk 3[26] RSV) = Abiud (Mt 1[13]) = Hodaviah (1 Ch 3[24] RSV, a descendant of Zerubbabel, not son of Hananiah). Some think that Matthat (Lk 3[24]) = Matthan (Mt 1[15]).

2. Reason of the differences.—It is not enough merely to say that the four Gospels cannot be harmonized, and that (see GOSPELS, 3) Matthew and Luke each wrote without knowing the other's work. The question is, why did two independent writers, both professing to give the genealogy of Jesus, produce such different lists of names. Jewish genealogies were frequently artificial; that of Matthew is obviously so. For example, its omissions were made, apparently, for the purpose of equalizing the three divisions (though actually there are only 13+14+12 generations). It is often assumed that Matthew compiled his genealogy for use in his Gospel. His fondness for triadic grouping is apparent elsewhere (see SERMON ON THE MOUNT, 3) and supports this view. Moreover, the details about Tamar, Rahab, Ruth, Bathsheba, which would not be expected in a genealogy (see below), suited his purposes, and so did the artificial dividing points (David, the Exile). One of his objects may have been to refute an early 2nd-cent. slander that Jesus was born out of wedlock—a slander certainly known to Celsus (Origen, *c. Cels.* i. 28, etc.), though it may be argued, contrariwise, that this libel was only a perverse and garbled echo of the story in Matthew. Stylistic and lexical evidence shows that Mt 1–2 is by the author of the rest of the book, and cannot be a later addition. This view may, however, be subject to a slight modification on the hypothesis that Matthew's list was due to a Christian predecessor or to one of his sources, perhaps in the 'school' of Matthew which gave to the evangelic tradition its peculiarly formal and didactic character (*e.g.* the rhyming Beatitudes, in their Aramaic original, or the confusion of Jehoiakim and Jehoiachin: see above). Presumably the genealogy existed before it was adapted to the doctrine of the Virgin Birth (v.[16]; cf the modification of Luke's genealogy in 3[23]).

Despite ancient and modern arguments to the contrary, the word 'begat' (*egennēsen*; RSV 'was the father of') implies physical descent, not merely legal heirship (see vv.[18, 20]; Luke's language would fit the 'legal' theory better than Matthew's). Nevertheless, Matthew clearly believed in the Virgin Birth, which he derives midrashically from the LXX of Is 7[14], and he locates the genealogy immediately before the assertion of it in vv.[18-25]; if only physical descent was understood, the genealogy through Joseph would be meaningless. What Matthew is trying to prove is that Jesus was legally the descendant of David—and Abraham—as the true 'Son of David.' The list may therefore have been compiled with the purpose of showing the 'throne succession,' *i.e.* the list of legal heirs. Luke, on the other hand, may give Joseph's actual physical descent according to some list preserved in his family. On this view, Joseph was really the son of Heli (Lk 3[23]) but the legal heir of Jacob (Mt 1[16]). But the phrase, 'as was supposed' (Lk 3[23]), scarcely applies to other names in the genealogies, and does not bear *prima facie* the meaning of either 'legal' or 'physical' descent as contrasted with the other. The best evidence for the theory is in the case of Shealtiel and Zerubbabel, who appear in both lists. Jechoniah was childless, or at least his heirs died out (Jer 22[24, 30]), and Shealtiel, though called his 'son' in 1 Ch 3[17], was probably only his legal heir, being in reality son of Neri (Lk 3[27]). But see JEHOIACHIN.

It is probably wiser not to try to combine or even to correlate the two genealogies. They represent two independent efforts to show (*a*) that the title 'Son of David' rightfully belonged to Jesus, (*b*) that he was a true Jew, descended from Abraham, and (*c*) in Luke, that he was descended from Adam the First Man, and therefore truly human, a Son of God in the lower sense as well as in the highest—perhaps as against incipient Gnostic theories of his Divine nature. Matthew's genealogy is obviously symbolical, like a Tree of Jesse window at the entrance of the Gospel; but Luke's is also symbolic, to a considerable degree.

The reason for Matthew's insertion of the names of four women is not wholly obvious. Two were foreigners (Gentiles), three were of ill repute (Tamar, guilty of incest, Gn 38[12-26]; Rahab, a harlot, Jos 2[1-21]; Ruth, a Moabitess, Ru 1[4] 4[13-17]; Bathsheba—unnamed—an adulteress, 2 S 11[2-5]). Mary was unique, of purely Jewish origin and unsullied character. It may be that the compiler of the genealogy, or the author of the Gospel, intended to point out that all sorts and conditions of men—and women—including Gentiles as well as Jews, sinners as well as saints, made up the Messiah's ancestry. In the ancient synagogue the characters of Tamar and Ruth were exalted, as ancestresses of the royal line of Judah and of the coming Messiah, while Bathsheba was exonerated (the sin was David's), and Rahab was made the wife of Joshua (see also He 11[31]). The moral significance of the male figures was quaintly pointed out by Thomas Fuller (*Scripture Observations*, 1645); 'Rehoboam begat Abiam: a bad father begat a bad son. Abiam begat Asa: a bad father a good son. Asa begat Jehoshaphat: a good father a good son. Jehoshaphat begat Joram: a good father a bad son. I see, Lord, from hence, that my father's piety cannot be entailed; that is bad news for me. But I see also that actual impiety is not always hereditary; that is good news for my son.'

3. Other solutions.—(*a*) Julius Africanus, perhaps the earliest writer to discuss Biblical questions in a critical manner (*c* A.D. 220), treats of these genealogies in his *Letter to Aristides* (Euseb. *HE* i. 7, vi. 31). He harmonizes them (expressly, however, not as a matter of tradition) on the theory of levirate marriages, supposing that two half-brothers, sons of different fathers, married the same woman, and that the issue of the second marriage was therefore legally accounted to the elder, but physically to the younger brother. It is a difficulty that two, or even three, such marriages must be supposed in the list; and this theory is almost universally rejected by moderns. Africanus had no doubt that both genealogies were Joseph's.

Africanus says that Herod the Great destroyed all the Jewish genealogies kept in the archives, so as to hide his own ignoble descent, but that not a few had private records of their own (Euseb. *HE* i. 7). Here clearly Africanus exaggerates. Josephus says that his own genealogy was given in the public records, and that the priests' pedigrees, even among Jews of the Dispersion, were carefully preserved (*Life*, 1 [1–6], *c. Ap.* i. 7 [30–36]). There is no reason why Luke should not have found a geneaology in Joseph's family. Africanus says that our Lord's relatives, called *desposyni*, prided themselves on preserving the memory of their noble descent.

(*b*) A more modern theory, first expounded by Annius of Viterbo (*c* 1490), is that Matthew gives Joseph's pedigree, Luke Mary's. This theory requires us to render Lk 3[23] thus: 'being the son (as was supposed) of Joseph [but really the grandson] of Heli.' But this translation is incredible; it contradicts the clear statements of both Gospels, and a birthright derived through the mother would be incompatible with both Jewish and Gentile ideas of legal descent. Luke assumes that Jesus' ancestry was to be traced through Joseph, the phrase 'as was supposed' being supplied in order to conform the statement to the doctrine of the Virgin Birth; the

phrase in 1^{34} (' since I know not a man,' RSV ' since I have no husband ') may also have been inserted for the same reason.

It must, however, be added that Joseph and Mary may have been near relatives. We cannot, indeed, say with Eusebius (*HE* i. 7) that they must have been of the same tribe, ' inasmuch as intermarriage between different tribes was not permitted.' Eusebius was evidently referring to Nu 36^{6f}, but this relates only to heiresses, who, if they married out of their tribe, would forfeit their inheritance. Mary and Elizabeth were kinswomen, though the latter was descended from Aaron (Lk $1^{5, 36}$). But it was undoubtedly the belief of the early Christians that Jesus was descended, according to the flesh, from David, and was of the tribe of Judah (Ac 2^{30} 13^{23}, Ro 1^{3}, 2 Ti 2^{8}, He 7^{14}, Rev 5^{5} 22^{16}; cf Mk 10^{47} 11^{10}). At the same time it is noteworthy that our Lord did not base any claims on his Davidic descent (cf Mk 12^{35-37a}). A violent translation of Lk 1^{27} would make Mary a descendant of David; but the case is pointless—and the Virgin Birth was unknown in the NT outside Matthew and Luke. In the *Testaments of the Twelve Patriarchs* we read (Sim 7^{2}, cf Gad 8^{1}), ' The Lord shall raise one from Levi as high priest and [one] from Judah as king.' This has been thought to be an inference from Lk 1^{36}, but it is more probably related to the eschatology of the Dead Sea Scrolls. See *Manual of Discipline*, ix. 10 f, where the coming of the prophet, the priest, and the king is envisaged (three eschatological figures); cf *Manual for the Congregation*, ii. 12–17, where the protocol to be observed by the Messianic king and the high priest (not two Messiahs !) is under consideration.

4. The Matthaean text.—In Mt 1^{16} the reading of almost all Greek MSS, attested by Tertullian, is that of EV, ' Jacob begat Joseph the husband of Mary, of whom was born Jesus,' etc. The Sinaitic Syriac palimpsest (Syr^{s}) reads, ' Jacob begat Joseph; Joseph, to whom was betrothed Mary the Virgin, begat Jesus.' This self-contradictory reading (either ' virgin ' or ' begat ' is impossible !) was carefully discussed by F. C. Burkitt in his *Evangelion da-Mepharreshe*, ii, 262 ff; he concluded that it was derived from a variant of the ordinary text: 'Jacob begat Joseph, to whom being betrothed the Virgin Mary bare [literally *begat*, as often] Jesus.' It is to be noted that the reconstruction of the Greek underlying the Syriac is not above question: Nestle and Huck, *e.g.* disagree in their rendering of both the Sinaitic and the Curetonian Syriac. On the other hand, it has been suggested that the Sinaitic palimpsest retains the original reading of a source of Matthew, perhaps of the original genealogy, which did not contain or presuppose the Virgin Birth. A. J. M.—F. C. G.

GENERAL.—This adjective means in AV ' universal,' as Latimer, *Sermons*, 182, ' The promises of God our Saviour are general; they pertain to all mankind.' So in He 12^{23}, ' the general assembly ' means the gathering of all without exception (RSV omits ' general '). **Generally** in like maner means ' universally,' 2 S 17^{11} ' I counsel that all Israel be generally gathered unto thee ' (RSV omits). The substantive ' general ' is once (1 Ch 27^{34}; RSV ' commander ') used for Hebrew *śar*, of which the more usual rendering is ' captain ' (cf ARMY, 2).

GENERATION.—' Generation ' is used in AV to translate **1.** Hebrew *dôr*, which is used (*a*) generally for a *period*, especially in the phrases *dôr wādhôr*, etc., of limitless duration; past, Is 51^{8}; future, Ps 10^{6}; past and future, Ps 102^{24}; (*b*) of all men living at any given time (Gn 6^{9}); (*c*) of a class of men with some special characteristic, Pr 30^{11-14} (where RSV has ' there are those who ') of four **types** of bad men; (*d*) in Is 38^{12} (AV, RV ' mine age '; RVm ' my habitation '; RSV ' my dwelling ') and Ps 49^{19} *dôr* is sometimes taken as ' dwelling-place.' **2.** Hebrew *tôl^{e}dhôth* (from *yāladh*, ' beget ' or ' bear children '), which is used in the sense of (*a*) *genealogies* Gn 5^{1}, figuratively of the account of creation, Gn 2^{4}; also (*b*) *divisions of a tribe*, as based on genealogy; *tôl^{e}dhôth* occurs only in the Priestly Code, in Ru 4^{18} (RSV ' descendants'), and in 1 Chronicles. **3.** Greek *genea* in same sense as **1** (*a*), Col 1^{26}; as **1** (*b*), Mt 24^{34}. **4.** *genesis*=2 (*a*), Mt 1^{1} (RSV ' genealogy '), an imitation of LXX use of *genesis* for *tôl^{e}dhôth*. **5.** *Gennēma*, ' offspring '=**1** (*c*): so Mt 3^{7} || (RV ' offspring '; RSV ' brood '). **6.** *genos*, ' race '=**1** (*c*): so 1 P 2^{9} (AV ' chosen generation '; RV ' elect race '; RSV ' a chosen race '). Where not otherwise noted, RSV retains ' generation ' in all the passages above cited.

GENESIS.—1. Name, Contents, and Plan.—The name ' Genesis,' as applied to the first book of the Bible, is derived from the LXX, in one or two MSS of which the book is entitled *Genesis kosmou* (' origin of the world '). A more appropriate designation, represented by the heading of one Greek MS, is ' The Book of Origins '; for Genesis is pre-eminently the Book of Hebrew Origins. It is a collection of the earliest traditions of the Israelites regarding the beginnings of things, and particularly of their national history; these traditions being woven into a continuous narrative, commencing with the creation of the world and ending with the death of Joseph. The story is continued in the book of Exodus, and indeed forms the introduction to a historical work which may be said to terminate either with the conquest of Palestine (Hexateuch) or with the Babylonian captivity (2 Kings). The narrative comprised in Genesis falls naturally into two main divisions—(i) *The history of primeval mankind* (chs. 1–11), including the creation of the world, the origin of evil, the beginnings of civilization, the Flood, and the dispersion of peoples. (ii) *The history of the patriarchs* (chs. 12–50), which is again divided into three sections, corresponding to the lives of Abraham (12–25^{18}), Isaac (25^{19}–36), and Jacob (chs. 37–50); although in the last two periods the story is really occupied with the fortunes of Jacob and Joseph respectively. The transition from one period to another is marked by a series of genealogies, some of which (*e.g.* chs. 5, 11^{10ff}) serve a chronological purpose and bridge over intervals of time with regard to which tradition was silent, while others (chs. 10, 36, etc.) exhibit the nearer or remoter relation to Israel of the various races and peoples of mankind. These genealogies constitute a sort of framework for the history, and at the same time reveal the plan on which the book is constructed. As the different branches of the human family are successively enumerated and dismissed, and the history converges more and more on the chosen line, we are meant to trace the unfolding of the Divine purpose by which Israel was separated from all the nations of the earth to be the people of the true God.

2. Literary sources.—The unity of plan which characterizes the Book of Genesis does not necessarily exclude the supposition that it is composed of separate documents; and a careful study of the structure of the book proves beyond all doubt that this is actually the case. The clue to the analysis was obtained when (in 1753) attention was directed to the significant alternation of two names for God, *Yahweh* and *Elohim*. This at once suggested a compilation from *two* pre-existing sources; although it is obvious that a preference for one or other Divine name might be common to many independent writers, and does not by itself establish the unity of all the passages in which it appears. It was speedily discovered, however, that this characteristic does not occur alone, but is associated with a number of other features, linguistic, literary, and religious, which were found to correspond in general with the division based on the use of the Divine names. Hence the conviction gradually gained ground that in Genesis we have to do not with an indefinite number of disconnected fragments, but with a few homogeneous compositions, each with a literary character of its own. The attempts to determine the relation of the several components to one another proved more or less abortive until it was finally established in 1853 that the use of *Elohim* is a peculiarity common to two quite dissimilar

groups of passages; and that one of these has much closer affinities with the sections where *Yahweh* is used than with the other Elohistic sections. Since then, criticism has rapidly advanced to the positions now held by the great majority of OT scholars, which may be briefly summarized as follows:

(1) Practically the whole of Genesis is resolved into three originally separate documents, each containing a complete and consecutive narrative: (*a*) the *Yahwistic* (J), characterized by the use of 'Yahweh,' commencing with the Creation (2^{4bff}) and continued to the end of the book; (*b*) the *Elohistic* (E), using 'Elohim,' beginning at ch. 20; (*c*) the *Priestly Code* (P), also using 'Elohim,' which opens with the first account of the Creation ($1–2^{4a}$). (2) In the compilation from these sources of our present Book of Genesis, two main stages are recognized: first, the fusion of J and E into a single work (JE); and second, the amalgamation of the combined work JE with P (an intermediate stage; the combination of JE with the book of Deuteronomy, is here passed over because it has no appreciable influence on the composition of Genesis). (3) The oldest documents are J and E, which represent slightly varying recensions of a common body of patriarchal tradition, to which J has prefixed traditions from the early history of mankind. Both belong to the best age of Hebrew writing, and must have been composed before the middle of the 8th cent. B.C. The composite work JE is the basis of the Genesis narrative; to it belong all the graphic, picturesque, and racy stories which give life and charm to the book. Differences of standpoint between the two components are clearly marked; but both bear the stamp of popular literature, full of local colour and human interest, yet deeply pervaded by the religious spirit. Their view of God and His converse with men is primitive and childlike; but the bold anthropomorphic representations which abound in J are strikingly absent from E, where the element of theological reflexion is somewhat more pronounced than in J. (4) The third source, P, reproduces the traditional scheme of history laid down in JE; but the writer's unequal treatment of the material at his disposal reveals a prevailing interest in the history of the sacred institutions which were to be the basis of the Sinaitic legislation. As a rule he enlarges only on those epochs of the history at which some new religious observance was introduced, viz., the Creation, when the Sabbath was instituted; the Flood, followed by the prohibition of eating the blood; and the Abrahamic Covenant, of which circumcision was the perpetual seal. For the rest, the narrative is mostly a meagre and colourless epitome, based on JE, and scarcely intelligible apart from it. While there is evidence that P used other sources than JE, it is significant that, with the exception of ch. 23, there is no single episode to which a parallel is not found in the older and fuller narrative. To P, however, we owe the chronological scheme, and the series of genealogies already referred to as constituting the framework of the book as a whole. The Code belongs to a comparatively late period of Hebrew literature, and is generally assigned by critics to the early post-exilic age.

It must be added, however, that, although the main lines of the Documentary hypothesis are likely to continue to be accepted by most scholars, yet it has been subjected to considerable criticism in detail from various quarters, and a formidable frontal attack has been launched against it from Scandinavia.

First of all the Elohist source has been attacked by Volz and Rudolph who have thrown doubt on its existence as an independent document, maintaining that if E existed at all, he was at best a redactor of the original J document. Then Mowinckel, without rejecting E as an independent document, revived Dillmann's theory that E was represented in the primeval history. In his study *Le Décalogue* he put forward the view that, underlying the combined JE narrative, lay the cult-legend of Sinai as it was recited by the priests at the autumn New Year festival. A further modification was suggested by Eissfeldt who found traces of a documentary source which he called the Lay-source (L), showing a secular interest as contrasted with the interest in ritual and ecclesiastical matters exhibited by P.

But the so-called Uppsala School have broken entirely with the Documentary hypothesis, and have put forward a new approach to which they have given the name of the Traditio-historical Method. Its characteristic feature is its emphasis on the part played by oral tradition in the transmission and shaping of the Pentateuchal material. The names of Engnell and Widengren are specially connected with this movement, but their work rests upon the foundation laid by such Scandinavian scholars as Nyberg, Mowinckel, and Pedersen.

Briefly stated Engnell's thesis is that the mass of the tradition-material in the OT falls into three divisions: (*a*) Genesis–Numbers, a collection of traditions which he calls the 'P-work,' or the Tetrateuch, though it should be noted that the symbol P does not bear for Engnell the meaning which it has in the Documentary Hypothesis; (*b*) Deuteronomy–2 Kings, which he calls the Deuteronomistic history-work; and (*c*) 1 Chronicles–Nehemiah.

3. Nature of the material.—That the contents of Genesis are not *historical* in the technical sense, is implied in the fact that even the oldest of its written documents are far from being contemporary with the events related. They consist for the most part of traditions which for an indefinite period had circulated orally amongst the Israelites, and which (as divergences in the written records testify) had undergone modification in the course of transmission. No one denies that oral tradition may embody authentic recollection of actual occurrences; but the extent to which this is the case is uncertain, and will naturally vary in different parts of the narrative. Thus a broad distinction may be drawn between the primitive traditions of chs. 1–11 on the one hand, and those relating to the patriarchs on the other. The accounts of the Creation, the Fall, the Flood, and the Dispersion, all exhibit more or less clearly the influence of Babylonian mythology; and with regard to these the question is one not of trustworthy historical memory, but of the avenue through which certain mythical representations came to the knowledge of Israel. For the patriarchal period the conditions are different: here the tradition is ostensibly national; the presumed interval of oral transmission is perhaps not beyond the compass of the retentive Oriental memory; and it would be surprising if some real knowledge of its own antecedents had not persisted in the national recollection of Israel. These considerations may be held to justify the belief that a substratum of historic fact underlies the patriarchal narratives of Genesis; but it must be added that to distinguish that substratum from legendary accretions is hardly possible in the present state of our knowledge. The process by which the two elements came to be blended can, however, partly be explained. The patriarchs, for instance, are conceived as ancestors of tribes and nations; and it is certain that in some narratives the characteristics, the mutual relations, and even the history, of tribes are reflected in what is told as the personal biography of the ancestors. Again, the patriarchs are founders of sanctuaries; and it is natural to suppose that legends explanatory of customs observed at these sanctuaries are attached to the names of their reputed founders and go to enrich the traditional narrative. Once more, they are types of character; and in the inevitable simplification which accompanies popular narration the features of the type tended to be emphasized, and the figures of the patriarchs were gradually idealized as patterns of Hebrew piety and virtue. No greater mistake could be made than to think that these non-historical, legendary or imaginative, parts of the tradition are valueless for the ends of revelation. They are inseparably woven into that ideal background of history which bounded the horizon of ancient Israel, and was perhaps more influential in the moulding of national character than a knowledge of the naked reality would have been. The inspiration of the Biblical narrators is

seen in the fashioning of the floating mass of legend and folklore and historical reminiscences into an expression of their Divinely given apprehension of religious truth, and so transforming what would otherwise have been a constant source of religious error and moral corruption as to make it a vehicle of instruction in the knowledge and fear of God. Once the principle is admitted that every genuine and worthy mode of literary expression is a suitable medium of God's word to men, it is impossible to suppose that the mythic faculty, which plays so important a part in the thinking of all early peoples, was alone ignored in the Divine education of Israel.

J. S.—S. H. He.

GENEVA BIBLE.—See ENGLISH VERSIONS, **26.**

GENIZAH.—Storage-place, for Shemoth, *i.e.* written or printed documents, either outworn or heretical, but containing *inter alia* the Name of God. Genizoth have been found in some old synagogues and cemeteries and caves. The most famous one is that of the synagogue of Fosṭaṭ near Cairo, emptied in the 19th cent. J. Bo.

GENNAEUS.—The father of Apollonius, a Syrian commander of a district in Palestine, 2 Mac 12[2] (AV **Genneus**).

GENNESARET, LAKE OF.—See GALILEE [SEA OF].

GENNESARET, LAND OF.—Mentioned only in AV of Mt 14[34], Mk 6[53]. RSV reads 'came to land at Gennesaret' which was probably the low shore at the NW. corner of the Lake of Galilee.

GENNEUS, 2 Mac 12[2] (AV).—See GENNAEUS.

GENTILES.—See NATIONS. For 'Court of the Gentiles,' see TEMPLE.

GENTLENESS.—The word 'gentle' occurs five times in NT (AV). In 1 Th 2[7] and 2 Ti 2[24] it corresponds to Greek *ēpios*; it is the character proper to a nurse among trying children, or a teacher with refractory pupils. In Tit 3[2], Ja 3[17], 1 P 2[18] 'gentle' is the AV translation of *epieikēs*, which is uniformly so rendered in RV. The word occurs three times in OT, seven in NT (RSV). 'Gentleness' occurs seven times (NT only). The general idea of the Greek word is that which is suggested by equity as opposed to strict legal justice; it expresses the quality of considerateness, of readiness to look humanely and reasonably at the facts of a case. There is a good discussion of it in Trench, *Syn.* p. xliii; he thinks there are no words in English which answer exactly to it, the ideas of equity and fairness, which are essential to its import, usually getting less than justice in the proposed equivalents.

In 2 S 22[36]=Ps 18[35] ('Thy gentleness hath made me great') RV keeps 'gentleness' in the text, but gives 'condescension' in the margin; RSV reads 'help,' with 'gentleness' in margin. The key to the meaning is found in comparing such passages as Ps 113[5f], Is 57[15], Zec 9[9], Mt 11[29].

GENUBATH.—Son of Hadad, the fugitive Edomite prince, by the sister of queen Tahpenes, 1 K 11[20].

GEOGRAPHY OF PALESTINE.—See PALESTINE.

GEOLOGY OF PALESTINE.—I. MAIN DIVISIONS.—Palestine is divided into four major north-south regions: (i) the *Coast Plain*, (ii) the *Cis-jordan Highlands*, (iii) the central *Rift Valley*, (iv) the *Trans-jordan Tableland.*

II. GEOLOGICAL FORMATIONS.—Palestine has always been a coastal region, with its shoreline fluctuating according to whether the sea of *Tethys* to the west encroached upon, or receded from, the Arabian tableland. Thus, terrestial sandstones are thicker in the east, and marine deposits in the west. The most important rocks are: (i) the crystalline *Archaean* rocks of the underlying Arabian platform, exposed only in southern Trans-jordan, (ii) the *Nubian Sandstone* (mid-Cambrian to early Cretaceous), east of the Dead Sea and Wâdī 'Arabāh. The cupriferous sandstone of Edom was important (Dt 8[9]), and copper was mined at Punon, possibly the site of the raising of the brazen serpent (Nu 21[9]). The Nabataean city of Petra was carved out of this rock. (iii) The *Cenomanian-Turonian Limestones*, the major rock of Cis-jordan, providing excellent building stone, and forming the steep, defensive cliffs and narrow valleys of Judah and Ephraim. (iv) The *Senonian Chalk*, soft and infertile, and useless for building (Is 27[9]). Its gentle valleys provided most of the OT roads, including the three passes across Carmel, and the Valley of Ajalon. (v) The *Eocene Limestone* of the Shephelah, central Samaria, the central part of Carmel between Sharon and Esdraelon (probably the 'Shephelah of Israel' of Jos 11[16]) and southern Galilee. Much of the flint desert of eastern Trans-jordan results from the Eocene transgression. (vi) *Post-Eocene deposits*, including the Lisân marls of the Jordan Valley and Dead Sea, the Mousterian Red Sand of Sharon, the thin line of Pleistocene limestone hillocks along the coast, and the alluvium of the Coast Plain and down-faulted basins.

III. STRUCTURE.—The most important time for earth-movements was the Miocene-Pliocene. Three types of movement took place concurrently: (i) *Warping* of the underlying platform produced the major highlands; (ii) *Folding* of the sedimentary rocks on top of the warped platform; (iii) *Faulting*, or the breaking of the platform, occurred when the strain became too great. This faulting was extremely complex and produced (*a*) the great NS. Rift Valley of the Ghôr, (*b*) the Acre-Beisân corridor, (*c*) NS. faults outlining the hill country of Cis-jordan, (*d*) several important EW. faults such as that dividing Upper from Lower Galilee, (*e*) hinge-faults cutting in obliquely on either side of the Ghôr. Such faults created the major canyons which divide the Trans-jordan tableland. There also occurred the great basalt outflows which formed the mountain of Bashan (Jebel Druze) and Trachonitis, and in Cis-jordan, the Hill of Moreh and the basalt dam which fills the Ghôr north of the Lake of Galilee.

IV. REGIONAL.—Palestine is divided structurally, not only into the four NS. regions, but also into three EW. zones cutting across them. (i) The *Central Zone*, in the latitude of the Dead Sea, is one of relative structural simplicity. West of the Jordan the Judaean plateau is formed of a single upwarp of Cenomanian limestone. On either flank the Senonian Chalk forms an important protective area. On the drier eastern side is the desolate chalk Wilderness of Judaea, and on the west the narrow chalk moat dividing Judah from the Eocene Shephelah. East of the Jordan, in Moab, the strata are remarkably level and undisturbed, except where they have been pulled down into the Ghôr in a great plunging monocline. This zone is everywhere concluded on the north by hinge-faults, the Valley of Ajalon, the Valley of Achor north of Jericho, and the Plains of Moab north-east of the Dead Sea. (ii) The *Northern Zone* is more complex. Ephraim is a Cenomanian dome, but Manasseh north of it is a basin in which the Eocene limestone in the centre stands up as hills (*e.g.* Ebal and Gerizim). The Senonian here forms interior valleys, making entry to the region much simpler than in Judah. Galilee is much broken into up-faulted hills and down-faulted basins, the eastern side being obscured by basalt outflows. East of the Jordan is the great dome of Gilead in which the Jabbok canyon cuts through the Cenomanian to the Nubian sandstone. There is also the large fault basin of the Beqā'. (iii) The *Southern Zone*, south of the Dead Sea, is largely desert. In Cis-jordan the Negeb Uplands consist of a series of upwards which are nowhere very high, and have been broken open in three places to form great 'cauldrons' surrounded by steep cliffs, *e.g. Wâdī Ramân.* The Ghôr here rises to 650 feet *above* sea-level in the Cretaceous fold of *Jebel er-Rîsheh.* East of the Ghôr the plateau has been pushed up to its greatest height (5600 feet) in Edom. To the south of Edom the plateau ends abruptly, and is succeeded by the huge Archaean wedge of the Mountains of Midian, and the wild sandstone mountains of *Jebel Ṭubeiq.* A. D. B.

GEORGIAN VERSION OF OT.—See GREEK VERSIONS OF OT, **11.**

GEPHYRUN.—A city captured by Judas Maccabaeus, 2 Mac 12[13] (RV). AV and RSV eliminate the name, the former reading 'He also went about to make a bridge to a certain strong city, which was fenced about with walls' and the latter 'he also attacked a certain city, which was strongly fortified with earthworks and walls.' The text is probably corrupt. No city of this name is known.

GER.—See STRANGER.

GERA.—One of Benjamin's sons (Gn 46[21], omitted in Nu 26[38-40]). According to 1 Ch 8[3, 5, 7] he was a son of Bela and a grandson of Benjamin. Gera was evidently a well-known Benjamite clan, to which belonged Ehud (Jg 3[15]) and Shimei (2 S 16[5], 19[16, 18], 1 K 2[8]).

GERAH, the twentieth part of the shekel (Ex 30[13], Lv 27[25] etc.). See MONEY, 3; WEIGHTS AND MEASURES, III.

GERAR.—A place mentioned in Gn 10[19] in the description of the Canaanite territory. Here Abraham sojourned and came in contact with Abimelech, king of Gerar (20[1f]). A similar experience is recorded of Isaac (26[1ff]), and here Abimelech is said to have been a Philistine; but the reference to Philistines in the age of the patriarchs is an anachronism. Gerar reappears in the description of the rout of the Ethiopians by Asa, when Gerar was the limit of the pursuit (2 Ch 14[13f]). In the LXX of 1 Ch 4[39] Gerar stands in place of Hebrew **Gedor** as the name of a place occupied by the Simeonites (see GEDOR, 1). The site is unknown; *Tell Jemmeh*, S. of Gaza, and *Tell Abū Hureirah* are among the sites proposed. See GERRHENIANS.

GERASA.—A city of the Decapolis (q.v.) in Transjordan, north of the middle stretch of the Jabbok. It may originally have been founded by Perdiccas, to whom its citizens still raised a statue centuries after his time. But Antiochus IV. Epiphanes may have refounded it, for it was called Antioch on the Chrysorrhoas, for a while, and had a temple of Zeus Olympios, such as that ruler also had built at Dura. The city was an inviolable sanctuary for the 2nd cent. B.C. Transjordanian tyrants. It was taken by Alexander Jannaeus *c* 78 B.C. It was liberated by Pompey in 63 B.C., at which time it became one of the federation called Decapolis. The Jews seem to have inflicted damage on it in the Jewish war (*BJ* II. xviii. 1 [458]), but the kindly attitude of the Gerasenes toward Jewish residents subsequently (*ib.* 5 [480]) shows that it cannot have been enough to cause rancour. The real flowering of Gerasa took place in the centuries under the Roman emperors. The ruins near the village bearing the name *Jerash* are among the most impressive of the Near East. A full record was made of them by a Yale University expedition, which also carried on some excavations.

Gerasa is not mentioned in the OT, though its Semitic name indicates pre-Hellenistic origin. Glueck was able to show that a Bronze Age city had existed about 200 metres away from the NE. wall of Roman Gerasa. Its history had ended in the 20th cent. B.C. Remains of an Iron Age city have not yet been located.

The people of Gerasa are mentioned in Mk 5[1], Lk 8[26] (RSV, but AV Gadarenes). But Gerasa was too far away, and the reading 'Gadarenes' (Mt 8[28] RSV, but AV Gergesenes) is more plausible and has displaced 'Gerasenes' in the received text of the other passages. The fame of Gerasa in the early centuries may have led to the seeking of its mention in the NT. E. G. K.

GERASENES, GERGESENES.—See GADARA and GERASA.

GERIZIM.—A mountain which with Ebal encloses the valley in which is built the town of *Nâblus* (Shechem). The Samaritan sect regard it as holy, it being to them what Jerusalem and Mount Zion are to the Jew. According to Samaritan tradition the sacrifice of Isaac took place there. From Gerizim were pronounced the blessings attached to observance of the Law (Jos 8[33]), when the Israelites formally took possession of the country. Here Jotham spoke his parable to the elders of Shechem (Jg 9[7]).

The acoustic properties of the valley are said to be remarkable, and experiment has shown that from some parts of the mountain it is possible with very little effort to make the voice carry over a very considerable area. A ledge of rock half-way up the hill is still often called 'Jotham's pulpit.' Gerizim probably had been a sacred mountain long before the time of the Samaritans (the emergence of whom as a separate sect must be post-exilic), or indeed before the entry of the Israelites.

On this mountain was erected, probably at the beginning of the 4th cent. B.C., a Samaritan Temple, which was destroyed in 126 B.C. by Hyrcanus. Its site is pointed out on a small level plateau, under the hill-top. The Passover is annually celebrated here. Three times a year, on the seventh day of Unleavened Bread, on Pentecost and at Tabernacles, the Samaritans perform a pilgrimage from their synagogue at the foot of Mount Gerizim to the top of the mountain to appear before the Lord. The pilgrims as they ascend, read selected paragraphs from Deuteronomy; chs. 27 and 28 are, however, read in full. Is there some connexion here between the ceremony described in Joshua and the Samaritan pilgrimages? Do the Samaritan pilgrimages seek to commemorate the covenant made at Shechem and at the same time fulfil the command to appear thrice yearly before the Lord? Certainly the practice is important as a survival of an ancient Hebrew pilgrimage. After reaching the first of the many holy places on the mountain, visits are made to the various altars. It matters not that they be called the altars of Adam, Seth, Noah, Isaac, etc.; the memory of the altars and the numerous *maṣṣēbhôth* testifies to the multiplication of altars and *maṣṣēbhôth* condemned by Hosea.

Other ruins of less interest are to be seen on the mountain top, such as the remains of a castle and a Byzantine Church. The summit of the mountain commands a view embracing nearly the whole of Palestine. Contrary to the statement of Josephus, it is not the highest of the mountains of Samaria, Ebal and *Jebel 'Aṣûr* being rather higher. R. A. S. M.—J. Bo.

GERON should possibly appear as a proper name in 2 Mac 6[1] (AV and RV 'an old man of Athens'; RVm 'Geron an Athenian; RSV 'an Athenian senator').

GERRHENIANS (2 Mac 13[24] AV).—The true reading and the people intended are both uncertain. The analogy of 1 Mac 11[59] suggests some place near the border of Egypt; but *Gerrha*, between Pelusium and Rhinocolura, was in Egyptian territory. It has been suggested that the reference is to **Gerar** (so RSV), an ancient Philistine city SE. of Gaza. On the other hand, Syriac reads *Gazar, i.e.* Gezer or Gazara, not far from Lydda (cf 1 Mac 15[28, 35]). RV has **Gerrenians.**

GERSHOM.—1. The elder of the two sons borne to Moses by Zipporah (Ex 2[22] 18[2-6]; the explanation of the name given in these two passages is folk-etymology). According to Ex 4[25f], the origin of circumcision among the Israelites was connected with that of Gershom; the rite was performed by his mother; this was contrary to later usage, according to which this was always done by a man. The son of Gershom, **Jonathan,** and his descendants were priests to the tribe of the Danites; but the fact that these latter set up for themselves a graven image, and that therefore the descendants of Gershom were connected with worship of this kind, was regarded as a grave evil by later generations, for which reason the word 'Moses' in Jg 18[30] (so RV, RSV) was read 'Manasseh' (so AV) by the insertion of an *n* above the text; it was thought derogatory to the memory of Moses that descendants of his should have been guilty of the worship of graven images. In Jg 17[7] there is a possible reference to Gershom, for the words 'and he sojourned there' can also be read 'and he (was) Gershom' (W. H. Bennett). In 1 Ch 23[16] 26[20] the sons of Gershom are mentioned, Shebuel (in 24[24]

Shubael) being their chief. **2.** A son of Levi, 1 Ch 6[16]; see GERSHON. **3.** A descendant of Phinehas, one of the 'heads of houses' who went up with Ezra from Babylon in the reign of Artaxerxes, Ezr 8[2], 1 Es 8[29] (AV, RV **Gerson**). W. O. E. O.

GERSHON, GERSHONITES.—The name Gershon is given to the eldest son of Levi, to whom a division of the Levites traced their descent (Gn 46[11], Ex 6[16], Nu 3[17], 1 Ch 6[1, 16] **[Gershom]** 23[6]). The title 'Gershonites' is found in Nu 3[21, 23f] 4[24, 27f] 26[57], Jos 21[33], 1 Ch 23[7] 26[21], 2 Ch 29[12]; and of an individual, 1 Ch 26[21] 29[8]; the 'sons of Gershon' (Ex 6[17], Nu 3[18, 25] 4[22, 38, 41] 7[7] 10[17], Jos 21[6, 27]), or 'of Gershom' (1 Ch 6[17, 62, 71] 15[7]). They were subdivided into two groups, the **Libnites** and the **Shimeites** (Nu 3[21] 26[58]), each being traced to a 'son' of Gershon (Ex 6[17], Nu 3[18], 1 Ch 6[17, 20] [42, Shimei is omitted from the genealogy]). 'Ladan' stands for Libni in 1 Ch 23[7ff] 26[21]. From these families fragments of genealogies remain (see 1 Ch 23[8–11]). Comparatively little is related of the Gershonites after the Exile. Certain of them are mentioned in 1 Ch 9[15] and Neh 11[17a, 22] as dwelling in Jerusalem immediately after the Return. Of the 'sons of Asaph' (Gershonites), 128 (Ezr 2[41]) or 148 (Neh 7[44]) returned with Zerubbabel after the exile. Asaphites led the music at the foundation of the Temple (Ezr 3[10]); and certain of them blew trumpets in the procession at the dedication of the city walls (Neh 12[35]).

P and the Chronicler introduce the family into the earlier history. (1) During the desert wanderings the Gershonites were on the west side of the Tent (Nu 3[23]); their duty was to carry all the hangings which composed the Tent proper, and the outer coverings and the hangings of the court, with their cords (3[25f] 4[24ff] 10[17]), for which they were given two wagons and four oxen (7[7]); and they were superintended by Ithamar, the youngest son of Aaron (4[33] 7[8]). (2) After the settlement in Palestine, thirteen cities were assigned to them (Jos 21[6, 27–33] = 1 Ch 6[62, 71–76]). (3) In David's reign the Chronicler relates that the Temple music was managed partly by Asaph, a Gershonite, and his family (1 Ch 6[39–43] 25[1f, 6, 9a, 10, 12, 14]; and see 15[7, 17–19]). David divided the Levites into courses 'according to the sons of Levi' (23[6]; Gershonites, vv.[7–11]); and particular offices of Gershonites are stated in 26[21f]. (4) Jahaziel, an Asaphite, prophesied to Jehoshaphat before the battle of En-gedi (2 Ch 20[14–17]). (5) They took part in the cleansing of the Temple under Hezekiah (29[12f]). Cf also KOHATH.

A. H. McN.

GERSON, 1 Es 8[29] (AV, RV).—See GERSHOM, 3.

GERUTH-CHIMHAM.—A halting place on Johanan's flight to Egypt (Jer 41[17]), near Bethlehem. The name, '*Khan*' (or perhaps 'cattle pen') of Chimham (AV 'habitation of Chimham'), probably derived its name from **Chimham** (q.v.).

GESHAM, 1 Ch 2[47] (AV).—See GESHAN.

GESHAN.—A descendant of Caleb, 1 Ch 2[47]. Modern editions of AV have **Gesham,** although the correct form of the name appears in edition of 1611.

GESHEM.—An Arabian who is named, along with Sanballat the Horonite and Tobiah the Ammonite, as an opponent of Nehemiah during the rebuilding of the walls of Jerusalem (Neh 2[19] 6[1f]). In Neh 6[6] Hebrew has **Gashmu** (so AV, RV; RSV 'Geshem'). He may have belonged to an Arab community which, as we learn from the monuments, was settled by Sargon in Samaria, *c* 715 B.C.—this would explain his close connexion with the Samaritans; or he may have been the chief of an Arab tribe dwelling in the S. of Judah, in which case his presence would point to a coalition of all the neighbouring peoples against Jerusalem.

GESHUR, GESHURITES.—1. A small Aramaean tribe, whose territory, together with that of Maacah (q.v.), formed the W. border of Bashan (Dt 3[14], Jos 12[5] 13[11]). The Geshurites were not expelled by the half-tribe of Manasseh, to whom their land had been allotted (Jos 13[13]), and were still ruled by an independent king in the reign of David, who married the daughter of Talmai, king of Geshur (2 S 3[3]). After the murder of his half-brother Amnon, Absalom took refuge with his maternal grandfather in 'Geshur of Aram' (2 S 13[37] 15[8]). Geshur and Maacah were probably situated in the modern *Jōlân*, if they are not to be identified with it. In 1 Ch 2[23] Geshur and Aram are said to have taken the villages of Jair from the Israelites. **2.** A people living in the neighbourhood of the Philistines, Jos 13[2], 1 S 27[8].

GESTURES.—The Oriental is a natural expert in appropriate and expressive gesture. To his impulsive and emotional temperament, attitude and action form a more apt vehicle for thought and feeling than even speech. Movement of feature, shrug of shoulder, turn of hand, express much, and suggest delicate shades of meaning which cannot be put in words. Conversation is accompanied by a sort of running commentary of gestures. Easterns conduct argument and altercation at the pitch of their voices: emphasis is supplied almost wholly by gestures. These are often so violent that an unskilled witness might naturally expect to see bloodshed follow.

The word does not occur in Scripture, but the thing, in various forms, is constantly appearing. *Bowing the head or body* marks reverence, homage, or worship (Gn 18[2], Ex 20[5], 1 Ch 21[21], Ps 95[6], Is 60[14]). The same is true of *kneeling* (1 K 19[18], 2 K 1[13], Ps 95[6], Mk 1[40]). Kneeling was a common attitude in prayer (1 K 8[54], Ezr 9[5], Dn 6[10], Lk 22[41], Eph 3[14] etc.). *Prostration* (Gr. *proskynēsis*), was the gesture of homage paid to divine beings, or to kings. It consisted of bowing down with forehead to the ground, and is depicted on many ancient monuments. For a description of the gesture in the OT cf Is 49[7]. This was the gesture which the devil sought from Jesus in the Temptation (Mt 4[9]||). The *glance of the eye* may mean appeal, as the upward look in prayer (Job 22[26], Mk 6[41] etc.), anger (Mk 3[5]), or reproach (Lk 22[61]). A *shake of the head* may express scorn or derision (2 K 19[21], Ps 109[25], Mk 15[29] etc.). A *grimace of the lip* is a sign of contempt (Ps 22[7]). *Shaking the dust off the feet,* or *shaking,* however gently, *one's raiment,* indicates complete severance (Mt 10[14] etc.), denial of responsibility (Ac 18[16]), and often now, total ignorance of any matter referred to. *Rending the garments* betokens consternation, real (Gn 37[29], Jos 7[6], Ac 14[14] etc.) or assumed (2 Ch 23[13], Mt 26[65]), and grief (Jg 11[35], 2 S 1[11] etc.). Joy was expressed by *dancing* (Ex 15[20], 1 S 30[16], Jer 31[4] etc.), and *clapping the hands* (Ps 47[1], Is 55[12] etc.). *Spitting upon, or in the face,* indicated deep despite (Nu 12[14], Is 50[6], Mt 26[67] etc.). See HAND, MOURNING CUSTOMS, SALUTATION.

Some gestures in common use are probably ancient. One who narrowly escapes danger, describing his experience, will crack his thumb nail off the edge of his front teeth, suggesting Job's 'with the skin of my teeth' (19[20]). One charged with a fault will put his elbows to his sides, turn his palms outward, and shrug his shoulders, with a slight side inclination of the head, repudiating responsibility for an act which, in his judgment,was plainly inevitable. W. E.—S. H. He.

GETHER.—Named in Gn 10[23], along with Uz, Hul, and Mash, as one of the 'sons of Aram' (in 1 Ch 1[17] simply 'sons of Shem'). The clan of which he is the eponymous founder has not been identified.

GETHSEMANE.—A place to which Jesus retired with His disciples (Mt 26[36], Mk 14[32]), and where Judas betrayed Him. The name, usually taken to mean 'press of oils,' is uncertain. Jerome gives it as *Gesamani* and connects it with the phrase 'fat valley' of Is 28[1] (*gê' shemānîm*). There are two traditional sites, side by side, one under the Greeks, the other under the Latins. It may be admitted that they are somewhere near the proper site, on the W. slope of the Mount of Olives above the Kidron; but there is no justification for the exact localization of the site. The oldest tradition held the garden to lie on the ground now occupied by the tomb of the Virgin. R. A. S. M.—E. G. K.

GEUEL.—The Gadite spy, Nu 13[15].

GEZER.—An ancient city of the Shephelah, on the border of the Philistine plain (modern *Tell Jezer*). The site was excavated by R. A. S. Macalister for the Palestine Exploration Fund between 1902 and 1909. It was populated in Chalcolithic times (4th millennium B.C.) by inhabitants of Semito-Hamitic stock, and became a Canaanite city in the Bronze Age. To the Canaanite period belongs the famous 'high place,' excavated by Macalister—more precisely, an alignment of stone menhirs set up as a funerary shrine towards the end of the Early Bronze Age (21st cent. B.C.) and still used as such in the Late Bronze period (16th–13th cents. B.C.). Gezer was conquered and fortified by Thothmes III. of Egypt (*c* 1470 B.C.) but had regained its independence by the Amarna Age, a century later.

The Canaanite city covered some 22 acres. It was not taken by the Israelites in the early days of their settlement (Jos 16[10], Jg 1[29]). In David's time it was apparently held by the Philistines (1 Ch 20[4]). It was captured by an Egyptian king of the 21st Dynasty (*c* 970 B.C.) and given by him as a dowry to his daughter, Solomon's queen; Solomon thereupon rebuilt it as one of his fortified cities (1 K 9[15ff]). Traces of this rebuilding have been found in the form of characteristic Solomonic masonry. But there is an almost complete gap in the history of its occupation between the end of the Solomonic period (when it fell to Shishak's invading army) and the 5th cent. B.C.

In Hellenistic times it was refounded as a Greek city (**Gazara**; AV has **Gaza**), which was captured by Simon Maccabaeus in 142 B.C. Simon built himself a palace there (1 Mac 13[43ff]), the remains of which were uncovered during the excavation of Gezer. One of the stones had a line of Greek verse scratched on it (presumably by a prisoner-of-war employed on the construction): 'May fire burn up Simon's palace!'

Inscriptions have been found at Gezer from a much earlier date—early Semitic alphabetic inscriptions of date 1800–1500 B.C., comparable to those discovered at Lachish and Shechem, cuneiform tablets from the 15th and 14th cents. B.C., and the 'Gezer Calendar,' a rhythmical Hebrew summary of the successive operations of the agricultural year, copied on a piece of limestone as a schoolboy's exercise about the time of Solomon.

R. A. S. M.—F. F. B.

GHOST.—A ghost=German *Geist* (the *h* has crept into the word through what Earle calls an Italian affectation of spelling) is a spirit. The word is also used in Old English of the breath, the soul or spirit of a living person, and even a dead body. In AV it occurs only in the phrase 'give up *or* yield up the ghost' and in the name 'the Holy Ghost.' Wherever in AV *hagion* 'holy' occurs with *pneuma* 'spirit,' the translation is 'Holy Ghost'; but when *pneuma* occurs alone, it is always rendered 'Spirit' or 'spirit,' according as it is supposed to refer to God or to man. RSV has 'ghost' in Is 29[4] ('like the voice of a ghost'), Mt 14[26], Mk 6[49] (*phantasma*). See HOLY SPIRIT and SPIRIT.

GIAH.—Named in the account of Joab's pursuit of Abner (2 S 2[24]). Its situation is quite unknown; the text is perhaps corrupt.

GIANT.—I. IN THE OT.—**1.** As translation of Hebrew *n*ᵉ*phîlîm*, 'fallen ones,' with no explicit reference to gigantic stature (Gn 6[4]). The context suggests that they were among the antediluvians destroyed by the Flood, and reflects the common tradition of vanished giant races. In Nu 13[33] the name is applied to Anakim with clear reference to giant height.

2. As translation of Hebrew *r*ᵉ*phā'îm*. This word, frequently left untranslated in EV, is used of several probably different aboriginal peoples of Palestine, probably thought of as giants. The **Rephaim** included the **Anakim** of the coastal plain and the hill-country of Judah about Hebron (Dt 2[11]); the **Emim**, 'Terrors,' the aborigines of Moab (Dt 2[10]); the **Zamzummim**, 'Howlers,' the aborigines of Ammon (Dt 2[20]), who are probably identical with the **Zuzim** of Gn 14[5], which may be a scribal error; and the ancient inhabitants of Bashan (Dt 3[11]). The statement that **Og**, whose gigantic bedstead (perhaps a sarcophagus; see S. R. Driver, *ad loc.*) was still to be seen at Rabbah, was one of the Rephaim appears to be confirmed by Gn 14[5], where the Rephaim are the first of the peoples smitten by the four kings on their journey south, these being followed by the Zuzim and Emim. Besides these references there is a reminiscence of the Rephaim in the plain of that name near Jerusalem (Jos 15[8f]) and apparently also in Ephraim (Jos 17[15]). This evidence suggests that the *r*ᵉ*phā'îm* denoted the aboriginal inhabitants of Palestine, though their association with the 'Terrors' and 'Howlers' suggests folklore rather than sober ethnology.

3. As translation of the singular word *rāphāh* or *rāphā'*. In 2 S 21[15–22], part of which recurs in 1 Ch 20[4–8], four mighty Philistines, including Goliath of Gath, are called 'sons of the giant,' though the word here is possibly the singular used collectively. Goliath is not explicitly termed a giant in the well-known story of his encounter with David in 1 S 17, though his height of 6 cubits and a span (between 7½ and 9½ feet) and the enormous weight of his weapons and armour, even allowing for the exaggeration of saga, certainly suggests more than common stature.

The tradition of giants in the Philistine country may originate from the fact that the Philistines may have been a taller race than the Israelites, as is suggested by Egyptian sculptures from the time of Rameses III., while belief in a giant race in Transjordan was probably suggested by the massive dolmens of Chalcolithic burial, which are a feature of that region. The Râs Shamra texts have been cited as evidence for the historicity of the Rephaim. These, however, are members of a guild associated with the king in certain fertility-rites; hence the translation 'Dispensers of Fertility.' In later Phoenician inscriptions the Rephaim are the shades of the dead, the only feasible philological interpretation of which is 'those joined together' (*i.e.* in the common lot of death).

4. As translation of Hebrew *gibbôr*, 'mighty man,' as in Job 16[14]; cf Ps 19[5] (cf Prayer Book version). This is not an accurate translation of the term.

II. IN THE APOCRYPHA.—We find here some interesting allusions: (1) to the supposed destruction of the *N*ᵉ*phîlîm* by the Flood (Wis 14[6], Sir 16[7], Bar 3[26–28]; see also Jth 16[7] 'tall giants' (= the sons of the Titans?); (2) to the slaughter of the 'giant' by David (Sir 47[4]). See also TITANS.

F. H. W.—J. Gr.

GIBBAR.—A family which returned with Zerubbabel, Ezr 2[20]; called **Gibeon**, Neh 7[25].

GIBBETHON ('mound').—A town belonging to the tribe of Dan, and a Levitical city (Jos 19[44] 21[23]). Nadab, king of Israel, was besieging it when he was slain by Baasha (1 K 15[27]); and Omri was similarly engaged when he was made king by the army (1 K 16[15ff]). It is probably modern *Tell el-Melât*.

GIBEA.—A grandson of Caleb, 1 Ch 2[49]. The list of the descendants of Judah through Caleb given in 1 Ch 2[42ff] is geographical rather than genealogical, and comprises all the towns lying in the *Negeb* of Judah to the S. of Hebron. *Gibea* is probably only a variation in spelling of the more common *Gibeah*. See GIBEAH, **1.**

GIBEAH.—**1.** This is one of three Hebrew variants, Gibeʿah, Gebaʿ, and Gibeʿon, all meaning 'a hill,' the last being a diminutive. Owing to the proximity of Gibeʿah, Gebaʿ, and Gibeʿon, all in Benjamin within a radius of two miles, there is apt to be confusion, which is especially noteworthy in the account of Saul's campaign about Michmash (1 S 13). The confusion of the text may be sorted out by local knowledge. Though so close together, Gibeah and Geba lay on different sides of the watershed. If the action at Michmash was visible, then the site was Geba. Gibeon was a famous sanctuary, hence Gibeah ('the Hill') of God (1 S 10[5] RVm; RSV Gibeath-elohim). Gibeah, on the other

hand, is usually defined as Gibeah of Benjamin or Gibeah of Saul (1 S 11[4], Is 10[29]), whose home it was (1 S 10[26]). It is also noted as the scene of the outrage on the Levite's concubine and the collective vengeance of Israel upon the tribe of Benjamin (Jg 19[12]). It had a Philistine garrison, against which Saul rose (1 S 13[3], after LXX and Targ.). It appears in Isaiah's description of the Assyrian advance on Jerusalem (10[28–32]). The location of Gibeah indicated in Jg 20[31–33] and Josephus, who places it 30 stadia N. of Jerusalem (*BJ* v. ii. 1 [51]), suggests the site *Tell el-Fûl*. Albright's excavations here have demonstrated settlement in the Early Iron Age *c* 1200 and destruction *c* 1150, possibly a trace of the civil war (Jg 19[12ff]). It was rebuilt about a century later, with a considerable fortress with casemate walling. This is often represented as the palace of Saul, but it may have originally been the post of the Philistine garrison. There is little doubt, however, that it was used by Saul and possibly served as quarters for his professional soldiers, including David. Under the House of David Gibeah declined in importance, its fortress being reduced to the proportions of a watchtower, which was finally destroyed at the fall of Jerusalem. It continued as an insignificant village, and is mentioned as such by Josephus (*loc. cit.*). **2.** A village in Judah near Hebron (Jos 15[57]), probably modern *el-Jib'ah*, *c* 10 miles NNW. of Hebron. **3.** The 'hill,' where the Ark remained in the house of Amminadab (1 S 7[1], 2 S 6[3]) in the vicinity of Kiriath-jearim, is possibly to be regarded as another Gibeah, which the numerical list in Jos 18[28] requires in association with Kiriath-jearim. This is possibly to be located at *Khirbet el-Jab'ah*, about 2 miles SW. of *Qiryat el-'Inab* (Kiriath-jearim). W. E.—**J. Gr.**

GIBEATH (Heb. *gibh'ath*, construct state of *gibh'āh*), 'hill of,' enters into the composition of place names and is occasionally retained untranslated by AVm, RVm, and RSV. Such instances are: (*a*) 'hill of the foreskins,' where the Israelites were circumcised, Jos 5[3] (RSV **Gibeath-haaraloth**). (*b*) *Gibeath-Phinehas*, in Mount Ephraim, where Eleazar was buried, Jos 24[33]; site unknown. (*c*) *Gibeath ham-Moreh*, Jg 7[1] etc.; see MOREH, **2.** (*d*) 'the hill of God,' 1 S 10[5] (RSV **Gibeath-elohim**=Gibeah, **2**). (*e*) *Gibeath ha-Hachilah*, 1 S 23[19] etc.; see HACHILAH. (*f*) *Gibeath Ammah*, 2 S 2[24]; see AMMAH. (*g*) *Gibeath Gareb*, Jer 31[39]; see GAREB, **2.**
W. E.

GIBEATH-ELOHIM.—See GIBEAH, **2.**

GIBEATH-HAARALOTH.—See GIBEATH (*a*).

GIBEON.—A prominent city of Benjamin N. of Jerusalem. The men of Gibeon, fearing an attack by Joshua, obtained through a ruse a covenant of peace with the Israelites (Jos 9). When the deception was discovered the Gibeonites were cursed and assigned a place of perpetual servitude. Gibeon is mentioned with Chephirah, Beeroth, and Kiriath-jearim (Jos 9[17]) and its people are called Hivites in Jos 9[7] and 11[19]. The 'pool of Gibeon' is the scene of the contest between the forces of David under Joab and those of Saul's son Ishbosheth led by Abner (2 S 2[12–18]). Twelve men from each side transfixed their opponents with swords at Hilkath-hazzurim, 'the field of sword-edges.' Amasa was slaughtered by Joab at 'the great stone which is in Gibeon' (2 S 20[8–10]). Seven sons of Saul were hanged by the Gibeonites (2 S 21[1–9]). Solomon offered sacrifices at the great high place of Gibeon (1 K 3[4]) and it was the place where he had his famous dream (1 K 3[5–15]). The false prophet Hananiah, who opposed Jeremiah, was from Gibeon (Jer 28[1]). Jer 41[12] mentions the 'great pool which is in Gibeon' in connexion with the flight of the remnant from Jerusalem after the attack and destruction by Nebuchadnezzar in 586 B.C. The men of Gibeon were among those who helped rebuild the wall of Jerusalem in the 5th cent. (Neh 3[7]). The city is mentioned in a list of King Shishak (Sheshonk I.) of the 10th cent. According to Josephus, Cestius pitched his camp there in A.D. 66.

Although Gibeon has long been identified with *el-Jîb*, 6 miles N. of Jerusalem, the American excavations at the site in 1956 and 1957 have produced twenty-four jar handles inscribed with the name 'Gibeon' in the archaic Hebrew script of the 7th cent. The inscriptions on handles also contained the names Amariah, Azariah, Hananiah, Nera, Domla, and Shubel, apparently citizens of the town. A cylindrical pool or stair well cut from solid rock, 37 feet in diameter and equipped with a circular stairway of seventy-nine steps which led down to a spring 82 feet below the surface was a part of the extensive water system of the city. A second access to water was had through a stepped tunnel which extended for 167 feet from inside the wall to the spring which flowed from the base of the mound below. There are ninety-three steps cut into the rock floor of this passageway. These installations substantiate the reputation which Gibeon had in the Biblical passages for its water (2 S 2[13], Jer 41[12]). J. B. P.

GIBEON.—A family which returned with Zerubbabel, Neh 7[25]; called **Gibbar,** Ezr 2[20].

GIDDALTI ('I magnify [God]').—A son of Heman, 1 Ch 25[4, 29].

GIDDEL ('very great').—**1.** The eponym of a family of Nethinim, Ezr 2[47], Neh 7[49]; called in 1 Es 5[30] **Cathua.** **2.** The eponym of a family of 'Solomon's servants,' Ezr 2[56], Neh 7[58], 1 Es 5[33] (AV, RV **Isdael**).

GIDEON.—A judge from the tribe of Manasseh, son of Joash the Abiezrite (Jg 6[1]–8[35]). The narrative is obviously composite, *e.g.* there are two accounts of his call to leadership (6[7–24] and vv.[25–32]), and note also the story of 7[24]–8[3] which interrupts the narrative.

The general outline of the history of Gideon, disregarding details, is as follows:

(*a*) *Introduction.* In accord with the general theme of the book of Judges the people had apostatized with the inevitable result that the land was subjected to the plundering raids of neighbouring tribes, in this case the Midianites and Amalekites. After a number of years the people realizing their apostasy called upon Yahweh their God who heard their cry and sent a prophet to rebuke them.

(*b*) *Gideon's call.* In the first version the Angel of Yahweh (see ANGEL OF THE LORD) appears to Gideon while he is surreptitiously engaged in threshing wheat, and bids him assume the charismatic role of deliverer of the people from the Midianites. He is given a Divine sign assuring him of the angel's identity and good intention, whereupon Gideon builds an altar.

In the second version Yahweh commanded Gideon to tear down the Baal altar in the city along with the Asherah (q.v.) beside it, build a legitimate altar to Yahweh in its place, and offer a holocaust. When the townsmen became aware of what had happened on the following morning, they were infuriated and wanted to kill Gideon. His father cleverly intervened by saying: *Jerubbaal, i.e.* 'Let Baal contend (for himself).' This word became another name by which Gideon was known (*e.g.* 7[1]), which a later editor changed for religious reasons to Jerubbesheth in 2 S 11[21] ('Let the shameful one contend').

(*c*) *Gideon's victory.* Baal having been deposed and Yahweh again recognized as the people's God, Gideon now becomes the charismatic hero, *i.e.* 'the Spirit of Yahweh took possession' of him. A volunteer army of Northern tribesmen is assembled and Gideon is again assured of Divine help by the sign of the miraculous dew on the fleece. At God's command Gideon's army is twice reduced from an original 32,0000 to a mere 300. Once more Gideon receives assurance of victory through an overheard account of a Midianite soldier's dream.

For the actual onslaught each man was given an empty jar containing a flaming torch as well as a trumpet. In the dead of night they surrounded the camp of the Midianites and at a prearranged signal broke the jars, waved the torches, blew on the trumpets, and with a war cry fell on the sleeping camp. This threw the camp into complete panic and immediate flight. The pursuit, described in some detail, became a complete rout, with

the princes and army commanders captured and killed. Of the original army all but 15,000 (out of 135,000) were killed according to the tradition at 8^{10}.

(*d*) *Gideon's refusal of kingship and his defection.* After the miraculous victory the men of Israel spontaneously requested Gideon to accept rule as king over Israel. Gideon refused the offer, asking instead for a leader's percentage of the spoils. With these he fashioned an ephod for his city which 'became a snare to Gideon and his family' (8^{27}). According to v.^{33}, however, Israel's defection began after Gideon's death, which apparent discrepancy may well indicate two different literary sources.

The section 7^{24}–8^{3} is undoubtedly ancient; it tells of how the Ephraimites, at Gideon's command, cut off part of the fugitive Midianite host under two chieftains, Oreb and Zeeb, whom the Ephraimites slew. When the victorious band with Gideon join with them, they complain to Gideon of his failure to invite them to take part in the large-scale attack. Gideon satisfies them by shrewd flattery. This section appears to be a fragment of a source which presumably went on to detail what further action the Ephraimites took during the campaign.

W. O. E. O.—J. W. W.

GIDEONI.—Father of Abidan, prince of Benjamin, Nu 1^{11} 2^{22} $7^{60, 65}$ 10^{24}.

GIDOM.—The limit of the pursuit of Benjamin by the other tribes, Jg 20^{45}. Possibly the word is not a proper name, but may be read as an infinitive, 'till they cut them off.' No place of the name of Gidom is mentioned elsewhere.

GIER EAGLE.—Two Hebrew words in the lists of unclean birds (Lv $11^{13, 18}$, Dt $14^{12, 17}$) are translated 'gier-eagle' (cf German *Geier*, 'vulture,' suggesting 'vulture-eagle'); but the English name suggests nothing definite. These are the *peres* (RV; but 'ossifrage' in AV, 'ossifrage' and 'vulture' in RSV) and the *rāḥām* or *rāḥāmāh* (AV; but 'vulture' in RV, 'vulture' and 'carrion vulture' in RSV). I. As *pāras* 'broke (bones or bread) in pieces' shows, the *peres* is the 'smasher' and its position in the lists suggests a vulture, possibly 'Arrian's vulture,' which drops its victims from a great height on to a rock or stone, repeating the procedure until all the bones are shattered, when it consumes it. The Targum translates the word *'azyâ* or *'uzyâ*, 'goat-like (bird),' apparently alluding to the colouring of its back, which is predominately black. II. The name of the *rāḥām*(*āh*) comes from a root describing what is black and white, as the Arabic *'arḥamu* 'having a white head and black body' and *raḥamu* 'vulture with a white neck and body but black wings, white carrion vulture; sea-eagle; pelican' show. The position of the *rāḥām*(*āh*) in the list shows that no vulture can be meant; the sea-eagle rarely visits Palestine, and the pelican is not likely to have been considered unclean (see PELICAN). Possibly the 'osprey' is meant. This is a large brown bird having head and nape white with brown streaks and white underparts, and found in Palestine; and its habits suggest an affinity on the one hand with the raptorial owls and on the other hand with the stork or heron and cormorant, which are fishers.

G. R. D.

GIFT, GIVING.—I. In the OT.—1. In the East what is described as a 'gift' is often hardly worthy of the name. 'Gift' may be a courtesy title for much that is of the nature of barter or exchange, tribute or compulsory homage, or even of bribery. It is well understood that a gift accepted lays the recipient under the obligation of returning a *quid pro quo* in some form or other. The queen of Sheba's gifts to Solomon were a sort of royal commerce. The charming picture of Ephron's generosity to Abraham with regard to the cave of Machpelah (Gn 23) must be interpreted in the light of Oriental custom; it is a mere piece of politeness, not intended to be accepted. An Arab will give anything to an intending buyer, and appeal to witnesses that he does so, but it is understood to be only a form, to help him to raise the price (see Driver, *Genesis, ad loc.*). Cf the transaction between David and Araunah (2 S 24^{22}). In other cases the return is of a less material character, consisting of the granting of a request or the restoring of favour. Hence Jacob's anxiety as to Esau's acceptance of his gifts (Gn 32^{20} 33^{10}); cf the present to Joseph (43^{11}) and 1 S 25^{27} 30^{26}. The principle is stated in Pr 18^{16} 'A man's gift maketh room for him, and bringeth him before great men' (cf 19^{6}). It is obvious that a gift in this sense easily becomes a bribe; hence the frequent commands to receive no bribe, 'for a bribe blinds the officials' (Ex 23^{8}, Dt 16^{19} 27^{25}, Pr $17^{8, 23}$, Ps 15^{5}, Is 1^{23} 5^{23} etc.). It should be noticed that in this connexion a special Hebrew word (*shōḥadh*) is used, meaning a 'bribe'; AV and RV often translate 'gift' or 'reward'; RSV normally 'bribe.' In 1 K 15^{19}, 2 K 16^{8} it is used of a bribe from king to king. Even the Roman Felix expects a gift (Ac 24^{26}).

2. In a more legitimate sense we find gifts offered to kings, etc., by way of homage (1 S 10^{27}, Ps 45^{12}), or tribute (Jg 3^{15}, 2 S $8^{2, 6}$, 1 K 4^{21}, Ps 72^{10}); the presents to Assyria, etc., are clearly not spontaneous, and the receiving of such homage from subject kings is a favourite subject of sculptures and paintings. 1 S 25 illustrates the ground on which such a gift was sometimes claimed; it was a payment for protection. Gifts were expected in consulting a prophet or oracle (Nu 22, 1 S 97, 2 K 5^{5}, 2 K 8^{9}, Dn 5^{17}). Whether regulated or unregulated, they formed the chief support of priests and Levites, and were the necessary accompaniment of worship. 'None shall appear before me empty-handed' (Ex 23^{15} 34^{20}). One side of sacrifice is giving to God. The spiritual religion realized that Y″'s favour did not depend on those things (Is 1, Ps 50), still more that He was not to be bribed. In Dt 10^{17} it is said that He is One who 'takes no bribe.' But there can be no doubt that in the popular view a gift to God was supposed to operate in precisely the same manner as a gift to a judge or earthly monarch (Mal 1^{8}). Its acceptance was the sign of favour and of the granting of the request (Jg 13^{23}, 2 Ch 7^{1}); its rejection, of disfavour (Gn 4^{4}, Mal 1^{10}). 1 S 26^{19} shows that a gift was regarded as propitiatory, and the machinery of the vow takes the same point of view. It should be noted that the word *minḥāh*, which is continually used of gifts and homage to men, is also specially used of offerings to God, and in P technically of the 'meal-offering.' For the meaning of 'gift' or Corban in Mk 7^{11} etc., see article SACRIFICE AND OFFERING. Almsgiving became one of the three things by which merit was earned before God, the other two being prayer and fasting; and magnificent gifts to the Temple were a means of personal display (Lk 21^{5}, Jos. *Ant.* xv. xi. 3 [402]).

3. Passing from cases where the gift is neither spontaneous nor disinterested, but is only a polite Oriental periphrasis for other things, we turn to instances where the word is used in a truer sense. If the king looked for 'gifts' from his subjects, he was also expected to return them in the shape of largess, especially on festive occasions (Est 2^{18}). This often took the form of an allowance from the royal table (Gn 43^{34}, 2 S 11^{8}, Jer 40^{5}). We read more generally of gifts to the needy in Neh 8^{10}, Est 9^{22}, Ec 11^{2}, Ps 112^{9} (see ALMSGIVING). The gift of a robe, or other article from the person, was of special significance (1 S 18^{4}). Interchanges of gifts between equals are mentioned in Est 9^{19}, Rev 11^{10}. On the occasion of a wedding, presents are sent by friends to the bridegroom's house. Gifts, as distinct from the 'dowry,' were sometimes given by the bridegroom to the bride (Gn 24^{53} 34^{12}); sometimes by the bride's father (Jg 1^{14}, 1 K 9^{16}).

II. In the NT.—It is characteristic of the NT that many of its usages of the word 'gift' are connected with God's gifts to men—His Son, life, the Holy Spirit, etc. 'Grace' is the free gift of God. 'Gifts' is specially used of the manifestations of the Spirit (see SPIRITUAL GIFTS). Eph 4^{8} illustrates well the change of attitude. St. Paul quotes from Ps 68^{19}, where the point is the homage which Y″ receives from vanquished foes, and applies the words to the gifts which the victorious Christ

has won for His Church. It is more Divine, more characteristic of God, to give than to receive. This is, in fact, the teaching of the NT on the subject. As the Father and His Son freely give all things, so must the Christian. Almsgiving is restored to its proper place; the true gift is not given to win merit from God, or to gain the praise of men, but proceeds from love, hoping for nothing again (Mt 6[1], Lk 6[32]; see ALMSGIVING). Our Lord Himself accepted gifts, and taught that it is our highest privilege to give to Him and His 'little ones' (Lk 5[29] 7[37] 8[3], Jn 12[2]). And giving remains an integral part of Christian worship, as a willing homage to God, the wrong ideas of compulsion or persuasion being cast aside (1 Ch 29[14], Mt 2[11] 5[23], 2 Co 9[7ff], Rev 21[24]). The gifts to St. Paul from his converts (Ph 4[16]), and from the Gentile Churches to Jerusalem (Ac 11[29], Ro 15[26], 1 Co 8, 9), play a very important part in the history of the early Church. C. W. E.

GIHON ('a bursting forth').—**1.** A spring near Jerusalem, evidently sacred and therefore selected as the scene of Solomon's coronation, 1 K 1[33, 38, 45]. Hezekiah made an aqueduct from it, 2 Ch 32[30]; and Manasseh built a wall of the city W. of it, 2 Ch 33[14]. Undoubtedly modern *'Ain Sittī Maryam*, or 'Virgin's Fount.' See SILOAM. **2.** One of the four rivers of Paradise, Gn 2[13]; cf Sir 24[27]. See EDEN [GARDEN OF].

GILALAI.—A Levitical musician, Neh 12[36].

GILBOA.—A range of hills, now called *Jebel Fuqqû'ah*, on the E. boundary of the Plain of Esdraelon, where Saul and Jonathan died, 1 S 28[4] 31[1–8], 1 Ch 10[1, 8]; cf 2 S 1[6, 21] 21[12]. They run from *Zer'în* (Jezreel) due SE., and from the eastern extremity a prolongation runs S. towards the hills of Samaria. They are most imposing from the Vale of Jezreel and Jordan Valley, but nowhere reach a height of more than 1700 feet above sea-level. The little village of *Jelbûn* on the slopes of *Jebel Fuqqû'ah* is thought to retain an echo of the name Gilboa. The slopes of these hills are steep, rugged, and bare. At the N. foot lies *'Ain Jālûd*, almost certainly the spring of Harod (q.v.). E. W. G. M.

GILEAD.—1. A son of Machir, son of Manasseh (Nu 26[29], 1 Ch 2[21]), and grandfather of Zelophehad (Nu 27[1]), and presumably the eponym of **2.** An Israelite tribe or clan (Jg 5[17] 10[3] 12[7]) living S. of the Jabbok E. of the Jordan. **3.** The father of Jephthah (Jg 11[1])—a late tradition and clearly dependent on **1** and **2. 4.** A Gadite, son of Michael (1 Ch 5[14]). **5.** A mountain mentioned in Jg 7[3] (RSVm); this cannot be the trans-Jordanic Gilead and no other is known. The text is undoubtedly corrupt, but no proposed emendation has won general acceptance. **6.** The name first of a small area E. of the Jordan, S. of the Jabbok (cf **2**), which came to be used also of the territory northward to the Yarmuk and southward to the Arnon (cf Jos 22[9ff], Jg 20[1], 2 K 10[33]), bounded on the E. by the desert. It is a lofty plateau, about 2000 feet above sea-level, wooded in places, with productive fields intersected by valleys and streams. Nu 32[1] indicates that it was good pasture land; cf Ca 4[1] 6[5] referring to 'goats moving down the slopes of Gilead.' From Jer 8[22] 46[11] it may be inferred that it was famous for its medicinal balm; cf Gn 37[25] which shows that the Ishmaelite traders to whom Joseph was sold were carrying gum, balm, and myrrh from Gilead to Egypt. It is mentioned first as the place where Jacob in his flight from Laban was overtaken by him and where they raised a heap of stones and a pillar as a witness to the covenant they made each with the other (Gn 31).

According to Nu 21[20ff] the Israelites secured possession of Gilead when they defeated Sihon, king of the Amorites; his territory is defined as reaching from the Arnon to the Jabbok and Nu 32[5ff] says it was divided between the tribes of Reuben and Gad (cf Jos 13[15–28]). Nu 32[39ff] says that Gilead, here the land between the Jabbok and the Yarmuk (cf 2 S 24[6]), was taken from the Amorites by Machir and Jair (cf Jg 10[2] where Jair is a Gileadite), sons of Manasseh; cf the reference to the half-tribe of Manasseh in Nu 32[33] and Jos 13[29–31], which include Bashan in this Manassite territory.

Some of the Hebrews took refuge in Gilead from the Philistines (1 S 13[7]). Gilead was part of the short-lived kingdom of Ish-bosheth (2 S 2[9]). Hither David fled from Absalom (2 S 17[22]), and was succoured by Barzillai the Gileadite (17[27]) whose descendants are referred to in post-exilic records (Ezr 2[61]=Neh 7[63]). Gilead was administered by Ben-geber and Ahinadab (1 K 4[13f]) for Solomon. It was the land of Elijah's origin. For cruelties to Gileadites, Damascus and Ammon are denounced by Amos (1[3, 13]) while on the other hand Hosea (12[11]) refers to the iniquity of Gilead, and (6[8]) to Gilead as 'a city of evil doers, tracked with blood'; but there is no other mention of a city named Gilead so the reference here may be to the capital of the district, or to Ramoth-gilead, or Jabesh-gilead. Pekah's following of fifty Gileadites (2 K 15[25]) possibly suggests some kind of revolutionary activity there and the incident referred to by Hosea may be connected with this. 2 K 15[29] states that the inhabitants of Gilead were 'carried captive to Assyria'; what the actual extent of the deportation was it is impossible to say. 1 Ch 2[21] seems to refer to a migration from Judah to Gilead N. of the Jabbok; this may have occurred at the end of the 8th cent., though it could be later. It was possibly at this time that the Ammonites moved in (cf Jer 49[1]). Jer 50[19], Mi 7[14] imply that Gilead is in foreign hands.

R. A. S. M.—C. A. Si.

GILGAL.—1. A place on the E. border of Jericho (Jos 4[19]), where the Israelites first encamped after crossing the Jordan, and which, according to Jos 14[6], remained the headquarters of the congregation till after the defeat of the northern kings at Merom. The stone circle from which it certainly took its name (cf the impossible etymology in Jos 5[9]) was no doubt that to which the tradition embodied in Jos 4[20] refers, and the same as the 'images' by Gilgal in the story of Ehud (Jg 3[19] RVm; RSV 'sculptured stones'). The twelve stones are significant in view of the rôle of Gilgal as an amphictyonic shrine of the twelve-tribe confederacy of Israel. It was associated with the work of Samuel as a judge (1 S 7[16]), and was the place where the kingship of Saul was formally consecrated (reading 'let us consecrate,' *n^e^ḳaddēsh*, for 'let us renew,' *n^e^ḥaddēsh*) after his succour of Jabesh-Gilead (1 S 11[14]). It was the rallying-point for national resistance in Saul's Philistine wars (1 S 13[4–15]), the scene of Samuel's breach with Saul (1 S 13[8–15]), and of the hewing of the Amalekite king Agag in pieces before the Lord (1 S 15[12f]). It was here that the men of Judah met David returning after Absalom's revolt (2 S 19[5]), possibly to take a new oath of allegiance at the shrine, though that is not explicitly mentioned. The importance of the Gilgal sanctuary must have waned with the passing of the power from Benjamin to the House of David and the increased importance of Jerusalem as the seat of the Ark and a national shrine. It never quite lost its significance, however, and was probably always a centre of pilgrimage, a religious institution in favour among the Semites. It was certainly a place of pilgrimage in the middle of the 8th cent. and ranked with Bethel, the national shrine under royal patronage (Am 4[4] 5[5], Hos 4[15] 9[15] 12[11]). The significance of this shrine as a conservatory of the traditions of the Hebrew occupation has recently been emphasized by A. Alt, M. Noth, G. von Rad, H. J. Kraus, and K. Galling. It is suggested that the sacramental experience of the shrine of Gilgal has coloured the narrative of the conquest in Jos 1–9 and Jg 2[1–5].

Modern tradition has varied regarding the location of Gilgal at *Khirbet en-Nitla* just over 2 miles SE. of old Jericho and, on the other hand, at *Khirbet el-Mefjer*, the site of the winter palace of the Umayyad Caliph Hishām (A.D. 724–743). Excavations by Kelso and Muilenburg at *en-Nitla* show no traces of occupation before the Byzantine period. Excavations by Muilenburg, however, revealed Iron Age remains near *Khirbet el-Mefjer* and the identification would seem to be clinched by Josephus'

location of Gilgal 10 stadia from Jericho and 50 stadia from the Jordan, *i.e.* from the ford of *el-Mukhdâs* (*Ant.* v. i. 4 [20]), directions which rule out *en-Nitla*. Pillars inscribed with the cross in the Umayyad palace at *el-Mefjer* are obviously from a Christian church, clearly associated with Gilgal and probably that noticed by mediaeval pilgrims N. (actually NE.) of Jericho.

2. A place of the same name near Dor mentioned in a list of conquered kings (Jos 12^{23}), possibly *Jiljûlieh* about 4 miles N. of Antipatris (*Râs el-'Ain*). **3.** A place in the hill-country of Ephraim (2 K 4^{38}) somewhere near Bethel (2^{1}), possibly *Jiljîlieh* 8 miles NW. of Bethel. **4.** Gilgal of Dt 11^{30} is not certainly identified. The close connexion with Ebal and Gerizim suggests *Juleijil* 2½ miles SE. of *Nâblus*. **5.** A place on the border of Judah, near Adummim (q.v.), mentioned in Jos 15^{7}; possibly the same as **1.**

The name is generally used in Hebrew with the definite article, which suggests that it is a common noun, 'stone-circle,' a relic of early local religion, hence its common usage as a place-name in Hebrew and Arabic.

R. A. S. M.—J. Gr.

GILGAL, HOUSE OF, Neh 12^{29} (AV).—See BETH-GILGAL.

GILOH.—A city in the southern hills of Judah, Jos 15^{51} (**Gilo** in RSV in 2 S 23^{34}); the birthplace of Ahithophel the **Gilonite,** the famous counsellor of David, 2 S 15^{12} 23^{34}. It is perhaps modern *Kh. Jâlâ*.

GIMEL.—Third letter of Hebrew alphabet, and so used to introduce the third part of Ps 119, every verse of which begins with this letter.

GIMZO.—A town on the border of Philistia, 2 Ch 28^{18}. It is the modern *Jimzû* near Aijalon.

GIN.—See SNARES.

GINATH.—Father of Tibni, who unsuccessfully laid claim against Omri to the throne of Israel, 1 K $16^{21f.}$

GINNETHOI.—A priest among the returned exiles, Neh 12^{4}; called **Ginnethon** in 12^{6} 10^{6}.

GINNETHON.—See GINNETHOI.

GIRDING THE LOINS, GIRDLE.—See DRESS, **2, 3.**

GIRGASHITES (in Hebrew always singular 'the Girgashite,' and so rendered in RV).—Very little is known of this people, whose name, though occurring several times in OT in the list of Canaanite tribes (Gn 10^{16} 15^{21}, Dt 7^{1} [and 20^{17} in Sam. and LXX], Jos 3^{10} 24^{11}, 1 Ch 1^{14}, Neh 9^{8}), affords no indication of their position, or to what branch of the Canaanites they belonged, except in two instances, namely, Gn 10^{16}, where the 'Girgashite' is given as the name of the fifth son of Canaan; and Jos 24^{11}, where the Girgashites would seem to have inhabited the tract on the W. of Jordan, the Israelites having been obliged to cross over that river in order to fight the men of Jericho, among whom were the Girgashites.

GIRZITES.—According to 1 S 27^{8}, David and his men, while living at the court of Achish king of Gath, 'made raids upon the Geshurites, the Girzites (RVm **Gizrites**), and the Amalekites; for these were the inhabitants of the land from of old, as far as Shur, to the land of Egypt.' The LXX (B) is probably correct in reading only one name 'Gizrites' for Geshurites and Girzites, viz. the Canaanite inhabitants of Gezer (q.v.), a town on the SW. border of Ephraim (Jos 10^{33} $16^{3, 10}$, Jg 1^{29}).

GISHPA.—An overseer of the Nethinim, Neh 11^{21}; but the text is probably corrupt.

GITTAIM ('the two wine-presses').—A town to which the Beerothites fled, 2 S 4^{3}; mentioned with Hazor and Ramah, Neh 11^{33}. The site is unknown.

GITTITES.—See GATH.

GITTITH.—See PSALMS (titles).

GIZONITE.—A gentilic name which occurs in 1 Ch 11^{34} in the collocation 'Hashem the Gizonite.' In all probability this should be corrected to 'Jashen (cf the parallel passage 2 S 23^{32}) the Gunite.' See JASHEN and GUNI, **3.**

GIZRITES.—See GIRZITES.

GLASS, LOOKING-GLASS, MIRROR.—This indispensable article of a lady's toilet is first met with in Ex 38^{8}, where the 'laver of bronze' and its base are said to have been made of the 'mirrors (AV 'looking-glasses') of the ministering women who ministered at the door of the tent of meeting' (RSV; cf RV). This passage shows that the mirrors of the Hebrews, like those of the other peoples of antiquity, were made of polished bronze, as is 'molten mirror' (RV and RSV; AV 'looking-glass'). A different Hebrew word is rendered 'hand mirror' by RV (AV 'glasses'; RSV 'garments of gauze') in the list of toilet articles, Is 3^{23}. The fact that this word denotes a writing 'tablet' in 8^{1} (RV and RSV) perhaps indicates that in the former passage we have an oblong mirror in a wooden frame. The usual shape, however, of the Egyptian (see Wilkinson, *Anc. Egyp.* ii, 350 f. with illustration), as of the Greek, hand-mirrors was round or slightly oval. As a rule they were furnished with a tang, which fitted into a handle of wood or metal, often delicately carved. Specimens of circular mirrors of bronze, one 5 inches, the other 4½, in diameter, have been discovered in graves at Gezer (*PEFSt*, 1905, 321; 1907, 199 with illustrations).

In the Apocrypha there is a reference, Sir 12^{11}, to the rust that gathered on these metal mirrors, and in Wis 7^{26} the Divine wisdom is described as 'a spotless mirror of the working of God' the only occurrence in AV of 'mirror,' which RV and RSV substitute for 'glass' throughout. The NT references, finally, are those by Paul (1 Co 13^{12} [AV 'glass'; RV and RSV 'mirror'], 2 Co 3^{18} [AV 'glass'; RV 'mirror'; RSV 'beholding the glory of God,' but RSVm 'reflecting'], Ja 1^{23} [AV 'glass'; RV and RSV 'mirror']). For the 'sea of glass' (AV and RSV; RV 'glassy sea') of Rev 4^{6} 15^{2} see SEA OF GLASS.

A. R. S. K.

GLEANING.—For the humanitarian provisions of the Pentateuchal codes, by which the gleanings of the cornfield, vineyard, and oliveyard were the perquisites of the poor, the fatherless, the widow, and the *gêr* or outlander see Lv 19^{9f} 23^{22} (both H), Dt 24^{19-21}. See AGRICULTURE, **3**; POVERTY.

GLEDE.—See BUZZARD and KITE.

GLORY (in OT).—The principal Hebrew word for glory is *kâbhôdh*, and is derived from the verbal root *kâbhêdh*, 'to be heavy' like the weight of Absalom's hair in 2 S 14^{26}, or the heavy rock in a weary land in Is 32^{2}, or the iniquities of Israel in Is 1^{4} or Ps 38^{4} (Heb. 5): 'for my iniquities . . . weigh like burdens too heavy for me.' It thus acquires other meanings such as *wealth* or *abundance* (Gn 13^{2} of Abraham, 31^{1} of Jacob), of *esteem, dignity, prestige,* and *honour* (Is 5^{13}, Nu 24^{11}), which is frequently applied to God (Is 42^{8} 43^{7} 48^{11}), and *splendour* (Gn 45^{13}, Hag 2^{9}). Its associations are frequently with light and radiance and fire (Ex 24^{16}, Ezk 1^{28}), and it is the term *par excellence* for the Divine self-manifestation. It is therefore frequently associated with holiness.

1. Secular usage includes such expressions as 'the glory (or splendour) of Lebanon' (Is 35^{2}), *i.e.* the cedars; 'the glory of his house' (Ps 49^{16} (Heb. 17^{1})), *i.e.* a man's material possessions; 'your splendid chariots' (Is 22^{18}); 'the glory of Moab' (Is 16^{14}) or 'the glory of Kedar' (Is 21^{16}), *i.e.* the esteem or honour they possess. Note also the 'glory' of the forests of Assyria which Yahweh will destroy (Is 10^{18}). It also denotes the noblest or distinctive part of a man as in Gn 49^{6}, Ps 16^{9} 30^{12} (Heb. 13) 57^{8} (Heb. 9^{1})). Yahweh crowns man with glory and honour, *kâbhôdh wᵉhâdhâr* (Ps 8^{5} (Heb. 6^{1})). Yahweh is Israel's 'glory,' its proudest possession (Jer 2^{11}; cf also the Ark in 1 S $4^{21f.}$).

2. The glory of Yahweh is frequently employed in storm theophanies. In the psalm of the thunderstorm He is the God of glory (*'êl kâbhôdh* 29^{3}). The best

illustration, of course, is the great theophany of Ezk 1[4-28a], which is profuse in its imagery of storm, and culminates in the vision of the glory bright like a rainbow (1[28]). In the P sections of the Pentateuch such manifestations are frequent (see Ex 24[16-18], Lv 9[6] etc.). The visible and invisible motives in God's self-manifestation are combined in the story of Yahweh's theophany to Moses (Ex 33[17-23] 34[6f]). Here the visible glory, the brightness of Yahweh's face, may not be seen. The spiritual glory is revealed in the proclamation of the name of Yahweh, full of compassion and gracious.

3. The *glory* of Yahweh also has eschatological associations, as we should expect, for in the eschaton He will manifest Himself to all flesh (Is 40[5]). The idea of Yahweh's glory filling the whole earth is present in Is 6[3], but it is more frequently an expectation of an event to be realized. The second book of the Psalter closes with the petition, 'May his glory fill the whole earth' (72[19]; cf 57[5, 11] (Heb. 6, 12)). As God manifests His glory at the beginning (cf Ex 24[16f]) and at the end (cf Is 40[5]), so He manifests it also in history and in His sovereignty over the nations (Nu 14[22], Ezk 39[21]) and in nature (Ps 104[31f]). W. J. M.—**J. Mu.**

GLORY (in Apocrypha and NT).—In the NT of the RSV, 'glory' as a noun is always the translation of Greek *doxa*. This word, coming from a root meaning 'to seem,' might signify outward appearance only, or, in a secondary sense, opinion. This use is not found in the Biblical writings, but the derived classical use—favourable opinion or reputation, and hence exalted honour—or, as applied to things, splendour, is very common (Wis 8[10], 2 Co 3[7], Bar 2[17], Sir 43[1] 50[7]). The special LXX use of 'glory' for the physical or ethical manifestation of the greatness of God is also frequent. In RSV of NT *doxa* is occasionally translated 'honour' (2 Co 6[8]); in Apocrypha sometimes 'honour' (1 Es 8[4] RSV 'favour'), and a few times 'pomp' (1 Mac 10[86] 11[6] etc.), or 'majesty' (Ad. Est 15[7] RSV 'splendour'). As a verb, 'glory' in the sense of boast (Gr. *kauchaomai*) is frequently found (Sir 11[4], Gal 6[13f]).

A few examples of the use of 'glory' to denote the brightness of goodness may be given. In Bar 5[4] is the striking phrase 'the glory of godliness,' whilst wisdom is called 'a clear effluence of the glory of the Almighty' (Wis 7[25]). In Jn 1[14] the 'glory' of the Only-begotten consists in grace and truth (cf Jn 2[11] 17[5, 22]). In Ro 3[23] the 'glory' of God, of which men have fallen short, is His manifested excellence, revealed at first in man made in God's image (cf 1 Co 11[7a]), lost through sin, but meant to be recovered as he is transfigured 'from one degree of glory to another' (2 Co 3[18]). For 'glory' as used to express the visible brightness, cf To 12[15], where Raphael goes in before the glory of the Holy One (cf 2 Mac 3[26], of angels). In NT, cf Lk 2[9] 'The glory of the Lord shone around them.' In 2 Co 3[7-11] the double use of 'glory' (RSV 'splendour') is clearly seen: the fading brightness on the face of Moses is contrasted with the abiding spiritual glory of the New Covenant. Passages which combine both the ethical and the physical meanings are those which speak of the glory of the Son of Man (Mt 16[27] etc.), and the glory, both of brightness and of purity, which gives light to the heavenly city (Rev 21[23]). 'Glory,' as applied to the saints, culminates in a state where both body and spirit are fully changed into the likeness of the glorified Lord (Ph 3[21], Col 3[4]). *Doxa* is rendered in the RSV by 'praise' in Jn 9[24] and 'glorious one' in 2 P 2[10].

In Wis 18[24] a special use appears, where 'the glories of the fathers' is a phrase for the names of the twelve tribes, written on the precious stones of the high-priestly breastplate. Doubtless this is suggested by the flashing gems. An interesting parallel is given in Murray, *Eng. Dict. s.v.*: 'They presented to his Electoral Highness . . . the Two Stars or Glories, and Two Pieces of Ribbon of the Order [of the Garter]'; cf Kalisch on Ex 28 'The jewels are the emblems of the stars, which they rival in splendour.' W. J. M.—F. W. G.

GLOSSOLALIA.—See Tongues [Gift of], Prophecy.

GNAT.—**1.** Hebrew *kēn*, plural *kinnim*, Ex 8[16-18] (AV, RV **lice**; RVm **sand flies or fleas**), Ps 105[31] (AV, RV **lice**), Is 51[6] (AV, RV 'in like manner'; RVm 'like gnats'). **2.** Greek *kōnōps*, Mt 23[24].

Various members of the *Culicidae*, mosquitoes and true gnats, are found in Palestine; of the former, four species which are fever-bearing are known. These and such small insects are very apt to fall into food or liquid, and required to be 'strained out' (Mt 23[24]), especially in connexion with Lv 11[23f]. An Arab proverb well illustrates the ideas of Mt 23[24]: 'He eats an elephant and is suffocated by a gnat.' On the OT passages see Lice. E. G. W. M.

GNOSTICISM.—The name gnosticism is a modern term used to classify a wide variety of religious sects in existence from the 1st cent. of our era until at least the 9th. What they had in common was the belief that the universe was made and controlled by hostile powers or angels, that the essence of true human nature was a divine element (spark, spirit) not created by these powers, and that a redeemer had descended from the highest heaven to awaken the divine element in those men who were capable of redemption; redemption was given in the reception of this knowledge (*gnōsis*). Redemption-revelation is thus on the one hand knowledge of the true self and on the other knowledge of the alien nature of the universe; the destiny of the spark or spirit is to escape from the universe to the supreme deity above.

Our knowledge of gnosticism is derived largely from the early church fathers (Justin, Irenaeus, Clement, Tertullian, Hippolytus, Epiphanius) who combatted it as a Christian heresy and often reproduced gnostic documents. More recently documents, chiefly in Coptic translations from Greek, have been found; the most important discoveries were made in 1945 at Nag-Hammadi (Chenoboskion) in Egypt, where a whole gnostic library was found, including such works as the *Gospel of Truth*, the *Gospel of Thomas*, and many other documents which illuminate the history of various gnostic sects.

According to some of the fathers, the first gnostic was Simon Magus (q.v.), and other gnostics simply modified his teaching. This is probably a claim made in opposition to various gnostics' own assertions that their teaching came from the Christian apostles; Basilides said he was a successor of Peter, while Valentinus claimed to be a successor of Paul. Other gnostics used apocryphal documents containing revelations supposedly given by Jesus after his resurrection. Almost all of them provide stories of creation which are ultimately based on the book of Genesis, though severely modified by their dualistic world-view, especially in their treatment of Yahweh as an evil angel.

Gnosticism contains elements derived from various sources and of varying importance: dualism chiefly from Iran, probably via heterodox Judaism; the figure of a great Mother probably from Mesopotamia, though related to the Wisdom of the Jewish wisdom-literature; the picture of the redeemer probably from heterodox Jewish Christianity; and the allegorization of all kinds of religious texts from Hellenism, perhaps via Hellenistic Judaism. The matrix in which these elements existed before the rise of gnosticism as such seems to have been (1) heterodox Judaism (as represented, on the one hand, in the Dead Sea Scrolls and other apocalyptic literature and, on the other, in speculative allegorizers mentioned by Philo as going farther than he did), and (2) heterodox Jewish Christianity (as represented in various forms of Ebionism, in the heretics opposed by Ignatius, and in the doctrines reflected by many of the apostolic fathers).

The crystallization of these elements seems to be due historically to two main factors: (1) the rise of Christianity, and (2) the failure of the Jewish apocalyptic hope, first after the war of 66–70 but more significantly after the Messianic struggle of 132–135. It is after the first

failure that we encounter the doctrines of Simon, Menander, Saturninus, and Basilides, and after the second that we meet the great Christian gnostics such as Marcion and Valentinus, both of whom taught at Rome and contended with more orthodox Jewish Christians there.

If this analysis is correct, it is possible that gnostic ideas were present among Paul's opponents at Corinth; they misinterpreted his gospel by treating the eschatology as fully 'realized.' If the essence of gnosticism is to be found in the further dualizing of apocalyptic thought, however, it can be said that some elements in Pauline and Johannine thought lie on the border-line between apocalyptic and gnostic thought, though neither Paul nor John was a gnostic, and at some points John is anti-gnostic. Examples of this 'border-line' type of expression can be found in Paul's allusion to Satan as 'the god of this age' (2 Co 4[4], 'world,' RSV) and in John's statement (8[44]) that the father of 'the Jews' is the devil.

The heresy combatted in Colossians is not necessarily gnostic, but doctrines like those of the later Cainites seem to be opposed in Jude, while the opponents envisaged in the Pastoral Epistles are probably gnostics (1 Ti 6[20]). Doctrines similar to those opposed in 1 John were taught by a Jewish-Christian gnostic named Cerinthus. The Apocalypse of John speaks of a 'prophetess' who apparently was teaching 'the deep things of Satan' (Rev 2[20, 24]); she may well have been a gnostic teacher.

Christians rejected gnosticism not only because of its 'myths and endless genealogies' (1 Ti 1[4]) but because of its rejection of the goodness of creation (4[4]), its denial that Jesus Christ came in the flesh (1 Jn 4[2]), and in some cases its advocacy of immorality (Jude, Rev 2[20]). The reaction against gnosticism led to the full formulation of credal statements, to the more precise definition of the NT canon (to exclude apocrypha used by gnostics and to include books rejected by them), and to a less fluid conception of church government. This process is most clearly reflected in the work of Irenaeus (*c* 180), who insists on the oneness of God and of Jesus Christ, on the oneness of OT and NT, and on the oneness of the Catholic Church. R. M. G.

GOAD.—See AGRICULTURE, **1.**

GOAH.—An unknown locality near Jerusalem, Jer 31[39] (AV **Goath**).

GOAT.—(1) *ʿēz*, used generically, both sexes, Gn 30[35], Ex 12[5], Ezr 6[17] etc. (2) *śāphîr* (root 'to leap'), 'he-goat,' 2 Ch 29[21], Ezr 8[35], Dn 8[5, 8]. (3) *śāʿîr* (root 'hairy'), usually a he-goat, *e.g.* Dn 8[21] 'shaggy he-goat' RSVm; ('rough he-goat' RV); *śeʿîrāh*, Lv 5[6] 'she-goat'; *śeʿîrîm*, translated 'satyrs' Lv 17[7], 2 Ch 11[15], Is 13[21] 34[14]. See SATYR. (4) *ʿattûdh*, only in plural *ʿattûdhîm*, 'he-goats' Gn 31[10, 12], RSV 'leaders' Is 14[9] (RVm 'he-goats'). (5) *tayish* 'he-goat,' Pr 30[31] etc. In NT *eriphos*, *eriphion*, Mt 25[32f]; *tragos*, He 9[12f, 19] 10[4]. Goats are among the most valued possessions of the people of Palestine. Nabal had a thousand goats (1 S 25[2]; see also Gn 30[33, 35] 32[14] etc.). They are led to pasture with the sheep, but are from time to time separated from them for milking, herding, and even feeding (Mt 25[32]). Goats thrive on extraordinarily bare pasturage, but they do immeasurable destruction to young trees and shrubs, and are responsible for much of the barrenness of the hills. Goats supply most of the milk used in Palestine (Pr 27[27]); they are also killed for food, especially the young kids (Gn 27[9], Jg 6[19] 13[15] etc.). They are also required for a sin-offering, Nu 7[16, 22] etc. The Syrian goat (*Capra mambrica*) is black or grey, exceptionally white, and has shaggy hair and remarkably long ears. Goats' hair is extensively woven into cloaks and material for tents (Ex 26[7] 36[14]), and their skins are tanned entire to make water-bottles. See BOTTLE.

Wild goat.—(1) *yāʿēl* (cf proper name *Jael*), used in plural *yeʿēlîm*, 1 S 24[2], Ps 104[18], and Job 39[1]. (2) *ʾakkô*, Dt 14[5]. Probably both these terms refer to the wild goat or ibex, *Capra beden*, the *beden* or 'goats of Moses' of the Arabs. It is common on the inaccessible cliffs round the Dead Sea, some of which are known as *jebel el-beden*, the 'mountains of the wild goats' (cf 1 S 24[2]). The ibex is very shy, and difficult to shoot. Though about the size of an ordinary goat, its great curved horns, often 3 feet long, give it a much more imposing appearance. E. W. G. M.—R. A. B.

GOATH, Jer 31[39] (AV).—See GOAH.

GOATSKIN.—Ex 25[5] 26[14] etc. (RSV); see PORPOISE.

GOB ('cistern').—A place mentioned only in 2 S 21[18] as the scene of an exploit of one of David's warriors. In the parallel passage 1 Ch 20[4] Gob appears as *Gezer*; many texts read it as *Nob*. The Greek and Syriac versions have *Gath*. Nothing is known of Gob as a separate place.

GOD.—1. The English word.—The English word 'God' is not itself a product of the Jewish-Christian tradition, but existed in the Germanic family of languages in pre-Christian times. Its original sense is doubtful, and according to the Shorter OED the senses 'what is invoked' or 'what is worshipped by sacrifice' have been suggested as the primary meaning. With the adoption of the word by Christianity its pre-Christian inherited colouring was overlaid with the Jewish-Christian tradition and was to a great extent lost. Within that tradition therefore its significance corresponds fairly exactly to the content of the Hebrew and Greek words which it is used to translate. On the other hand it was a matter of general knowledge, and one which the Bible itself shares and does not attempt to conceal, that recognition and worship have often been extended to others than the Jewish-Christian God, and the term 'god' or 'gods' is used for them also, as are the respective Greek and Hebrew words. It is the custom to use a capital G for the God of the Jewish-Christian tradition, and a small letter for the others.

2. Method of this article.—This article is intended fundamentally to be a study of what is meant by 'God' within the Bible. It will show something of the history of its usage within the Bible and indicate some of the more important characteristics and problems of that usage. It will not discuss the concept of God in other religions, or possible purely philosophic concepts of God, except where such discussion is occasioned by Biblical data; and it will not try to describe in full the later theological formulations of the doctrine of God, although these may be kept in mind at certain points of comparison. The perspective will be historical, in that texts will be thought of in the circumstances of their time and place; but the sequence will not be strictly chronological, for various separate aspects will require attention in turn.

3. Pre-history of the idea of God.—From the later 19th cent. onwards it has been frequently maintained that the notion of 'gods' is the end of a long religious evolution, of which the most important earlier stage is the so-called 'animism' or belief in spirits dwelling within trees, stones, rivers, and the like, spirits not yet sufficiently independent and individualized to be classified as deities. This earlier stage in religion was often associated with sociological phenomena such as totemism or with the realm of magic and *tabu*.

On the other hand, in somewhat more recent times, another school of thought has argued that true deities or 'high gods' are to be found at an early stage of religious development, and that the simple evolutionistic picture of a development from animism up to polytheism is a false one. For the present we may say that although extreme opinions in favour of universal primitive 'high gods' or even of 'Primitive Monotheism' are not widely accepted, they have had sufficient force to break down the simple evolutionism with its over-emphasis on animism. Thus if we find within one set of traditions a river-spirit, for example, side by side with a real distinct god, we do not necessarily have to explain the former as a survival from an earlier stage, and we may have to take the two together as part of one given religious pattern.

To these questions about the pre-history of religion, however, the Biblical sources furnish few or no answers directly. Only a small proportion of them attained their present form much before 1000 B.C. As we go back before this time the tradition becomes gradually thinner and for the ancestors of Israel before 1750 or so it has become so lacking in detail and circumstantiality as to make the religious history before this time quite obscure. There is no sign in the OT of any consciousness of a pre-theistic stage, of a time when gods were not yet known, and the texts depict their God as having relations with man from the beginning of history. The question which they do discuss to some extent is not whether He was really a God, but by what name He was known.

In a number of stories and traditions it is possible to suspect or detect a pre-history of the story, which, relating earlier to an older Palestinian deity, has in the course of time been taken over and transferred to the God of the Israelite faith. This is a different matter, however, from a pre-history of the idea of God as such, and will be taken up later. In general, however, and as a point of method, it may be said here that in an article of this type the first purpose will be to explain the story in its Israelite form and not the story in another form which it may have had before; but the previous form will be specially relevant wherever it is needed to explain the peculiarities of the later—but for which peculiarities, it may be added, the existence of a previous form might not have been detectable.

4. Names of God in the OT.—For convenience we may here gather the more important Divine names of the Hebrew OT; some of the problems of their use must wait for treatment later.

(*a*) **El.**—This is fairly commonly taken to mean 'power' or 'the strong one,' cf a Hebrew phrase 'it is in the power (*'ēl*) of my hand to . . .' (*e.g.* Gn 31^{29}). But it is noticeable that this word and the following (viz. *'ᵉlōhîm*) are both closely similar to common Semitic deictic elements used in demonstratives and similar particles, so that they may go back to a sense like 'that one' or 'that one there.' This would not necessarily exclude some connexion with *'ēl* 'power.'

In any case we find *'ēl* and its cognates as a general Semitic term for a god, and the plural *ilâni* 'the gods' is frequent in Akkadian. On the other hand we find El as the name of a particular deity, and that on Canaanite soil in the Ugaritic literature, where El occupies a senior and venerable position among the gods, but is hardly the principal actor in the myths which we possess.

In the OT we may classify usage threefold: (1) *El* is used for 'God,' *i.e.* the God of Israel, and occasionally for some other god, *e.g.* Is 44^{17}, and the plural for 'the gods,' as Ex 15^{11}. The word is generally poetical. (2) In the compound names or titles associated especially with the appearances to the patriarchs at holy places, *e.g.* El Shaddai, Gn 17^{1} (RSV 'God Almighty'), El Roi, Gn 16^{13} (RSV 'a God of seeing'). In these there is a fair probability that the original reference is to the particular deity *El* or to special local deities whose designations include his name, and that later the names were taken to refer to the God of Israel. (3) The use in proper names like Eliakim 'May *'ēl* raise up' or Ezekiel 'May *'ēl* strengthen.' Though it is possible to argue here for an original reference to the proper name *El* (*e.g.* J. Gray, *Legacy of Canaan*, 1957, p. 120), it would seem better to think of a general reference, 'the god,' *i.e.* the god of this tribe or family, on the analogy of other theophoric elements such as 'the father' or 'the brother.'

(*b*) **Elohim**, the ordinary Hebrew word for God. For derivation see above under *El*. The word has a plural form, and the singular form *'ᵉlōah* is found in Job frequently and occasionally elsewhere. In syntax the normal plural form is treated as singular for congruence with verbs and adjectives, with few exceptions, where the sense is 'God'; when used of other deities than the God of Israel, as in the phrase 'other gods' it is commonly plural in sense and syntactically treated as such.

The plural form has always excited great curiosity. It should not be treated as a discernment of a plurality within the being of God, and has developed rather from the usage of emphasizing the importance of one god by seeming to concentrate within Him the being of all the gods. So we already find in Akkadian the plural *ilâni* 'gods' in the Tell-Amarna letters with a singular verb, meaning 'the deity,' and in the same letters when a man writes to Pharaoh as 'my lord, my gods and the sun' he is not seeing Pharaoh as a plurality but regarding him as comprehending all deity in himself. The usage does not imply a monotheism but a desire to generalize in the whole divine realm or to concentrate emphasis upon a particular god. But the widespread usage in Hebrew of this plural form (far exceeding the frequency in other Semitic languages) was almost certainly encouraged by the belief in the Israelite God as the only one of significance in Israel and therefore as the sum and total of deity.

There are a few places where we may have to think of *Elohim* as a realm or class of divine or superhuman beings; these beings are sometimes called 'sons of *'ᵉlōhîm*' or 'sons of gods,' the word 'son' indicating less physical paternity than membership of a group. In Ps 8^{5}, for example, man is made a little less than *'ᵉlōhîm*, and the comparison may be not with God but with the divine beings as a class. The Greek text recognized this by interpreting as 'a little less than the angels,' so He 2^{7}.

(*c*) **Yahweh**, usually translated into English as 'the LORD.' This is a personal proper name, a fact rather obscured by the usual translation. The Jews in later times ceased to pronounce the name, and used in its place substitutes, such as *Adonai* ('My Lord'), or 'The Name.' The sacred name is sometimes called the Tetragrammaton, consisting in the Hebrew consonantal script of the four letters YHWH. The pronunciation *Jehovah* has no authority at all and appeared only in late mediaeval times; it is an attempt to vocalize the Tetragrammaton using the vowels written under it by the scribes, which vowels however were never intended to be combined with the four consonants of this word. That the pronunciation in ancient times was Yahweh is concluded from transcriptions in the early Christian Fathers.

In personal names, however, we find at the end of the name *Yahu* or *Yah*, *e.g.* Azariah (*ᶜazaryāhû* or *ᶜazaryāh*, Yahweh has helped) and at the beginning of the name Yeho-, *e.g.* Jehoiakim (*yᵉhô-yāḳîm*, May Yahweh raise up). The form Yah (see JAH) occasionally occurs alone, and frequently in the phrase Hallelujah, 'Praise ye Yahweh.' Forms of the Yahu type are attested from Assyrian texts and from the Elephantine papyri of about 400 B.C.

The problem has been much discussed (*a*) what was the meaning of the name; (*b*) whether the earliest form was Yahweh or Yahu, the two questions being very much interdependent. Ex 3^{14} gives what is intended as an interpretation of the name in the words 'I am who I am' (RSV) or rather 'I will be as I will be'; in any case connecting the name with the verb 'to be.' The form Yahu could perhaps be explained as an abbreviation of Yahweh, but has often been taken to be a primitive cultic cry, *yā-hû* 'oh he.' It is not impossible that this latter explanation should be reconciled with the interpretation from the verb 'to be,' since it is possible to regard this verb (*hāwāh*, *hāyāh*) as a verbalized form related to the old Semitic deictic pronoun (*huwa*, Heb. *hū'*)—cf Rundgren, *Über Bildungen mit š- und n-t-Demonstrativen im Semitischen*, 1955, p. 154. The writer would prefer then to take it as connected with the verb 'to be' in the sense 'he is, he shows himself to be' and also with an old cultic cry in the sense 'oh he'—in English we should almost have to say 'oh thou.' It should be added that the interpretation of this name is very controversial among scholars, and numerous

suggestions cannot be mentioned here. Of Albright's opinion that the word is causative and must mean 'he causes to be, brings into being,' something will be said later. In any case it is clear that usage over much of the OT period was determined by Ex 3^{14} in the sense 'he is.'

The Greek translators represented the word usually by *kyrios* 'Lord.'

Questions about the history of the veneration of Yahweh in Israel will be treated below.

(*d*) **Shaddai,** in prose often in the compound El Shaddai, is usually translated 'the Almighty' in English. It has been plausibly connected with Akkadian *šadû* 'mountain' in the sense of 'he of the mountain,' but this remains uncertain. It occurs in poetry in Job and elsewhere, but its chief importance is the statement of Ex 6^3 that God appeared to the patriarchs not by His name Yahweh but as El Shaddai. This passage is usually taken to be from P, and in P passages in Genesis we find El Shaddai, *e.g.* 17^1, 35^{11}. Its antiquity is probably confirmed by its use in the ancient list of names in Nu 1^{5-15}, *e.g.* Ammishaddai, 'My kinsman is Shaddai.'

(*e*) Of other Divine names **Elyon,** 'Most High,' should be mentioned. As a divine title this also is known on Canaanite soil, and it appears conspicuously as 'El Elyon' or 'God Most High' in Gn 14, probably connected with Jerusalem. Here it may well be a title of a pre-Israelite deity later assimilated with Yahweh. The word also occurs in poetry quite frequently, and is an epithet for, or an alternative expression for, Yahweh. It should be remembered that the parallelism of Hebrew poetry often required the use of two different words for the same thing, so that there was a certain demand which could well be filled by words which could represent God acceptably.

5. The Understanding of God before Moses.—The assessment of this depends to a large extent on the degree of accuracy we assign to the Genesis traditions as a picture of the religious situation before Moses. It may seem probable that the migratory groups who were the ancestors of the later Israelites came into Canaan with at the centre of their religious consciousness a veneration for a tribal deity, whose close integration with the tribe and its fortunes was expressed by the designations as 'the Father,' 'the Brother,' or 'the Kinsman,' (Heb. *'ābh*, *'āh*, *'am*), manifest in early names such as Abram, 'the Father is lofty,' Amram, 'the Kinsman is lofty.' We have suggested above that *El* in the same context is 'the god,' *i.e.* the one related to our group. This type of usage does not divulge the actual name of the deity. It does not necessarily mean, however, that the deity had no name, and the phrase 'the God of your fathers' was as much as could be said to designate Him. That the name was Shaddai is the belief of Ex 6^3. In any case we discern in the 'God of the fathers' a strongly personal attachment; He goes with members of the family even in exile, and is tied to no particular sanctuary. It is interesting that we have no 'localization' of Shaddai as appearing at a particular place.

On the other hand we have several cases of Divine appearances to the patriarchs at holy places under *El*-names, such as El-Roi in Gn 16^{13} at the holy well of Beer-Lahai-Roi. (See above under *El*.) It is reasonably probable that the place of the patriarch is in hallowing for Israelite tradition with a foundation-story a holy place existing from ancient times. The *El* of the holy place comes in any case to be identical with the personal God of the patriarchs, so that in Gn 35^{1ff}, for example, Jacob venerates at Bethel the *El* who was with him on his travels.

How far can the term 'monotheism' be used for the patriarchal religion? The problem of monotheism must be taken up later, but for the present we may say that the central place in the patriarchal period was taken by the personal family deity; and the veneration of the El at certain old shrines may have been understood as manifestation of this same deity, as it certainly came to be understood later. Other gods may have occupied other aspects of the patriarchal life which were unimportant for the main theme as it has been transmitted to us. To assert that the patriarchs were polytheists in any full sense, with a complete and varied pantheon of deities, including goddesses and chthonic and fertility deities, is quite without justification on the Biblical evidence, and implies that Genesis gave a very distorted picture of the time. There is no evidence in the early Hebrew nomenclature for a wide variety of deities of central importance. No word for 'goddess' exists in Biblical Hebrew.

Was the name Yahweh known in the patriarchal period? Although Ex 6^3 denies it, it is well known that other sources use Yahweh in Genesis and carry the name back to the earliest men (Gn 4^{26}). This may rest on Kenite tradition (Gn 4 is the saga of the first generations of the Kenites), but one can hardly attribute all the old Yahwistic saga to the Kenites, and one may regard it as doubtful whether Genesis would have become so deeply penetrated by the name Yahweh if that name was totally unknown before Moses. It should therefore be considered possible that the name was already circulating in some group of the ancestors of the later Israel, and that it was associated with stories of the old saga brought on the migration from Mesopotamia (creation, deluge, tower of Babel).

Within the present framework the relations of the patriarchs with their God are very much a theme of promise and fulfilment: a small group later to be a great nation, a land visited but not yet possessed—all looking forward to the Exodus and the entry to Canaan.

6. Moses and Monotheism.—It is of general importance that the Israelites do not distinguish between absolute existence and existence with significance. Thus when the fool says in his heart 'There is no God' (Ps 14^1), he is not stating an abstract atheism, the absolute non-existence of God, but is saying that God is not to be reckoned with. Israel's monotheism, one of her contributions to history for which she is most famed, was likewise not an absolute assertion of the non-existence of other gods, but a declaration that they are not to be reckoned with. It is usually said that with Deutero-Isaiah we move to a statement of absolute non-existence for other gods, but it is hard to see where his language goes beyond Ps 14^1, asserting their complete ineffectiveness and insignificance in the matters which He most has at heart, viz. creation, the fulfilment of a purpose announced from the beginning, and the emptiness of idolatry. The more abstract and absolute form of monotheism is reached not in but after Deutero-Isaiah, and the Chronicler can still say 'Our God is greater than all gods' (2 Ch 2^5). The difference between 'henotheism'—where one God was worshipped but the existence of others not absolutely denied—and monotheism is thus irrelevant for OT thinking. The effective attention of Israel to one God only is there from a fairly early date, even though from time to time some oblique reference is made to the other gods and their domain elsewhere (Jg 11^{24}, 1 S 26^{19}).

The question how far Moses was responsible for the concentration of Israel on the one jealous God is difficult, for it depends on a decision how much of the large tradition attributed to Moses in fact goes back to him. The claim that Moses was the author of Israelite monotheism has recently been supported by Albright, who (1) connects this with monotheistic and universalistic inclinations in Egyptian religion in the 18th Dynasty and after, (2) regards Moses as having inculcated the name Yahweh, understood as causative ('He who causes to be' or 'brings into being') and so indicating creation, which was a main interest in these Egyptian religious trends. Against this we may argue (1) the causative of this verb does not occur in Hebrew elsewhere, (2) there is a wide social, political, and intellectual gap between early Israel and imperial Egypt, (3) there is no evidence for a belief in creation as an important part of the Mosaic contribution to Israelite religion.

It would seem more likely that the concentration on one God has its origin not in the inculcation of 'monotheism' by Moses so much as in the events of the Exodus, with which of course Moses was, or came to be, associated. The deliverance there, and the covenant and lawgiving that followed, are attributed to Yahweh alone, and form the basis of Israel as a community. Henceforth numerous individual and group variations may appear, and the place of other gods in special connexions may be known, but the constituting of Israel and its fundamental cult belong to Yahweh. The trait of Yahweh as a jealous God probably belongs to the Mosaic time and to the picture of the Exodus as a conflict of gods and nations.

Mention should be made at this point of the important place in the Exodus-Sinai traditions of the Kenites and especially of the father-in-law of Moses, which has given rise to the 'Kenite hypothesis,' namely, that Moses learned of Yahweh while exiled in Midian with a Kenite group, and adopted their deity for his people. This theory may go too far, and it may be more probable that a very important part in the transmission of the Sinai traditions and of the Yahwistic faith was played by the Kenites, some of whom came to settle within Israel, and who were strongly conscious in their nomadic life of Yahweh as their protector (Gn 4^{15f}).

Ex 3 is important for its interpretation of the name Yahweh. The central emphasis of the passage is not the historical information that Moses invented or adopted the name, or that it was first known to him, but its etymologizing interpretation from the verb *hāyāh* or *hāwāh* 'to be,' hence 'I am that I am' or better 'I will be as I will be.' Moses asks for the name because the people, hearing of the God of their fathers, will ask him the name. This is not because they have forgotten the name during their stay in Egypt, nor because the God of the Fathers never had a name, but because the literary design of the passage is to make Moses ask the name, just as Jacob before him and Manoah afterwards in their relations with deity. Moses' request is answered not with a mere handing over of the name Yahweh, but with an interpretation, the point of which is most probably the freedom of Yahweh to be, or show himself in action, as He will.

In personal nomenclature only one example of what might be a Yahweh-name appears before Moses, namely his mother Jochebed; but this isolated case might have another explanation. After Moses Yahweh-names appear only slowly and gradually; only a few cases exist from the time of the Judges; but after David they become the numerically dominant theophoric name-type in Israel.

In general, the dominant characterisics of Israel's God are traceable to this early period—the covenant with Israel, on which that sacral community is based; the existence of certain commands or legal sanctions which went with this covenant, although it is hard to know precisely which commands were then formulated; the character of Yahweh as jealous God, His conflict with and triumph over other powers, and the celebration of Him above all as one who had acted in a particular series of events for the redemption of His people. It is also probable that this early age saw some limitation on the iconic representation of God, such as is in a more developed form lodged in the Decalogue, and which in the end became a complete rejection of all idolatry and one of the most noted features of Judaism. Like the monotheism of the time, the early stages of the anti-iconic prohibition were probably not understood as absolute and binding in every connexion of life, and examples of the use of images continue to appear.

7. The God of Israel and Canaanite Religion.—The religion of the settled culture of Canaan is characterized by its functional directedness towards the fertility of flock and field and the sustenance of the ordered and harmonious social-economic world. Sex as the principle of fertility had its place in the world of the gods, reflected on earth by cultic prostitution at holy places and times. The mythology of dying and rising gods corresponds to the death and life of vegetation.

It is probable that the realm of fertility was not integrated into Yahweh's nature at the Israelite conquest, and there was a natural tendency, while honouring Yahweh's place in the historic foundation of the nation, to turn for the underpinning of the agricultural society to the deities long associated with the land. This would be thought of not as an abolition of Yahweh but as a natural adaptation, with more or less degree of coalescence between Yahweh and the Canaanite deity. Of these deities the most important is Baal; his name can be used in the plural of the 'lords' of different localities, but his name as a proper name of a great god is now well known from Ugarit.

Another form of integration with the older religious complex is the adoption of female divine symbols, and of goddesses, to correspond with Yahweh-Baal. The chief such symbol was the *Asherah* (plural *Asherim*, AV 'groves,' an inexact rendering). Asherah was a goddess well known from Ugarit; the *'ashērāh* was a pole or trunk planted in the sanctuary, representing her. With the *'ashērāh* the cultic prostitution appears (1 K 14^{23-24} and elsewhere).

Such forms of Canaanite influence appear again and again from the Judges down to the end of the kingdom, and appear at times to have been dominant in popular religion and among kings and other leaders. On the other hand the extent of survival of older and purer Yahwism may have been greater than our sources indicate, because the Deuteronomic editors of Kings look on the religious history of the kingdom pessimistically from their own special point of interest. The chief part in the Yahwistic reaction against Canaanite syncretism is taken by the prophets from Elijah onwards. Elijah asserts the dominance of Yahweh over Baal in the latter's own proper sphere of rain and fertility (1 K 17–18), at a time when the effort to establish Baal in Israel is particularly strenuous. Elijah's action here determines the main line for Yahwistic prophecy afterwards. The prophetic message, however, drew its inspiration to a great extent from the ancient Israelite tradition of the Exodus, the jealous God, the covenant and commandments. Syncretism, idolatry, and social ethics are all measured by this ancient standard. What is real in the divine dominance of nature and fertility is firmly set under Yahweh, the God of the Israelite historical tradition. The sense of the historical tradition is reaffirmed by the announcement of new acts of Yahweh upon His people in relation to the other peoples. The functional sense of the mythological harmony is rejected in the prophets and accepted into Yahwism only on Yahwistic conditions and under the control of the older Yahwistic tradition.

In all this the prophets did not stand for mere reaction to an earlier way of life, as did some of their supporters like the Rechabites. Prophecy itself was very largely a phenomenon of life in Canaan. It does not merely reiterate the old traditions of Yahweh but gives them new life by drawing out their significance in a new situation.

On a more positive side, Yahweh settles down in Canaan during this same time and former Canaanite sanctuaries are devoted to Him. Of particular importance is Jerusalem and the act of David in bringing the Ark there, thus embodying old national religious traditions in the royal sanctuary. For the later development of Yahwism much importance attached to these sanctuaries and their priesthood, among certain circles of which the Deuteronomic school grew up, and many problems of the book of Deuteronomy concern relations between Yahweh and the land and place where He has chosen to dwell.

In the later Judaean monarchy, powerful blows are struck against Canaanite syncretism by reforming kings like Hezekiah and Josiah; but from Jeremiah we know that Canaanite influences in worship were still real at the end of the monarchy. But from the exile onwards

the appeal and the temptation of Canaanite religion for Israel was for the most part over.

8. God in the likeness of man.—It is well known that in the OT anthropomorphic expressions are liberally used of God. We hear of His hand, His eyes, His ears; He rises early, walks in the garden of Eden, closes the door of Noah's Ark, even sometimes repents or changes His mind. These expressions clearly come quite naturally to the writers, and it is usually pointed out how well they fit in with the strongly active, personal, and living character of the OT God. Most of them are in fact intended as descriptions not of God but of His actions.

A more serious problem is set by those theophanies or appearances of God where He is seen in human form. Unlike the first type, these are a real attempt to say what was seen when God appeared. Theophany is a recognized and significant phenomenon in ancient religion. Distinct cases of a theophany being in human form wholly or partly are Gn 18^{1ff}, Ezk 1^{26}. On the other hand we have many appearances of God where no attempt is made to describe the manifestation, and the interest lies on what is said, *e.g.* Gn 12^{7}. The matter is complicated because in some cases the appearance of Yahweh seems to merge into the appearance of His angel (*e.g.* Gn 18–19), and we also have the statement that Yahweh does not let Himself be seen at all (Ex 33^{20}). Perhaps we may venture the statement at any rate that when God lets Himself be seen He shows Himself in human form; this is as it were His proper form, and might perhaps be connected with the statement that man is made in the image of God.

In general we may say that it is impossible to discern any direct progress from the more 'material' anthropomorphic expressions to a 'higher and more spiritual' conception. It is true that such forms of representation of God as His angel, His glory, His name, His face, have been commonly interpreted as attempts to soften down the traditional anthropomorphisms by presenting a less direct presence or action of God. But if this was their purpose it was singularly unsuccessful, for these representations are left in the texts alongside the crassest anthropomorphisms. The purpose of the introduction of angels and the like cannot be discussed here; all we can say here is that it was not normally the avoidance of anthropomorphism, although incidentally they may have softened its incidence in some places.

It is worth remarking that the reason why this problem is a difficult one lies in one of the main insights of the OT, namely the deep difference between God and man, between God and nature. Unlike the gods of so many mythologies, the God of Israel does not share a common origin with the world or with men (contrast the Babylonian Creation Story). The de-mythologizing of the relation between God and world and men is one of the chief achievements of the Israelite consciousness.

9. Conclusion.—In the later stages of the OT the main outlines of the understanding of God are now accepted, and the temptations and problems of earlier times are imperfectly remembered. Monotheism and the prohibition of idols are more absolute. Although some new designations appear, such as 'the God of Heaven' popular in the Persian period, they do not mean important changes in the conception of God.

10. Words for God in the NT.—In its general understanding of God the NT builds very much on the accepted positions of Judaism in the later period of the OT and after. The variety of Divine names known in earlier times is now replaced for the most part by the simple and general term *theos*, 'God.' The most characteristic Israelite name of all, the proper name Yahweh, was in the Septuagint translated by *kyrios*, 'Lord,' most commonly without the article, the omission of which is a trace of the old personal name. This usage continues in the NT, with or without the article (*e.g.* Lk 1^{6}), but side by side with it we have the common usage of *kyrios* of Jesus Christ. The question of the pronunciation or meaning of the old name Yahweh seems never to be raised in the NT.

It is well known that late Judaism often used substitutes for the Divine names out of reverence for them, and an example in the NT may be the use of 'Heaven' as in Lk 15^{18}, Mt 21^{25}. Matthew uses 'kingdom of heaven' corresponding to Mark's 'kingdom of God.' It is difficult however to explain this purely as a mere substitute term, since Matthew is in fact not shy of the word 'God' and uses it freely, and even occasionally the phrase 'kingdom of God.' It is perhaps more probable that the usage 'kingdom of heaven' in Matthew represents a change of emphasis, deliberately intending the idea of a heavenly kingdom.

As in OT usage, the word *theos* is used for other gods than the Jewish-Christian, 1 Co 8^{5} etc.

11. The development of OT thinking.—(*a*) **Monotheism.** Monotheism of a type familiar in later OT thought—is taken for granted in the NT, and no more than the OT does the NT precede its message about God with an attempt to prove His existence. This monotheism formed an accepted common ground with the Jews, and was not without important contact in the Gentile world also, for the message of the One God was a central part of the Jewish proselytizing appeal, and a part likely to meet with some response in Hellenic minds. Even so, in Paul's mind, as in the OT, the monotheism is not of the most absolute and theoretical kind. He can assume that 'there is no God but one' (1 Co 8^{4}) and can go on to talk rather imprecisely of the existence of so-called gods and lords; Gal 4^{8} can talk of a bondage to the gods who by nature are not; and 2 Co 4^{4} speaks of a god of this world who has blinded the unbelievers.

Considering how strongly conscious the Jews were of their monotheism, it is interesting to note that as far as the NT evidence goes the Jewish opposition did not charge the Christian movement with tritheism or polytheism, a common Jewish criticism later. The complaint was rather that the man Jesus assumed the place of God (Jn 10^{33}) and thus confused the distinction of God and man which the OT had insisted on, than that He introduced a plurality in the deity. In Mk 12^{28-34} Jesus, asked what is the first of the commandments, begins His answer with the *Shema'*, the classical declaration of the oneness of God from Dt 6^{4}; later, at Corinth, the same certainty is something that 'we know' (1 Co 8^{4}), being inherited from the OT without change. The problems of NT theology which were taken up in the later Trinitarianism existed not because the monotheistic basis of Judaism was departed from, but precisely because the oneness of God remained as a fixed certainty alongside of the Christological development.

(*b*) **The problem of anthropomorphism.**—In post-Biblical Judaism the anthropomorphic representation of God was no longer living and productive, but it is too much to say that it was repudiated. Rather the examples of it were guarded in exegesis, so as to protect the distance between God and Man. In spite of many statements to the contrary, it is not the case that anthropomorphisms were systematically expunged in the translation of the OT into Greek. They certainly do drop out in a number of cases, but many of these can be accounted for from other aspects of the translation technique. The 'repentance' of God disappears in Gn 6^{6} but remains in 1 S 15^{35}. The Targums in general go farther than the LXX in replacing anthropomorphic expressions, but compared with the LXX are much more interpretative paraphrases and much less simple translations. It was still later Judaism that in the middle ages moved to an absolute conception of the incorporeality of God.

The NT also can be said to give a much less anthropomorphic impression of God than the OT. This is however not because of a fading of anthropomorphic thinking, but because in its place there appears a much more complete and radical human representation of God in Jesus Christ, who fills the earthly foreground of the actions of God. This argument does not intend to assimilate Jesus to the OT anthropomorphisms, but only to indicate how His presence made an essential change

to the possibility or validity of anthropomorphism. In Ph 2$^{5-10}$ we hear of how He, originally in the form (*morphē*) of God, took the form of a slave and became in the likeness of man. The humanity and tangibility of Jesus do not make God more remote, but make it possible to preserve His separation from humanity without depriving Him of real and personal representation on earth. Assertions such as 'God is Spirit' (Jn 4^{24}) or 'God is love' now become possible; or where they are not new in the NT they fit within a new frame of significance. Angelic mediation or representation, which is important in many strands of the OT, in the Gospels is relegated to the periphery at the birth and Resurrection of Jesus for the most part.

12. The place of Christology. (Cf CHRISTOLOGY, JESUS CHRIST.) The relation between Jesus and God is not incidental to the picture of God in the NT, but is essential to it. Nevertheless only part of the Christological problem can be handled here.

In general, in His teaching Jesus does not describe Himself directly as 'God,' and speaks of God as another. So Mk 10^{18}, 'Why do you call me good? No one is good but God alone.' He speaks in the third person of God in such contexts as the creation of the world by God (Mk 13^{19} 10^{9}); in the word from the Cross He calls upon 'my God' (Mk 15^{34}), making His own the Psalmist's expression of human worship. In the Synoptic Gospels the expression 'Son of God,' really a Messianic designation, is rather used of Jesus than by Him of Himself. The important passage Mt 11$^{25-27}$, Lk 10^{21f} in the synoptic teaching describes the intimate and unique relationship of Father and Son; and the special naming of Jesus as the Son appears in the Baptism and Transfiguration narratives. In John on the other hand the relation of Son and Father is a frequently recurring theme, and we find such statements as that 'I and the Father are one' (Jn 10^{30}) and 'He who has seen me has seen the Father' (14^{9}). In the remaining literature of the NT the designation of Jesus as 'Son of God' is frequent also.

The chief reason for the peculiar manner of statement of these relations is that the NT does not conceive of the relation between God and Christ as a static one which could be once stated and would then be unchangeably valid and fitting in all situations. Rather, the relation is messianic and eschatological; by this we mean that it has its being only in, and not apart from, the mission of Jesus as Messiah and its movement through a series of events to the crucifixion, resurrection, and ascension, and beyond that to the *parousia*. Until the consummation the Synoptics indicate a certain reserving or withholding of an open statement such as is allowed by John's more deeply interpretative method. Outside the Gospels the standpoint is clearly post-ascension and the declaration of Jesus as Son of God is normal. Even there we see how the relation of Christ to God is messianological, as in Ro 1^{3f}, where we hear how the Son of God was descended from David according to the flesh and was designated Son of God in power by the resurrection. In the NT the relation of God to Christ cannot be extracted from the movement of Messianic mission and petrified as an independent formulation.

Mention should also be made of some cases where Jesus is spoken of as 'God,' of which the most notable are Jn 20^{28}, 'My Lord and my God,' spoken by Thomas, and Jn 1^{18}, accepting the well-attested reading 'the only-begotten God.' He 1^{8f} takes the word God in an OT passage to refer to the Son, and Tit 2^{13} speaks of Jesus Christ as 'Our great God and Saviour.' In Jn 1^{1} the Logos, later to become flesh in Jesus, is God. Ro 9^{5} can perhaps be taken this way; so AV. The usage is common in Ignatius soon after the NT period. It seems clear that the designation of Jesus Christ as 'God,' if hardly normal, is not felt to be objectionable, and indeed is quite proper on some occasions. None of the passages represent Jesus as the totality of God.

Some mention should be made of Jn 10$^{34-36}$, where Jesus, accused of making Himself God, quotes Ps 82^{6}, 'I said, you are gods.' If those to whom the word of God came could be so called, why is it impossible for Jesus to say He is Son of God? Neither the original nor the quotation is intending to attribute divinity to man in general. The original reference is clearly to gods, or to superhuman judges. If such beings can be addressed as 'gods,' then Jesus can be called 'Son of God.'

The messianological and eschatological approach taken to the relation of God and Christ is also relevant for the triple structure of Father, Son, and Spirit. The fatherhood of God is not a universal fact discerned and taught, but a relation to the messianic Son and through Him to His disciples; in the epistles men are adopted into sonship. The relation of Father and Son appears therefore as it is connected with the mission of Jesus. Similarly the Spirit follows and confirms that mission, and is present in the Church and joins it with its ascended Lord and the heavenly world, or in other words the coming Lord and the future world. In the NT these relations can still be seen under many aspects, as connected with different moments of the Divine action. We therefore have no systematic trinitarianism, and in particular no example of the 'three-in-one' type of formula which is a result of reflection linking the triadic presentation with the axiomatic monotheism. Triadic formulae do, however, occur fairly frequently, and with the elements in different orders, *e.g.* Mt 28^{19} (Father, Son, Spirit), 2 Co 13^{14} (Lord Jesus Christ, God, Spirit), 1 Co 12$^{4-6}$ (Spirit, Lord, God). There is still much fluidity, and formulae with two elements are also common, *e.g.* 1 Ti 2^{5} (one God, one mediator), 1 Co 8^{6} (one God the Father, one Lord Jesus Christ). Varied formulae appear, like Eph 4$^{4-6}$, including beside the Divine elements the acts and institutions of salvation—one body, one Spirit, one hope, one Lord, one faith, one baptism, one God. Terms like 'Lord' and 'Paraclete' can vary in their application between Christ and the Spirit.

J. Ba.

GOEL.—See AVENGER OF BLOOD, and KIN [NEXT OF].

GOG.—1. Name of a Reubenite (1 Ch 5^{4}), possibly meaning a valuable made of gold. **2.** The 'chief prince of Meshech and Tubal' (AV, RV 'prince of Rosh, Meshech and Tubal,' Ezk 38^{2} and often in chs. 38, 39) of the land of Magog (actually 'the Magog,' see MAGOG), pictured as leading a great host of nations from the north against the restored Israel, and as being ignominiously defeated by Yahweh's intervention upon the mountains of Canaan. The section (Ezk 38–39) is complex, and may well contain more than one tradition; nor is it certain that it is original to the book of Ezekiel. The idea of an enemy from the north may also be seen in Jl 2^{20} and Jer 1^{14}.

Various theories have been proposed to explain the origin of the name, of which the two most probable seem to be: (1) He is to be identified with Gyges of Lydia (Akk. *Gugu*, Gr. *Gyges*), the famous king described by Herodotus (i. 8 ff), and who is said by Ashurbanipal (669–*c* 632 B.C.) to have expelled the invading Gimirrâ (Cimmerians) with Assyrian help. Meshech and Tubal also suggest Asia Minor, and Gomer (=Cimmerians) is mentioned as one of Gog's allies, suggesting the possibility that a somewhat garbled account of tribal movements in the north has provided the basis for this strongly apocryphal picture. (2) He is to be connected with *Gaga* (Gagâ'a in the Amarna tablets), a corruption of Gašga, a wild district in the region of Armenia and Cappadocia. The people of this area having passed into oblivion, the name appears to have survived with the general meaning of 'barbarian.' Gog would thus retain a reminiscence of a barbaric people whose identity had long been forgotten. Other suggestions are *Gaga*, a Babylonian deity, and *Gagi*, a ruler of the city of Sabi mentioned by Ashurbanipal.

Upon the basis of Ezk 38, 39, Gog and Magog appear in later Jewish eschatology as leading the final, but

abortive, assault of the powers of the world upon the kingdom of God. Rev 20^{7-9} depicts Satan gathering the nations of the whole earth, that is Gog and Magog, to bring them to disaster as they surround the saints and the beloved city (cf also Ps 2 for the idea). Cf also *Sib. Orac.* iii. 319–322, 512; LXX in Nu 24^{7} (for Agag) and Am 7^{1}; Rabbinic literature (cf J. Bonsirven, *Jud. Pal.* i (1934), 460 ff, S. Mowinckel, *He that cometh* (1956) (Index), and Arabic legend.

S. R. D.—P. R. A.

GOIIM is the Hebrew word which in EV is variously rendered 'Gentiles,' 'nations,' 'heathen' (see Preface to RV of OT). In the obscure expression in Gn 14^{1}, where AV has 'king of nations,' RV and RSV retain *Goiim* as a proper name, although RVm offers the alternative rendering 'nations.' The same difference in rendering between AV on the one hand and RV and RSV on the other is found also in Jos 12^{23}. Böhl identifies Tidal King of Goiim in Gn 14^{1} with Tudḫalia, King of the Hittites (*ZAW*, N.F. i, 1924, 148 ff).

GOLAN.—A Levitical city and one of the three cities of refuge E. of the Jordan (Dt 4^{43}, Jos 20^{8}), assigned to the sons of Gershon (Jos 21^{27}, 1 Ch 6^{71}), in the territory belonging to the half-tribe of Manasseh in Bashan. Both the town, Golan, and a district, **Gaulanitis**, were known to Josephus (*Ant.* xiii. xv. 3 [393], xvii. viii. 1 [189]). The latter is called by the Arabs *Jōlân*. The exact site of the city is uncertain, but it is perhaps modern *Saḥem el-Jōlân*, 17 miles E. of the Sea of Galilee. G. L. R.

GOLD.—See Mining and Metals.

GOLGOTHA (Mt 27^{33}, Mk 15^{22}, Jn 19^{17}, from the Aramaic *Gulgultā'*. In Lk 23^{33} 'the place called *Kranion*' (RSV 'the skull,' AV '**Calvary,**' based on the Vulgate's *locus calvariae*)).—The situation was evidently outside the city (He 13^{12}), but near it (Jn 19^{20}); it was a site visible from a distance (Mk 15^{40}, Lk 23^{49}), and was probably near a high road (Mt 27^{39}).

Two reasons may be advanced for the name. (1) That it was a place where skulls were to be found, perhaps a place of public execution. (2) That the 'hill' was skull-shaped. This is a popular modern view. Against it may be urged that there is no evidence that Golgotha was a hill at all, for it is referred to merely as a 'place.'

Of the many proposed sites for Golgotha two have received the most attention: the traditional site and the *ez-Zāhira* hill or 'Gordon's Calvary,' strongly urged by General C. G. Gordon in 1883, following the theory of Thenius (1842). The traditional site included in the Church of the Sepulchre and in close proximity to the tomb itself has a continuous tradition attaching to it from the days of Constantine. In favour of this site it may be argued that it is unlikely that all tradition of a spot so important in the eyes of Christians should have been lost, even allowing all consideration for the vicissitudes that the city passed through between the Crucifixion and the days of Constantine. The topographical difficulties are dealt with in the discussion of the site of the second wall [see Jerusalem, 6], but it may safely be said that investigations have certainly tended in recent years to reduce them. With regard to the *ez-Zāhira* hill outside the Damascus gate, its claims are based upon the four presuppositions that Golgotha was shaped like a skull, that the present skull-shaped hill had such an appearance at the time of the Crucifixion, that the ancient road and wall ran as they do to-day, and that the Crucifixion was near the Jewish 'place of stoning' (which some modern Jews, without a basis in any tradition, have held to be situated here). All these hypotheses are extremely doubtful. E. W. G. M.—E. G. K.

GOLIATH.—A giant, said to have been a descendant of the early race of Anakim. He was slain, in single combat, by David (or, according to another tradition, 2 S 21^{19}, by Elhanan) at Ephes-dammim, before an impending battle between the Philistines and the Israelites. That this 'duel' was of a religious character comes out clearly in 1 S $17^{43, 45}$, where we are told that 'the Philistine cursed David by his gods,' while David replies, 'And I come to thee in the name of the Lord of hosts.' The fact that David brings the giant's sword as an offering into the sanctuary at Nob points in the same direction. Goliath is described as being 'six cubits and a span' in height, *i.e.* over nine feet, at the likeliest reckoning; his armour and weapons were proportionate to his great height. Human skeletons have been found of equal height, so that there is nothing improbable in the Biblical account of his stature. The flight of the Philistines on the death of their champion could be accounted for by their belief that the Israelite God had shown Himself superior to their god (but see 2 S 23^{9-12}, 1 Ch 11^{12ff}); see, further, David, Elhanan.

W. O. E. O.

GOMER.—1. One of the sons of Japheth and the father of Ashkenaz, Riphath, and Togarmah (Gn 10^{2f}, 1 Ch 1^{5f}), who along with Togarmah is included by Ezekiel in the army of Gog (Ezk 38^{6}). Gomer represents the people termed *Gimirrâ* by the Assyrians, and **Cimmerians** by the Greeks. Their original home appears to have been north of the Euxine, but by the 7th cent. B.C. they had completely conquered Cappadocia and settled there.

2. Daughter of Diblaim, wife of the prophet Hosea (q.v.). L. W. K.

GOMORRAH.—See Plain [Cities of the].

GOMORRHA.—AV form of **Gomorrah** (q.v.) in Apocrypha and NT.

GOODMAN.—The only occurrence of this English word in the OT is Pr 7^{19} (AV, RV; RSV 'my husband'). The Hebrew is simply 'the man'; but as the reference is to the woman's husband, 'goodman,' still used in Scotland for 'husband,' was in 1611 an accurate rendering. In the NT the word occurs (in AV and RV; but never in RSV) twelve times (always in the Synoptic Gospels) as the translation of *oikodespotēs*, 'master of the house.' The same Greek word is translated 'master of the house' or 'householder' in Mt 10^{25} $13^{27, 52}$ 20^{1} 21^{33}, Lk 13^{25}.

GOPHER WOOD (Gn 6^{14}), of which the Ark was constructed, was by tradition cypress wood, and this, or else the cedar, may be inferred as probable.

E. W. G. M.

GORGIAS.—A general of Antiochus Epiphanes, who is described as one of the 'mighty men among the king's friends (1 Mac 3^{38}), and 'a general and a man of experience in military service' (2 Mac 8^{9}). When Antiochus set out on his Parthian campaign 166 or 165 B.C., his chancellor, Lysias, who was charged with the suppression of the revolt in Palestine, dispatched a large army to Judaea, under the command of Ptolemy, Nicanor, and Gorgias. The fortunes of the war are described in 1 Mac 3^{40}–4^{25} $5^{16ff, 55ff}$, 2 Mac 8^{12-29} 10^{14ff} 12^{32ff}; Jos. *Ant.* xii. vii. 4 [305–308], viii. 6 [351–353].

GORTYNA.—The most important city in Crete, after Cnossus, situated about midway between the two ends of the island. It is named (1 Mac 15^{23}) among the autonomous States and communes to which were sent copies of the decree of the Roman Senate in favour of the Jews.

GOSHEN.—1. An unknown city in Judah (Jos 15^{51}). **2.** An unknown territory in S. Palestine, probably the environs of **1** (Jos 10^{41}). **3.** A division of Egypt in which the children of Israel were settled between Jacob's entry into Egypt and the Exodus. It was a place of good pasture, on or near the frontier of Palestine, and plentiful in vegetables and fish (Nu 11^{5}). It cannot be defined with exactness. Jth 1^{9f} is probably wrong in including the names of Tanis and Memphis in Goshen. The LXX reads 'Gesem of Arabia' in Gn 45^{10} 46^{34}, elsewhere 'Gesem.' Now Arabia is defined by Ptolemy, the geographer, as an Egyptian name on the East border of the Delta of the Nile, and this seems to be the locality most probably contemplated by the narrator. It runs eastwards from opposite the modern *Zagazig* (Bubastis) to the Bitter Lakes and includes the long shallow valley

known as the *Wâdî Ṭumilât*. There seems to be no Egyptian origin for the name and it is most probably of Semitic origin, as is suggested by its occurrence outside Egyptian territory. R. A. S. M.—T. W. T.

GOSPEL.—This word (originally **god spel**, *i.e.* 'good tidings,' later understood as 'God-story') represents Greek *euangelion*, which reappears in one form or another in ecclesiastical Latin and in most modern languages. In classical Greek the word means the reward given to a bearer of good tidings (so 2 S 4^{10} LXX in plural), but afterwards it came to mean the message itself. In 2 S 18$^{20, 22, 25}$ [LXX] a cognate word is used in this sense. In NT the word means 'good tidings' about the salvation of the world by the coming of Jesus Christ. It is not there used of the written record. A genitive case or a possessive pronoun accompanying it denotes: (*a*) the person or the thing preached (the Gospel of Christ, or of peace, or of salvation, or of the grace of God, or of God, or of the Kingdom, Mt 4^{23} 9^{35} 24^{14}, Mk 1^{14}, Ac 20^{24}, Ro 15^{19}, Eph 1^{13} 6^{15} etc.); or sometimes (*b*) the preacher (Mk 1^{1} (?), Ro 2^{16} 16^{25}, 2 Co 4^{3} etc.); or rarely (*c*) the persons preached to (Gal 2^{7}).

Difficulty is found in defining the meaning in a few of the passages where 'of God,' 'of Christ,' etc., follow the word (subjective or objective genitive ?). As God is author of the Gospel and His saving acts its matter, and as Christ both commissions the preacher and is the content of the message the emphasis may fall on one or other of these aspects (Mk 1^{14} RSV, Ro 1^{1} 15^{16}, 2 Co 11^{7}, 1 Th 2$^{2, 8f}$, 1 P 4^{17}; Mk 1^{1}, Ro 1^{9} 15^{19} 1 Co 9^{12}, Gal 1^{7}, 1 Th 3^{2} etc.). 'The gospel' is often used in NT absolutely, as in Mk 1^{15} 8^{35} 14^{9} RSV, 16^{15}, Ac 15^{7}, Ro 11^{28}, 2 Co 8^{18} (where the idea must not be entertained that the reference is to Luke as an *Evangelist*), and so 'this gospel,' Mt 26^{13}; but English readers should bear in mind that usually (though not in Mk 16^{15}) the EV phrase 'to preach the gospel' represents a simple verb of the Greek. The noun is not found in Luke or Hebrews, and only once in the Catholic Epistles and in the Johannine writings (1 P 4^{17}, Rev 14^{6}, 'an eternal gospel'—an angelic message). In Ro 10^{16} 'the gospel' is used absolutely of the message of the OT prophets.

The written record was not called 'the Gospel' till a later age. By the earliest generation of Christians the oral teaching was the main thing regarded; men told what they had heard and seen, or what they had received from eye-witnesses. As these died out and the written record alone remained, the perspective altered. The earliest *certain* use of the word in this sense is in Justin Martyr (*c* A.D. 150: 'The Apostles in the Memoirs written by themselves, which are called Gospels,' *Apol.* i. 66; cf 'the Memoirs which were drawn up by His Apostles and those who followed them,' *Dial.* 103). In earlier writings (Ignatius, the *Didache*) 'the gospel' or 'His gospel' seems to refer to the body of tradition, written or oral, rather than to a single written Gospel. The earliest known titles of the Evangelic records (which however, we cannot assert to be contemporary with the records themselves) are simply 'According to Matthew,' etc. A. J. M.—A. B.

GOSPELS.—Under this heading we consider the four Gospels as a whole, and their relations to one another, leaving detailed questions of date and authorship to the separate articles.

1. General form and characteristics.—Each of the Gospels would originally be written on a roll of papyrus, though there is definite evidence that Christians in the early 2nd cent. used copies in the form of paged books (codices). Mt, Lk, and Jn would each fill a roll of normal length (about 30 feet), Mk one about two-thirds of that size. This raises the question whether the limitations of a papyrus roll have influenced the form of the narrative sections of the Gospels. The brevity of some sections of Mt and Lk may be partly so explained, but in general we must seek the explanation in the forms of the tradition received by the Evangelists and in their own interests and purposes. It may be confidently affirmed that all four Gospels were written in Greek. Behind them lies the earliest tradition in Aramaic, the language of Palestine in the time of Jesus; there are many indications, notably in the poetical form of much of Jesus' teaching, that at some stage Aramaic sources were translated into Greek; and some difficult expressions in our Gospels have been explained as mistranslations from Aramaic (Dalman, Burney, Black). But the theory of some scholars (as Torrey) that our Gospels are themselves translations has not won favour in view of the evidence that the Evangelists used and edited sources already existing in Greek.

All four Gospels give an account of the ministry, death, and resurrection of Jesus. The presence of four such accounts in NT is itself a fact of great significance. We must suppose that at first each Gospel had a local currency and favour. As others became known, differences would be obvious. The Fourth Gospel is distinct in substance and style from the first three (the Synoptics) and they by variation combined with close resemblance seem even more to be in competition. But the Church has followed neither of the 2nd cent. attempts to remove the seeming offence—Tatian's harmony, the *Diatessaron*, and Marcion's selection of Lk. The Church has been content with a plurality of Gospels. It has thus rejected a rigid literalism and has preferred a fourfold account enriched by its diversity. This satisfaction with variety is shown also in the history of the text. In the course of MS transmission before the invention of printing it was natural that there should be a tendency to assimilation of text (frequently retained in AV, removed in RV, RSV) in parallel passages of the Synoptic Gospels. But the surprising thing is that such assimilation was not thoroughly and deliberately done. Even the diversity between the two forms of the Lord's Prayer (Mt 6^{9ff}, Lk 11^{2ff}) where liturgical use must have encouraged assimilation most strongly, was only partly removed (cf Lk 11^{2ff} in AV and RSV).

2. The aims and interests of the Evangelists.—For a clear understanding of the Gospels we must subordinate the elaborations made by preachers, commentators, and artists through the centuries and even such early external evidence on the occasion and authorship of the Gospels as has reached us, and draw our inferences from a close study of the writings themselves. In two of the Gospels an explicit statement of purpose is given. Luke in his preface (1$^{1-4}$) states that others had already written Gospel narratives, that he and they depended for their authority on eye-witnesses who were also 'ministers of the word,' and that his purpose was to write an orderly and reliable account of the events which were the basis of the Church's preaching and instruction. The Fourth Gospel (Jn 20^{31}) was written to induce and confirm belief. These statements and the contents of all four Gospels lead us to negative and positive conclusions. (*a*) The Gospels are not like modern biographies, though many attempts have been made to expand the Gospels and construct Lives of Jesus. Biography seeks to relate all the principal events of the life described, whereas the Gospels are silent about many things which from a biographical interest we would wish to know, and they aim at producing faith by describing a few significant incidents taken out of a much larger whole. Penetrating psychological insight marks many passages of the Gospels, but we cannot say that psychological portraiture is a predominant interest in them as it is in modern biography. Similarly, the Gospels are not impartial histories written with scientific objectivity, though we must give full weight to their dependence on eye-witness testimony and to their closeness in time to the events recorded. Nor are they the product of literary ambitions on the part of the authors. (*b*) Positively, the Gospels record, with faithfulness to the authentic tradition combined with a certain freedom in the handling of it, events deemed to be of supreme religious significance. They are the product of faith based upon historical events, and in that sense theological works, and their form and content are adapted to the

needs and mission of the 1st cent. Greek-speaking Christian communities.

3. The Synoptic Gospels.—(*a*) *The Marcan source.*—The first three Gospels are called Synoptic because they give the same general survey of the ministry of Jesus. They have (sometimes all three, sometimes two) a large number of passages in common, and when these are placed side by side and compared, it is seen that the correspondence goes beyond the sharing of topics to the use of the same or similar words, arrangement of sentences and passages, and treatment of detail. The likeness goes far beyond what might be expected from three writers independently relating the same series of facts. What, then, are their sources? The outstanding fact when comparison is made throughout the Gospels is that almost the whole substance of Mk is found also, often with a high degree of verbal correspondence, in Mt or Lk or both. Only some thirty of Mk's 661 verses have no parallel either in Mt or Lk, and these include some which are merely descriptive expansions of narrative. This fact, taken by itself, would admit of various explanations.

The order of Mk is also preserved in Mt or Lk or both. At no important point do they agree in this respect against Mk. Matthew's deviations from Mark's order, more numerous than Luke's, actually are a tribute to his use of Mk, as we can reasonably assign motives for the changes. After 4^{22} (=Mk 1^{20}) where Matthew has been following Mk closely, he meets in the next verse of Mk a reference to Jesus' teaching. Immediately he prepares the setting for the Sermon on the Mount, bringing up 1^{39} and $3^{7f.\ 10}$ from later points in Mk for this purpose. At the close of the Sermon he returns to the Marcan context exactly where he left it ($7^{28f.}$, Mk 1^{22}). Mark here opens an account of Jesus' healing ministry characteristically with an exorcism. Matthew prefers to put at the head of the miracles the healing of a leper, brought up from Mk $1^{40ff.}$ To group representative miracles he further brings up from later in Mk the stilling of the storm, the cure of the Gadarene demoniac (two in Mt), the raising of Jairus' daughter, and the healing of a woman with issue of blood (Mt 8^{23-34} 9^{18-26}, Mk 4^{35-41} 5^{1-43}). Matthew has now used his source up to 2^{23}, where Mark relates the controversy about the disciples' plucking of grain on the Sabbath. Matthew seems to regard this as the appropriate point to relate the appointment of the Twelve and their mission (10^{1-25}, later in Mk, 3^{13-19} 6^{7-13} 13^{9-13}). The plucking of the grain is taken up at Mt 12^{1}, and thence to the end of the Gospel, except for bringing the cursing and the withering of the fig-tree together (21^{18-22}), Mt has no deviation from the Marcan order. Thus all Matthew's variations from Marcan order are seen to fit the hypothesis that Mk is prior to and a source of Mt. Lk has more omissions of Marcan material (especially Mk 6^{45}–8^{26}) but usually preserves Mark's order. A notable feature of Luke's method is the substitution in other contexts of alternatives to sections of Mk which he omits (*e.g.* Lk 4^{16-30} 5^{1-11} 7^{36-50} 10^{25-28}, cf Mk 6^{1-6} 1^{16-20} 14^{3-9} 12^{28-34}). Such facts prove a *literary* relationship between the Synoptic Gospels and point to Mk, substantially as we have it, as a source of the other two. They also point to the insufficiency of other views once held, such as the Oral Theory which supposed that a *continuous* Gospel narrative originating from the Apostles was transmitted orally and committed to writing by the Evangelists as an aid to memory, and the Theory of a Primitive Aramaic Gospel independently translated into Greek by Matthew, Mark, and Luke.

The full confirmation of Marcan priority comes from a study of detail. The literary relationship is shown by the occurrence of parentheses—not at all likely in oral transmission—(Mt 9^{6}=Mk 2^{10}=Lk 5^{24}; Mt $14^{3ff.}$, Mk $6^{17ff.}$ contrast the position of Lk $3^{19f.}$; Mt 24^{15}, Mk 13^{14}) and the literary priority of Mk is shown by improvements of Mk's sometimes uncouth Greek or redundancies (*e.g.* 13^{19} 1^{32} 2^{25} and ‖ s). The preservation of the original Aramaic words of Jesus is another sign that Mk is primitive (5^{41} 7^{34} 15^{34}). Mt and Lk heighten expressions of reverence for Jesus (Mk 4^{38}, 'Teacher, do you not care if we perish?', Mt 8^{25}, 'Save, Lord; we are perishing,' Lk 8^{24}, 'Master, master, we are perishing'; Mk $6^{5f.}$, cf Mt 13^{58}). Mk has much vivid descriptive detail absent from the other Gospels but attractive to the modern mind. He is not an abbreviator of Mt (Augustine) nor of Lk. His is a shorter Gospel, but why, if working on Mt, should he omit half of it while expanding what he uses? Mk, probably because of the fuller record of Jesus' teaching in Mt and Lk, appears to have been rather neglected in early centuries. Its importance has been realized with the advance of modern literary and historical study.

(*b*) *Non-Marcan material common to Mt and Lk.*—Mt and Lk show agreement in passages, amounting to over 200 verses, which are not found in Mk. There are, however, instances of overlapping with Mk, parallel accounts and numerous duplicated sayings ('doublets,' distinguished as Marcan and non-Marcan by their context). Overlapping is seen in the Temptation narratives, the Beelzebul section, the parable of the Mustard Seed, etc.; parallel accounts in the Mission of the Twelve and of the Seventy, separate in Lk ($9^{1ff.}$ $10^{1ff.}$), combined in Mt ($9^{35ff.}$ $10^{1ff.}$); cf Mk $6^{6ff.}$ The degree of verbal correspondence varies in these non-Marcan passages; in some so slight (*e.g.* Mt $25^{14ff.}$, Lk $19^{11ff.}$) that they seem unlikely to come from the same source, but in others so close (*e.g.* Mt 3^{7-10}, Lk 3^{7-9}; Mt 6^{24-33}, Lk 16^{13} 12^{22-31}; Mt 23^{37-39}, Lk $13^{34f.}$) that it seems necessary to suppose a written Greek original. Most of this material consists of the teaching of Jesus. It is natural, therefore, to connect it with the statement of Papias (*c* A.D. 140, quoted by Eusebius *HE* iii. 39) that (the Apostle) 'Matthew composed the sayings (logia) in the Hebrew language, and each one translated (? interpreted) them as he could.' Accordingly, the non-Marcan source of Mt and Lk has been named the Logia or the Sayings-document; commonly it is denoted by the symbol Q (German *Quelle*, source). The latter is preferred because the material consists of narrative as well as sayings (*e.g.* Lk $4^{3ff.}$ $7^{18ff.}$ $10^{1ff.}$ and ‖s in Mt). The connexion of narrative and teaching (note how the healing of the centurion's servant follows closely on the Great Sermon in both Mt $8^{5ff.}$ and Lk $7^{1ff.}$) points to a single source. Its order is more likely preserved in Lk than in Mt, as Matthew's method is to gather all his material at the appropriate places in the Marcan outline. But attempts to reconstruct Q (as by Harnack) or even to delimit its content must be tentative. As the Passion Narratives of Mt and Lk have nothing in common where they depart from Mk it is unlikely that Q was a complete Gospel. The teaching of Jesus preserved in the Great Sermon of Mt and Lk and in other Q passages contains some of the most treasured portions of the Gospel records.

(*c*) *Material found in one Synoptic Gospel only.*—Peculiar to Mk are a parable ($4^{26ff.}$), two miraculous healings ($7^{31ff.}$ $8^{22ff.}$), one or two sayings of Jesus ($9^{49f.}$), an incident at the arrest of Jesus ($14^{51f.}$), also some brief remarks ($3^{20f.}$ $7^{1f.}$ 11^{16}) and descriptive details.

The special material of Mt, apart from the Infancy narrative which is ‖ to Luke's but independent of it, is easily analysed into two parts. On the one hand there are sayings of Jesus, such as those incorporated in the Sermon on the Mount, parables, denunciations of the scribes and Pharisees, additions to the Marcan eschatological passages. These show some of the interests prominent in this Gospel, such as the fulfilment of OT prophecy, Jesus' attitude to the Jewish law, and life within the Church community. Some scholars assign this sayings material to a written source (symbol M) circulating first in Jerusalem. The other part of Mt's special material consists mainly of a few short narratives which seem to be expansions of the earlier traditions (14^{28-31} $17^{24ff.}$ $27^{3-10, 19, 24f., 51-53, 62ff.}$ $28^{2-4, 11-15}$).

Luke in the greater part of his Gospel presents the Marcan material in blocks of some length (as 5^{12}–6^{19}

8^{4}–9^{50} 18^{15}–^{43} 19^{28}–22^{13}) alternating with blocks in which Q is combined with narrative and teaching peculiar to this Gospel (symbol L). L is extensive, amounting, if the Infancy narratives are included, to about half of the Gospel, and it contains many of the most familiar and most moving passages of the NT. The alternation of Q plus L with Marcan material up to 22^{13}, the considerable departure from Mk in the Passion narrative following, and other facts have led to the Proto-Luke theory adopted by some scholars. According to this, Luke or a predecessor had already combined Q and L into a Gospel covering the whole ministry of Jesus from His Baptism to the Resurrection; into this Luke inserted sections of Mk to form our third Gospel. The effect of this theory is to give L as a *written* source a somewhat earlier date than otherwise might be assigned to it. The theory is disputed, and the establishment of the earlier date for L is not vital for its authenticity.

Questions of date and origin will be found discussed in the separate articles, but it may be useful to state, in concluding this survey of Synoptic sources, one scholar's assignment of dates and places of origin: Mk, A.D. 60, Rome; Q, A.D. 50, Antioch; M, A.D. 65, Jerusalem; L, A.D. 60, Caesarea; Mt, A.D. 85, Antioch; Lk, A.D. 80, Corinth? (B. H. Streeter). Many date Mk a few years later, and the other dates must be regarded as approximate.

4. Form history.—Behind the Gospels and their sources lies the period between the events of Jesus' life and the committal to writing of the traditions. How did the tradition develop in this period? The investigation of this question has led to the form-historical method which is applied to all the NT writings but bears specially on the Synoptic Gospels. It is assumed that at first there was no connected Gospel such as we possess (the Passion story would be the first to be given in continuity), that the tradition circulated in small units used in preaching, instruction, etc., and that the form of the tradition underwent development as it was adapted to the changing situation of the Church. Form-history attempts to analyse and as it were to disentangle the distinctive elements in the NT contributed by the earliest Palestinian Christian circle, by the Hellenistic Jewish and Gentile Christian communities before Paul, by Paul himself, and by post-Pauline Christians, and also by movements in the non-Christian Gentile world—gnosticism, the mystery religions and so on. The analysis is valuable. In the Gospels it distinguishes Pronouncement-stories, culminating in a saying of Jesus important to the early Christians (*e.g.* Mk 3$^{1-6}$ on Sabbath-healing, 10$^{1-9}$ on adultery, 12$^{13-17}$ on tribute to Caesar); Miracle-stories (*e.g.* Mk 1$^{40-45}$ 4$^{35-41}$); Stories about Jesus (Baptism, Temptation, Rejection at Nazareth, Transfiguration, Last Supper, Crucifixion; Groups of Sayings; Parables; and it is illuminating to connect each such form with the purpose for which it may have been useful in the early Church. Form-criticism, however, has tended to stress the creative activity of the Church in the shaping of the tradition, and to shift the centre of historical certainty from the events of Jesus' ministry to a later scene. It seems right that this tendency should be balanced by attention to the factor of testimony in the Gospel records. Not only is it probable that the testimony of the original eye-witnesses would be valued and preserved, but there are many positive indications that the fundamental principle of testimony—'At the mouth of two witnesses, or at the mouth of three witnesses, shall the matter be established' (Dt 19^{15} AV)—had a formative influence on the Gospel narrative. The incidents in which Peter figures along with one or more of the other disciples may rightly be considered in this connexion, and be viewed in the light of the belief of the 2nd cent. Church that Mark received his information from the preaching of Peter (*e.g.* Papias, see article MARK—GOSPEL ACCORDING TO). Though the Gospel message has been passed on as shaped by men of Christian faith, it can be maintained that the history in its essentials has been substantially preserved and that the historical scepticism to which some form-critics have been led is not justified. See CRITICISM, 4.

5. Relation of the Fourth Gospel to the Synoptics.—Each of the Synoptic writers has made a specific contribution to the Gospel story (see the separate articles). Their common characteristics may be indicated in a comparison with the Fourth Gospel.

(*a*) *Literary.*—The Synoptics record a great number of varied events and short pregnant sayings of Jesus. John builds up his Gospel round a few incidents with which are associated dialogue and extended discourses. This different treatment makes it difficult to decide how far John was dependent on the earlier Gospels. Certainly there is considerable verbal correspondence with Mk in a few passages and striking agreement with Mk in some words and phrases (*e.g.* Jn 12^{3,5}, Mk 14^{3,5}; Jn 6^{7}, Mk 6^{37}; Jn 5^{8f}, Mk 2^{11f} RSV 'pallet') and some correspondence in substance with Lk (Martha and Mary, details of the Passion, Resurrection appearances). If a literary relation to the Synoptics is granted, John may have written to supplement and complete the Synoptic account (the view generally held till modern times), to interpret it by way of commentary, or to supersede it. It is not necessary to hold exclusively to one of these views in every place where Jn has a connexion with the Synoptics.

(*b*) *Chronology and Geography.*—The idea that Jesus' ministry lasted for three years is derived from John, who mentions Passovers and other feasts (2^{13} 5^{1} 6^{4} 7^{2} 10^{22} 12^{1}). In the Synoptics precise marks are wanting; there is a continuous series of actions which might even be crowded into one year, as some early Fathers believed, thus interpreting 'the acceptable year of the Lord' (Is 61^{2}, Lk 4^{19}). The cleansing of the Temple is placed by John at the beginning of the ministry (2^{13ff}), by the Synoptists at the end (Mk 11^{15ff}) where it brings hostility to Jesus to a head. The outstanding chronological difference is the date of the Crucifixion. All four Gospels agree that the Crucifixion took place on a Friday, but in Jn Jesus dies on the day of preparation for the Passover (14th of the month Nisan), in the Synoptics after the Passover Supper (15th Nisan). There are indications in the Synoptics of tradition agreeing with Jn (Mk 14^{2}, Mt 26^{5}) and of activity not likely to be permitted on 15th Nisan (Mk 15^{21,42f,46}); on the other hand symbolical appropriateness (Jesus dying at the hour when the Passover lambs were slain) may have influenced John's account. This difference has been noticed from the earliest times. Present opinion is divided on the historical point.

The Synoptists lay the scene of the ministry for the most part in Galilee, John in Judaea. In neither case, however, is interest confined to the one region. In the Synoptics the final journey to Jerusalem begins as early as Mk 10^{1}, Mt 19^{1}, Lk 9^{51}. The disciple Judas belongs to Kerioth, in Judaea. Jesus knows Joseph of Arimathaea (Lk 23^{51}), the household at Bethany (Mk 14^{3}), and places near and in Jerusalem (Mk 11^{1ff} 14^{12ff}). The lament over Jerusalem (Mt 23^{37}, Lk 13^{34}) implies previous visits during the ministry. On the other hand John records visits to Samaria and Galilee (2^{1ff} 4^{1ff} 6^{1}–7^{10}). It is therefore not difficult to reconcile the Synoptic and Johannine accounts here; but the interest in Judaea shown in the Fourth Gospel has a bearing on its authorship.

(*c*) *Miracles and discourses.*—The miracles in the Synoptics are numerous and varied, works of power prompted by compassion and expressive of Jesus' Messianic mission. In Jn there is a selection of a few which have been described as 'downright wonders of omnipotence.' They do not admit of psychological or other natural explanation. Cures of demoniacs, which others could work, are absent. Yet these miracles are not set before us as in themselves the ground of faith. They are 'signs,' pointing to the wine of a new dispensation, to the light of the world, to Him who is the Resurrection and the Life, and so on. So they lead to discourses, composed in a flowing style which contrasts

strikingly with the short pithy sayings frequent in the Synoptics, and which in matter deal mostly with Christ Himself—His origin, His relation to the Father, His glory, and the gift of eternal life which He bestows. This teaching, and especially the claims made by John for Jesus and by Jesus Himself, are in the terms of a more advanced theology than that of the Synoptics, and a major historical question is raised by the fact that in Jn they are publicly proclaimed from the beginning of Jesus' ministry, whereas in the Synoptics it is not till Peter's confession at Caesarea Philippi (Mk 8^{27ff} and ‖ s) that anything approaching the truth of the Master's vocation and Person is disclosed to the disciples. (The 'Messianic secret' is a dominant theme in Mk.) These differences are relative. There are sayings of the Fourth Gospel which resemble those of the Synoptics (*e.g.* 2^{16} $12^{8,25}$ $13^{16,20}$) and at least one instance in the Synoptic account (Mt 11^{27}, Lk 10^{22}) where Jesus speaks in the manner of the Fourth Gospel. There are unique claims, invitations, challenges, assertions in the Synoptics as well as in Jn (Lord of the Sabbath, Mk 2^{28}; restating the Law, Mt $5^{17,21f}$ etc.; the eschatological Son of Man, Mk 8^{38} 14^{62}; the future Judge, Mt 25^{31ff}; His death a ransom for many, Mk 10^{45} cf 14^{22ff}). The historical differences, also, are less obtrusive if we bear in mind that there are different ways of writing history, even in the 20th cent.

The distinction in style and matter is, however, a real one. Parables of the Synoptic type are absent; instead we have allegorical pictures, the Shepherd (ch. 10), the Vine (ch. 15). There is less about the Kingdom of God, more about the Holy Spirit; less of detailed ethical guidance, more about the supreme principle of love; less of apocalyptic eschatology, more of the abiding presence of Christ and the Spirit. Clearly the earlier tradition has been reshaped by reflection; but Christians have always felt that John brings to light its deepest truth.

(*d*) *The portrait of Jesus.*—Clement of Alexandria (*c* A.D. 200) states that he learned from 'the ancient elders' that John, last of the Evangelists, seeing that the external (literally 'bodily') facts had already been sufficiently set forth in the other Gospels, composed, at the request of his disciples and with the inspiration of the Spirit, a 'spiritual' Gospel (quoted by Eusebius *HE* vi. 14). While this justly recognizes a distinction between the Synoptic and Johannine portraits it is misleading; it suggests that the Synoptics deal with the human Jesus, Jn with the Divine Christ—too sweeping a generalization. If in the Synoptics Jesus' Sonship is rather conceived as pertaining to His Messianic vocation than as an eternal relationship to the Father, yet the Synoptic Messiah clearly is endowed with supernatural powers. In Mt and Lk He has a miraculous birth. He teaches and forgives with authority. Sayings on His Sonship show Him in a special relation both to God and men (Mk 9^{37} and ‖ s; Mt 10^{40}, Lk 10^{16}; Mk 13^{32}, Mt 24^{36}). Prominent in the Synoptics is the title 'Son of Man.' It has sometimes been understood to denote simply Jesus' humanity, His participation in human experience. But the Son of Man of apocalyptic prophecy is a resplendent supernatural being, and this self-designation of Jesus carries in the Synoptics a significance which bare 'humanity' does not convey. The title is found also in Jn, where it has special association with descending and ascending (including elevation on the Cross) and moves easily to and from the idea of the Son of God (1^{51} 3^{13-18} 5^{25-27} $6^{27,53ff}$ 8^{28} 12^{23ff} 13^{31}). But in the Synoptics it brings to a focus the whole intention of Jesus' Messianic vocation.

On the other hand the humanity of Jesus is stressed in Jn. The Word became flesh (1^{14}). Jesus' mother and brethren are mentioned in a natural way. He has normal human friendships. He describes Himself as a man (8^{40}). He suffers from weariness, thirst, grief (*e.g.* 4^{6-9} 19^{28} 11^{35}). Even in relation to God He shares much with men, His followers; obedience, subordination to the Father's will is emphasized (4^{34ff} 6^{38} 8^{28} 14^{28} 15^{10} 17^{4}).

The diversity of the portraits, however, remains. There is a wider range of human experience and emotion in the Synoptic Gospels. Compassion is emphasized, wrath and astonishment are attributed to Jesus. He wrestles with temptation. In Jn too (against docetism) the full humanity of Christ is affirmed, but all is subordinated to the theme of the Divine origin, powers, and glory of the Son of God. Diversity is not contradiction. The Synoptics from three standpoints give a portrait diverse from that of the Fourth Gospel, but all are united in their tribute to the one historical person. At no other period could the Gospels have been produced. They are unique works centring upon a unique historical revelation.

6. Early use of the Gospels.—The accidental discovery of Christian papyrus fragments (Pap^{52}, Egerton Pap^{2}) has shown that the Fourth Gospel circulated in Egypt early in the 2nd cent., and it is no longer necessary to counter the former arguments that the Gospels were works of 2nd cent. writers out of reach of the authentic history. In the extant Christian writings of the first half of that century we find that where there is occasion to refer to the events (and especially to the teaching) recorded in our Gospels the writers do not quote formally, naming authors, but in a way that suggests loose quotation from memory, or the survival of oral tradition alongside the written Gospels, or possibly the use of harmonies. Thus some of their allusions are difficult to identify; but allowing for this uncertainty we note the following indications of knowledge of the Gospels: (*a*) the period A.D. 90–120—Clement of Rome (96) Lk, ? Mt; Ignatius (*c* 115) Mt, ? Jn; Polycarp (*c* 115) Mt, ? Mk, 1 Jn, ? Jn; (*b*) of uncertain date, but may be placed in the period A.D. 120–150—*Didache*, Mt, ? Lk; Papias, Mk, also reference to a work by 'Matthew,' 1 Jn, ? Jn; Barnabas, ? Mt; *Shepherd* of Hermas, first quotation closely corresponding to Mk. (*c*) At mid-century Justin almost certainly means our four when he writes of 'memoirs which, I say, were composed by His Apostles and those who followed them' (*Dial.* 103), but he quotes inexactly, chiefly Mt, Lk. Tatian (*c* A.D. 170) makes of the four Gospels a harmony, the *Diatessaron*. (*d*) With Irenaeus (*c* A.D. 180) begins the period of definite and extensive quotation; for him there are only four canonical Gospels, and this in the nature of things. From the end of the century Clement of Alexandria, Tertullian, Origen, and their successors in all geographical regions quote from the undisputed four. **A. J. M.—A. B.**

GOSPELS, APOCRYPHAL.—See APOCRYPHAL NEW TESTAMENT.

GOTHIC VERSION OF OT.—See GREEK VERSIONS OF OT, 11.

GOTHOLIAH.—Father of Jeshaiah, who returned with Ezra, 1 Es 8^{33} (AV, RV **Gotholias**); called in Ezr 8^{7} **Athaliah,** which was thus both a male and a female name (2 K 11^{1}).

GOTHOLIAS, 1 Es 8^{33} (AV, RV).—See GOTHOLIAH.

GOTHONIEL.—The father of Chabris, one of the rulers of Bethulia (Jth 6^{15}).

GOURD (*kîḳāyôn*, Jon 4^{6}; *paḳḳū'ôth*, 2 K 4^{39}).—The Hebrew *kîḳāyôn*, translated 'colocynth' (LXX) or 'ivy' (Vulgate), is certainly a gourd of some kind. It is generally equated with the Egyptian *kꜣkꜣ*=Greek *kiki*, which is identified as *ricinus communis*; but the equation of the Egyptian *k* with the Hebrew *ḳ* is irregular, except perhaps in foreign loan-words. The Assyrian *kukkānîtum*, which is the name of an unknown plant, must be similarly ruled out of the discussion (Thompson, *Assyrian Botany*, 132, n. 2). The *ricinus communis* or *palma Christi*, if the identification is accepted (Arias *ap.* Celsus, *Hierobotanicon*, II. 273–83), is found in waste places, especially near water, in Palestine and the neighbouring countries and it grows very rapidly (Pliny, *NH* xv. 7 § 25) to a height of some 12 feet, putting forth huge leaves which afford some shade; but it is hardly suitable for training over a booth (Jon 4^{6}). The plant meant, therefore, is

rather the 'bottle-gourd' (*cucurbita pepo* or *lagenaria*), which is very commonly trained over trellises and booths in the Middle East; it grows very quickly and withers as quickly (Tristram, *Natural History of the Bible*[2], 449–50, and Moldenko, *Plants of the Bible*, 203–204).

The Hebrew *paḳḳū'ôth* denotes a plant whose fruit bursts (cf Heb. *pāḳa'*, 'split') and is of a reddish-yellow colour (cf Arab. *faqa'a*, 'was deep yellow,' and *faqi'a*, 'was red'); and it is described as a vine whose fruit is toxic (2 K 4[40]). Accordingly it may be safely taken as '(wild) colocynth' (*citrullus colocynthus*), which is a true vine prostrate on the ground and climbing by means of tendrils and which produces fruit of the size and colour of an orange; this bursts when trodden, has an intensely bitter taste and is highly toxic; further, it grows profusely in Palestine and may easily be mistaken for a melon (Tristram, *op. cit.* 451–52, and Moldenko, *op. cit.* 78–9). The LXX's 'wild colcynth' and the Vulgate's *colocynthides agri*, the cognate Assyrian *piqû*, 'wild cucumber, colocynth,' and the Syrian *paqû'â* 'colocynth' (or the similar *cucumis prophetarum*), as well as experiments on dogs, which have shown that its poisonous effects can be counteracted by eating bread (Macht in the *Jewish Quarterly Review*, N.S. x [1917], 185–97), all confirm this identification. The 'knobs' (Heb. *p'ḳā'îm*) in Solomon's Temple (1 K 6[18] 7[27]) were ornaments carved in the shape of wild colocynths. See also KNOP, **2.**

G. R. D.

GOVERNMENT.—The purpose of this article will be to sketch in outline the forms of government among the Hebrews at successive periods of their history. The indications are in many cases vague, and it is impossible to reconstruct the complete system; at no period was there a definitely conceived, still less a written, constitution in the modern sense. For fuller details reference should be made throughout to the separate articles on the officials, etc., mentioned.

We may at once set aside *Legislation*, one of the most important departments of government as now understood. In ancient communities, law rested on Divine command and immemorial custom, and could as a rule be altered only by 'fictions.' The idea of avowedly new legislation to meet fresh circumstances was foreign to early modes of thought. At no period do we find a legislative body in the Bible. Grote's dictum that 'The human king on earth is not a law-maker, but a judge,' applies to all the Biblical forms of government. The main functions of government were judicial, military, and at later periods financial, and to a limited extent administrative.

1. *During the nomadic or patriarchal age* the unit is the family or clan, and, for certain purposes, the tribe. The head of the house, owing to his position and experience, was the supreme ruler and judge, in fact the only permanent official. He had undisputed authority within his family group (Gn 22, 38[24], Dt 21[18], Jg 11[34]). Heads of families make agreements with one another and settle quarrels among their dependents (Gn 21[22] 31[45]); the only sanction to which they can appeal is the Divine justice which 'watches' between them (31[49, 53] 49[7]). Their hold over the individual lay in the fact that to disobey was to become an outlaw; and to be an outcast from the tribe was to be without protector or avenger. The heads of families combined to form, in a somewhat more advanced stage, the **'elders'** (Ex 3[16] 18[21], Nu 22[7]); and sometimes, particularly in time of war, there is a single chief for the whole tribe. Moses is an extreme instance of this, and we can see that his position was felt to be unusual (Ex 2[14] 4[1], Nu 16). It was undefined, and rested on his personal influence, backed by the Divine sanction, which, as his followers realized, had marked him out. This enables him to nominate Joshua as his successor.

2. *The period of the* **'Judges'** marks a higher stage; at the same time, as a period of transition it appeared rightly to later generations as a time of lawlessness. The name 'Judges,' though including the notion of champion or deliverer, points to the fact that their chief function was judicial. The position was not hereditary, thus differing from that of king (Jg 9 ff Gideon and Abimelech), though Samuel is able to delegate his authority to his sons (1 S 8[1]). Their status was gained by personal exploits, implying Divine sanction, which was sometimes expressed in other ways; *e.g.* gift of prophecy (Deborah, Samuel). Their power rested on the moral authority of the strong man, and, though sometimes extending over several tribes, was probably never national. During this period the nomadic tribe gives way to the local; ties of place are more important than ties of birth. A town holds together its neighbouring villages ('daughters'), as able to give them protection (Nu 21[25, 32], Jos 17[11]). The **elders** become the 'elders of the city'; Jg 8[6, 14, 16] mentions officials (*śārîm*) and elders of Succoth, *i.e.* heads of the leading families, responsible for its government. In 11[5] the elders of Gilead have power in an emergency to appoint a leader from outside.

3. *The Monarchy* came into being mainly under the pressure of Philistine invasion. The **king** was a centre of unity, the leader of the nation in war, and a judge (1 S 8[20]). His power rested largely on a personal basis. As long as he was successful and strong, and retained the allegiance of his immediate followers, his will was absolute (David, Ahab, Jehu; cf Jer 36, 37). At the same time there were elements which prevented the Jewish monarchy from developing the worst features of an Oriental despotism. At least at first the people had a voice in his election (David, Rehoboam). In Judah the hereditary principle prevailed (there were no rival tribes to cause jealousy, and David's line was the centre of the national hopes), but the people still had influence (2 K 14[21] 21[24]). In the Northern Kingdom the position of the reigning house was always insecure, and the ultimate penalty of misgovernment was the rise of a new dynasty. A more important check was found in the religious control, democratic in its best sense, exercised by the prophets (Samuel, Nathan, Elijah, Elisha, Jeremiah, etc.). The Jewish king had at least to hear the truth, and was never allowed to believe that he was indeed a god on earth. At the same time there is no constitutional check on misrule; the 'law of the kingdom' in Dt 17[14] deals rather with moral and religious requirements as no doubt did Jehoiada's covenant (2 K 11[17]). With the kingdom came the establishment of a standing army, David's 'mighty men' quickly developing into the more organized forces of Solomon's and later times. The command of the forces was essential to the king's power; cf the insurrection of Jehu 'the captain' (2 K 9), and Jehoiada's care to get control of the army (11[4]). Side by side with the power of the sword came the growth of a court, with its harem and luxurious *entourage*, its palace and its throne. These were visible symbols of the royal power, impressing the popular mind. The lists of officers (2 S 8[16], 1 K 4) are significant; they indicate the growth of the king's authority, and the development of relations with others States. The real power of government has passed into the hands of the king's *clientèle*. His servants hold office at his pleasure, and, provided they retain his favour, there is little to limit their power. They may at times show independence of spirit (1 S 22[17], Jer 36[25]), but are usually his ready tools (2 S 11[14]; cf the old and the young counsellors of Rehoboam, 1 K 12[6ff]). The prophetic pictures of the court and its administration are not favourable (Am 3[9] 4[1] 6, Is 5 etc.). The methods of raising revenue were undefined, and being undefined were oppressive. We hear of gifts and tribute (1 S 10[27], 2 S 8[10], 1 K 4[7, 21–23] 10[11–25]), of tolls and royal monopolies (10[15, 28f]), of forced labour (5[13]) and of the 'king's mowings' (Am 7[1]), of confiscation (1 K 21), and, in an emergency, of stripping the Temple (2 K 18[15]). In time of peace the main function of the king is the administration of justice (2 S 15[2], 2 K 15[5]); his subjects have the right of direct access (2 K 8[3]). This must have lessened the power of the local **elders**, who no doubt had also to yield to the central court officials. 'The elders of the city' appear during this period as a local

authority, sometimes respected and consulted (2 S 19[11], 1 K 20[7], 2 K 23[1]), sometimes the obedient agents of the king's will (1 K 21[8, 11], 2 K 10[1, 5]). 2 Ch 19[5-11] describes a judicial system organized by Jehoshaphat, which agrees in its main features with that implied by Dt 16[18] 17[8-13]; there are local courts, with a central tribunal. In Deuteronomy the elders appear mainly as judicial authorities, but have the power of executing their decisions (19[12] 21, 22[15] etc.). The influence of the priesthood in this connexion should be noticed. The administration of justice always included a Divine element (Ex 18[15, 19] 21[6] 22[8]; cf the word 'Torah'), and in the Deuteronomic code the priests appear side by side with the lay element in the central court (17[9] 19[17]; cf Is 28[7], Ezk 44[24] etc.). But the government is not yet theocratic. Jehoiada relies on his personal influence, and acts in concert with the chiefs of the army (2 K 11, 12), and even after the Exile Joshua is only the fellow of Zerubbabel. The appointment of Levites as judges, ascribed to David in 1 Ch 23[4] 26[29], is no doubt an anachronism. Cf also article JUSTICE (II.).

4. *Post-exilic period.*—Under the Persians Judaea was a subdistrict of the great province west of the Euphrates, and subject to its governor (Ezr 5[3]). It had also its local governor (Neh 5[14]), with a measure of local independence (Ezr 10[14]); we read, too, of a special official 'at the king's hand in all matters concerning the people' (Neh 11[24]). The **elders** are prominent during this period both in exile (Ezk 8[1] 14[1] 20[1]) and in Judaea (Ezr 5[9] 6[7] 10[8], Neh 2[16]). The chief feature of the subsequent period was the development of the priestly power, and the rise to importance of the office of the **high priest.** Under Greek rule (after 333 B.C.) the Jews were to a great extent allowed the privileges of self-government. The 'elders' develop into a *gerousia* or **senate**—an aristocracy comprising the secular nobility and the priesthood (1 Mac 12[6] 14[20]); it is not known when the name 'Sanhedrin' was first used. The High Priest became the head of the State, and its official representative, his political power receiving a great development under the Hasmonaeans. Owing to the growing importance of the office, the Seleucids always claimed the power of appointment. In 142 B.C., Simon is declared to be 'high priest, captain, and governor for ever' (1 Mac 14[27-47]). The title 'ethnarch' (see GOVERNOR) is used of him and other high priests. Aristobulus becomes king (105 B.C.), and Alexander Jannaeus uses the title on coins (104–78 B.C.). Under Roman rule (63 B.C.) the situation becomes complicated by the rise to power of the Herodian dynasty. Palestine passed through the varying forms of government known to the Roman Imperial constitution. Herod the Great was its titular king, with considerable independence subject to good behaviour (*rex socius*). Archelaus forfeited his position (A.D. 6). Thenceforward Judaea was under the direct rule of a procurator (see next article), except from A.D. 41 to 44, when Agrippa I. was king. Antipas was 'tetrarch' of Galilee and Peraea; Mark's title of 'king' (6[14]) is corrected by Matthew and Luke. The position was less honourable and less independent than that of king. The High Priest (now appointed by the Romans) and the Sanhedrin regained the power which they had lost under Herod; the government became once more an aristocracy (Jos. *Ant.* XX. x. [224 ff]). Except for the power of life and death, the Sanhedrin held the supreme judicial authority; there were also local courts connected with the Synagogue (Mt 5[22]). Its moral authority extended to Jews outside Palestine. In the Diaspora, the Jews, tenacious of their national peculiarities, were in many cases allowed a large measure of self-government, particularly in judicial matters. In Alexandria, in particular, they had special privileges and an 'ethnarch' of their own (Jos. *Ant.* XIV. vii. 2 [117]). For the cities of Asia Minor, see Ramsay, *Letters to the Seven Churches*, chs. xi, xii.

For '**governments**' (1 Co 12[28] AV, RV) see HELPS.

C. W. E.—J. Pn.

GOVERNOR.—This word represents various Hebrew and Greek words, technical and non-technical. In Gn 42[6] (Joseph, cf 41[40]) it is probably the *Ta-te*, the second after the king in the court of the palace; cf 1 K 18[3], Dn 2[48] for similar offices. It frequently represents an Assyrian word, *peḥāh*, used of Persian satraps in general (Est 3[12] 8[9]), and of Assyrian generals (2 K 18[24], cf 1 K 20[24]). It is applied particularly to Tattenai, the governor of the large Persian province of which Judaea was a sub-district (Ezr 5[3] 6[6] etc., cf Neh 2[7]). It is also, like *tirshatha* (q.v.), applied to the subordinate governor of Judaea (Ezr 5[14] [Sheshbazzar] 6[7], Hag 1[1, 14] [Zerubbabel]). The first passage shows that the subordinate *peḥāh* was directly appointed by the king.

In the NT the word usually represents Greek *hēgemōn*, and is used of Pontius Pilate (Lk 3[1] etc.), of Felix (Ac 23[26]), and of Festus (26[30]). The proper title of these governors was '**procurator**' (Tac. *Ann.* xv. 44), of which originally *eparchos* and then *epitropos* were the Greek equivalents. Josephus, however, uses *hēgemōn*, as well as these words, for the governor of Judaea, so that there is no inaccuracy in its employment by NT writers. But, being a general word, it does not help us to decide the nature of the 'governorship' of Quirinius (Lk 2[2]). The procurator, originally a financial official, was appointed directly by the Emperor to govern provinces, such as Thrace, Cappadocia, and Judaea, which were in a transitional state, being no longer ruled by subject kings, but not yet fully Romanized, and requiring special treatment. The procurator was in a sense subordinate to the legate of the neighbouring 'province,' *e.g.* Cappadocia to Galatia, Judaea to Syria; but except in emergencies he had full authority, military, judicial, and financial. In 1 P 2[14] the word is specially appropriate to any provincial governor, as 'sent' by the Emperor. In 2 Co 11[32] it represents '**ethnarch**,' a word apparently used originally of the ruler of a nation (*ethnos*) living with laws of its own in a foreign community; but as applied to Aretas it may mean no more than petty king. In Gal 4[2] it means '**trustee**' (RSV) or '**steward**' (RV), the 'guardian' (AV 'tutor') controlling the ward's person, the steward of his property (Lightfoot, *ad loc.*). In Ja 3[4] RSV has 'pilot' (RV 'steersman'). The '**governor of the feast**' (Jn 2[8] AV; RV 'ruler,' RSV 'steward') was probably a guest, not a servant, chosen to control and arrange for the feast; it is doubtful whether he is to be identified with the 'friend of the bridegroom' or best man. C. W. E.

GOZAN.—One of the places to which Israelites were deported by the king of Assyria on the capture of Samaria (2 K 17[6] 18[11], 1 Ch 5[26]; mentioned also in 2 K 19[12], Is 37[12]). It is probably modern *Tell Ḥalâf* situated on the banks of the *Khābūr*.

GRACE, from Latin *gratia* (favour), a translation of *charis*, NT term for God's good-will and His empowering of His people. This specific use is common through NT, although there are other associated meanings (*e.g.* favour, pleasingness, thanks, and thankfulness).

The primary meaning of the OT passages in which the Hebrew original is employed seems to suggest 'finding' or 'securing' the 'favour' or 'good-will' of God (see Gn 6[8]); likewise the 'favour' or 'good-will' of one's fellow men (Gn 39[4]). This same usage is found in NT in several places, *e.g.* Lk 2[52]. The associated OT sense of 'loving-kindness' or 'mercy' (as in Ps 77[9]) is also reproduced in NT, with the difference that whereas the former tends to think of God's mercy towards His sinful and finite children, the latter consistently speaks of His gracious attitude.

One other usage should be noted before attention is given to the main NT view of grace. In several passages, the word appears to denote 'charm' or 'attractiveness,' as in Lk 4[22] and Co 4[6]. This also is a continuation of an OT meaning, as in Ps 45[2].

The principal meaning of grace in NT, however, has reference to the good-will (the Divine favour) of God to men; associated with this is God's empowering them, by His favour, to be pleasing to Him. It is chiefly in the

Pauline epistles that this set of ideas is expounded, although elsewhere, as in the Johannine prologue (Jn 1$^{14-17}$), the same teaching is found either directly or by implication. In the Pauline writings, the word 'grace' occurs twice as often as in all the rest of NT; it is plainly a favourite conception of the Apostle, who uses it to sum up God's attitude and action towards His children. For Paul, grace is given by God to men, apart from any merit on their part; there is no place in his writings for such a later theological refinement as, *e.g.* 'grace of congruity.' God, of His own will and because His nature essentially is love, acts towards men in grace, winning from them their response to His prevenient action—a response which itself is a gracious one in that it is of God's effecting as primary source. On the other hand, the Apostle does not imply that men need make no effort, moral or religious; his view is that such 'work' is consequent upon, and the manifestation of, the gift of grace from God. A modern writer has suggested that for Paul the basic meaning of grace is 'God's love in action towards men'; this definition rightly suggests that for Paul the concept is not simply that of 'favour,' but is a dynamic idea, including within it the sense of the Divine activity in empowering the men whom God regards with favour.

For the Apostle, the summation of God's grace towards men is seen in the life, death, and resurrection of Christ. For him, as for the Johannine writer, this means that God's gracious dealings are not according to law but are of a free and spontaneous character. A principal result of God's gracious work is the overcoming of sin, both in the fact of His giving His Son to men and also in God's continued activity in the lives of those who have been turned to Him through Christ.

It will be seen, then, that grace excludes all thought of 'merit' and is entirely in opposition to a legal conception of religion. Deliverance from such a legal or commercial idea was the consequence of Paul's conversion; therefore he could speak only of the freely given, unmerited, and extra-legal nature of God's dealing with sinners.

Because of the close identification which NT makes, especially in Paul and the Fourth Gospel, between the grace of God and the total fact of Christ, it is possible to speak (as Paul does, *e.g.* in 2 Co 8^{9}, and in the so-called 'grace of the Lord Jesus Christ," 13^{14}) of this grace as being Christ's as well as the Father's. There seems to be both identity and difference in Ro 5^{15}, where the grace of God and the grace of Christ are implied as distinct and yet at one. It is from such passages as these that the Church found material for developing a trinitarian conception, as well as from the basic facts of apostolic experience of the Father, Christ, and the Holy Spirit.

In some modern writing, there has been a tendency to identify the Holy Spirit and the grace of God. This view cannot properly be sustained on the basis of NT evidence, for the Holy Spirit is commonly God's immanent operation, while grace appears to be not so much *in* as *towards* men. A final reference may be made to the notion in Ephesians (Eph 4^{7}) of grace as including 'gifts' for ministering—*i.e.* a *charisma*; and to the idea in Romans (5^{2}) of a continuation 'in grace,' by which is meant living with God, through Christ, in a state of constant dependence upon the Divine favour and strengthening. W. N. P.

GRACIOUS.—This English adjective is now used only in an active sense='bestowing grace,' 'showing favour.' And this is its most frequent use in AV, as Ex 33^{19} 'And [I] will be gracious to whom I will be gracious.' But it was formerly used passively also='favoured,' 'accepted,' as 1 Es 8^{80} 'Yea, when we were in bondage, we were not forsaken of our Lord; but he made us gracious (RSV 'brought us into favour') before the kings of Persia, so that they gave us food.' And from this it came to signify 'attractive,' as Pr 11^{16} 'a gracious woman retaineth honour,' literally 'a woman of grace,' that is, of attractive appearance and manner; Lk 4^{22} 'the gracious words which proceeded out of his mouth,' literally, as RV, 'words of grace,' that is, says Plummer, 'winning words'; he adds, 'the very first meaning of *charis* is comeliness, winsomeness.'

GRAFF.—Obsolete form of 'graft' found in AV in Ro 11$^{17ff.}$

GRAFTING.—In the cultivation of the olive, which was common throughout the ancient Mediterranean world (see Oil, Oil Tree, and Olive), grafting of cultivated branches upon the stock of the wild olive was a universal practice. In Ro 11$^{17-24}$ Paul reverses the process for the purpose of illustrating his point, the dependence of the Gentiles upon the Jews; but he says that the process he is describing is 'contrary to nature.' Much of the discussion in modern times of Paul's supposed ignorance of horticulture, and his assumed mistaking of the oleaster for the wild olive, and other absurdities, including a considerable amount of pseudo-science provided for the occasion, would have been impossible if commentators had paid attention to Paul's own statement. Ancient Jewish parables drawn from nature (see A. Feldman, *The Parables and Similes of the Rabbis: Agricultural and Pastoral*, Cambridge, 1927, especially ch. vi.) were not intended to teach scientific agriculture, and were often allegorical in method. Here it suits Paul's purpose to describe a process 'contrary to nature' in order to convey the important lesson that the Gentiles, including his Roman readers, owed their admission to the Church (the 'true Israel') to the failure of the Jews to respond to the Gospel; they are the 'wild' branches which are being grafted on to the cultivated tree in place of the 'natural' branches which have been broken off. This is clearly not a description of the procedure of olive-growers, but an *ad hoc* illustration of what has taken place—and is still taking place—in the religious world. That it is 'contrary to nature' is not to be stressed as an example of Divine or miraculous power (though some commentators so take it); it is only a passing admission that the case is not the normal procedure in an olive grove. We must recognize the distinction between parable (q.v.) and allegory; the one relates a natural process and uses it to illustrate one point in a spiritual or moral teaching; the other conforms the narrative to the requirements or presuppositions of the religious teaching, without regard to normal procedures or probabilities. F. C. G.

GRAPES.—See Wine and Strong Drink.

GRASS.—(1) *ḥāṣîr*—equivalent of Arabic *khudra*, which includes green vegetables; many references, *e.g.* 1 K 18^{5}, 2 K 19^{26}; translated '**hay**' in AV and RV in Pr 27^{25} (RSV 'grass') and in AV in Is 15^{6} (RV, RSV 'grass'), and 'leeks' in AV, RV, and RSV in Nu 11^{5}; refers to herbage in general. (2) *deshe'* (Aram. *dethe'*), Jer 14^{5}, Pr 27^{25} (RSV 'new growth'), Job 38^{27}, Is 66^{14} (AV 'an herb,' RV 'tender grass'), Dn 4$^{15, 23}$ (EV 'tender grass'). (3) *yerek*, translated 'grass,' Nu 22^{4}; see Herb. (4) *'ēśebh*, Dt 11^{15} etc., but translated 'herb' in other places (so Dt 32^{3} RV and RSV; AV 'grass'); see Herb. (5) *chortos*, Mt 6^{30}, Mk 6^{39} etc. Pasturage, as it occurs in Western lands, is unknown in Palestine. Such green herbage appears only for a few weeks, and when the rains cease soon perishes. Hence grass is in the OT a frequent symbol of the shortness of human life (Ps 90^{5f} 103^{15}, Is 40^{6}; cf 1 P 1^{24}). Even more brief is the existence of 'the grass upon the [mud-made] house-tops, which withers before it grows up' (Ps 129^{6}). E. W. G. M.

GREAVES.—See ARMOUR, 2 (*d*).

GREECE is the fringed and island-studded southern end of the Balkan peninsula, together with the great archipelago of the Peloponnesus with which it is joined by the Isthmus of Corinth. Although much of the land is mountainous, the soil is especially good for vines and olives, but not for cereal crops. Its central mountain ranges, though not high, divide the country into many small territories or cantons, populated in ancient times by a variety of clans descended from the three invading stocks of Aeolians, Ionians, and Dorians. These invasions began *c* 1900 B.C. and were completed by *c* 1000 B.C. The 8th cent. saw the rise of city states and the founding of overseas colonies, the result of over-population at home. By *c* 500 B.C. the old monarchical rule of the cities had given way to aristocratic local governments, and these in turn to 'tyrannies,' which were followed by oligarchies or—as at Athens—by a democracy. The great crisis of the early 5th cent., the Persian invasions of 490 and 480 B.C. which were repelled by the combined forces of most of the Greek states, was followed by the rise of the Athenian sea-empire, and this by the revolt of the subjects and allies and the prolonged Peloponnesian War which ended in 404 B.C. From the lasting effects of this catastrophic struggle, an ancient 'thirty years war,' Greece never recovered. Its era of greatest brilliance, the 5th cent., was over, and its chief contributions to literature and art—but not philosophy—had now been made. For the next thirty years Sparta ruled Greece with an iron hand, but the subject states again rebelled; Thebes was in the ascendant from 371 to 362 B.C.; but the disunity and rivalries of the Greeks only prepared for the Macedonian conquest under Philip II. in 338 B.C. His son Alexander (known as the Great) succeeded him in 336 B.C., and under the pretext of freeing the Ionian cities of western Asia Minor and also in order to avenge his father's assassination, he began the conquest of the Persian Empire, which ended with the invasion of Hither India in 327–325 B.C. Alexander died in 323 B.C., at the age of thirty-three, but his work was done. The Greek language had been carried to the borders of India, and with it Greek ideas, forms of Greek art and literature, and even certain Greek religious ideas.

The age that followed is known as the Alexandrine age, or the age of Hellenism, when Hellenistic culture spread over the whole known world, from the Rhone to the Indus. The dynasties founded by Alexander's generals, especially the Seleucids in Syria and the Ptolemies in Egypt, continued the work of cultural unification and penetration, so that when Rome began to interfere in the affairs of the East, about the beginning of the 2nd cent. B.C., Greek was already the common language of that part of the world. When, about three centuries after Alexander, practically all his former dominions had become Roman provinces, Greek was the one language which could be used throughout the Mediterranean world and the Near East. The Roman Empire had two official languages, Latin for Italy and the provinces north, west, and south-west of it; Greek for every region east and south-east of Italy. The Romans wisely made no effort to force Latin upon the eastern peoples and were content to permit Greek to remain in undisputed sway. All Roman officials understood, spoke, and wrote it. Inscriptions, like the great *Monumentum Ancyranum* at Ankara, which recounted the achievements of the Emperor Augustus, were in Greek, and so were the legislative and administrative enactments affecting the eastern provinces. Thus it came about that the Christian message was proclaimed in Greek, that the NT books were all written in Greek, and that the language of the church, according to all the available evidence, remained Greek until at least the middle of the 2nd cent. A.D. Even later, in Gaul (see Irenaeus's *Against Heresies*, *c* A.D. 185, and the Letter of the Churches of Lyons and Vienne, regarding the persecution there in A.D. 177) Greek was still in use; while in Rome itself such a work as Hippolytus's *Apostolic Tradition*, A.D. 217, and parts of the Roman liturgy to this day, are evidence of its continued use.

After 200 B.C., the history of Greece becomes more and more closely allied to that of Rome until, with the annexation of Macedonia in 148 B.C. and the destruction of Corinth in 146 B.C., Greece itself became a Roman province (Achaia, as in Ac 18^{12}). Although the Greeks still continued to enjoy a measure of local autonomy, they were in reality a subject people, and found their freedom only in literature, art, and philosophy, not in political activity. A. So.—F. C. G.

GREEKS, GRECIANS.—Both these terms are used indifferently in AV of OT Apocrypha to designate persons of Greek extraction (1 Mac 1^{10} 6^{2} 8^{9}, 2 Mac 4^{36} etc.); RSV uses 'Greeks.' In NT the linguistic usage of AV and RV make a distinction between the terms 'Greeks' and 'Grecians' (RSV does not use '*Grecians*'). '*Greeks*' uniformly represents the word *Hellēnes*, which may denote persons of Greek descent in the narrowest sense (Ac 16^{1} 18^{4}, Ro 1^{14}), or may be a general designation for all who are not of Jewish extraction (Jn 12^{20}, Ro 1^{16} 10^{12}, Gal 3^{28}). '*Grecians*,' on the other hand (Ac 6^{1} 9^{29}), is AV translation of *Hellēnistai*, which means Greek-speaking *Jews* (RV '*Grecian Jews*'; RSV correctly '*Hellenists*,' q.v.). See preceding article and DISPERSION. An interesting question is that of the correct reading of Ac 11^{20}. Were those to whom the men of Cyprus and Cyrene preached Hellenists, *i.e.* Greek-speaking Jews, or Greeks? There is strong MS evidence for 'Hellenists,' but the context, and all that has gone before in Acts, from ch. 2 onwards, favours 'Greeks.' F. C. G.

GREEK VERSIONS OF OT.—I. The Septuagint (LXX).—1. The Septuagint, or Version of the Seventy, has special characteristics which differentiate it strongly from all other versions of the Scriptures; as the Greek OT of the Christian community from its earliest days, it has a special historical importance which no other version can claim, and only the Vulgate can approach. The LXX, moreover, is the only version of the OT which has a pre-Christian provenience.

2. There is no doubt that the LXX originated in Alexandria, in the time of the Macedonian dynasty in Egypt. Greeks had been sporadically present in Egypt even before the conquest of the country by Alexander, and under the Ptolemies they increased and multiplied greatly. Hundreds of documents discovered in Egypt within recent years testify to the presence of Greeks and the wide-spread knowledge of the Greek language from the days of Ptolemy Soter onwards. Among them, especially in Alexandria, were many Jews, to whom Greek became the language of daily life, while the knowledge of Aramaic, and still more of literary Hebrew, decayed among them. It was among such surroundings that the LXX came into existence. The principal authority on the classic view of its origin is the so-called *Letter of Aristeas* (edited by H. St. J. Thackeray in Swete's *Introduction to the OT in Greek* [1900], by P. Wendland in the Teubner series [1900], and by M. Hadas in the series *Jewish Apocryphal Lit.*, Dropsie College Edition [1951]). This document, which purports to be written by a Greek official of high rank in the court of Ptolemy II. (Philadelphus, 285–247 B.C.), narrates that it was Demetrius of Phalerum who suggested that the *Law* of the Jews should have a place in the royal library at Alexandria, and accordingly at Ptolemy's command preparations were made for carrying the plan into effect. An embassy was dispatched to Eleazar, the High Priest at Jerusalem, who sent six elders from each of the twelve tribes, or seventy-two men in all, to Alexandria to make the desired version. They brought with them de luxe manuscripts of the Pentateuch, and after they had been fêted by Ptolemy, the seventy-two translators were given quarters on the island of Pharos in the harbour of Alexandria, where they performed their labours in seventy-two days; the document ascribed to Aristeas adds: 'as if this coincidence had

been the result of some design.' At any rate, this correspondence of numbers is a mere literary embellishment. It should be noted, however, that Aristeas makes room for editorial harmonization ' by mutual comparisons,' adding : ' The appropriate result of the harmonization was reduced to writing under the direction of Demetrius.' Even though this document is regarded as not contemporary and as spurious, at any rate it presents a plausible account of the editorial method of producing the Greek Pentateuch. On the contrary, Philo maintains that each of the translators independently arrived at the same phraseology by Divine inspiration, and this view of identical verbal agreement among the various interpreters was further elaborated by some of the Church Fathers. The date of Aristeas is uncertain. E. Bickermann makes 145 B.C. the upper limit ; H. G. Meecham favours 100 B.C. M. Hadas prefers a date shortly after 132 B.C. as reasonable. The name Aristeas is a pseudonym, and the author, a Jew, was Hellenized in all but religion.

Originally the term Septuagint was applied to the Pentateuch and only later was extended to the entire Greek Old Testament ; it may be more accurate to speak of the Old Greek, but so long as we limit the name LXX to the original translation to the exclusion of later recensions, we shall avoid confusion of terminology. On the basis of the account in Aristeas we might assume that seventy was merely a convenient approximation for the original number seventy-two. Josephus (*Ant.* XII. ii. 7 [57]) gives seventy as the number of translators, although immediately before he refers to the traditional number of six from each tribe. Another origin of the figure, however, has been suggested. Thus there were seventy elders of Israel with Moses, Aaron, and Abihu at Sinai (Ex $24^{1, 9}$; cf Nu 11^{16}). There also were seventy members of the Sanhedrin. In Lk 10^{1} Jesus appointed seventy other disciples, but here some MSS read seventy-two. In other words, the figure seventy was rather prominent in Jewish thought. If seventy be the original number of translators, then Aristeas chose the multiple of twelve nearest to seventy. The whole matter is uncertain and encrusted with legend, but the name LXX endures. It may, however, not be especially significant to know precisely how many interpreters were employed on the Pentateuch and exactly when the work was done. The important thing is that we have the LXX, that it is pre-Christian, that it represents a pre-Massoretic text, that it is of great value in OT textual and exegetical studies, and that it is indispensable in the study of NT language and theology.

P. E. Kahle (cf *The Cairo Geniza* [Schweich lectures, 1941]) maintains that there were earlier translations of the Pentateuch, of which a revision was made in the time of Ptolemy, which became the standard Torah. For the other books of the OT he also postulates independent Greek renderings. In other words, he does not believe that there was one original Old Greek version. This is in contrast to P. de Lagarde, who saw the problem involved and the methodology for recovering the text of the original LXX. He was followed by A. Rahlfs (*Septuaginta Studien*, 3. Heft, 1911), who is also the editor of a complete text of the LXX (Stuttgart, 1935). A thoroughgoing attempt at establishing the text of one LXX book on Lagardian principles was made by M. L. Margolis, *The Book of Joshua in Greek*, 1931. The methods initiated by Lagarde were successfully applied by J. A. Montgomery in his two commentaries in the *ICC* : *Daniel* (1912) and *Kings* (1951). In this connexion should be mentioned the editorial work of J. Ziegler in the Göttingen LXX ; cf also H. M. Orlinsky, ' On the Present State of Proto-LXX Studies,' *JAOS* lxi (1941), 81–91, and *Max Leopold Margolis—Scholar and Teacher* (1952), pp. 35–44 ; P. Katz, ' Das Problem des Urtextes in der LXX,' *ThZ* v (1949), 1–24.

3. That the *Letter of Aristeas* is substantially right in assigning the original translation of the Law to the time of one of the early Ptolemies there is no reason to doubt ; but the story has the air of having been considerably embellished, and it is impossible to say where history stops and fiction begins. Demetrius of Phalerum probably never was chief of the Alexandrian Library, but he was in favour with Ptolemy I. Upon the accession of Ptolemy Philadelphus in 285 B.C. he was banished and later died in exile ; accordingly he can hardly have been the prime mover in bringing about the rendering of the Pentateuch into Greek. It will be observed that Aristeas speaks only of ' the Law,' *i.e.* the Pentateuch ; and there is no reason to doubt that this was the first part of the OT to be translated, and that the other books followed at different times and from the hands of different translators. A lower limit for the completion of the work, or of the main part of it, is given in the prologue to Sirach (written probably in 132 B.C.), where the writer, in speaking of ' the law itself and the prophets and the rest of the books ' (*sc.* the Hagiographa), implies that they had been already translated. It may therefore be taken as fairly certain that the LXX as a whole was produced between 285 and 150 B.C.

4. Its character cannot be described in a word. It is written in Greek, which in vocabulary and accidence is substantially that *koinē dialektos*, or Hellenistic Greek, which was in common use throughout the empire of Alexander, and of which our knowledge, in its non-literary form, has been greatly extended by the discoveries of Greek papyri in Egypt. In its syntax, however, it is strongly tinged with Hebraisms, which give it a distinct character of its own. The general tendency of the LXX translators was to be very literal, and they repeatedly followed Hebrew usage (notably in the use of pronouns, prepositions, and participial constructions) to an extent which runs entirely counter to the genius of the Greek language. [Cf H. St. J. Thackeray, *A Grammar of the OT in Greek* (1909) and the Introduction to *Selections from the Septuagint*, by F. C. Conybeare and St. George Stock (1905). For the Hebraic character of LXX Greek cf H. S. Gehman *V.T.* i (1951), 81–90 ; iii (1953), 141–148.] The quality of the translation varies in different books. It is at its best in the Pentateuch, which was probably the most deliberately prepared portion of the translation. It is at its worst in the Prophets, which presented the greatest difficulties in the way of interpretation. Sometimes it is necessary to refer to the Hebrew text in order to understand the Greek of the LXX ; in some cases Greek words are used rather arbitrarily with a distinct Hebrew meaning. Something has been done to distinguish the work of different translators. [See H. St. J. Thackeray in *JThSt* iv, 245, 398, 578, viii, 262; also *The Septuagint and Jewish Worship* (Schweich Lectures, 1920).] It has been shown that Jeremiah is probably the work of two translators, who respectively translated chs. 1–28 and 29–51 (in the Greek order of the chapters), the latter, who was an inferior scholar, being responsible also for Baruch. Ezekiel likewise shows traces of two translators, one taking chs. 1–27 and 40–48, the other 28–39. The Minor Prophets form a single group, which has considerable affinities with the first translators of both Jeremiah and Ezekiel. Isaiah stands markedly apart from all of these, exhibiting a more classical style, but less fidelity to the Hebrew. 1 Kings (=1 Samuel) similarly stands apart from 2–4 Kings, the latter having features in common with Judges.

5. Some other features of the LXX must be mentioned, which show that each book, or group of books, requires separate study. In Judges the two principal MSS (Codd. A and B, see below, **10**) differ so extensively as to show that they represent different recensions. In some books (notably the latter chapters of Exodus, 3 K 4–11, Pr 24–29, Jer 25–51) the order of the LXX differs completely from that of the Hebrew, testifying to an arrangement of the text quite different from that of the Massoretes. Elsewhere the differences are not in arrangement but in contents. This is especially the case in the latter chapters of Jos., 1 Kings (=1 Samuel) 17–18, where the LXX omits (or the Hebrew adds) several verses ; 3 K 8 and 12, where the LXX incorporates material from some other

source; Ps 151, which is added in the LXX; Job, the original LXX text of which was much shorter than that of the Massoretic Hebrew; Esther, where the Greek has large additions, which now appear separately in our Apocrypha, but which are an integral part of the LXX; Jeremiah, where small omissions and additions are frequent; and Daniel, where the LXX includes the episodes of Susanna, Bel and the Dragon, and the Song of the Three Children, which have now been relegated (in obedience to Jerome's example) to the Apocrypha.

6. The mention of the Apocrypha suggests the largest and most striking difference between the LXX and the Hebrew OT, namely, in the books included in their respective canons; for the Apocrypha, as it stands to-day in our Bibles, consists (with the exception of 2 (4) Esdras and the Prayer of Manasseh) of books which form an integral part of the LXX canon, but were excluded from the Hebrew canon when that was finally determined about the end of the 1st cent. [see CANON OF OT]. Nor did these books stand apart from the others in the LXX as a separate group. The historical books (1 Esdras, Tobit, Judith, and sometimes Maccabees) have their place with Chronicles, Ezra, Nehemiah; the poetical books (Wisdom, Sirach) stand beside Proverbs, Ecclesiastes, and Canticles; and Baruch is attached to Jeremiah. The whole arrangement of the OT books differs, indeed, from the definite order of the Massoretic Text. The latter has its three fixed divisions—(i) the Law, *i.e.* the Pentateuch; (ii) the Prophets, consisting of the Former Prophets (Joshua, Judges, 1–4 Kings) and the Latter Prophets (Isaiah, Jeremiah, Ezekiel, and the Minor Prophets); (iii) the Hagiographa, including Psalms, Job, Proverbs, Ruth, Canticles, Ecclesiastes, Lamentations, Esther, Daniel, Ezra, Nehemiah, Chronicles. But the LXX attaches Ruth to Judges, Chronicles, and Ezra-Nehemiah to Kings, Baruch and Lamentations to Jeremiah, and Daniel to the three Major Prophets. Its principle of arrangement is, in fact, different. In place of divisions which substantially represent three different stages of canonization, it classifies the books in groups according to the character of their subject-matter—Law, History, Poetry, and Prophecy. The details of the order of the books differ in various MSS and authoritative lists, but substantially the principle is as here stated; and the divergence has had considerable historical importance. In spite of the dissent of several of the leading Fathers, such as Origen and Athanasius, the LXX canon was generally accepted by the early Christian Church. Through the medium of the Old Latin Version it passed into the West, and in spite of Jerome's adoption of the Hebrew canon in his Vulgate, the impugned books made their way back into all Latin Bibles, and have remained there from that day to this. [For an explanation of the curious misapprehension whereby 1 Esdras (on which see **17**) was excepted from this favourable reception in the Latin printed Bibles, and relegated to an appendix, see an article by Sir H. Howorth in *JThSt* vii (1906), 343]. Luther and the English translators followed Jerome in adopting the Hebrew canon, and relegated the remaining books to the Apocrypha. The authority attaching to the LXX and Massoretic canons respectively is a matter of controversy which cannot be settled offhand; but the fact of their divergence is certain and historically important.

7. If the LXX had come down to us in the state in which it was at the time when its canon was complete (say in the 1st cent. B.C.), it would still have presented to the critic problems more than enough, by reason of its differences from the Hebrew in contents and arrangement, and the doubt attaching to its fidelity as a translation; but these difficulties are multiplied tenfold by the modifications which it underwent between this time and the date to which our earliest MSS belong. It has been shown above that the LXX was the Bible of the Greek-speaking world at the time when Christianity spread over it. It was in that form that the Gentile Christians received the OT; and they were under no temptation to desert it for the Hebrew Bible (which was the property of their enemies, the Jews), even if they had been able to read it. The LXX consequently became the Bible of the early Christian Church, to which the books of the NT were added in course of time. But the more the Christians were attached to the LXX, the less willing became the Jews to admit its authority; and from the time of the activity of the Rabbinical school of Jamnia, about the end of the 1st cent. A.D., to which period the fixing of the Massoretic canon and text may be assigned with fair certainty, they definitely repudiated it. This repudiation did not, however, do away with the need which non-Palestinian Jews felt for a Greek OT; and the result was the production, in the course of the 2nd cent., of no less than three new translations. These translations, which are known under the names of Aquila, Theodotion, and Symmachus, are described below (**15–18**); here it is sufficient to say that they were all translated from a Hebrew text very close to the Massoretic OT, and represent it with different degrees of fidelity, from the pedantic verbal imitation of Aquila to the literary freedom of Symmachus. By the beginning of the 3rd cent. there were, therefore, four Greek versions of the OT in the field, besides portions of others which will be mentioned below.

8. Such was the state of things when Origen (A.D. 185–253), the greatest scholar produced by the early Church, entered the field of textual criticism. His labours therein had the most far-reaching effect on the fortunes of the LXX, and are the cause of a large part of our difficulties in respect of its text to-day. Struck by the discrepancies between the LXX and the Hebrew, he conceived the idea of a vast work which should set the facts plainly before the student. This was the **Hexapla**, or sixfold version of the OT, in which two Hebrew texts and four versions were set forth in six parallel columns. The six columns were as follows—(1) the Hebrew text; (2) the same transliterated in Greek characters; (3) the version of Aquila, which of all the versions was the nearest to the Hebrew; (4) the version of Symmachus; (5) his own edition of the LXX; (6) the version of Theodotion. In the case of the Psalms, no less than three additional Greek versions were included, of which very little is known; they are called simply *Quinta*, *Sexta*, and *Septima*. Elsewhere also there is occasional evidence of an additional version having been included; but these are unimportant. A separate copy of the four main Greek versions was also made, and was known as the Tetrapla; according to H. M. Orlinsky (*World Congress of Jewish Studies*, 1947 [1952]), however, the Tetrapla was no separate work, but was a loose term referring to the four Greek columns of the Hexapla. The principal extant fragment of a MS of the Hexapla (a 10th cent. palimpsest at Milan, containing about eleven Psalms) omits the Hebrew column, but makes up the total of six by a column containing various isolated readings. The only other fragment is a 7th cent. leaf discovered at Cairo in a *genizah* (room for damaged and disused synagogue MSS), and now at Cambridge. It contains Ps $22^{15-18, 20-28}$, and has been edited by Dr. C. Taylor (*Cairo Genizah Palimpsests*, 1900). Origen's Hebrew text was substantially identical with the Massoretic; and Aquila, Symmachus, and Theodotion, as has been stated above, were translations from such an original; but the LXX, in view of its wide and frequent discrepancies, received special treatment. Passages present in the LXX, but wanting in the Hebrew, were marked with an obelus (— or ÷); passages wanting in the LXX, but present in the Hebrew, were supplied from Aquila or Theodotion, and marked with an asterisk (*); the close of the passage to which the signs applied being marked by a metobelus (: or ·/. or ×). In cases of divergences in arrangement, the order of the Hebrew was followed (except in Proverbs), and the text of the LXX was considerably corrected so as to bring it into better conformity with the Hebrew. The establishment of such a conformity was in fact Origen's main object, though his conscience as a scholar and his reverence for the LXX did not

allow him altogether to cast out passages which occurred in it, even though they had no sanction in the Hebrew text as he knew it.

9. The great MSS of the Hexapla and Tetrapla were preserved for a long time in the library established by Origen's disciple, Pamphilus, at Caesarea, and references are made to them in the scholia and subscriptions of some of the extant MSS of the LXX (notably ℵ and Q). So long as they were in existence, with their apparatus of critical signs, the work of Origen in reconciling the Greek and Hebrew texts of the OT could always be undone, and the original text of the LXX substantially restored. But MSS so huge could not easily be copied, and the natural tendency was to excerpt the LXX column by itself, as representing a Greek text improved by restoration to more authentic form. Such an edition, containing Origen's fifth column, with its apparatus of critical signs, was produced early in the 4th cent. by Pamphilus, the founder of the library at Caesarea, and his disciple Eusebius; and almost simultaneously two fresh recensions of the LXX were published in the two principal provinces of Greek Christianity, by Hesychius at Alexandria, and by Lucian at Antioch (†311/312). The appearance of Lucianic readings preceding Lucian along with their occurrence in Old Latin texts has raised problems, and accordingly an Ur-Lucian or a pre-Lucianic version native to Antioch and Syria has been postulated. It is from these three recensions that the majority of the extant MSS of the LXX have descended; but the intricacies of the descent are indescribably great. In the case of Hexaplaric MSS, the inevitable tendency of scribes was to omit, more or less completely, the critical signs which distinguished the true LXX text from the passages imported from Aquila or Theodotion; the versions of Aquila, Theodotion, and Symmachus have disappeared, and exist now only in fragments, so that we cannot distinguish all such interpolations with certainty; Hexaplaric, Hesychian, and Lucianic MSS acted and reacted on one another, so that it is very difficult to identify MSS as containing one or other of these recensions; and although some MSS can be assigned to one or other of them with fair confidence, the majority contain mixed and undetermined texts.

10. The materials for its solution are, as in the NT, threefold—Manuscripts, Versions, Patristic Quotations; and these must be briefly described. The earliest MSS are fragments on papyrus, some of which go back to the 2nd and 3rd cents., and one even to the 1st or 2nd cent. B.C. The total number of papyrus fragments is now considerable. Those of substantial value are the following:

U. British Museum Papyrus 37. This, the first Biblical papyrus to be discovered, comes from Thebes and was acquired by the British Museum in 1836. It contains the greater part of Ps 10–34.

X. Freer Greek MS V, at Washington, D.C. (probably latter part of 3rd cent.), Am 1^{10} to end of Malachi.

905 Oxyrhynchus P. 656, Bodleian Library, early 3rd cent., parts of 4 leaves containing fragments of Genesis.

911 Berlin, Staatsbibliothek Gr. fol. 66 I, II, 32 leaves, probably 4th cent., a great part of Genesis as far as 35^{8}.

919 Heidelberg LXX P. 1, containing parts of Zec 4^{6}–Mal 4^{5}.

952 British Museum, P. 2486, early 4th cent., Song of Songs 5^{12}–6^{10}.

957 John Rylands Library, P. Gr. 458, 2nd cent. B.C., Dt 23^{24}–24^{3} 25^{1-3} $26^{12, 17-19}$ 28^{31-33}.

961 Chester Beatty P. IV, Gn 9^{1}–44^{22}.

962 Chester Beatty P. V, Gn 8^{13}–9^{1} 24^{13}–25^{21} 30^{24}–46^{33}. From papyri 911, 961, 962 we have evidence for the text of Genesis in Egypt about the end of the 3rd cent.

963 Chester Beatty P. VI, not later than the middle of 2nd cent. Portions of 50 leaves, of which 28 are substantially preserved, portions of Numbers and Deuteronomy. With the exception of 957 and Fouad 266 it is the earliest MS of the Greek Bible.

964 Chester Beatty P. XI, probably 4th cent., 2 leaves, one complete and one incomplete of Ecclestiasticus.

965 Chester Beatty P. VII, fragments of 33 leaves, first half of 3rd cent., portions of Isaiah.

966 Chester Beatty P. VIII, small portions of 2 leaves, end of 2nd cent., portions of Jeremiah.

967, 968 Chester Beatty P. IX, X, 29 imperfect leaves of a codex, Ezekiel, Daniel, Esther, first half of 3rd cent. or the borderline of 2nd and 3rd cents. Twenty-one leaves of this codex are known as the John H. Scheide Biblical Papyri, Ezk 19^{12}–39^{29} with gaps of 5 leaves. The Scheide Papyri have been deposited in the Library of Princeton University; they have been edited with commentary and various chapters by A. C. Johnson, H. S. Gehman, and E. H. Kase, Princeton University Press, 1938; cf also Gehman, *JBL*, lvii (1938), 281–287; *JAOS*, lviii (1938), 92–102; J. Ziegler, *ZAW*, lxi (1945–1948), 76–94.

2013 Leipzig P. 39, latter part of 4th cent., Ps 30–55.

2019 British Museum P. 230, end of 3rd cent., Ps 11 $(12)^{7}$–$14\ (15)^{14}$.

2055 P. Società Italiana 980, late 3rd or 4th cent., Ps 143 $(144)^{14}$–148^{3}.

P. Fouad 266, Cairo, 1st and 2nd cents. B.C., Dt 31^{28}–32^{7}. The divine name is written in Hebrew characters.

In 1950 C. H. Roberts published the first volume of a new series of papyrus fragments ranging from the 2nd to the 4th cents.

The principal vellum uncial MSS, which are of course the main foundation of our textual knowledge, are as follows (see also TEXT OF NT):

ℵ or S. *Codex Sinaiticus*, 4th cent., 43 leaves at Leipzig, 156 (besides the whole NT) in the British Museum, containing fragments of Genesis and Numbers, 1 Ch 9^{27}–19^{17}, 2 Es 9^{9} to end, Esther, Tobit, Judith, 1 and 4 Maccabees, Isaiah, Jeremiah, La 1^{1}–2^{20}, Joel, Obadiah, Jonah, Nahum–Malachi, and the poetical books. Its text is of a very mixed character. It has a strong element in common with B, and yet is often independent of it. In Tobit it has a quite different text from that of A and B. Its origin is probably composite, so that it is not possible to assign it to any one school. Its most important correctors are C^{a} and C^{b}, both of the end of the 6th or the beginning of the 7th cents., the former of whom states, in a note appended to Esdras and Esther, that he collated the MS with a very early copy, which itself had been corrected by the hand of Pamphilus.

A. *Codex Alexandrinus*, 5th cent., in the British Museum; complete except in Ps 49^{19}–79^{10} and smaller lacunae, chiefly in Genesis; 3 and 4 Maccabees are included. The Psalter is liturgical, and is preceded by the Epistle of Athanasius on the Psalter, and the *Hypotheseis* of Eusebius; a number of canticles, or chants are appended to it. The text is written by at least two scribes; the principal corrections are by the original scribes and a reviser of not much later date. It is almost certainly of Egyptian origin, and has sometimes been supposed to represent the edition of Hesychius, but this is by no means certain yet. In Judges it has a text wholly different from that of B, and in general the two MSS represent different types of text; the quotations from the LXX in the NT tend to support A rather than B.

B. *Codex Vaticanus*, 4th cent., in the Vatican; complete, except for the loss of Gn 1^{1}–46^{28}, 2 Kings (=2 Samuel) $2^{5-7, 10-13}$, Ps $105(106)^{27}$–$137(138)^{6}$, and the omission of 1–4 Maccabees. Its character appears to vary in different books, but in general Hort's description seems sound, that it is closely akin to the text which Origen had before him when he set about his Hexapla. It is probably of Egyptian origin, and is the oldest and generally the best extant copy of the Greek OT. Its quality varies in different books; in Deuteronomy, Isaiah, 1 Chronicles, and 1–2 Esdras it seems to be inferior to A, but elsewhere on the whole superior.

C. *Codex Ephraemi rescriptus*, 5th cent., at Paris; 64 leaves, palimpsest, containing parts of the poetical books.

D. *The Cotton Genesis*, 5th cent., in the British Museum; an illustrated copy of Genesis, almost wholly destroyed by fire in 1731, but partially known from collations made previously.

E. *The Bodleian Genesis*, 10th cent., Oxford, lacks Gn 14^{7}–18^{24} 20^{14}–24^{54}.

F. *Codex Ambrosianus*, 5th cent., Milan, contains Gn 31^{15}–Jos 12^{12} with numerous losses and fragments of Isaiah and Malachi.

G. *Codex Sarravianus*, 5th cent., 130 leaves at Leiden, 22 at Paris, and one at Leningrad; contains portions of the Octateuch in a Hexaplaric text, with Origen's apparatus (incompletely reproduced, however) of asterisks and obeli.

H. *Codex Petropolitanus*, 6th cent., Leningrad, a palimpsest containing portions of Numbers.

I. *Bodleian MS of Psalms*, 9th cent. In the margin it gives many readings from Aquila, Theodotion, Symmachus, the Quinta, and the Septima.

K. *Codex Lipsiensis*, 7th cent., palimpsest of 22 leaves, fragments of Numbers, Deuteronomy, Joshua, Judges.

L. *The Vienna Genesis*, 5th or 6th cent., in silver letters on purple vellum, with illustrations; contains Genesis incomplete.

M. *Codex Coislinianus*, 7th cent., Paris, Gn–3 K (1 K) 8^{40} with some losses.

N–V. *Codex Basiliano-Venetus*, 8th or 9th cent., partly in the Vatican and partly at Venice; contains portions of the OT, from Lv 13^{59}–4 Mac. Of importance chiefly as having been used (in conjunction with B) for the Sistine edition of the LXX printed at Rome in 1587.

O. *Codex Dublinensis rescriptus*, 6th cent., Trinity College, Dublin; a palimpsest of 8 leaves written in Egypt, apparently representing the text of Hesychius.

Q. *Codex Marchalianus*, 6th cent., in the Vatican; contains the Prophets, complete. Written in Egypt; its text is believed to be Hesychian, and it contains a large number of Hexaplaric signs and readings from the Hexapla in its margins, which are of great importance.

R. *Codex Veronensis*, 6th cent., at Verona; contains Psalter, in Greek and Latin, with the addition of several canticles.

T. *Zürich Psalter*, 7th cent., written in silver letters, with gold initials, on purple vellum; the canticles are included.

Γ. *Codex Cryptoferratensis*, 8th or 9th cent., in Basilian Monastery of Grotta Ferrata. It consists partly of palimpsest leaves, which once belonged to a great codex of the Prophets.

Θ. *Theta*, Codex Washingtonianus I., of the 6th cent., found in Egypt, contains Deuteronomy and Joshua.

Of minuscule MSS over 300 are known, and some of them are of considerable importance in establishing the texts of the various recensions of the LXX. Most of them are known mainly from the collations of Holmes and Parsons, which are often imperfect; the Cambridge and Göttingen editions of the LXX, now in progress, give more exact information with regard to selected representatives of them. In the edition of Holmes and Parsons no less than 277 such MSS are described. The total number of minuscules may be about 1560.

11. The Versions of the LXX are of considerable importance for identifying the various local texts. The following are the most important.

(*a*) The *Bohairic* version of Lower Egypt, the latest of the Coptic versions, and the only one which is complete. The analysis of its character is still imperfect. It is natural to look to it for the Hesychian text, but it is doubtful how far this can be assumed, and in the case of the Minor Prophets it has been denied by Deissmann as the result of his examination of the Heidelberg papyrus. In the Psalms it agrees closely with B, in the Major Prophets rather with AQ, while in the Book of Daniel it is Hexaplaric with an Egyptian or Hesychian background.

(*b*) The *Sahidic* version of Upper Egypt; Job and Psalms are extant complete, and there are considerable fragments of other books. In Psalms the text agrees substantially with that of the papyrus Psalters, and is said to be pre-Origenian, but considerably corrupted. In Job also it is pre-Origenian, and its text is shorter by one-sixth than the received text. In the Book of Daniel it was translated from Theodotion with Hexaplaric influence on an Egyptian or Hesychian background [cf H. S. Gehman, *JBL* xlvi (1927), 279–330].

(*c*) The *Syriac* versions. The Old Syriac, so important for the NT, is not known to have existed for the OT. The Peshitta appears to have been made from the Hebrew, but to have been subsequently affected by the influence of the LXX, and consequently is not wholly trustworthy for either. The most important Syriac version of the OT is the translation made from the LXX column of the Hexapla by Paul of Tella in A.D. 616–617, in which Origen's critical signs were carefully preserved; an 8th cent. MS at Milan contains the Prophets and the poetical books, while Exodus and Ruth are extant complete in other MSS, with parts of Genesis, Numbers, Joshua, Judges, and 3 and 4 Kings. The other historical books were edited in the 16th cent. from a MS which has since disappeared. This is one of the most important sources of our knowledge of Origen's work; cf H. B. Swete, *Intro. to OT in Greek* (1914), pp. 112–114.

(*d*) The *Latin* versions. These were two in number, the *Old Latin* and the *Vulgate*. On the origin of the OL, see TEXT OF THE NT. The greater part of the Heptateuch (Gn 16^{9}–Jg 20^{31}, but with mutilations) is extant in a MS at Lyons of the 5th–6th cent. Portions of the Prophets and Daniel are extant in *Codd. Wirceburgensis* (5th cent.), *Constantiensis* (5th cent.), and *Sangallensis* (9th–10th cent.). The non-Massoretic books (our Apocrypha), except Judith and Tobit, were not translated by Jerome, and consequently were incorporated in the Vulgate from the OL; Ruth survives in one MS, the Psalms in two, and Esther in several; and considerable fragments of most of the other books are extant in palimpsests and other incomplete MSS. In addition we have the quotations of Cyprian and other early Latin Fathers; cf *Corpus Scriptorum Eccl. Lat.* (Vienna, 1866–); Sabatier, P., *Latinae Ver. Ant. seu Vetus Italica* (Rheims, 1739–1749; Paris, 1751). The importance of the OL lies in the fact that its origin goes back to the 2nd cent., and it is consequently pre-Hexaplaric. Also, since its affinities are rather with Antioch than with Alexandria, it preserves readings from a type of text prevalent in Syria, that, namely, on which Lucian subsequently based his recension. This type of text may not be superior to the Alexandrian, but at least it deserves consideration. On the OL, see Kennedy in Hastings' *DB*, Burkitt's *The Old Latin and the Itala* (1896), and Montgomery, *Daniel*, *ICC*, 29–32 (1927). On the Vulgate, see article *s.v.* Since it was, in the main, a re-translation from the Hebrew, it does not (except in the Psalter) come into consideration in connexion with the LXX.

The *Arabic* versions. The expansion of Islam beyond the confines of Arabia after the death of Mohammed (632) was followed by the translation of the Bible into Arabic. Probably partial translations were prepared in the 7th cent. for Christians in the Orient. It is recorded that in 724 a version was made in Spain by John, bishop of Seville, with the intentions of helping the Christians and the Moors. Psalms, Proverbs, and the Prophets seem to be based on a Greek text resembling that of A. In the case of the Book of Daniel the text of the Paris (1645) and the London (1657) Polyglots is vastly superior to that of A, and for this book it is the best representative of the Hexaplaric text that we possess [cf H. S. Gehman, *JBL* xlv (1925), 327–352].

The *Ethiopic* versions. According to tradition Christianity was brought to Ethiopia in the time of Constantine the Great (324–337). Frumentius, a Syrian, was consecrated bishop of Ethiopia before 370, *c* 330 by Athanasius, the patriarch of Alexandria. It is possible that Frumentius began the work of rendering the Scriptures from Greek into Ethiopic or had it done under his supervision. According to another tradition the Bible was translated into Ethiopic by the Nine

Saints, who had fled after the Council of Chalcedon (451) from Syria to Egypt, whence they went to Abyssinia. Probably the translation was begun in the second half of the 4th cent. before the arrival of the Nine Saints, who may have revised the original rendering. In Kings the Ethiopic is based on a Greek text like that of B with a strong Lucianic influence. Probably these two strands may indicate the introduction of Christianity from Alexandria and from Syria. The Old Ethiopic has a decided value in LXX studies. Later the Ethiopic Bible was revised on the basis of Arabic translations [cf H. S. Gehman, *JBL* l (1931), 81–114].

The *Armenian* and *Georgian* versions. According to Moses of Chorene, an Armenian writer of the 5th cent., the first edition was translated from a Syriac text by Sahak (patriarch 390–428). It is said that by 411 Mesrop, with the aid of Rufinus, had translated the entire Bible from Greek, beginning with Proverbs; this may imply that the previous books had been rendered by unknown translators. After the Council of Ephesus (431) a Greek Bible from Constantinople was used by Sahak and Mesrop in making a revision. Subsequently Moses of Chorene and others were sent to Alexandria, and it seems that this visit had a decided influence upon the Armenian text. Generally the Armenian of the OT is based on the Hexaplaric recension. In the Book of Daniel it represents an Origenian-Constantinopolitan text, but it has agreements with the Hesychian group; an influence from Syriac is also apparent. The Armenian language is so well adapted to render the Greek literally that an Armenian codex has almost the same value for the critic as the Greek original on which it is based [cf H. S. Gehman, *ZAW*, Neue Folge vii (1930), 82–99; *Arm. Version of I and II Kings*, *JAOS* liv (1934), 53–59].

The Georgian Bible, aptly called the twin sister of the Armenian, was completed by the end of the 6th cent. The original rendering has an Armenian-Syriac foundation, but also shows some Greek influence.

The *Gothic* version was made from the Greek *c* 350 by Ulfilas, bishop of the Visigoths. The few fragments of the OT that remain show that it was rendered from the Lucianic recension.

12. The evidence of the Fathers has been less fully used for the LXX than for the NT, but its importance in distinguishing and localizing types of text is increasingly recognized.

Origen is of particular importance for his express statements on textual matters, though his declared acceptance of the Hebrew as the standard of truth has to be remembered in weighing his evidence. Much the same may be said of *Jerome*. Fathers who had no interest in textual criticism are often more valuable as witnesses to the type of text in use in their age and country. Thus *Cyril of Alexandria* gives us an Egyptian text, which may probably be that of Hesychius. *Theodoret* and *Chrysostom*, who belong to Antioch, represent the Syrian text, *i.e.* the recension of Lucian. *Cyprian* is a principal witness for the African Old Latin. The Apostolic Fathers, notably *Clement of Rome* and *Barnabas*, carry us farther back, and contribute some evidence towards a decision between the rival texts represented by A and B, their tendency on the whole being in favour of the former; and the same is the case with *Irenaeus*, *Justin*, and *Clement of Alexandria*, though their results are by no means uniform.

13. With these materials the critic has to approach the problem of the restoration of the text of the LXX. Ideally, what is desirable is that it should be possible to point out the three main recensions, those of Origen, Lucian, and Hesychius, and thence to go back to the text which lies behind them all, that of the LXX or Old Greek. Some progress has been made in this direction. Some MSS are generally recognized as being predominantly Lucianic; some readings are certainly known to be Hexaplaric; but we are still far from an agreement on all points. Especially is this the case with the recension of Hesychius. Some scholars have identified it (notably in the Prophets) with the text of A, which, however, seems certainly to have been modified by the influence of Origen. More recently the tendency has been to find it in B; but here it is still open to question whether B is not mainly both pre-Hesychian and pre-Origenian. It would be unjustifiable to pretend at present that certainty has been arrived at on these points. And with regard to the great bulk of MSS, it is clear that their texts are of a mixed character. In the Psalms it would appear that the recension of Lucian was, in the main, adopted at Constantinople, and so became the common text of the Church; but in regard to the other books, the common text, which appears in the bulk of the later MSS, cannot be identified with any of the three primary recensions. The influence of the Hebrew, especially after the example of Origen, was constantly a disturbing factor; it should be pointed out that there were also pre-recensional revisions in Greek MSS on the basis of a Hebrew text, as may be noted in the Scheide papyri of Ezekiel.

14. And when that is done, the question of the relation of the LXX to the Hebrew still remains. No other version differs so widely from its presumed original as the LXX does from the Massoretic Hebrew; but it is by no means easy to say how far this is due to the mistakes and liberties of the translators, and how far to the fact that the text before them differed from the Massoretic. That the latter was the case to some extent is certain. Readings in which the LXX is supported against the Massoretic by the Samaritan text must almost certainly represent a divergent Hebrew original; but unfortunately the Samaritan exists only for the Pentateuch, in which the variants are least. Elsewhere we have generally to depend on internal evidence; and the more the LXX is studied in detail, the less willing, as a rule, is the student to maintain its authority against the Hebrew, and the less certain that its variants really represent differences in the original text. In this respect the Dead Sea Scrolls will have great importance, and it appears that the Qumrân fragments were influenced by the Hebrew tradition that lies behind the LXX, but naturally they do not reproduce the same Hebrew text as lay before the translators. While the St. Mark's scroll of Isaiah, in the main, confirms the accuracy and antiquity of MT, it has a number of readings in agreement with the LXX. On this subject, cf F. M. Cross, *The Ancient Library of Qumran and Modern Biblical Studies* (1958); M. Burrows, *More Light on the Dead Sea Scrolls* (1958). There are also divergences arising, not from a different Hebrew text, but from supplying different vowel points to a text which originally had none. All these factors have to be taken into account before we can safely say that the Hebrew which lay before the LXX translators must have been different from the Massoretic text; and each passage must be judged on its own merits.

The literalisms in the LXX often imply that the interpreters had a high regard for the exact letter, and some of the crudities of the Greek may give such an origin. Yet often in the same verse or in adjacent verses are found both literalisms and extreme freedom of rendering. With such a style a certain balance of approach was maintained by the translators, and there should also be stressed the spirit of freedom in the LXX; this may be observed even in the naming and arrangement of various books. Sometimes it appears that a translator by playing with a root obtained the meaning he desired or achieved good sense. The freedom of the Septuagint is often to be observed in the realm of theology, as, *e.g.*, in its anti-anthropomorphisms or in passages which were changed or toned down to avoid offence. Yet the translators did not set out to rewrite the text, and due restraint was exercised in making changes for theological reasons. When all is considered, it appears that the LXX had a Hebrew original closer to MT than commentators have often assumed. In textual studies, however, it is also important to consult the Hebrew variants collated by Kennicott and de Rossi, for here are found some agreements with the Old Greek and the recensions [cf H. S. Gehman, ' Theological Approach of

GREEK VERSIONS OF OT

Gr. Translator of Job 1–15,' *JBL*, lxviii (1949), 231–240 ; ' Exegetical Methods—Gr. Translator of 1 Sam.,' *JAOS*, lxx (1950), 292–296 ; C. T. Fritsch, *The Anti-Anthropomorphisms of the Gr. Pentateuch* (1943) ; D. H. Gard, *The Exeg. Method of the Gr. Translator—Job, JBL Monograph Series*, viii (1952)].

II. Aquila (Aq.).—15. Of the rival Greek versions which, as mentioned in **7**, came into being in the 2nd cent., the first usually cited is that of Aquila, a Gentile of Sinope, in Pontus, who was converted first to Christianity and then to Judaism. It is probable, however, that Theodotion should precede him chronologically. He is said to have been a pupil of Rabbi Akiba, and to have flourished in the reign of Hadrian (A.D. 117–138). His translation of the OT was made in the interests of Jewish orthodoxy. The text which subsequently received the name of Massoretic had practically been fixed by the Jewish scholars at the end of the 1st cent., and Aquila followed it with slavish fidelity. All thought for the genius and usage of the Greek language was thrown aside, and the Greek was forced to follow the idiosyncrasies of the Hebrew in defiance of sense and grammar. Aq. would consequently be an excellent witness to the Hebrew text of the 2nd cent., if only it existed intact ; but we possess only small fragments of it. These consist for the most part (until recently, wholly) of fragments of Origen's third column preserved in the margins of Hexaplar MSS (such as Q) ; but they have been supplemented by modern discoveries. The Milan palimpsest of the Hexapla (see **8**), discovered by Mercati in 1896, contains the text of Aq. for eleven Psalms. The Cambridge fragment published by Dr. C. Taylor gives the text of Ps $22^{15-18, 20-28}$. In 1897 F. C. Burkitt discovered three palimpsest leaves of a MS of Aq. (5th–6th cent.) among a large quantity of tattered MSS brought, like the last-mentioned fragment, from Cairo ; and these, which contain 3 K 20^{7-17} and 4 K 23^{11-27}, were published in 1897. Further fragments, from the same source and of the same date, published by Dr. C. Taylor (1900), contain Ps 90^{17}–92^{10} 96^{7}–97^{12} 98^{3} 102^{16}–103^{13} ; and in 1900 Messrs. Grenfell and Hunt published Gn 1^{1-5} in the versions of the LXX and Aq. from a papyrus of the 4th cent. in the collection of Lord Amherst. These discoveries confirm our previous knowledge of the characteristics of Aq. ; and it is noteworthy that in the Cambridge MSS of Aq. the Divine Tetragrammaton is written in the old Hebrew characters.

III. Theodotion (Theod.).—16. The origin of this version must be ascribed to a desire to have a Greek version of the OT which should correspond better than the LXX with the current Hebrew text. Theodotion, though sometimes described as a Jewish proselyte, appears rather to have been an Ebionitic Christian, who lived at Ephesus about the first third of the 2nd cent. This version follows in the main the authorized Hebrew, but is much more free than Aq., and agrees more with the LXX. Hence when Origen, in the execution of his plan for bringing the LXX into accord with the Hebrew, had to supply omissions in the LXX, he had recourse to Theod. for the purpose. Further, the LXX version of Daniel being regarded as unsatisfactory, the version of Theod. was taken into use instead, and so effectually that the LXX of this book has survived in but one single MS. (Chigi, or 87). It is probable, however, that Theod. was not wholly original in this book, for there are strong traces of Theodotionic readings in the NT (Hebrews and Apocalypse), Hermas, Clement, and Justin ; whence it seems necessary to conclude that Theod. based his version on one which had been previously in existence side by side with the LXX ; this is generally referred to as Ur-Theodotion, or pre-Theodotion.

17. Besides this complete book and the extracts from the Hexapla and the Milan palimpsest (the Theodotion column in the Cambridge MS is lost), there is some reason to believe that still more of Theod. has survived than was formerly supposed. It is well known that the book which appears in our Apocrypha as 1 Esdras, and in the Greek Bible as *Ἔσδρας Α′*, is simply a different recension of the canonical book of Ezra (with parts of 2 Chronicles and Nehemiah), which in the Greek Bible appears (with Nehemiah) as *Ἔσδρας Β′*. *Ἔσδρας Β′* faithfully represents the Massoretic Hebrew ; *Ἔσδρας Α′* is freely paraphrastic, and contains some additional matter (1Es 3^{1}–5^{6}). Josephus, who knew the LXX, but not, of course, Theod., plainly follows *Ἔσδ. Α′* ; and it has been argued by Whiston (in 1722) and Sir H. Howorth (*PSBA*, May 1901–Nov. 1902) that *Ἔσδ. Α′* is the original LXX version, and *Ἔσδ. Β′* the version of Theod., which, as in Daniel, has ousted its predecessor from general use.

IV. Symmachus (Symm.).—18. Of Symm. there is less to say. Like Theodotion, he has been called an Ebionite, and like both Theodotion and Aquila, he has been said to be a proselyte to Judaism ; the former statement is probably true. His work was known to Origen by about 228, and was probably produced quite at the end of the 2nd cent. From the literary point of view, it was the best of all the Greek versions of the OT. It was based, like Aq. and Theod., on a text like the Massoretic Hebrew, but it aimed at rendering it into idiomatic Greek. Consequently, it neither had the reputation which Aq. acquired among the Jews, nor was it so well fitted as Theod. to make good the defects, real or supposed, of the LXX among the Christians ; and its historical importance is therefore less than that of its rivals. The extant materials for its study are practically the same as in the case of Aq., namely, the two fragments of MSS of the Hexapla [the Cambridge fragment contains the Symm. column for Ps $22^{15-18, 20-24}$; the precise extent of the Milan MS is not known], and the copious extracts from the Hexapla in the margins of certain MSS and the quotations of the Fathers.

LITERATURE.—An indispensable handbook for LXX studies is H. B. Swete's *Introd. to the OT in Greek*, revised by R. R. Ottley (1914). See also Nestle's article in Hastings' *DB*, and his *Septuagintastudien* (1886–1907) ; cf H. S. Gehman ' Septuagint ' in *Twentieth Century Encyclopedia of Religious Knowledge* (1955). A popular account with a description of all the uncial MSS is given in Kenyon's *Our Bible and the Ancient MSS* (revised by A. W. Adams, 1958). Important works are Rahlfs' *Septuaginta-Studien* (I., 1904), on the text of Kings ; II., 1907, on Psalms) and R. L. Ottley's *Book of Isaiah according to the Septuagint* (2 vols., 1904–1906). The remains of the Hexapla are collected in F. Field's *Origenis Hexaplorum quae supersunt* (Oxford, 1875). Ceriani's study of the Codex Marchalianus and Deissmann's of the Heidelberg Prophets-papyrus make important contributions to the classification of the MSS. The English translation of the LXX by Charles Thomson was published in Philadelphia in 1808 ; in 1904 the same version with an editorial preface by S. F. Pells was reprinted in London. Finally, the Thomson translation, edited and revised by C. A. Muses, was published by the Falcon Press (Indian Hills, Colo., 1954). Another by L. C. L. Brenton was published in 1844.

Editions.—The LXX was first printed in the Complutensian Polyglot (1514–1517, published 1521), but first published by Aldus (1519). The standard edition is that issued at Rome by Pope Sixtus V. in 1587. This, by excellent fortune, was based mainly on the Codex Vaticanus (B), with the help of the Venice MS (V), and others, but it is not a critical edition in the modern sense. An edition based on the Codex Alexandrinus (A) was published at Oxford by Grabe in 1707–1720. The textual criticism of the LXX rests upon the great edition of R. Holmes and J. Parsons (Oxford, 1798–1827), who printed the Sixtine text with an apparatus drawn from 20 uncial and 277 minuscule MSS, besides versions. Unfortunately several of the collations made by their assistants were not up to modern standards of accuracy. Tischendorf published a revised text, with various readings from a few of the leading uncials (1850 ; 7th edition, 1887) ; but the foundation of recent textual study of the LXX was laid by the Cambridge manual

edition (*The Old Testament in Greek*) in three volumes by Swete (1887–1894; revised 1895–1899). In this the text is printed from B, when available; otherwise from A or ℵ, and the textual apparatus gives all the variants in the principal uncial MSS. A larger edition, giving the same text, but with the addition of the evidence of all the uncials, a considerable number of carefully selected and representative minuscules, and the principal versions and patristic quotations, was begun under the editorship of A. E. Brooks and N. Maclean. Vol. I: *The Octateuch* was published in four parts (1906–1917). The same scholars together with H. St. J. Thackeray edited Vol. II: *The Later Historical Books* (Samuel, Kings, Chronicles, 1 Esdras, 2 Esdras (Ezra–Nehemiah), which appeared in four parts (1927–1935); Vol. III, part 1 (Esther, Judith, Tobit) edited by the same three men, was published in 1940. Another important edition with an extensive critical apparatus is the *Septuaginta, V. T. Graecum* (Göttingen). The following have appeared to date: Vol. IX, 1: 1 *Maccabees*, edited W. Kappler (1931); Vol. IX, 2: 2 *Maccabees*, edited by R. Hanhart (1959); Vol. IX, 3: 3 *Maccabees*, edited by R. Hanhart 1960); Vol. X: *Psalms with the Odes*, edited A. Rahlfs (1931); Vol. XIII: *Twelve Minor Prophets* (1943); Vol. XIV: *Isaiah* (1939); Vol. XV: *Jeremiah, Baruch, Lamentations, Epistle of Jeremiah* (1957); Vol. XVI, 1: *Ezekiel* (1952); Vol. XVI, 2: *Susanna, Daniel, Bel and the Dragon* (1954). The last five publications have been edited by J. Ziegler. A good manual edition is that by A. Rahlfs, *Septuaginta, id est V. T. Graece iuxta LXX Interpretes*, Stuttgart, 1935. F. G. K.—H. S. G.

GREEN, GREENISH.—See Colours, **1.**

GREETING.—See Salutation.

GREYHOUND.—See Dog.

GRIDDLE.—Lv 2^5 6^{21} 7^9 (RSV); see House, **9.**

GRINDER.—In Ec 12^3 the 'grinders' are the teeth, as the context clearly indicates. In Job 29^{17}, where AVm has 'grinders' (AV, RV 'jaws'), RSV has 'fangs,' as also in Ps 58^6 (AV, RV 'great teeth'), Jl 1^6 (AV 'cheek teeth,' RV 'jaw teeth'), where the same word is used.

GRISLED.—See Colours, **1.**

GROUND.—See Earth.

GROVE.—Apart from Gn 21^{33}, to be presently mentioned, 'grove' is everywhere in AV a mistaken translation, which goes back through the Vulgate to the LXX, of the name of the Canaanite goddess *Asherah*. The 'groves,' so often said to have been, or to be deserving to be, 'cut down,' were the wooden poles set up as symbols of Asherah. See further the article Asherah.

In Gn 21^{33} the grove which AV makes Abraham plant in Beer-sheba was really 'a **tamarisk** tree' (so RV, RSV), a tree which also figures in the story of Saul, 1 S 22^6 31^{13} (both RV, RSV). A. R. S. K.

GRUDGE.—The word 'grudge' formerly stood for dissatisfaction expressed aloud, *i.e.* murmur, grumble; but by 1611 it was becoming confined to the feeling rather than the open expression, so that it occurs in AV less frequently than in the older versions. It has the older meaning in AV in Ps 59^{15} 'Let them wander up and down for meat, and grudge if they be not satisfied' (RSV 'growl,' RV 'tarry all night'). The older meaning is found also in AV in Wis 12^{27} (RV 'were indignant,' RSV 'became incensed'), Sir 10^{25} (RV 'murmur,' RSV 'grumble'), and Ja 5^9 (RV 'murmur,' RSV 'grumble').

GUARANTEE.—See Earnest.

GUARD, BODY-GUARD.—The former is used in EV almost exclusively for the body-guard of royal and other high-placed personages, such as Nehemiah (Neh 4^{22f}) and Holofernes (Jth 12^7). 'Body-guard' occurs in RV only in 1 Es 3^4 (so RSV) of the 'guard' (AV) of Darius, but it occurs several times else in RSV (1 S 22^{14} 28^2, 2 S 23^{23}, 2 K 25^8, 1 Ch 11^{25}, Jer 52^{12}) for a variety of expressions in AV and RV. The members of the body-guard of the Pharaoh of Gn 37^{36} and of Nebuchadnezzar (2 K 25^8 etc.) are, in the original style, 'slaughterers (of animals for food),' not as RVm 'executioners.' Those composing the body-guard of the Hebrew kings, on the other hand, are styled '**runners**' (1 S 22^{17} RV and margin, 2 K 10^{25} 11^4 etc.), one of their duties being to run in front of the royal state-chariot (cf 2 S 15^1, 1 K 1^5). In 1 K 14^{28} we hear of a guardroom. The office of 'the captain of the guard' was at all times one of great dignity and responsibility. David's body-guard consisted of foreign mercenaries, the Cherethites, and Pelethites (see Cherethites), commanded by Benaiah (2 S 20^{23} compared with 23^{23}). The famous **Praetorian guard** of the Roman emperors is mentioned in Ph 1^{13} RV and RSV; also Ac 28^{16} AV in a passage absent from the best texts (also RV and RSV). A. R. S. K.

GUARD, GATE OF THE.—A gate on the NE. side of Jerusalem, Neh 12^{39} (AV **the prison gate**). Its location is uncertain. Vincent thinks it is the same as the **Muster Gate** (q.v.).

GUDGODAH.—A station in the journeyings of the Israelites (Dt 10^7), when they proceeded to Jotbathah. There can be little doubt that **Hor-haggidgad** (AV **Hor-hagidgad**) in the itinerary of Nu 33^{32f} indicates the same place. It perhaps lay in the *Wâdī Khaḍākhid*.

GUEST, GUESTCHAMBER.—See Hospitality.

GUILT.—In a series of OT usages it is hardly possible to distinguish sin itself, guilt as the state of responsibility for sin committed, and punishment as the consequence. Such a case is in the story of Cain, Gn 4^{13}, using *'āwōn* 'iniquity,' where it would be equally possible to translate by Cain's iniquity, his punishment or his guilt. The sin is a reality which has to be 'carried,' and remains to display guilt and invoke punishment. So we have the phrase 'to bear his iniquity,' where the same triple connotation is found (Lv $5^{1,17}$ etc.). Only by the proper expiation is the sin removed, and with it the guilt and punishment, if these latter can be distinguished. Where there is no expiation, 'his iniquity shall be upon him' (Nu 15^{31}), *i.e.* it and its destructive effects are not wiped away (see Expiation).

'Guilt' is also an approximate rendering in many contexts of the Hebrew *'āshām*, the range of whose meaning might be given as damage done, responsibility for damage done, restitution of damage, and the offering of reintegration ('guilt offering') which accompanies the restitution. Joseph's brothers are responsible or guilty, because of their unmerciful treatment of him, and so distress comes upon them (Gn 42^{21}). Guilt may exist even where the person is unconscious of wrong done (Lv 5^{17}), and must be expiated. The sin of the anointed priest may be 'to the guilt of the people,' Lv 4^3. Here too punishment may be included in the range of meaning, *e.g.* Hos 13^{16}, where the verbal form of this root, 'shall be guilty' (RSV 'bear her guilt'), seems clearly to have the content of 'shall pay the penalty' of guilt. The emphasis is generally not on subjective feelings of guilt, but on an actual burden of sin; on the other hand the existence of this guilt is destructive to the integrity of the person.

In judicial use, however, it is most usual to use the terms *rāshā'* 'evildoer, person in the wrong' and *ṣaddīḳ* 'person in the right,' and the causative forms of the related verbs in a declarative sense as 'declare in the wrong, guilty' and 'declare in the right, vindicate.' Such are the terms of a judge's decision, Dt 25^1. God as judge does the same thing, and recompenses men for their conduct, 1 K 8^{32}. A general judicial sense appears in the NT in places like the trial of Jesus by Pilate, where Pilate finds no *aition*, no guilt deserving punishment, in the man Jesus (Lk $23^{4,14,22}$).

We also have in the NT the term *enochos*, which is often connected syntactically not with the crime but with the punishment, and is therefore often rendered in English 'liable to.' In the LXX this term is sometimes used to translate the Hebrew phrases where 'blood' is

a term for guilt or responsibility and also for the corresponding recompense or exaction of justice. In Jos 2^{19f} an oath includes particulars of the circumstances in which the parties shall be clean or guiltless and in which 'the blood shall be on their head,' or as LXX puts it, they shall be responsible or guilty. So LXX in Lv $20^{9,11}$ etc. The prime cause of blood-guiltiness (Hebrew usually simply 'blood') is of course the killing of a man, and even where this is accidental, as we would call it, expiatory measures must be taken, and asylum is provided for the killer, on whom otherwise vengeance will properly be taken (Dt 19^{4-13} 21^{1-9}, Nu 35^{9-34}). For the guilt of intentional murder there is no expiation but by the blood of the guilty (Nu 35^{33}).

In the NT the term *enochos* then means guilty of or liable to fault or punishment. So in the straight legal sense Mt 26^{66} (RSV 'he deserves death'), and for Mt 5^{22} the sense has been suggested 'guilty enough to go into the hell of fire.' The sense 'guilty' is clear in Mk 3^{29} (of the blasphemy against the Holy Spirit), and in two passages the reference is to that which is violated or outraged: 1 Co 11^{27} (the body and blood of the Lord) and Ja 2^{10} (the whole of the law).

For the more general problems in which the concept of guilt is a part see SIN, ATONEMENT, JUSTIFICATION, etc.

J. Ba.

GUILT-OFFERING.—See SACRIFICE AND OFFERING.

GULF.—The only instance of the use of this word in the Bible occurs in the parable of Dives and Lazarus (Lk 16^{26} AV; RSV 'chasm'; cf Nu 16^{30} where the word 'pit' is the translation of *Hades* or *Sheol*; RSV 'Sheol'). Some commentators have discovered in Jesus' employment of this term as well as in His assertion of the possibility of conversation, an approval in general terms of a current Jewish belief that the souls of the righteous and of the wicked exist after death in different compartments of the same under-world. It is not possible, however, to construct a theory of Jesus' teaching as to the intermediate state from evidence so scanty.

GUNI.—1. The eponym of a Naphtalite family, Gn 46^{24}, 1 Ch 7^{13} (cf Nu 26^{48} where the gentilic **Gunites** occurs). **2.** A Gadite chief, 1 Ch 5^{15}. **3.** Probably we should also read 'the Gunite' for '**Jonathan**' in 2 S 23^{32} (cf S. R. Driver, *Notes on . . . the Books of Samuel*^{2}, 1913, p. 371); and for 'the **Gizonite**' in 1 Ch 11^{34}.

GUR.—An 'ascent' by Ibleam and Beth-haggan, 2 K 9^{27}. The site is unknown. LXX read *Gai* = 'valley,' and it is possible that no place-name Gur existed (cf J. Simons, *The Geographical . . . Texts of the OT*, 1959, p. 363); but Albright identified Gur with Akkadian *Gurra* (*BASOR* 94, 1944, 21).

GUR-BAAL ('dwelling of Baal').—An unknown locality named in 2 Ch 26^{7}.

GUTTER.—See HOUSE, 5.

H

HAAHASHTARI.—A descendant of Judah, 1 Ch 4^{6}.

HABAIAH ('Y" hath hidden').—The head of a priestly family which returned with Zerubbabel, but, being unable to trace their genealogy, were not allowed to serve, Ezr 2^{61}, Neh 7^{63} (AV; RV, RSV **Hobaiah**), 1 Es 5^{38} (AV, RV **Obdia**).

HABAKKUK.—The eighth of the Minor Prophets. Except for legends, *e.g.* in Bel and the Dragon (vv.33-42), nothing is known of him outside of the book that bears his name.

1. The Book of Habakkuk, read as it now stands and assumed to be a unity, must be dated shortly after the appearance of the Chaldaeans on the stage of world-history, seeing that their descent on the nations is imminent. It must therefore be later than the fall of Nineveh to the combined forces of Babylon and the Medes in 612 B.C., and earlier than the first Judaean captivity in 597 B.C. If composed about the year 600 B.C., it falls in the reign of Jehoiakim, in the period of reaction that followed the defeat and death of Josiah at Megiddo (608 B.C.). That event, apparently falsifying the promises of the recently discovered law book, had led to a general neglect of its ethical claims, and to a recrudescence of the religious abuses of the time of Manasseh (cf 2 K 23^{37}, Jer 19^{4ff} 25, etc.). The book was the work of a Judaean prophet, who probably resided in Jerusalem. It may be divided into six sections. The first four contain two dialogues between Yahweh and the prophet, while the last contain confident declarations springing from and expanding the Divine reply.

(1) 1^{1-4}. Habakkuk, compelled to live in the midst of violent wrong-doing and contempt for the Law manifesting itself in the oppression of the righteous by the wicked, complains strongly of the silence and indifference of God.

(2) 1^{5-11}. He receives an answer that a new and startling display of the Divine justice is about to be made. The Chaldaeans, swift, bitter, and terrible, are to sweep down and overwhelm the whole world. No fortress can resist their onslaught.

(3) 1^{12-17}. Some time may now be supposed to elapse before the next prophecy is spoken. During this period the prophet watches the progress of the Chaldaeans, who have now (2^{17}) penetrated into Palestine. His observation raises a new and insoluble problem. This reckless, insolent, cruel, insatiable conqueror is worse than those he has been appointed to chastise. How can a holy God, so ready to punish the 'wicked' in Israel, permit one who deserves far more than the name 'wicked' to rage unchecked? Are wrong and violence to possess the earth for ever?

(4) 2^{1-4}. The prophet, retiring to his watch-tower (a place of spiritual meditation), scans with eager longing the incongruities of life, expectantly awaiting a Divine answer to his lament. He receives an oracle which he is bidden to write down on tablets for all to read. He is told that the purpose of God is hastening to its fulfilment, and is encouraged to wait for it. Then follows the famous sentence (RV), 'Behold, his soul is puffed up, it is not upright in him: but the just shall live by his faith'—better 'faithfulness' (so RSVm). Despite the obscurity of the text, the meaning seems to be that tyranny is self-destructive and carries with it the seeds of doom. But while the evil-doer passes away, the just man, steadfast in the face of all contradiction, shall live, and last out the storm of judgment.

(5) 2^{5-20}. Content with this message, the prophet utters, triumphantly, a five-fold series of woes against the pride, the greed, the cruel building enterprises, the sensuality, the idolatry of the heathen power.

(6) Ch. 3. Finally, in a magnificent lyric, the prophet laments the present turmoil, recalls God's awesome interventions in the past (especially the Exodus), and expresses confidence that God will appear once more and bring hopeless ruin upon the enemy.

So read, this short book is seen to be a prophetic autobiography of inner experience comparable to the meditations of Jeremiah. It marks the beginnings of Hebrew reflective thought as to the workings of Providence

in history, afterwards so powerfully expressed in Job and in the later prophets.

2. The presence of such diverse elements has led many to question the unity of the book and to extract from it a nucleus of genuine material which has several times been supplemented and disarranged. Sometimes the divine-human encounter has been simplified by combining the laments (parts 1 and 3) and following them with the oracles (parts 2 and 4). On the side of this procedure is the use of the word 'wicked' in 1^4 and 1^{13}, which, it is claimed, should refer to the same party. Yet 1^{1-4} best describes internal oppression, whereas 1^{12-17} depicts oppression by a foreign power.

The form-critical approach sees nothing strange in the present arrangement, the whole being organized as a liturgy for use in the Temple (or alternatively, for lectionary use in the synagogue). The alternation of lament and oracle is in this view perfectly in order. The second oracle of doom is naturally followed by the series of woes. These in turn end with a note of expectation that the Lord who resides in His holy Temple will appear to deliver His people (2^{20}; cf Zeph 1^7, Zec 2^{13}). The psalm (ch. 3) follows in natural sequence, not merely as an ode of faith, but by reason of the theophany which answers the expectation of 2^{20}. Habakkuk is therefore considered a cultic prophet attached to the Temple, who brilliantly conceived this liturgy and daringly carried it out in a service of public worship designed to criticize contemporary society, to invoke the judgment of God upon it, and to give assurance to the righteous of their ultimate triumph.

The arrangement of the materials may well be liturgically inspired, even if the prophet himself did not compose them all. Certainly the fifth woe (2^{18f}) reveals editorial activity; for its repudiation of idolatry is obviously unsuitable in the mouth of heathen nations (cf 2^{5f}). Ch. 3 has all the marks of having been lifted out of a song-book and inserted in this place. Its psalmlike superscription, its periodic insertion of **Selah,** and its musical subscription are found in no other prophet. The subscription is probably the heading of the hymn which followed this one in the song-book from which it was derived. This position is strengthened by the fact that the ancient commentary upon Habakkuk found in the first Qumrân Scroll Cave did not include ch. 3—despite the fact that the community which produced this scroll did write commentaries upon other Psalms.

Though some have sought to identify the 'vision' of 2^{2f} with 1^{5-11} or even ch. 3 (with consequent rearranging of the materials), the word probably means here simply 'revelation,' and is to be identified with $2^{4, 5a}$. Only a brief text is suitable for placarding upon stone or wooden plaques (cf Is 8^1 and 30^8), and certainly $2^{4, 5a}$ is profoundly suitable as a concise summary of the prophet's message for public exhibition. With the help of the ancient versions and the newly found Habakkuk Commentary, the rather corrupt text may be restored somewhat as follows:

4a Behold, [the naughty] is haughty;
b his soul is not humble within him.
5a Be he ever so audacious and treacherous,
b the presumptuous man shall not survive;
4c but the righteous by his faithfulness shall live.

(Cf Brownlee, *The Text of Habakkuk in the Ancient Commentary from Qumrân, JBL* Monograph Series, vol. xi, pp. 44–48.)

Section 5, then, should begin with 5c: '*Assyria* enlarged his appetite as Sheol.' For 'Assyria' the traditional reading is 'who,' but the two words in the original consonantal text are spelled the same. The misreading of the word as 'who' required the removal of 4c from its original position in order to find a suitable antecedent. It is not at all surprising that Habakkuk should have composed a section of taunt songs concerning Assyria (cf Nahum), even though, as seems probable, the oppressor in 1^6 is truly the Chaldaeans; for concurrent with the rise of Babylonia was the fall of Assyria. Section 5, therefore, may have been composed shortly after the fall of Nineveh (612 B.C.), or even after the Battle of Carchemish (605 B.C.) when the last vestige of the Assyrian kingdom was obliterated. The lesson concerning the fall of Assyria was placed here as an historical illustration of the principle enunciated in $2^{4, 5a}$: 'tyranny is suicide, and may be expected to repeat itself in the case of the Chaldaeans.'

3. Considerable interest attaches to the Commentary of Hab found among the Dead Sea Scrolls. Portion by portion the text of the first two chapters is quoted and interpreted. The text is valuable, though sometimes shaped by sectarian interests. The interpretations are midrashic in character. They employ far-fetched verbal play and twisting in order to discover the hidden meanings of the prophet concerning the latter days. The 'Chaldaeans' are the 'Kittim,' itself a cryptic cypher (as some think) for the Seleucid rulers of Syria Palestine, or even more probably for the Romans who had but recently arrived as the new conquerors of the world. The 'wicked one' who circumvented the 'righteous' (1^4) is the Wicked Priest who persecuted the Teacher of Righteousness and his followers. The term Wicked Priest (*hak-kōhēn hā-rāshā'*) parodies the title Chief Priest (*hak-kōhēn hā-rō'sh*) and doubtless refers to some Hasmonaean (or pre-Hasmonaean) priest(s) who oppressed the Teacher and his community. The Wicked Priest is the understood object of the taunts of 2^{5-17} also.

The most significant interpretation is that of 2^4: 'The righteous shall live by his faithfulness.' The explanation is: 'Its meaning concerns the doers of the Law in the house of Judah, whom God will deliver from the house of damnation for the sake of their painful toil and their faith in the Teacher of Righteousness.' The equations of this exposition are clear: 'righteous' equals 'doers of the law,' 'faithfulness' (Heb. *'ĕmûnāh*) means both 'painful toil' (therefore 'faithfulness') and 'faith.' 'To live' means to survive the persecution of the 'house of damnation' (the Hasmonaean party?) and possibly also to escape the eschatological doom of that house. This prepares the way for Paul's application of the verse to faith in Jesus the Christ (Ro 1^{17}, Gal 3^{11}). The meaning of the OT was not static, but by constant reinterpretation was prepared to become an adequate witness to the Redeemer who fulfilled the highest hopes attached to the OT prophecies, and even surpassed them. In the present case, Paul's interpretation is salvation by faith alone (though naturally it will be completed by works) and even this is the condition rather than the meritorious ground for deliverance. The linking of 'painful toil and faith' in the Hab Commentary suggests that 'faith' is but another meritorious work. This becomes certain when one observes that the Teacher of the Scroll was in no way a redeemer, like the Christ, but only a revealer of God's eschatological will. The deliverances are also different, for salvation in Paul's understanding is no mere safeguard of the righteous, but it is the power of God whereby the wicked may become righteous and partake of eternal life.

W. J. M.—W. H. Br.

HABAZINIAH, Jer 35^3 (AV).—See HABAZZINIAH.

HABAZZINIAH.—The grandfather of Jaazaniah, one of the Rechabites who were put to the proof by the prophet Jeremiah, Jer 35^3 (AV **Habaziniah**).

HABERGEON.—An obsolete term replaced in RV by 'coat of mail' (Ex 28^{32} 39^3; but RSV 'garment'). In 2 Ch 26^{14}, Neh 4^{16} RV and RSV have 'coat of mail.' In Job 41^{26}, where a different word stands, RV has 'pointed shaft' and RSV 'javelin.' See also ARMOUR, ARMS, **2** (*c*).

HABIRU.—Akkadian *ḫa*-BI-*ru*, or ideograph SA.GAZ or GAZ; Egyptian *'pr.w.* The Habiru were heterogeneous, uprooted people who joined together to find a means of subsistence for themselves and their families by entering the service of individuals, cities, and states in various areas of the Near East during the 2nd millennium B.C. They are first mentioned in a Sumerian text from Ur in the 20th cent. In the 20th–18th cents.

the Habiru appear as state-supported soldiers in southern Mesopotamia, as dependent troops at Alishar in Asia Minor, and as royal forces and independent raiders in the areas of Harran and Mari. Texts from 15th cent. Alalakh in Syria mention Habiru who appear to be foreigners, some of them vagrants, who enjoyed limited civic rights. Contemporary texts from the Hurrian Nuzi in Assyria record the voluntary entry of Habiru into the service of an official, Tehiptilla. In the Tell el-Amarna letters the Habiru are depicted as lawless bands who sold their services to local chiefs in Syria and Palestine during the first half of the 14th cent. Their status was that of outcasts from society who engaged in acts of outlawry when paid or supported by leaders of more responsible groups (cf 1 S 22[2]). Records throughout the Empire Period of Egypt contain references to *'apr.w*. This servile element in the Egyptian population can be equated with the Habiru not only by a place of dependence in society but by the discovery of the equation *'prm*=Sa. GAZ at Râs Shamra.

The identification of the Habiru with the Hebrews is subject to some difficulties. The root of Hebrew *'brî* does not coincide easily with *'apiru*, the West Semitic form of Habiru. The biblical *'ibhrî* is a gentilic for Israelites, while Habiru is a term denoting an inferior social status. Nor is it easy to resolve the chronological differences between the activity of the Habiru in Palestine during the first half of the 14th cent. and the generally accepted date of the 13th cent. for the conquest of Canaan by the Israelites. However it is probable that the earliest Hebrews were related in some way to the widely attested groups known as Habiru. J. B. P.

HABOR.—A river flowing through the district of **Gozan**, on the banks of which Israelites were settled when deported from Samaria (2 K 17[6] 18[11], 1 Ch 5[26]). It is a tributary of the Euphrates, the *Chaboras* of the Greeks, the modern *Khābûr*.

HACALIAH.—The father of Nehemiah, Neh 1[1] 10[1] (AV **Hachaliah**).

HACHALIAH, Neh 1[1] 10[1] (AV).—See HACALIAH.

HACHILAH.—A hill near the wilderness of Ziph in which David hid (1 S 23[19]), and on which, during his pursuit, Saul pitched his camp (26[1, 3]). Ziph is modern *Tell ez-Zif*, to the S. of Hebron. Some authors suggest that Hachilah may be the hill *Ḍaḥret el-Kôlâ*, but this is perhaps rather far to the east.

HACHMONI, HACHMONITE.—Both represent one and the same Hebrew word, but in 1 Ch 27[32] the latter is translated as a proper name, 'Jehiel the son of Hachmoni,' whereas in 1 Ch 11[11] Jashobeam is called 'a Hachmonite.' We should probably render it in both cases as a gentilic name. In 2 S 23[8], which is parallel to 1 Ch 11[11], we have 'the **Tahchemonite**' (AV **Tachmonite**), which is probably a textual error (see ADINO, JOSHEB-BASSHEBETH).

HADAD.—**1.** Hadad (Akkadian Adad) was a god worshipped among the Amorites in Palestine, Syria, and Mesopotamia at least from the 19th cent. B.C. and named in Aramaean inscriptions from Syria in the 8th cent. (cf the theophoric name Benhadad or Barhadad borne by three kings of Damascus).

Hadad is known particularly from the Râs Shamra texts as the proper name of the Canaanite Baal, the Amorite storm-god manifest in thunder, lightning, and the rains of autumn and winter. The name probably means 'the Thunderer' (Arabic *haddatun*, 'thunder' from the verb *hadda*, 'to crash'), and the god is represented as a kilted, striding warrior armed with mace and thunderbolt, his helmet garnished with a bull's horns. He is also identified in the Râs Shamra mythology with the vegetation he stimulated and he is a dying and rising god, like Mesopotamian Tammuz. He is identical with Hadad-Rimmon (see RIMMON, another term for 'Thunderer'), for whom public mourning was made in the great central plain of Palestine by Megiddo (Zec 12[11]). This was probably a rite which had its mythical counterpart in the mourning for the dead Baal in the Râs Shamra texts by his sister, the goddess Anat.

2. The eighth son of Ishmael (1 Ch 1[30], and also Gn 25[15] according to RSV and the best readings). **3.** The fourth of the eight ancient kings of Edom (Gn 36[35]; cf 1 Ch 1[46]). **4.** The eighth of the kings of Edom in the same list as the above-named (1 Ch 1[50]; in Gn 36[39] miswritten **Hadar**). **5.** The son of a king of Edom in the 10th cent. (1 K 11[14ff]). He escaped the massacre of Edomites perpetrated by Joab, David's general, and fled (according to the received reading) to Egypt, whose king befriended him, and gave him his sister-in-law to wife. After the death of David he returned to Edom, and his efforts seem to have rescued Edom from the yoke of Solomon. In all those cases Hadad is probably the truncated form of a theophoric compound name.

J. F. McC.—J. Gr.

HADADEZER.—The name of a king of Zobah (q.v.) in the time of David, 2 S 8[3ff], 1 K 11[23], 1 Ch 18[3ff] (in the last passage AV and RV have the less correct **Hadarezer**, following Hebrew). He was at the head of the combination of the Aramaeans of Northern Palestine against David, was repeatedly defeated, and finally made tributary. The word means 'Adad is (my) helper' (cf Heb. *Eliezer*, *Ebenezer*, *Azariah*, etc.). It is found on the Black Obelisk of the Assyrian Shalmaneser III. under the more Aramaic form *Adadidri*, as the equivalent of *Benhadad* of Damascus, who led the great combination, including Ahab of Israel, against the Assyrians at Qarqar in 853 B.C. J. F. McC.

HADADRIMMON.—A proper name occurring in Zec 12[11] 'as the mourning for Hadadrimmon in the plain of Megiddo.' It was formerly supposed to be a place-name (cf AV, RV 'mourning of Hadadrimmon in the valley of Megiddon'). According to a notice by Jerome, it would be equivalent to **Megiddo** itself. The word, however, is a combination of the two names of a divinity (see HADAD), and it is probable that the weeping for Tammuz, referred to in Ezk 8[14], is here meant, and that the old Semitic deity Hadad-Rimmon had by now become identified with Tammuz. There is no ground for supposing an allusion to the mourning for king Josiah, which, of course, took place in Jerusalem, not in the valley of Megiddo. J. F. McC.

HADAR (Gn 36[39]).—See HADAD, **4.**

HADAREZER, 1 Ch 18[3ff] (AV, RV).—See HADADEZER.

HADASHAH.—A town in the lowland of Judah, near Gath, Jos 15[37]; the site is unknown.

HADASSAH ('myrtle').—The Jewish name of Esther (Est 2[7] only). See ESTHER.

HADATTAH, Jos 15[25] (AV).—See HAZOR-HADATTAH.

HADES.—The Greek term for the abode of departed spirits, equivalent of the Hebrew *Sheol*. It was conceived of as a great cavern or pit under the earth, in which the shades lived. Just what degree of activity the shades possessed seems to have been somewhat doubtful. According to the Greeks, they were engaged in the occupations in which they had been employed on earth. The Hebrews, however, seem rather to have thought of their condition as one of inactivity. (See SHEOL and GEHENNA.) The word, translated as 'hell' in AV, is consistently read 'Hades' in RSV, except in Mt 16[18] ('death'; but margin 'Hades'). S. M.—J. Br.

HADID.—A city named with Lod and Ono (Ezr 2[33], Neh 7[37]), peopled by Benjamites after the Captivity (Neh 11[34]), probably identical with **Adida** (1 Mac 12[38] 13[13]); modern *el-Ḥadîtheh*, about 3¼ miles NE. of Lydda.

HADLAI.—An Ephraimite, 2 Ch 28[12].

HADORAM.—**1.** The fifth son of Joktan, Gn 10[27], 1 Ch 1[21]. **2.** The son of Tou, king of Hamath, 1 Ch 18[10]. In the parallel passage (2 S 8[9f]) he wrongly appears as **Joram**. **3.** A form of the name **Adoram** (q.v.), found in 2 Ch 10[18].

HADRACH.—A place in Syria mentioned in Zec 9^1 as being, at the time of the writing of that passage, confederate with Damascus. Hadrach is undoubtedly identical with *Hatarikka* of the Assyrian inscriptions. It was the object of three expeditions by Assur-dan III., and Tiglath pileser III. refers to it in the account of his war with 'Azariah the Judaean.' W. M. N.

HA-ELEPH.—A town of Benjamin, Jos 18^{28} (AV, RV **Eleph**); but perhaps this name should be joined to the preceding name, as in LXX, giving **Zela-ha-eleph**. See ZELA.

HAFT.—'Haft,' still used locally for 'handle,' occurs in Jg 3^{22} (AV, RV) 'the haft (RSV 'hilt') also went in after the blade.'

HAG.—See NIGHT HAG.

HAGAB.—One whose descendants returned with Zerubbabel, Ezr 2^{46}, 1 Es 5^{30} (AV **Agaba**, RV **Accaba**); unmentioned in the parallel list in Neh 7.

HAGABA.—The head of a family of Nethinim (q.v.) who returned with Zerubbabel, Neh 7^{48}. See HAGABAH.

HAGABAH.—The slightly different form in which the last-mentioned name appears in Ezr 2^{45}, 1 Es 5^{29} (AV, RV Aggaba). Perhaps the same person as the foregoing.

HAGAR (probably 'emigrant' or 'fugitive') was Sarah's Egyptian maid (Gn 16^1 21^9). Her story shows that Sarah renounced the hope of bearing children to Abraham, and gave him Hagar as concubine. Her exultation so irritated Sarah that the maid had to flee from the encampment, and took refuge in the wilderness of Shur (16^7 25^{18}), between Philistia and Egypt. Thence she was sent back by 'the angel of the Lord'; and soon after her return she gave birth to Ishmael. After the weaning of Isaac, the sight of Ishmael aroused Sarah's jealousy and fear (21^9); and Abraham was reluctantly persuaded to send away Hagar and her son. Again 'the angel of God' cheered her; and she found her way southwards to the wilderness of Paran (21^{21}), where her son settled.

Literary criticism has found the three main pentateuchal sources J, E, and P in the Hagar story. Gn 16 is largely J, but verses 1a, 3, 15, and 16 are regarded as P. Gn 21^{8-21} is entirely E. There are thus two parallel accounts, and Gn 16^{9f} may be an editorial addition inserted to account for the presence of the E tradition.

Light on Sarah's action in giving her maid to Abraham because she herself was childless (Gn 16^2) is thrown by marriage contracts from Nuzu in NE. Mesopotamia. These contracts stipulate that a wife who fails to produce an heir shall provide for her husband a slave who may bear him a son. The purpose of marriage was procreation, and Sarah was conforming to a custom known among Abraham's neighbours. Further, the expulsion of the offspring of such a union was illegal according to the Nuzian code, and this, apart from any natural feelings, would explain Abraham's unwillingness to accede to Sarah's request (Gn 21^{10f}) and the Divine dispensation which allows him to comply (Gn 21^{12f}).

The story is an important part of the biography of Abraham, illustrating both the variety of trials by which his faith was perfected and the active concern of God in even the distracted conditions of a chosen household. Further interest attaches to the narrative as containing the earliest reference in Scripture to the angel of Yahweh (Gn 16^7), and as being the first of a series (Tamar, Rahab, Ruth, Naaman) in which the regard of God is represented as singling out for blessing persons outside Israel, and thus as preparing for the universal mission of Christ. There is but one other important allusion to Hagar in the OT. She is mentioned in Gn 25^{12} in a sketch of the family of Ishmael (so in Bar 3^{23} the Arabians are said to be her sons); and she has been assumed with much improbability to have been the ancestress of the Hagrites or Hagarenes of 1 Ch 5^{10} and Ps 83^6 (see HAGRITES). In Gal 4^{22ff} Paul applies her story allegorically, with a view to show the superiority of the new covenant. He contrasts Hagar the bondwoman with Sarah, and Ishmael 'born according to the flesh' with Isaac 'born through promise'; thence freedom and grace appear as the characteristic qualities of Christianity. There is good MS authority for the omission of 'Hagar' in v.^{25}, as in RSVm; in which case the meaning is that **Sinai** is a mountain in Arabia, the land of bondmen and the country of Hagar's descendants. Even if the reading of the text stands, the meaning of the phrase will not be very different, 'This Hagar of the allegory is or represents Sinai, because Sinai is in Arabia, where Hagar and her descendants dwelt.' R. W. M.—**W. D. McH.**

HAGARENES, Ps 83^6 (AV, RV).—See HAGRITE(S).

HAGARITES, 1 Ch $5^{5, 19f}$ (AV).—See HAGRITE(S).

HAGERITE, 1 Ch 27^{31} (AV).—See HAGRITE(S).

HAGGADAH.—See TALMUD.

HAGGAI (Apocrypha AV **Aggeus**; RV **Aggaeus**).—A prophet whose book appears tenth in the Book of the Twelve (Minor Prophets).

1. The man and his work.—The sphere of Haggai's activity was the post-exilic community in Judah. The dates in the book cover only a few months in the second year of Darius I. Hystaspis (522–486 B.C.), but the prophet's activity was not necessarily confined to so short a period. Of his prophetic calling and experience, nothing is known; but 1^{13} stresses that he is one commissioned by Yahweh, speaking with authority the message given to him. His name is perhaps a shortened form of Haggiah (1 Ch 6^{30}, cf Mattenai, Mattaniah, Ezr $10^{33, 36}$), and may mean 'feast of Yahweh' or 'festal' *i.e.* 'born on the feast day' (from *ḥagh*, cf Barzillai from *barzel*). The same or similar names are to be found on seals and in the Elephantine papyri. Later tradition describes him as born in Babylon, and it has usually been assumed that he came to Judah with Zerubbabel. He is associated by the Chronicler with Zechariah (Ezr 5^1 6^{14}), and there are certain similarities in the structure and content of this book and Zec 1–8 which render this association appropriate, quite apart from the contemporaneous activity of the two prophets. The names of the two are prefixed to certain psalms in the Versions 111 (112) (Vulgate), 125 and 126 (Peshitta), 137 (LXX), 145 (LXX, Vulgate, Peshitta), 146–148 (LXX, Peshitta).

His prophecies were evoked by the delay that attended the reconstruction of the Temple. If the narrative of the book of Ezra is followed (though this is not without historical difficulties), the Jews on returning to Palestine in the first year of Cyrus, at once set up the altar of the Lord (Ezr 3^3), and in the following year laid the foundation of the Temple (3^{8-10}). The work, however, was almost immediately suspended through the opposition of the 'people of the land,' the 'adversaries of Judah and Benjamin,' descendants of the Assyrian colonists (Ezr 4^{1-5}, cf 2 K 17^{24-41}). These difficulties led to a cessation of the work for some fifteen years. Haggai found the people loath to rebuild in a time of economic distress (1^4), but his exhortation, and that of Zechariah, resulted in the completion of the rebuilding by the sixth year of Darius I. (516 B.C., so Ezr 6^{14f}).

2. The book.—The prophecies of Haggai are divided into four dated sections.

(1) 1^{1-14}, assigned to the first day of the sixth month (August–September), contains the prophet's exhortation to build, and his explanation of the present economic distress and bad harvests as due to the failure to restore the Temple. The people have been content to beautify their own dwellings, but have not recognized that material well-being is dependent upon a right assessment of values, and that the Temple, as symbol of the Divine presence, is the necessary pre-requisite of blessing. The response of the leaders, Zerubbabel and Joshua, and of the people is recorded, and the beginning of the work described. 1^{15a} is probably an explanatory gloss, or a fragment of a date-heading.

(2) 1^{15b}–2^9, assigned to the twenty-first day of the seventh month (September–October), provides an answer to the discouragement experienced when the glory of the

first Temple is contrasted with the meanness of the second (cf the elaboration of this in Ezr 3^{12f}). The prophet exhorts leaders and people (described in 2^2 as the 'remnant') to work and not to fear. God's spirit is among them, and He will bring the treasures of the nations into the rebuilt Temple (cf Is 60), and will fill it with glory, *i.e.* His own royal presence (cf Ps 24^{7-10}). Reference is made to a shaking of heavens and earth, and it may be that the prophet was alluding to the disturbances at the beginning of the reign of Darius, though it is not clear that he believed that political change would bring about renewed fortune for his people. His expectation is of Divine action.

(3) 2^{10-19}, assigned to the twenty-fourth day of the ninth month (November–December) emphasizes, by means of questions directed to the priests, that pollution is more contagious than holiness. The corruption at the centre (14) pollutes the whole life and activity of the people. The passage has been interpreted as a reference to the repudiation of offers of help from the 'adversaries' (Ezr 4^{1-3}), *i.e.* Samaritans; but it is perhaps rather to be construed as indicating that the rebuilding of the Temple is not an immediate guarantee of prosperity. The second section (15–19) contrasts the distress of the past with the coming blessings (cf Zec 8^{9-12}).

(4) 2^{20-23}, assigned to the same date, proclaims Zerubbabel 'my servant' to be the signet-ring of Yahweh (cf Jer 22^{24}). An allusion to upheavals is made as in 2^6, but this again need not be understood in purely political terms.

The message of Haggai reflects the needs of his time, a period of depression and economic and political insecurity, in which the prophet sees the paramount need of rebuilding the Temple, the centre and focus of life for the community in Judah, returned exiles and others alike. The closest contacts of the book are with Zec 1–8, and also with Is 56–66 and Malachi. At first sight, the emphasis appears to be on the externals of religion, yet there is here the fundamental recognition that prosperity and life depend upon the presence and blessing of Yahweh.

The style of Haggai, as it may be discerned in the oracles, is plain, but not without its rhythm, and a sonorous effect is produced by repetition. The text is straightforward at most points, glossed in all probability in $2^{5a, 17f}$, and subsequently further glossed in the LXX ($2^{9, 14}$).

G. W. W.—P. R. A.

HAGGEDOLIM.—Father of Zabdiel, Neh 11^{14} (AV, RVm 'one of the great men').

HAGGERI, 1 Ch 11^{38} (AV).—See HAGRI.

HAGGI ('born on a festival').—Son of Gad, Gn 46^{16}, Nu 26^{15}; patronymic, **Haggites,** Nu 26^{15}.

HAGGIAH ('feast of Y^{w}').—A Levite descended from Merari, 1 Ch 6^{30}.

HAGGITES.—See HAGGI.

HAGGITH ('festal').—The mother of Adonijah, 2 S 3^4, 1 K 1^5 2^{13}.

HAGIA, 1 Es 5^{34} (AV).—See HATTIL.

HAGIOGRAPHA.—See BIBLE, 2.

HAGRI.—Father of Mibhar, one of David's heroes, 1 Ch 11^{38} (AV Haggeri); the parallel passage (2 S 23^{36}) reads 'of Zobah, Bani the Gadite,' which is probably the correct text.

HAGRITE(S).—A tribe of Arabian or Aramaean origin inhabiting territory to the E. of Gilead. Twice they were the object of campaigns by the trans-Jordan Israelite tribes, by whom they were crushingly defeated and expelled from their land, 1 Ch $5^{5, 19f}$ (AV **Hagarites**). They are referred to also in Ps 83^6 (AV, RV **Hagarenes**). Jaziz, a Hagrite, was 'over the flocks' of king David, 1 Ch 27^{31} (AV **Hagerite**). Because the name appears only in late passages, some have conjectured that it was a late appellation for Bedouin. It has been connected with the name **Hagar** (q.v.) and thought to mean 'descendants of Hagar,' *i.e.* Ishmaelites. But this is unlikely, since the Hagrites are named along with other tribes which, according to this view, they included. The Hagrites are mentioned in an inscription of Tiglath-pileser III. among a group of Aramaean tribes.

W. M. N.—H. H. R.

HAHIROTH.—See PI-HAHIROTH.

HAIL.—See PLAGUES OF EGYPT.

HAIR.—The usual word in OT is *śē'ār*, in NT *thrix*. Black hair was greatly admired by the Hebrews (Ca 4^1 5^{11} 7^5). Women have always worn the hair long, **baldness** or short hair being to them a disgrace (Is 3^{24} Ezk 16^7, 1 Co 11^{15}, Rev 9^8). Absalom's hair was cut once a year (2 S 14^{26}; cf rules for priests, Ezk 44^{20}), but men seem to have worn the hair longer than is seemly among us (Ca $5^{2, 11}$). In NT times it was a shame for a man to have long hair (1 Co 11^{14}). This probably never applied to the Arabs, who still wear the hair in long plaits. The locks of the Nazirite were, of course, an exception (Jg 16^{13} etc.). The Israelites were forbidden to cut the **corners** of their hair (Lv 19^{27} 21^5). In neighbouring nations the locks on the temples, in front of the ears, were allowed to grow in youth, and their removal was part of certain idolatrous rites connected with puberty and initiation to manhood. These peoples are referred to as those that 'cut the corners of the hair' (Jer 9^{26}). The practice was probably followed by Israel in early times, and the prohibition was required to distinguish them from idolaters. One curious result of the precept is seen among the orthodox Jews of to-day, who religiously preserve the love-locks which, in the far past, their ancestors religiously cut.

The Assyrians wore the hair long (Herod. i. 195). In Egypt the women wore long hair. The men shaved both head and **beard** (Gn 41^{14}), but they wore imposing wigs and false beards, the shape of the latter indicating the rank and dignity of the wearer (Herod. ii. 36, iii. 12; Wilkinson, *Anc. Egyp.* ii, 324, etc.). Josephus says that young gallants among the horsemen of Solomon sprinkled gold dust on their long hair, 'so that their heads sparkled with the reflection of the sunbeams from the gold' (*Ant.* VIII. vii. 3 [185]). Jezebel dressed her hair (2 K 9^{30}). Judith arranged her hair and put on a head-dress (Jth 10^3). St. Paul deprecates too much attention to 'braided hair' (1 Ti 2^9, cf 1 P 3^3). Artificial curls are mentioned in Is 3^{24}. The fillet of twisted silk or other material by which the hair was held in position stands for the hair itself in Jer 7^{29}. Combs are not mentioned in Scripture; but they were used in Egypt (Wilkinson, *op. cit.* ii, 349), and were doubtless well known in Palestine. The **barber** with his **razor** appears in Ezk 5^1 (cf *Shab.* i. 2, *Shebi.* viii. 5). Herod the Great dyed his hair black, to make himself look younger (Jos. *Ant.* xvi. viii. 1 [233]). We hear of false hair only once, and then it is used as a disguise (*ib.*, *Vit.* 11 [47]). Light ornaments of metal were worn on the hair (Is 3^{18}); in modern times coins of silver and gold are commonly worn; often a tiny bell is hung at the end of the tress. It is a grievous insult to cut or pluck the hair of head or cheek (2 S 10^{4n}, Is 7^{20} 50^6, Jer 48^{37}). Letting loose a woman's hair is a mark of abasement (Nu 5^{18}); or it may indicate self-humiliation (Lk 7^{38}). As a token of grief it was customary to cut the hair of both head and **beard** (Is 15^2, Jer 16^6 41^5, Am 8^{10}), to leave the beard untrimmed (2 S 19^{24}), and even to pluck out the hair (Ezr 9^3). Tearing the hair is still a common Oriental expression of sorrow. Arab women cut off their hair in mourning.

The hair of the lifelong **Nazirite** might never be cut (Jg 13^5, 1 S 1^{11}). The Nazirite for a specified time cut his hair only when the vow was performed. If, after the period of separation had begun, he contracted defilement, his head was shaved and the period began anew (Nu 6^{5n}). An Arab who is under vow must neither cut, comb, nor cleanse his hair, until the vow is fulfilled and his offering made. Then cutting the hair marks his return from the consecrated to the common condition (Wellhausen, *Skizzen*, iii, 167). Offerings of hair were common among ancient peoples

(W. R. Smith, *RS*[2] 324 ff; Wellhausen, *op. cit.* 118 f). It was believed that some part of a man's life resided in the hair, and that possession of hair from his head maintained a certain connexion with him, even after his death. Before freeing a prisoner, the Arabs cut a portion of his hair, and retained it, as evidence that he had been in their power (Wellh. *op. cit.* 118). Chalid b. al-Walid wore, in his military head-gear, hair from the head of Mohammed (ib. 146).

The colour of the hair was observed in the detection of leprosy (Lv 13[30ff] etc.). Thorough disinfection involved removal of the hair (14[8f]). The shaving of the head of the slave-girl to be married by her captor marked the change in her condition and prospects (Dt 21[12]; W. R. Smith, *Kinship*[2], 209). Swearing by the hair (Mt 5[36]) is now generally confined to the beard. The hoary head is held in honour (Pr 16[31], Wis 2[10] etc.), and white hair is associated with the appearance of Divine majesty (Dn 7[9], Rev 1[14]). W. E.

HAJEHUDIJAH occurs in RVm of 1 Ch 4[18] in an obscure genealogical list. It is probably not a proper name, but means 'the Jewess' (so AVm, RV, RSV). AV reads **Jehudijah.**

HAKKATAN ('the smallest').—The head of a family of returning exiles, Ezr 8[12], 1 Es 8[38] (AV **Acatan,** RV **Akatan**).

HAKKOZ (? 'thorn').—**1.** The eponym of a priestly family, 1 Ch 24[10], Ezr 2[61] (AV **Koz**), Neh 3[4, 21] 7[63] (AV all **Koz**), 1 Es 5[38] (AV **Accoz,** RV **Akkos**). They were unable to prove their pedigree. **2.** In 1 Ch 4[8] RV has Hakkoz, where AV has **Coz** and RSV **Koz** (q.v.).

HAKUPHA.—Eponym of a family of Nethinim (q.v.), who returned with Zerubbabel, Ezr 2[51], Neh 7[53], 1 Es 5[31] (AV **Acipha,** RV **Achipha**).

HALAH.—One of the places to which Israelites were deported by the king of Assyria on the capture of Samaria, 2 K 17[6] 18[11], 1 Ch 5[26], Ob[20] (RSV; AV, RV 'this host'). It was situated in the region of Gozan (q.v.), but it has not yet been satisfactorily identified.

HALAK ('smooth mountain').—An eminence that formed the southern limit of Joshua's conquests, Jos 11[17] 12[7]; probably modern *Jebel Ḥalâq.*

HALAKHAH.—See TALMUD.

HALHUL.—A city of Judah, Jos 15[58]. It is the modern *Ḥalhûl,* a large village 4 miles N. of Hebron.

HALI.—A city belonging to the tribe of Asher, Jos 19[25]. The site is unknown.

HALICARNASSUS was one of the six Dorian colonies on the coast of Caria. Though excluded from the Dorian confederacy (Hexapolis) on account of some ancient dispute (Herod. i. 144), it was a very important city in respect of politics, commerce, literature, and art. It was one of the States to which the Roman Senate sent letters in favour of the Jews in 139 B.C. (1 Mac 15[23]). It must therefore have been a free and self-governing city at that time. The decree of the city passed in the 1st cent. B.C., granting to the Jews religious liberty and the right to build their *proseuchai* beside the sea (Jos. *Ant.* XIV. x. 23 [256 ff]), attests the existence of an early Jewish colony in the city; and this was natural, as Halicarnassus was a considerable centre of trade owing to its favourable position on a bay opposite Cos, on the NW. side of the Ceramic Gulf. The city extended round the bay from promontory to promontory, and contained, among other buildings, a famous temple of Aphrodite.

The site of Halicarnassus is now called *Bodrum* (*i.e.* 'fortress'), from the Castle of St. Peter which was built by the Knights of St. John (whose headquarters were in Rhodes), under their Grand Master de Naillac, A.D. 1404.

HALL.—See PRAETORIUM.

HALLEL.—The name given in Rabbinical writings to the Pss 113–118—called the 'Egyptian Hallel' in distinction from the 'Great Hallel' (Ps 136), and from Pss 146–148, which are also psalms of Hallel character. The Hallel proper (Pss 113–118) was always regarded as forming one whole. The word *Hallel* means 'Praise,' and the name was given on account of the oft-recurring word *Hallelujah* ('Praise ye the Lord') in these psalms. The 'Hallel' was sung at the great Jewish festivals—Passover, Tabernacles, Pentecost, and Hanukkah ('Dedication' of the Temple).

HALLELUJAH.—A Hebrew expression, used liturgically in Hebrew worship as a short doxology, meaning 'praise ye Yah.' In the LXX it was transliterated, and from this came the Vulgate form and the AV **Alleluia** (To 13[18], Rev 19[1, 3f, 6]). In EV it is always translated 'praise the Lord' in OT, where, with one exception (Ps 135[3]) it occurs only at the beginning or the end of psalms, or both: at the beginning only in Pss 111 f; at the beginning and end in Pss 106, 113, 135, 146–150; at the end only in Pss 104 f, 115–117. In the LXX, however, it occurs only at the *beginning* of psalms as a *heading,* and this would seem to be the more natural usage. The double occurrence in the Hebrew text may in some cases be explained as due to accidental displacement (the heading of the following psalm being attached to the conclusion of the previous one).

As a liturgical heading the term served to mark off certain well-defined groups of psalms which were probably intended in the first instance for synagogue use, and may once have existed as an independent collection. With the exception of Ps 135, these groups (in the Heb. text) are three in number, viz. 104–106; 111–113, 115–117; and 146–150. But in the LXX a larger number of psalms is so distinguished, and the consequent grouping is more coherent, viz. 105–107; 111–119 (135–136); 146–150. In the synagogue liturgy the last-mentioned group (146–150), together with 135–136, has a well-defined place in the daily morning service, forming an integral part of the great 'Benediction of Song' (in certain parts of the early Church, also, it was customary to recite the 'Hallelujah' psalms daily).

The 'Hallel' (Pss 113–118), which forms a liturgical unit in the synagogue liturgy, is the most complete example of 'Hallelujah' psalms in collected form. (In the LXX, notice all the individual psalms of the group are headed '**Alleluia.**')

Like other Jewish liturgical terms (*e.g.* 'Amen'), 'Hallelujah' passed from the OT to the NT (cf Rev 19[1-7]), from the Jewish to the Christian Church (cf especially the early liturgies), and so to modern hymnody. G.H.B.—H.H.R.

HALLOHESH.—An individual or a family mentioned in connexion with the repairing of the wall, Neh 3[12] (AV **Halohesh**); he was one who sealed the covenant, 10[24].

HALLOW.—To 'hallow' is either 'to make holy' or 'to regard as holy.' Both meanings are very old. Thus Wycliffe translates Jn 17[17] 'Halwe thou hem in treuthe,' and Dt 32[51] 'Ye halwide not me amonge the sones of Yreal' (1388, 'Israel'). In the Lord's Prayer (Mt 6[9], Lk 11[2], the only places where 'hallow' occurs in the NT) the meaning is 'regard as sacred.' All the English versions have 'hallowed' in these verses except the Rhemish (Roman Catholic), which has 'sanctified'; but in the modern editions of this version the change has been made to 'hallowed.' Cf the ancient form of the Jewish Kaddish: 'May His great Name be magnified and hallowed in the world which He has created.'

HALOHESH, Neh 3[12] (AV).—See HALLOHESH.

HALT.—This English word is used (1) literally, as a verb 'to be lame, to limp,' or as an adjective 'lame.' Cf Tyndale's translation of Mt 11[5] 'The blynd se, the halt goo, the lepers are clensed.' Or (2) figuratively 'to stumble, fail,' as Jer 20[10] 'All my familiars watched for my halting.' From this comes the meaning (3) 'to be undecided, waver,' 1 K 18[21] 'How long halt [literally 'limp,' as on unequal legs] ye between two opinions?' The Revisers have introduced (4) the modern meaning 'to stop,' Is 10[32] 'This very day he will halt at Nob.'

HAM.—According to Gn 10[6] (P), the ancestor of the peoples linked geographically and politically with Egypt. In this verse his four sons are given as Cush (Nubia), Mizraim (Egypt), Put (? Libya), and Canaan. It has been suggested that Canaan is included because of its political and cultural dependence upon Egypt for many centuries. Cush may have been placed first either because the author listed the countries in their geographical position, starting with the south, or because Nubia was the predominant political power at the time when the list was composed. The genealogies of the nations in Gn 9, 10 contain several interwoven traditions. According to one tradition, Noah and his family being the sole survivors of the Flood, the whole earth was populated by their descendants (9[18f]), and his three sons people the whole of the known world: the three sons were **Shem, Ham,** and **Japheth.** According to another tradition Shem, **Canaan,** and Japheth were the three sons of Noah. That Canaan was the son, and not Ham, is clear from the fact that it was he who was cursed (Gn 9[20-27]). To combine the two traditions a redactor has added the words 'and Ham is the father of Canaan' in v.[18] and 'Ham the father of' in v.[22]. In the first mentioned tradition the three sons are represented as ancestors of large divisions of the world: in the second tradition they appear to be ancestors of much smaller units, perhaps within the limits of Syria-Palestine, but there is much dispute among scholars as to the peoples here intended. In Ps 78[51] 105 [23, 27] 106[22] Ham denotes Egypt, a usage which appears to be late and poetical. The name 'Ham' cannot be derived from any known Egyptian word for 'Egypt' or 'Nubia' and has, indeed, been connected with the West Semitic god Ḥammu. It seems probable that in the P tradition the peoples of the world were originally apportioned to the three sons of Noah on an entirely geographical basis—eastern (Shem), southern (Ham), and northern (Japheth). Because the southern group was under the political domination of the inhabitants of the Nile valley, Ham became synonymous with Egypt and the sphere of Egyptian influence. A. H. McN.—T. W. T.

HAM.—According to Gn 14[5], the district inhabited by the Zuzim, (q.v.). It is the modern *Ḥâm.*

HAM, LAND OF.—A poetical designation of Egypt used in the Psalms in reference to the sojourn there of the Children of Israel (Ps 105[23, 27] 106[22]). So also 'the tabernacles (RV, RSV 'tents') of Ham' (Ps 78[51]) stands for the dwellings of the Egyptians. The Egyptian etymologies that have been proposed for *Ḥām* are untenable, and the name must be connected with that of the son of Noah. F. Ll. G.

HAMAN.—The son of Hammedatha and enemy of the Jews in the Book of Esther. See ESTHER. In Ad. Est 12[6] 16[10, 17] (AV, RV) his name appears as **Aman** (RSV Haman).

In later times, at the Feast of Purim, it seems to have been customary to hang an effigy of Haman; but as the gibbet was sometimes made in the form of a cross, riots between Jews and Christians were the result, and a warning against insults to the Christian faith was issued by the emperor Theodosius II. (Cod. Theod. XVI. viii. 18; cf 21).

HAMATH.—A city on the Orontes, the capital of the kingdom of Hamath, to the territory of which the border of Israel extended in the reign of Solomon (1 K 8[65]), who is said to have built store-cities there (2 Ch 8[4]). Jeroboam II., the son of Joash, restored the kingdom to this northern limit (2 K 14[25, 28]), and it was regarded as the legitimate border of the land of Israel (Nu 34[8], Jos 13[5]), and was employed as a geographical term (Nu 13[21], cf Jg 3[3]). It is thought by some that the phrase rendered 'the entrance of Hamath' should be rendered as a proper name **Lebo-hamath.** The **Hamathite** is mentioned last of the sons of Canaan in the table of nations (Gn 10[18], 1 Ch 1[16]). During the time of David, Toi was king of Hamath (2 S 8[9]); the greatness of the city is referred to by the prophet Amos (Am 6[2]), and it is classed by Zechariah with Damascus, Tyre, and Sidon (Zec 9[1f]). The city was conquered by Tiglath-pileser III. and Sargon, and part of its inhabitants were deported and the land was largely colonized by Assyrians; its capture and subjugation are referred to in the prophetic literature (Is 10[9], Jer 49[23]; cf also 2 K 18[34], Is 36[19], 2 K 19[13]). Hamath is mentioned as one of the places to which Israelites were exiled (Is 11[11]), and it was also one of the places whose inhabitants were deported to colonize Israelite territory on the capture of Samaria (2 K 17[24, 30]). Jonathan advanced to Hamath against Demetrius (1 Mac 11[25]). Its name was changed by Antiochus IV. to Epiphania, but the old name survives in the modern *Ḥamā.* It has been excavated by a Danish expedition. See ASHIMA. L. W. K.—H. H. R.

HAMATH-ZOBAH.—A city in the neighbourhood of Tadmor, conquered by Solomon, 2 Ch 8[3]. Some have conjectured that it is identical with Hamath (q.v.), and that *Zobah* is used here in a broader sense than usual. On the other hand, it may be another Hamath situated in the territory of Zobah proper.

HAMMATH ('hot spring').—**1.** 'Father of the house of Rechab,' 1 Ch 2[55] (AV **Hemath**). **2.** One of the fortified cities of Naphtali, Jos 19[35]; probably the same as **Hammon** of 1 Ch 6[76] and **Hammoth-dor** of Jos 21[32]. It is doubtless the *Hamata* of the Talmud, the *Emmaus* or *Ammathus* of Josephus (*Ant.* XVIII. ii. 3 [36]), and the modern *Ḥammâm Ṭabarîyeh,* thirty-five minutes' walk S. of Tiberias, famous for its hot baths.

HAMMEAH, THE TOWER OF.—See HUNDRED, THE TOWER OF.

HAMMEDATHA.—The father of Haman, the chief minister of Ahasuerus and enemy of the Jews (Est 3[1, 10] 8[5] 9[10, 24]). In Ad. Est 12[6] 16[10, 17] (AV, RV) he is called **Amadathus.** The name is Persian, possibly from *mâh,* 'moon,' and *data* 'given'; or *hama,* 'equal,' and *dātā* 'giver' (so Gehman, *JBL* xliii, 326).

HAMMELECH occurs as a proper name in AV and RVm of Jer 36[26] 38[6], but there is little doubt that the rendering ought to be 'the king,' as in AVm, RV, RSV.

HAMMER.—See ARTS AND CRAFTS, **1, 2, 3.**

HAMMIPHKAD, GATE OF, Neh 3[31] (AV).—See MUSTER GATE.

HAMMOLECHETH ('the queen' ?).—The daughter of Machir and sister of Gilead, 1 Ch 7[17f] (AV **Hammoleketh**).

HAMMOLEKETH, 1 Ch 7[18] (AV).—See HAMMOLECHETH.

HAMMON ('hot spring').—**1.** A Levitical city in Naphtali, 1 Ch 6[76]; probably identical with **Hammath, 2** (q.v.). **2.** A town in Asher, Jos 19[28]; possibly modern *Umm il-ʿAwâmîd.*

HAMMOTH-DOR.—A Levitical city in Naphtali, Jos 21[32]; probably identical with **Hammath, 2** (q.v.).

HAMMUEL.—A Simeonite of the family of Shaul, 1 Ch 4[26] (AV **Hamuel**).

HAMMURABI was the sixth king of the 1st Dynasty of Babylon. Other kings, in N. Syria, contemporary with Hammurabi bore the same name. Hence attempts to identify Amraphel (Gn 14[1]) with Hammurabi of Babylon are arbitrary. The precise date of his accession is much disputed. Opinion ranges from *c* 1900 to 1728 B.C. The evidence makes plausible a choice between 1792–1750 B.C. and 1728–1686 B.C. as the dates of his long reign. His stock was Semitic. Amorites, westlanders, originally nomadic shepherds and caravaneers, founded the dynasty, with Babylon as royal capital. According to literary evidence from Babylonia and particularly from Mari, 375 miles from Babylon, on the Euphrates, the chief political centres were Isin and Larsa to the SE., Eshnunna to the NE., Mari to the NW., and Assur on upper Tigris, far N. of Babylon, which was a comparatively small power at the time of Hammurabi's accession. Between the sixth and thirty-third years of Hammurabi's reign he destroyed these by force of arms

and became undisputed master of territories from the Persian Gulf to Assur, and from Elam to Syria. In forty-two years this 'king of Amurru' became 'king of Sumer and Akkad, king of the four quarters' (of the world).

Hammurabi's own letters to his officials within his kingdom, the forty-two date-formulae of his reign, his 'Code' of laws, and many documents relating to legal and business transactions, are evidence of Hammurabi's successful drive towards centralized administration in every department of government under himself, through his officials, chiefly in Babylon, Sippar, and Larsa. The land, the canals which irrigated it, and the labourers who worked it, were objects of his special care, for all was, apparently, crown-land. Taxation, in kind or in silver, was universal, including even the temples. Trade was done on behalf of the government on a wide scale. Private wealth was rare. The state had its slaves, under an official, for duties on public works and in the palace.

Hammurabi seems to have 'secularized' the state more than did any of his predecessors, but he made the gods, their temples, and their staffs a chief concern. He reformed nothing in traditional religion, but he furthered a tendency which led to the national supremacy of the local god Marduk. Already under the third king of this dynasty, Babylonians swore by Shamash and Marduk. Shamash was the sun god, source of light which laid bare all human conduct. Hence he was judge and avenger of evil. Hammurabi was his 'favourite,' and the names of his five successors include Shamash. But he was also the 'darling' of Marduk whose name means 'young buffalo of the sun' or 'young sun.' At the beginning of his 'Code,' Hammurabi declares: 'The sublime Anu, king of the Anunnaki, and Enlil, lord of heaven and earth, who fixes men's destinies, have bestowed on Marduk, the beloved son of Enki, the dignity of Enlil (*i.e.* supremacy) over all peoples and have raised him above the Igigi.' From this time, by degrees, Marduk, a local god, became the national god of whom were predicated all the rôles of other and older deities. His temple was Esagila in which Hammurabi's statue as 'King of Justice' prayed without ceasing for the king. T. F.

HAMONAH ('multitude').—The name of a city in the valley of **Hamon-gog** (q.v.), Ezk 39[16].

HAMON-GOG ('Gog's multitude').—The name to be given to the valley (outside the Holy Land) where Gog and his multitude are to be buried, Ezk 39[11, 15].

HAMOR ('he-ass').—The ancestor of the **Shechemites.** In Jg 9[28] the inhabitants of Shechem are called 'men of Hamor.' The Hamorites were in turn a branch of the Hivites (Gn 34[2]). The term 'father of Shechem' may simply mean founder of the city of Shechem (cf similar usage in 1 Ch 2[45, 49–51]).

Gn 34 contains an early Shechem tradition of relations between the Simeon-Levi Israelite tribes and the Hamorites of Shechem. According to the personalized tale Shechem loved Dinah, the sister of Simeon and Levi and forces her. Hamor negotiates with her father and brothers for a marriage alliance between them. The alliance is agreed upon on condition that all male Hamorites undergo circumcision. While thus weakened they are treacherously attacked by Simeon and Levi and all the males are slain. For this unnatural breaking of tribal alliances these two are roundly condemned (Gn 49[5–7]).

There is a curious fusion of traditions in Ac 7[16], where Jacob 'and our fathers' are said to have been 'laid in the tomb that Abraham had bought for a sum of silver from the sons of Hamor in Shechem.' Abraham bought a tomb in Machpelah, not in Shechem (Gn 23[17f]), and Jacob was buried there (50[13]). Of the latter's sons Joseph alone is related in the OT as having been buried in the tomb bought from the sons of Hamor (Jos 24[32]). A. H. McN.—J. W. W.

HAMRAN.—An Edomite, 1 Ch 1[41] (AV **Amram**); called **Hemdan** in Gn 36[26].

HAMSTRING.—See Hock.

HAMUEL, 1 Ch 4[26] (AV).—See Hammuel.

HAMUL ('spared').—A son of Perez and grandson of Judah, Gn 46[12], Nu 26[21], 1 Ch 2[5]. The gentilic **Hamulites** occurs in Nu 26[21].

HAMUTAL.—Mother of the kings Jehoahaz and Zedekiah, sons of Josiah, 2 K 23[31] 24[18], Jer 52[1].

HANA.—Eponym of a family of Temple servants, 1 Es 5[30] (RSV; AV, RV **Anan**); called **Hanan** in Ezr 2[46], Neh 7[49].

HANAMEEL, Jer 32[7–9, 12] (AV).—See Hanamel.

HANAMEL.—Jeremiah's cousin, the son of his uncle Shallum, Jer 32[7–9, 12] (AV **Hanameel**).

HANAN ('gracious').—**1.** One of David's mighty men, 1 Ch 11[43]. **2.** A Benjamite chief, 1 Ch 8[23]. **3.** The youngest son of Azel, a descendant of Saul, 1 Ch 8[38] 9[44]. **4.** The son of Igdaliah; his sons had a chamber in the Temple, Jer 35[4]. **5.** The head of a family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2[46], Neh 7[49]; called **Hana** in 1 Es 5[30] (RSV; AV, RV **Anan**); probably the same as the signatory to the covenant, Neh 10[10]. **6.** One of the Levites who assisted Ezra in expounding the Law, Neh 8[7], 1 Es 9[48] (AV, RV **Ananias**). **7.** The son of Zaccur and one of the four treasurers appointed by Nehemiah, Neh 13[13]. **8, 9.** Two of those who sealed the covenant, Neh 10[22, 26].

HANANEEL.—See Hananel.

HANANEL ('El is gracious').—The name of a tower on the wall of Jerusalem (AV **Hananeel**). It is mentioned in Neh 3[1] in connexion with the repairing, and in 12[39] in connexion with the dedication, of the walls, and in Jer 31[38] and Zec 14[10] as a boundary of the restored and glorified Jerusalem. In both the passages in Nehemiah it is coupled with the tower of the **Hundred** (q.v.).

HANANI (probably hypocoristic 'Y" is gracious').—**1.** A brother, or more probably near kinsman, of Nehemiah, who brought tidings to Susa of the distressed condition of the Jews in Palestine, Neh 1[2]. Under Nehemiah he was made one of the governors of Jerusalem, 7[2]. **2.** A son of Heman, 1 Ch 25[4, 25]. **3.** The father of Jehu the seer, 1 K 16[1, 7], 2 Ch 19[2] 20[34]. Hanani reproved Asa for entering into alliance with Syria, and the angry king cast him into prison, 2 Ch 16[7]. **4.** A priest of the sons of Immer who had married a foreign wife, Ezr 10[20], 1 Es 9[21] (AV, RV **Ananias**). **5.** A chief musician mentioned in connexion with the dedication of the walls of Jerusalem, Neh 12[36].

HANANIAH ('Y" has been gracious').—**1.** One of the sons of Shashak, of the tribe of Benjamin, 1 Ch 8[24f]. **2.** One of the sons of Heman (1 Ch 25[4]), who could 'prophesy with lyres, with harps, and with cymbals' (v.[1]; cf v.[6]). **3.** One of king Uzziah's commanders, 2 Ch 26[11]. **4.** The son of Azzur, a Gibeonite (Jer 28[1]), who was condemned by Jeremiah, in the reign of Zedekiah, for prophesying falsely. The prophecy of Hananiah was to the effect that king Jeconiah and the captives in Babylon would all return in two years' time, bringing back with them the vessels of the Lord's house which Nebuchadnezzar had carried away (cf Dn 1[1f]). He expressed this in symbolic fashion by taking the 'bar' (cf Jer 27[2]) from Jeremiah's neck and breaking it, with the words, 'Thus says the Lord: Even so will I break the yoke of Nebuchadnezzar King of Babylon from the neck of all the nations within two years' (28[11]). In reply Jeremiah declares this prophecy to be false, and that because Hananiah has made the people to trust in a lie, he will die within the year. The words of Jeremiah come to pass: Hananiah dies in the seventh month (v.[17]). **5.** Father of Zedekiah, one of the princes of Judah, Jer 36[12]. **6.** Grandfather of Irijah, who arrested Jeremiah, 37[13]. **7.** A son of Zerubbabel, 1 Ch 3[19]. **8.** A priest, head of the house of Jeremiah, who returned with Nehemiah from Babylon, Neh 12[12]. **9.** Governor of 'the castle,' who, together with Hanani, was appointed by Nehemiah to the 'charge over

Jerusalem,' Neh 7[2]. **10.** The friend of Daniel, who received the name *Shadrach* from the chief of the eunuchs, Dn 1[6f. 11]. **11.** A Levite, whose 'sons' were contemporary with Ezra, 1 Es 8[48] (AV **Channuneus**, RV **Chanuneus**); **Merari** stands in the parallel Ezr 8[19]. Several others also bear this name, but they are not of importance (see Ezr 10[28], Neh 3[8, 30] 10[23] 12[41]; these are not necessarily *all* different people).

W. O. E. O.—H. H. R.

HAND is EV translation of Hebrew *yādh*, 'the open hand,' *kaph*, 'the closed hand,' and Greek *cheir*, 'hand.' Sometimes it is idiomatic, *e.g.* 'at hand' (Is 13[6] etc., Heb. *ḳārôbh*, Mt 26[18] etc., Gr. *engys*, literally 'near'). In determining the directions in the Orient, the face is turned to the east, not to the north as with us. So it comes that *yāmîn*, 'right hand,' and *śᵉmō'l*, 'left hand,' like the Arabiac *yamin* and *shimāl*, denote respectively 'south' and 'north.'

Of the two hands, the 'right hand' was the more important. To be at someone's right hand was to be allocated a place of honour (1 K 2[19], Ps 110[1]; cf also Lk 22[69], Ro 8[34] etc., the Redeemer at the right hand of God). The protector and the accuser in the law court stood on the right hand (cf Ps 109[31], Zec 3[1]). The left hand bears the shield in battle, thus leaving the right hand free to fight and attack. If a person is left-handed, this demands special mention (Jg 3[15, 21] 20[16]—all references to the Benjamites, and this suggests that left-handedness was common among them).

When a person is set apart to the priesthood, the phrase used is 'to fill the hand' (cf RVm at Ex 28[41] etc.). Again to pour water on another's hands was to be his servant (2 K 3[11]). Washing of the hands was a declaration of innocence (Dt 21[6], Ps 26[6], Mt 27[24]), and clean hands were a symbol of a righteous life (Job 22[30], Ps 18[20] 24[4] etc.). It also appears that certain marks or cuttings on the hands were evidence of what deity one served (Is 44[5]; cf Gal 6[17] and Rev 20[4], where the mark of the beast 'upon their hand' is probably an allusion to this custom).

But to acquire a correct understanding of a number of references to the hand in the OT, it has to be remembered that the Israelites regarded man as a psycho-physical organism. Hence the hand is not merely an instrument of the self, but is thought of as revealing psychical properties, and its various postures and actions reveal the various moods, feelings, aspirations, and desires of the individual (see A. R. Johnson, *The Vitality of the Individual in the Thought of Ancient Israel*). The hand on the head indicates grief or shame (2 S 13[19], Jer 2[37]). To raise or stretch the hand (especially towards God) is an expression of supplication (1 K 8[22], Ps 28[2]). Anger is expressed by clapping the hands (Nu 24[10] etc.). In the same way the action of the hands is an indication of the purpose of the self; this is evident from the oft occurring phrase 'to send forth the hand.' The purpose may be for good or evil, or can be aggressive, *e.g.* the hand laid upon one in judgment, to raise the hand against someone, and to act with a high hand is to act in a defiant manner. The action of the hand also ratifies or reinforces the spoken or the written word, *e.g.* to shake or clasp or strike the hands in ratifying an agreement, to place the hand under the thigh in making a vow or taking an oath. The hand is also associated with 'power,' and in certain passages it is correct to regard it as a synonym of power. The laying on of hands conveys this power (Gn 48[14]). And 'the hand of the Lord' and 'mighty hand' stand for the power of God. So real is this use of hand as an extension of the personality that it can be equivalent to the personal pronoun, especially when accompanied by the possessive pronoun, cf Is 45[12] 'I, even my hands,' to emphasize the personal pronoun.

Thrice (1 S 15[12], 2 S 18[18], Is 56[5]) *yādh* clearly means 'monument' or 'memorial,' probably a stone block or pillar; a hand may have been carved upon it, but this is uncertain.

W. E.—E. R. R.

HANDBAG.—See BAG.

HANDBREATH.—See WEIGHTS AND MEASURES.

HANDKERCHIEFS, only Ac 19[12], *soudaria*, a loan-word from the Latin, elsewhere rendered '**napkin**' or '**cloth**'; see DRESS, **5** (*a*).

HANDPIKES.—Only Ezk 39[9] (AV, RV handstaves), either clubs or the equally primitive throw-sticks.

HANDSTAVES.—See HANDPIKES.

HANES is associated with Zoan in a difficult context, Is 30[4]. Some would place it in Lower Egypt, with Anysis in Herodotus, and *Khininshi* in the annals of Ashurbanipal; but there can be little doubt that it is the Egyptian *Hnēs* (Heracleopolis Magna) on the west side of the Nile, just south of the Fayyum. Hnēs was apparently the home of the family from which the 22nd Dynasty arose, and the scanty documents of succeeding dynasties show it to have been of great importance: in the 25th and 26th Dynasties (*c* 715–600 B.C.) the standard silver of Egypt was specifically that of the treasury of Harshafe, the ram-headed god of Hnēs, and during the long reign of Psammetichus I. (*c* 660–610 B.C.) Hnēs was the centre of government for the whole of Upper Egypt. The LXX does not recognize the name of the city, and shows a wide divergence of reading, and appears to have read 'in vain' (*ḥinnām*) for Hanes (Ḥānēs).

F. Ll. G.

HANGING.—See CRIMES AND PUNISHMENTS, **10**; GALLOWS.

HANGING, HANGINGS.—1. The former is AV's term for the *portière* closing the entrance to the court of the Tent of Meeting (Ex 35[17] etc.), for the similar curtain at the entrance to the Tent itself (26[36f] etc.), and in Nu 3[31] for the 'veil' or hanging separating the Holy of Holies from the rest of the Tabernacle. In the last passage we should probably read, as in 4[5], 'the veil of the screen' (so RV, RSV; AV 'the covering vail'), **screen** being the substitute for 'hanging' in RV and RSV throughout. RV and RSV retain 'hangings,' however, as the translation of a different Hebrew word denoting the curtains 'of fine twined linen' which surrounded the court (Ex 27[9] etc.). See TABERNACLE.

2. In a corrupt passage, 2 K 23[7], we read of 'hangings for the Asherah' (RV, RSV; AV 'hangings for the grove'), woven by the women of Jerusalem. The true text is probably Lucian's, which has 'tunics,' the reference being to robes for an image of the goddess Asherah (q.v.). In the religious literature of Babylonia there is frequent reference to gifts of sheepskins, wool, etc., as clothing 'for the god' (*ana lubushti ili*).

A. R. S. K.

HANIEL, 1 Ch 7[39] (AV).—See HANNIEL, **2.**

HANNAH ('grace').—The wife of Elkanah, and mother of Samuel, 1 S 1 f. She came year by year to the sanctuary at Shiloh praying that she might become a mother; on one occasion she made a vow that if God would hear her prayer and grant her a son, she would dedicate him 'to the Lord all the days of his life.' Eli, the high priest, mistakes the silent movement of her lips as she prays, and accuses her of drunkenness; but when he finds out the mistake he had made, he gives her his blessing, and prays that her petition may be granted. Hannah returns home in peace, and in faith. In due time she gives birth to Samuel; when she has weaned him she brings him to Shiloh and dedicates him to God. It is on this occasion that the 'song' contained in 1 S 2[1–10] is put into her mouth. Afterwards she comes to visit him once a year, bringing him each time a 'little robe.' Hannah bore her husband three sons and two daughters after the birth of Samuel, 1 S 2[21]. See ELKANAH, SAMUEL.

W. O. E. O.

HANNATHON.—A place on the N. border of Zebulun, Jos 19[14]; possibly modern *Tell el-Bedeiwiyeh*.

HANNIEL ('grace of El').—**1.** Son of Ephod, and Manasseh's representative for dividing the land, Nu 34[23]. **2.** An Asherite, son of Ulla, 1 Ch 7[39] (AV Haniel).

HANOCH.—1. A grandson of Abraham by Keturah, and third of the sons of Midian, Gn 25[4], 1 Ch 1[33].

2. The eldest son of Reuben, Gn 46[9], Ex 6[14], Nu 26[5], 1 Ch 5[3]. The gentilic **Hanochites** occurs in Nu 26[5].

HANUN (' favoured ').—**1.** The son of Nahash, king of the Ammonites. Upon the death of the latter, David sent a message of condolence to Hanun, who, however, resented this action, and grossly insulted the messengers. The consequence was a war, which proved most disastrous to the Ammonites, 2 S 10[1ff.], 1 Ch 19[1ff.]. **2, 3.** The name occurs twice in the list of those who repaired the wall and the gates of Jerusalem, Neh 3[13, 30].

HAP, HAPLY.—The old word ' hap,' which means *chance*, is found in Ru 2[3] ' her hap was to light on a part of the field belonging to Boaz ' (RV ; RSV ' she happened to come '). The Hebrew is literally ' her chance chanced ' (AVm ' her hap happened '). ' Haply ' is ' by hap.' ' Happily ' is the same word under a different spelling, and had formerly the same meaning, though it now means ' by *good* luck.' In AV the spelling is now always ' haply,' but in the first edition it was ' happily ' in 2 Co 9[4] ' Lest happily if they of Macedonia come with mee, and find you unprepared, wee (that wee say not, you) should bee ashamed in this same confident boasting.' In RSV ' hapless ' is found in Ps 10[8, 10, 14], where AV has ' poor ' and RV ' helpless.'

HAPHARAIM.—A town in Issachar, Jos 19[19] (AV **Haphraim**). The *Onomasticon* places it 6 Roman miles N. of Legio. The site cannot be identified with any confidence ; it is possibly modern *eṭ-Ṭaiyibeh*.

HAPPIZZEZ.—The head of the eighteenth course of priests, 1 Ch 24[15] (AV **Aphses**).

HARA.—Mentioned in 1 Ch 5[26] as one of the places to which Israelites were deported by the king of Assyria on the capture of Samaria. But in the corresponding accounts (2 K 17[6] 18[11]) Hara is not mentioned, and most probably the name ' Hara ' in 1 Ch 5[26] is due to a corruption of the text. It is possible that the original text read *hārê Mādai*, ' mountains of Media,' corresponding to the cities of Media of the parallel passages (LXX ' the Median mountains ') ; and that *Mādai* dropped out of the text, and *hārê*, ' mountains of,' was changed to the proper name *Hara*. L. W. K.

HARADAH.—A station in the journeyings of the Israelites, mentioned only in Nu 33[24, 25]. It has not been identified, but was possibly in *Wâdī Lussân*.

HARAN.—**1.** Son of Terah, younger brother of Abram, and father of Lot, Gn 11[26], also father of Milcah and Iscah, v.[29]. **2.** A Gershonite Levite, 1 Ch 23[9].

HARAN.—A city in the NW. of Mesopotamia, marked by the modern village of *Ḥarrân*, situated on the *Balîkh*, a tributary of the Euphrates, and about nine hours' ride SE. of Edessa (*Urfa*). Terah and his son Abram and his family dwelt there on their way from Ur of the Chaldees to Canaan (Gn 11[31] 12[4, 5] ; cf Ac 7[2]), and Terah died there (Gn 11[32] ; cf Ac 7[4]). Nahor, Abram's brother, settled there ; hence it is called ' the city of Nahor ' in the story of Isaac and Jacob (cf Gn 24[10] 27[43]). Its position on one of the main trade-routes between Babylonia and the Mediterranean coast rendered it commercially of great importance (cf Ezk 27[23]). It was an important seat of the worship of Sin, the moon-god, and the frequent references to the city in the Assyrian inscriptions have to do mainly with the worship of this deity and the restoration of his temple. It is probable that Haran rebelled along with the city of Ashur in 763 B.C., and a reference to its subsequent capture and the suppression of the revolt may be seen in 2 K 19[12] ; Sargon later on restored the ancient religious privileges of which the city had been then deprived. The worship of the moon-god at Haran appears to have long survived the introduction of Christianity. L. W. K.

HARARITE.—An epithet of doubtful meaning (possibly ' mountain-dweller,' but more probably ' native of [an unknown] Haran ') applied to two of David's heroes. **1.** Shammah the son of Agee, 2 S 23[11, 33], 1 Ch 11[34] (where **Shagee** should probably be **Shammah**). **2.** Ahiam the son of Sharar, 2 S 23[33] (RV **Ararite** ; AV, RSV **Hararite**), 1 Ch 11[35].

HARBONA.—The third of the seven eunuchs or chamberlains of King Ahasuerus, Est 1[10] 7[9] (in the latter AV, RV **Harbonah**). It was on his suggestion that Haman was hanged upon the gallows which he had prepared for Mordecai.

HARBONAH, Est 7[9] (AV, RV).—See HARBONA.

HARD.—Besides other meanings which are still in use, ' hard ' sometimes means *close* : Jg 9[52] ' And Abimelech . . . went hard unto (RSV ' drew near to ') the door of the tower to burn it with fire ' ; Ps 63[8] ' My soul followeth hard after (RSV ' clings to ') thee ' ; Ac 18[7] ' Justus . . . whose house joined hard to (RSV ' was next door to ') the synagogue.' Cf Job 17[1] in Coverdale, ' I am harde at deathes dore.'

Hardiness is used in AV in Jth 16[10] for courage : ' the Medes were daunted at her hardiness ' (RV ' boldness,' RSV ' daring ').

Hardly means either ' harshly,' as Gn 16[6] ' Sarai dealt hardly (RSV ' harshly ') with her,' or ' with difficulty,' as Ex 13[15] ' Pharaoh would hardly let us (RSV ' stubbornly refused to let us ') go ' ; Mt 19[23] (AV) ' a rich man shall hardly enter (RSV ' it will be hard for a rich man to enter ' ; cf RV) into the kingdom of heaven ' ; Lk 9[39] ' bruising him, hardly departeth from (RSV ' will hardly leave ') him ; Ac 27[8] ' And, hardly passing it (RSV ' coasting along it with difficulty ' ; cf RV), came unto a place which is called The fair havens.'

Hardness for modern ' hardship ' occurs in 2 Ti 2[3] (AV) ' endure hardness (RSV ' take your share of suffering ' ; cf RV) as a good soldier.' Cf Shakespeare, *Cymb.* III. vi. 21—

> ' Hardness ever
> Of hardiness is mother.'

HARDENING.—Both in the OT (1 S 6[6]) and in the NT (Ro 9[17f]) Pharaoh's hardening is regarded as typical. In Exodus, two explanations are given of his stubbornness : (1) ' Pharaoh hardened his heart ' (8[15, 32]) ; (2) ' the Lord hardened the heart of Pharaoh ' (9[12]). The former statement recognizes man's moral responsibility, and is in accord with the exhortation, ' Harden not your hearts ' (Ps 95[8], He 3[8]). To the latter statement St. Paul confines his thought when he insists on the sovereignty of God as manifested in the election of grace (Ro 9[18]) ; but having vindicated the absolute freedom of the Divine action, the Apostle proceeds to show that the Divine choice is neither arbitrary nor unjust. The difficulty involved in combining the two statements is philosophical rather than theological. ' The attempt to understand the relation between the human will and the Divine seems to lead of necessity to an antinomy which thought has not as yet succeeded in transcending ' (Denney, *EGT* ii. 663). The same Divine action softens the heart of him who repents and finds mercy, but hardens the heart of him who obstinately refuses to give heed to the Divine call. ' The sweet persuasion of His voice respects thy sanctity of will.' The RV rightly renders Mk 3[5] ' being grieved at the hardening of their heart ' ; grief is the permanent attitude of the Saviour towards all in whom there is any sign of this ' process of moral ossification which renders men insensible to spiritual truth ' (Swete, *Com. in loc.*). J. G. T.

HARE (Lv 11[6], Dt 14[7]).—Four species of hare are known in Palestine, of which the commonest is the *Lepus syriacus*. The hare does not really ' chew the cud,' though, like the coney, it appears to do so ; it was however, unclean because it did not ' divide the hoof.' Hares are to-day eaten by the Arabs.

HAREM.—Found in RSV in Est 2[3, 9, 11, 13f], where AV and RV have ' house of the women.'

HAREPH.—A Judahite chief, 1 Ch 2[51].

HARHAIAH.—Father of Uzziah, a goldsmith who repaired a portion of the wall of Jerusalem, Neh 3[8].

HARHAS.—Ancestor of Shallum, the husband of the prophetess Huldah, 2 K 22[14]; called **Hasrah** in 2 Ch 34[22].

HAR-HERES.—A mountain from which the Danites failed to expel the Amorites, Jg 1[34f] (AV, RV 'mount Heres'). It is probably connected with **Beth-shemesh** (1 K 4[9], 2 Ch 28[18]) or **Ir-shemesh** (Jos 19[41]) on the boundary between Judah and Dan. See BETH-SHEMESH, **1.**

HARHUR.—One whose sons returned among the Nethinim (q.v.) with Zerubbabel, Ezr 2[51], Neh 7[53]; called **Asur** in 1 Es 5[31] (AV **Assur**).

HARIM.—**1.** A lay family which appears in the list of the returning exiles, Ezr 2[32]=Neh 7[35]; of those who had married foreign wives, Ezr 10[31] (perhaps the **Annan** of 1 Es 9[32] [AV, RV **Annas**]); and of those who signed the covenant, Neh 10[27]. **2.** A priestly family in the same lists, Ezr 2[39]=Neh 7[42]=1 Es 5[25] (AV **Carme**, RV **Charme**), Ezr 10[21], Neh 10[5]. The name is found among the heads of priestly families in the days of Joiakim, Neh 12[15], and as the third of the twenty-four courses, 1 Ch 24[8]. If the conjecture that **Rehum** in Neh 12[3] is a miswriting of Harim is correct, the name is found also among the priests and Levites who returned with Zerubbabel. To which family Malchijah the son of Harim, one of the builders of the wall (Neh 3[11]), belonged cannot be determined.

HARIPH.—The head of a family of which 112 members returned with Zerubbabel, Neh 7[24], and who signed the covenant, Neh 10[19]; called **Jorah** in Ezr 2[18], 1 Es 5[16] (AV **Azephurith**, RV **Arsiphurith**). In 1 Ch 12[5] one of David's companions is called a **Haruphite**, where the *Kᵉrê* has **Hariphite**. If the latter reading is correct it connects with the same name, Hariph.

HARLOT (Heb. *zōnāh*, *'ishshāh nokrīyyāh* [literally 'strange woman'], *ḳᵉdhēshāh*, Gr *pornē*) in EV denotes unchaste women, especially those devoted to immoral service in idol sanctuaries, or given to a dissolute life for gain. We find evidence of their existence in very early times (Gn 38). From the name 'strange woman' in Pr 6[24] 23[27] etc. (cf 1 K 11[1], Ezr 10[2] etc.), we may perhaps infer that in later times they were chiefly foreigners. By songs (Is 23[16]) and insinuating arts (Pr 6[24] etc.) they captivated the unwary. They acted also as decoys to the dens of robbery and murder (Pr 7[22, 27] etc.). Wealth was lavished upon them (Ezk 16[33, 39] 23[26] etc.; cf Lk 15[30]). Apart from breaches of the marriage vows, immoral relations between the sexes were deemed venial (Dt 22[28ff]). A man might not compel his daughter to sin (Lv 19[29]), but apparently she was free herself to take that way. Children of harlots were practical outlaws (Dt 23[2], Jg 11[1ff], Jn 8[41]), and in NT times the harlot lived under social ban (Mt 21[32] etc.).

The picture takes a darker hue when we remember that in ancient Syria the reproductive forces of nature were deified, and worshipped in grossly immoral rites. Both men and women prostituted themselves in the service of the gods. The Canaanite sanctuaries were practically gigantic brothels, legalized by the sanctions of religion. The appeal made to the baser passions of the Israelites was all too successful (Am 2[7], Hos 4[13ff] etc.), and it is grimly significant that the prophets designate apostasy and declension by 'whoredom.' There were therefore special reasons for the exceptional law regarding the priest's daughter (Lv 21[9]). Religious prostitution was prohibited in Israel (Dt 23[17]), and all gain from the unholy calling as Temple revenue was spurned (see Driver, *Deut., in loc.*). The pure religion of Y" was delivered from this peril only by the stern discipline of the Exile. A similar danger beset the early Church, *e.g.* in Greece and Asia Minor; hence such passages as Ro 1[24ff], 1 Co 6[9ff], Gal 5[19] etc., and the decree of the Apostolic Council (Ac 15[20, 29]). W. E.

HAR-MAGEDON, Rev 16[16] (RV).—See ARMAGEDDON.

HARMON.—Place to which the people of Samaria were to be exiled, Am 4[3] (AV 'the palace'). No place of this name is known.

HARMONIES OF THE GOSPELS.—This term is applied to two quite different types of works: (1) an interwoven, continuous narrative utilizing the four Gospels or at least the Synoptics; and (2) an arrangement in parallel columns of these three or four, showing correspondences and divergencies.

(1) The beginnings of the first kind go back to Tatian, who about A.D. 175 combined in his *Diatessaron* the four Gospels into one continuous narrative, probably first in Greek (a small fragment from Dura Europos was published in 1935).

(2) The first known example of the second type, an arrangement of the Gospels in parallel columns, is the work of Ammonius (3rd cent.), who is said to have taken Matthew and to have placed beside it (in full? or in references?) the corresponding passages from the other Gospels. The *Sections* and *Canons* of Eusebius (4th cent.) develop this still further, enabling one to discover at a glance the parallel passages. The following are the principal modern harmonies of the second type: A. Huck, *Synopse der drei ersten Evangelien*[10] [in Greek] (Tübingen: Mohr, 1950); E. D. Burton and E. J. Goodspeed, *A Harmony of the Synoptic Gospels in Greek* (University of Chicago, 1920); B. H. Throckmorton, *Gospel Parallels: A Synopsis of the First Three Gospels* [in the Revised Standard Version] (Nelson, 1949); and W. Bundy, *A Syllabus and Synopsis of the First Three Gospels* (Bobbs-Merrill, 1932). J. S. B.—**J. H. S.**

HARNEPHER.—An Asherite, 1 Ch 7[36].

HARNESS.—See, generally ARMOUR, which RV and RSV substitute in most places for AV 'harness.' Similarly 'harnessed' (Ex 13[18]) becomes 'armed' (RV) or 'equipped' (RSV), and the 'well harnessed' camp of 1 Mac 4[7] becomes 'fortified.' For 'the joints of the harness' of 1 K 22[34] RVm substitutes 'the lower armour and breastplate' and RSV 'the scale armour and the breastplate,' the former being probably 'the *tassets* or jointed appendages of the cuirass, covering the abdomen' (Skinner, *Cent. Bible, in loc.*). The only passage in AV where 'harness' as a verb has its modern signification is Jer 46[4] 'harness the horses' (so RV, RSV), the verb in the original being that used in Gn 46[29], Ex 14[6] etc. for yoking the horses to the chariots. In Mic 1[13] RSV has 'harness the steeds' where Hebrew employs a different verb (AV, RV 'bind'). A. R. S. K.

HAROD.—A spring, not a well as in AV, near the mountains of Gilboa (q.v.), where Gideon tested his men (Jg 7[1]), and which was probably the site of Saul's camp before his fatal battle with the Philistines (1 S 29[1]). It has been very generally identified with the copious *'Ain Jālûd* in the Vale of Jezreel, E. of *Zer'în*. The water rises in a natural cavern and spreads itself out into a considerable pool, partially artificial, before descending the valley. It is one of the most plentiful and beautiful fountains in Palestine, and one that must always have been taken into account in military movements in the neighbourhood. The place from which Shammah came (see next article) may or may not have been beside this spring. E. W. G. M.

HARODITE.—A gentilic from Harod (q.v.), applied in 2 S 23[25] to two of David's heroes, Shammah and Elika (so AV, RV; RSV 'of Harod'). The second is wanting in LXX and in the parallel 1 Ch 11[27]. In the latter passage, by a common scribal error 'Harodite' has become **Harorite** (so AV, RV; RSV 'of Harod').

HAROEH ('the seer').—A Judahite, 1 Ch 2[52]. Perhaps the name should be corrected to **Reaiah,** which stands in 1 Ch 4[2].

HARORITE.—See HARODITE.

HAROSHETH-HA-GOIIM.—A place mentioned only in the account of the fight with Sisera, Jg 4[2, 13, 16] (AV, RV 'Harosheth of the Gentiles'). From it Sisera advanced, and thither he fled. It may be modern *Tell 'Amr*, near *el-Ḥāriṭiyeh*. We do not know why the descriptive 'of the Gentiles' is added.

HARP.—See MUSIC AND MUSICAL INSTRUMENTS, **4** (1).

HARPOON.—Found only in RSV in Job 41[7], where AV and RSV have 'barbed irons.'

HARROW.—In 2 S 12[31]—a passage which had become corrupt before the date of 1 Ch 20[3]—as rendered in AV and RV, David is represented as torturing the Ammonites 'under harrows of iron.' The true text and rendering, however, have reference to various forms of forced labour (so RSV), and the 'harrows' become 'iron picks' or some similar implement.

The Hebrew verb translated 'harrow' in Job 39[10] is elsewhere rendered 'break the clods'; so Hos 10[11], Is 28[24] (AV, RV; RSV 'harrow' in both passages). In Hastings' *DB* ii, 306 several reasons were given for rejecting the universal modern rendering of the original by 'harrow.' This conclusion has since been confirmed by the discovery of the original Hebrew of Sir 38[26] where 'who setteth his mind to "harrow" in the furrows' would be an absurd rendering. There is no evidence that the Hebrews at any time made use of an implement corresponding to our harrow. Stiff soil was broken up by the plough or the mattock.

A. R. S. K.

HARSHA.—Eponym of a family of Nethinim (q.v.), Ezr 2[52], Neh 7[54], called **Charea** in 1 Es 5[32].

HARSITH, Jer 19[2] (RV).—See POTSHERD GATE.

HART, HIND (*'ayyāl*, *'ayyālāh*, and *'ayyeleth*).—This is the fallow-deer, the *'iyyāl* of the Arabs, *Cervus dama*. It is not common in W. Palestine to-day, but evidently was so once, 1 K 4[23]; it is mentioned as a clean animal in Dt 12[15, 22] etc. Its habits when pursued are referred to in Ps 42[1] and La 1[6]. The '**fallow-deer**' of Dt 14[5] and 1 K 4[23] (AV; RV, RSV 'roebuck' in both passages) refers to the **roe** (q.v.). The hind is mentioned in Gn 49[21], Job 39[1], Ps 29[9] (RSV 'oaks' in the last), etc. Its care of its young (Jer 14[5]), the secrecy of its hiding-place when calving (Job 39[1]), and its timidity at such times (Ps 29[9]; but see above) are all noticed. In Gn 49[21] Naphtali is compared to 'a hind let loose,' although many prefer to render a 'slender terebinth.'

E. W. G. M.

HARUM.—A Judahite, 1 Ch 4[8].

HARUMAPH.—Father of Jedaiah, who assisted in repairing the walls of Jerusalem, Neh 3[10].

HARUPHITE.—See HARIPH.

HARUZ.—Father of Meshullemeth, mother of Amon king of Judah, 2 K 21[19].

HARVEST.—See AGRICULTURE.

HASADIAH ('Y" is kind').—**1.** A son of Zerubbabel, 1 Ch 3[20]. **2.** An ancestor of Baruch, Bar 1[1] (AV, RV **Asadias**).

HASENUAH, 1 Ch 9[7] (AV).—See HASSENUAH.

HASHABIAH ('Y" has taken account').—**1, 2.** Two Levites of the family of Merari, 1 Ch 6[45] 9[14], Neh 11[15]. **3.** One of the sons of Jeduthun, 1 Ch 25[3, 19]. **4.** A Hebronite, 1 Ch 26[30]. **5.** The officer over the Levites, 1 Ch 27[17]. **6.** A chief of the Levites in the time of Josiah, 2 Ch 35[9], 1 Es 1[9] (AV **Assabias**, RV **Sabias**). **7.** One of the Levites who returned with Ezra, Ezr 8[19], 1 Es 8[48] (AV **Asebia**, RV **Asebias**). **8.** One of the twelve priests entrusted with the holy vessels, Ezr 8[24], 1 Es 8[54] (AV **Assanias**, RV **Assamias**). **9.** The 'ruler of half the district of Keilah,' who helped to repair the wall (Neh 3[17]), and sealed the covenant (Neh 10[11] 12[24]). **10.** A Levite, Neh 11[22]. **11.** A priest, Neh 12[21]. In all probability these eleven are not all distinct, but we have not sufficient data to enable us to make the necessary reduction of the list. In Ezr 10[25] RSV substitutes Hashabiah for **Malchijah** (2°) to agree with 1 Es 9[26] where Greek has **Asibias** (q.v.).

HASHABNAH.—One of those who sealed the covenant, Neh 10[25].

HASHABNEIAH.—**1.** Father of a builder of the wall, Neh 3[10]. **2.** A Levite, Neh 9[5]. It is possible that we ought to identify this name with **Hashabiah** of Ezr 8[19, 24], Neh 10[11] 11[22] 12[24].

HASHABNIAH.—AV spelling of **Hashabneiah** (q.v.).

HASHBADANA, Neh 8[4] (AV).—See HASHBADDANAH.

HASHBADDANAH.—One of the men who stood on the left hand of Ezra at the reading of the Law, Neh 8[4] (AV **Hashbadana**); called **Nabariah** in 1 Es 9[44] (AV, RV **Nabarias**).

HASHEM.—See GIZONITE, JASHEN.

HASHMONAH.—A station in the journeyings of the Israelites, near Kadesh-barnea, Nu 33[29f]: possibly modern *Wâdī el-Hashim*.

HASHUB, Neh 3[11, 23] 10[23] 11[15] (AV).—See HASSHUB.

HASHUBAH.—A son of Zerubbabel, 1 Ch 3[20].

HASHUM.—**1.** The eponym of a family of returning exiles, Ezr 2[19] 10[33], Neh 7[22] 10[18], 1 Es 9[33] (AV, RV **Asom**). **2.** One of those who stood on Ezra's left hand at the reading of the Law, Neh 8[4]; called **Lothasubus** in 1 Es 9[44].

HASIDAEANS (AV **Assideans**; Heb. *ḥᵃsîdhîm* 'the pious'). A religious group in Judaea in the early 2nd cent. B.C. (1 Mac 2[42]), to be distinguished from the priestly party who had come under the influence of Hellenism. The Hasidaeans were devoted to the Law, and refused to compromise in any way with the Hellenizing policy enforced by Antiochus IV. They furnished the martyrs of the persecution under that monarch. Strictly speaking, they were not a political party, and probably lived in the smaller Jewish towns, as well as in Jerusalem. They joined with Mattathias in his revolt against the Syrians, but were not interested in the political outcome of the struggle, except as it gave them the right to worship God according to the Torah. After Judas had cleansed the Temple, they separated themselves from the Hasmonaean or Maccabaean party, and united with them only temporarily, when they found that under Alcimus the Temple worship was again threatened. Their defection from Judas was largely the cause of his downfall.

Their precise relation to the Scribal movement cannot be stated because of lack of data. The Hasidaeans may have included all the orthodox scribes and may have been devotees to the growing Oral Law. If so, they were thus the forerunners of the Pharisees and possibly of the Essenes. The latter party, although differing from them in rejecting animal sacrifice, is often regarded as preserving their name, for some suppose that 'Essene' is a variant of *hāsîdh*.

A similarly named group, usually called the Hasidim, originated in Eastern Europe in the 18th cent. No relationship exists between the two. The later movement has been popularized by Martin Buber.

S. M.—S. S.

HASMONAEANS.—See MACCABEES.

HASRAH.—**1.** Grandfather of Shallum, the husband of Huldah the prophetess, 2 Ch 34[22]; called **Harhas** in 2 K 22[14]. **2.** The head of a family of Nethinim (q.v.), which returned with Zerubbabel, 1 Es 5[31] (RSV; AV **Azara**, RV **Asara**); omitted in the parallel lists in Ezra and Nehemiah.

HASSENAAH.—His sons built the Fish Gate, Neh 3[3]. The name, which is probably the same as **Hassenuah** (q.v.), seems to be derived from some place *Senaah* (cf Ezr 2[35], Neh 7[38]). See SENAAH.

HASSENUAH.—A family name found in two different connexions in the two lists of Benjamite inhabitants of Jerusalem, 1 Ch 9[7] (AV **Hasenuah**), Neh 11[9] (AV **Senuah**). Cf preceding article.

HASSHUB.—**1. 2.** Two builders of the wall, Neh 3[11, 23] (AV **Hashub**). **3.** One of those who signed the covenant, Neh 10[23] (AV **Hashub**). **4.** A Levite of the sons of Merari, 1 Ch 9[14], Neh 11[15] (AV **Hashub** in latter).

HASSOPHERETH.—A family of Nethinim, Ezr 2[55] (AV **Sophereth**), 1 Es 5[33] (AV **Azaphion**, RV **Assaphioth**): called **Sophereth** in Neh 7[57].

HASUPHA.—The head of a family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2[43], Neh 7[46], 1 Es 5[29] (AV, RV **Asipha**).

HAT.—See DRESS, **5** (*a*).

HATACH, Est 4[5] etc. (AV).—See HATHACH.

HATCHET.—Ps 74[6] (RV, RSV; AV **axe**).—See ARTS AND CRAFTS, **1.**

HATHACH.—A eunuch appointed by the king to attend on queen Esther. By his means Esther learned from Mordecai the details of Haman's plot against the Jews, Est 4[5, 6, 9, 10] (AV, **Hatach**).

HATHATH.—A son of Othniel, 1 Ch 4[13].

HATIPHA.—Eponym of a family of Nethinim (q.v.), who returned with Zerubbabel, Ezr 2[54], Neh 7[56], 1 Es 5[32] (AV, RV **Atipha**).

HATITA.—Eponym of a guild of porters, who returned with Zerubbabel, Ezr 2[42], Neh 7[45], 1 Es 5[28] (AV **Teta,** RV **Ateta**).

HATRED.—Personal hatred is permitted in the OT, but forbidden in the NT (Mt 5[43–45]). Love is to characterize the Christian life (Mt 22[37–40]). The only hatred it can express is hatred of evil (He 1[9], Jd [23], Rev 2[6] 17[16]). In Lk 14[26] and Jn 12[25] the use of the verb 'hate' by Jesus is usually explained as Oriental hyperbole. D. A. H.

HATTIL.—Eponym of a family of 'the sons of Solomon's servants,' Ezr 2[57], Neh 7[59], 1 Es 5[34] (AV **Hagia,** RV **Agia**).

HATTUSH.—1. A priestly family that returned with Zerubbabel (Neh 12[2]), and signed the covenant (Neh 10[4]). **2.** A descendant of David who returned with Ezra, Ezr 8[2] (where we should read 'Hattush, the son of Shecaniah'; cf 1 Es 8[29], where AV has **Lettus** and RV **Attus**), 1 Ch 3[22]. **3.** A builder of the wall of Jerusalem, Neh 3[10].

HAUNT.—In older English 'haunt' conveyed no reproach, but meant simply to spend time in or frequent a place. Thus Tyndale translates Jn 3[22] 'After these thinges cam Jesus and his disciples into the Jewes londe, and ther he haunted with them and baptized.' So 1 S 30[31], Ezk 26[17], and the substantive in 1 S 23[22] 'know and see the place where his haunt is.'

HAURAN.—The elevated district SE. from Mt. Hermon; in particular the fertile basin, about 50 miles square and 2000 feet above sea-level, between the *Jaulân* and *Lejâ*. Only in Ezk 47[16, 18] is the name mentioned, and there as the ideal border of Canaan on the east. The modern Arabs call essentially the same district *el-Ḥaurân* or *Jebel Ḥaurân*. However, the (Mount) Salmon of Ps 68[14] has sometimes been equated with the *Jebel Ḥaurân*. The name occurs also in the ancient inscriptions of Assyria. In Graeco-Roman times the same general region was known as *Auranitis*; it was bounded on the N. by Trachonitis, and on the NW. by Gaulanitis and Batanaea. All these districts belonged to Herod the Great. Upon his death they fell to Philip (Lk 3[1]). The eastern portion is now inhabited by Druzes. The entire territory is to-day practically treeless, and is noted for its production of wheat.

G. L. R.—E. G. K.

HAURAN, 2 Mac 4[40] (RV).—See AURANUS.

HAVILAH.—1. Son of Cush, Gn 10[7], 1 Ch 1[9]. **2.** Son of Joktan, Gn 10[29], 1 Ch 1[23]. **3.** The land of Havilah is said to have been compassed by the Pishon, one of the four rivers of the Garden of Eden, Gn 2[11] (see EDEN, GARDEN OF). It is said to have produced gold, bdellium, and onyx, v.[12]. **4.** The limits of Ishmaelite territory are described as 'from Havilah to Shur,' Gn 25[18]. It was in this area that Saul defeated the Amalekites, 1 S 25[7]. It seems likely that more than one region is indicated by these references, but it is impossible to identify them with any security, despite the many conjectures which have been made.

HAVOTH-JAIR.—The AV spelling of **Havvoth-jair** (q.v.).

HAVVOTH-JAIR.—The word Havvoth means 'tent villages.' In Nu 32[41] these villages are assigned to Gilead, but in Dt 3[14] and Jos 13[20] to Bashan. It is possible that the boundaries varied in different periods. According to Nu 32[41], Dt 3[14], and 1 K 4[13] they were named after Jair, the son of Manasseh, but according to Jg 10[4] after the minor Judge Jair. The Aramaean tribe of Geshur (q.v.) is said to have taken these villages, 1 Ch 2[23].

HAWK.—The Hebrew words for hawks, falcons, and kites, are not easily distinguished for lack of adequate information. The Hebrew *nēṣ* (cf Ugar. *nṣ*) from *nāṣaṣ* 'flashed' is apparently a generic term (cf Ezk 17) for the hawk (LXX, Vulgate), of which some eighteen species exist in Palestine; its position in the list of unclean birds, which are given in diminishing order of size, suggests 'kestrel' (*falco tinnunculus*) and/or 'sparrow-hawk' (*accipiter nisus*) as meant in the OT. The kestrel, which is a resident, abounds almost everywhere, and the sparrow-hawk is almost equally common. The description of the *nēṣ* as spreading its wings to the south (Job 39[26]) refers to the habit of many small hawks of migrating, after breeding in the north, southwards to the basin of the Red Sea; and their raptorial habit of life explains why they are accounted unclean (Lv 11[16], Dt 14[15]). The translation of the Hebrew *taḥmās* as 'night-hawk' (EV) is a contradiction in terms, since the hawk is a diurnal hunter; the bird meant is perhaps the 'short-eared owl' (cf LXX, Vulgate), which too as a raptor is included with the unclean birds (Lv 11[16], Dt 14[15]). G. R. D.

HAY.—See GRASS.

HAZAEL usurped the throne of Syria (*c* 843 B.C.) by murdering Ben-hadad (q.v.). An inscription on a basalt statue of Shalmaneser III. says: 'Hazael, son of a nobody, seized the throne.' According to 1 K 19[15] Elijah is commanded by Yahweh to anoint Hazael to be king of Syria. The next mention of him describes how Ben-hadad, who is ill, sends Hazael to Elisha to enquire whether he will recover. Elisha says to Hazael: 'Go, say to him, "You shall certainly recover"; but the Lord has shown me that he shall certainly die.' . . . 'The Lord has shown me that you are to be king over Syria' (2 K 8[10, 13]). Ben-hadad was murdered next day and Hazael succeeded him (2 K 8[15]). The similarities in those two stories have led some to regard them as two accounts from different sources of the same event.

Shalmaneser records on the famous Black Obelisk his expedition against Hazael in 841 B.C. He claims a great victory and says he ravaged the land, but Damascus did not fall. The next biblical mention of Hazael shows him fighting at Ramoth-gilead against the allied armies of Joram, king of Israel, and Ahaziah, king of Judah (2 K 8[28f] 9[14f]); the narrative here breaks off to deal with other matters, and does not say what the result of the fighting was, but from 2 K 10[32ff] it is clear not only that Hazael was victorious then, but that he continued to be so for a number of years (see, further, 2 K 12[17ff]); indeed, it was not until his death that the Israelites were once more able to assert themselves. The Syrian oppression is recorded by Amos (1[3–5]), and this prophet who inveighs against those who lie on beds inlaid with ivory (6[4]) might have connected Hazael with the same fault, for at Arslan Tash in northern Syria such a piece of ivory decoration has been found inscribed with Hazael's name. The date of Hazael's death is uncertain, but probably it was *c* 801 B.C. (see 2 K 13[22]). W. O. E. O.—W. D. McH.

HAZAIAH.—A descendant of Judah, Neh 11[5].

HAZAR-ADDAR.—A place on the southern border of Canaan, W. of Kadesh-barnea (Nu 34[4]); possibly modern *Khirbet el-Qudeirât*. See also ADDAR, HEZRON, **3.**

HAZAR-ENAN.—A place mentioned in Nu 34[9f] as the northern boundary of Israel. In Ezk 48[1] (RSV **Hazar-enon**) it figures as one of the ideal boundaries.

In Ezk 47[17] it is called **Hazar-enon** (so RV, RSV; AV **Hazar-enan**), and this is added by RSV in v.[18], from which it seems to have dropped out. Its location is unknown, but it appears to have been in the neighbourhood of Damascus. See also HAZER-HATTICON.

HAZAR-ENON.—See HAZAR-ENAN.

HAZAR-GADDAH.—An unknown town in the extreme south of Judah, Jos 15[27].

HAZAR-HATTICON, Ezr 47[16] (AV).—See HAZER-HATTICON.

HAZARMAVETH.—The eponym of a Joktanite clan, Gn 10[26], 1 Ch 1[20], described as a 'son' of Joktan, fifth in order from Shem. Its identity with the modern *Ḥaḍramaut* is certain. It was celebrated for its traffic in frankincense.

HAZAR-SHUAL.—A place in S. Judah, Jos 15[28], 1 Ch 4[28] or Simeon (Jos 19[3]), repeopled by Jews after the Captivity (Neh 11[27]). It is possibly *Kh. Waṭan*, E. of Beersheba.

HAZAR-SUSAH.—A city in Simeon, Jos 19[5]; called **Hazar-susim** in 1 Ch 4[31]. It is possibly modern *Sbalat Abû Sûsein.*

HAZAR-SUSIM.—See HAZAR-SUSAH.

HAZAZON-TAMAR.—A city occupied by Amorites, Gn 14[7] (AV **Hazezon-tamar**); in 2 Ch 20[2] it is identified with **En-gedi.** It was probably near modern *'Ain el-'Arûs.* See also ATHARIM.

HAZEL, Gn 30[37] (AV).—See ALMOND.

HAZELELPONI, 1 Ch 43 (AV).—See HAZZELELPONI.

HAZER-HATTICON ('the middle Hazer').—A place named among the boundaries of ideal Israel, Ezk 47[16] (AV **Hazar-hatticon**). It is described as 'by the border of Hauran.' It is perhaps to be identified with **Hazar-enan** (q.v.).

HAZERIM.—In AV a place occupied by the Avvim, Dt 2[23]; but RV and RSV replace by 'villages.'

HAZEROTH.—A station in the wilderness wanderings of Israel, Nu 11[35] 12[16] 33[17f], Dt 1[1]. It is usually identified with *'Ain Khaḍrā*, about 30 miles NE. of *Jebel Mûsā.*

HAZEZON-TAMAR, Gn 14[7] (AV).—See HAZAZON-TAMAR.

HAZIEL.—A Gershonite Levite, 1 Ch 23[9].

HAZO.—The eponym of a Nahorite clan, Gn 22[22]. It is no doubt identical with *Hazū*, which along with *Bazū* is mentioned in an inscription of Esarhaddon.

HAZOR.—1. The city of Jabin (Jos 11[1] etc.), in Naphtali (Jos 19[36]), S. of Kedesh (1 Mac 11[63, 67] etc., called in To 1[2] **Asher**), overlooking Lake Semechonitis = *el-Ḥûleh* (Jos. *Ant.* v. v. 1 [199]). It is identified with *el-Qedaḥ* (*Khirbet Waqqaṣ*) about 3 miles south-west of Thella on the lake. The archaeological history of the site has been determined by the James A. de Rothschild expedition, 1955–1958, directed by Y. Yadin (*Hazor I* [1958], II [1959], III, and IV in preparation; preliminary reports in *BA* and *IEJ* [1956–1959]). It is described in Jos 11[10] as 'the head of all those kingdoms.' Its pre-eminence dates from the 18th cent. B.C., as attested by the Mari archives; it also figures as a major political and commercial centre in the Amarna age (14th cent.). By the time of Joshua its influence had begun to wane, though it still ranked at the head of the northern coalition. Its destruction by the Israelites toward the end of the 13th cent. has been confirmed by the excavations. Solomon fortified it (1 K 9[15]). It was taken by Tiglath-pileser III. (2 K 15[29]). **2.** A town in the Negeb of Judah (Jos 15[23]), unidentified. **3.** A town also in the Negeb, identified with **Kerioth-hezron** (Jos 15[25]); but the text is difficult (cf J. Simons, *The Geographical and Topographical Texts of the Old Testament* [1959], p. 143). **4.** A place in Benjamin, N. of Jerusalem (Neh 11[33]), probably *Khirbet Ḥazzūr*, between *Beit Ḥanînah* and *Neby Samwîl.* **5.** The kingdoms of Hazor, named with Kedar (Jer 49[28] etc.), an Arabian district, possibly on the border of the desert.

W. E.—D. N. F.

HAZOR-HADATTAH.—A town of Judah, in the Negeb, Jos 15[25] (AV **Hazor, Hadattah**). The name means 'the new Hazor.' The site is unknown.

HAZOR-ITHNAN.—See ITHNAN.

HAZZELELPONI.—A female name in the genealogy of Judah, 1 Ch 4[3] (AV **Hazelelponi**).

HE.—Fifth letter of the Hebrew alphabet, and so used to introduce the fifth part of Ps 119, every verse of which begins with this letter.

HEAD.—The Hebrews did not regard the head as the seat of the intellect; it was, however, the seat of life, and was naturally held in honour. Hence phrases such as 'keeper of my head' (1 S 28[2]; cf Ps 140[7]), 'swearing by the head' (Mt 5[36]), and the metaphorical use common to all languages, as equivalent to 'chief.' In Dt 28[13], Is 9[14], we find 'head and tail' as a proverbial expression. Christ is the head of the Church (Eph 4[15], Col 1[18] 2[19]), as man is of the woman (Eph 5[23]). *To lift up the head* is to grant success (Ps 27[6] 110[7], Gn 41[13], where there is an obvious ironical parallel in v.[19]). *The hand on the head* was a sign of mourning (2 S 13[19], Jer 2[37]); so dust or ashes (2 S 1[2], La 2[10]); or *covering the head* (2 S 15[30], Jer 14[3]). On the other hand, to *uncover the head, i.e.* to loose the turban and leave the hair in disorder, was also a sign of mourning (see AV and RVm, Lv 10[6] 13[45], Ezk 24[17]). Similarly *shaving the head,* a common practice in the East (Job 1[20], Is 15[2] 22[12], Ezk 7[18], Am 8[10]); it was forbidden to priests (Lv 21[5]), and, in special forms, to all Israelites (19[27], Dt 14[1]). It might also mark the close of a period of mourning (Dt 21[12]), or of a Nazirite's vow (Nu 6[9], Ac 18[18]), or of a Levite's purification (Nu 8[7]). In Dt 32[42] there is a reference to the warrior's long hair, RVm. *Laying hands on the head* was (*a*) part of the symbolism of sacrifice (Lv 16[21]), (*b*) a sign of blessing (Gn 48[14]), (*c*) a sign of consecration or ordination (Nu 27[23], Ac 6[6]). In 2 K 2[3] the reference seems to be to the pupil sitting at the feet of his master. 'Head' is also used, like 'face,' as a synonym for 'self' (Ps 7[16]; and probably Pr 25[22], Ro 12[20]).

C. W. E.

HEADBAND.—1. In 1 K 20[38, 41], where AV has **ashes,** RV has 'headband' (RSV 'bandage'). Beyond the fact that it covered the wearer's forehead its form is unknown. **2.** In Is 3[20] AV has 'headbands,' where we should read, with RV and RSV **sashes.** The same word is used in Jer 2[32] for the sash or girdle (EV 'attire') with which a bride 'girds' herself (cf Is 49[18], where the cognate verb is used). **3.** In Is 3[18], where AV and RV have **cauls** (q.v.), RSV has 'headbands.'

HEADSTONE, more correctly 'head stone,' Zec 4[7] (RSV 'top stone') etc.—See CORNER, CORNER-STONE.

HEADTIRE, TIRE.—The former is found in AV, as one word, only in 1 Es 3[6] (so RV; RSV **turban**), for the *kidaris*, the stiff upright headdress of the Persian kings. In RV **headtire** replaces AV's **bonnet** (q.v.) in Ex 28[40] 29[9] 39[28] (RSV **cap**), Is 3[20] (RSV **headdress**). In Ezk 44[18] RV has **tire** (RSV **turban**) for AV **bonnet.** For AV's 'the tire of thine head,' Ezr 24[17], RV has 'thy headtire' (RSV **turban**). For AV's the 'round tires like the moon' of Is 3[18], RV and RSV have **crescents.** See ORNAMENTS and DRESS, 5 (*a*).

HEADY.—This form of the English word has been displaced by 'headstrong.' It occurs in 2 Ti 3[4], where the same Greek word is used as is translated 'rashly' (RV, RSV 'rash') in Ac 19[36]. Bishop Hall (*Works*, ii, 109) says, 'We may offend as well in our heddye acceleration, as in our delay.' RSV reads 'reckless.'

HEALTH.—The word formerly covered (*a*) healing, (*b*) spiritual soundness, (*c*) general well-being. For (*a*) cf Pr 12[18] 13[17], Jer 8[15], where it represents the word usually translated 'healing' (so RSV in all cases, and RV in Jer 8[15]). (*b*) In Ps 42[11] 43[5] (RSV 'help') 67[2] (RSV 'power'), and frequently in Prayer Book Version, it stands for the word otherwise translated 'salvation'

or 'help.' In these usages it is active. (*c*) The wider passive use, including general well-being of body and soul, not merely the absence of disease, is illustrated by Ac 27[34] (RSV 'strength'), 3 Jn[2]. Cf *General Confession*, 'There is no health in us.' See MEDICINE.

C. W. E.

HEART.—**1.** Instances are not wanting in the OT of the employment of this word in a physiological sense, though they are not numerous. Jacob, for example, seems to have suffered in his old age from weakness of the heart; a sudden failure of its action occurred on receipt of the unexpected but joyful news of Joseph's great prosperity (Gn 45[26]). A similar failure proved fatal in the case of Eli, also in extreme old age (1 S 4[13–18]; cf the case of the exhausted king, 28[20]). The effect of the rending of the pericardium is referred to by Hosea as well known (13[8]); and although the proverb 'a tranquil mind (RV 'sound heart') is the life of the flesh' (Pr 14[30]) is primarily intended as a psychological truth, the simile is evidently borrowed from a universally recognized physiological fact (cf 4[23]). The aphorism attributed to 'the Preacher' (Ec 10[2]) may be interpreted in the same way; the 'right hand' is the symbol of strength and firmness, and the left of weakness and indecision (cf 2[14]). Nor does it appear that OT writers were ignorant of the vital functions which the heart is called on to discharge. This will be seen by their habit of using the word metaphorically as almost a synonym for the entire life (cf Ps 22[26] 69[32], Is 1[5], where 'head' and 'heart' cover man's whole being).

2. The preponderating use of the word is, however, psychological; and it is in this way made to cover a large variety of thought. Thus it is employed to denote *the centre of man's personal activities*, the source whence the principles of his action derive their origin (see Gn 6[5] 8[21], where men's evil deeds are attributed to corruption of the heart). We are, therefore, able to understand the significance of the Psalmist's penitential prayer, 'Create in me a clean heart' (Ps 51[10]), and the meaning of the prophet's declaration, 'a new heart also I will give you' (Ezk 36[26]; cf 11[19]). The heart, moreover, was considered to be *the seat of the emotions and passions* (Dt 19[6], 1 K 8[38], Is 30[29]; cf Ps 104[15], where the heart is said to be moved to gladness by the use of wine). It was a characteristic, too, of Hebraistic thought which made this organ *the seat of the various activities of the intellect*, such as understanding (Job 34[10, 34], 1 K 4[29]), purpose or determination (Ex 14[5], 1 S 7[3], 1 K 8[48], Is 10[7]), consciousness (Pr 14[10], where, if EV be an accurate translation of the original text, the heart is said to be conscious both of sorrow and of joy; cf 1 S 2[1]), imagination (cf Lk 1[51], Gn 8[21]), memory (Ps 31[12], 1 S 21[12]; cf Lk 2[19, 51] 16[6]). *The monitions of the conscience* are said to proceed from the heart (Job 27[6]), and the counterpart of the NT expression 'branded in their own conscience as with a hot iron' (1 Ti 4[2] RV) is found in the OT words 'I will harden his heart' (Ex 4[21]; cf Dt 2[30], Jos 11[20] etc.). Closely connected with the idea of conscience is that of moral character, and so we find 'a new heart' as the great desideratum of a people needing restoration to full and intimate relationship with God (Ezk 18[31]; cf Dt 9[5], 1 K 11[4]). It is, therefore, in those movements which characterize repentance, placed in antithesis to outward manifestations of sorrow for sin, 'Rend your hearts and not your garments' (Jl 2[13]).

3. Moving along in the direction thus outlined and not forgetting the influence of the Apocryphal writings on later thought (cf *e.g.* Wis 8[19] 17[11], Sir 42[18] etc.), we shall be enabled to grasp the religious ideas enshrined in the teaching of the NT. In the recorded utterances of Jesus, so profoundly influenced by the ancient writings of the Jewish Church, the heart occupies a very central place. The beatific vision is reserved for those whose hearts are 'pure' (Mt 5[8]; cf 2 Ti 2[22], 1 P 1[22] RVm). The heart is compared to the soil on which seed is sown; it contains moral potentialities which spring into objective existence in the outward life of the receiver (Lk 8[15], cf, however, Mk 4[15–20], where no mention is made of this organ; see also Mt 13[19], in which the heart is referred to, as in Is 6[10], as the seat of the spiritual understanding). Hidden within the remote recesses of the heart are those principles and thoughts which will inevitably spring into active life, revealing its purity or its native corruption (Lk 6[45]; cf Mt 12[34f] 15[18f]). It is thus that men's characters reveal themselves in naked reality (1 P 3[4]). It is the infallible index of human character, but can be read only by Him who 'searches the hearts' (Ro 8[27]; cf 1 S 16[7], Pr 21[2], Lk 16[15]). Human judgment can proceed only according to the unerring evidence tendered by this resultant of inner forces, for 'you will know them by their fruits' (Mt 7[20]). The more strictly Jewish of the NT writers show the influence of OT thought in their teaching. Where we should employ the word '**conscience**' St. John uses 'heart,' whose judgments in the moral sphere are final (1 Jn 3[20f]). Nor is St. Paul free from the influence of this nomenclature. He seems, in fact, to regard conscience as a function of the heart rather than as an independent moral and spiritual organ (Ro 2[15], where both words occur; cf the quotation He 10[16]). In spite of the fact that the last-named Apostle frequently employs the terms 'mind,' 'understanding,' 'reason,' 'thinkings,' etc., to express the elements of intellectual activity in man, we find him constantly reverting to the heart as discharging functions closely allied to these (cf 'the eyes of your hearts,' Eph 1[18]; see also 2 Co 4[6]). With St. Paul, too, the heart is the seat of the determination or will (cf 1 Co 7[37], where 'firmly established in heart' is equivalent to will-power). In all these and similar cases, however, it will be noticed that it is man's moral nature that he has in view; and the moral and spiritual life, having its roots struck deep in his being, is appropriately conceived of as springing ultimately from the most essentially vital organ of his personal life.

HEARTH.—See HOUSE, 7.

HEATH.—See TAMARISK.

HEATHEN.—See IDOLATRY, NATIONS.

HEAVEN.—In the cosmic theory of the ancient world, and of the Hebrews in particular, the earth was flat, lying between a great pit into which the shades of the dead departed, and the heavens above in which God and the angels dwelt, and to which it came to be thought the righteous went, after having been raised from the dead to live for ever. It was natural to think of the heavens as concave above the earth, and resting on some foundation, possibly of pillars, set at the extreme horizon (2 S 22[8], Pr 8[27–29]).

The Hebrews, like other ancient peoples, believed in a plurality of heavens (Dt 10[14]), and the literature of Judaism speaks of seven. In the highest, or *Aravoth*, was the throne of God. Although the descriptions of these heavens varied, it would seem that it was not unusual to regard the third heaven as Paradise. It was to this that St. Paul said he (*i.e.* 'a man in Christ,' probably himself) had been caught up (2 Co 12[2]).

This series of superimposed heavens was regarded as filled by different sorts of superhuman beings. The second heaven in later Jewish thought was regarded as the abode of evil spirits and angels awaiting punishment. The NT, however, does not commit itself to these precise speculations, although in Eph 6[12] it speaks of 'principalities . . . powers . . . the world rulers of this present darkness' (cf Eph 2[2]). Presumably these were the 'elemental spirits of the universe' (Gal 4[3]), which in the spherical cosmology of popular Hellenistic religion occupied the realm below the moon. See DEMONS; GNOSTICISM.

This conception of heaven as being above a flat earth underlies many religious expressions which are still current. There have been various attempts to locate heaven, as, for example, in Sirius as the central sun of our system. Similarly, there have been innumerable speculations endeavouring to set forth in sensuous form the sort of life which is to be lived in heaven. All such speculations, however, lie outside the region of positive

knowledge, and rest ultimately on the cosmogony of pre-scientific times. They may be of value in cultivating religious emotion, but they belong to the region of speculation. The Biblical descriptions of heaven are not scientific, but symbolical. Practically all these are to be found in the Johannine Apocalypse. It was undoubtedly conceived of eschatologically by the NT writers, but they maintained a great reserve in all their descriptions of the life of the redeemed. It is, however, possible to state definitely that, while they conceived of the heavenly condition as involving social relations, they did not regard it as one in which the physical organism survived. The sensuous descriptions of heaven to be found in the ancient Jewish apocalypses and in Islam are altogether excluded by the sayings of Jesus relative to marriage in the new age (Mk 12^{25}‖), and those of St. Paul relative to the 'spiritual body' (1 Co 15). The prevailing tendency at the present time among theologians, to regard heaven as a state of the soul rather than a place, belongs likewise to the region of opinion. The degree of its probability will be determined by one's general view as to the nature of immortality and eternal life.

S. M.—F. C. G.

HEAVE-OFFERING.—See SACRIFICE AND OFFERING.

HEAVINESS.—The English word 'heaviness' is used in AV in the sense of 'grief,' and in no other sense. Thus Pr 10^{1} 'A wise man maketh a glad father; but a foolish son is the heaviness (so RV; RSV 'sorrow') of his mother.' Compare Coverdale's translation of Ps 30^{5} 'hevynesse maye well endure for a night, but joye commeth in the mornynge,' whence the Prayer Book version 'heaviness may endure for a night.'

HEBER.—1. A man of Asher, Gn 46^{17}, Nu 26^{45}, 1 Ch $7^{31f.}$ The gentilic **Heberites** occurs in Nu 26^{45}. **2.** The Kenite, according to Jg 4^{17} 5^{24}, husband of Jael. He separated himself (Jg 4^{11}) from his Bedouin caste of Kenites or nomad smiths, whose wanderings were confined chiefly to the S. of Judah, and settled for a time near Kedesh on the plain to the W. of the Sea of Galilee. **3.** A man of Judah, 1 Ch 4^{18}. **4.** A Benjamite, 1 Ch 8^{17}. **5.** 1 Ch 5^{13} (AV); see EBER, **2.** **6.** 1 Ch 8^{22} (AV); see EBER, **4.**

HEBREW.—See EBER, **1**; HABIRU; TEXT AND VERSIONS OF OT.

HEBREW, except for certain small portions in Aramaic (q.v.), is the language of the OT, where it is used as an ethnic term, connected with Eber (*e.g.* Gn 10^{21}) and deriving from a root probably signifying 'nomad,' the language itself being described as 'the speech of Canaan' (Is 19^{18}). This accords with the mixed nature of its grammar and vocabulary and its closely knit relationship with other Semitic languages (*e.g.* Aramaic, Ugaritic, Akkadian, Arabic). Comparative study of these languages (aided by continuing discovery of epigraphs and texts) together with examination of the LXX and other ancient VSS is making possible a clearer understanding of the grammatical structure (*e.g.* tenses) and vocabulary (*e.g.* recovery of lost meanings) of Hebrew. Indications of the pronunciation of Hebrew in Biblical times, obscured through its standardization by the Mas(s)oretes (successors of the Scribes from *c* 5th cent. A.D.), have been augmented by MSS from the Dead Sea caves. Written originally in the Phoenician-Old Hebrew characters, Hebrew after the Exile came to be recorded in Aramaic square script as in the printed Bibles of to-day.

E. T. R.

HEBREWS, EPISTLE TO.—*Introductory.*—At first sight it is not easy to understand why this treatise has been designated an Epistle. The only direct references by the writer to the character of his work are found in 13^{22}, where he styles it a 'word of exhortation' (cf Ac 13^{15}, 4 Mac 1^{1}), and speaks of having written '(a letter) to you briefly.' The general salutation of 13^{24} is similar to what is found in most of the NT Epistles (cf Ro $16^{3\pi}$, 1 Co $16^{19\pi}$, 2 Co $13^{12f.}$, Ph $4^{21f.}$, Col $4^{10\pi}$ etc.). At the same time, there are numerous personal references scattered throughout the writing (13^{7} 5^{11} 4^{1} 10^{19} 6^{9} etc.), and in most cases the author places himself on the same level with those to whom he is writing (3^{19} $8^{18\pi}$ 11^{40} 10^{10} etc.). In spite of the formality which might characterize this writing as a theological essay, it is evident that the early instinct of the Church in regarding it as essentially an Epistle is substantially sound and correct (cf Deissmann, *Bible Studies*, pp. 49 f). Of course, the title 'The Epistle of Paul the Apostle to the Hebrews' (AV) is without early textual authority. The oldest MSS have merely the superscription 'to Hebrews,' just as they have in the case of other NT epistles ('to Romans,' etc.). The only other early description to which it is necessary to refer is that given to it by Tertullian, who expressly quotes it by the title of 'Barnabas to the Hebrews' (*de Pud.* 20). It seems to have been unanimously accepted from the very earliest period that the objective of the Epistle was correctly described by this title. Whether, however, this conclusion was based on sound traditional evidence or was merely arrived at from the internal character of the writing itself, must be left to conjecture; for we must not suppose that the words 'to Hebrews' form any part of the original document.

1. Authorship.—Notwithstanding the fact that this writing was known by the most ancient Christian writers, at all events by those belonging to the Church in Rome, it is noteworthy that all traces as to its authorship seem to have been lost very soon. The only information, with regard to this question, to be gleaned from the Roman Church is of the negative character that it was not written by St. Paul. Indeed, the Western Church as a whole seems to have allowed its presence in the Canon only by the beginning of the 5th cent., accepting it on the authority of the Eastern churches who remained confident of Pauline authorship.

The Muratorian Fragment does not include it in its catalogue, and implicity denies its Pauline authorship ('The blessed Apostle Paul himself, following the example of his predecessor John, wrote only to seven Churches by name,' etc., see Westcott, *Canon of the NT*, App. C.), as does also Gaius. Of more direct value are the testimonies of Hippolytus and Irenaeus, both of whom were acquainted with the Epistle, but denied that St. Paul wrote it (cf Eusebius, *HE* v. 26, vi. 20). The Churches of North Africa and Alexandria, on the contrary, have their respective positive traditions on this question. The former, as has been noted already, attributed the writing to Barnabas—a theory preserved by Tertullian and destined to fall into complete oblivion until quite recent times (cf *e.g.* Zahn, *Einleitung*, ii, pp. 116 f).

The Alexandrian belief in the authorship of St. Paul, indirectly at least, dates as far back as the closing years of the 2nd cent. Clement of Alexandria goes so far as to suggest that St. Paul wrote it originally in Hebrew, suppressing his name from motives of expediency, and that St. Luke translated it for the use of those who understood only Greek. Origen, who had his own doubts as to the reliability of the local tradition, nevertheless upheld St. Paul as the ultimate author; and his influence undoubtedly had powerful weight in overcoming the Western hesitation. At all events, by the 5th cent. it was almost universally held to be the product of St. Paul's literary activity; and this belief was not disturbed until the revival of learning in the 16th cent., when again a wide divergence of opinion displayed itself.

Erasmus, the first to express the latent feelings of uncertainty, conjectured in a characteristically modest fashion that Clement of Rome was possibly the author. Luther, with his usual boldness and independence, hazarded the unsupported guess that its author was Apollos. Calvin wavered between St. Luke and Clement, following, no doubt, some of the statements of Origen as to traditions current in his day (see Eusebius, *HE* vi. 25).

We have thus no resource but to appeal to the writing itself in order to arrive at a decision as to the *kind* of person likely to have penned such a document (cf article 'Hebrews' in Hastings' *DB*, vol. ii, 338*a*). The author

seems to have a personal and an intimate knowledge of the character and history of those whom he addresses (cf 6^{9f} 10^{34} $13^{7,19}$). It is quite possible, of course, that this may have been gained through the medium of others, and that he is speaking of a reputation established and well known. When we consider, however, the numerous instances in which close ties of relationship betray themselves, we are forced to the conclusion that the writer and his readers were personally known to each other. Timothy was a mutual friend (13^{23}), although it is confessed that both the author and those addressed belong to the second generation of Christians (2^{3}). There is, moreover, a constant use of the first personal pronoun (1^{2} $2^{1\pi.9}$ $3^{6.14}$ $4^{3.14}$ $6^{18\pi}$ 8^{1} 9^{24} $10^{10\ 19-25,\ 30}$ 11^{13} 13^{10}), even in places where we should have expected that of the second person (*e.g.* $12^{1f.28}$ $13^{13\pi}$). To the present writer the words translated 'that I may be restored to you the sooner' (13^{19}) seem to convey the meaning that he had been amongst them once, although Westcott is inclined to see here but a suggestion of 'the idea of service which he had rendered and could render to his readers' (Comm., *in loc.* and Int., pp. lxxv f). If thus he were a close personal acquaintance, these reminiscences of their former endurance, and of the faithfulness of those through whose instrumentality they had embraced the Christian faith, gain force and point (cf 10^{32} 13^{7}). There is, moreover, a tone of authority throughout, as if the writer had no fear that his words would be resented or misinterpreted (12^{4f} 13^{9} $10^{25,35}$ $5^{11\pi}$ 3^{12} etc.).

To these notes of authorship must be added the evidence of wide literary culture observable throughout the Epistle. This characteristic has been, and is, universally acknowledged. The author did not use the Hebrew OT, and in the single quotation where he varies from the LXX we gather, either that he was acquainted with the Epistle to the Romans, or that he gives a variant reading preserved and popularized by the Targum Onkelos (cf 10^{30} and Ro 12^{19}). There is no other NT writer who displays the same rhetorical skill in presenting the final truths of the Christian religion in their world-wide relations (cf 1^{1-4} 2^{14-18} 6^{17-20} 11^{1-40} etc.). His vocabulary is rich and varied, and in this respect stands closer to the writings of St. Luke than to any other of the NT books. 'The number of words found in the Epistle which have a peculiar Biblical sense is comparatively small' (Westcott, *ib.*, p. xlvi). For these and similar reasons it is generally believed that our author was a scholar of Hellenistic training and most probably an Alexandrian Jew of philosophic temperament and education (see Bacon, *Introd. to NT*, p. 141).

2. Destination, circumstances of readers, date.—When we ask ourselves the question, Who were the people addressed in this Epistle ?, we are again met with a confusing variety of opinion. The chief rival claimants to this honour are three: *Palestine*, which has the most ancient tradition in its favour, and which is countenanced by the superscription; *Alexandria*; and *Rome*, where the Epistle seems first to have been known and recognized. One conclusion may, at any rate, be accepted as certain: the addressees formed a definite homogeneous body of Christians. The writer has a local Church in view, founded at a specific period, and suffering persecution at a definite date (note the tense of the verbs, 'you were enlightened,' 'you endured,' 10^{32}). He addresses this Church independently of its recognized 'leaders' (13^{24}). In his exhortation to patience and endurance he reminds his readers of the speedy return of Jesus, as if they had already begun to despair of the fulfilment of that promise ($10^{36\pi}$; cf 2 P $3^{8\pi}$, Rev 3^{3}, 2 Th $2^{1\pi}$). He had been with them at some period prior to his writing, and he hoped once again to visit them with Timothy as his companion ($13^{19,23}$). Their spiritual growth was arrested just at the point where he had looked for vigour and force ($5^{11\pi}$ $6^{1\pi}$), and this resulted in moral decline (5^{11} 12^{5} 3^{12}), and in neglect of that ordinance which promotes social intercourse and Christian fellowship (10^{25}). As a Church, too, they were in a position to help their poorer brethren (6^{10}), and he expected them to continue that help in the future (6^{11})—a feature of early Christian activity which reminds us of the poverty of the Church in Judaea (cf Ac 11^{29} 24^{17}, Ro 15^{26}, 1 Co $16^{1\pi}$ etc.). To many scholars, this allusion in itself presents a formidable, if not a fatal, objection to the theory that Palestine was the destination of our Epistle. This conclusion is strengthened by the elegant Greek in which the Epistle is written, and by the writer's use of the LXX instead of the Hebrew OT. On the other hand, the only direct internal evidence pointing to the readers' relations with Rome is found in the salutation, 'They of Italy salute you' (13^{24} RV; 'Those who come from Italy send you greetings' RSV). It is true that this is sufficient to establish a connexion; but it would be futile to deny that it is capable of a double explanation—that the Epistle was written either *from* or *to* Italy. The former seems at first sight the more natural interpretation of the words (cf Col 4^{16}), and we are not surprised to find such scholars as Theodoret and Primasius expressing their belief that our author here discloses the place from which he writes. Indeed, on the supposition that 'they of Italy' were the writer's companions who were absent with him from Rome, the words do not seem the most felicitous method of expressing their regards. It would be natural to mention some at least of their names in sending greetings from them to their brethren, with whom they must have been on terms of the most intimate fellowship (cf Ro $16^{21\pi}$, 1 Co 16^{19}). Besides, if he wrote from Rome we have a natural explanation, amounting to a *vera causa*, of the fact that our Epistle was known there from the very first; for it must not be supposed that a writing like this was allowed to go forth without copies having been made beforehand (for a supposed instance of this kind in the case of St. Luke's writings, see Friedrich Blass, *Ev. sec. Lucam*, and *Acta Apostolorum*, especially the Praefatio and Prolegomena respectively, where that scholar contends that the remarkable textual variations in these writings can be explained only by the theory of a second edition of each).

Nor can the claim of Alexandria to be the destination of the Epistle be said to have much force. The argument on which this theory is mainly based has to do with the discrepancies between the writer's descriptions of Levitical worship and that which obtained in the Jewish Temple in accordance with the Mosaic code (cf *e.g.* 9^{3f} 7^{27} etc.). It has been supposed that he had in his mind the temple of Onias at Leontopolis in Egypt. This, however, is pure conjecture (cf Westcott, *ib.* Int. p. xxxix), and is contradicted by the historical evidence of the late date at which the Epistle seems to have been known in Alexandria, and by the fact that its authorship was completely hidden from the heads of the Church in that place. We are thus reduced to the balancing of probabilities in selecting an objective for our Epistle, and in so doing we have to ask ourselves the much canvassed question: What were the antecedents of the readers ? Were they Gentile or Jewish converts ? Until a comparatively recent date it was believed universally that the writer had Jewish Christians before his mind. A formidable array, however, of NT critics, both European and American, have advocated the theory that, in spite of appearances to the contrary, the original readers of our Epistle were Gentiles or mainly Gentiles (*e.g.* von Soden, Jülicher, Weizsäcker, Pfleiderer, Windisch, Michel, McGiffert, Bacon, etc.). Certainly among the Christians of the first two or three generations there must have been a large number of proselytes who were well acquainted with the Levitical ceremonial, and to whom the description of the furniture of the Tabernacle would have been perfectly intelligible ($9^{2\pi}$; cf vv.$^{13\pi.19\pi}$ $10^{11\pi}$ etc.). That the addressees included Jews cannot be denied (see 6^{6f} 13^{9-16} etc.). At the same time, it would be futile to base an argument for the purely Jewish destination of the Epistle upon such passages as speak of OT prophetic revelations having

been made to ' our fathers ' (1[1]), or of ' the descendants of Abraham ' (2[16]) as constituting the basis of Jesus' human nature. A similar identification is made by St. Paul in writing to the Church in Rome (Ro 4[1-25]), where undoubtedly there was a large admixture of Gentile Christians. Moreover, Clement of Rome again and again refers to ' our fathers,' though he too is writing to a Church largely Gentile (see chs. 4, 31, 62, etc.). It is also well to remember that the Christian Churches, for a century at least after they had begun to take definite shape as organized bodies, were dependent, to a very large extent, upon the OT Scriptures for their spiritual nourishment and guidance. These were to them the chief, if not the only, authoritative record of God's revelation of Himself and His purposes to the world. It was perfectly natural, therefore, that St. Paul should presuppose a wide knowledge of OT history, and, indeed of the Jewish interpretations of that history (cf Ro 5[12ff], 1 Co 15[22], 2 Co 3[7ff] 6[16], Gal 3[29]), on the part of his Gentile readers, just as Clement of Rome does.

When we turn to our Epistle, we are struck at once by the fact that the writer is not moving in, or thinking of, a living practical Leviticalism. He is dealing with Mosaism in its ideal conditions. The ritualism about which he addresses his readers seems to be, not that which actually obtained in the later Temple services (cf *e.g.* 7[27] 10[11] 9[21]), but that splendid theoretical ceremonial every detail of which was believed to be a type and a shadow ' of the good things that have come ' (9[11]; cf W. R. Smith's article ' Hebrews ' in *EBrit.*). Indeed, the typological and allegorizing elements in the Epistle claim for it almost peremptorily a non-Eastern objective; and though we cannot see our way to accept Zahn's conclusion that the addressees formed a compact body of Jewish Christians within a large Gentile community of believers, we are ready to yield to his exhaustive study of the problem when he points to Rome as offering the fewest objections on the whole,, to be the destination of the writing (*Einleit. in das NT*, ii, pp. 146 ff).

Accepting this conclusion as at least a provisional, and it may be a temporary, solution of the difficult question arising out of the objective of our Epistle, we shall find several allusions to *the existing conditions of life in the Church addressed.* Nor shall we be left completely in the dark as to the probable *date* of its composition. Looking first for incidental remarks, independently of the *locale* of the readers, we find several hints pointing to a comparatively late period in the history of the early Church. Both writer and readers were separated by at least a generation from the first circle of believers (2[3]). The readers, moreover, had been long enough under the influence of the Christian faith to give our author grounds for hope that they could occupy the position of teachers and of ' mature ' professors of their religion (5[11ff]; note the verb translated ' you have become,' which expresses the end of a lengthened process of decline). This hope was bitterly disappointed, although he is careful to recall a period when their love was warm and their Christian profession an active force in their lives (6[9f]). Basing his appeal on this memory, he strives to encourage them to revert to their former earnestness (6[11]); and, in order to prevent that dullness to which they had already given way from developing further, he urges them to take for a pattern those Christian teachers who had already spent their lives in the service of the faith (6[12]). It is probable that their own leaders of the preceding generation had signalized their fidelity to Christ by enduring martyrdom for His sake (cf Westcott, Comm., *in loc.*). The first freshness of their enthusiasm for the gospel was wearing off, and some at least amongst them were in danger of a complete lapse from Church membership (10[25]). The cause of this temptation is not far to seek. In an earlier period of their history they had ' endured a hard struggle with sufferings ' (10[32ff]), and the writer hints at another and a similar experience, of which the beginnings were making themselves felt (cf 12[3f]; note the warning

tone in 10[36] exhorting to the cultivation of patience). Persecution on this occasion had not as yet burst with its full fury upon them (12[4]). That he sees it fast coming is evident from the writer's continually appealing for an exhibition of fortitude and patient endurance (12[1ff 11] etc.). Indeed, he understands the dangers to which a Church, enjoying a period of freedom from the stress of active opposition, is exposed when brought face to face with a sudden storm of persecution and relentless hatred (12[5, 7f]). He seems to fear apostasy as the result of moral relaxation (12[12f]), and encourages his readers by telling them of the liberation of Timothy from his imprisonment for the faith (13[23]). It is not impossible that one of his reasons for writing directly to the Church, instead of addressing it through their leaders (13[24]), was that he feared a similar fate for the latter, or that, like himself, they were compulsorily separated from their brethren (13[19]) by the persecuting authorities. Now, if we accept Rome as the destination of our Epistle, and see in 13[7] an allusion to the martyrdom of St. Peter and St. Paul, and at the same time remember that we have the Epistle of Clement to the Corinthian Church as its *terminus ad quem*, we have reduced the limits of the date of its composition to the period between the Neronic and Domitianic persecutions. Rather we should say, following some of the allusions referred to above, that it was written at the beginning of the latter crisis; in other words, the date would be within the closing years of the 8th and opening years of the 9th decade of the 1st cent. (Domitian reigned A.D. 81–96). The fact that Timothy was alive when our author wrote does not militate against this date, as he seems to have been a young man when converted through the instrumentality of St. Paul (cf 1 Co 16[11], 1 Ti 4[12], 2 Ti 2[22]).

Besides the danger to the faith arising from physical sufferings and persecutions, another and a more deadly enemy seems to have been threatening to undermine the foundations of the Church at this period. After the destruction of the Jerusalem Temple, Judaism seems to have been endowed with a new and vigorous life. Hellenistic Judaism, with its syncretistic tendencies and its bitter proselytizing spirit, must have appealed very strongly to that class of Christians for whom an eclectic belief always has a subtle charm (cf the warning ' Do not be led away by diverse and strange teachings,' and the reference to the distinctions regarding ' foods ' in 13[9], which forcibly remind us of St. Paul's language in Col 2[16]); for an exhaustive survey of the extent and number of proselytes to Judaism, and the eagerness with which this work was pursued (see Schürer, *HJP* II. ii, 291–327; and see article DISPERSION).

3. Purpose and contents.—In order to counteract this influence, the writer sets about proving the final and universalistic character of the Christian revelation. It is with this practical aim that he takes his pen in hand, and he himself gives its true designation to his literary effort when he styles it ' a word of exhortation ' (13[22]). At the same time, it is evident that our author moves on a high plane both of thought and of language. No other NT writer seems to have grasped so fully the cosmological significance attaching to the earthly life and experiences of Jesus (5[7f] 4[15] 2[9ff, 17f]), or to have set forth so clearly His present activity on behalf of ' all who obey him ' (5[9] 2[18] 7[25] 9[15, 24], cf Ro 8[34]). For him the Incarnation has bridged once and for all the hitherto impassable gulf separating God and man, and has made intelligible for man the exhortation ' Let us draw near ' to God, for a ' new and living way ' has been opened for us through His flesh (10[20ff], cf 7[19]). It may be said, indeed, that the author regards Christianity as the final stage in the age-long process of religious development. The Levitical institutions, with their elaborate ceremonialism, constituted the preceding and preparatory step in the Divine plan of world-salvation. This too was good in its way, and necessary, but of course imperfect. It did its duty as a good servant, faithfully and well, but had to give way when the ' heir of all things ' (1[2]) came to claim His inheritance (cf 3[5f]).

In order to establish emphatically the pre-eminence of Christianity over all that went before, the Epistle opens with a series of comparisons between Christ and the great representatives of the former dispensation. (*a*) In the 'old time' the messages of God were delivered 'in many and various ways' through the prophets, but now 'in these last days' He has spoken His final word 'by a Son' (1^{1ff}). (*b*) The Law of Moses was revealed through the mediation of angels and was 'valid' (2^{2}); but angels were employed in service 'for the sake of those who are to obtain salvation' (1^{14}), whereas the revelation through the medium of the Son 'who for a little while was made lower than the angels' was correspondingly of a higher order than that which had these beings as intermediaries (1^{4-14} 2^{5-9}). (*c*) The great lawgiver Moses occupied but the position of servant, and therefore holds a subordinate place to that of the Son in the Divine scheme of redemption (3^{2-6}). (*d*) Finally, as Christ is personally superior to Aaron, so His office is essentially more profound and efficacious than that which typified it.

This last comparison is elaborated at much greater length than the others (8^{1}–10^{18}), and indeed in its argumentative treatment is developed into a contrast. The discussion here is simple but effective. Everyone recognizes that 'under the law almost everything is purified with blood, and without the shedding of blood there is no forgiveness of sins' (9^{22}), but Aaron and his successors went into the holy place 'with blood not their own' (9^{25}), the blood of bulls and of goats, which cannot possibly take away sins (10^{4}). Moreover, the first requisite to the high-priestly service of atonement is that a sin-offering had to be made for the officiating priest himself before he offered for the people (9^{7} 5^{3}). The temporary makeshift character of these ordinances was shown and acknowledged by the fact that they had to be constantly repeated ('once a year,' 9^{7}, cf 10^{3}). They had in themselves no moral uplifting force, cleansing the consciences of, and perfecting, 'those who draw near' (10^{1ff}). On the other hand, Christ 'entered once for all into the Holy Place, taking not the blood of goats and calves but his own blood, thus securing an eternal redemption' (9^{12}), and, though He 'is able to sympathize with our weaknesses, since in every respect he has been tempted as we are, yet [it is] without sinning' (4^{15}). He needed not to offer on His own behalf, for temptation and suffering proved to Him but stages in the process of perfecting His Sonship (2^{10} 5^{2f} 7^{28}). In describing the personal character of the High Priest suited to our needs, the writer is at the same time describing the character of the sacrifice which Christ offered, for 'he offered up himself' (7^{26ff}). In order to obviate any objection likely to be made against the irregularity of a priesthood outside the Levitical order, he has already pointed to an OT case in point, and here he strengthens his plea by quoting from a Psalm universally recognized as Messianic. Melchizedek (q.v.) was a priest who had no genealogical affinity with the tribe of Levi, and yet he was greater than Aaron (7^{4-10}); and it was said by God of His own Son that He should be 'a priest for ever, after the order of Melchizedek' (5^{6} 7^{17}).

4. Christology.—We have said above that the central thought of our Epistle is the discovery by Christianity of a way, hitherto hidden from the eyes of man, of access to God (cf 4^{16} 10^{19} $7^{19, 25}$). Once this was accomplished, nothing further remained to be done (10^{18}) but to enter on that path which leads to the Sabbath-rest reserved for the people of God (4^{9}). We may now ask the question, What are the author's conceptions with regard to the Being and Personality of the High Priest upon whose functions he sets such value? In other words, *What are the chief features of the Christology of the Epistle*? We have not to proceed far in the study of our Epistle before we are brought face to face with a thought which dominates each discussion of the relative claims of Christ and the OT ministers of revelation and redemption. It is upon His Sonship that the superiority of Jesus is based. Neither the prophets nor the ministering angels, neither Moses nor Aaron, could lay claim to that relationship which is inherent in the Person of Jesus Christ. In consequence of the unique position occupied by 'the Son of God' (4^{14}; cf $1^{2, 6}$ 3^{6} 5^{8} 7^{28} 10^{29}), it follows that the dispensation ushered in by Him is above all that went before it. The latter was but the dim outline ('shadow'), not even the full representation ('the true form') 'of the good things to come' (10^{1}). Regarded as a means of revealing God to man, this superiority is self-evident, as the Son is above both prophets and angels. Looked on as a mediatorial scheme of redemption and of reconciliation, it stands immeasurably above that whose representatives were Moses the lawgiver and Aaron the priest.

It is evident from what has been said that this feature of the Personality of Jesus is transcendent and unique. It is also evident that sonship in a general sense is not unknown to the author (cf 2^{10} $12^{5, 7f}$). As if to preclude all misunderstanding of his meaning, he at the outset defines his belief when he represents the Son as 'the heir of all things' and the agent of God's creative activity (3^{1f}; cf Jn 1^{3}), the effulgence of His glory and the very image of His Person—'He reflects the glory of God and bears the very stamp of his nature' (RSV). Not only do we see in these words the definition of a faith which confesses Jesus as the great world-sustaining power (He 1^{3}); there is also implied, so far as a non-technical terminology can do so, belief in the eternity of His Being. It is true that the term 'first-born' (1^{6}) does not necessarily carry the idea of eternity with it, or even the statement that He is the Maker of the ages (1^{2}). On the other hand, we must remember that these are but supplemental to the grand Christological confession of v.2, which excludes the notion of the non-existence of the Son at any time in the ages of eternity. The shining of light is coeval with the light itself, and the impress of the seal on wax is the exact reproduction of the original engraving. It is true that we have here no systematic declaration of Christological belief. The time had not yet come for the constructive theologian. At the same time, it is difficult to see how the author could have framed a more emphatic expression of his belief that Jesus the Son of God is a Divine Person from eternity to eternity (cf 7^{28}). The grand and final scene in the Divine process of self-revelation is painted in words of magnificent solemnity, referred to incidentally, and repeated again and again. As the Son of God, Jesus had a Divine inheritance into which He entered, after His work of redemption was completed on earth, by sitting down at the right hand of the Majesty on High (1^{3}; cf 1^{13} 2^{9f} 4^{14} 6^{20} 7^{26}, Lk 22^{69}, Mk 16^{19}).

In his reference to the work of the Son in 'making purification for sins' (1^{3}) the author implies at once his belief in the humanity of the Son. Although he gives us no direct clue to the extent of his knowledge of the conditions under which the Incarnation was effected, he leaves us in no doubt not only that the manhood of the Son is a reality, but that for the work of redemption it was necessary that it should be so. The fact that his allusions to this doctrine are always indirect point to the conclusion that he expected his readers to be familiar with it as an indisputable article of the Christian faith. Besides, he reinforces his arguments by a running commentary upon those Psalms wherein he sees prophetic expressions of the humiliation of the Christ (cf $2^{7, 9, 14, 16, 18}$ 5^{7}). Incorporated with them we have numerous references to the earthly experiences of Jesus. The manner of His death (12^{2}, cf $2^{9, 14}$), His general temptations (2^{18} 4^{15}), and, in particular, that of Gethsemane (5^{7}, where the author boldly refers to Jesus' prayer to His Father in the face of an awful calamity, and the cause which occasioned that prayer), His work as preacher of salvation, and the delegation by Him of the work of proclamation to those who heard Him (1^{2} 2^{3}), His protracted struggle with implacable religious enemies (12^{3})—all point to our author's minute acquaintance with the historical facts of Jesus' life.

No attempt is made by the writer to minimize the extent and character of Jesus' earthly sufferings and the limitations to which He was subjected. It seems as if, above all things, he is anxious to impress his readers with

HEBREWS, EPISTLE TO

their stern reality, and as if they, in their turn, were tempted to despise the salvation which was wrought out through such humiliation (2^3). For him this humiliation is filled with a moral and spiritual significance of the most vital importance. In His constant endurance and His ultimate triumph Jesus has left an abiding example to all who suffer temptation and persecution (12^{2f}; cf the expression 'we see Jesus,' etc., 2^9). The power of this example is the greater because of the oneness of Jesus and His people (cf 2^{11}), by which their endurance and witness become the embodiment and extension of His work in this respect (cf 5^{12} 13^7 12^1). The spiritual significance of the earthly life of Jesus is no less real and splendid. 'It was fitting' that Jesus should be perfected 'through suffering' ($2^{10, 17}$), not only because He thereby attained to the captaincy of salvation, becoming merciful and faithful (2^{17}) and sympathizing (4^{15}), but because the ability to help 'his brethren' (cf $2^{11, 17}$) springs from the double fact that He is one with them in His experiences, and at the same time victorious over sin ('without sinning,' 4^{15}, cf 7^{26} 9^{28}) as they are not. The profound synthesis of the humiliation and the glory of Jesus thus effected by our author is enhanced as it reaches its climax in the bold assertion that development in character was a necessary element in His earthly life (5^8, cf the words 'made perfect for ever,' 7^{28}).

In order that his readers may fully appreciate the character of the work accomplished by the life and death of Jesus, the writer proceeds to answer objections which may be raised against the propriety of His discharging the priestly functions of mediation and atonement. This he does by a twofold process of reasoning. First, reverting to the language of the great Messianic Psalm, he demonstrates the superiority in point of order, as in that of time, of the priesthood of Melchizedek to that of Aaron ($5^{6, 10}$ $7^{4ff., 17}$ etc.). Next he shows how the ideals dimly foreshadowed by the functions of the Aaronic priesthood have become fully and finally realized in the priesthood of Jesus ($8^{4ff.}$ $9^{8f., 14f.}$). There are certain characteristics in the Melchizedekian order which, by an allegorical method of interpretation, are shown to be typical in the sublime sense of the priesthood of Christ. It was (*a*) royal, (*b*) righteous, (*c*) peaceful, (*d*) personal, (*e*) eternal ($7^{2f.}$). A high priest having these ideal attributes realized in himself answers to man's fallen condition, and they all meet in the Person of the Son 'made perfect for ever' (cf $7^{26ff.}$). No mention is made of the sacrificial aspect of Melchizedek's work, but this is implied in the assertion that our high priest 'offered up himself once for all' (7^{27}). Indeed, it may be said that the latter characteristic is inseparable from the above-mentioned five, for the priesthood which realizes in itself the ethical ideals here outlined will inevitably crown itself by the act of self-sacrifice. The argument is then transferred from the Melchizedekian to the Levitical order, where the last-named function found detailed expression in the Mosaic ritual institutions. Here an answer is given to the question, 'What has this man to offer?' The Aaronic priests offered sacrifices continually, and in his description of the functions incidental to their position we seem to hear echoes of contrasts out of the very parallelisms instituted. The Levitical priest is not (*a*) royal; he 'is appointed' to fulfil certain obligations (8^3, cf 5^1); he is not (*b*) essentially righteous; he has, before he fulfils his mediatorial functions, first to offer for his own sins (8^7, cf 5^3); his work does not conduce to (*c*) peace, for 'consciousness of sin' is still, in spite of priestly activity, alive, and 'perfection' is not thereby attained ($10^{1f.}$); his priesthood is not (*d*) personal; it is an inherited authority 'according to a legal requirement concerning bodily descent' (7^{16}), and the personal equation is shown to be eliminated by the fact that it is the blood of goats and calves that he offers (9^{12}); finally, it is not (*e*) eternal; its ordinances were temporary, 'imposed until the time of reformation' (9^{10}). In every instance 'the much more excellent ministry' (8^6) of Jesus is substantiated, while the repeated assertions of the sacrificial character of His priestly work, by the emphatic declarations that He is not only the Priest but the Sacrifice (7^{27} $9^{12, 26}$), show the difficulty the writer must have felt in sustaining a comparison which is summed up in an antithesis ('once a year' 9^7, and 'eternal' 9^{12}). The whole discussion may be regarded as an *a fortiori* argument on behalf of the superiority of the priesthood of Jesus. The ritual of the Day of Atonement is selected as the basis of his contention, and it was here that the Levitical ceremonial was at its noblest (9^{1-7}). Even here the above-mentioned antithesis is observable; the Levitical ministry was discharged in a Tabernacle which was but 'a copy and shadow of the heavenly sanctuary' (8^5), while that of Christ fulfils itself in 'the true tabernacle' (8^2), where alone are displayed the eternal realities of priestly sacrifice and mediation. The offering of Himself is not merely the material sacrifice of His body on the cross, though that is a necessary phase in His ministerial priesthood (cf $2^{8, 14}$); it is the transcendent spiritual act of One who is sinless ('through the eternal Spirit offered himself without blemish,' 9^{14} 7^{26} 4^{15}). This gives the offering its eternal validity ('once for all,' 7^{27} 9^{12} 10^{10}), and although 'the sacrifice of himself' was consummated 'at the end of the age,' its force and value reach back to 'the foundation of the world' (9^{26}, cf 9^{15}), and continue for all the time that is to come (7^{25} 9^{24}).

5. Salvation and Faith.—Two other interdependent ideas remain to be briefly considered. It has already been said that our author may be described as a theological evolutionist, and in no sphere of his thought is this more evident than in his ideas of salvation and of faith. Salvation is not so much the present realization of the redemptive value of Christ's atoning work as a movement commencing here and now towards that realization in all its fulness. It is true that faith is for him the power to bring the unseen realities into touch with the present life ($11^{1ff.}$). At the same time, the dominant conception of salvation in the writer's mind is the fruition of hopes originated and vitalized by the teaching and experiences of Jesus. Future dominion in a new world ordered and inhabited in perfect moral harmony (see Westcott, *Ep. to Heb.* on 2^5) awaits those who neglect not 'such a great salvation' (2^3). The basis upon which this lordship rests is the actualized crowned Kingship of the Man Jesus, which is at once the guarantee and the *rationale* of the vision ($2^{9ff.}$). Immediately following this view another conception arises dealing with the realization, in the future, of a dominion based upon conquest. Death and the author of death are the enemies which Jesus has 'destroyed'; and not only has He done this, but He delivers those who all their life were in bondage 'through fear.' The perfect humanity of Jesus is again the avenue along which this goal is reached. No other way is possible, and in Him all may find their servitude transmuted into freedom and dominion (cf 2^{14-18}). Once more, arguing from the imperfect realization by the Israelites, under Joshua, of their hopes, the author points out that what they looked for in vain is a type of a higher thing which is now actually awaiting 'the people of God.' Salvation consists in entering into that eternal Sabbath-rest where Jesus has gone before, and where the presence of God is (cf $4^{9ff.}$). The pivotal conception round which these ideas revolve is the unity of Christ and man, the likeness in all things, sin alone excepted, which was effected by the Incarnation.

Our author's habit of looking on faith as an active force in men's lives displays the same tendency to make the future rather than the present the field of his vision. At the same time, it would be a great mistake to imagine that the present is outside the scope of his thought. *Obedience*, however, is the word and thought preferred by him when he speaks of the present grounds of salvation ($5^{8f.}$, cf 11^8). Faith is for him a force working towards ethical ideals, a power which enables men of every nation and class to live lives of noble self-denial for righteousness' sake, 'as seeing him who is invisible' (11^{27}; cf 11^{1-40} 4^2 6^{12} 10^{39}). Of this faith Jesus is 'the pioneer and perfecter' (12^2), and here, too, we get a glimpse of that quickening Divine humanity upon which the writer lays

such constant stress, and which is the source of the effort demanded from his readers when he asks them to imitate their former leaders in a faith which issued in a glorious martyrdom. J. R. W.—H. C.

HEBRON.—1. The third son of Kohath, known to us only from P (Ex 6^{18}, Nu $3^{19, 27}$) and the Chronicler (1 Ch $6^{2, 18}$ 15^{9} $23^{12, 19}$ 24^{23}). The **Hebronites** are mentioned at the census taken in the wilderness of Sinai (Nu 3^{27}), and appear again at the later census in the plains of Moab (26^{58}); cf also 1 Ch $26^{23, 30f.}$ **2.** A son of Mareshah and father of Korah, Tappuah, Rekem, and Shema, 1 Ch $2^{43f.}$

HEBRON.—1. A very ancient city in Palestine, 20 miles SSW. from Jerusalem. It is in a basin on one of the highest points of the Judaean ridge, being about 3040 feet above sea-level. A note of its antiquity is given in Nu 13^{22}, which states that it was ' seven years older than Zoan in Egypt.' Zoan is probably to be identified with Avaris and later Rameses; its founding may be dated by the so-called 400 year stele of Rameses II. to the late 18th cent. B.C. Hebron's original name seems to have been **Kiriath-arba** (*i.e.* probably *Tetrapolis*, or ' Four Cities '), and it was a stronghold of the Anakim. In the time of Abraham, however (whose history is much bound up with this place), we read of Hittites here. From Ephron the Hittite he purchased the cave of Machpelah for the burial of Sarah his wife (Gn 23). This allusion has given rise to much controversy. At the time of the entry of the Israelites it was held by three chieftains of great stature, Sheshai, Ahiman, and Talmai (Nu 13^{22}). On the partition of the country it was allotted to the tribe of Judah, or rather to the Calebites (Jos 14^{12} 15^{14}), who captured it for the Israelite immigrants (Jg $1^{9f.}$). In Jos $10^{1-27, 36-39}$ a different account of the capture of Hebron is given (cf also Jos 11^{21}). According to this story, Hoham was king of Hebron at the time; he joined a coalition of five Amorite kings, headed by Adoni-zedek of Jerusalem against Gibeon, which was allied with the Israelites. Joshua defeated the coalition at Gibeon in the spectacular episode when the ' sun stood still,' and he slaughtered the kings at the cave of Makkedah. Following this, Hebron was destroyed and its inhabitants put to the sword. The relationship of the two accounts is not clear. The Alt-Noth school takes the Joshua story to be an etiology, and unhistorical (cf M. Noth, *Das Buch Josua*^{2} [*HAT*; 1953]). Opposed is the view of the Baltimore School, which regards the stories as essentially historical, though the sequence and date of the events are not certain (cf W. F. Albright, *BASOR*, No. 74 [1939], 11–23; G. E. Wright, *JNES*, v [1946], 105–114). A third view is expressed by Y. Kaufmann in *The Biblical Account of the Conquest of Palestine* (Jerusalem, 1953), who holds that the account in Judges 1 is subsequent to that in Joshua; nonetheless the situation regarding Hebron remains complex. For a judicious evaluation of the evidence see J. Bright, *IB*, ii (1953), 541 ff. The city itself was allotted to the Kohathite Levites, and it was set apart as a city of refuge (Jos 20^{7}). Here David reigned seven and a half years over Judah (2 S 5^{5}), till his capture of Jerusalem from the Jebusites fixed there the capital of the country. It was here also that the rebellious Absalom established himself as king (2 S $15^{7ff.}$). It was fortified by Rehoboam (2 Ch 11^{10}). From the period of the monarchy in Judah (8th cent. on), come many large storage jars stamped with the royal seal, and bearing the name of one of four cities (among them Hebron) in which these jars were apparently produced. They were of fixed capacity, two baths (about 10 gallons), and were intended for use in commerce and the payment of taxes in kind (cf G. E. Wright, *Biblical Archaeology* [1957], pp. 193 f). After the Captivity it was for a time in the hands of the Edomites (though from Neh 11^{25} it would appear to have been temporarily colonized by the returned Jews), but was re-captured by Judas Maccabaeus (1 Mac 5^{65}). In the war under Vespasian it was burned. In 1167 it became the see of a Latin bishop; in 1187 it was captured for the Muslims by Saladin. **2.** Jos 19^{28} (AV), see EBRON.

R. A. S. M.—D. N. F.

HEDGE.—1. *mᵉsūkhāh*, a thorn hedge (Is 5^{5}). **2.** *gādhēr* or *gᵉdhērāh*—probably a stone wall (Ps 89^{40} etc.). **3.** *phragmos* (Greek), Mt 21^{33}, Mk 12^{1}, Lk 14^{23}—a ' partition ' of any kind.

HEDGEHOG, Is 34^{11} (RSV).—See BITTERN.

HEGAI.—A eunuch of Ahasuerus, and keeper of the women, to whom the maidens were entrusted before they were brought in to the king, Est 2^{3} (AV **Hege**) $^{8, 15}$.

HEGE, Est 2^{3} (AV).—See HEGAI.

HEGEMONIDES (2 Mac 13^{24}).—An officer left in command of the district from Ptolemais to Gerar, by Lysias when he was forced to return to Syria to oppose the chancellor Philip (162 B.C.). AV renders ' principal governor.'

HEGLAM.—A son of Ehud, 1 Ch 8^{7}. AV and RV treat the name as a verb and translate ' he removed them,' or ' he carried them away.'

HEIFER.—The heifer was used in agriculture (Jg 14^{18}, Jer 50^{11}, Hos 10^{11}), and in religious ritual (Gn 15^{9}, 1 S 16^{2}, Nu $19^{2f.}$ etc.). Israel is compared to a heifer in Hos 4^{16}, and so is Egypt in Jer 46^{20}, and Chaldaea in Jer 50^{11}. See also OX, RED HEIFER.

HEIR.—See INHERITANCE.

HELAH.—One of the wives of Ashhur the ' father ' of Tekoa, 1 Ch $4^{5, 7}$.

HELAM.—A city in Transjordan mentioned in 2 S $10^{16f.}$, where Hadadezer met David and was defeated. It is also mentioned in LXX in Ezk 47^{16} 48^{1}, but not in Hebrew. Its location is uncertain, but possibly modern *Almā*, in the plain of Hauran. See also ALEMA.

HELBAH.—A town of Asher, Jg 1^{31}. Possibly a doublet of Ahlab in this verse, and then to be identified with **Mahalab** (q.v.).

HELBON.—A place celebrated in old times for the excellence of its wines, Ezk 27^{18}. It is identified with *Ḥalbûn*, about 12 miles N. of Damascus. Grapes are still grown extensively on the surrounding slopes.

HELCHIAH, 1 Es 8^{1} (AV).—See HILKIAH, **3.**

HELDAI.—1. The captain of the military guard appointed for the twelfth monthly course of the Temple service, 1 Ch 27^{15}. He is probably to be identified with ' **Heleb** the son of Baanah the Netophathite,' one of David's thirty heroes, 2 S 23^{29}. In the parallel list (1 Ch 11^{30}) the name is more correctly given as **Heled.** The form *Heldai* is supported by Zec 6^{10}, and should probably be restored in the other two passages. **2.** According to Zec 6^{10}, one of a small band who brought gifts of gold and silver from Babylon to those of the exiles who had returned under Zerubbabel. From these gifts Zechariah was told to make a crown for Joshua the high priest, which was to be placed in the Temple as a memorial of Heldai and his companions. In v.^{14} **Helem** (AV, RV following Hebrew) is clearly an error for Heldai (so RSV).

HELEB.—See HELDAI, **1.**

HELED.—See HELDAI, **1.**

HELEK.—Son of Gilead the Manassite, Nu 26^{30}, Jos 17^{2}. Patronymic, **Helekites,** Nu 26^{30}.

HELEM.—1. A man of Asher, 1 Ch 7^{35} (RSV wrongly **Heler**). Many scholars read **Hotham** to agree with v.^{32}. **2.** Zec 6^{14} (AV, RV); see HELDAI, **2.**

HELEPH.—A town on the border of Naphtali Jos 19^{33}. Although mentioned in the Jerusalem Talmud (*Erubin* 20a, *Megillah* 70a) Heleph has not been identified: J. Simons (*Geographical and Topographical Texts of OT* 196) suggests *Kh.* *ʿArbâdah*.

HELER.—See HELEM, **1.**

HELEZ.—1. One of David's thirty heroes, 2 S 23^{26}. He is described as a **Paltite,** *i.e.* a native of Beth-pelet (q.v.) in the Negeb of Judah. But in 1 Ch 11^{27} he is

called, probably erroneously, a **Pelonite** (q.v.). **2.** David's officer for the seventh month, 1 Ch 27^{10}. He also is called a **Pelonite**, and is commonly identified with the preceding. But as he was an Ephraimite, he could not have been from Beth-pelet. Possibly he was from an unknown Palon. **3.** A Judahite, 1 Ch 2^{39}.

HELI.—1. The father of Joseph, in the genealogy of Jesus (Lk 3^{23}). **2.** An ancestor of Ezra (2 Es 1^{2}, RSV 'Eli'); omitted in parallel passages, 1 Es 8^{2}, Ezr $7^{1f.}$

HELIODORUS.—The chancellor of Seleucus IV. Philopator. At the instigation of Apollonius he was sent by the king to plunder the private treasures kept in the Temple of Jerusalem; but was prevented from carrying out his design by an apparition (2 Mac 3). In 175 B.C., Heliodorus murdered Seleucus, and attempted to seize the Syrian crown; but he was driven out by Eumenes of Pergamum and his brother Attalus; and Antiochus Epiphanes, brother of Seleucus, ascended the throne. There is commonly supposed to be a reference to Heliodorus in Dn 11^{20}, but the interpretation of the passage is doubtful. Further, he is frequently reckoned as one of the *ten* or the *three* kings of Dn $7^{7f.}$ (But see R. H. Charles, Comm.)

HELIOPOLIS, in Egyptian *'Iwnw*, the On of the Bible (Gn $41^{45, 50}$ 46^{20}), capital of the 13th Lower Egyptian nome, lies some 7 miles NE. of Cairo, near the village of Matarieh. From at least the 5th Dynasty it was the principal centre of sun-worship and one of the most important cities and temples in Egypt. The principal god in historic times was the hawk-headed sun-god Rē, Rē-Harakhte, who replaced the older god Atum, whose sacred animal was the ichneumon. Other sacred animals were the phoenix, supposed to alight on the sacred *benben*-stone in the temple, and the Mnevis bull, the living manifestation of Rē-Atum. Only the enclosure wall of the temple and an obelisk of Sesostris I. (*c* 1942 B.C.) now survive. The primitive form of the temple of Atum was a high mound of sand surmounted by the *benben* on which Atum as phoenix alighted at sunrise. The ritual elaborated at Heliopolis, with emphasis on righteousness and purity, and lustration and toilet of the god, became the state ritual throughout Egypt. The priesthood was famed for its learning: tradition states that Plato and other Greek philosophers studied there, but by the time of Strabo the city was already in ruins. H. W. F.

HELKAI.—A priest who returned with Zerubbabel, Neh 12^{15}.

HELKATH.—A Levitical city belonging to the tribe of Asher, Jos 19^{25} 21^{31}. The site is uncertain; possibly *Tell el-Harbaj*. The same place, owing probably to a textual error, appears in 1 Ch 6^{75} as **Hukok**.

HELKATH-HAZZURIM.—The name given to the spot at Gibeon where the fatal combat took place between the twelve champions chosen on either side from the men of Abner and Joab, 2 S 2^{16}. The name means 'the field of flints' or 'of sword edges' (S. R. Driver). We should perhaps read **Helkath-hazziddim,** 'field of sides' (so Driver).

HELKIAS.—See HILKIAH, **3, 9, 10.**

HELL.—See ESCHATOLOGY, GEHENNA, HADES, SHEOL.

HELLENISM.—See EDUCATION, GREECE.

HELLENISTS (AV, Grecians), Greek-speaking Jews referred to in Ac 6^{1} 9^{29} and a variant reading at 11^{20}. In the account of the appointment of the Seven, they are contrasted with the 'Hebrews,' *i.e.* Jews who spoke Hebrew or, more probably, Aramaic. The tension between the two groups not only affected the administration of the daily provision of food but also presumably the attitudes later taken over the admission of Gentiles to the Church and the requirement of circumcision and observance of the Mosaic Law. Though not mentioned in Ac 15 or Gal 1–2, the language barrier and the divergent ideologies of the two groups were undoubtedly important. It is not difficult to imagine that the groups mentioned in Ac $2^{9ff.}$ were designated as 'Hellenists' by their Palestinian co-religionists, since the former undoubtedly spoke or at least understood the Greek language—the *lingua franca* of the whole Near and Middle East in the 1st cent. It was the Hellenists in the early Church who bridged over the gulf between Jews and Gentiles, and the eventual triumph of the principle of admission of Gentiles without requiring observance of the Law was made possible by their existence and activity. The world-wide mission of Judaism (Mt 23^{15}), which had resulted in the class of God-fearers (Ac 17^{4} 18^{7}), thus prepared the way for the spread of the Gospel. Many of these Greek-speaking, more or less Greek-thinking, Jews were among the earliest converts to Christianity in the areas about the Mediterranean. See GREEKS. F. C. G.

HELMET.—See ARMOUR, **2** (*b*).

HELON.—Father of Eliab, the prince of Zebulun at the first census, Nu 1^{9} 2^{7} $7^{24, 29}$ 10^{16}.

HELPS.—Ac 27^{17} AV, 'they used helps, undergirding the ship.' The reference is probably to 'cables passed round the hull of the ship, and tightly secured on deck, to prevent the timbers from starting, especially amidships, where in ancient vessels with one large mast the strain was very great. The technical English word is *frapping*, but the process has only been rarely employed since the early part of the [19th] century, owing to improvements in shipbuilding' (Page's *Acts of the Apostles*; see Smith's *Voyage and Shipwreck of St. Paul*, p. 105). RSV reads, 'they took measures to undergird the ship.'

HELPS (RSV 'helpers').—In 1 Co 12^{28} St. Paul, in order to show the diversity in unity found in the Church as the body of Christ, gives a list of services performed by various members of the churchly body. In the course of his enumeration he uses two Greek nouns (*antilēmpseis* and *kybernēseis*) employed nowhere else in the NT, and rendered in AV 'helps,' 'governments.' 'Helps' may suggest a lowly kind of service, as of one who acts as assistant to a superior. The usage of the Greek word, however, both in the LXX and in the papyri, points to succour given to the needy by those who are stronger; and this is borne out for the NT when the same word in its verbal form occurs in St. Paul's exhortation to the elders of the Ephesian Church to 'help the weak' (Ac 20^{35} RSV). 'Helps' in this list of churchly gifts and services thus denotes such attentions to the poor and afflicted as were specially assigned at a later time to the office of the deacon; while '**governments**' (RVm 'wise counsels,' cf Pr 1^{5} 11^{14} 24^{6}, LXX) suggests that rule and guidance which afterwards fell to presbyters or bishops. (RSV reads 'administrators.')

We are not to think, however, that there is necessarily any reference in this passage to deacons and bishops as Church officials. The fact that abstract terms are used instead of concrete and personal ones as in the earlier part of the list, shows that it is functions, not offices, of which the Apostle is thinking throughout. 'Helps,' as Hort says (*Chr. Ecclesia*, p. 159) are 'anything that could be done for poor or weak or outcast brethren, either by rich or powerful or influential brethren, or by the devotion of those who stood on no such eminence.' 'Governments,' again, refers to 'men who by wise counsels did for the community what the steersman or pilot does for the ship.' J. C. L.—M. H. S.

HELVE.—Dt 19^{5} (AV, RV); a word nearly obsolete, equivalent to 'handle' (so RSV).

HEM.—See FRINGES.

HEMAM, Gn 36^{22} (AV, RV).—See HEMAN, **1.**

HEMAN.—1. A Horite clan of Edom, Gn 36^{22}. Hebrew, followed by AV and RV, has **Hemam.** 1 Ch 1^{39} has **Homam,** but the LXX in both places has **Heman.** Many scholars follow LXX, and so RSV in Gn 36^{22}. **2.** A legendary wise man whose wisdom Solomon excelled, 1 K 4^{31}. **3.** A son (or clan) of Zerah of the tribe of Judah, 1 Ch 2^{6}; probably also alluded to in the title of Ps 88 as Heman the Ezrahite, Ezrah being another form of *Zerah*. **4.** A Korahite singer of the time of David, said to be the son of Joel the son of Samuel,

1 Ch 6[33] (cf 15[17, 19] 16[41f] 25[1-6]). As Chronicles in a number of cases confuses the genealogy of Judah with that of Levi, and as the wise men of 1 K 4[31] are legendary, it is probable that **2, 3,** and **4** are the same legendary ancestor of a clan celebrated for its music and wisdom. This view finds some support in the fact that the title of Ps 88 makes Heman both an Ezrahite (Judahite) and a Korahite (Levite).

HEMATH, 1 Ch 2[55] (AV).—See HAMMATH, **1.**

HEMDAN.—See HAMRAN.

HEMORRHAGE.—See MEDICINE.

HEMLOCK.—See GALL, WORMWOOD.

HEN.—In Zec 6[14] 'Hen the son of Zephaniah' is mentioned amongst those whose memory was to be perpetuated by the crowns laid up in the Temple (so AV, RV). RSV substitutes for 'Hen' the name of Josiah, found in v.[10].

HEN.—See COCK.

HENA.—A city named with Ivvah (q.v.) in 2 K 18[34] 19[13], Is 37[13], as conquered by the Assyrians; its site is unknown.

HENADAD.—A Levite, Ezr 3[9], Neh 3[18, 24] 10[9].

HENNA (Heb. *kōpher*).—The henna plant (Ca 1[14] 4[13]; AV **camphire**) is a small shrub (*Lawsonia alba*) which may still be found at Engedi. It is a great favourite with the people of Palestine to-day, and a 'cluster' of the flowers is often put in the hair; the perfume is much admired. It is also extensively used for staining the hands (especially the nails), the feet, and the hair; it stains an ochre-red, but further treatment of the nails with a mixture of lime and ammonia turns the colour almost black. Old women frequently redden their hair, and Moslems their beards, by means of henna.

E. W. G. M.

HEPHER.—1. A son of Gilead, the Manassite, Nu 26[32] 27[1], Jos 17[2f]. Patronymic, **Hepherites,** Nu 26[32]. **2.** A man of the tribe of Judah, 1 Ch 4[6]. **3.** One of David's heroes, 1 Ch 11[36] (but the text is uncertain). **4.** A Canaanite royal city, named immediately before Aphek (q.v.), Jos 12[17]. **5.** A place in Solomon's 3rd district, 1 K 4[10], probably in Manasseh (cf **1** above). It is named together with Soco (q.v.), which is probably modern *Tell er-Râs,* WNW. of Samaria.

HEPHZI-BAH ('she in whom is my delight').—**1.** The mother of Manasseh, king of Judah, 2 K 21[1]. **2.** Symbolic name of the Zion of Messianic times, Is 62[4] (RSV translates 'My delight is in her').

HERALD.—The word occurs in AV only in Dn 3[4] (so RV, RSV) as translation of Aramaic *kārôz* (probably —Greek *kēryx*). The herald is the mouthpiece of the king's commands (cf Gn 41[42], Est 6[9]). The word 'herald' is found in RSV in Is 40[9] 41[27] of the prophet as herald of God, and in 2 P 2[5] of Noah as a preacher of righteousness; in RVm it is found in 2 P 2[5] and in 1 Ti 2[7], 2 Ti 1[11] of St. Paul as the herald of God. The cognate Greek verb and noun are regularly used in NT of 'preaching.' In Sir 20[15], where AV and RV have 'crier,' RSV has 'herald.' There is no instance in the Bible of the employment of 'heralds' in war.

HERB.—1. *yārāḳ, yerek*; twice translated 'green thing,' Ex 10[15], Is 15[6] (RSV 'verdure' in latter); *gan yerek,* 'garden of herbs,' Dt 11[10] (RSV 'a garden of vegetables'), 1 K 21[2] (RSV 'a vegetable garden'). RSV renders *yārāḳ* by 'herb' in Gn 2[5]. **2.** *'ēśebh* (cf Arabic *'ushb*), herbage in general, Gn 1[11] (RSV 'vegetation'). RSV renders *'ēśebh* by 'herb' in Dt 32[2] and by 'herbage' in Is 42[15], Jer 14[6]. A kindred word is rendered by 'herbage' in Pr 27[25]. See GRASS. **3.** *deshe'* is translated 'herb' in AV six times, Dt 32[2], 2 K 19[26], Job 38[27], Ps 37[2], Is 37[27] 66[14] (RV 'green herb' in 2 K 19[26], Ps 37[2], Is 37[27]; 'tender grass' in the others; RSV 'green herb' in Ps 37[2], 'tender grass' or 'grass' in the others). **4.** *'ôrôth,* 2 K 4[39] 'herbs.' This is explained to be the plant colewort, but may have been any eatable herbs that survived the drought. The expressions 'dew of herbs' (Is 26[19] AV, RV; RSV 'dew of light') and 'upon herbs' (Is 18[4] AV; RV, RSV 'in sunshine') are obscure. In the NT we have the Greek terms *botanē* (He 6[7] 'herbs' AV, RV; RSV 'vegetation') and *lachanon=yerek* (Mt 13[32] 'herbs' AV, RV; RSV 'shrubs'). RSV renders *lachanon* by 'herbs' in Lk 11[42]. See also BITTER HERBS.

E. W. G. M.—H. H. R.

HERCULES (Gr. Heracles) is mentioned by this name only in 2 Mac 4[19f], where Jason, the head of the Hellenizing party in Jerusalem (174 B.C.) sent 300 silver drachmas to Tyre as an offering in honour of Hercules, the tutelary deity of that city. Hercules was the most widely worshipped of all Greek heroes; at Tyre his worship dated from very early times, and his temple there was (according to Herodotus ii. 44) as old as the city itself. As Herodotus insists, he was worshipped both as hero and as god.

During Hellenistic and Roman times, Hercules or Heracles achieved pre-eminence as the typical and popular hero-divinity who, through toil and suffering for the benefit of mankind, won his way to immortality and a place among the Olympian gods. The classic Twelve Labours of Heracles were the best-known illustrative series of such beneficent and heroic accomplishments on behalf of needy and suffering men. Stoic and Cynic teachers found in Heracles their prime exemplar of strenuous activist excellence, most worthy of human emulation.

H. R. W.

HERD.—See CATTLE, OX, SHEEP.

HEREAFTER.—In Mt 26[64] 'Hereafter you will see the Son of Man seated at the right hand of Power, and coming on the clouds of heaven,' the meaning of 'hereafter' is 'from this time' (RV 'henceforth'). So Mk 11[14] ('no one ever again'), Lk 22[69] ('from now on'). Elsewhere the meaning is 'at some time in the future,' as Jn 13[7] AV, 'What I do thou knowest not now, but thou shalt know hereafter' (RSV 'afterward').

HEREDITY, which may be defined as 'the hereditary transmission of qualities, or even acquirements,' so far as it is a scientific theory, is not anticipated in Holy Scripture. That men are 'made from one' (Ac 17[26]; AV 'of one blood') is a fact of experience, which, in common with all literature, the Bible assumes. The unsophisticated are content to argue from like to like, that is, by analogy. But the modern doctrine of heredity, rooted as it is in the science of biology, involves the recognition of a principle or law according to which characters are transmitted from parents to offspring. Of this there is no trace in the Bible. Theology is therefore not directly interested in the differences between Weismann and the older exponents of Evolution.

1. In the OT, which is the basis of the doctrine of the NT, there is no dogmatic purpose, and therefore no attempt to account for the fact that 'all flesh' has 'corrupted their way upon the earth' (Gn 6[12]), and that 'there is none that does good' (Ps 14[1]). A perfectly consistent point of view is not to be expected. Not a philosophical people, the Hebrews start from the obvious fact of the unity of the race in the possession of common flesh and blood (Job 14[1] 15[14]), the son being begotten after the image of the father (Gn 5[3]; cf He 2[14]). This is more especially emphasized in the unity of the race of Abraham, that 'Israel after the flesh' (1 Co 10[18] AV and RV), whose were the fathers and the promises (Ro 9[4f]). But the Bible never commits itself to a theory of the generation or procreation of the spirit, which is apparently given by God to each individual (Gn 2[7] 7[23], Job 33[4]), constitutes the personality ('life' 2 S 1[9], 'person' [RV 'soul'] Nu 5[6]), and is withdrawn at death (Ec 12[7]). This is the source of Ezekiel's emphasis on individual responsibility (18[4]), a criticism of the proverb concerning sour grapes (v.[2]), which was made to rest on an admitted principle of the Mosaic covenant, the visitation upon the children of the fathers' sins (Ex 20[5]). This principle involves corporate guilt; which, though sometimes reduced to a pardonable

weakness inseparable from flesh (Ps 78[39] 103[14], Job 10[9]), and therefore suggestive of heredity, yet, as involving Divine wrath and punishment, cannot be regarded as a palliation of transgression (Ex 34[7], Ps 7[11], Ro 1[18]). Sin in the OT is disobedience, a breach of personal relations, needing from God forgiveness (Ex 34[6f], Is 43[25]); and cannot therefore be explained on the principle of hereditary transmission. Moreover, the unity of Israel is as much one of external status as of physical nature, of the inheritance of the firstborn no less than of community in flesh and blood (Ex 4[22]; cf Gn 25[23] 27[35]). Similarly Adam is represented as degraded to a lower status by his sin, as cast out of the garden and begetting children in banishment from God's presence.

2. Such are the materials from which NT theology works out its doctrine of **original sin**, not a transmitted tendency or bias towards evil, but a submission to the power of the devil which may be predicated of the whole race. (See SIN.) J. G. S.

HERES.—1. Jg 1[35] (AV, RV); see HAR-HERES. **2.** In Jg 8[13] (RV, RSV) 'the ascent of Heres' (AV 'before the sun was up') is mentioned as the spot from which Gideon returned after the defeat of Zebah and Zalmunna. Both the topography and the text of the narrative are doubtful. See also IR-HA-HERES, TIMNATH-HERES, TIMNATH-SERAH.

HERESH.—A Levite, 1 Ch 9[15].

HERESY.—The word 'heresy' (Gr. *hairesis*) is not used in the NT in the sense which it acquired by the first quarter of the 2nd cent., as a doctrinal departure from the faith of the church which must lead to a disruption of its life. The usual NT meaning of *hairesis* is simply party, school, or sect, and sect is the word by which it is most frequently rendered. In Acts this is the invariable use. Thus it is applied to the 'parties' (RSV) of the Pharisees and Sadducees (Ac 5[17] 15[5] 26[5]), precisely as in Josephus (*Ant.* XIII. v. 9 [171]). Similarly it is used of the followers of Christ, though not by themselves (24[5, 14] 28[22]). In 24[14] Paul deliberately uses 'the Way' to designate what his accusers call a 'sect.' The reason may be that in his usage *hairesis*, while still bearing the general sense of 'party,' had come to convey a reproach as applied to Christians.

Paul's pleas for the unity of the church continually lead him to a condemnation of the spirit of factionalism or division. *Hairesis*, RSV 'party-spirit,' is one of the evils listed in Gal 5[20], and in 1 Cor 11[18f] he speaks with distress of divisions in the church. The individual who is 'factious' (RSV) is singled out for condemnation in Tit 3[10] (AV and RV have 'heretical.') In 1 Cor 11[18f] *hairesis* is divisiveness or schism, and schism is a rending or cleaving of the body of Christ (12[25]). It is not doctrinal aberrations but rather breaches of the spirit of brotherly unity appropriate to the followers of Christ which are in view here.

Outside of Acts and the Pauline Epistles, *hairesis* is used in the NT only in 2 P 2[1]. In this late NT writing we see a sharper identification of false teaching as the source of error and division. The 'damnable' (RSV 'destructive') heresies here spoken of are the false teachings of those who invade the Church from outside and introduce a denial of its very foundation. There has not yet developed the later ecclesiastical concept of heresy as the holding or teaching of erroneous doctrine by one who stands within the church and maintains allegiance to its faith, though his error would disrupt it from within. D. D. W.

HERETH.—A forest which was one of the hiding-places of David, 1 S 22[5] (AV **Hareth**). The reference may be to the wooded mountain E. of Adullam, where the village of *Khārās* now stands.

HERMAS.—A Christian at Rome, saluted in Ro 16[14]. The name is a common one, especially among slaves. Origen's identification of this Hermas as the author of the well-known *Shepherd of Hermas*, a book written at Rome probably in the thirties or forties of the 2nd cent., is very improbable. J. L.

HERMES.—One of those greeted in Ro 16[14]. The name is common. At first, like all the names of gods, it was used exclusively for slaves, but in imperial times (as a result of manumissions) it became a fairly common name for free men also. J. L.

HERMES (translated *Mercury* in AV, RV of Ac 14[12]), was the spokesman of the gods, and hence was regarded by the Greeks as the god of eloquence. Hence, when Paul and Barnabas healed the cripple at Lystra, the former was hailed as Hermes, 'because he was the chief speaker.' The identification of Hermes with Mercury was due to another attribute. As the messenger of the gods, Hermes was the god who brought good fortune to men. Mercury was the Roman god of commerce (cf *merx*, *mercari*), and success in commerce was attributed to him. Hence the mythology of the two was confused. In the words of Sir William Ramsay, 'The origin and real character of Hermes are perhaps more difficult to define than is the case with any other Greek deity.' In popular religion this ancient god had many more attributes and functions, especially as *psychopompos* or guide of souls to the other world, beyond death. The so-called Hermetic writings, which contain a quasi-gnostic system of thought, owe their connexion with Hermes solely to his identification with the Egyptian god Thoth (*Tat*) in the age of Hellenistic syncretism. In some areas he was thought to be the finder of lost or hidden things. A. E. H.—F. C. G.

HERMOGENES.—One of a group of Asiatics, formerly companions of St. Paul, who at some point deserted him (2 Ti 1[17]). J. L.

HERMON.—The highest mountain in Syria (9150 feet high), a spur of the Anti-Lebanon. Its name means 'apart' or 'sanctuary,' and refers to its ancient sanctity (cf Ps 89[12]; and the name 'Mount **Baal-hermon**,' Jg 3[3]). Meagre traces of ruins remain on its summit, probably connected, at least partly, with a former high place. According to Dt 3[9], it was called **Sirion** by the Sidonians and **Senir** (q.v.) by the Amorites. It may have been the scene of the Transfiguration, Mk 9[2]. The summit has three peaks, that on the SE. being the highest. Snow lies on the top throughout the year, except in the autumn of some years; but usually there is a certain amount in the ravines. The top is bare above the snow-line; below it is richly wooded and covered with vineyards. The Syrian bear can sometimes be seen here; seldom, if ever, anywhere else. The modern name is *Jebel esh-Sheikh*, 'the mountain of the Chief.'
R. A. S. M.

HERMONITES.—A mistaken translation in Ps 42[6] AV, corrected in RV to **Hermons** (RSV **Hermon**), and referring to the three peaks of the summit of Hermon (q.v.).

HEROD.—The main interest attaching to the Herods is not concerned with their character as individual rulers. They acquire dignity when they are viewed as parts of a supremely dramatic situation in universal history. The fundamental elements in the situation are two. First, the course of world-power in antiquity, and the relation between it and the political principle in the constitution of the Jewish people. Second, the religious genius of Judaism, and its relation to the political elements in the experience of the Jews.

A glance at the map shows that Palestine is an organic part of the Mediterranean world. When, under the successors of Alexander, the centre of political gravity shifted from Persia to the shores of the Mediterranean Sea, the door was finally closed against the possibility of political autonomy in Palestine. The kingdom of the Seleucids had a much larger stake in the internal affairs of the country than the Persian Empire had thought of claiming. For one thing, the political genius of the Greeks demanded a more closely knit State than the Persian. For another, the fact that Palestine was the frontier towards Egypt made its political assimilation to Northern Syria a military necessity. The Maccabaean

War give rise to the second Jewish State. But it was shortlived. Only during the disintegration of the house of Seleucus could it breathe freely. The moment Rome stretched out her hands to Syria its knell was rung.

The Hasmonaean house was obliged to face a hopeless foreign situation. World-politics made an independent career impossible. In addition, it had to face an irreconcilable element in the constitution of Judaism. The rise of the Pharisees and the development of the Essenes plainly showed that the fortune of the Jews was not to be made in the political field. In truth, Judaism was vexed by an insoluble contradiction. The soul of this people longed for universal dominion. But efficient political methods for the attainment of dominion were made impossible by their religion. The Hasmonaean house was caught—between the upper and the nether millstone.

The foundations of the Herodian house were laid by Antipater, an Idumaean, who had succeeded his father, also Antipater, as military governor of Idumaea in the days of Alexander Jannaeus and his doughty wife Alexandra (Jos. *Ant.* XIV. i. 3 [8–10]). Apparently the Idumaeans, converted by the sword, were never Jewish to the core. More than once the Pharisees flung the reproach 'half-Jew' in the teeth of Herod. Antipater was a man of undistinguished family, and fought his way up by strength and cunning. The decay of the Hasmonaean house favoured his career. Palestine needed a strong hand. The power of Syria and the power of Egypt were gone. Rome was passing through the decay of the senatorial régime. The Empire had not yet appeared, to gather up the loose ends of provincial government. Pompey's capture of Jerusalem had shattered what little was left of Hasmonaean prestige. Yet Rome was not ready to assume direct control of Palestine. It was in this situation that Antipater showed his astuteness. It was his policy to be the directing power behind the scenes. In the years of confusion and revolt which followed the death of Alexandra and during the early years of Roman control he proved himself a valuable and efficient tool of Rome, and thus established himself and his two sons as Rome's native agents.

1. Herod the Great.—Antipater's son, Herod, had shown himself before his father's death both masterful and merciless. His courage was high, his understanding capable of large conceptions, and his will able to adhere persistently to a distant end of action. His temperament was one of headlong passion; and when, in the later period of his life, the power and suspiciousness of the tyrant had sapped the real magnanimity of his nature, it converted him into a butcher, exercising his trade upon his own household as well as upon his opponents. His marriage with Mariamme, the heiress of the Hasmonaean house, and his league with Rome, indicate the story of his life. His marriage was one both of love and of policy. His league was a matter of clear insight into the situation. He was once driven out of Palestine by an alliance between the Hasmonaean house and the Parthians (Jos. *Ant.* XIV. xiii. 7 [352 f]). But, backed by Rome, he returned with irresistible force. Mutual interest made the alliance close. Herod served the Empire well. And Augustus and his successors showed their appreciation. They stood by Herod and his descendants even when the task was not wholly pleasing. They also conferred various privileges and exemptions upon the practice of Judaism outside Palestine.

Josephus calls Herod a man of extraordinary force and political discernment. He owed his good fortune largely to himself, manifesting powers which might have made him, in a less difficult field, fully deserving of his title 'the Great.' He enjoyed the life-long favour of Augustus and his minister Agrippa. He made life and property in Palestine safe from every foe but his own tyranny. And though he showed himself a brutal murderer of Mariamme and his own children, not to speak of the massacre of the Innocents—an incident unrecorded by Josephus and mentioned only in Mt 2—it must be remembered that Jerusalem was a hot-bed of intrigue. This does not justify him, but it explains his apparently insensate blood-lust.

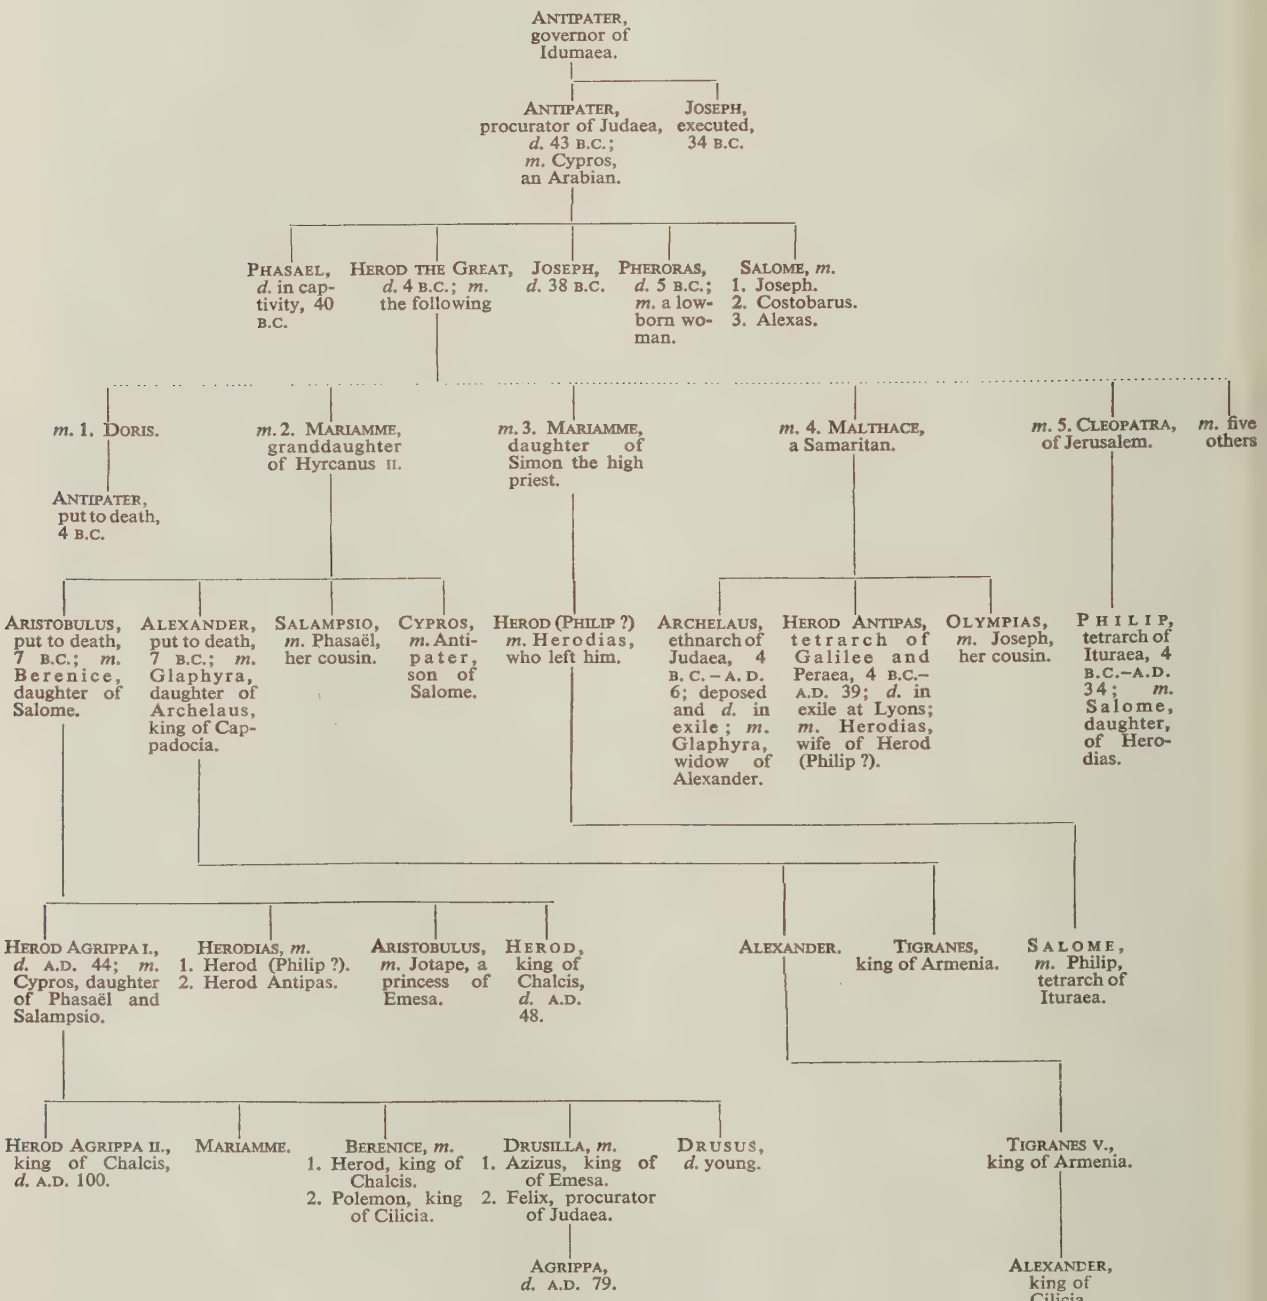
His sympathy with Hellenism was a matter of honest conviction. The Empire was slowly closing in on Palestine. An independent Jewish power was impossible. The man who ruled the country was bound to work in the interest of Rome. Hellenism in the Holy Land was the political order of the day. So Herod built cities and gave them imperial names. He built amphitheatres, patronized the Greek games and, as far as his temperament and opportunities permitted, Greek literature. At the same time, while he was but 'half-Jew,' he sincerely desired to do large things for Judaism. He was a stout defender of the rights of the Jews in the Diaspora. He rebuilt the Temple with great splendour. But his supreme gift to the Jews, a gift which they were not capable of appreciating, was a native Palestinian power, which, whatever its methods, was by profession Jewish. When he died, after a long reign (37–4 B.C.), and the Jews petitioned the Emperor for direct Roman rule (Jos. *Ant.* XVII. xi. 2 [314]), they showed their incompetence to read the signs of the times. Roman rule was a very different thing from Persian rule or Ptolemaic. When it came, the iron entered into the soul of Judaism.

2. Archelaus.—After some delay Herod's third will was carried out substantially. His sons were set up in power,—Archelaus over Judaea, Samaria, and Idumaea, Antipas over Galilee and Peraea, Philip over Batanaea, Trachonitis, Ituraea, and Auranitis. To Archelaus had fallen the greatest prize, and at the same time the hardest task. After maintaining himself until the year A.D. 6, his misgovernment and weakness, combined with the impossible elements in Judaism, caused his downfall and exile. The Jews now had their own wish. Judaea came under direct Roman rule. A tax was levied. Judas of Gamala rose in rebellion. He was easily put down. But the significance of his little rebellion was immense. For now what Josephus calls 'the fourth philosophical sect' amongst the Jews (*Ant.* XVIII. i. 6 [23]) came into prominence, namely, a militant and thoroughgoing nationalistic or home-rule group. That this group originated at precisely this moment, as Josephus suggests, is perhaps improbable. It had been present from the earliest days of the Roman rule. Actually it was Herod's successful opposition to this movement, when sent by his father Antipater to be governor of Galilee (Jos. *Ant.* XIV. ix. 2–5 [158 ff]) which had apparently first brought him to Rome's favourable attention. From this militant group, always present and increasingly vocal as Rome's hand grew heavier, were eventually to come the Zealots, as Josephus styles the fanatical followers of John of Gischala, in the days of the great war against Rome (A.D. 66–73). That this movement had its first start in the days of Judas of Gamala, or that in his days it was already styled Zealot is constantly asserted but highly improbable. This faction dragged into the light the self-contradiction within Judaism. The Jews could not build a State themselves. Their principles made it impossible for them to keep the peace with their heathen overlord. Conflict was inevitable.

3. Herod Antipas, called 'the tetrarch' (Mt 14^{1}, Lk 3^{19} 9^{7}, Ac 13^{1}), had better fortune. Jesus is said to have described him as a 'fox' (Lk 13^{32}). The name gives the clue to his nature. He was a man of craft rather than strength. But cunning served him well, and he kept his seat until the year A.D. 39. The corroding immorality of his line shows itself in his marriage with Herodias, his brother's wife (see JOHN THE BAPTIST). His lust proved his undoing. Herodias, an ambitious woman, spurred him out of his caution. In rivalry with Herod Agrippa I., he asked of Caligula the royal title. This exciting suspicion, his doings were looked into and he was banished.

4. Philip (Lk 3^{1}) seems to have been the best among the sons of Herod. And it was his good fortune to rule over an outlying country where the questions always rife in Jerusalem were not pressed. His character and

GENEALOGICAL TABLE OF THE FAMILY OF HEROD



ANTIPATER, governor of Idumaea.
ANTIPATER, procurator of Judaea, d. 43 B.C.; m. Cypros, an Arabian.
JOSEPH, executed, 34 B.C.
PHASAEL, d. in captivity, 40 B.C.
HEROD THE GREAT, d. 4 B.C.; m. the following
JOSEPH, d. 38 B.C.
PHERORAS, d. 5 B.C.; m. a low-born woman.
SALOME, m. 1. Joseph. 2. Costobarus. 3. Alexas.
m. 1. DORIS.
m. 2. MARIAMME, granddaughter of Hyrcanus II.
m. 3. MARIAMME, daughter of Simon the high priest.
m. 4. MALTHACE, a Samaritan.
m. 5. CLEOPATRA, of Jerusalem.
m. five others
ANTIPATER, put to death, 4 B.C.
ARISTOBULUS, put to death, 7 B.C.; m. Berenice, daughter of Salome.
ALEXANDER, put to death, 7 B.C.; m. Glaphyra, daughter of Archelaus, king of Cappadocia.
SALAMPSIO, m. Phasaël, her cousin.
CYPROS, m. Antipater, son of Salome.
HEROD (PHILIP ?) m. Herodias, who left him.
ARCHELAUS, ethnarch of Judaea, 4 B.C. – A.D. 6; deposed and d. in exile; m. Glaphyra, widow of Alexander.
HEROD ANTIPAS, tetrarch of Galilee and Peraea, 4 B.C.–A.D. 39; d. in exile at Lyons; m. Herodias, wife of Herod (Philip ?).
OLYMPIAS, m. Joseph, her cousin.
PHILIP, tetrarch of Ituraea, 4 B.C.–A.D. 34; m. Salome, daughter, of Herodias.
HEROD AGRIPPA I., d. A.D. 44; m. Cypros, daughter of Phasaël and Salampsio.
HERODIAS, m. 1. Herod (Philip ?). 2. Herod Antipas.
ARISTOBULUS, m. Jotape, a princess of Emesa.
HEROD, king of Chalcis, d. A.D. 48.
ALEXANDER.
TIGRANES, king of Armenia.
SALOME, m. Philip, tetrarch of Ituraea.
HEROD AGRIPPA II., king of Chalcis, d. A.D. 100.
MARIAMME.
BERENICE, m. 1. Herod, king of Chalcis. 2. Polemon, king of Cilicia.
DRUSILLA, m. 1. Azizus, king of of Emesa. 2. Felix, procurator of Judaea.
DRUSUS, d. young.
TIGRANES V., king of Armenia.
AGRIPPA, d. A.D. 79.
ALEXANDER, king of Cilicia.

his good fortune together gave him a long and peaceful rule († A.D. 34).

5. Another **Philip** (son of Herod the Great and Mariamme, daughter of Simon the high priest) is mentioned in Mt 14^3, Mk 6^{17} as the first husband of Herodias. Actually his name appears to have been Herod (Jos. *Ant.* XVIII. v. 1 [109]), and his mention as 'Philip' in the Gospel story would seem to be due to confusing him with Philip the tetrarch, who married Salome, the daughter of Herodias and her former husband Herod (*Ant.* XVIII. v. 4 [137]).

6. In **Herod Agrippa I.**, the Herodian house seemed at one time to have reached the high water-mark of power. He had served a long apprenticeship in the Imperial Court, where immorality, adaptability, and flattery were the price of position. That he was not altogether unmanned is proved by his attempting to dissuade Caligula from his proposal to set up a statue of himself in the Temple; for, in setting himself against the tyrant's whim, he staked life and fortune (Jos. *Ant.* XVIII. viii. 7 f [289 ff]). In high favour with Caligula, he was successively granted by him what had been the tetrarchies of Philip and Antipas. He continued in imperial favour, and his territory was expanded by Claudius to include the Roman province of Judaea (including Samaria). Thus for a brief period (A.D. 41–44) he reigned with the title king over a reunited Palestine. His reign was the Indian summer of Judaism. Even the Pharisees thought well of him. When in Rome he lived as one who knew Rome well. But in Jerusalem he wore his Judaism as a garment made to order. He was quite willing to gratify the Jews by putting leading Christians to death (Ac 12^{1f}). In high favour both at Jerusalem and at Rome, he seemed to be beyond attack. But the veto put on his proposal to rebuild the walls of his capital showed clearly his insecurity. And the pagan streak in him was sure, sooner or later, to come to light. The story of his death, wherein the Book of Acts (12^{20-23}) and Josephus (*Ant.* XIX. viii. 2 [343 ff]) substantially agree, brings this out. At Caesarea he paraded himself before a servile multitude as if he were a little Caesar, a god on earth. Smitten by a terrible disease, he died in great agony (A.D. 44). Jews and Christians alike looked on his end as a fitting punishment for his heathenism. The house of Herod was 'half-Jew' to the last.

7. Herod Agrippa II., son of the last named, before whom St. Paul delivered the discourse contained in Ac 26. As he was only seventeen years of age when his father died, the emperor Claudius would not make him king of Palestine; but in the year A.D. 50, when his uncle Herod king of Chalcis died, he was made ruler of this tiny kingdom in the Lebanons. He seems to have been non-resident, living in Rome; but in A.D. 53 he was given the territories formerly ruled by Philip the tetrarch, Lysanias, and the eparchy ruled by Varus. He tried to persuade the Palestinian Jews not to revolt, in A.D. 66, pointing out the impossibility of victory; but he failed to convince them (Jos. *War*, II. xvi. 4 [345 ff]. He ruled long and peacefully, and died in A.D. 100.

See the accompanying genealogical table.

H. S. N.—M. S. E.

HERODIANS.—The name of a political party among the Jews, which derived its name from the support it gave to the dynasty of Herod (cf Jos. *Ant.* XIV. xv. 10 [450]). Perhaps they hoped for the restoration of the national kingdom under one of the sons of Herod. The Herodians appear in the Gospels on two occasions (Mk 3^6, Mt 22^{16} || Mk 12^{13}) as making common cause with the Pharisees against Jesus.

HERODIAS.—See HEROD, 3, and JOHN THE BAPTIST.

HERODION.—A Christian mentioned in Ro 16^{11}, apparently a Jew, and perhaps a freedman of the Herods.

HERON ('^{a}*nāphāh*; Lv 11^{19}, Dt 14^{18}).—What bird is meant by '^{a}*nāphāh* is quite uncertain; and the Assyrian *anpatu*, which has been cited to explain it, is equally unidentified, being known only as a bird of ill omen and as having been brought home from across the Euphrates by an Assyrian king. No evidence that it is the 'heron' (AV, RV) has ever been produced (see STORK); and 'ibis' (RVm) is absurd, since this bird is not found in Palestine. It is rendered by the ancient versions 'thick-kneed plover' (LXX, Vulgate), 'black hawk' and 'white hawk' (Targum of Pseudo-Jonathan). The root of the name, if any guide, suggests a bird with a beak shaped like a nose (Heb. *'aph*=Aram. *'anpâ* 'nose'), and its position immediately after the osprey and the stork suggests one living on or by water. It may then be the 'cormorant,' a large blackish bird with a long neck and white cheeks and a hooked beak. Both the ordinary cormorant (*phalacrocorax carbo*) and the pygmy cormorant (*phalacrocorax pygmaeus*) are found in abundance on the coast and beside all the streams in Palestine. It covers an extensive piece of ground round its nest with its greenish white excrement, which is fatal to the vegetation in contact with it and emits a disgusting odour, mingled with that of decaying regurgitated fragments of fish, so that it is properly included for this reason as also as a *raptor* amongst unclean birds.

G. R. D.

HESED, 1 K 4^{10} (AV).—See BEN-HESED.

HESHBON is the modern *Ḥesbân*, finely situated close to the edge of the great plateau of Eastern Palestine. The extensive ruins, mainly of Roman times, lie on two hills connected by a saddle. The site commands views, E. and S., of rolling country; N., of hills including *e.g.* that on which *el-'Âl* (Elealeh) lies; and W., in the distance, of the hills of Judah and nearer, through a gap in the near hills, of the Jordan valley, which lies some 4000 feet below, the river itself being barely 20 miles distant. Allotted to Reuben (Jos 13^{17}), Heshbon appears in the OT most frequently as being, or having been, the capital of Sihon (q.v.), king of the Amorites (Dt 2^{26} and often), or, like many other towns in this neighbourhood, in the actual possession of the Moabites (Is 15^4 16^{8f}, Jer $48^{2,\ 34f}$) to whom, according to Nu 21^{26}, it had belonged before Sihon captured it. Jer 49^3, which appears to make Heshbon an Ammonite city, is probably corrupt (cf Driver, *Book of the Prophet Jeremiah*). According to Josephus (*Ant.* XIII. xv. 4 [397]), it was in the hands of the Jews in the time of Alexander Jannaeus (104–78 B.C.). The **pools** in Heshbon, mentioned in Ca 7^4, were perhaps pools near the spring which rises 600 feet below the city, and in the neighbourhood of which are traces of ancient conduits.

G. B. G.

HESHMON.—An unknown town in the extreme S. of Judah, Jos 15^{27}.

HETH.—A 'son' of Canaan, Gn 10^{15}, 1 Ch 1^{13}. The wives of Esau are called in Gn 27^{46} 'daughters of Heth' (RSV 'Hittite women'); and in Gn 23^{3ff} 25^{10} 49^{32} 'children of Heth,' *i.e.* Hittites (so RSV), are located at Mamre. See, further, HITTITES.

ḤETH.—Eighth letter of Hebrew alphabet, and so used to introduce the eighth part of Ps 119, every verse of which begins with this letter.

HETHLON.—A place mentioned by Ezekiel (47^{15} 48^1) as situated on the ideal northern boundary of Israel. The site is unknown; possibly modern *Ḥeitelâ*, NE. of Tripolis.

HEXATEUCH.—See PENTATEUCH.

HEZEKIAH.—**1.** One of the most prominent kings of Judah. He came to the throne after his father Ahaz, about 715 B.C. The assertions that Samaria was captured in his sixth year and that Sennacherib's invasion came in his fourteenth year are inconsistent (2 K $18^{10,\ 13}$). The latter has probability on its side, and as we know that Sennacherib invaded Palestine in 701 B.C. the calculation is easily made.

Politically Hezekiah had a difficult task. His father had submitted to Assyria, but the vassalage was felt to be severe. The petty kingdoms of Palestine were restive under the yoke, and they were encouraged by the

Egyptians to make an effort for independence. There was always an Egyptian party at the court of Jerusalem, though at this time Egypt was suffering from internal dissensions. In the East the kingdom of Babylon, under Merodach-baladan, was also making trouble for the Assyrians. Hezekiah seems to have remained faithful to the suzerain for some years after his accession, but when, about the time of Sennacherib's accession (705 B.C.), a coalition was formed against the oppressor, he joined it. We may venture to suppose that about this time he received the embassy from Merodach-baladan (2 K 20^{12ff}, Is 39^{1ff}), which was intended to secure the co-operation of the Western States with Babylon in the effort then being made. Isaiah, as we know from his own discourses, was opposed to the Egyptian alliance, and apparently to the whole movement. The Philistines were for revolt; only Padi, king of Ekron, held out for his master the king of Assyria. For this reason Hezekiah invaded his territory and took him prisoner. If, as the Biblical account seems to intimate (2 K 18^{8}), he incorporated the conquered land in his own kingdom, the gain was not for a long time. In 701 B.C. Sennacherib appeared on the scene, and there was no possibility of serious resistance. The inscriptions tell us that the invaders captured forty-six walled towns, and carried 200,150 Judaeans into captivity. The Egyptian army made a show of coming to the help of its allies, but was met on the border and defeated. Hezekiah was compelled to release the captive Padi, who returned to his throne in triumph. Sennacherib was detained at Lachish by the stubborn resistance of that fortress, and sent a detachment of his troops to Jerusalem. With it went an embassy, the account of which can be read in 2 K 18, 19 and Is 36, 37. The laconic sentence, 'Hezekiah king of Judah sent to the king of Assyria at Lachish, saying, 'I have done wrong; withdraw from me; whatever you impose on me I will bear.'' ' (2 K 18^{14}) shows that abject submission was made. The price of peace was a heavy one—thirty talents of gold and three hundred talents of silver (according to the Biblical account) or eight hundred talents of silver (according to the Assyrian record). To pay it, all the gold and silver that could be found was gathered together, even the Temple doors being stripped of their precious metal (v.^{16}).

In our accounts we read of a great destruction which came upon the Assyrian army (2 K 19^{35}, Is 37^{36}). Some scholars believe this occurred at the time of a *second* expedition of Sennacherib to the west, but the evidence for such an expedition is obscure. Other scholars believe that, as a result of Hezekiah's surrender of Jerusalem and the consequent sparing of the city, the legend grew up of a supernatural deliverance of the city, promised and foretold by the prophet Isaiah. The latter is more probable. At any rate the evidence is abundantly clear that the 'deliverance' of Jerusalem in 701 B.C. was the result of Hezekiah's surrender. Hezekiah's sickness is dated by the Biblical writer in the time of this invasion, which can hardly be correct if the king lived fifteen years after that experience.

The account of Hezekiah's religious reforms is more sweeping than seems probable for that date. There seems no reason to doubt, however, that he destroyed the brazen serpent, which had been an object of worship in the Temple (2 K 18^{4}). The cleansing of the country sanctuaries from idolatry, under the influence of Isaiah, may have been accomplished at the same time. The expansions of the Chronicler (2 Ch 29 ff) must be received with reserve.

Sometime during his reign Hezekiah had a tunnel dug to bring water from the Virgin's Spring (Gihon) to the Pool of Siloam within the city (2 K 20^{20}, 2 Ch 32^{30}; see SILOAM). The purpose was to attempt to ensure a water supply for Jerusalem in case of a siege.

2. An ancestor of the prophet Zephaniah (Zeph 1^{1}), possibly to be identified with the king of the same name. **3.** Head of a family of exiles who returned, Ezr 2^{16} = Neh 7^{21} (cf 10^{17}). **4.** A companion of Ezra at the reading of the Law, 1 Es 9^{43} (RSV; AV **Ezecias**, RV **Ezekias**); called **Hilkiah** in Neh 8^{4}. **5.** 1 Ch 3^{23} (AV); see HIZKIAH.

H. P. S.—J. P. H.

HEZION.—Father of Tabrimmon, and grandfather of Benhadad, the Syrian king, 1 K 15^{18}. It has been plausibly suggested that Hezion is identical with **Rezon** (q.v.) of 1 K 11^{23}, the founder of the kingdom of Damascus, and an adversary to Solomon.

HEZIR.—1. The 17th of the priestly courses, 1 Ch 24^{15}. **2.** A lay family, which signed the covenant, Neh 10^{20}.

HEZRAI, 2 S 23^{35} (AV, RV).—See HEZRO.

HEZRO.—One of David's thirty heroes, 2 S 23^{35} (RSV; AV, RV **Hezrai**), 1 Ch 11^{37}.

HEZRON.—1. The eponymous head of a Reubenite family, Gn 46^{9}, Ex 6^{14}, Nu 26^{6}, 1 Ch 5^{3}. **2.** The eponymous head of a Judahite family, Gn 46^{12}, Nu 26^{21}, Ru 4^{18f}, 1 Ch $2^{5, 9, 18, 21, 24f}$ 4^{1}. This Hezron appears also in NT in the genealogy of our Lord, Mt 1^{3}, Lk 3^{33}. The gentilic **Hezronites** occurs in Nu 26^{6} referring to the descendants of **1,** and in v.^{21} referring to those of **2** above. **3.** A town in the south of Judah, Jos 15^{3}, where probably Hezron and Addar together constitute **Hazar-addar** (q.v.) of Nu 34^{4}.

HIDDAI.—One of David's thirty heroes, 2 S 23^{30}; called **Hurai** in the parallel 1 Ch 11^{32}.

HIDDEKEL.—The river Tigris, mentioned as the third river of Paradise, Gn 2^{14}. By this river Daniel had his vision, Dn 10^{4} (RSV here **Tigris,** but Hiddekel in Gn 2^{14}). The Hebrew *Ḥiddeḳel* was taken from the Babylonian name for the Tigris, *Idiglat* or *Diglat*, which was in turn derived from its Sumerian name, *Idigna*.

HIEL.—The name of a certain Bethelite who in the days of Ahab fortified Jericho, and possibly sacrificed his two sons to appease the gods of the disturbed earth, 1 K 16^{34}. Some obscure event is here applied as a comment on the curse on Jericho pronounced by Joshua.

HIERAPOLIS ('holy city') is mentioned in the Bible only in Col 4^{13}, in association with the neighbouring towns Laodicea and Colossae. All three were situated in the valley of the Lycus, a tributary of the Maeander, in Phrygia, Hierapolis on the north side being about 6 miles from the former and 12 miles from the latter. It derived its title from the medicinal hot springs there, which revealed plainly to the ancient mind the presence of a divinity. The water is strongly impregnated with alum, and the calcareous deposit which it forms explains the name of the adjacent village *Pambuk-Kalessi* (Cotton Castle). Another sacred place nearby is a grotto called the Plutonium, with an opening the size of a man's body, from which noxious vapours issued: any animal entering it fell dead. Strabo (in the time of Augustus) himself made the experiment with some sparrows. The city owed all its importance in NT times to its religious character. It had not been visited by St. Paul, but derived its Christianity from his influence (cf Ac 19^{10} and Col). Traditions of the early centuries declare that the Apostles Philip and John preached there. The former allegedly was martyred there. The city remained important throughout the Empire, and was the birthplace of Epictetus, the Stoic. The patron goddess of the city was Leto, mother of Apollo and Artemis.

A. So.—E. G. K.

HIEREEL, 1 Es 9^{21} (AV, RV).—See JEHIEL, **10.**

HIEREMOTH, 1 Es $9^{27, 30}$ (AV, RV).—See JEREMOTH, **6, 8.**

HIERIELUS, 1 Es 9^{27} (AV).—See JEHIEL, **9.**

HIERMAS, 1 Es 9^{26} (AV, RV).—See RAMIAH.

HIERONYMUS.—A Syrian officer in command of a district of Palestine under Antiochus v. Eupator, who harassed the Jews after the withdrawal of Lysias in 165 B.C. (2 Mac 12^{2}).

HIGGAION.—See PSALMS, **2.**

HIGH PLACE, SANCTUARY.—The term 'sanctuary' is used by modern students of Semitic religion in two senses, a wider and a narrower. On the one hand, it may

HIGH PLACE, SANCTUARY

denote, as the etymology suggests, any 'holy place,' the sacredness of which is derived from its association with the presence of a deity. In the narrower sense 'sanctuary' is used of every recognized place of worship, provided with an altar and other apparatus of the cult, the special designation of which in OT is *bâmāh*, EV '**high place.**' In this latter sense 'sanctuary' and 'high place' are used synonymously in the older prophetic literature, as in Am 7[9] 'the high places of Isaac shall be made desolate, and the sanctuaries of Israel shall be laid waste.'

1. In the wider sense of 'sanctuary,' as above defined, any arbitrarily chosen spot may become a holy place, if tradition associates it with a theophany, or visible manifestation of a Divine being. Such, indeed, was the origin of the most famous of the world's sanctuaries (see 2 S 24[16ff]). On the other hand, certain objects of nature—springs and rivers, trees, rocks, and, in particular, mountains—have been regarded with special reverence by many primitive peoples as 'the homes or haunts of the gods.' Thus the belief in the peculiar sacredness of **springs** and **wells** of 'living water' is one that has survived to our own day, even among advanced races. It was to this belief that the ancient sanctuary of Beersheba (q.v.) owed its origin. A similar belief in sacred **trees** as the abode of superhuman spirits or *numina* has been scarcely less tenacious. The holy places which figure so conspicuously in the stories of the patriarchs are in many cases tree-sanctuaries of immemorial antiquity, such as 'the terebinth of Moreh,' at Shechem, under which Abram is said to have built his first altar in Canaan (Gn 12[6f]; cf 13[18]).

More sympathetic to the modern mind is the choice of **mountains** and hills as holy places. On mountain-tops, men, from remote ages, have felt themselves nearer to the Divine beings with whom they sought to hold converse (cf Ps 121[1]). From OT the names of Horeb (or Sinai), the 'mountain of God' (Ex 3[1]), of Ebal and Gerizim, of Carmel and Tabor (Hos 5[1]), at once suggest themselves as sanctuaries where the Hebrews worshipped their God.

2. From these natural sanctuaries, which are by no means peculiar to the Hebrews or even to the Semitic family, we may now pass to a fuller discussion of the local sanctuaries or 'high places,' which were the recognized places of worship in Israel until near the close of the 7th cent. B.C. Whatever may be the precise etymological significance of the term *bâmāh* (plural *bâmôth*), there can be no doubt that 'high place' is a sufficiently accurate rendering. Repeatedly in OT the worshippers are said to 'go up' to, and to 'come down' from, the high places. The normal situation of a high place relative to the city whose sanctuary it was is very clearly brought out in the account of the meeting of Samuel and Saul at Ramah (1 S 9[13–25]). It is important, however, to note that a local sanctuary, even when it bore the name *bâmāh*, might be, and presumably often was, *within* the city, and was not necessarily situated on a height. Thus Jeremiah speaks of 'high places' (*bâmôth*) in the valley of Topheth at Jerusalem (7[31] 19[6] RV and RSV; cf Ezk 6[3]), and the high place, as we must call it, of the city of Gezer, lay in a depression between the two hills on which the city was built.

With few exceptions the high places of OT are much older, as places of worship, than the Hebrew conquest. Of this the Hebrews in later times were well aware, as is shown by the endeavour on the part of the popular tradition to claim their own patriarchs as the founders of the more famous sanctuaries. Prominent among these was the 'king's sanctuary' (Am 7[13] RV and RSV) at Bethel, with its companion sanctuary at Dan; scarcely less important were those of Gilgal and Beersheba, and 'the great high place' at Gibeon (1 K 3[4]). In the period of the Judges the chief sanctuary in Ephraim was that consecrated by the presence of the Ark at Shiloh (Jg 21[19], 1 S 1[3] etc.), which was succeeded by the sanctuary at Nob (1 S 21[1]). But while these and others attracted worshippers from near and far at the time of the great festivals, it may safely be assumed that every village throughout the land had, like Ramah, its local *bâmāh*.

The problem of the *bâmāh*, its function and place in the life of Israel, have occupied scholars for several generations without notable progress towards a solution until very recently. In an important paper, VTS, iv (1957), 242–258, W. F. Albright has brought together an accumulation of data which places the whole subject on a new footing. A summary of his views, with a few comments, follows. The essential meaning of *bâmāh*, 'high place,' has always been recognized, but a precise etymology has been lacking. Albright derives the Hebrew variants *bâmāh* and *bômāh* from an original **bahmatu* (related to *bᵉhēmāh* 'beast' from **bahimatu*) meaning, 'back, torso, ridge.' We have the same root in Ugaritic *bmt* 'back, torso (of an animal)'; and Akkadian *bāntu* (from *bāmtu*, from **bāmatu*) 'trunk, torso (of an animal),' plural *bamāti* 'ridges, heights.' From biblical and archaeological data, the meaning of Hebrew *bâmāh* can be further extended to include, 'height, hill, mound, a projecting mass of rock, and a stone burial cairn.'

In support of this interpretation, several passages in the OT are analysed, *e.g.* Is 53[9], where for the puzzling *bᵉmôthâw* of MT, 1QIs[a] reads *bômāthô* 'his burial cairn,' which is in parallel construction with *ḳibhrô* 'his grave.' Similarly in Ezk 43[7b] *pegher* (which here signifies the funerary stele rather than the corpse) is connected with *bômāh* (the burial place). The close association of the *maṣṣēbhāh*, 'burial monument or commemorative stele,' and the 'high place' is well known. However, the two need not be in physical proximity as the traditions concerning Absalom's death show (cf 2 S 18[17–18]). The burial cairn was located in the forests of Gilead, but the memorial stone had previously been erected by Absalom himself in the Valley of the Kings.

On the archaeological side, many new high places have been discovered and examined, in addition to those which were known in earlier years, *e.g.* Gezer, Sinai, Petra. Petrie's and Albright's explorations at *Serābîṭ el-Khâdim* in Sinai revealed three sets of funerary installations dating from the 4th–3rd millennium B.C. down to the 15th cent. B.C. The inscribed stelae in the vicinity of the sanctuary are characteristic of such installations. Similar constructions have been found in South Arabia and the Negeb. Mrs. R. Amiran has excavated a typical 'high place' near *Mālḥah* SW. of Jerusalem, dating from the period of the Judahite monarchy (7th cent.). Similar high places have been excavated at Megiddo by G. Loud (dating from the 3rd millennium to the 18th cent. B.C.) and at Nahariyah by M. Dothan (18th cent. B.C.). In both cases the burial cairns are in the vicinity of a sanctuary. Two recent explorations at Byblos and Hazor have turned up numerous funerary stelae located in the high place (cf M. Dunand, *Bulletin du Musee de Beyrouth*, i [1937], 102 ff, ii [1938], 113, and *Fouilles de Byblos*, ii [1954], Plates XXII–XXXII; Y. Yadin, *Hazor* I [1958], pp. 83 ff, and Plates XXVII–XXXI).

It appears that the cairn high place was brought in from the desert, and that its primary association was with funerary practice, whether the body was actually buried in the area, or only represented by an appropriate stele. The conclusion is that the high place in the Bible was primarily a mortuary shrine. It served, therefore, as the focal point of the cult of heroes, widespread in the ancient world (particularly in Hellenic and Hellenistic areas), and sporadically attested in the OT (*e.g.* with regard to Samuel, Elisha, and others). In addition to its funerary associations, the high place was the local centre for paganizing fertility rites under Canaanite influence. It was the latter which provoked the wrath of the prophets and ultimately resulted in the permanent destruction of the high places in the time of Josiah, though the upholders of Yahwism would have been equally aware of the dangers of the hero cult, which tended to elevate the departed to superhuman or semi-divine status.

In view of this analysis of the high place and its rôle in Israelite life, it is clear that a reconstruction of the history of biblical religion, other than that of the traditional Wellhausenists, is not only implied but required. Thus there was no essential conflict between the central sanctuary—which had existed from the days of Moses—and the local high places, with their sanctuaries, which served as sacred cemeteries or memorial groves. They catered to the religious concerns and needs of ordinary people in an area almost entirely ignored by Mosaic Yahwism, *e.g.* death and life after death. In time the cult of the dead might produce a series of semi-divine figures as the direct objects of popular veneration and supplication, and so offer a challenge to the austere monotheism of the prophetic tradition. The high place, at a later time, also supplied a form of worship, which was not merely ignored but rigidly repudiated by orthodox Yahwism: the Canaanite or Canaanizing fertility cult. Only then was the issue radically joined, and it spelled the ultimate doom of the high places. From the start the Tabernacle and then the Temple functioned as the central, national, sanctuary, though these local shrines served their lesser purposes. If the so-called Deuteronomic reform innovated at all, it was in adopting the prophetic denunciation of the high places as a definite programme for their eradication. With the suppression of the fertility rites went also the cult of the dead. But the problems with which the latter dealt remained as a legacy for post-Exilic Judaism; they were ultimately resolved in the renovation of the faith achieved by the Hasidim and their successors, which is reflected in the doctrines of resurrection and eternal life common both to Judaism and Christianity.

4. Combining the materials furnished by these recent discoveries with the OT data, we find that the first essential of a Hebrew high place was the **altar.** This might consist merely of a heap of earth or unhewn stones, as commanded by Ex 20^{25}; or, as shown by surviving examples (see ALTAR, 2), it might be hewn out of the solid rock and approached by steps. Against this more elaborate type the legislation of Ex 20^{25f} was intended as a protest. Equally indispensable to the proper equipment of a high place (cf Dt 12^{3}, Hos 10^{1} RV etc.) were the stone **pillars** or *maṣṣēbhôth,* the symbols of the deity (see PILLAR), and the wooden tree-stumps or **poles,** known as *'ᵃshērîm* (see ASHERAH). To these must be added a **laver** or other apparatus for the ceremonial ablutions of the worshippers. If the sanctuary possessed an image of the deity, such as the golden bulls at Dan and Bethel, or other sacred object—an ark, an ephod or the like—a building of some sort was required to shelter and protect it. Such was Micah's 'house of gods' (Jg 17^{5}), and the 'houses of high places' of 1 K 12^{31} (RV; cf RSV). The Ark was housed at Shiloh in a **temple** (1 S 1^{9} 3^{3}), and a similar building is presupposed at Nob ($21^{6,9}$). Every sanctuary of importance presumably had a **dining-hall** (9^{22}), where the worshippers joined in the sacrificial feast (cf 14^{ff}).

5. At these local sanctuaries, and at these alone, the early Hebrews worshipped Y″ their God. The new sanctuary established by David at the threshing-floor of Araunah, where afterwards the Temple of Solomon was erected, was at first but another added to the list of Hebrew high places. At these, from Dan to Beersheba, **sacrifices** were offered by individuals, by the family (1 S 1^{3}), and by the clan (20^{6}); there men ate and drank 'before the LORD' at the joyful sacrificial meal. Thither were brought the **tithes** and other thankofferings for the good gifts of God; thither men resorted to consult the priestly **oracle,** to inquire of the 'Lord' in cases of difficulty; and there justice was administered in the name of Y″. At the local sanctuary, when a campaign was impending, the soldiers were consecrated for 'the wars of Y″' (see WAR). There, too, the manslayer and certain others enjoyed the right of **asylum.** But there was a darker side to the picture. The feasts were not seldom accompanied by excess (Am 2^{8}, Is 28^{7}; cf 1 S 1^{13}), prostitution even was practised with religious sanction (Dt 23^{18}, 1 K 14^{24}).

6. 'The history of the high places is the history of the old religion of Israel' (Moore). As the Hebrews gradually became masters of Canaan, the high places at which Baal and Astarte had been worshipped in local forms became, as we have seen, the legitimate sanctuaries of Y″, in harmony with the universal experience of history as to the permanence of sacred sites through all the changes of race and religion. At these the most zealous champions of the religion of Y″ were content to worship. It was inevitable, however, that in the circumstances heathen elements should mingle with the purer ritual of Y″ worship. It is this contamination and **corruption of the cultus** at the local sanctuaries that the 8th-cent. prophets attack with such vehemence, not the high places themselves. In Hosea's day the higher aspects of the religion of Y″ were so completely lost sight of by the mass of the people, that this prophet could describe the religion of his contemporaries as unadulterated heathenism, and their worship as idolatry.

While this was the state of matters in the Northern Kingdom, the unique position which the sanctuary at Jerusalem had acquired in the south, and the comparative purity of the cultus as there practised, gradually led, under the Divine guidance, to the great thought that, as *Y″ Himself was one, the place of His worship should also be one,* and this place Jerusalem. The Book of Deuteronomy is the deposit of this epoch-making teaching (see especially 12^{4ff}). Whatever may have been the extent of Hezekiah's efforts in this direction, it was not until the eighteenth year of the reign of Josiah (622–621 B.C.) that effective measures were taken, under the immediate impulse of Deuteronomy, for the destruction of the high places and the suppression of the worship which for so many centuries had been offered at the local shrines (2 K 23^{5ff}). But the break with the ideas and customs of the past was too violent. With the early death of Josiah the local cults revived, and it needed the discipline of the Exile to secure the victory of the Deuteronomic demand for the centralization of the cultus.

7. To men inspired by the ideals of Deuteronomy we owe the compilation of the Books of Kings. For them, accordingly, the worship at the local sanctuaries became illegal from the date of the erection of Solomon's Temple —'The people were sacrificing at the high places, however, because no house had yet been built for the name of the Lord' (1 K 3^{2}). From this standpoint the editors of Kings pass judgment on the successive sovereigns, by whom 'the high places were not taken away' (1 K 15^{14}). This adverse judgment is now seen to be unhistorical and undeserved.

HIGH PRIEST.—See PRIESTS AND LEVITES.

HIGHWAY.—See ROADS AND TRAVEL.

HILEN.—See HOLON, **1.**

HILEZ.—See HOLON, **1.**

HILKIAH ('Y″ is my portion').—A favourite priestly name. **1.** Father of Eliakim, Hezekiah's chief of the household, 2 K 18^{18} etc., Is 22^{20ff} 36^{3} etc. **2.** A priest of Anathoth, probably of the line of Eli (see 1 K 2^{26f}), father of Jeremiah (Jer 1^{1}); he is not to be identified with the next. **3.** The high priest in 621 B.C., who 'found' during the repairs of the Temple and brought to Josiah's notice, through Shaphan, 'the book of the law' (2 K 22^{3-11}, 2 Ch 34^{8-19}), which occasioned the reformation of religion thereafter effected (2 K 23^{1-24}, 2 Ch $34^{29-35^{19}}$). Hilkiah headed the deputation sent to consult Huldah on this discovery (2 K 14^{-20}, 2 Ch 34^{22-28}); and presided over the subsequent purification of the Temple (2 K 23^{4ff}). He was a chief actor in the whole movement. There is no reason to doubt that his find was the genuine discovery of a lost law-book; this book was unmistakably the code of Deuteronomy (q.v.). According to 2 Ch 35^{8}, 1 Es 1^{8} (AV, RV **Helkias**) he subscribed handsomely to Josiah's Passover. He is

mentioned in Ezr 7^{1}, 1 Es 8^{1} (AV **Helchiah**, RV **Helkias**) as the great-grandfather of Ezra, and in Bar 1^{7} (AV **Chelcias**, RV **Helkias**) as the father of Jehoiakim, who was high priest in the reign of Zedekiah. **4.** Father of the Gemariah of Jer 29^{3}. **5, 6.** Levites of the clan of Merari, 1 Ch 6^{45} 26^{11}. **7.** A 'chief of the priests' returning with Zerubbabel, Neh $12^{7, 21}$. **8.** A companion of Ezra at the public reading of the Law, Neh 8^{4}; called **Hezekiah** in 1 Es 9^{43} (AV **Ezecias**, RV **Ezekias**). **9.** A distant ancestor of Baruch, Bar 1^{1} (AV **Chelcias**, RV **Helkias**). **10.** The father of Susanna, Sus $^{2, 29}$ (AV **Chelcias**, RV **Helkias**). G. G. F.

HILL, HILL COUNTRY.—These terms in RV represent Hebrew *gibh'āh*, *har*, and Greek names for either an isolated eminence, or a table-land, or a mountain-range, or a mountainous district. *Gibh'āh* denotes properly 'the large rounded hills, mostly bare or nearly so, so conspicuous in parts of Palestine, especially in Judah.' Cf 'Gibeah of Saul,' 'of Phinehas,' 'of the foreskins,' 'of Moreh,' 'of Hachilah,' 'of Ammah,' 'of Gareb,' and 'of Elohim.' *har* is to *gibh'āh* as the genus is to the species, and includes not merely a single mound, but also a large range or a district. It is usually applied to Zion. It is especially the description of the central mountainous tract of Palestine reaching from the plain of Jezreel on the N. to the Negeb or dry country in the S.; the Shephelah or lowlands of the SW.; the *midhbār* or moorland, and the *'ărābhāh* or steppes of the SE. The best-known *har-* or hill-country in Palestine is the 'hill-country of Ephraim,' but besides this we hear of the 'hill-country of Judah' (*e.g.* in Jos 11^{21}), the 'hill-country of Naphtali' (20^{7}), the 'hill-country of Ammon' (Dt 2^{37}), and of Gilead (3^{12}). Among the eminences of Palestine as distinct from hill districts are Zion, the hill of Samaria, the triple-peaked Hermon, Tabor, and Carmel.

HILLEL.—Father of Abdon, Jg $12^{13, 15}$.

HIN.—See WEIGHTS AND MEASURES.

HIND.—See HART.

HINGE.—See HOUSE, **6.**

HINNOM, VALLEY OF (called also 'valley of the son [Jer 7^{32}] *or* children [2 K 23^{10}] of Hinnom,' and 'the valley' [2 Ch 26^{9}, Neh $2^{13, 15}$ 3^{13} in referring to the 'Valley Gate,' and perhaps Jer 2^{23}]).—It was close to the walls of Jerusalem 'at the entry of the Potsherd Gate' (Jer 19^{2} RSV, translated 'east gate' AV, and 'gate Harsith' RV, Hebrew *sha'ar haḥarsôth*). The location of the Potsherd Gate is unknown; the Targum calls it 'Dung Gate.' Jeremiah's name for it may have come from the fact that it opened toward the Valley of Hinnom where the potters' workshops were doubtless surrounded with broken pieces of pottery (Jer 18^{1}). Another name for it may have been the Valley Gate which opened into the Valley of Hinnom. This valley formed part of the boundary between Judah and Benjamin (Jos 15^{8} 18^{16}). The place acquired an evil reputation on account of the idolatrous practices carried on there (2 K 23^{10}, 2 Ch 28^{3} 33^{6}), and on this account Jeremiah (7^{32} 19^{6}) announced that it was to receive the name 'valley of Slaughter.' Here perpetual fires are said to have been kept burning to consume the rubbish of the city. Such associations with the Valley led afterwards to *Ge-hinnom* (NT *Gehenna*) becoming the type of hell.

The situation of the Valley of Hinnom has been much disputed. Of the three valleys of Jerusalem—the Kidron on the E., the Tyropoeon in the centre, and the *Wâdī er-Rabâbi* on the W.—each has in turn been identified with it. In favour of the Kidron is the fact that the theological *Gehinnom* or Arabic *Jahannum* of Jewish, Christian, and early Moslem writers is located here; but this was probably a transference of name after the old geographical site was lost, for there are strong reasons (see below) against it. As the Tyropoeon was incorporated within the city walls before the days of Manasseh, it is practically impossible that it could have been the scene of the sacrifice of children, which must have been outside the city bounds (2 K 23^{10} etc.). The chief data are found in Jos 15^{8} 18^{16}, where the boundary of Judah and Benjamin is described. If *Bîr Ayyûb* is En-rogel, as certainly is most probable, then the *Wâdī er-Rabâbi*, known traditionally as Hinnom, is correctly so designated. Then this Valley of Hinnom is a *gai* or gorge, but the Valley of Kidron is always described as a *naḥal* ('wady'). It is, of course, possible that the Valley of Hinnom may have included part of the open land formed by the junction of the three valleys below Siloam; and **Topheth** may have lain there, as is suggested by some authorities, but there is no necessity to extend the name beyond the limits of the actual gorge. The *Wâdī er-Rabâbi* commences as a shallow open valley due W. of the modern Jaffa Gate; near this gate it turns due S. for about half a mile, and then gradually curves to the E. It is this lower part, with its bare rocky scarps, that presents the characteristics of a *gai* or gorge. Near the junction of the valley with the Kidron is the traditional site of Akeldama (q.v.). For further details concerning the location of Hinnom, see J. Simons, *Jerusalem in the Old Testament* (1952), pp. 10 ff, 52.

E. W. G. M.—W. L. R.

HIPPOPOTAMUS.—See BEHEMOTH.

HIRAH.—The Adullamite with whom Judah, according to the story of Gn 38^{1}, appears to have entered into a kind of partnership in the matter of flocks. After Tamar had successfully carried out her stratagem, it was by the hand of his 'friend' Hirah that Judah sent the promised kid to the supposed *ḳᵉdhēshāh*, Gn 38^{20ff}.

HIRAM.—1. King of Tyre, son and successor of Abibaal who reigned, according to the Tyrian annals cited by Menander of Ephesus, 969–936 B.C. When David was firmly established on his throne, Hiram sent messengers to him, and, in order to show his goodwill, gave David materials for building his palace, sending at the same time workmen to assist in the building (2 S 5^{11}, 1 Ch 14^{1}). This first mention of Hiram is somewhat abrupt, and leads to the supposition that there must have been some earlier intercourse between him and David, the details of which have not come down to us. A real friendship, however, undoubtedly existed between the two (1 K 5^{1}), and this was extended to Solomon after the death of David. A regular alliance was made when Solomon came to the throne, Hiram supplying men and materials for the building of the house of the Lord, while Solomon, in return, sent corn and oil to Hiram. Another sign of friendliness was their joint enterprise in sending ships to Ophir to procure gold (1 K 9^{26-28} 10^{11}, 2 Ch 8^{17f} $9^{10, 21}$). A curious episode is recounted in 1 K $9^{10, 14}$, according to which Solomon gave Hiram 'twenty cities in the land of Galilee.' Hiram was dissatisfied with the gift, though he gave Solomon 'one hundred and twenty talents of gold.' In the parallel account (2 Ch 8^{1f}) it is Hiram who gives cities (the number is not specified) to Solomon.

There is altogether considerable confusion in the Biblical references to Hiram, as a study of the passages in question shows. When these are compared with extra-Biblical information which we possess in the writings of early historians, discrepancies are emphasized. While, therefore, the friendly intercourse between Hiram and Solomon (as well as with David) is unquestionably historical, it is not always possible to say the same of the details.

2. The name of an artificer from Tyre 'full of wisdom, understanding, and skill, for making any work in bronze' (see 1 K 7^{13-47}); he is also spoken of as 'trained to work in gold, silver, bronze, iron, stone, and wood, and in purple, blue, and crimson fabrics and fine linen . . .' (2 Ch 2^{14}). There is a discrepancy regarding his parentage: in 1 K 7^{14} he is said to have been the son of a widow of the tribe of Naphtali, and his father a man of Tyre; according to 2 Ch 2^{14} his mother belonged to the tribe of Dan, though here, too, his father was a Tyrian.

The form of the name is usually *Hiram* in the Books

of Samuel and Kings, but the Chronicler mostly uses the form **Huram,** while we find also **Hirom** in the Hebrew (see RVm) in 1 K $5^{10, 18}$ 7^{40} (EV **Hiram**).

W. O. E. O.—W. D. McH.

HIRE, HIRELING.—The former is used in EV alongside of its synonym 'wages,' by which it has been supplanted in modern English as in Gn 31^{8} (cf $30^{18, 32f}$ with 29^{15} 30^{28} etc.). A **hireling** is a person 'hired' to work for a stipulated wage, such as field-labourer (Mal 3^{5}), shepherd (Jn 10^{12f}), or mercenary soldier (Is 16^{14}, cf Jer 46^{21}). No imputation of unfaithfulness or dishonesty is necessarily conveyed by the term, although these ideas have now become associated with it owing to our Lord's application of the word to an unfaithful shepherd in Jn 10^{12f}.

A. R. S. K.

HIROM.—See HIRAM.

HITTITES.—The Hittites appear in OT (1) as an important nation which gave its name to the whole Syrian region, 'from the wilderness and this Lebanon as far as the great river, the river Euphrates, all the land of the Hittites to the Great Sea [Mediterranean] toward the going down of the sun' (Jos 1^{4}); (2) as one of the ethnic groups living in Canaan from patriarchal times until after the Israelite settlement (Gn 15^{20}, Dt 7^{1}, Jg 3^{5}), sometimes called 'the children of Heth' after Heth, their eponymous ancestor, a son of Canaan (Gn 10^{15}).

1. The Hittite Empire was established *c* 1800 B.C. by an Indo-European people that settled in Asia Minor in city-states *c* 2000 B.C. The name 'Hittite' was transferred to them from the *Ḫatti*, the earlier inhabitants of those regions, nowadays sometimes distinguished as the 'Proto-Hittites.' As the Hittite Empire increased, the term 'Hittites' was extended to the lands over which it extended and the peoples which it dominated. One of the earlier Hittite kings, Tudhaliyas I. (*c* 1720 B.C.) has been identified with Tidal king of Goiim (Gn 14^{1}). About 1600 B.C. Hattusilis I. extended his empire southward into N. Syria. His successor Mursilis I. moved the imperial capital to Hattusas (modern *Boghaz-köy*), east of the Halys. (The archives unearthed here since 1906 have contributed greatly to our knowledge of Hittite history and culture.) Mursilis I. captured Aleppo and later made a raid on Babylon (*c* 1560 B.C.) which precipitated the fall of the First Babylonian Dynasty.

The great age of the Hittite Empire dawned under Suppiluliumas I. (*c* 1380–1350 B.C.). It was in his realm, in the Anatolian territory of Kizzuwatna, that iron was first smelted on a significant scale in the Near East. After consolidating his power in Asia Minor, Suppiluliumas established his supremacy over Mitanni in Upper Mesopotamia and over Syria so far south as the Lebanon. This brought the Hittites into collision with the Egyptian Empire in Asia, and desultory hostilities continued between the two powers until the indecisive battle of Kadesh on the Orontes (1286 B.C.), which was followed seventeen years later by a non-aggression pact between Hattusilis III. and Rameses II., recognizing the common frontier of their two empires on the Orontes.

Around 1200 B.C. the Hittite Empire fell before attacks by enemies from the west. The Hittite power in Asia Minor disappeared, the twenty-four city-states of the Tabali thenceforth becoming heirs to the Hittite home territory on the Anatolian side of the Taurus range. But seven city-states in Syria which had belonged to the Hittite Empire survived for several centuries, and their rulers were called 'the kings of the Hittites.' Outstanding among these states were Hamath on the Orontes and Carchemish on the Euphrates. Hamath entered into close relationship with David (2 S 8^{9ff}), whose kingdom bordered on 'Kadesh in the land of the Hittites' (2 S 24^{6}, so RSV for the meaningless MT *Taḥtim-ḥodhshi*). Solomon traded and intermarried with these 'kings of the Hittites' (1 K 10^{28f} 11^{1}); their military power in the 9th cent. B.C. was sufficient to strike terror into a Damascene army (2 K 7^{6}). But these seven states were reduced one by one by the Assyrians in the 8th cent.; Hamath fell in 720 B.C. and Carchemish three years later (cf 2 K 18^{34} 19^{13}, Is 10^{9} etc.). The whole of Syria is called 'the land of the *Ḫatti*' in Assyrian records of this period; Sargon II. in 711 B.C. even refers to the people of Ashdod as 'the faithless *Ḫatti*.' In the Chaldaean chronicles Nebuchadrezzar similarly speaks of Palestine as 'the land of the *Ḫatti*.'

2. The Hittites of Canaan in patriarchal times present an unsolved problem. They appear as inhabiting the central ridge of Judah, particularly the Hebron district. In Gn 23 they are the native population of Hebron ('the people of the land') among whom Abraham lives as 'a stranger and a sojourner.' Esau grieved his parents by marrying two 'daughters of Heth . . . daughters of the land'—apparently in the Beersheba district (Gn 26^{34f} 27^{46}). Jerusalem, according to Ezk $16^{3, 45}$, had a mixed Hittite and Amorite foundation. The name of Araunah the Jebusite (2 S 24^{16ff}) has been connected with Hittite *arawanis* ('freeman,' 'noble'), and Uriah the Hittite (evidently a man of Jerusalem) was one of David's mighty men (2 S 23^{39}).

But the Hittite Empire never extended so far south as Judah. Sir Leonard Woolley has suggested that these Hittites were survivors of a wave of *Khirbet Kerak* people who left the southern Caucasus in the latter part of the 4th millennium B.C. and settled east of the Gulf of Alexandretta; the original producers of the *Khirbet Kerak* pottery being the ancestors both of the Anatolian Hittites and of the Canaanite Hittites. Another view is that the Canaanite Hittites were really Hurrians. More probably they were early migrants from some part of the Hittite Empire. The record of Abraham's purchase of the cave of Machpelah at Hebron from Ephron the Hittite is said to be 'permeated with intricate subtleties of Hittite laws and customs, correctly corresponding to the time of Abraham' (M. R. Lehmann).

3. The Hittite laws were codified by King Telepinus (*c* 1480 B.C.). There are some striking resemblances between the Hittite laws and the OT law-codes, although these resemblances appear more in matters of detail and arrangement than in general outlook. Whereas the OT codes, like other ancient law-codes of Western Asia known to us, exhibit the *lex talionis* as a basic principle, the Hittite code is dominated rather by the characteristically Indo-European concept of compensation (*Wergeld*).

4. The Hittite texts of the imperial age before 1200 B.C. are written in cuneiform; the language was first identified as Indo-European by B. Hrozný in 1917. The language of the later Hittite states, showing dialect differences from the earlier imperial language, is known from hieroglyphic texts, which have been deciphered more recently, notably by I. J. Gelb. Their decipherment was already far advanced when it was greatly facilitated by the discovery at Karatepe in Cilicia (1946–1947) of bilingual inscriptions in hieroglyphic Hittite and Phoenician.

F. F. B.

HIVITES.—One of the peoples of Canaan which the Hebrews displaced (Ex $3^{8, 17}$ 23^{23} 33^{2} etc.). Their original *habitat* seems to have been the plain between the Liṭânî and Ḥaṣbânî rivers in the Lebanon (Jos 11^{3}, Jg 3^{3}, see Maisler, *Untersuchungen zur alten Geschichte und Ethnographie Syriens und Palästinas*, i, 1930, p. 75). Many have read with Wellhausen Hittites for Hivites in these passages, but this suggestion has found no general acceptance. The Hivites were, furthermore, located in the hill country N. of Jerusalem. The cities Gibeon, Chephirah, Beeroth, Kiriath-jearim, and Shechem are said to have been inhabited by Hivites (Jos 9^{17}, Gn 34^{2}). Fearing to meet the Israelites in battle, they made a covenant with them by a ruse (Jos 9^{3-15}), and were later subjected to semi-servitude by the Israelites (Jos 9^{27}). Many have identified these Palestinian Hivites with the Hurrians, since the LXX suggests this identification by reading 'Choraios' in Gn 34^{2} and Jos 9^{7}. R. de Vaux agrees with this view, the more so, since they were uncircumcised (Gn $34^{2, 14}$), hence were no Semites (*RB*, lv [1948], 325). However, nothing certain is known either of their racial affinities or of the etymology of their name.

S. H. Hn.

HIZKI.—A Benjamite, 1 Ch 8^{17}.

HIZKIAH.—A son of Neariah, a descendant of David, 1 Ch 3^{23} (AV **Hezekiah**).

HOBAB.—In E (Ex 3^{1} 4^{18} 18^{1ff}) the father-in-law of Moses is uniformly named **Jethro.** But Nu 10^{29} (J) speaks of 'Hobab the son of **Reuel** the Midianite Moses' father-in-law' (*ḥōthēn*). It is uncertain how this should be punctuated, and whether Hobab or Reuel was Moses' father-in-law. The former view is found in Jg 4^{11} (cf 1^{16}), the latter in Ex 2^{18}. The RV in Jg 1^{16} 4^{11} attempts to harmonize the two by rendering *ḥōthēn* 'brother-in-law.' But this harmonization is doubtful, for (1) though it is true that in Aramaic and Arabic the cognate word can be used rather loosely to describe a wife's relations, there is no evidence that it is ever so used in Hebrew; and it would be strange to find the father and the brother of the same man's wife described by the same term; (2) Ex 2^{16} appears to imply that the priest of Midian had no sons. It is probable that the name Reuel was added in v.^{18} by one who misunderstood Nu 10^{29}. The suggestion that 'Hobab the son of' has accidentally dropped out before Reuel is very improbable. Thus Jethro (E) and Hobab (J) are the names of Moses' father-in-law, and Reuel is Hobab's father. A Mohammedan tradition identifies Sho'aib (perhaps a corruption of Hobab), a prophet sent to the Midianites, with Moses' father-in-law. On his nationality, and the events connected with him, see KENITES, MIDIAN, JETHRO.

A. H. McN.

HOBAH.—The place to which, according to Gn 15^{15}, Abraham pursued the defeated army of Chedorlaomer. It is described as 'on the left hand (*i.e.* 'to the north') of Damascus.' The site cannot be identified with security.

HOBAIAH.—See HABAIAH.

HOCK.—The hock (older spelling 'hough' in AV, RV) of a quadruped is the joint between the knee and the fetlock in the hind leg; in man the back of the knee joint, called the ham. To 'hock' is to cut the tendon of the hock, to hamstring. The substantive occurs in 2 Es 15^{36} 'the camel's hock' (AVm 'pastern *or* litter'). The verb is found in AV and RV (always replaced by 'hamstring' in RSV) in Jos 11^{8f}, 2 S 8^{4}, 1 Ch 18^{4} of hocking horses. Tyndale translates Gn 49^{6} 'in their selfe-will they houghed an oxe,' which is retained in AVm; and inserted into the text of RV (cf RSV) in place of AV 'they digged down a wall.'

HOD ('majesty').—An Asherite, 1 Ch 7^{37}.

HODAVIAH ('Y" is majesty').—**1.** A Manassite clan, 1 Ch 5^{24}. **2.** The name of a Benjamite family, 1 Ch 9^{7}. **3.** A Levite, Ezr 2^{40}; called **Hodevah** in Neh 7^{43}; see JODA, **1.** **4.** A descendant of David, 1 Ch 3^{24}.

HODESH ('new moon').—One of the wives of Shaharaim, a Benjamite, 1 Ch 8^{9}.

HODEVAH ('Y" is majesty').—See HODAVIAH, **3,** and JODA, **1.**

HODIAH.—**1.** A man of Judah, 1 Ch 4^{19}. AV wrongly takes it as a woman's name. **2.** A Levite in the time of Ezra, Neh 8^{7} 9^{5} (AV **Hodijah**); cf 1 Es 9^{48}, where AV, RV have **Auteas**), who sealed the covenant, Neh 10^{10} (AV **Hodijah**). **3.** Another Levite who signed the covenant, Neh 10^{13} (AV **Hodijah**). **4.** A leader of the people who signed the covenant, Neh 10^{18} (AV **Hodijah**).

HODIJAH.—The AV spelling of **Hodiah** (q.v.) in Neh 8^{7} 9^{5} $10^{10, 13, 18}$.

HOE.—See MATTOCK.

HOGLAH ('partridge').—Daughter of Zelophehad, Nu 26^{33} 27^{1} 36^{11}, Jos 17^{3}.

HOHAM, king of Hebron, formed an alliance with other four kings against Gibeon, but was defeated by Joshua at Beth-horon, and put to death along with his allies at Makkedah, Jos 10^{3ff}.

HOLD.—See CITADEL.

HOLINESS.—I. IN OT.—The Hebrew words connected with the Semitic root *ḳdsh* (those connected with the root *ḥrm* may be left out of the inquiry: cf article BAN), namely, *ḳōdhesh* 'holiness,' *ḳādhôsh* 'holy,' *ḳiddēsh*, etc., 'sanctify,' the derived noun *miḳdāsh* 'sanctuary,' *ḳādhēsh, ḳᵉdhēshāh* 'whore,' 'harlot'—occur in about 830 passages in OT, about 350 of which are in the Pentateuch. The Aramaic *ḳaddîsh* 'holy' is met with thirteen times in the Book of Daniel. *ḳādhēsh* and *ḳᵉdhēshāh* have almost exclusively heathen associations, *ḳaddîsh* is used in a few passages of the gods, but otherwise the Biblical words from this root refer exclusively to Yahweh, and persons or things connected with Him. The primary meaning is debated, some making it to be that of 'separation' or 'cutting off,' others connecting with *ḥādhāsh* 'new,' and the east Semitic *quddushu* 'pure,' 'bright.' The term *quddushu* has also been held to refer originally to 'that which pertains to the gods.' On this view, the notion of 'separation' would be supported also by the east Semitic root. In actual use 'holiness' in OT is always a religious term, being, when applied to deity, almost equivalent to 'divine,' and meaning, when used of persons or things, 'set apart from common use to the divine purpose.' The positive connotations of such 'set-apartness' are more important than the negative ones; in OT, it is the use of holy persons and things in the purpose of Yahweh upon which stress is laid.

1. Holiness of God.—'I am God and not man, the Holy One in your midst . . .' This passage from the prophet Hosea (11^{9}) contains the best summary of the meaning of the holiness of God to be found in OT. On the one hand, it lays stress upon the 'otherness' of God: His majesty and incomparability with any created thing. On the other hand, it affirms the nearness of God to man: His involvement in the affairs of His people, His persistent love and graciousness which will not be put off by human rebellion and apostasy. Holiness is a term for power. In 'primitive' religions, such power may be manifested in a variety of ways: through natural objects, through the phenomena of storm, the movement of the heavenly bodies, the processes of fertility, etc. In more 'advanced' religions, a vast pantheon may be conceived to be the agents of holy power. These manifestations of power are without specific moral content, yet in course of time the conduct of man is inseparably related to his understanding of how he is to deal with the Holy, with that revelation of power in his midst the reality of which is indubitable. For Israel, Yahweh was the God who had taken possession of holiness—of all effective powers within the universe. He had done so, not to reserve such power to Himself, although His glory (Heb. *kābhōdh*) consists in His sovereign and holy power, but rather to bring life and blessing to mankind through His people Israel (Gn 12^{1-3} etc.). Thus the notion of 'separation' inherent in the term 'holiness' means, in reference to Yahweh, His set-apartness over against all other beings—divine, human, or demonic—for the sake of being Himself and of accomplishing His determined purpose among men. He is the 'Holy One of Israel' (Is 1^{4} $5^{19, 24}$ etc.), 'Yahweh of Hosts,' who uses the host of heaven for His purposes (Jg 5^{20}). His holiness is equivalent to His very selfhood: when Yahweh swears by His holiness he swears by Himself (Am 4^{2} 6^{8}). The distinctive mark of the holiness of God in OT is its close connexion with the righteous purposes of Yahweh. The God who appears to Moses and commands him to lead the slaves from Egypt is one who has 'seen their afflictions' and 'heard their cry' (Ex 3^{7}); this awe-inspiring deity of the burning bush is, from the first, concerned with righteousness. The 'Holy God shows Himself holy in righteousness' (Is 5^{16}). Both the majesty of Yahweh and His righteousness are depicted in the Temple vision of Isaiah (ch. 6). The chant of the seraphim tells that 'the fulness of the whole earth is His glory,' and the prophet's response to the vision shows how the glory and the righteousness of Yahweh cohere: 'Woe is

me! For I am lost; for I am a man of unclean lips, and I dwell in the midst of a people of unclean lips. . . .'

2. Holiness of Israel.—The holiness of Yahweh is to find reflection in the holiness of His people: 'You shall be holy, for I Yahweh your God am holy' (Lv 19^{2}). Israel is created to be a 'kingdom of priests and a holy nation' (Ex 19^{6}). Israel's holiness consisted fundamentally in her having been set apart to the specific purposes of Yahweh in the world. She was to be His people and He would be her God (Hos 2^{23}, Ezk 37^{27}). Israel's entire life was to be regulated by Yahweh's saving purpose in her midst. The requirements of the covenant law, the cultic regulations and the whole body of social and ethical legislation of the Pentateuch were designed to enable Israel to be God's holy people, showing forth His glory to the ends of the earth. It is not surprising, therefore, that ethical and ceremonial elements are intermingled in the so-called *Law of Holiness* (H, contained chiefly in Lv 17–26), a collection which, though completed about the time of Ezekiel, contains very ancient materials. The holiness which Yahweh requires and which reflects His own holiness includes not only honesty (Lv $19^{11, 36}$), truthfulness (v.^{11}), respect for parents (v.^{3}, 20^{9}), fair dealing with servants (19^{13}), kindness to strangers (v.^{34}), the weak and helpless (vv.$^{14, 32}$), and the poor (v.^{9f}), social purity ($20^{11ff, 18ff}$), and love of neighbours (19^{18}), but also abstinence from blood as an article of food (17^{10ff} 19^{26}), from mixtures of animals, seeds, and stuffs (19^{19}), and from the fruit of newly planted trees for the first four years (v.^{23ff}); and, for priests, compliance with special rules about mourning and marriage (21^{1-15}). The concern for the holiness of Israel expressed in this portion of the priestly tradition is the maintenance of the set-apartness of Yahweh's people to His purpose in the world. The people of the covenant must be discernible as Yahweh's people. While it is true that priestly concerns might well have overstressed the external aspects of holiness, it would be wrong sharply to contrast the priestly emphasis upon externals with the prophetic emphasis upon ethical considerations. A faith which is to find expression in the total life of a people must perforce have its ceremonial and ritual aspects.

3. Holy things.—For the same reason, objects set apart to the purpose of Yahweh are also holy. The land of the Promise is holy (Zec 2^{12}), the Temple was holy (Ps 11^{4} etc.), and the city of the Temple (Is 52^{1}, Neh 11^{1}). Every part of the Temple (or Tabernacle) was holy, and all its utensils and appurtenances (1 K 8^{4}); the altars of incense and burnt-offering (Ex 30^{27f}), the flesh of a sacrifice (Hag 2^{12}), the incense (Ex 30^{36}), the table (Ex 30^{27}), the show-bread (1 S 21^{6}), the candlestick (Ex 30^{27}), the Ark (v.^{26}, 2 Ch 35^{3}), and the anointing oil (Ex 30^{25}). Occasional references indicate that such holiness was an abiding characteristic of these objects (2 S 6^{6f}), but the basic Israelite understanding of holiness is not reflected in such popular notions. The contagion of uncleanness is not matched by a similar contagion of holiness (Hag 2^{12-14}). Holy objects are holy solely in virtue of their having been designated to the specific purposes of Yahweh. He, the 'Holy One of Israel,' determines what is holy and what is common or unclean. See BAN, UNCLEANNESS.

II. IN NT.—The word 'holiness' in RSV stands for *hosiotēs* (Lk 1^{75}, Eph 4^{24}), *hagiotēs* (2 Co 1^{12}, He 12^{10}), *hagiōsynē* (Ro 1^{4}, 2 Co 7^{1}, 1 Th 3^{13}), *hagiasmos* (1 Th $4^{4, 7}$, 1 Ti 2^{15}, He 12^{14}, but in the other five passages in which the word occurs we find 'sanctification'). The idea of holiness, however, is conveyed mainly by the adjective *hagios*, 'holy' (about 230 times), and the verb *hagiazō* (twenty-seven times, in fifteen of which it is rendered in RSV 'sanctify'), also by *hosios* (Ac 2^{27} 13^{34f}, 1 Ti 2^{8}, Tit 1^{8}, He 7^{26}, Rev 15^{4} 16^{5}) and *hieros* (1 Co 9^{13} RSV 'those who are employed in the temple service'; 2 Ti 3^{15} RSV 'sacred'). Of these words by far the most important is the group which has *hagios* for its centre, and which is the real equivalent of *ḳōdhesh*, *ḳādhōsh*, etc., *hieros* referring rather to external holiness and *hosios* (in reference to man) to reverence, piety. In OT quotations or allusions, *ho hosios* is the equivalent of *ḳᵉdhōsh Yiśrā'ēl* 'the Holy One of Israel' which NT authors take to refer to Christ (Ac 2^{27} 13^{35}) or to God (Rev 16^{5}). *Hagios*, freely used in LXX, is quite rare in classical Greek apart from certain cultic texts. The term is widely used in the mystery religions but is seldom found in common Greek (apart from Christian texts). In NT it refers only occasionally to ceremonial or cultic purity (cf 1 Co 7^{14}, 2 P 1^{18}) except in quotations from OT or references to Jewish ritual (He $9^{2f, 8, 24}$ 10^{19}) and in current Jewish expressions, *e.g.* 'the holy city,' Mt 4^{5} etc. Otherwise it designates the new quality of life conferred by God's work of redemption in Christ and to the ethical and religious demands which issue from God's redemption.

Three uses demand special notice. (1) The term 'holy' is seldom applied directly to God (Lk 1^{49}, Jn 17^{11}, 1 P 1^{15f}, Rev 4^{8} 6^{10}), but is very often used of the Spirit of God ('the Holy Spirit' ninety-one times, fifty-four of which are in the writings of Luke: cf article HOLY SPIRIT). (2) The epithet is used in ten passages of Christ ('the Holy One of God,' Mk 1^{24}, Lk 4^{34}, Jn 6^{69}; also Lk 1^{35}, Ac 3^{14} $4^{27, 30}$, He 7^{26}, 1 Jn 2^{20}, Rev 3^{7}). (3) It is very often used of Christians. They are called 'saints' or 'holy ones' (*hagioi*) sixty times, thirty-nine in the Pauline Epistles. The expression is no doubt of OT origin, and means 'set apart to the service and praise of God,' made holy by the saving work of God in Christ Jesus and summoned to live in righteousness and purity of life (cf 1 Co 1^{2} 'sanctified in Christ Jesus, called to be saints'). In this use the ethical element is generally in the foreground. So we find *hagios* associated with *amōmos*, 'blameless' or 'without blemish,' RSV Eph 1^{4} 5^{27}, Col 1^{22}; and with *dikaios*, 'righteous,' Mk 6^{20} RSV Ac 3^{14}. The three words *hagiotēs*, *hagiosynē*, and *hagiasmos* designate respectively the quality of holiness, the state of holiness, and the process or result. For the sphere and source of holiness, see SANCTIFICATION.

HOLM TREE.—See CYPRESS, 2.

HOLOFERNES.—According to the Book of Judith, Holofernes was the general entrusted by Nebuchadnezzar, 'king of Nineveh,' with the task of wreaking vengeance on 'the whole region' of the West (2^{1}); in 2^{4} he is described as 'lord of the whole earth.' Before his vast army, nation after nation submitted and acknowledged Nebuchadnezzar as a god. The Jews alone would not yield; and Holofernes accordingly blockaded their city of Bethulia. For the subsequent story and the death of Holofernes at the hands of Judith, see article JUDITH.

Holofernes has been variously identified with Ashurbanipal, Cambyses, Orophernes of Cappadocia (a friend of Demetrius Soter, the enemy of the Jews), Nicanor (the Syrian general conquered by Judas Maccabaeus), Scaurus (Pompey's lieutenant in Syria), and Severus (Hadrian's general). But the date and theme of the book point toward an early 2nd-cent. identification.

HOLON.—1. A Levitical city of Judah in the Hebron hills, Jos 15^{51} 21^{15}. In the parallel passage, 1 Ch 6^{58}, it is called **Hilen** (so some Hebrew MSS; others **Hilez**). It is perhaps modern *Khirbet 'Alîn*. **2.** A city of Moab, near Heshbon, Jer 28^{41}. The site is unknown.

HOLY OF HOLIES, HOLY PLACE.—See TABERNACLE and TEMPLE.

HOLY ONE OF ISRAEL.—A title of God that occurs more than thirty times in the OT, though obviously the concept is far more frequent and in its origins reaches back into primitive thinking where it is quite devoid of the notion of exalted righteousness, which it conveys for us. The use of the title seems to have originated with the prophet Isaiah, with whom it became so characteristic that the unconvinced populace made sport of it and him. He quotes them as saying, if one may paraphrase, 'Let

your " Holy One of Israel " hurry up those plans of his ; we want to see them ' (5^{19}), and ' Away with your " Holy One of Israel " ' (30^{11}). The title aptly expresses the religious faith and vision that were basic in his entire ministry. For him God is supremely transcendent in righteousness and might ; it is not too much to say that the whole subsequent course of Israel's faith bears the imprint of his faith. And true to our deepest insights, it was attained through profound stress and need. When a period of tranquil security was ending, he saw the LORD, thrice holy, enthroned on high (6^{1ff}) ; as his people's fortunes steadily went from bad to worse under the encroachments of the invincible Assyrians, the more clear and insistent became his emphasis on faith in God as the one solution of the crisis (10$^{5-15}$; cf 28^{16} 30^{15} 31^{1}).

HOLY SEPULCHRE.—See JERUSALEM, 7.

HOLY SPIRIT.—The mysterious creative power of God, possessing and inspiring men, manifested especially in ecstatic conditions, prophesying, and special gifts and abilities such as strength, leadership, wisdom, judgment, and skill ; sometimes conceived as a quasi-physical force impelling its recipient somewhat in the manner of the wind setting in motion the dust of the ground, but coming to be recognized as the personal activity of God Himself ; in the NT the Spirit of God ' anointing ' Jesus as the Messianic Son of God at His Baptism and ' resting ' upon Him ; then, as the consequence of the completion of His saving work in His resurrection and ascension, bestowed by the exalted Christ upon His disciples, to be the witness to Christ through the Church's mission, the inner principle of the new life ' in Christ ' of the Christian community and its individual members, the mode or medium by which the risen Christ is present in the Church and in the Christian, and, in Johannine theology, the ' paraclete ' who brings Christ's deeds and words to His people's remembrance and guides them into full personal knowledge of Him ; hence recognized as a fully personal mode of the Divine operation in creation and re-creation.

A. THE OLD TESTAMENT.—(i) *General.*—(ii) The activity of the Spirit : (*a*) inspiring heroes and mighty men ; (*b*) manifested in artistic genius, insight, and wisdom ; (*c*) active in the wisdom and judgment of rulers and lawgivers ; (*d*) especially manifested in prophecy ; (*e*) the future hope of a general outpouring on Israel ; (*f*) as the mode of God's activity in history ; (*g*) as the creative Spirit ; (*h*) as the living energy of a personal God.

B. THE EXTRA-CANONICAL WRITINGS.

C. THE NEW TESTAMENT.—(i) The Synoptic Evangelists : (*a*) The Spirit and the preparation for the Christ ; (*b*) The Spirit and the mission of Jesus. (ii) The Spirit in the Acts of the Apostles. (iii) The Spirit in the Pauline Epistles. (iv) The Spirit in the Johannine teaching. (v) The Spirit in other NT writings : (*a*) The Pastoral Epistles ; (*b*) The Epistle to the Hebrews ; (*c*) 1 Peter ; (*d*) Jude ; (*e*) Revelation. (vi) The Spirit and the Scriptures.

A. THE OLD TESTAMENT.—(i) *General.*—The word *rûaḥ* (usually represented in LXX by *pneuma*, but sometimes by *anemos* [fifty-two times], *thymos* [five times], *pnoē* [four times], *psychē* [twice], belongs to a root *rûaḥ* signifying ' blow,' ' breathe,' used only in the Hiph'il, *hērîaḥ*, denoting ' smell ' (Gn 8^{21}). The meanings of *rûaḥ* in OT are (1) ' wind ' or ' breeze,' as in the expression *bᵉrûaḥ ḥayyôm* (LXX *to deilinon*, Aq. *en tō anemō tēs hēmeras*, Symm. *dia pneumatos hēmeras*), and as in Nu 11^{31}, Job 4^{15} 41^{16}, Jer 2^{24} 14^{6} ; (2) ' breath ' of man, and hence (3) the vital principle, both in the phrase *rûaḥ ḥayyîm*, ' breath of life ' (Gn 6^{17} 7$^{15, 22}$) and absolutely (Gn 45^{27}, 1 K 10^{5}, Job 12^{10} 34^{14}, Ps 104^{29}, Ec 3^{19}, (4) human emotion (Gn 41^{8}, where Pharaoh's ' spirit ' is troubled as a result of his dream, Nu 5^{14}, ' spirit of jealousy ' ; 2 S 21^{5}, Pr 25^{28}), (5) intellectual activity (Dt 34^{9}, ' spirit of wisdom ' ; Job 32^{8}, where the ' spirit ' in man, which ' makes him understand,' is ' the breath of the Almighty ' ; Jer 51^{11}, where the allusion is to purposive thought or intention) ; (6) the whole of man's personality, that is, man considered as a spiritual being possessing a relationship to God (Nu 27^{16}, Ps 31^{5}, ' into thy hand I commit my spirit '). As applied to God, the word may retain its primary sense : his wrath may be described as the blast (*rûaḥ*) of his nostrils ' (Ex 15^{8}), cf Job 4^{9}, Ps 18^{15}, and his creative power is the ' breath of his mouth ' (Ps 33^{6}). It may, on the other hand, denote the dynamic activity which is peculiarly characteristic of God, and so indicate the Divine nature itself, as when Isaiah sets in parallel contrast ' men ' over against ' God ' and ' flesh ' over against ' spirit ' (Is 31^{3}).

The term ' Spirit of God (the Lord) ' occurs very frequently in OT. There are a few cases where this, or a similar phrase, denotes the wind sent by God (Ex 15^{10}, Is 40^{7} 59^{19}, Hos 13^{15}), or the breath of man as infused into him by the Divine inbreathing (Job 27^{3}, ' as long as . . . the spirit of God is in my nostrils ' ; cf Gn 2^{7}). Usually, however, it signifies the Divine energy in its relation to creation and especially to man. This is manifested in supernatural endowments of many kinds, ranging from physical strength to the most profound ethical and spiritual understanding.

(ii) The Spirit as *a mysterious power* taking possession of man and manifesting its activity in special endowments and qualities : (*a*) Inspiring Israel's heroes and energizing them for the performance of feats of strength and the exercise of leadership in war. Thus the career of Samson begins when ' the Spirit of the Lord began to stir in him ' (Jg 13^{25}), and it is when ' the Spirit of the Lord came mightily upon him ' that he tore a lion asunder (Jg 14^{6}), slew thirty Philistines (14^{19}), and freed himself from bonds (15^{14}). Under the same inspiration or ' invasion ' of the mysterious power of the Spirit of the Lord Othniel took the leadership in Israel and won victory for the people (Jg 3^{10}) ; Gideon was possessed by the Spirit (literally ' the Spirit of the Lord clothed itself with Gideon,' so that the hero is made to be an embodiment of the Spirit) and was thus enabled to summon Israel to repel the Midianites (Jg 6^{34}). Jephthah and Saul are also represented as Spirit-possessed leaders who rouse the nation to drive back its enemies (Jg 11^{29} 1 S 11^{6}). So, too, the Spirit is associated with the gift of heroism in battle as well as with the ruler's gift of judgment (Is 28^{6}).

(*b*) The Spirit's operation is manifested in *artistic genius*, as in the case of Bezalel, who was ' filled with the Spirit of God, with ability and intelligence, with knowlege and all craftsmanship, to devise artistic designs ' (Ex 31^{3} 35^{31}), and in the possession by certain individuals of peculiar powers of *understanding and insight*, such as Joseph and Daniel displayed in the interpretation of dreams and other Divine revelations (Gn 41^{38}, Dn 5^{14}), and in the exercise of sagacity and discernment (Sus 45). Sir 39^{6} sums up the character of the pious and learned devotee of the Law as one who, if the Lord wills, will be filled with the Spirit of understanding. In the later Wisdom writings the idea that the wise man is one into whom the Spirit (RSV ' thoughts ') of Wisdom has been infused (Pr 1^{23}) is extended to the point where the Wisdom and the Spirit of God are virtually identified as modes of God's operation among men and in creation as a whole (Wis 1^{5} 7$^{7, 22}$ 9^{17}).

(*c*) The working of the Spirit is especially associated with the wisdom and judgment of *the ruler and lawgiver*. The inspiration of Moses is imparted to the seventy elders (Nu 11^{25}), and is here regarded as a combination of the spirit of the ruler with that of the prophet. Joshua receives the Spirit of Wisdom as the successor to Moses in the leadership of the people. It is imparted to him by the imposition of the hands of his predecessor, a sign of personal identification through which he becomes as it were a second Moses (Dt 34^{9}). Nu 27^{18} also describes Joshua as ' a man in whom is the Spirit,' and therefore as one fitted for command, but in this passage his possession of the Spirit appears to precede,

and be independent of, his commissioning as the successor of Moses by the laying-on of his hand. The coming of the Spirit upon the ruler is directly associated in the case of David with his anointing by Samuel: 'Then Samuel took the horn of oil, and anointed him in the midst of his brothers; and the Spirit of the Lord came mightily upon David from that day forward' (1 S 16^{13}). The coming of the Spirit upon David coincides with the departure of the Spirit of the Lord from Saul, whom God, through the prophet, has rejected from the kingship (1 S 16^{14}, cf 1). The spirit of judgment, exercised by the wise ruler, is promised as a personal gift of God (Is 28^{6}), and all the endowments necessary for right government are portrayed in Isaiah's picture of the ideal king as operations of the Divine Spirit: 'There shall come forth a shoot from the stump of Jesse . . . and the Spirit of the LORD shall rest upon him, the spirit of wisdom and understanding, the spirit of counsel and might, the spirit of knowledge and the fear of the LORD' (Is 11^{2}).

This expectation of a ruler of Israel who shall be fully endowed with the Divine Spirit reappears in the inter-testamental literature in the messianic hope of the Psalms of Solomon which look for one anointed of the Lord who shall be strong in Holy Spirit (17^{42}) and so be endowed with wisdom and understanding, strength, and righteousness.

(*d*) The inspiration of the Spirit is supremely manifested in *prophecy*. The prophet is pre-eminently 'the man of the Spirit' (Hos 9^{7}), whether he is a primitive diviner such as Balaam, upon whom the Spirit of God came as he gazed upon the camp of Israel (Nu 24^{2}), one like Saul who was seized with infectious ecstasy as he encountered a band of wandering prophets with their music (1 S $10^{6, 10}$), or an inspired man who is enabled by the Spirit to enter into communion with God and to understand and interpret His will and purpose, such as Micah who can say of himself, in contrast with the false prophets: 'But as for me, I am filled with power, with the Spirit of the Lord, and with justice and might, to declare to Jacob his transgression and to Israel his sin' (Mic 3^{8}). The prophetic Spirit may sometimes be thought of in terms of a quasi-physical force, driving or carrying the prophet from place to place (1 K 18^{12}, 2 K 2^{16}, Ezk 3^{14} 8^{3} 11^{1} 43^{5}); but it is also the inner working of God in the prophet's own being, enabling him to discern the mind and will of God. 'The Spirit of the Lord speaks by me,' says David in his last oracles, 'his word is upon my tongue. The God of Israel has spoken, the Rock of Israel has said to me' (2 S 23^{2f}). It is the Spirit of the Lord which speaks to the prophet when he utters his oracles (1 K 22^{24}), and when Elisha succeeds Elijah as the great prophet in Israel the Spirit which inspired Elijah is transferred to the new leader (2 K 2^{15}). When the Spirit enters into the prophet he is enabled to hear the voice of God (Ezk 2^{2} 11^{5}). In later times, when prophecy had ceased in Israel, it was to Elijah and Elisha that men looked back as the great examples of Spirit-inspired men (Sir $48^{12, 24}$).

A particularly important instance of the operation of the Spirit, in which the prophetic aspect predominates but may be combined with the spirit of the ruler or leader, as in the case of Moses, is to be found in the description of the Servant of the Lord in the poems of the Second Isaiah. It is said of the Servant, 'I have put my spirit upon him, he will bring forth justice to the nations' (Is 42^{1}), and, at least in the NT interpretation of these prophecies, if not in pre-Christian exegesis, there was associated with the Servant poems the picture of the Spirit-possessed prophet of Is 61^{1}, of whom it is said: 'The Spirit of the Lord GOD is upon me, because the LORD has anointed me to bring good tidings to the afflicted.'

(*e*) Although the Spirit is manifested only in certain exceptional individuals, there is a hope expressed in the OT that *all Israel*, as the people of God, will be inspired by his Spirit. 'Would that all the Lord's people were prophets,' exclaims Moses, 'that the Lord would put his spirit upon them' (Nu 11^{29}), and the same expectation of a general outpouring of the Spirit of prophecy is expressed at length in Joel (2^{28f}). In a wider sense, the Spirit is associated with a renewal of Israel as the covenant people, and this expectation becomes an important element in the OT hope of the age of fulfilment. It is a part of the universal recreative work of God (Is 32^{15}), but it is especially connected with the cleansing and repentance of Israel which will enable her to be reconstituted as the true people of God: 'A new heart I will give you, and a new spirit I will put within you . . . and I will put my spirit within you, and cause you to walk in my statutes and be careful to observe my ordinances' (Ezk 36^{26f}). The vision of the dry bones points to the same promise of the re-creation of God's people through the inspiration of the Spirit: 'And I will put my Spirit within you and you shall live, and I will place you in your own land' (Ezk 37^{14}). The time of the outpouring of God's Spirit on Israel will come when the nation is gathered together once more out of the peoples among whom they have been dispersed (Ezk 39^{29}), and it is associated with their naming as the peculiar possession of God (Is 44^{3}). The presence of God's Spirit among His people is to be the sign and pledge of the fulfilment of the covenant promise (Is 59^{21}), and this is no less than the mode of the personal dwelling of God Himself in their midst (Hag 2^{5}). It must not be forgotten that if the Servant is intended to represent the faithful of Israel, his possession of the Spirit is another reminder of the strength of this hope of a general outpouring of the Spirit upon the covenant people and the frequency with which it is encountered in the Hebrew prophets. This promise of the presence of the Spirit in Israel is linked with God's judgment and forgiveness (Is 4^{4}) and the people's repentance (Zec 12^{10}).

(*f*) The Spirit is the mode of *God's activity in history*, especially in respect of His guidance of the destinies of his people. When Judah seeks an alliance with Egypt against the revealed will of God she acts against His Spirit (Is 30^{1}); it is by the Spirit that God intervenes in the events which follow the Return (Zec 4^{6} 6^{8}).

(*g*) From its manifestation in history the activity of the Spirit is traced back to *the beginning of creation*. The Spirit of God broods (RSV 'was moving') over the primeval deep (Gn 1^{2}). The LXX rendering, *epephereto*, suggests the movement of the wind over the face of the waters, but the Hebrew verb denotes rather the vitalizing energy of the divine Spirit, giving life to the creation that is about to be called into being by God's word. The same combination of the 'word' and the 'breath' or spirit of God in creation is found in Ps 33^{6}, and through the agency of the Divine Spirit the world of living creatures is maintained in being for so long as God wills (Job 33^{4}, cf Ps 104^{30}). The association, or virtual identification, of the Spirit with Wisdom (Wis 9^{17} etc.) serves to emphasize the creative aspect of the Spirit's operation.

(*h*) It will be clear from what has been said that in the developed thought of the OT the Spirit is *the living energy of a personal God*. It is not an independent hypostasis; it is God in one aspect of His activity towards His creation. As such, the Spirit is spoken of in personal terms, and in a number of passages is practically a synonym for 'God.' Thus the 'good Spirit' of God can be said to 'instruct' Israel (Neh 9^{20}); the phrase 'his Spirit' is parallel to 'the Lord God' in Is 48^{16}; the Spirit is identical with the Divine presence (Hag 2^{5}); and in this sense the Spirit can be said to have been 'grieved' by Israel's rebellion against God's protective care (Is 63^{10-12}). This last passage marks the climax of OT thought about the personal presence of the Spirit in the community of God's people, and it is one of the rare occasions on which the Spirit is described as 'his holy Spirit,' that is, the Spirit of the holy God. A similar realization that the Spirit's work is the work of God Himself is seen in Ps 51^{11}, where the thought is of God's presence in the life of the individual:

HOLY SPIRIT

Cast me not away from thy presence, and take not thy holy Spirit from me.' With this we may compare Ps 139[7]: 'Whither shall I go from thy Spirit? Or whither shall I flee from thy presence?'

(B) Extra-Canonical Literature.—The literature of the inter-Testamental period adds comparatively little to the OT thought concerning the Spirit of God. The expectation of a Spirit-possessed messianic leader, as it appears in the Psalms of Solomon, has been mentioned already (A. (ii) (*c*) above). The language of Is 11[2] is echoed in the description of the resting of the Spirit upon the Elect One, the Son of Man, in Enoch (49[3]); the Spirit of righteousness is poured out upon him (1 En 62[2]). If the *Testaments of the XII Patriarchs* may be reckoned among the pre-Christian literature, they provide further evidence for the hope of a Spirit-possessed Messiah (Test. Jud. 24[2], Test. Lev. 18[7]) through whom the Spirit will be given to the people of God (Test. Lev. 18[11]). A cleansing by the Holy Spirit from all wickedness is part of the expectation of the Qumrân community (*Manual of Discipline* iv; cf also Jubilees 1[21-25]). In the Qumran scrolls, however, the concept of the Spirit is somewhat obscured by the prominent doctrine of the two created spirits, of light and darkness, which wage an incessant conflict in man. This teaching is in line with the general tendency of the later Jewish literature to devote much attention to the idea of a hierarchy of created spirits, angels, and demons. This, together with the decline of prophecy, may be the reason for the relative lack of interest during the inter-Testamental period in the Spirit as the personal activity of God. It should be noted that the Jewish avoidance of dualism, which involves the ascription of the creation of the evil spirit to God Himself, is anticipated in the OT with its references to evil spirits sent by or from God (Jg 9[23], 1 S 16[14] 18[10], 1 K 22[21ff]) or to 'an evil spirit of God (Is 19[9], cf LXX).

On the whole, during this period, the Spirit continues to be regarded as pre-eminently the Spirit of prophecy which inspired the great prophets of old (Sir 48[12, 24]; 1 En 91[1], cf Jos. *c. Ap.* i. 8), and hence as the inspirer of Scripture (cf 2 Es 14[22]). In the thought of Philo this conception of prophetic inspiration approximates closely to the Hellenistic idea of 'enthusiasm,' the prophets, and even the LXX translators, being possessed by the Divine Spirit in a manner which involves the suspension of the normal rational faculty (*De spec. legg.* 8; cf *Quis rer. div. her.* 53; *Vit. Mos.* ii. 7).

The chief exception to the general lack of progress in inter-Testamental thought about the Spirit is the teaching of the Wisdom of Solomon. Its identification of Wisdom with the Spirit has already been mentioned (A. (ii) (*b*) above). It also presents the Spirit as the Divine power sustaining, conserving, and pervading the universe (Wis 1[7] 12[1]), as the source of man's intellectual and spiritual endowments and of the knowledge of God (7[7] 9[17] 15[11]), and as the indwelling power of Wisdom (7[22f]). A similar interpretation of the Spirit's operation is found in Philo, who asserts that the Spirit of God is the Wisdom in which every wise man participates (*Gig.* 5).

C. The New Testament.—(i) *The Synoptic Evangelists.* (*a*) The Spirit and *the preparation for the Christ.* All the Synoptic Gospels concur in regarding John the Baptist as a prophet, like, but indeed greater than, the prophets of old; he is presented in Mark as Elijah *redivivus* (1[6] 9[13], cf Lk 1[17]); he is believed by the people to be a real prophet (Mk 11[32] and par.); and is said by Jesus to be greater than other prophets, being the messianic fore-runner (Mt 11[9], Lk 7[26], Mt 11[13], Lk 16[16]). Luke is especially concerned to show that the prophetic Spirit, long dormant in Israel, revived in a new outburst of prophesying as the age of fulfilment dawned. Thus John is described as an inspired prophet from his birth (Lk 1[15]; cf Jer 1[1]), whose 'call' is reminiscent of that of some of the OT prophets (Lk 3[2]; cf Hag 1[1], Zec 1[1]). His parents also were empowered by the Spirit to declare Divine messages (Lk 1[41, 67]). His baptism of repentance is intended to prepare a purified remnant of Israel for the coming of the 'stronger one' who is to execute judgment and to 'baptize' with Holy Spirit in accordance with the ancient expectation of the last times (Mk 1[8], Mt 3[11], Lk 3[16]; cf Ac 1[5], Jn 1[33]). Meanwhile, the birth of Jesus has taken place, in a setting, according to Luke, of the renewed outburst of the Spirit of prophecy (Lk 1[41] 2[25-27]; cf v.[36]), and as a result of a new creative act of the Spirit (Lk 1[35], Mt 1[18, 20]).

(*b*) The Spirit and *the mission of Jesus.* While the crowds were baptized by John as a penitent remnant awaiting the age of fulfilment, Jesus, when He joined the multitudes and received John's baptism, experienced the promised descent of the Spirit, and the association of water with the Spirit which had been made in the metaphorical language of the prophets (*e.g.* Ezk 36[25-27]) was translated into reality. The descent of the Spirit is likened to that of a dove (Mk 1[10], Mt 3[16], Lk 3[22]), the symbolism being perhaps intended to recall the brooding of the Spirit over the waters at Creation, and to indicate a new act of the creative Spirit in relation to man, but more probably to allude to the dove of Noah which was the harbinger of the first covenant between God and man. The theory that there may be an allusion to the interpretation of Gn 1[9], by which wisdom is symbolized as a dove (Philo, *Quis rer. div. her.* 126), is very improbable. In Philo's exegesis the *peristera* (the word used by the evangelists) signifies human, as opposed to divine, wisdom, and could not be identified with the Spirit. In any case, the symbolism denotes the completeness and perfection of the illapse of the Spirit on Jesus which is unparallelled in the case of any of the prophets of old. The descent of the Spirit is accompanied by the Divine assurance to Jesus of His messianic sonship, combined with an interpretation of that sonship in terms of the vocation of the Servant of the Lord (Mk 1[11], Mt 3[17], Lk 3[22], 'Alexandrian' text, the 'Western' reading signifying messianic sonship only; cf Ps 2[7], Is 42[1] 44[1]). In this consecration by the Spirit for His vocation as Servant-Messiah, Jesus received His anointing as the Christ: 'God anointed Jesus of Nazareth with the Holy Spirit and with power (Ac 10[38]; cf 4[27]).

The Spirit-possession of Jesus was a permanent condition, an aspect of His messianic sonship. The Spirit is manifested in His mighty works, His teaching, and His entire ministry. It is under the compulsion of the Spirit that Jesus goes from His baptism by John to wrestle with the temptations which were inseparable from His vocation as Servant-Messiah (Mk 1[12], Mt 4[1], Lk 4[1]). The direct opposition to the Divine power manifested in His mighty works which would ascribe them to the operation of the devil is blasphemy against the Holy Spirit, and is the ultimate sin (Mk 3[29], Mt 12[31f]). The fact that Jesus casts out demons by the Spirit of God is evidence enough that the Kingdom of God is already operative by anticipation in His ministry (Mt 12[28]). This ministry is recognized as the fulfilment of the vocation of the Servant, of whom God had said 'I will put my Spirit upon him' (Mt 12[18], citing Is 42[1-4]). The Synoptic Gospels record the promise of Jesus that His followers who acknowledge Him under persecution will be directly inspired by the Spirit to make their public confession of faith (Mk 13[11], Mt 10[20], Lk 12[12]), and Matthew ascribes to the risen Christ the command to baptize in the name of the Father and of the Son and of the Holy Spirit (Mt 28[19]), a passage which no doubt reads back later baptismal practice into the time of the resurrection appearances, but which, as a probably authentic part of Matthew, is evidence for a fully developed doctrine of the Spirit's divinity by the time that Matthew was written.

References to the Spirit in the Synoptic Gospels are relatively scanty. It is the common teaching of the NT as a whole that the age of the Spirit's operation properly begins when the saving work of Christ has been completed in His death, resurrection, and ascension, and that during His earthly ministry the Spirit was upon Him uniquely, yet manifested only to the eye of faith.

What is implied in the other evangelists is clarified in Luke, whose two-volume work is constructed to show how the Spirit, by whose operation Jesus was conceived, descended upon Him at His baptism, was the source and focus of His authority and power during His ministry in such a way that He fulfilled the expectation of the coming of a 'prophet like Moses' (Ac 3^{22} 7^{37}; cf Lk 24^{19}, Dt 18^{15-18}), and as a consequence of His exaltation through death was bestowed by Him upon His followers to operate in the community of the Church and reproduce in it the works of Jesus Himself. Thus Luke sets the birth of Jesus in the context of a revival of the prophetic Spirit (C. (i) (*a*) above); emphasizes the creative act of the Spirit in His conception, making Jesus more than the most completely inspired prophet; lays stress on the power of the Spirit as the motive of the departure of Jesus to face temptations in the desert (Lk 4^{1}) and of His return to begin the Galilaean ministry (4^{14}); and introduces, as a prelude to the story of Luke-Acts, the announcement by Jesus at Nazareth that His mission is the fulfilment of the prophecy of the Spirit-anointed prophet who was to come to proclaim good tidings to the oppressed (4^{18}, Is 61^{1}). It is in the Holy Spirit that Jesus rejoices after the return of the Seventy (10^{21}), and in the central section of Luke the teaching of Jesus is related to the post-Pentecostal Church's experience of the same Spirit which Jesus Himself possessed. Thus the gift of the Spirit is the supreme object of the Christian disciples' prayer (11^{13}; cf the variant reading, 'May thy Holy Spirit come upon us and cleanse us' in the Lord's Prayer, 11^{2}, which may conceivably be authentic) and the saying about blasphemy against the Spirit is set in juxta-position to the promise that the Spirit will inspire the faithful confessor, indicating that for Luke the sin against the Spirit is apostasy with the rejection of the promised inspiration (12^{10-12}). Finally, it is through the Holy Spirit that the risen Christ gives instruction to His disciples (Ac 1^{2}).

(ii) *The Spirit in the Acts of the Apostles.*—The risen Christ promised that through His exaltation the hope of a general outpouring of the Spirit would be fulfilled and that His followers would be 'clothed with power from on high' (Lk 24^{49}), 'baptized with the Holy Spirit' in accordance with the Baptist's prophecy (Ac 1^{5}; cf Lk 3^{16}), so as to receive power, 'when the Holy Spirit has come upon you' for the mission of witness to the end of the earth (Ac 1^{8}). This was fulfilled in the 'invasion' of the Spirit at Pentecost, when the original leaders of the Church's mission were empowered for their task by the gift of the Spirit of proclamation or 'tongues.' The symbolism of the Pentecostal sights and sounds is related to the fact that Pentecost was the commemoration or the giving of the Law; the general outpouring of the Spirit is the inauguration of the new covenant, an antitype of Sinai. The language of Luke may also indicate that he sees in this event a reversal of the confusion of speech at Babel (Gn 11^{1-9}). It is not possible to answer the question of what actually happened at Pentecost. The narrative is an attempt to give symbolical expression to the inexpressible, but it is clear that the disciples were seized with an overwhelming spiritual power, inspiring them to proclaim the gospel of the decisive event of Christ and to convey it to the crowd in Jerusalem, drawn from all the nations of the earth and foreshadowing or typifying the future hearers of the world-wide proclamation by the apostolic missionaries. The details of the symbolic narrative should not be pressed to the point of asking why the crowd was apparently unable to understand except in their individual languages, or what relation this apparent miracle bears to the phenomenon of 'speaking with tongues' mentioned elsewhere in Acts (10^{46} 19^{6}) and in 1 Co 12–14. It is probable, however, in view of the parallel drawn between the event of Pentecost and that of Ac 10^{46} (10^{47} 11^{15-17}), that Luke's symbolical picture is based on an occurrence, in overwhelming force and with infectious enthusiasm, of the ecstatic utterance which we encounter later in the history of the primitive Church. This tremendous experience of the Spirit was the fulfilment of the prophecy of Jl 2^{28-32}, and was the final proof of the exaltation of Jesus as Messiah: 'Being therefore exalted at the right hand of God, and having received from the Father the promise of the Holy Spirit, he has poured out this which you see and hear' (Ac 2^{33}).

Spirit-possession is now the distinctive mark of all the people of God. Through baptism 'in the name of Jesus Messiah' (Ac 2^{38}) the promise of the Spirit is fulfilled for every convert. At this point the account of the operation of the Spirit given in Acts becomes somewhat obscure. The reason for this is that Luke, being concerned with the story of the Church's progress rather than with doctrinal exposition, does not clearly differentiate between two aspects of the work of the Spirit which he treats together in his narrative. On the one hand, the Spirit is the inner principle of the life of the Christian community; it is manifested in the whole character of the society, its unity and brotherhood, expressed in the sharing of possessions (Ac 2^{42-47} 4^{32-37}), in its administration and charitable organization (6^{3}), and particularly in the joy (cf 13^{52}) which is associated with the activity of the Spirit in the NT as a whole and especially in the Lucan writings. A deliberate offence against the brotherhood is thus a sin against the Spirit (Ac $5^{3, 9}$). On the other hand, the Spirit is more often thought of in Acts as being pre-eminently the guide and inspirer of the mission to the world, the Spirit of the Christian *paraclēsis* or proclamation of the good news of the gospel (9^{31}; cf. 4^{36}), manifested chiefly in the missionary endowments of 'tongues,' prophesying, and the signs and wonders which accompanied the spread of the Church's witness. It thus inspires the preaching of Peter (4^{8}), giving to him and to John 'boldness' of speech before the Sanhedrin (cf 4^{13}), and boldness to the community as a whole to witness to Christ under persecution (4^{31}). The Spirit in the apostles testifies to the truth of the gospel (5^{32}), and it is manifested most strikingly in the preaching of Stephen (6^{10}) and in his martyrdom (7^{55}), when the promise is fulfilled that the faithful confessor would be directly inspired (Lk 12^{11f}). The Spirit guides the movements of the missionaries ($8^{29, 39}$ 16^{6f}), enables the leaders of the work to direct and control it (11^{22-24} 15^{28}), and inspires the appointment of missionaries to their tasks ($13^{2, 4}$) and the ordination of ministers for the congregations as they are established (20^{28}). Just as the Spirit directs and empowers the work of Peter and others in Jerusalem and its neighbourhood, so it is the guide and motive force in the Gentile mission of Paul, enabling him to confront Elymas (13^{9}), to plan the final journey to Jerusalem (19^{21}; cf the guidance of Paul and Silas to Troas in 16^{6f}), to prepare for suffering in Jerusalem (20^{22f}), and warning him of the difficulties ahead ($21^{4, 11}$).

At the important turning-point in the mission represented by the extension of the preaching to Samaria, visible manifestations of the Pentecostal Spirit, withheld (though apparently expected) when the Samaritan converts were baptized, were bestowed through the imposition of the hands of the leaders of the Jerusalem apostles, Peter and John, probably conferred as a sign of fellowship and solidarity transcending the ancient schism between Jew and Samaritan. The visible signs which so impressed Simon Magus were probably the phenomena of tongues and prophesying (8^{14-19}). Such signs are explicitly mentioned at the even greater crisis of the extension of the mission to Gentiles, when a repetition of Pentecost gives convincing proof that the household of Cornelius must be baptized into the Christian society (10^{44-48} 11^{15-17}). The whole of this most important episode took place, of course, under the Spirit's direction (10^{19} 11^{12}). A similar manifestation of the Spirit in tongues and prophesying occurs when Paul baptizes at Ephesus the disciples who had known only the baptism of John, and lays his hands upon them (19^{1-7}). This, again, may represent a renewal of the Pentecostal gift for the mission at an important moment

in its development, the foundation of the Ephesian Church, the chief centre of the Pauline Gentile mission. In concentrating attention on these aspects of the Spirit's work, it is most unlikely that Luke intends either to ignore the function of the Spirit as the regular principle of the Christian life of the individual and the society, or to suggest that the peculiar phenomena associated with Pentecost, the conversions at Samaria, or the incorporation into the Church of the Ephesian disciples were ordinarily reproduced in the normal life and work of the community. It should be mentioned that although little is said in Acts about the nature, as opposed to the operation, of the Spirit, it is asserted both that the Spirit is received through the exalted Jesus (2^{33}) and that it is the Spirit which had been uniquely his own, 'the Spirit of Jesus' (16^{7}).

(iii) *The Spirit in the Pauline Epistles.*—Here the doctrine of the Spirit, while not different from that in the Gospels and Acts, is far more fully developed in a manner corresponding to the fact that Paul is not concerned with the pre-Resurrection situation but is writing to Christians for whom the manifest presence and operation of the Spirit are the central element in their corporate and individual life. The Spirit is now recognized as being both the Spirit of the Father, 'the Spirit of him who raised Jesus from the dead' (Ro 8^{11}), and the Spirit of Christ (Ro 8^{9}) or 'the Spirit of his Son' (Gal 4^{6}). The grace of Christ, the love of God, and the participation in (or fellowship of) the Holy Spirit can therefore be set in parallel as modes of the Christian experience (2 Co 13^{14}, a text which, with Mt 28^{19}, was rightly seen by the early Church to imply full Trinitarian belief). It would be untrue to suggest that Paul identifies the Spirit with the risen and ascended Christ. 'The Lord is the Spirit' (2 Co 3^{17}) bears no such meaning; Paul is here developing an allegorical exegesis of Ex 34^{34}, and is saying that just as when Moses went in before the Lord he took the veil off, so when Israel turns to the Lord the veil which lies upon their understanding of the scriptures will be removed; and for them the phrase, 'the Lord,' means 'the Spirit' which is given through Christ, as opposed to the old covenant of the Law. Yet it is true to say that terms such as 'in Christ' and 'in the Spirit' can be used interchangeably, for the Spirit indwelling the Church and the individual believer is the mode or medium by which the ascended Christ is present to His people and they are in communion with Him. The Spirit is the principle and power of life 'in Christ,' which is an anticipation in the present order of the resurrection life of the age to come. As the Spirit of the resurrection life it mediates Christ's indwelling presence; hence Paul can speak indifferently of life 'in the Spirit,' the indwelling of the Spirit of God, having the Spirit of Christ, Christ being 'in you,' and being led by the Spirit of God (Ro 8^{9-14}). The Spirit, as the principle of the new life, stands in total opposition to the principle of unredeemed human life, of man's condition in his sinful state of alienation from God. It is this latter which is denoted by the term 'flesh' as generally used by Paul. The Christian life is a life 'not according to the flesh but according to the Spirit' (Ro 8^{4}). 'To set the mind on the flesh is death, but to set the mind on the Spirit is life and peace' (Ro 8^{6}). 'You are not in the flesh but in the Spirit, if the Spirit of Christ really dwells in you' (Ro 8^{9}). This Spirit-possession means that the believer is already in a measure 'spiritual,' that is, open to the energy and direction of the Spirit; he is already in part 'spirit,' though still living in the 'flesh,' the natural condition of the present sinful order; and he may look forward to the completion of his redemption when the resurrection life will be imparted to the mortal body through the indwelling of the Spirit, and he will become wholly 'spiritual,' endowed with a 'spiritual' body, that is, a body fitted for fellowship with, and the service of, God (Ro 8^{11}; cf 8^{23}, 1 Co 15^{44ff}, Ph 3^{21}). For the present the indwelling Spirit contends against the 'flesh,' the principle of man's self-assertion against God (Gal 5^{16-18}, 1 Co 2^{14ff}), but it constitutes the 'first fruits' of the believer's final redemption (Ro 8^{23}); it is the 'first instalment' which guarantees the whole (2 Co 1^{22} 5^{5}), or, in another metaphor, the seal or mark of God's ownership by which He will recognize and claim His people in the day of total redemption (2 Co 1^{22}, Eph 1^{13-14} 4^{30}). The Spirit is to the Christian, as to Jesus at His baptism, the assurance of sonship. The proof of sonship is that God has sent the Spirit of His Son into our hearts, crying Abba, Father! (Gal 4^{6}, Ro 8^{14-21}). The Spirit dwelling in the believer conforms him to the likeness of Christ (2 Co 3^{18}; cf Ro 8^{29f} 12^{2}) in a progressive process of making him become, or enter into the meaning of, what he has been made by his justification, that is, a son of God. This Divine indwelling constitutes the members of the Church, collectively and individually, a temple in which the Spirit dwells (1 Co 3^{16} 6^{19}). It is the principle of the life of the Church as the body of Christ (1 Co 12^{13}, Eph 4^{4}), the source of its unity (Eph 4^{3}), the medium by which Jew and Gentile have come to attain access to God in the fellowship of the community (Eph 2^{18}), so as to constitute a single dwelling-place of God (Eph 2^{22}). The life of the Church consists in its participation in the Spirit (2 Co 13^{14}, Ph 2^{1}). It is, indeed, only through the inspiration of the Spirit that the Church member can make his initial confession of faith in Christ as Lord (1 Co 12^{3}).

The Spirit is the mode of man's communion with God, and as such is spoken of in terms which leave no doubt that Paul thinks of the Spirit as personal, at least in the sense of being the personal working of the personal God: 'it is the Spirit himself bearing witness with our spirit that we are children of God' (Ro 8^{16}); 'The Spirit helps us in our weakness; for we do not know how to pray as we ought, but the Spirit himself intercedes for us with sighs too deep for words. And he who searches the hearts of men knows what is the mind of the Spirit, because the Spirit intercedes for the saints according to the will of God' (Ro 8^{26f}). Thus the Spirit communicates God's revelation to man (1 Co 2^{10-13}). The dispensation of the Spirit stands in sharp contrast over against that of the Law, which could only effect man's condemnation: 'We serve not under the old written code but in the new life of the Spirit' (Ro 7^{6}); 'The written code kills, but the Spirit gives life' (2 Co 3^{6}.) The Christian who is led by the Spirit is not under the Law (Gal 5^{18}). The manifestations of the indwelling of the Spirit are many and varied. They include freedom, the confidence before God which is the essential characteristic of those who have received the status of sons of God (Gal 5, 2 Co 3^{17}); the power by which the gospel is attested (1 Th 1^{5}, 1 Co 2^{4}), joy (1 Th 1^{6}, Ro 14^{17}); zeal (Ro 12^{11}); consecration to membership of the holy people of God (1 Th 4^{8}, 2 Th 2^{13}). The charismata of prophecy and ecstatic utterance are valued by Paul (1 Th 5^{19}; cf 1 Co 14^{18}), but he insists, against the tendency of Corinthian Christians to take particular pride in such gifts, that the manifestations of the Spirit are manifold, all having their proper place in the life of the Body (1 Co 12^{4-11}), that prophecy, which is intelligible to all and therefore edifying, is preferable to 'inspired gibberish' of 'tongues' (1 Co 14), and that the greatest gifts of the Spirit are faith, hope, and love, with love as their crown (1 Co 13). Love is the supreme manifestation of the Spirit (cf Col 1^{8}), but all the specifically Christian qualities of life are its fruit (Gal 5^{22f}). It remains to add that the means by which the Spirit is received are, according to the Pauline teaching, the response of faith to the preaching of the gospel (Gal 3^{2-5}), and baptism (1 Co 12^{13}; cf Ro 6^{4} 8^{2ff}).

(iv) *The Spirit in the Johannine teaching.*—The Fourto Gospel, which does not narrate the baptism of Jesus, clearly explains its significance. As the one upon whom the Spirit descended and remained, He is marked cut as the Son of God, who will baptize with the Holy Spirit (Jn 1^{32-34}). He has received the Spirit in a fulness and completeness which differentiates Him from the prophets or the Baptist, as the one who utters the words

of God (Jn 3[34]). His teaching points to the rebirth through the Spirit, that is, entry upon a new state of life whose inner principle is the Spirit, as the only way of entering the Kingdom of God; and this is described in language which indicates the association of water and Spirit in Christian baptism (Jn 3[5-8]; cf 1[13]). This rebirth in the Spirit can take place only after the completion of the saving work of Christ in His death and exaltation (cf 3[14ff]); hence the promise of the Spirit in Christ's teaching looks to the future: 'Now this he said about the Spirit, which those who believed in him were to receive; for as yet the Spirit had not been given [or, Spirit was not yet], because Jesus was not yet glorified' (7[39]). The fullest teaching on the Spirit is to be found in the discourses which follow the Last Supper. Here the Spirit is called the *paraclete* (RSV 'Counsellor'), a term which properly denotes 'advocate' (cf 1 Jn 2[1], where it is applied to Christ) or 'intercessor,' but which in this context may rather mean the Spirit of *paraclēsis*, that is the proclamation of the comfort and encouragement of the gospel of the age of fulfilment. With this term, and the use of masculine rather than neuter pronouns, the concept of the Spirit becomes more fully personal than at any other point in Scripture. The Paraclete is to be sent by God the Father in response to the prayer of Christ (14[16]), by Christ Himself (16[7]), by the Father in Christ's name (14[26]), or by Christ from the Father (15[26]). He is to represent and mediate the glorified Christ to His followers; He is to be the medium through whom they will enter into a full understanding of the historic revelation in the incarnate Christ, teaching and instructing them and through them witnessing to the world concerning Christ and the salvation and judgment that He has brought. As the Spirit of Christ, who is Himself the truth (14[6]), He is the Spirit of truth (14[17] 15[26] 16[13]) guiding Christ's disciples into all the truth as he unfolds the meaning of the revelation of God in Christ's deeds and words. He will mediate Christ's presence to them (cf 14[18]), bringing to their remembrance and instructing them in the full significance of the things which Jesus has said to them (14[26]). He will bear witness to Jesus, declaring to the disciples the meaning of His words and acts (16[12-15]) in a way which was impossible during the earthly ministry, and through their mission, especially under persecution, testifying to the hostile world (15[26]–16[4]). This mission of the Paraclete, like that of Jesus Himself, is two-sided; for to the world which has rejected Christ it brings judgment. He will convict the world in respect of the sin of its unbelief, in respect of the vindication of Jesus in His exaltation to the Father, and in respect of the condemnation of the devil through His death and glorification (16[8-11]). This cannot take place until Jesus has been exalted (16[7]), and it is after the resurrection (and probably the ascension) that Christ bestows the Spirit upon His disciples, extending to them the mission on which He had Himself been sent by the Father, and, in an act of new creation, empowering them to execute His own mission of forgiveness and judgment through their proclamation of the gospel (20[21-23]). This is the Johannine interpretation of 'Pentecost,' and, as in Acts, it is through the Spirit imparted by the glorified Messiah that the Church is commissioned for its task.

1 John lays stress on the 'abiding' of Christ in His people through the agency of the Spirit which He has given to them (1 Jn 3[24]), the Spirit being the assurance of the mutual indwelling of Christ and His followers (4[13]). The Spirit is the Spirit of truth, testifying to Christ in the sacraments of the gospel (5[6-8]), and the Spirit is the inward anointing of the messianic people, by which they are taught the truth of Christ (2[20-27]).

(v) *The Spirit in other NT writings.*—The rest of the NT adds little to the doctrine of the Spirit. (*a*) *The Pastoral Epistles.* Apart from a use of 'spirit' to denote the Divine being of Christ (1 Ti 3[16]; cf He 9[14], Ro 1[3], and of God, Jn 4[24]), the Spirit appears in these books as the Spirit of prophecy (1 Ti 4[1]), the inspiration of the ministers of the Church in their task of safeguarding the truth (2 Ti 1[14]), and as the agent and principle of the new life entered into in baptism (Tit 3[5]). (*b*) *The Epistle to the Hebrews.* The Christian gospel has been attested by the gifts of the Holy Spirit which have accompanied its reception (2[4]), and baptized Christians have been made 'partakers of the Holy Spirit' (6[4]). (*c*) 1 *Peter.* Christians are sanctified by the Spirit as the people of Christ (1[2]). The message of the prophets, before the gospel events, and that of the apostolic missionaries after it, are alike inspired by the Spirit (1[11f]). The Spirit is the principle of the resurrection life (4[6]; cf 3[18], of Christ); and those who suffer persecution for Christ receive a special blessing of the 'Spirit of glory' (4[14]). (*d*) *Jude.* The Christian life of faith and of prayer in the Holy Spirit is contrasted with the divisions set up by those worldly people who are devoid of the Spirit (19–20). (*e*) *Revelation.* In this book the Spirit is primarily regarded as the Spirit of prophecy, in whose power the seer sees and declares his revelations (1[10] 2[7] etc.). The Spirit in the Christian prophet bears testimony to Jesus (19[10]), and it is the Spirit in the Church which prays for the final consummation (22[17]).

(vi) *The Spirit and the Scriptures.*—The NT as a whole testifies to the belief that the prophetic writers of the OT were inspired by the Spirit. Ps 110[1] is cited with the introduction: 'David himself, in the Holy Spirit, declared' (Mk 12[36], Mt 22[43]), and similar language is used in relation to other OT quotations (*e.g.* Ac 1[16] 4[25] 28[25]). Ps 95[7-11] is introduced in the Epistle to the Hebrews (3[7]) with the words, 'Therefore, as the Holy Spirit says' (cf the way in which Jer 31[33] is introduced at 10[15]). Similarly, the typology of the Day of Atonement ritual is explained (9[8]) as a means by which the Holy Spirit indicates certain truths. Hence the NT conception of the work of the Spirit in the scriptural writers can be summed up by 2 Peter in the dictum that 'no prophecy of scripture is a matter of one's own interpretation, because no prophecy ever came by the impulse of man, but men moved by the Holy Spirit spoke from God.' J. G. S.—G. W. H. L.

HOMAM.—See HEMAM.

HOMER.—See WEIGHTS AND MEASURES.

HOMICIDE.—See CRIMES, 7, REFUGE [CITIES OF].

HOMOSEXUALITY.—The term 'homosexual' is found only in 1 Co 6[9] RSV (AV, RV 'abusers of themselves with mankind' or 'with men'). The practice is condemned in Ro 1[26f]. It is frequently referred to in OT, particularly in connexion with male prostitutes at shrines, and always stands under condemnation. See CRIMES AND PUNISHMENTS, 3.

HONEST, HONESTY.—In 2 Es 16[49] 'honest' (AV, RV) has the meaning of 'chaste' (RSV 'respectable'). Elsewhere it means either 'honourable' or 'becoming.' For the meaning 'honourable' compare Ru 1[22] Coverdale 'There was a kinsman also . . . whose name was Boos, which was an honest man'; and for 'becoming,' Is 52[1] Coverdale 'Put on thine honest rayment, O Jerusalem, thou citie of the holy one.' In RSV 'honest' has its modern sense in a number of passages. 'Honesty' in 1 Ti 2[2], its only occurrence in AV, means 'seemliness' (RV 'gravity,' RSV 'respectful'). In RSV in Gn 30[33] it has its modern sense (AV, RV 'righteousness').

HONEY.—The appreciation of honey by the Hebrews from the earliest times, and its abundance in Canaan, are evident from the oft-recurring description of that country as a 'land flowing with milk and honey' (Ex 3[8, 17] onwards). What is not so clear is precisely what is meant by 'honey.' Certainly sometimes bee-honey is meant, since it was found in hollow tree-trunks (1 S 14[26], but the Hebrew text here is uncertain), and in the dead body of an animal (Jg 14[8ff]). There is no mention of bee-keeping in the OT, so it is probable that all bee-honey mentioned in OT is the honey of the wild bee (see BEE). In later times, as is evident from the Mishnah, bee-keeping was widely practised by the Jews,

The hives were of straw or wicker-work. Before removing the combs the bee-keepers stupefied the bees with fumes of charcoal and cow-dung, burnt in front of the hives.

The Arabic *dibs*, however, is date-honey, and this was known in Mishnaic times (see article 'Honey' in *EBi* col. 2105, where details of manufacture are described both from dates and grape-juice). It is plain that the Hebrew *d^{e}bhash* is used of both types of honey. The honey which formed part of the first fruits presented at the sanctuary probably included both types, since both were liable to fermentation. The combination of 'milk and honey' suggests the honey of the wild-bee, but where we find the combination 'oil (olive) and honey' the reference is probably to date-juice, boiled and reboiled till its colour was a dark golden brown like maple molasses. Sugar was unknown in Bible times, and so 'honey' was used in the making of 'bakemeats' and all sorts of sweet cakes (Ex 16^{31}). Honey for domestic use was kept in earthen jars (1 K 14^{3} EV 'cruse'), in which, doubtless, it was also put for transport (Gn 43^{11}) and export (Ezk 27^{17}).

In addition to the proverbial expression of fertility above quoted, honey, in virtue of its sweetness, is frequently employed in simile and metaphor in Hebrew literature; see Ps 19^{10} 119^{103}, Pr 16^{24} 24^{13f}, Ca 4^{11} 5^{1}, Sir 42^{20} 49^{1} etc. A. R. S. K.—N. H. S.

HONOUR.—Various words are rendered by 'honour,' including Hebrew *hādhār* (*e.g.* Ps 8^{5}), *hôdh* (*e.g.* Ps 96^{6}), *y^{e}ḳār* (*e.g.* Est 1^{20}), *kābhōdh* (*e.g.* Nu 24^{11}, Pr 26^{8}), and *tiph'ereth* (*e.g.* Dt 26^{19}), and Greek *doxa* (*e.g.* 2 Co 6^{8}) and *timē* (*e.g.* Jn 4^{44}, 1 Co 12^{23f}). Several of these words are elsewhere rendered 'glory,' while related verbs are translated 'glorify' or 'honour.'

1. In OT honour is said to belong to God (Ps 104^{1}) and to His work (Ps 111^{3}), and to be His due (Pr 3^{9}). It should also be given to parents (Ex 20^{12}) and to the aged (Lv 19^{32}). It may be earned from others by righteousness (Pr 21^{21}), but true honour comes from God (1 S 2^{30}), who gives it to those who honour Him (*ibid.*), but withholds it from those who do wrong (2 Ch 26^{18}). Nevertheless, in his very manhood man is crowned with honour by God (Ps 8^{5}). Honour is not fitting for a fool (Pr 26^{1}).

2. In the Apocrypha the human race is said to be worthy of honour and unworthy of honour, those who fear the Lord being worthy of the honour and those who transgress unworthy (Sir 10$^{19-23}$). The honour of him who fears the Lord exceeds that of the nobleman, the judge, or the ruler (Sir 10^{24}). Humility and knowledge bring higher honour than wealth (Sir 10$^{28, 30}$), for a good name is more enduring than riches (Sir 41^{12f}), and death is preferable to dishonour (1 Mac 9^{10}). The fear of the Lord is the crown of wisdom (Sir 1^{18}), for God exalts them that hold her fast (Sir 1^{19}). The priest (Sir 7^{21}) and the physician (Sir 38^{1}) are to be held in honour, and wisdom deserves to be honoured by kings (Wis 6^{21}). The honour due to parents is stressed (Sir 3^{3ff}), and it is extended to parents-in-law (To 10^{12}).

3. In NT the honour due to parents is reaffirmed (Mt 15^{4} ||), and it is declared to be due to widows (1 Ti 5^{3}), to masters (1 Ti 6^{1}), and to the emperor (1 P 2^{17}). Marriage, too, is to be held in honour (He 13^{4}). Moreover, honour is due to Christ, and in honouring Him men honour God (Jn 5^{23}). As the Lamb that was slain He is worthy to receive honour (Rev 5^{12}), and is destined to receive it eternally (Rev 5^{13}). See also GLORY.

HOODS.—Only in Is 2^{23} AV, for which RV and RSV have rightly 'turbans.' See DRESS, **5** (*a*).

HOOK.—**1.** *wāw*, a hook or ring with a spike driven into wood, Ex 26^{32} etc. **2.** A hook for fishing or for dragging, Is 19^{8}, Job 41^{1}, Am 4^{2}, Mt 17^{27}. The hook used in fishing was of course attached to a line, but whether the latter was simply held in the hand or was attached to a rod cannot be decided.

HOOPOE (Lv 11^{19}, Dt 14^{18}).—The Hebrew *dûkhiphath* 'hoopoe' (RV, RSV with LXX and Vulgate), not 'lapwing' (AV), like the corresponding Coptic *koukoupat* and Latin *upupa* and other names, is an attempt to reproduce this bird's note, variously given as 'hoh-hoh' or 'pou-pou' or 'hoop-hoop' or the like. The hoopoe is a common visitor in spring to Palestine, where its striking plumage and tall crest and its odd movements make it conspicuous. Pleasing however as its appearance is, its habits are very different; and it was considered unclean because its nest is commonly foul, it picks up its food on dunghills, and its flesh, though tasty (being still eaten by peasants), is malodorous. E. W. G. M.—G. R. D.

HOPE.—A number of Hebrew words, ranging in meaning from 'trust' to 'expectation' are translated by 'hope' in EV, but the characteristic words are from the root *ḳwh* 'wait for, look eagerly for.' Some men hope for the wrong things and then their hope is 'stupidity' (*kesel*, Job 8^{13f}, RSV 'confidence'). True hope is in Yahweh (Ps 71^{5}) and in His word (Ps 119$^{74, 81, 114}$); its justification is the known character of God (Ps 130^{7}). *Individuals* hope for deliverance from enemies (Ps 71^{14}), from illness (Ps 31$^{14, 24}$ 39^{7}), from death (Ps 16^{9}, RSV 'dwells secure'), and for the forgiveness of sins (Ps 130^{5}), and in general for the reversal of their present unhappy circumstances (Ps 42^{5}). *Israel's* hope is that Yahweh will prove a saviour in time of trouble (Jer 14^{8}), even in the disaster of the Exile (Jer 29^{11} 31^{17}), and also will be found a refuge (AV 'hope') for His people in the day of eschatological judgment (Jl 3^{16}). But hope is not characteristically an eschatological word in OT. (The Hebrews did have eschatological expectations, and eagerly awaited their fulfilment—see DAY OF THE LORD, KINGDOM OF GOD, MESSIAH.)

When, however, we turn to NT we find the term 'hope' (Gr. *elpis*) is characteristically eschatological in content. It is significant that whereas in Greek thought *elpis* could denote an expectation of something good or bad and came increasingly to mean 'anxiety, fear,' in NT it always means a looking forward to something good and favourable. It is sometimes used in ordinary senses (*e.g.* Lk 6^{34}) but its distinctive sense is hope of salvation (1 Th 5^{8}). The ground of this hope is what God has done in Christ—in particular His overthrow of death by Christ's dying and rising again (1 P 1^{3}). Its content is that we too shall rise from death (Ac 23^{6}, Ro 8^{24}, Tit 1^{2} 3^{7}) and enter into the full inheritance of God's Kingdom (Eph 1^{18}, 1 Co 15^{50}). This is the 'hope of the gospel' (Col 1^{23}), *i.e.* the hope which the gospel brings to birth in us; and we may confidently entertain this hope because we already know the power of Christ working in us. Thus it is Christ in us who is Himself the author of our hope of glory (Col 1^{27}, 1 Ti 1^{1}). But this hope of salvation is not limited to the individual believer. His hope embraces the salvation of His fellow Christians (2 Co 1^{7}) and this implies a universal day of salvation, at the parousia of Christ (Tit 2^{13}). Thus our hope is for the re-creation of the whole universe and is cosmic in its scope (Ro 8$^{22-24}$).

To be a Christian means to possess this hope—non-Christians are characterized by the absence of it (Eph 2^{12}, 1 Th 4^{13}). Thus hope is one of the marks of a Christian and takes its place with faith and love as one of three distinctive Christian virtues (1 Co 13^{13}, 1 Th 1^{3}). It is a sure hope because we have an earnest of its fulfilment in that the love of God has been already poured into our hearts by the Holy Spirit (Ro 5^{5}). Indeed, it is a proleptic possession of the world to come, and anchors the soul firmly to that other world into which it has already entered (He 6^{19}). Paul recognizes that hope attained ceases to be hope (Ro 8^{24}) but in 1 Co 13^{13} he appears to say that while expository powers, glossolalia, earthly insights, will prove transient, hope like faith and love will always remain as characteristics of redeemed personality. Probably he meant that the Christian will never have fully attained all that God has to give and that there will always be something new and fresh to look forward to, expectantly and confidently. 'What no eye has seen, nor ear heard, nor the heart of

man conceived, what God has prepared for those who love him,' those are the riches of our inheritance in the saints, and we may expect never to exhaust them.
S. B. F.

HOPHNI AND PHINEHAS.—The two sons of Eli; they were priests in the sanctuary at Shiloh, where, in spite of the presence of their father, they carried on their evil practices. In consequence of their deeds a curse is twice pronounced upon the house of Eli, first by 'a man of God' (1 S 2^{27}) who is not named, and again by the mouth of Samuel (ch. 3). The curse was accomplished when Hophni and Phinehas were slain at the battle of Aphek, and the Ark of God was lost—an incident which was the cause of the death of Eli (ch. 4). The malpractices of these two consisted in their claiming and appropriating more than their due of the sacrifices ($2^{13, 17}$), and in their immoral actions in the Tabernacle (v.^{22}; cf Am 2^{7f}). W. O. E. O.

HOPHRA.—The Egyptian Wahebrē, Apries of Herodotus, fourth king of the 26th Dynasty (*c* 588–569 B.C.), and grandson of Neco, mentioned in Jer 44^{30}. He, or possibly his predecessor Psammetichus II., is also referred to as Pharaoh in Jer $37^{5, 7, 11}$, Ezk 29^{3} etc. Little is certainly known of his reign. He induced Zedekiah to join a coalition and to rebel against Babylon. Hophra must have been defeated by Nebuchadrezzar in Syria in attempting to resist the progress of the Babylonian army, and he received the fugitives from Palestine after the destruction of Jerusalem in 586 B.C. There is no evidence that Nebuchadrezzar plundered Egypt, as was anticipated by Ezekiel, though he seems to have attacked Hophra's successor Amasis in 568 B.C. with some success, and may have overrun some part of Lower Egypt. The Syrian and other mercenary soldiers stationed at Elephantine revolted in the reign of Hophra, but were brought again to submission. Another mutiny of the Egyptian soldiery, recorded by Herodotus, resulted in Amasis being put upon the throne as champion of the natives. Hophra relied on the Greek mercenaries, and maintained himself, perhaps in a forced co-regency, in Lower Egypt until the third year of Amasis, when he was defeated and slain. F. Ll. G.

HOPPER.—See Locust.

HOR.—1. A mountain 'on the edge of the land of Edom' (Nu 33^{37}), where Aaron died. Constant tradition, at least since Josephus, sees Mount Hor in *Jebel Hārûn*, 'the Mountain of Aaron,' above Petra. This is regarded by the Arabs as the mountain sacred to the great high priest, and his tomb is shewn and reverenced under a small dome on its summit. Some modern writers, especially H. C. Trumbull, have doubted the tradition and endeavoured to fix other sites, such as *Jebel Madeira*, NW. of '*Ain Qedeis*. *Jebel Hārûn* rises 4780 feet above the sea-level. Its western side is an unscalable precipice; it is ascended from the pass leading into Petra. A very wide view over the Arabian desert, down to the Red Sea and up to the Ghôr, is commanded from the summit. **2.** A mountain mentioned in Nu 34^{7f}, as in the northern boundary of the Promised Land. In all probability this is meant for *Hermon*. R. A. S. M.

HORAM.—A king of Gezer defeated and slain by Joshua, Jos 10^{33}.

HOREB.—See Sinai.

HOREM.—A city of Naphtali in the mountains, Jos 19^{38}; its location is unknown.

HORESH.—The word *hōresh* means 'wooded height' in Is 17^{9} (where, however, RVm and RSV follow LXX and read 'Hivites'), Ezk 31^{3}, 2 Ch 27^{4}, but in 1 S $23^{15f. 18}$ it is probably a proper name of a place where David took refuge (so RVm, RSV). It is perhaps modern *Kh. Khureisā*. See Forest.

HOR-HAGGIDGAD.—A station in the journeyings of the Israelites, Nu 33^{32f}. Probably identical with **Gudgodah**, q.v. It perhaps lay in the *Wâdī Khaḍākhid*.

HOR-HAGIDGAD, Nu 33^{32f} (AV).—See Hor-haggidgad.

HORI.—1. A son of Seir, Gn 36^{22}, 1 Ch 1^{39}. **2.** The father of Shaphat the Simeonite spy, Nu 13^{5}.

HORIMS, Dt $2^{12, 22}$ (AV) = **Horites** (q.v.).

HORITES.—The pre-Edomite inhabitants of Seir or Edom according to Gn 14^{6} and Dt $2^{12, 22}$, who were governed by chieftains (Gn 36^{29f}). The name Horites was formerly taken to mean 'cave-dwellers,' being derived from Hebrew *ḥôr*. This popular etymology is no longer accepted since the discovery of the Hurrians as an ethnic element in the Near East. The Hurrians entered northern and north-eastern Mesopotamia about the beginning of the 2nd millennium B.C., and later spread over the whole of Syria and Palestine with the result that the Egyptians frequently called Palestine *Kharu*. The Kingdom of Mitanni on the upper Euphrates was Hurrian, though its rulers were Indo-Europeans. The patriarchal stories of the Bible reflect many Hurrian customs and legal rights (Gordon, *BA*, iii [1940], 1–12). The Hurrian language, still incompletely understood, became first known through one of the Amarna Letters. Later on texts in the same language were found at Boghazköy, Ugarit, and elsewhere. The chief god of the Hurrians was Teshub, the god of thunder. S. H. Hn.

HORMAH ('devoted' or 'accursed') was a city, apparently not far from Kadesh, where the Israelites were overthrown, when, after the death of the ten spies, they insisted on going forward, Nu 14^{45}, Dt 1^{44}. At a later time it was taken and destroyed by Israel (Nu 21^{3}, Jos 12^{14}), this feat being attributed in Jg 1^{17} to Judah and Simeon. There we learn that the former name was **Zephath**. Possibly the memory of the previous disaster here led to its being called 'Accursed.' It was one of 'the cities belonging to the tribe of the people of Judah in the extreme South, towards the boundary of Edom,' and is named between Chesil and Ziklag (Jos 15^{30}), also between Bethul (or Bethuel) and Ziklag (Jos 19^{4}, 1 Ch 4^{30}) in the territory occupied by Simeon. It was one of the towns to which David sent a share of the booty taken from the Amalekites who had raided Ziklag in his absence (1 S 30^{30}). It is probably to be identified with modern *Tell el Mishâsh*. W. E.—H. H. R.

HORN (Heb. *keren*, Gr. *keras*).—Sometimes horns were wrought into vessels in which oil was stored (1 K 1^{39}) or carried (1 S 16^{1}). Probably with some dainty ornamentation, they were used to hold eye-paint (Job 42^{14}, *Keren-happuch*). Of rams' horns a kind of trumpet was made (Jos 6^{4}); see Music, **4** (2) (*e*). 'Horns' in poetry symbolized strength (Dt 33^{17} etc.). 'Horn' in Ps 18^{2} = 2 S 22^{3} stands for offensive weapons, as 'shield' for defensive (Perowne). To 'exalt one's horn,' or 'cause it to bud' (grow), is to strengthen and prosper him, 1 S 2^{10} (cf RSV 'to exalt the power'), Ezk 29^{21} etc. For one to 'lift his horn' is to be arrogant, Ps 75^{4f}. To crush or weaken one is to 'break *or* cut off his horn,' Jer 48^{25}, La 2^{3} (RSV 'might'). In prophetic symbolism horns stand for kings and military powers, Dn 7^{8} 8^{21} etc. The altar horns (Ex 27^{2}), to which fugitives seeking asylum clung (1 K 1^{50} etc.), were projections at the four corners, and apparently peculiarly sacred (Ex 30^{10} etc.); but their significance and use are now unknown. W. E.

HORN, LITTLE.—See Little Horn.

HORNED OWL.—See Owl.

HORNED SNAKE.—See Serpent.

HORNET (Ex 23^{28}, Dt 7^{20}, Jos 24^{12}).—In all three references the hornet is mentioned as an instrument of the Lord to drive out the Canaanites. By most interpreters a literal interpretation is accepted, but a metaphorical use of the word is contended for by some. Sayce suggested that the reference may be to the armies of Rameses III., as the standard-bearers wore two devices like flies, and Garstang has adopted a similar view that the hornet is a symbol for Egypt. The most plentiful hornet in Palestine is the *Vespa orientalis*. Hornets attack only when interfered with.

HORONAIM.—A city of Moab, mentioned in Is 15[5], Jer 48[3, 5, 34], and also on the Moabite Stone (ll. 31, 32). Its site is unknown.

HORONITE.—A title given to Sanballat (q.v.), the opponent of Nehemiah, Neh 2[10, 19] 13[28]. The name may denote an inhabitant of Beth-horon (q.v.).

HORSE.—Horses were introduced into the Near East early in the 2nd millennium, having earlier been domesticated in central Asia, apparently by Indo-Iranian wandering groups. They were used extensively by the Mitanni, who bred and trained them for chariot warfare; and also by the Hittites and Kassites. The Hyksos brought them to Egypt, where they proved extremely popular. By the middle of the 2nd millennium the war-horse and chariot were standard equipment in the armies of the Near East. Israelites were thus familiar with horses from the earliest times, but were slow in adopting them for use. The mountainous regions of Palestine were unsuitable for chariot warfare; likewise social and economic conditions before the monarchy were not favourable for the creation of a knightly caste or military élite such as developed among the Canaanites, and the surrounding peoples. With the monarchy a gradual change took place. David continued the practice of crippling horses captured in warfare, but kept a few for his newly-acquired chariotry (2 S 8[4], 1 Ch 18[4]). Solomon greatly added to their numbers, maintaining 40,000 stalls of horses for his chariots and 12,000 charioteers (according to 1 K 4[26]). Well-appointed royal stables dating from the 10th cent. have been unearthed at Megiddo, Hazor, and Gezer; doubtless other installations were scattered about the country. Moreover, Solomon conducted a brisk trade in horses and chariots: 'And Solomon's import of horses was from Egypt and Kue (Cilicia), and the king's traders received them from Kue at a price. A chariot could be imported from Egypt for 600 shekels of silver, and a horse for 150; and so through the king's traders they were exported to all the kings of the Hittites and the kings of Syria' (1 K 10[28f], 2 Ch 1[16f]). While the text is not entirely clear, it appears that Solomon and his agents acted as middlemen between Egypt and the north, transferring horses from Cilicia (which was famous for its mettlesome steeds) to Egypt, while the chariots moved in the opposite direction. There is no need, however, to change Egypt (*Miṣrayim*) to a so-called northern *Muṣri*.

The kings of Israel were warned against multiplying horses (Dt 17[16]). Trust in horses is put in antithesis to trust in the Lord (Is 30[16], Ps 20[7] 33[17]). Before the reforms of Josiah, horses sacred to the sun were kept in the Temple (2 K 23[11]; cf 11[16]). The appearance of the war-horse seems to have made a deep impression (Job 39[19–25], Jer 47[3], Nah 3[2] etc.). After the Exile horses were much more common: the returning Jews brought 736 horses with them (Neh 7[68]). Horses were fed on barley and *tibn* (chopped straw) in Solomon's time as in Palestine to-day (1 K 4[28]). Although the breeding of horses has become so intimately associated with our ideas of the Arabs, it would seem that during the whole OT period horses were unknown, or at least scarce, in Arabia. The equipment of horses is mentioned in the Bible—the bit and bridle (Ps 32[9], Pr 26[3]), bells of the horses (Zec 14[20]), and 'saddlecloths for riding' (Ezk 27[20]). In OT times they were apparently unshod (Is 5[28]). E. W. G. M.—D. N. F.

HORSE GATE.—See JERUSALEM [GATES OF].

HORSELEACH, Pr 30[15] (AV, RV).—See LEECH.

HOSAH ('refuge').—**1.** A Levitical doorkeeper of the Temple, 1 Ch 16[38] 26[10f, 16]. **2.** A city of Asher, apparently S. of Tyre, Jos 19[29]. The site is unknown.

HOSAI.—See HOZAI.

HOSANNA.—An acclamation used by the people on Palm Sunday in greeting Jesus on His last entry into Jerusalem, and afterwards by the children in the Temple (Mt 21[9, 15]). It occurs six times in the Gospels (all in the connexion above noted).

(1) The most usual view of its origin is as follows. In Hebrew the expression was *hôshî'āh-nnā'* (a strongly expressed imperative of the verb *to save*), used as an invocation of blessing, becoming *hosanna* when this popular cry was written in Greek. The same kind of thing has occurred with the Hebrew forms 'Amen' and 'Hallelujah.' When the word Hosanna passed into the early Church it was misunderstood as a shout of homage or greeting—'Hail' or 'Glory to.' The simplest form of the Palm Sunday greeting occurs in Mk 11[9] and Jn 12[13] 'Hosanna! Blessed be he who comes in the name of the Lord!' which really was the cry of the people. The additions that occur in the other passages ('Hosanna *to the Son of David*!' Mt 21[9, 15], and 'Hosanna in the highest!' Mt 21[9], Mk 11[10]) seem really to be later amplifications due to misunderstanding of the real meaning of Hosanna. The Hosanna cry (cf Ps 118[25f]) and the palm branches naturally suggest the Feast of Tabernacles, when the people used to raise the cry of 'Hosanna,' while marching in procession and waving branches of palm, myrtle, and willow. The great occasion for this was the seventh day of the Feast, when the Hosanna processions were most frequent. Hence this day was early designated 'Day of Hosha'na' [Hosanna], and the *lulab* branches then used also received the same name. Such processions were not peculiar to Tabernacles. They might be extemporized for other occasions of a joyous character (cf 1 Mac 13[51], 2 Mac 10[7]), and this was the case in the scene described in the Gospels. Hosanna passed early into liturgical use (cf *e.g. Didache* 10[6] 'Hosanna to the God of David'), as an interjection of praise and joy, and was developed on these lines. The early misunderstanding of its meaning was perpetuated.

(2) Over against that view is the possibility that the Aramaic word *'ûsha'nā'* (*power*) lies behind it, and that it really means 'Praise!' This would save us from having to suppose that the tradition behind Mk 11[10], Mt 21[9, 15] and the *Didache* betrays ignorance of some Hebrew origin of the word on the part of the earliest Church. It gives the good sense: 'Praise to the Son of David!' and 'Praise to the highest!' in these passages. N. T.

HOSEA.—The name of the prophet is identical with that of Joshua ('Yahweh delivers') in its original form (Nu 13[8]) and that of Hoshea, the last king of Israel (2 K 15[30]). The name Jesus is the Greek form of the word whose root meaning is 'space' or 'room,' hence 'deliverance' or 'salvation.' In the case of Hosea it is a name well bestowed, for he is essentially an evangelist, the prophet of grace. 'Ben Beeri' is probably not a true patronymic but may indicate the sept or family from which he came.

The one fact the prophet tells us concerning himself is that he married Gomer bath-Diblaim who bore him three children and was guilty of marital infidelity. Whether Diblaim is her father's name or the name of her birthplace remains uncertain. We learn further from the prophet's story that he belonged to the northern kingdom (1[2] 7[15]) for which his favourite name is Ephraim (it occurs thirty-six times in the book). His obvious interest in the hill-towns of Benjamin (Gibeah, Ramah, and Bethel [5[8]]) would seem to support the theory of Guthe and Hölscher that his home was in that fertile mountain strip of Benjamin overlooking the Jordan valley between Bethel and Jerusalem. This, too, would account for the apparent familiarity of Jeremiah with Hosea and for the influence which the latter has exercised upon the man of Anathoth. In addition it may be noted that Hosea follows the Elohistic traditions of Ephraim rather than those of the Judaean Yahwistic writer (2[15] [Heb. 2[17]] 9[15] 11[8] 12[9] [Heb. 12[10]]).

Concerning the date of his birth we are not informed, but his period of prophetic activity must be placed somewhere between 750 B.C. and the fall of Samaria

in 721 B.C. G. A. Smith would set the lower limit at 732 B.C. but Alt, Sellin, and Hölscher would allow the larger period. That he was called to be a prophet at some particular point of time is clearly indicated in the book though no precise date is given. Various opinions are held as to his occupation prior to his call. From the numerous references he makes to ovens and baking it has been thought that he was a baker. More probably, however, he was a small farmer living on the land. His speech smacks most frequently of the soil: he may have belonged to the solid yeoman class of Israel, a class which formed the backbone of the nation. Others have thought that he was member of the prophetic guilds (9^8): this might account for the note of asceticism in his prophecies, in which characteristic he resembles the Rechabites. Hosea does appear to accord a high place to the *Nᵉbhî'îm* ($12^{10,13}$ [Heb. $12^{11,14}$]) and he nowhere attacks the group in the manner of Amos. Sellin rightly calls him '*eine richtige Johannesnatur*.' Thus we can understand his impassioned style that oscillates between violent threats and tender promises and entreaties. Inasmuch as his prophecies are seldom provided with a definite location or with a particular audience some have thought of him as a wandering prophet after the style of Elijah and Elisha. It may be that many of his words were addressed to a small band of disciples.

Hosea may be said to differ from the other prophets in that the Divine revelation here is mediated through his tragic domestic experience. Here, as in the case of Jeremiah, who owes much to Hosea, human experience became the channel of the Divine revelation. 'He learned obedience by what he suffered.' And that this experience was profoundly real there can be no doubt. The attempt to interpret this life and blood story as an allegory finds little support: the general consensus of critical opinion is that we are here dealing with sordid solid facts. 'She was, therefore, no dream or fancy, this woman, but flesh and blood: the sorrow, the despair, the sphinx of the prophet's life, yet a sphinx who in the end yielded her riddle to love' (G. A. Smith). We may not doubt that Hosea's prophetic mission was most closely bound up with his tragic marital experience.

The story of that experience is told in ch. 1 and again in ch. 3: in the former instance we have a biographical account in the third person while in the latter the form is autobiographical. Much discussion has centred around the relation and interpretation of these two versions. Marti has maintained that (*a*) ch. 3 does not have reference to Gomer, (*b*) that, unlike ch. 1, ch. 3 is allegorical, (*c*) that ch. 3 formed no part of the original book of Hosea. Majority opinion, however, holds that both chapters deal with the same story: this seems the most satisfactory interpretation. A further suggestion has been made that Gomer was, before marriage, a temple prostitute, a hierodule in the service of heathen rites (T. H. Robinson). This suggestion has commended itself to many scholars, though it seems difficult to understand how the analogy which the prophet is setting up between Yahweh and Israel on the one hand and his own situation on the other hand can be properly maintained. Allwohn has suggested that Hosea was the victim of a strong sex obsession. Such has been found true in many cases, *e.g.* Augustine, Tertullian, but Allwohn does not make a good case here. It may be that one could say rather that in the case of the prophet, as contrasted with Gomer and the people Israel, the sex instinct was sublimated into love of God and of man for God's sake.

Both narratives indicate that Hosea received a command to marry a harlot (*'ēsheth zᵉnûnîm*). To modern minds such a command seems unworthy of God. This question raises difficulties. It may be that the prophet was so commanded: in view of the large amount of symbol and symbolic action in OT prophecy it is conceivable (Is 5, Jer 28, 32, Ezekiel *passim*). But it is also possible, and indeed more probable, that the prophet is here describing his experience from the viewpoint of later time when he had come to understand the meaning of his experience. He had discovered the gospel buried deep in, and built upon, his suffering. This was the Lord's doing and it was wonderful in his eyes. This seems natural when we recall the character of Hebrew thought and language. The Hebrew was so impressed with the idea of Divine sovereignty that he was constrained to describe as purpose that which we would call consequence or result (cf Is 6^{9f}, Jer 7^{10}, Ps 51^4). In these instances the writer seems to be looking back and interpreting experience: he is setting forth that which finally eventuated and declaring that to be the original purpose and plan of the Almighty. Thus we have the record as it is and we learn how in this instance the human experience of the prophet became the channel of the Divine revelation, and how that experience gave him insight into the Divine passion and the final intention of the Divine heart.

Thus Gomer may be regarded as pure and chaste before her marriage. But the prophet was to learn that all the time Gomer had within her latent potentialities which were later to become patent. There was within her the tendency to infidelity, the potentiality of becoming an *'ēsheth zᵉnûnîm*. That potentiality developed after her marriage and the sorrow of Hosea's life made plain to the prophet the sorrow of God over Israel, once His bride, but now become the vile strumpet of the Baalim. As to when Hosea perceived Gomer's infidelity we may not be certain. 1^2 might seem to class all the children as *yalᵉdhê zᵉnûnîm*, but it seems more probable, from the names given, that Gomer revealed her real nature after the birth of her first child (Jezreel). It may be inferred that Gomer left Hosea and went further on the path of shame. But it is clear that Hosea did not cease to love her. So deep and strong was his love that it could not be quenched by all the folly and waywardness of Gomer. Through that strong love and his deep passion Hosea came to understand the passion of God, and through the vision of the Divine love he was moved to the act of redemption (ch. 3).

We need not exaggerate the apparent differences between Amos and Hosea. Each spoke a word in season. Amos spoke of righteousness and Hosea spoke of mercy, for he saw beyond the fact of judgment to the triumph of grace. Amos's eyes were in the ends of the earth: the world was his parish. Hosea's heart's desire is that Israel may be saved and that God's bride may return to her first love. Amos is extensive while Hosea is intensive: none enters further into 'the secret of the Lord' or has such sympathy with the Divine *pathos* (Heschel). Hosea does not merely teach; he incarnates the Divine love. Only in Jeremiah may we find such spiritual fervour or an equal weight of passion. To know God and to serve Him with undeviating loyalty—that is religion (cf Jn 17^3). In Hosea we find the most profound conception of sin, of repentance, and forgiveness. In him hope is moralized by the prophet's revelation of the longsuffering of God, while social ethics are purified and elevated, as righteousness is completed in love. The succession of regicides on the throne of Israel induces despair of the monarchy and Israel's only hope is seen to be in faithful allegiance to her God and prevailing goodwill among men. Egypt or Assyria cannot avail: her only hope is in Yahweh. It may be noted that no prophet is more frequently quoted in the NT: more than thirty, direct or indirect, quotations from his book are found there. It is not too much to say that Hosea is the *fons et origo* of the entire faith and theology of later Israel and that he is the forerunner who prepared the way of the Lord. J. Pn.

HOSEA, BOOK OF.—The Book of Hosea forms the first section of a collection of prophetic writings which was formed after the Exile, probably towards the end of the 3rd cent. B.C., and entitled 'The Twelve Prophets.' The greater part of the Book of Hosea consists of the writings of Hosea, the son of Beeri, who prophesied about the middle of the 8th cent. B.C. (see preceding article), but it also contains material added by later

editors between the 8th and 3rd cents. B.C. It is not always possible to determine with certainty these additions and interpolations.

The Book of Hosea falls naturally into two unequal parts: (*a*) chs. 1–3, (*b*) chs. 4–14. In (*a*) the text is better preserved than in (*b*). In (*a*) we have a biographical (ch. 1) and autobiographical (ch. 3) account of Hosea's marriage, with a small collection of poems dealing with Yahweh's relation to Israel (ch. 2) as symbolized in chs. 1 and 3. At what date these chapters were committed to writing we may not be certain. Sellin and Eissfeldt would date them some five or seven years after Hosea's call to the prophetic office. These chapters may not have been actually written down by the prophet himself but were probably preserved at first in oral tradition. Oral tradition in the Near East may be regarded as strong and reliable as a written source: it was usually preserved in the memories and minds of disciple groups. The book as it now lies before us has come through the hands of Judaean editors, as is clear from the superscription in 1^1. These editors adapted the book to the needs of their time and it may have undergone more than one redaction. Nevertheless there is no reason to doubt the general authenticity of these three chapters. Except for a few minor additions (1^{10-21} [Heb. 2^{1-3}] 2^{21-23} [Heb. 2^{23-25}]) and the words 'and David their king' (3^5) we seem to have the genuine words of Hosea.

In (*b*) we have a series of oracles dealing with the sorry state of Israel's religious, social, and political life. Here the prophet utters denunciations of people, priests, and kings. In 4^{1-9} it is frequently difficult to delimit precisely the bounds of these several brief speeches, but in 9^{10}–14^8 [Heb. 14^9] we have mainly a group of poems dealing with historical retrospect and concluding with an added solemn appeal to lay all these words to heart. These poems are marked by a spirit of reflection and differ from the usual prophetic style in that they are not directly addressed to any particular group. It may be, as Sellin suggests, that they were addressed to a small band of the prophet's disciples. No dates are attached to these speeches but it may be that 4^{1-5} should be assigned to the time of Jeroboam II., while 5^{8-6} might well belong to the period of the Syro-Ephraimitic war. 6^{7-7^2} with 7^{3-7} may belong to the reign of Pekah, while 7^{8f} is probably to be set in the reign of Hoshea. The prophecy of judgment in 13^{15f} [Heb. 13^{15} 14^1] may be Hosea's last word of judgment in 725 B.C.

The text in 4^{1}–14^9 is frequently corrupt but interpolations and additions are not as numerous as was once thought. It is no longer possible, with Marti, Nowack, Hölscher, and Volz, to reject all prophecies of *Heil* in pre-exilic prophecy on the ground that these prophets spoke only of *Unheil*. Such a theory is no longer tenable and is to be rejected. The prophecies of weal follow on the prophecies of woe and this accords with a principle abundantly illustrated in the OT. Nor may we delete the frequent references to Judah throughout the book, save in some obvious instances ($1^{7, 11}$ [Heb. 2^2] 4^{15} $5^{5, 10, 12-14}$ $6^{4, 11}$ 8^{14} 11^{12} 12^2 [Heb. $12^{1, 3}$]). Additions seem to be present in $4^{3, 9}$ 7^{10} 14^{10} [Heb. 14^9].

Apart from these slight additions and interpolations the text has suffered considerably in the course of its transmission. The LXX shows considerable divergence and would seem to point to a text earlier than the MT. A critical text as given by G. A. Smith (*Book of the Twelve Prophets*) or the RSV is essential for a proper understanding of the book. J. Pn.

HOSEN.—The plural of 'hose' (cf 'ox,' 'oxen'), found only in Dn 3^{21} (AV and RV, but for different words), and now obsolete in the sense, here intended, of breeches or trousers. The articles of dress intended are uncertain. RV 'hosen' is rendered 'coats' in AV, and 'mantles' in AVm, RSV. AV 'hosen' is rendered 'tunics' by RV, RSV. According to an early tradition (LXX *tiara*), some form of headdress is intended (cf RVm 'turbans'), but modern opinion favours 'coats' or 'tunics' as in RV.

HOSHAIAH ('Y" has saved').—**1.** A man who led half the princes of Judah in the procession at the dedication of the walls of Jerusalem, Neh 12^{32}. **2.** The father of Jezaniah (Jer 42^1; so Hebrew followed by AV, RV; RSV Azariah), or Azariah 43^2.

HOSHAMA.—A descendant of David, 1 Ch 3^{18}.

HOSHEA.—**1.** See JOSHUA. **2.** An Ephraimite (1 Ch 27^{20}). **3.** One of those who sealed the covenant (Neh 10^{23}). **4.** The last king of Israel. Two dates are given for the accession of the latter to the throne, but we know now from the Assyrian records that this occurred in 732 B.C. His immediate predecessor, Pekah (q.v.), with his ally Rezin, king of Aram, attacked Ahaz, king of Judah, who immediately appealed for help to Tiglath-pileser (q.v.) of Assyria, and this was promptly forthcoming (2 K 16^{5-9}; Isa 7^{1-9}). The Assyrian armies swept over Israel (2 K 15^{29}), Pekah was deposed and slain, and Hoshea, the leader of the pro-Assyrian faction, was made king (2 K 15^{30}), but under the suzerainty of Assyria, with heavy tribute to pay from year to year (2 K 17^3). For a few years he remained loyal to Assyria, but presently he grew tired of the burden and defaulted in 724 B.C., relying on the very dubious offer of help from So (q.v.), so-called king of Egypt. The new king of Assyria (Shalmaneser V.) moved quickly; he captured and imprisoned Hoshea, and he laid seige to the capital, Samaria. It speaks well for the strength of Samaria and for the courage of its people that the city held out for more than two years, falling at last early in 721 B.C. The surrender was followed by the deportation of a considerable portion of the population and the planting of foreign colonists in their place (2 K $17^{6, 24}$). Sargon, who succeeded to the Assyrian throne just before the surrender, had no desire to experiment further with vassal kings, so he set an Assyrian governor over the wasted province. Thus ended the kingdom of Israel. H. P. S.—T. J. M.

HOSPITALITY.—In the life of the East there are no more attractive features than those that centre in the practice of hospitality. The virtue of hospitality ranked high in the ancient Orient, and the laws regulating its observance hold undisputed sway in the desert still. The pleasing picture of the magnanimous sheikh, bidding strangers welcome to his tent and to the best he owns (Gn 18), is often repeated to this hour in the Arabian wilderness. It was to Lot's credit and advantage that he had preserved this virtue amid the corruptions of Sodom (Gn 19^{2ff}). To shirk an opportunity for its exercise was shameful (Jg $19^{15, 18}$). A man's worth was illustrated by his princely hospitality (Job 31^{31f}). Jesus sent forth the Twelve (Mt 10^{9f}), and the Seventy (Lk 10^{4ff}), relying on the hospitality of the people. Its exercise secured His blessing; woe threatened such as refused it. The Samaritans' churlish denial of hospitality to Jesus excited the wrath of His disciples (Lk 9^{53}). The guest had a right to expect certain attentions (Lk 7^{44ff}). The practice of hospitality distinguished those on the right from those on the left hand (Mt 25^{35}; cf 10^{40}, Jn 13^{20}). It is commended by precept (Ro $12^{13, 20}$, 1 Ti 3^2 etc.), and also by example (He 13^2).

Hospitality was highly esteemed amongst other ancient peoples. In Egypt its practice was thought to favour the soul in the future life. By kindness to strangers the Greeks secured the approval of Zeus Xenios, their protector. For the Romans hospitality was a sacred obligation.

In its simplest aspect, hospitality is the reception of the wayfarer as an honoured guest, providing shelter and food. In the ancient, as indeed for the most part in the modern, Orient, men journey only under necessity. Travel for purposes of pleasure and education is practically unknown. Save in cities, therefore, and in trading centres along the great highways, there was little call for places of public entertainment. Villages probably always contained what is called the *medāfeh*—properly *madyafah*—a chamber reserved for guests, whose entertainment is a charge upon the whole community.

From personal experience the present writer knows how solicitous the humblest villagers are for the comfort and well-being of their guests. If the chief man in a village be well off, he greatly adds to his prestige by a liberal display of hospitality.

In the desert, every tent, however poor its owner, offers welcome to the traveller. In the master's absence the women receive the guests, and according to their means do the honours of the 'house of hair.' It is the master's pride to be known as a generous man; any lack of civility or of kindness to a guest meets severe reprobation. In the guest's presence he calls neither his tent, nor anything it contains, his own. During his sojourn the visitor is owner. The women bake bread; the master slays a 'sacrifice,' usually a lamb, kid, or sheep, which is forthwith dressed, cooked, and served with the bread. The proud son of the wilds has high ideas of his own dignity and honour; but he himself waits upon his guest, seeking to gratify with alacrity his every wish. If his visitors are of superior rank he stands by them (Gn 18^{8}), and in any case sits down only if they invite him. The safety and comfort of the guests are the first consideration; many place them before even the honour of wife and daughter (Gn 19^{8}, Jg 19^{24}; cf Lane, *Mod. Egyp.* 297). If a guest arrives after sunset he is entitled only to shelter, as the host might then be unable to prepare a meal creditable to himself. If food is offered, it is of the host's goodwill (Lk 11^{5ff}). The guest, careful of the host's honour, will indicate that more than he requires has been provided by leaving a portion in the dish.

The open hand, as the token of a liberal heart, wins the respect and esteem of the Arabs. Leadership does not of necessity descend from father to son. Right to the position must be vindicated by wisdom, courage, dignity, and not least by generous hospitality. For the niggard in this regard there is nothing but contempt. It is a coveted distinction to be known as a 'coffee sheikh,' one who without stint supplies his visitors with the fragrant beverage.

The Arabs are sometimes charged with want of gratitude; justly, as it seems from our point of view. But what seems ingratitude to us may be due simply to the influence of immemorial custom, in a land where the necessities of life are never sold, but held as common good, of which the traveller may of right claim a share. The 'right of a guest' may be taken, if not freely offered. The man who refuses covers himself with perpetual shame. The guest enjoys only *his right*; therefore no thanks mingle with his farewell.

The right, however, is limited. 'Whoever,' says the Prophet, 'believes in God and the day of resurrection must respect his guest; and the time of being kind to him is one day and one night; and the period of entertaining him is three days; and if after that he does it longer, he benefits him more: but it is not right for the guest to stay in the house of his host so long as to incommode him' (Lane, *Arabian Society in the Middle Ages*, 143). After three days, or, some say, three days and four hours, the host may ask if he proposes to honour him by a longer stay. The guest may wish to reach some point under protection of the tribe. If so, he is welcome to stay; only, the host may give him work to do. To remain while refusing to do this is highly dishonourable. But the guest may go to another tent at the expiry of every third day, thus renewing his 'right,' and sojourn with the tribe as long as is necessary.

Hospitality involves protection as well as maintenance. 'It is a principle alike in old and new Arabia that the guest is inviolable' (W. R. Smith, *Kinship*^{2}, 48). That this provision applies to enemies as well as to friends shows the magnanimity of the desert law. Every stranger met in the open is assumed to be an enemy: he will owe his safety either to his own prowess or to fear that his tribe will exact vengeance if he is injured. But the stranger who enters the tent is *daif Ullah*, the guest whom God has sent, to be well entreated for His sake. In an enemy's country one's perils are over when he reaches a tent, and touches even a tent peg. A father's murderer may find sure asylum even in the tent of his victim's son. When he has eaten of the host's bread, the two are at once bound as brothers for mutual help and protection. It is said that 'there is salt between them.' Not that literal salt is required. This is a term covering milk, and indeed food of any kind. A draught of water taken by stealth, or even against his will, from a man's dish, serves the purpose. When protection is secured from one, the whole tribe is bound by it (W. R. Smith, *RS*^{2} 76).

To understand this we must remember (1) that in Arabia all recognition of mutual rights and duties rests upon kinship. Those outside the kin may be dealt with according to each man's inclination and ability. (2) Kinship is not exclusively a matter of birth. It may be acquired. When men eat and drink together, they renew their blood from the one source, and to that extent are partakers in the same blood. The stranger eating with a clansman becomes 'kinsman' to all the members of the clan, as regards 'the fundamental rights and duties that turn on the sanctity of kindred blood' (Wellhausen *Reste Arab. Heid.* 119 f; W. R. Smith, *RS*^{2} 273 n.) This sanctity may be traced to the ancient belief that the clan god shared its life, and when an animal was slain for food took part in the common meal. The clan's friends were therefore the god's friends, whom to injure was to outrage the deity. That the slaughter of the victim was a religious act involving the whole kin is borne out (*a*) by the fact that when an animal is slain all have an undisputed right to come to the feast; (*b*) by the name *dhabīhah*, 'sacrifice,' still applied to it. The present writer was once entertained in the camp of a rather wild and unkempt tribe. His attendants supped with the crowd. Fearing this might not be agreeable to a European, the chief's son, who presided in his father's absence, with innate Arab courtesy, asked him to sup with him in the sheikh's tent. Bringing in a portion of the flesh, the youth repeatedly remarked, as if for the stranger's reassurance, *edh-dhabīhah wāhideh*, 'the slaughtering—sacrifice—is one'; *i.e.* the tribesmen and he ate from the same victim.

The bond thus formed was temporary, holding good for 36 hours after parting. By frequent renewal, however, it might become permanent. 'There was a sworn alliance between the Lihyan and the Mostalic: they were wont to eat and drink together' (*RS*^{2} 270 f). A man may declare himself the *dakhīl*—from *dakhala*, 'to enter,' *i.e.* to claim protection—of a powerful man, and thus pass under shelter of his name even before his tent is reached. Whoever should injure him then would have to reckon with the man whose name he had invoked. The rights of sanctuary associated with temples, and until recently with certain churches, originated in an appeal to the hospitality of the local deity. The refugee's safety depended on the respect paid to the god. Joab would have been safe had he not outlawed himself in this regard (1 K 2^{31ff}). Jael's dastard deed could be approved only in the heat of patriotic fanaticism (Jg 4^{17} 5^{24}).

In OT times it can hardly be said that inns in the later sense existed. The ordinary traveller was provided for by the laws of hospitality. The *mālôn* of Gn 42^{27} etc. was probably nothing more than a place where caravans were accustomed to halt and pass the night. A building of some kind may be intended by the 'lodge of wayfaring men' in the wilderness (Jer 9^{2}). For *gērûth* (Jer 41^{17}) we should probably read *gidrôth*, 'folds' (cf Jos. *Ant.* x. ix. 5 [175]). Great changes were wrought by Greek and Roman influence, and there can be no doubt that in NT times, especially in the larger centres of population, inns were numerous and well appointed. The name *pandocheion*=Arabic *funduq*, shows that the inn was a foreign importation. Those on the highways would in some respects resemble the *khāns* of modern times, and the buildings that stood for centuries on the great lines of caravan traffic, before the sea became the highway of commerce. These were places of strength, as

well as of entertainment for man and beast. Such was probably the inn of the Good Samaritan (Lk 10^{34}), identified with *Khān Hadrūr*, on the road to Jericho. The inns would be frequented by men of all nationalities and of all characters. Rabbinical references show that their reputation was not high. It was natural that Christians should, for their own safety, avoid the inn, and practise hospitality among themselves (1 P 4^{9} etc.).

In Lk 2^{7} 'inn' (*kataluma*) probably means, as it does in Mk 14^{14} and Lk 22^{11}, the **guest-chamber** in a private house. Such guest-chambers were open freely to Jews visiting Jerusalem at the great feasts (*Aboth R. Nathan*, cap. 34). It is reasonable to suppose that they would be equally open on an occasion like the registration, requiring the presence of such numbers. If Joseph and Mary, arriving late, found the hoped-for guest-chamber already occupied, they might have no resort but the *khān*, where, in the animals' quarters, Jesus was born. W. E.

HOST.—See next article and ARMY.

HOST OF HEAVEN.—The phrase 'host (or army) of heaven' occurs in the OT in two apparently different senses—referring to (1) stars and (2) angels.

1. The 'host of heaven' is mentioned as *the object of idolatrous worship*; it is frequently coupled with 'sun and moon,' the stars being obviously meant; where 'sun and moon' are not specifically mentioned, the phrase may nevertheless include them. The worship of the astral bodies in Palestine from long before the Israelite occupation is indicated in the place-names Bethshemesh and Jericho, in theophoric names of local Amorite chiefs mentioned in the Egyptian Execration Texts from *c* 1850 B.C., and possibly in fragments of mural frescoes from the end of the 3rd millennium at *Teleilât el-Ghassûl*, E. of the mouth of the Jordan. Dt 4^{9} speaks of this worship as a special temptation to Israel; it has been appointed or allotted 'to all the peoples,' *i.e.* the heathen, and is absolutely inconsistent with the worship of Yahweh; the penalty is stoning (17^{3}). The references to it suggest that it became prominent in Israel in the 7th cent. B.C., when Manasseh introduced it to the Temple (2 K 21^{5}); its abolition was part of Josiah's reform ($23^{4f., 12}$). The mention, in the last verse, of 'the altars which were on the roof of the upper chamber of Ahaz' suggests that the worship was, in fact, older than the reign of Manasseh, and had been practised by Ahaz; it was carried on on the roofs of houses (Jer 19^{13}, Zeph 1^{5}), so that 2 K 23^{12} may well refer to it. The 'sun-pillars' which Isaiah (17^{8}) mentions as characteristic of the idolatry of Ahaz' reign, are now known to be incense-altars, with nothing essentially to do with sun-worship. 2 K 17^{16}, which speaks of the worship of the host of heaven as prevalent in the Northern Kingdom, is a 'Deuteronomic' passage, which can hardly be pressed historically. Whilst, then, there are early traces of this type of nature-worship, the systematized worship of the 'host of heaven' belongs to the period of special Assyrian and Babylonian influence, as the names *Sakkuth* (AV 'the tabernacle,' RV Siccuth) and *Kaiwan* (AV, RV Chiun) in Am 5^{26} show, these being well known as names of the Assyrian god Ninib, manifest in the planet Saturn.

The phrase is used in other contexts of the stars as *the armies of Yahweh*, innumerable, ordered, and obedient (Gn 2^{1}, Ps 33^{6}, Is 34^{4} 45^{12}, Jer 33^{22}), Is 40^{26} coming very near to personification. In Dn 8^{10} the assault of 'the little horn' on the 'host of heaven' and the stars, together with the passage in Rev 12^{4}, clearly refers to a myth, where the dragon or serpent of Chaos menaces the celestials, the stars being regarded as animate warriors of Yahweh their captain. The reference in Jg 5^{20} to the stars in their courses fighting against Sisera may be an allusion to the same mythology, though we think it more likely that the allusion is to a rain-storm, the Râs Shamra texts referring to the stars as the source of rain. The parallelism in Job 38^{7} between 'the morning stars' and 'the sons of God,' alludes to a creation myth, and is elucidated by one of the Râs Shamra texts, which describes the procreation of the Morning and Evening Star by the senior god El. D. Nielsen in his study of South Arabian religion (much later attested than the religion of Israel) has familiarized us with a well-developed astral religion and with the conception of creation as procreation. In the OT passages, such personifications, whatever their origins, are merely poetic figures. A striking instance of the poetic use of pagan mythology is Is $14^{12ff.}$, where Babylon is compared to 'the Bright One, Son of the Dawn' who had aspired to exalt his throne 'above the stars of God,' but had fallen to lowest Hell. This is now elucidated by the Râs Shamra text which describes the discomfiture of the god Athtar, well known from other Semitic sources as the Venus-star, in his attempt to fill the throne of Baal. Rev $9^{1, 11}$ apparently makes use of the same myth; cf also Lk 10^{18}.

2. Passages such as these lead to the consideration of others where 'host of heaven'=angels. The chief is 1 K 22^{19} (Micaiah's vision); cf Ps 103^{21}, Lk 2^{13}. Though this actual phrase is not often used, the attendant ministers of Yahweh are often spoken of as an organized army (Gn 32^{2}, Jos 5^{14}, 2 K 6^{17}, Job 25^{3}). Cf in this connexion the title 'Lord of hosts (Sabaoth),' which, though it may have been originally used of Yahweh as leader of the armies of Israel, admittedly came to be used of him as ruler of the celestial hosts (see LORD OF HOSTS). There are passages where the phrase 'host of heaven' is ambiguous, and may refer either to stars or angels (Dn 4^{35}, Neh 9^{6}, Ps 148^{2} [where it connects angels and sun, moon, and stars]).

3. Regarding the *connexion between the two uses of the phrase*, it has been supposed by some to be merely verbal, stars and angels being independently compared to an army; it has also been suggested that the stars were 'the visible image' of the host of angels. But a study of the passages cited above will probably lead to a conclusion that the connexion is closer. The idolaters evidently regard the stars as animate; the poets of Israel seem to do so too. This being so, the assimilation of the stars to the angels is natural. The question is as to the extent to which the Hebrew poets used the mythological matter figuratively. Wis 13^{2} protests against any idea that the heavenly bodies are animate, and it has been suggested that Ezekiel's avoidance of the phrase 'Lord of hosts' may be due to a fear of seeming to lend any countenance to star-worship. C. W. E.—**J. Gr.**

HOTHAM.—1. An Asherite, 1 Ch 7^{32}. Perhaps this name should be read in v.^{35} for **Helem** (see HELEM, **1**). **2.** Father of two of David's heroes, 1 Ch 11^{44} (AV **Hothan**).

HOTHAN, 1 Ch 11^{44} (AV).—See HOTHAM, **2.**

HOTHIR.—A son of Heman, 1 Ch $25^{4, 28}$.

HOUGH.—See HOCK.

HOUR.—See TIME.

HOUSE.—The history of human habitation in the Near East goes back to the Paleolithic (Old Stone) Age, at least 200,000 years ago (see G. Ernest Wright, *Biblical Archaeology*, 1957, 29–33). The excavations and discoveries, especially during the 1920's and 1930's, have introduced us to the pre-historic inhabitants who lived in caves near Bethlehem, in the Galilee region and near Mount Carmel (see D. A. E. Garrod and D. M. A. Bate, *The Stone Age of Mount Carmel*, 1937). Skeletal and other remains have also been discovered in Palestine that date from the Mesolithic and Neolithic periods. During the latter period, and at least as early as 6000 B.C., man had advanced sufficiently in such places as Jericho to build towns with well-constructed homes having plastered floors and being surrounded by a strong defensive wall of stone. Elsewhere in Palestine some communities still dwelt in the natural limestone caves in which Palestine abounds. In the historical period underground **Caves** (for descriptions and diagrams of some of the more celebrated, see Schumacher,

Across the Jordan, 135–270; Bliss and Macalister, *Excavations in Palestine*, 204–270; M. S. and J. L. Miller, *Encyclopedia of Bible Life*, 233 ff) were used by the Hebrews as places of refuge in times of national danger (Jg 6^{2}, 1 S 13^{6}) and religious persecution (2 Mac 6^{11}, He 11^{38}). But it is not with these, or with the **Tents** in which the patriarchs and their descendants lived before the conquest of Canaan, that this article has to deal, but with the houses of clay, stone, and wood which were built and occupied after that epoch.

1. Materials.—The most primitive of all the houses (apart from caves) for which man has been indebted to his own inventiveness is that formed of a few leafy boughs from the woods or forests, represented in Hebrew history to this day by the **booths** of OT (see BOOTH). Of more permanent habitations, the earliest of which traces have been discovered are probably the **mud huts**, whose foundations were found by Macalister in the lowest stratum at Gezer, and which were regarded by him as the work of the cave dwellers of the Late Stone Age (*PEFSt*, 1904, 110; cf various reports by John Garstang, and later by Kathleen Kenyon, on the Neolithic houses at Jericho). **Clay** in the form of bricks, either sun-dried or, less frequently, baked in a kiln (see BRICKS) and **Stone** (Lv 14^{40ff}, Is 9^{10} etc.), have been in all ages the building materials of the successive inhabitants of Palestine. Even in districts where stone was available, as at the Moabite capital, Dibon, modern *Dhîbân*, the more tractable material was sometimes preferred. Houses built of crude brick are the ' houses of clay,' the unsubstantial nature of which is emphasized in Job 4^{19f}, and whose walls a thief or another could easily dig through (Ezk 12^{5}, Mt 6^{19f}).

Excavations at such places as Gezer, Taanach, Jericho, and Ezion-geber have shown that there is no uniformity in the size of bricks, which are both rectangular and square in shape, although bricks manufactured in one place at a particular time are quite similar. Bricks were found at Taanach measuring roughly 21 inches by 15¾ and 4¾ inches in thickness. At Gezer a common size was a square brick 15 inches in the side and 7 inches thick (*PEFSt*, 1902, 319). In the Neolithic levels at Jericho, cigar-shaped bricks were found that measured about 17 by 5 by 5 inches being marked by the two thumbs of the manufacturer forming a kind of herring-bone pattern (see *BASOR*, No. 127, 1952, p. 12) along the length of the brick. In the Mishnah the standard size is a square brick 9 inches each way (three hand-breadths), although the mention of a half-brick suggests a variation in size (*Erubin*, i. 3).

The stone used for house building varied from common field stones and larger, roughly shaped, quarry stones to the carefully dressed **wrought stone** (*gāzîth*, 1 K 5^{17} RV), ' dressed stones ' RSV) or ' costly stones, hewn according to measure, sawed with saws, back and front,' (7^{9} RSV), such as was used by Solomon in his building operations. Similarly rubble, wrought stone, and brick are named in the Mishnah as the building materials of the time (*Baba bathra*, i. 1). For **mortar** clay was the usual material, although the use of **bitumen** (q.v.) was not unknown (Gn 11^{3} AV, ' slime,' RSV ' bitumen '). **Wood** as a building material was employed mainly for roofing, and to a less extent for internal decoration (see below). Mud brick walls were often built on stone foundations.

2. General plan of Hebrew houses.—Excavations at Gezer, and more recently at Jericho, Megiddo, Beth-shean, and Kiriath-sepher (*Tell beit Mirsim*) have shown that the simplest type of house in Palestine has scarcely altered in any respect for four thousand years. Indeed, its construction is so simple that the possibility of change is reduced to a minimum. In a Palestinian village of modern times the typical abode of the *fellah* consists of a walled enclosure, within which is a small court closed at the farther end by a house of a single room. This is frequently divided into two parts, one level with the entrance, assigned at night to the domestic animals, cows, ass, etc.; the other, about 18 inches higher, occupied by the owner and his family. A somewhat better class of house consisted of two or three rooms, of which the largest is the family living and sleeping room, a second was assigned to the cattle, while a third serves as general store-room (AV **closet**). Houses of both rectangular and rounded shapes have been found at Jericho, Megiddo, and Beth-shean, although a rectangular plan was most common. The arrangement of rooms and courtyards changed somewhat, probably under Mesopotamian, Hyksos, and Egyptian influence, during the course of the centuries (see Millar Burrows, *What Mean These Stones?*, 1941, 116–136), and in some periods and places houses of more than one storey were constructed. They were often crowded closely together as at Ezion-geber. It is thought that an impression of the external appearance of early houses can be secured by a study of the ossuaries (chests for the bones of the dead) that were fashioned in the shape of miniature houses.

The Canaanite houses, which the Hebrews inherited (Dt 6^{10f}) and copied, are now known to have been arranged on similar lines (see the diagram of a typical Canaanite house in Gezer, restored by Macalister in his *Bible Sidelights from Gezer*, 1906, fig. 25, and Burrows, *op. cit.*, figs. 6, 8, 11). As in most Near Eastern domestic architecture, the rooms were built on one or more sides of an open **court** (2 S 17^{18}, Jer 32^{2} etc.). These rooms were of small dimensions, 12 to 15 feet square as a rule, with which may be compared the legal definition of ' large ' and ' small ' rooms in the late period of the Mishnah. The former was held to measure 15 feet by 12, with a height, following the model of the Temple (1 K 6^{2ff}), equal to half the sum of the length and breadth, namely 13½ feet; a ' small ' room measured 12 feet by 9, with a height of 10½ feet (*Baba bathra*, vi. 4). Ruined houses excavated by modern archaeologists seldom have the upper sections of the walls and the roofs standing, so there is uncertainty concerning the appearance of the upper parts of the dwellings.

Should occasion arise, through the marriage of a son, or some other need, to enlarge the house, this was done by building one or more rooms on another side of the court. In the case of a ' man of wealth ' (1 S 9^{1} RSV), the house would consist of two or even more courts, in which case the rooms about the ' inner court ' (Est 4^{11}) were appropriated to the women of the family, although in such cases the dwellings might better be designated ' palaces ' than ' houses.' The court, further, often contained a **cistern** to catch and retain the precious supply of water that fell in the rainy seasons (2 S 17^{18}, RSV ' well '). For the question of an upper storey see **4.**

3. Foundation and dedication rites.—In building a house, the first step was to dig out the space required for the foundation (cf Mt 7^{24ff}), although, as archaeology has demonstrated, simple houses were often built by levelling off the debris of a previous occupation and placing the stone or brick on the surface. After this came the ceremony of the laying of the **foundation stone**, the ' precious cornerstone, of a sure foundation ' Is 28^{16} (cf CORNER-STONE). ' The day of the foundation ' (2 Ch 8^{16}), as we learn from the poetic figure of Job 38^{6ff}, was, as it is at the present day, one of great rejoicing (cf Ezr 3^{11}). The festivities at the beginning of a domestic dwelling were doubtless less impressive than those which accompanied the building of a palace or temple.

With the exception of a passage to be cited presently, the OT is silent regarding a foundation rite on which some light has been cast by excavations in modern Palestine. It is now probable that the Canaanites, and the Hebrews after them, did, on occasion, consecrate the foundation of a new building by a **human sacrifice.** The precise details of the rite are still uncertain, but there is some evidence to show that, down even to ' the latter half of the Hebrew monarchy ' (*PEFSt*, 1903, 224), it was a frequent practice to bury infants, whether alive, after previous sacrifice, or when deceased from natural

causes is still doubtful, in large jars ' generally under the ends of walls,—that is, at the corners of houses or chambers or just under the door jambs ' (*ibid.* 306). At Megiddo the first excavators found the skeleton of a girl of about fifteen years, who had probably been built alive into the foundation of a fortress ; at Taanach was found one of about ten years of age ; and skeletons of adults and children have also been discovered in or near houses at Jericho, *Teleilât el-Ghassûl*, Byblos (Gebal), and other sites. Later excavators at Megiddo and other Palestinian sites also discovered infant burials in jars but held that these were not cases of infant sacrifice (see C. C. McCown, *The Ladder of Progress in Palestine*, 1943, 59, 176).

An interesting development of the rite of **foundation sacrifice** can be traced from the 15th cent. B.C. onwards. With the jar containing the body of the victim there were at first deposited other jars containing jugs, bowls, and a lamp, perhaps also food, as in ordinary burials. Gradually, it would seem, lamps and bowls came to be buried alone, as substitutes and symbols of the human victim, most frequently a lamp within a bowl, with another bowl as covering. Full details of this curious rite cannot be given here, but no other theory so plausible has yet been suggested to explain these ' lamp and bowl deposits ' (see Macalister's reports in *PEFSt*, from 1903—especially pp. 306 ff with illustrations—onwards, also his *Bible Sidelights*, 165 ff ; Vincent, *Canaan*, 50 f, 192, 198 ff). The only reference to a possible foundation sacrifice in OT is the case of Hiel the Bethelite, who rebuilt Jericho and ' laid its foundation at the cost of Abiram his first-born, and set up its gates at the cost of his youngest son Segub ' (1 K 16^{34} RSV). Although this may refer to foundation sacrifices, it is also possible that some accident befell the sons of Hiel which was attributed to the power of the curse of Joshua (Jos 6^{26}).

A rite of formal **dedication** of a private house is attested by Dt 20^{5}, although the references in Hebrew literature to the actual ceremony are confined to sacred and public buildings (Lv 8^{10ff}, 1 K $8^{1ff, 10ff}$, Ezr 6^{16f}, Neh 3^{1} 12^{27}, 1 Mac 4^{52ff}). It is not improbable that some of the human victims above alluded to may have been offered in connexion with the dedication or restoration of important buildings (cf 1 K 16^{34} above). In the light of Gn 22^{13} which reports Abraham's sacrifice of a ram instead of his son Isaac, and in view of the fact that the death of Hiel's sons may be open to different interpretations, it is probable that the Hebrews at an early date rejected the practice of human sacrifice and employed other ways of dedicating their homes and public buildings.

Judging from the ideas and practice of the Bedouin when a new tent or ' house of hair ' is set up, we might seek the explanation of the rite of foundation sacrifice—a practice which obtains among many races widely separated in space and time—in the desire to propitiate the spirit whose abode is supposed to be disturbed by the new foundation (cf Trumbull, *Threshold Covenant*, 46 ff) ; it may also involve the wish to secure the spirit of the victim as the tutelary genius of the new building. An ancient custom still survives in the sacrifice of a sheep or other animal, which some would consider indispensable to the safe occupation of a new house in Moslem lands, and even to the successful inauguration of a public work, such as a railway or electric lighting installation. In the words of an Arab sheikh : ' Every house must have its death—man, woman, child, or animal ' (Curtiss, *Primitive Semitic Religion To-day*). However, the OT descriptions of dedicatory rites suggest that the elements of thanksgiving to the Lord and community rejoicing came to have a prominent place.

4. Details of construction, walls, and floor.—The **walls** of Canaanite and Hebrew houses were for the most part, as we have seen, of crude brick or stone. At *Tell el-Ḥesī* (first incorrectly identified as Lachish), for example, the excavators found at one period house walls of ' dark-brown clay with little straw ' ; at another, walls of ' reddish-yellow clay, full of straw ' (Bliss, *A Mound of Many Cities*, 44). At Gezer Macalister found a wall that was ' remarkable for being built in alternate courses of red and white bricks, the red course being four inches in height, the white five inches ' (*PEFSt*, 1903, 216). At *Teleilât el-Ghassûl*, many mud-brick walls from before 3400 B.C., covered with fresco paintings in several colours were found by the excavators (see W. F. Albright, *The Archaeology of Palestine*, 1954, 66 ff). As a rule, however, house walls were unpainted ; the Gezer house walls consisted ' of common field stones, among which dressed stones—even at corners and door posts—are of the rarest possible occurrence. The joints are wide and irregular, and filled with mud packed in the widest places with smaller stones ' (*ibid.* 215). The explanation of this simple architecture is that in early times each family built its own house, expert **builders** (Ps 118^{22}) or **masons** (see ARTS AND CRAFTS, 3) being employed only on royal residences, city walls, and other buildings of importance. Hence squared and dressed stones are mentioned in OT only in connexion with such works (1 K 5^{17}, 7^{9}) and the houses of the wealthy (Am 5^{11}, Is 9^{10}). In the Gezer houses of the post-exilic period, however, ' the stones are well dressed and squared, often as well shaped as a modern brick ' (*PEFSt*, 1904, 124, with photograph, 125). Between these two extremes are found walls of rubble, and quarry stones of various sizes, roughly trimmed with a hammer. Mud was used as **mortar** ; it was not until Roman times that a more substantial bonding material was used. In the Early Iron period (1200–900 B.C.), Israelite houses were not as well constructed as they had been in the previous period, evidence that the newcomers had to learn a new art (see Burrows, *op. cit.* 124). Improvement in house construction continued until the Roman period when very substantial homes were erected. In early Israelite times when trees were more common than they are now in the region, some houses were built of wood (cf 2 Sam 7^{2}).

In many houses the thickness of the outside walls varied from 18 to 24 inches ; that of partition walls, on the other hand, did not exceed 9 to 12 inches. In NT times the thickness varied somewhat with the materials employed (see *Baba bathra*, i. 1). It is probable that the **corner stone** mentioned in Ps 118^{22} and NT passages (see CORNER) has reference to the foundation stone at the corner of two walls, not to a stone in the topmost course of masonry.

The inside walls of stone houses received a **' plaster '** (RSV) of clay (Lv 14^{41ff}, AV ' dust,' RV ' mortar '), or, in the better houses, of lime or gypsum (Dn 5^{5}, ' plaster ' RSV). The ' untempered mortar ' of Ezk 13^{11}, 22^{28} was some sort of **whitewash** applied to the outside walls, as is attested for NT times (Mt 23^{27}, Ac 23^{3}, ' you whitewashed wall ! '). In the houses of the wealthy, as in the Temple, it was customary to line the walls with cypress (2 Ch 3^{5}, EV ' fir '), cedar, and other valuable woods (1 K $6^{15, 18}$ 7^{7}). The ' cieled houses ' of AV and RV (Jer 22^{14}, Hag 1^{4} etc.) are houses panelled with wood in this way (see CEILED). The acme of elegance was represented by cedar panels inlaid with ivory (see SAMARIA), such as earned for Ahab's pleasure palace the name of ' the ivory house ' (1 K 22^{39}), and incurred the denunciation of Amos (Am 3^{15}). We also hear of the panelled ceilings of the successive Temples (1 K 6^{15}, 2 Mac 1^{16}, RSV).

The **floors** of the houses were in all periods made of hard beaten clay, the permanence of which to this day has proved to the excavators a precious indication of the successive occupation of the buried cities of Palestine. As early as the Neolithic period at Jericho excellent plastered floors were constructed. Public buildings have been found paved with slabs of stone. The better sort of private houses were no doubt, like the Temple (1 K 6^{15}), floored with cypress and other woods which were subject to decay or plundering long before the appearance of archaeologists.

The presence of **vaults** or **cellars**, in the larger houses

at least, is shown by Lk 11[33] RSV. The excavations also show that when a wholly or partly ruined town was rebuilt, the houses of the older stratum were frequently retained as underground storerooms of the new houses on the higher level. The reference in 1 Ch 27[27f] to wine and oil 'cellars' (RSV) is to 'stores' of these commodities and does not indicate whether the places of storage were underground or simply in storerooms in the palace.

5. The roof.—The ancient houses of Canaan, like their modern representatives, had flat **roofs**, supported by stout wooden **beams** laid from wall to wall. Across these were laid smaller **rafters** (Ca 1[17]), then brushwood, reeds, and the like, above which was a layer of earth several inches thick, while on the top of all came a thick plaster of clay or of clay and lime. It was such a roofing (AV **tiling**, RSV **tiles**, Lk 5[19]) that the friends of the paralytic 'broke up' in order to lower him into the room below (Mk 2[4]). The wood for the roof-beams was furnished mostly by the common sycamore, cypress (Ca 1[17]), and cedar (1 K 6[9]) being reserved for the homes of the wealthy. Hence the point of Isaiah's contrast between the humble houses of crude brick, roofed with sycamore and the stately edifices of hewn stone roofed with cedar (Is 9[10]). Although most houses had flat roofs, some were gabled, and others were approached by outside stairs (see Burrows, *op. cit.* 116, 130; K. Galling, *Biblisches Reallexikon*, 1937, 266–274), and doubtless consisted of two or three storeys.

It was, and is, difficult to keep a flat roof watertight in the rainy season, as Pr 27[15] shows. At *Tell beit Mirsim* and other excavated sites, **stone rollers** were found that doubtless were used to roll the roofs after they were repaired prior to the approach of the rainy seasons. In several houses at Gezer a primitive drain of jars was found for carrying the water from the leaking roof (Ec 10[18] RV) through the floor to the foundations beneath (*PEFSt*, 1904, 14, with illustration). In the Mishnah there is mention of at least two kinds of spout or **gutter** (2 S 5[8] AV, but the sense here is doubtful and may have reference to 'water shaft,' RSV) for conveying the rain water from the roof to the cistern. Evidence has accumulated in recent years showing that even in the smallest houses it was usual to have the beams of the roof supported by a row of wooden posts, generally three in number, resting on stone bases, 'from 1 foot 6 inches to 2 feet in diameter' (*PEFSt*, 1904, 115, with photograph). The same method was adopted for the roofs of large public buildings (see Bliss, *A Mound of Many Cities*, 91 f, with plan); Macalister has ingeniously explained Samson's feat at the temple of Dagon, by supposing that he slid two of the massive wooden pillars (Jg 16[29f]) supporting the portico from their stone supports, thus causing its collapse (*Bible Sidelights*, 136 ff with illustration).

The roof was required by law to be surrounded by a **battlement**, or rather a **parapet**, as a protection against accident (Dt 22[8]). Access to the roof was apparently obtained, as at the present day, by an **outside stair** leading from the court. In 1 K 6[8] the AV mentions **winding stairs** as a part of the Temple; RSV has 'stairs' in view of the fact that winding stairs are unknown for the period of Solomon; some sort of inner stair is required by the reference to the secret trap-door in 2 Mac 1[16], and seems to be implied in 1 K 6[8]. The roof or **housetop** was put to many uses, domestic (Jos 2[6]) and other. It was used, in particular, for recreation (2 S 11[2]) and for sleeping (1 S 9[25f]), also for prayer and meditation (Ac 10[9]), lamentation (Is 15[3], Jer 48[38]), and even for idolatrous worship (Jer 19[13], Zeph 1[5]). For these and other purposes a tent (2 S 16[22]) or a booth (Neh 8[16]) might be provided, or a permanent **roof-chamber** might be erected. Such were the 'roof chambers with walls' (2 K 4[10], RSV) erected for Elisha, the 'summer **parlour**' (Jg 3[20], literally as RSV, 'cool roof chamber') of Eglon, and the '**loft**' (RSV 'upper chamber') of 1 K 17[19].

Otherwise the houses of Palestine were, as a rule, of one storey. Exceptions were confined to the houses of the great, and to crowded cities like Jerusalem and Samaria. Ahaziah's upper chamber in the latter city (2 K 1[2]) may well have been a room in the second storey of the royal palace, where was evidently the lattice or window from which Jezebel was thrown (9[33]). The same may be said of the 'upper room' in which the Last Supper was held (Mk 14[15]; cf Ac 1[13]). It was a Greek city, however, in which Eutychus fell from a window in the '**third story**' (Ac 20[9] RSV).

6. The door and its parts.—The door consisted of four distinct parts: the **door** proper, the **threshold**, the **lintel** (Ex 12[7] RSV), and the two **doorposts**. The first of these was of wood, and was hung upon projecting pivots of wood, the **hinges** of Pr 26[14], which turned in corresponding sockets in the threshold and lintel respectively. Like the Egyptians and Babylonians, the Hebrews probably cased the pivots and sockets of heavy doors with bronze; those of the Temple doors were sheathed in gold (1 K 7[50]). In the Hauran, doors of a single slab of stone with stone pivots are still found *in situ*. Many stone door sockets from houses of Biblical times have been found (see G. A. Barton, *Archaeology and the Bible*, 1933, 171 f). **Folding doors** are mentioned only in connexion with the Temple (1 K 6[34]).

The **threshold** (Jg 19[27], 1 K 14[17] etc.) or sill must have been invariably of stone. Among the Hebrews, as among so many other peoples of antiquity, a special sanctity attached to the threshold (see Trumbull, *The Threshold Covenant, passim*). The **doorposts** or jambs were square posts of wood (1 K 7[5], Ezk 41[21]) or of stone. The command of Dt 6[9], 11[20] gave rise to the practice, still observed in many Jewish houses, of enclosing a piece of parchment containing the words of Dt 6[4–9] 11[13–21] in a small case of metal or wood, which is nailed to the doorpost, hence its modern name *mezūzāh* ('doorpost').

Doors were locked (Jg 3[23f]) by an arrangement similar to that still in use in Palestine (see the illustration in Hastings' *DB* ii. 836). This consists of a short upright piece of wood, fastened on the inside of the door, through which a square wooden **bolt** (Ca 5[5], Neh 3[3] RSV, for AV **lock**) passes at right angles into a socket in the jamb of the door. When the bolt is shot by the hand, three to six small iron pins drop from the upright into holes in the bolt, which is hollow at this part. The latter cannot now be drawn back without the proper **key**. This is a flat piece of wood—straight or bent as the case may be—into the upper surface of which pins have been fixed corresponding exactly in number and position to the holes in the bolt. The person wishing to enter the house puts 'his hand to the latch' (Ca 5[4] RSV), and inserts the key into the hollow part of the bolt in such a way that the pins of the key will displace those in the holes of the bolt, which is then easily withdrawn from the socket and the door is open.

In the larger houses it was customary to have a man (Mk 13[34]) or a woman (2 S 4[6] RSV, Jn 18[17]) to act as a **doorkeeper** or **porter**. In the palaces of royalty this was a military duty (1 K 14[27]) and an office of distinction (Est 2[21] 6[2]).

7. Lighting and heating.—The ancient Hebrew houses must have been very imperfectly lighted. Indeed, it is almost certain that, in the poorer houses at least, the only light available was admitted through the doorway (cf Sir 42[11] [Hebrew text], 'Let there be no casement (lattice) where thy daughter dwells'). In any case, such windows as did exist were placed high up in the walls, at least six feet from the ground, according to the Mishnah. We have no certain monumental evidence as to the size and construction of the **windows** of Hebrew houses (but see for a probable stone window-frame, 20 inches high, Bliss and Macalister, *Excavs. in Palest.* 143 and pl. 73). They may, however, safely be assumed to have been much smaller than those to which we are accustomed, although the commonest variety, the *ḥallôn*, was large enough to allow a man to pass through going out (Jos 2[15], 1 S 19[12]) or in (Jl 2[9]). Another variety ('*arubbāh*) was evidently smaller, since it is used

also to designate the holes of a dovecot (Is 60[8] RSV ' windows '). These and other terms are rendered in our versions by ' window,' **lattice,** and **casement** (Pr 7[6] AV, window and casement, RSV, window and lattice). None of these, of course, was filled with glass. Like the windows of Egyptian houses, they were doubtless closed with wood or lattice-work, which could be opened when necessary (2 K 13[17]). An obscure expression in 1 K 6[4] is rendered ' windows of narrow lights ' (AV), ' windows of fixed lattice-work ' (RV), ' windows with recessed frames ' (RSV). The Hebrew is uncertain but may have reference to windows designed for defensive purposes with a large opening on the inside narrowing to a small slit on the outside through which arrows could be shot by the defender but not by the attacker. During the hours of darkness, light was supplied in the houses by the small oil lamp which was kept continually burning (see LAMP).

Most of the houses excavated show a depression of varying dimensions in the floor, either in the centre or in a corner, which, from the obvious traces of fire, was clearly the family **hearth** (Is 30[14]). Wood was the chief **fuel** (see COAL), supplemented by withered vegetation of all sorts (Mt 6[30]), and probably, as at the present day, by dried cow and camel dung (Ezk 4[15]). The **oven** was a portable jar or terra cotta receptacle, which could be heated and in which bread was baked. The pungent smoke, which was trying to the eyes (Pr 10[26]), escaped by the door or by the window; the **chimney** of Hos 13[3] (AV) is properly ' window ' (RSV) or ' casement ' (*ʾarubbāh*, see above). In the cold season the upper classes warmed their rooms by means of a **brazier** (Jer 36[22f] RSV), or **fire-pan** (Zech 12[6] RV, AV ' hearth of fire,' RSV ' blazing pot ').

8. Furniture of the house.—In early times this included only a few simple items. Even at the present day the *fellahîn* sit and sleep mostly on **mats** and mattresses spread upon the floor. So the Hebrew will once have slept, wrapped in his *śimlāh* or cloak as ' his only covering ' (Ex 22[27]), while his household gear will have consisted mainly of the necessary utensils for the preparation of food, to which the following section is devoted. Under the monarchy, however, when a certain ' wealthy woman ' of Shunem proposed to furnish ' a small roof chamber with walls ' for Elisha, she named ' a bed, a table, a chair, and a lamp ' (2 K 4[10], RSV), and we know otherwise that while the poor man slept on a simple mat of straw or rushes in the single room that served as living- and sleeping-room, the well-to-do had not only **beds** but **bedchambers** (2 S 4[7], 2 K 11[2], Jth 16[19] etc.). The former consisted of a framework of wood, on which were laid **cushions** (Am 3[12] RV, RSV noting uncertainty of Hebrew renders ' part ' of a bed), and ' coverings, coloured spreads of Egyptian linen ' (Pr 7[16] RSV). We hear also of the ' bed's head ' (Gn 47[31]) or curved end, as figured by Wilkinson, *Anc. Egyp.* i, 416, fig. 191 (where note the steps for ' going up ' to the bed; cf 1 K 1[4]). Probably both because of its size and its iron framework, Hebrew tradition remembered the bedstead of iron which belonged to Og (Dt 3[11]). **Bolsters** have rightly disappeared from RV and RSV, which render otherwise (see 1 S 19[13] 26[7] etc.); the **pillow** also from Gn 28[11, 18] and Mk 4[38] (RSV here, ' cushion '), and where it is retained, as 1 S 19[13], the sense is doubtful. Reference may be made to the richly appointed bed of Holofernes, with its gorgeous **canopy** (Jth 10[21] 13[9] thought by some scholars to be a **mosquito curtain**).

The bed often served as a **couch** by day (Ezk 23[41], Am 3[12] RSV—see also MEALS, 3), and it is sometimes uncertain which is the more suitable rendering. In Est 1[6], for example, RSV rightly substitutes ' couches ' for ' beds ' in the description of the magnificent divans of gold and silver in the palace of Ahasuerus (cf 7[8]). The wealthy contemporaries of Amos had their beds and couches inlaid with ivory (Am 6[4]), and furnished, according to RV, with ' silken cushions ' (3[12], but see RSV).

As regards the stool above referred to, and the seats or chairs of the Hebrews generally, it must suffice to state that the seats of the contemporary Egyptians (for illustrations see Wilkinson, *op. cit.* i, 408 ff) and Assyrians were of two main varieties, namely, **stools** and **chairs.** The former were constructed either with a square frame or after the shape of our camp-stools; the latter with a straight or rounded back only, or with a back and arms. The Hebrew word for Elisha's stool is always applied elsewhere to the seats of persons of distinction and the thrones of kings; it must therefore have been a chair rather than a stool, although the latter is its usual meaning in the Mishnah (Krengel, *Das Hausgerät in der Mishnah*, 10 f—a mine of information regarding the furniture, native and foreign, to be found in Jewish houses in later times). **Footstools** were also in use (2 Ch 9[18] and often, especially in metaphors).

The **tables** were chiefly of wood, and, like those of the Egyptians (Wilkinson, *op. cit.* i, 417 f with illustrations), were ' round, square, or oblong,' as the Mishnah attests. They were relatively much smaller and lower than ours (see, further, MEALS, 4). A remarkable wooden table resembling a large, modern tray was found in one of the tombs near ancient Jericho (*Tell es-Sulṭân*).

The fourth article in Elisha's room was a **lampstand** (RSV) rather than a **candlestick** (AV), for which see LAMP. In OT the lampstand is named only in 2 K 4[10] as being in a house; elsewhere it is part of the furnishing of a place of worship. It would extend this article beyond due limits to discuss even a selection from the many other articles of furniture, apart from those reserved for the closing section, which are named in Biblical and post-Biblical literature, or which have been brought to light in surprising abundance by recent excavations. Mention can be made only of articles of toilet, such as the ' molten **mirror** ' of Job 37[18] (AV **looking-glass,** actually a polished metal mirror), the cosmetic palette (2 K 9[30], a stone dish for antimony or colouring with which to paint the face), pins and needles, of which many specimens in bone, bronze, and silver have been found; of the distaff, spindle, and loom (see SPINNING AND WEAVING), for the manufacture of the family garments, and the chest for holding them, and finally, of the children's cradle (Krengel, *op. cit.* 26), and their toys of clay and bone.

9. Utensils connected with food.—Conspicuous among the ' earthen vessels ' (2 S 17[28]) of every household was the waterjar or **pitcher** (*kadh*)—the **barrel** of 1 K 18[33] (AV), **jar** (RSV)—in which water was carried from the village well (Gn 24[15], Mk 14[13], and often). From this smaller jar, carried on head or shoulder, the water was emptied into the larger **waterpots** of Jn 2[6]. Large jars were also required for the household provisions of wheat and barley—one variety in NT times was large enough to hold a man; equally large storage jars from the Early Bronze Age have been found. Other such jars held the store of olives and other fruits. The Dead Sea Scrolls were found in jars that were covered with ceramic lids (see *BASOR*, No. 125, 1952, 5–7); the kiln in which they were probably fired has been excavated at Qumrân in the vicinity of the caves. The **cruse** was a smaller jar with one or two handles, used for carrying water on a journey (1 S 26[11f], 1 K 19[6], ' cruse,' AV, ' jar,' RSV), also for holding oil (1 K 17[12], ' cruse,' AV, RSV). The potter's earthen **flask** (Jer 91, 10, RSV, ' earthen bottle,' AV) was a water decanter, the Hebrew name of which may have been derived from the gurgling sound made by the water when poured out. Pilgrim flasks, a kind of canteen, have also been found. (See, further, POTTERY, and the elaborate studies, with illustrations, of the thousands of ' potter's vessels ' which the excavations have brought to light, as published in the various reports, and also Bliss and Macalister, *Excavations in Palestine*, 1898–1900, pp. 71–141, with plates 20–55; Vincent, *Canaan d'après l'exploration récente*, 1907, pp. 296–360, with the illustrations there and throughout the book; G. E. Wright, *The Pottery of Palestine from the Earliest Times to the end of the Early Bronze Age*, 1938.)

The **bucket** of Nu 24[7], Is 40[15] was a water-skin probably adapted, as at the present day, for drawing water by having two pieces of wood inserted crosswise at the mouth. The main use of skins among the Hebrews, however, was to hold the wine and other fermented liquors. The misleading rendering **bottle** of AV is retained by RSV only in Ps 33[7] 56[8] where the Hebrew is uncertain but might better be translated 'flask' or 'jar.' Elsewhere, 'bottles' of AV properly become '**wineskins**' in RSV as can be judged by context (Jos 9[4, 13], Mt 9[17]). For another use of skins see MILK. 'After the water-skins,' says Doughty, 'a pair of **millstones** is the most necessary husbandry in an Arabian household,' and so it was among the Hebrews, as may be seen in the article MILL.

No house was complete without a supply of **baskets** of various sizes and shapes for the bread (Ex 29[23]) and the fruit (Dt 26[2]), and even in early times for the serving of meat (Jg 6[19]). Among the 'vessels of wood' of Lv 15[12] was the indispensable wooden bowl, which served as a **kneading bowl** (Ex 12[34] RSV, '**kneading-trough**' AV), and various other **bowls**, such as the 'lordly bowl' of the nomad Jael (Jg 5[25]) and the bowl of Gideon (6[38]), although the bowls were mostly of earthenware (see BOWL).

As regards the actual preparation of food, apart from the **oven** (for which see BREAD), our attention is drawn chiefly to the various members of the pot family, so to say. Four of these are named together in 1 S 2[14], the *kiyyôr*, the *dûdh*, the *ḳallahath*, and the *pārûr*, rendered respectively the **pan**, the **kettle**, the **cauldron**, and the **pot**. Elsewhere these terms are rendered with small attempt at consistency; while a fifth, the most frequently named of all, the *sîr*, is the **fleshpot** of Ex 16[3], the 'great pot' of 2 K 4[38], and the 'pot' or 'cauldron' of Jer 1[13]. In what respect these differed it is impossible to say. The *sîr* was evidently of large size and made of bronze (1 K 7[45]), while the *pārûr* was small and of earthenware, hence ben-Sirach's question: 'What fellowship hath the (earthen) pot with the (bronze) cauldron?' (Sir 13[2], Hebrew text, RSV: 'How can the clay pot associate with the iron kettle?'). The *kiyyôr*, again, was wide and shallow, rather than narrow and deep. Numerous illustrations of cooking-pots from OT times may be seen in the works above referred to. See also James L. Kelso, *The Ceramic Vocabulary of the Old Testament*, *BASOR*, Sup. St. Nos. 5 and 6, 1948, 1–48. The only cooking utensils known to be of iron are the **griddle** (Lv 2[5] RSV, 'pan' AV, 'baking-pan' RV), probably a shallow iron plate (see Ezk 4[3]), and the **frying-pan** (Lv 2[7]). A **knife**, originally of flint (Jos 5[2]) and later of bronze, was required for cutting up the meat to be cooked (Gn 22[6, 10], Jg 19[29]), and a **fork** for lifting it from the pot (1 S 2[13], 'a fleshhook of three teeth' AV; 'a three-pronged fork' RSV). See FLESHHOOK.

In the collection of pottery figured in Bliss and Macalister's work, and in other publications of pottery from recent excavations in Palestine, one must seek the counterparts of the various dishes, mostly wide, deep bowls, in which we read of food being served, such as the '**dish**' from which the sluggard is too lazy to withdraw his hand (Pr 19[24] RSV), and the plates of Nu 7[13] (RSV, 'chargers' AV), although here they are of silver (see, further, MEALS, **5**). Excavators have found an almost endless variety of **cups**, some for drawing the 'cup of cold water' from the large water-jars, others for wine—**flagons**, jugs, and juglets. The material of all these will have ascended from the coarsest earthenware to bronze (Lv 6[28]), and from bronze to silver (Nu 7[13], Jth 12[1]), and gold (1 K 10[21], Est 1[7], the latter 'goblets' RSV), according to the rank and wealth of their owners, and the purposes for which they were designed. Mention should be made of the exquisite egg-shell, painted bowls of ceramic ware produced by the Nabataeans in the Roman period at Petra, Dibon, and elsewhere.

10. Objects of personal adornment.—In addition to the above, houses are often found by the excavators to contain objects of personal adornment such as sea shells, bracelets, finger rings, bead necklaces, earrings, armlets, and seals (Nu 31[50]). Wearing apparel has long since disappeared, but some impression of its appearance can be gained by a study of its representation in early Near Eastern art. See especially James B. Pritchard, *ANEP*, 1954, 1–70. A. R. S. K.—W. L. R.

HOZAI.—A personal name in RV of 2 Ch 33[19], where AV, RVm, and RSV have 'the Seers,' following LXX. AVm has **Hosai** and RSVm Hozai. A person of this name is not known otherwise.

HUKKOK.—A place near Tabor on the west of Naphtali, Jos 19[34]. It may be the present village *Yāqûq* near the edge of the plateau to the NW. of the Sea of Galilee.

HUKOK.—See HELKATH.

HUL.—The eponym of an Aramaean tribe, Gn 10[23] 1 Ch 1[17]; its location is quite uncertain.

HULDAH (? 'weasel').—'The prophetess, wife of Shallum, keeper of the wardrobe,' living in a part of Jerusalem called the *Mishneh* (RV, RSV 'second quarter'; AV 'the college'), whose advice Josiah sought, by a deputation of his chief ministers, on the alarming discovery of the 'book of the law' in the Temple, in 621 B.C. (2 K 22[14ff], 2 Ch 34[22ff]). Her response was threatening for the nation, in the strain of Jeremiah, while promising exemption to the pious king. Huldah ranks with Deborah and Hannah among the rare women-prophets of the OT. G. G. F.

HUMILITY.—To the modern ear, the term 'humility' is apt to suggest self-effacement, the depreciation of oneself. This connotation has more in common with the thought of ancient Greece and Rome than with the Bible. The pagan world, despite its vaunted humanism, regarded the very conditions of finite existence as a stigma. From Homer to Marcus Aurelius, it was haunted by the refrain, 'Better never to have been born.' Humility therefore consisted in the acknowledgment of the wretchedness of the human condition. When the Delphic Oracle enjoins, 'Know thyself,' it does not mean, as popular interpretation would have it, 'Engage in critical introspection'; it means, 'Understand your insignificance as a human being.' The person who foolishly imagines himself to be of any ultimate importance becomes, like the hero of tragic drama, the unwitting agent of his own downfall.

In the Bible, too, 'the pride of men shall be humbled' (Is 2[11]), but the sense is quite different. Metaphysically considered, man is, as the pagan confessed, mere dust of the ground (Gn 3[19], Is 40[6f]). On the Hebraic view, however, the value of a thing did not derive from its constituent elements, but from the will of God. A thing or person had value if it found favour in the eyes of the Lord. Whether or not human existence was a blessing or a curse depended entirely upon God's attitude towards the human race. St. John's answer to this question speaks for the entire Bible, from Genesis to Revelation: 'God so loved the world that he gave his only Son, that whoever believes in him should not perish, but have eternal life' (Jn 3[16]).

Thanks to the unaccountable fact of God's favourable disposition towards mankind, human existence has value without limit. In the classic OT expression, man was made in the image of God (Gn 1[26] 9[6]). This exaltation of the human status reaches its climax in the NT, which declares that the character of God Himself can be fully known only in a particular human life. Small wonder that Jew and Christian appeared to the educated pagan as anything but humble! To him, the prophetic exhortation to 'walk humbly with your God' (Mic 6[8]) would be a contradiction in terms. The idea of walking with God at all would seem presumptuous in the extreme.

Within the Biblical frame of reference, humility is not primarily an attitude towards oneself at all, but towards God and towards other persons. Briefly, it means the willingness to let God be God; that is, to acknowledge

one's dependence upon His creative power; to rejoice in gratitude for His blessings; to adopt the ways of the Lord as one's own; to accept in contrition the judgment of God when one falls short; to trust His power and willingness to forgive and to redeem. The 'broken spirit' (Ps 51[17]) commended by the psalmist makes no claim upon God, but acknowledges Him alone as the final arbiter of good and evil. When Adam and Eve ate of the tree of knowledge of good and evil, they usurped this prerogative (Gn 2[17] 3[5]). From the Biblical point of view, the pagan devaluation of human life is not humble at all, but arrogant. It presumes to contradict God's declaration that His creation is 'very good' (Gn 1[31]).

In relations between persons, humility is again not primarily an attitude towards oneself, but towards others. By no means is it a synonym for selflessness (a word which does not occur in the Bible) or for a divinely sanctioned inferiority complex. Far in advance of Friedrich Nietzsche, the prophets knew that an attitude of 'lowlier than thou' is but a covert form of 'holier than thou.' Biblical humility entails the recognition of others as invited guests at the Lord's own banquet table. The result is a regard for the will, the purposes, the feelings of others for which the pagan had no rationale. Since, according to him, his fellow men were of so little consequence, he had no compunction about 'lording it over them' (Mt 20[25]) wherever possible. By contrast, when Christ 'humbled himself' (Ph 2[8]), He used His power, not to domineer, but to serve. There is no suggestion of an appeasing or grovelling mentality. Because Biblical humility is not negative but positive, it can lead a man to do what the pagan could only regard as folly: 'to lay down his life for his friends' (Jn 15[13]).

The early Christian apologist, alert to discover points of contact with his prospective converts, fancied the virtue of humility, celebrated alike in Biblical and pagan thought, ideally suited to his purpose. St Augustine, for example, argues that while all agree on the need for humility, Christianity enables men to achieve what the pagans can only preach. Overlooking, in his missionary zeal, the disparity between Biblical and pagan meanings of the same word, he himself tended to slip into the pagan usage. The best known illustration is his ascribing to citizens of the heavenly city a 'love of God to the *contempt of self*.' Considering the great weight of St Augustine's authority, it should hardly be surprising if subsequent thought occasionally reflected his position, and forgot, as a modern Biblical scholar has said, that the greatest sin of man is to forget that he is, by the grace of God, a prince. E. L. C.

HUMTAH.—A city of Judah, Jos 15[54]. The site is unknown.

HUNCHBACK.—See MEDICINE.

HUNDRED, THE TOWER OF THE.—A tower on the walls of Jerusalem, near the tower of **Hananel** (q.v.), between the Sheep Gate on the east and the Fish Gate on the west, Neh 3[1] 12[39] (AV **the tower of Meah,** RV **the tower of Hammeah**). These two towers were probably situated near the NE. corner of the city (cf Jer 31[38], Zec 14[10]). The origin of the name is obscure. It has been suggested that the tower was 100 cubits high, or that it was approached by 100 steps, or that it required a garrison of 100 men.

HUNTING is not conspicuous in the literature of the Hebrews that remains for us. It was probably carried on more as a necessity than as a sport. Nimrod, the patron of hunters who is described as 'a mighty hunter before the Lord,' was considered a son of Cush (Gn 10[8–9]). Esau, skilful in the **chase,** is depicted as somewhat uncouth and simple (Gn 25[27] etc.). Assyrian and Egyptian kings are represented on the monuments as hunting from their chariots, particularly hunting lions with bow and arrow; and Josephus describes Herod as an excellent hunter (*BJ* I. xxi. 13 [429]). Wild animals and birds were appreciated as food (Lv 17[13], 1 S 26[20] etc.); in a country like Palestine, abounding in beasts and birds of prey, some proficiency in the huntsman's art was necessary in order to secure the safety of the community and the protection of the flocks. Among these 'evil beasts' lions and bears were the most dangerous (Gn 37[33], 1 K 13[24], 2 K 2[24], Pr 28[15] etc.). Deeds of prowess in the slaughter of such animals—by Samson in self-defence (Jg 14[6]), David the shepherd to rescue his charges (1 S 17[34]), and Benaiah, who 'slew a lion in a pit on a day when snow had fallen' (2 S 23[20])—gained for these men abiding fame.

Among the animals hunted for food were the gazelle, the hart, the roebuck, and the wild goat (Dt 12[15, 22] 14[5] etc.). The first three are mentioned specially as furnishing the table of Solomon (1 K 4[23]). The partridge was perhaps the bird chiefly hunted in ancient times, as it is at the present day (1 S 26[20]). Neither beast nor bird might be eaten unless the blood had been 'poured out' (Lv 17[13], Dt 12[16] etc.)—a law still observed by the Moslems.

Little information is given in Scripture as to the methods followed by the huntsmen. The hunting dog is not mentioned, but is sometimes represented on non-Israelite monuments. The following implements were in use: the bow and arrow (Gn 27[3] etc.), the club (Job 41[29]), nets (Job 19[6], Ps 9[15], Is 51[20] etc.), pits, in which there might be a net, dug and concealed to entrap the larger animals (Ps 9[15], Ezk 19[8] etc.), the sling (1 S 17[40]), and the snare of the fowler (Ps 64[5] 91[3] 124[7]). The tame partridge in a cage was used as a decoy (Sir 11[30]).

Hunting scenes occur with frequency on the monuments of Near Eastern nations; see J. B. Pritchard, *ANEP*, Nos. 182–190. In addition to animals named above these sometimes represent wild bulls, wild asses, and rabbits as being hunted; some of these may have been hunted in Palestine. Of special interest is a gold plate from Râs Shamra (Syria) depicting a scene in which a man (a king?) hunts bulls and gazelles with bow and arrow from a chariot, with the aid of dogs (*ibid.* No 183).

See also NETS, SNARES, etc. W. E.—J. P. H.

HUPHAM.—A Benjamite, Nu 26[39]; elsewhere called **Huppim** (q.v.). The gentilic **Huphamites** is found in Nu 26[39].

HUPPAH.—A priest of the 13th course, 1 Ch 24[13].

HUPPIM.—The head of a Benjamite family, Gn 46[21], 1 Ch 7[12, 15]; called **Hupham** (q.v.) in Nu 26[39].

HUR.—A name of possibly Egyptian origin. **1.** An attendant on Moses who with Aaron held up Moses' hands, in order that by the continual upholding of the sacred staff Israel might prevail over Amalek, Ex 17[10, 12]. With Aaron he was left in charge of the people when Moses ascended the mountain, 24[14]. **2.** A Judahite, the grandfather of Bezalel, Ex 31[2] 35[30] 38[22]. According to the Chronicler, he was descended from Perez, through Hezron and Caleb, 1 Ch 2[19f] 4[1]. Josephus says he married Miriam and is identical with **1** (*Ant.* III. ii. 4 [54], vi. 1 [105]). **3.** One of the kings of Midian slain after the sin at Peor, Nu 31[8]; described as a 'leader' of Midian and a 'prince' of Sihon, Jos 13[21]. **4.** 1 K 4[8] (AV); see BEN-HUR. **5.** The father of Rephaiah, who was a ruler of half Jerusalem, and who helped to repair the walls, Neh 3[9]. LXX omits the name Hur.

HURAI.—See HIDDAI.

HURAM.—**1.** A Benjamite, 1 Ch 8[5]. **2, 3.** See HIRAM, **1.** and **2.**

HURAM-ABI.—An artificer who helped in the erection of the Temple, 2 Ch 2[13] 4[16] (AV, RV 'Huram my [or his] father'). He is to be identified with Hiram, **2.**

HURI.—A Gadite, 1 Ch 5[14].

HURRIANS.—See HORITES.

HUSBAND.—See FAMILY.

HUSBANDMAN, HUSBANDRY.—In AV the former is, in most cases, synonymous with a 'tiller,' which RV and RSV have substituted for it in Zec 13[5]—in modern English, a farmer. The first farmer mentioned in OT, therefore, is not Noah, the 'husbandman' (Gn 9[20]), but Cain, the 'tiller of the ground' (4[2]).

RSV nowhere uses 'husbandman.' In Jn 15^{1}, however, this has the more limited sense of vinedresser (so RSV): 'I am the true vine and my Father is the vinedresser' (AV and RV 'husbandman'). So, too, in the parable of the Vineyard (Mt 21^{33ff}; RSV 'tenants').

'Husbandry,' in the same way, is tillage, farming. Thus of king Uzziah it is said that 'he loved husbandry' (literally 'the land' [RSV 'the soil'] in the modern sense, 2 Ch 26^{10}), that is, as the context shows, he loved and fostered agriculture, including viticulture. In 1 Co 3^{9} 'husbandry' is used by metonymy of the land tilled (RSV 'field'; cf RVm). A. R. S. K.

HUSHAH.—Son of Ezer the son of Hur (see HUR, **2**), and therefore of the tribe of Judah, 1 Ch 4^{4}.

HUSHAI.—An Archite (2 S 15^{32} $17^{5, 14}$), *i.e.* a native of 'the territory of the Archites' (Jos 16^{2}) to the W. of Bethel. He is further described as 'David's friend' (2 S 15^{37}), while in 16^{16} the two titles are united. At the rebellion of Absalom he was induced by David to act as if he favoured the cause of the king's son. By so doing he was enabled both to defeat the plans of Ahithophel and to keep David informed (by means of Ahimaaz and Jonathan, the sons of Zadok and Abiathar the priests) of the progress of events in Jerusalem, 2 S 16^{16}–17^{23}. He is probably to be identified with the father of Baana, one of Solomon's twelve commissariat officers, 1 K 4^{16}.

HUSHAM.—A king of Edom, Gn 36^{34f}, 1 Ch 1^{45f}.

HUSHATHITE (probably=an inhabitant of Hushah).—This description is applied to **Sibbecai** (q.v.), one of David's thirty heroes, 2 S 21^{18} 23^{27}, 1 Ch 11^{29} 20^{4} 27^{11}.

HUSHIM.—**1.** The eponym of a Danite family, Gn 46^{23}; called **Shuham** in Nu 26^{42}. **2.** A Benjamite, 1 Ch 7^{12}. **3.** The wife of Shaharaim the Benjamite, 1 Ch $8^{8, 11}$.

HUSKS.—See PODS.

HUZ, Gn 22^{21} (AV).—See Uz, **2.**

HUZZAB.—A word occurring in Nah 2^{7} (AV, RV). Gesenius derived it from a verb *ṣābhabh*, and read 'the palace is dissolved and *made to flow down*,' Many recent authorities regard it as from *nāṣabh*, and translated 'it is decreed.' RSV renders 'its mistress' and takes it to refer to the Assyrian queen.

HYACINTH.—See JEWELS AND PRECIOUS STONES (*sub* **Jacinth**).

HYDASPES.—A river mentioned in Jth 1^{6} as on the Medo-Babylonian frontier. The name is probably the result of a confusion with the well-known Hydaspes in India (now the *Jalam*). In view of the fictitious character of the Book of Judith, speculation as to the identity of this river is likely to remain fruitless. However there may be a suggestion in the fact that the Syriac version reads **Ulai** (q.v.). W. M. N.

HYENA.—The hyena (Arabic *ḍabʿ*) is a very common Palestine animal, concerning which the *fellahīn* have countless tales. It is both hated and dreaded; it consumes dead bodies, and will even dig up corpses in the cemeteries; such rifling of graves has been known to take place on the Mount of Olives. It is nocturnal in its habits; in the day-time it hides in solitary caves, to which the *fellahīn* often follow it and attack it by various curious devices. In the gathering dusk and at night the hungry hyena frequently becomes very bold and will follow with relentless persistence a solitary pedestrian, who, if he cannot reach safety, will surely be killed. In spite of its habits it is eaten at times by the Bedouin. In OT it figures in The Valley of Zeboim (q.v.)=The Valley of Hyenas, and some find it in Jer 12^{9} (see SPECKLED BIRD), where a word from the same root as Zeboim, and cognate with Arabic *ḍabʿ*, is found. RSV renders a different word, which means 'howlers,' by 'hyenas' in Is 13^{22} 34^{14} (AV 'wild beasts,' RV 'wolves'), where some would render 'jackals.'

E. W. G. M.—H. H. R.

HYKSOS.—The early 18th cent. B.C. witnessed a series of ethnic migrations which led to the settlement of the Hittites in Asia Minor, the Hurrians (OT Horites) in Mitanni on the upper Euphrates, and somewhat later the Kassites (see COSSAEANS) in Mesopotamia. The effect of these movements was to dislodge the native populations. A mixed horde of peoples from the N. and E., known as the Hyksos, consisting of Semites, Hurrians, and others, took advantage of the period of anarchy which followed the 12th Dynasty to invade and settle in the E. Delta of Egypt *c* 1720 B.C. Possessing a marked military superiority, they introduced into Egypt the horse and chariot, new types of bronze weapons and body armour, the composite bow, and extensive town fortifications.

They established their capital at Avaris (later Tanis, OT Zoan), where the cult of their Semitic god Baal was identified with that of the Egyptian Seth (Sutakh). In the late 17th cent. they occupied Palestine-Syria, and built towns in the hill-country. The Hyksos domination of Egypt coincided with the period of the Hebrew patriarchs, who probably made their way into Egypt during this time. Josephus mistakenly identifies the Hyksos with the Hebrews. He quotes Manetho's account (*c. Ap.* I. 14 [75–83]), who derives the name *hyksōs* (or *hykūssōs*) from a supposed Egyptian *ḥīqū-shōse*, 'shepherd kings.' The term actually represents the Egyptian expression (occurring as early as 12th Dynasty) *ḥiqū-ḥāsowe*, 'rulers of foreign lands,' used to designate the Asiatic tribal chieftains. The Hyksos were finally expelled *c* 1570 B.C. by Ahmose who established the 18th Dynasty. R. J. W.

HYMENAEUS.—A false teacher condemned in 1 Ti 1^{19f} and 2 Ti 2^{17f}, associated with Alexander in the former and with Philetus in the latter passage. There is no reason to doubt that the same Hymenaeus is meant. His error consisted in the assertion that the resurrection had already taken place, *i.e.*, in a gnostic dualistic denial of a future bodily resurrection. A similar heresy is referred to in the *Acts of Paul and Thecla* 14, Justin *Apology* I. xxvi. 4 (of Menander), and Irenaeus, *Adv. Haer.* I. xxiii. 5. In 1 Ti 1^{20} the offender is said to have been delivered by Paul to Satan (cf 1 Co 5^{5}). In 1 Corinthians the death of the culprit is envisaged, here clearly not. The aim is reclamation after a chastisement probably thought of as illness. The sequence of the two passages has been invoked as an argument for the priority of 2 Timothy; very uncertainly. J. L.

HYMN (in NT; for OT, see MUSIC, POETRY, PSALMS).—The Greek word signified specifically a poem in praise of a god or hero, but it is used, less exactly, also for a religious poem, even one of petition. The use of hymns in the early Christian Church was to be anticipated from the very nature of worship, and from the close connexion between the worship of the disciples and that of the Jews of that and earlier centuries. It is proved by the numerous incidental references in the NT (cf Ac 16^{25}, 1 Co 14^{26}, Eph 5^{19}, Ja 5^{13}, and the passages cited below), and by the famous letter of Pliny to Trajan describing the customs of the Christians. We lack, however, any collection of hymns comparable to the Psalms of the OT. Doubtless the Psalms were largely used, in the tradition of the Synagogue, but giving them a Christian meaning. The mode of singing was that of the *psalmus responsorius*, a type of recitative chant with a constant refrain by the congregation to the verses of the cantor. In addition new songs would be written to express the intense emotions of the disciples, and even their spontaneous utterances in the gatherings of early Christians would almost inevitably take a rhythmical form, modelled more or less closely upon the Psalms. In some localities, perhaps, Greek hymns served as the models. St. Paul insists (1 Co 14^{15}, Col 3^{16}) that the singing be with the spirit and the understanding, an intelligent expression of real religious feeling. These passages specify 'psalms, hymns, and spiritual songs.' While at first it seems as if three classes of composition are here distinguished, either as to source or character, it is probably not the

case, especially as in Mt 26[30], Mk 14[26] the verb 'to hymn' is used of singing a psalm. Luke's Gospel contains several hymns, but does not mention their use by the disciples. They are the *Magnificat* (Lk 1[46–55]), the *Benedictus* (1[68–79]), the *Gloria in Excelsis* (2[14]), and the *Nunc Dimittis* (2[29–32]). Whether these were Jewish or Jewish-Christian in origin is disputed. The free introduction of hymns of praise in the Apocalypse, in description of the worship of the new Jerusalem, points to their use by the early Church. The poetical and liturgical character of some other NT passages is asserted with more or less reason by different scholars (*e.g.* Eph 5[14], 1 Ti 1[17] 3[16] 6[16], 2 Ti 4[18]). The earliest Christian hymn-book we possess is the *Odes of Solomon*, written in Greek around A.D. 150. See Hastings' *DCG*, article 'Hymn,' *ERE*, vii, 5–12, and *Interpreter's Dictionary of the Bible*. O. H. G.—C. C. Ri.

HYPOCRITE.—This word occurs in the NT only in the Synoptic Gospels (sixteen times, of which thirteen are in Matthew); 'hypocrisy' is used once by each synoptist. In the Epistles (Gal 2[13], 1 Ti 4[2], 1 P 2[1]) the RSV prefers 'insincerity'. The hypocrisy of the Gospels is the 'appearing before men what one ought to be, but is not, before God.' At times it is a deliberately played part (*e.g.* Mt 6[2, 5, 16] 22[18] etc.), at others it is a deception of which the actor himself is unconscious (*e.g.* Mk 7[6], Lk 6[42] 12[56] etc.). Thus all who play the part of religion, whether consciously or unconsciously, without being religious, are hypocrites; and so fall under the sternest denunciation (Mt 23, where it cannot be supposed that *all* scribes and Pharisees were meant). This use of the word has led some to give it the wider interpretation of 'godlessness' in some passages (*e.g.* Mt 24[51]; cf Lk 12[46]); but as there may always be seen in the word the idea of a religious cloak over the godlessness, the ordinary sense should stand.

In the AV of OT (*e.g.* Job 8[13], Is 9[17]) 'hypocrite' is a mistranslation of the Hebrew word *ḥānēph*. It passed into the AV from the Latin, which followed the Greek Versions. In RV, RSV it is rendered 'godless,' 'profane.' C. T. P. G.—F. C. G.

HYRCANUS.—1. The son of Tobias, who had money deposited at Jerusalem, in the Temple treasury, at the time of the visit of Heliodorus (2 Mac 3[11]). The name seems to be a local appellative. Its use among the Jews is perhaps to be explained from the fact that Artaxerxes Ochus transported a number of Jews to Hyrcania. **2.** See MACCABEES, **5.**

HYSSOP is mentioned several times in the Bible. It was used for sprinkling blood (Ex 12[22]), and in the ritual of the cleansing of lepers (Lv 14[4], Nu 19[6]); it was an insignificant plant growing out of the wall (1 K 4[33]); it could afford a branch strong enough to support a wet sponge (Jn 19[29]). It is possible that all these references are not to a single species. Among many suggested plants the most probable is either a species of marjoram, *e.g. Origanum maru*, or the common caper-plant (*Capparis spinosa*), which may be seen growing out of crevices in walls all over Palestine. See CAPER-BERRY. E. W. G. M.

I

IADINUS, 1 Es 9[48] (RV).—See JAMIN, **3.**

IBEX, Dt 14[5] (RSV).—See PYGARG.

IBHAR.—One of David's sons, born at Jerusalem, 2 S 5[15], 1 Ch 3[6] 14[5].

IBIS.—Mentioned only in Lv 11[17] (RSV; AV and RV 'great owl') and Lv 11[19] (RVm; AV, RV, RSV 'heron'); see HERON, and OWL.

IBLEAM.—A town in Asher assigned to West Manasseh, Jos 17[11]. The Manassites were not able to drive out the Canaanites, Jg 1[27]. It was a Levitical city, 1 Ch 6[7]—where it is called **Bileam.** It is mentioned in 2 K 9[27] in connexion with the death of King Ahaziah, which took place close by. Zechariah, king of Israel, was assassinated here, 2 K 15[10] (RSV; AV, RV have 'before the people' for 'in Ibleam'). It is identified with modern *Tell Bel'ameh*, between Samaria and Jezreel.

IBNEIAH.—A Benjamite, 1 Ch 9[8].

IBNIJAH.—A Benjamite, 1 Ch 9[8].

IBRI.—A Merarite Levite, 1 Ch 24[27].

IBSAM.—A descendant of Issachar, 1 Ch 7[2] (AV **Jibsam**).

IBZAN.—One of the minor judges, following Jephthah, Jg 12[8–10]. He came from Bethlehem, probably the Bethlehem in Zebulun (Jos 19[15]; see BETHLEHEM, **2**), 7 miles NW. of Nazareth. He had thirty sons and thirty daughters—an evidence of his social importance—and arranged their marriages. He judged Israel seven years, and was buried at Bethlehem. According to Jewish tradition, Ibzan was the same as Boaz.

ICHABOD.—Son of Phinehas and grandson of Eli, 1 S 4[21]. The name means 'inglorious,' but probably should be 'Y" is glory,' from an original *Jochebed*. If this guess be well founded, then the turn given to the story in 1 S 4[21] is due to a desire to mould it on the story of the birth of Benjamin in Gn 25[18].

ICONIUM, now called *Konia*, is an ancient city of continuous importance from early times to the present day. Situated at the western edge of the vast central plain of Asia Minor, and well watered, it has always been a busy place. It is surrounded by beautiful orchards, which cover the meanness of its modern buildings. About the beginning of the Christian era it was on the border of the two ethnic districts, Lycaonia and Phrygia. It was in reality the easternmost city of Phrygia, and the inhabitants considered themselves Phrygians, but ancient writers commonly speak of it as a city of Lycaonia (q.v.), the fate of which it generally shared. In the 3rd cent. B.C. it was ruled by the Seleucids, and about 164 B.C., probably, it passed under the power of the Galatae (Asiatic Celts). It was the property of the Pontic kings from about 130 B.C., was set free during the Mithridatic wars, and in 39 B.C. was given by Mark Antony to Polemon, king of Cilicia Tracheia. In 36 B.C. Antony gave it to Amyntas, who was at that time made king of Galatia (q.v.). On his death in 25 B.C. the whole of his kingdom became the Roman province of Galatia. Iconium could thus be spoken of as Lycaonian, Phrygian, or Galatic, according to the speaker's point of view. In the time of the Emperor Claudius, it, along with Derbe, received the honorary prefix Claudio-, becoming *Claudiconium*, but it was not till Hadrian's time (A.D. 117–138) that it became a Roman colony (q.v.). It was 18 miles distant from Lystra, and a direct route passed between them.

The gospel was brought to Iconium by Paul and Barnabas, who visited it twice on the first missionary journey (Ac 13[51] 14[21]). The presence of Jews there is confirmed by the evidence of inscriptions. According to the 'south Galatian hypothesis,' now most widely held, it was within 'the Phrygo-Galatic region' of Ac 16[6] and the 'Galatic region and Phrygia' of Ac 18[23]. It was therefore visited four times in all by St. Paul, who addressed it among other cities in his Epistle to the Galatians. During the absence of Paul it had been

visited by Judaizers, who pretended that Paul was a mere messenger of the earlier Apostles, and contended that the Jewish ceremonial law was binding on the Christian converts. Paul's Epistle appears to have been successful, and the Galatians afterwards contributed to the collection for the poor Christians of Jerusalem. The alternative view (the 'north Galatian hypothesis') is that Iconium is not really included in the Acts narrative after 16^{2ff}, and that the words quoted above from Ac 16^{6} and 18^{23} refer to the territory of Galatia proper, which lay far north of Iconium, and that the Epistle to the Galatians, being addressed to that northern district, had no connexion with Iconium. In any case, the (province) Galatia which is addressed in 1 P 1^{2} will by that time (late 1st cent.) have included Iconium. The large number of Christian inscriptions which have been found there reveal the existence of a vigorous Christian life in the 3rd and following centuries.

A. So.—**E. G. K.**

IDALAH.—A town of Zebulun, Jos 19^{15}. It is possibly modern *Kh. el-Ḥawārah*, about a mile SW. of Bethlehem, **2** (q.v.).

IDBASH.—One of the sons of the father of Etam, 1 Ch 4^{3}.

IDDO.—A name which represents several different names in Hebrew. **1.** The chief at Casiphia, who provided Ezra with Levites and Nethinim, Ezr 8^{17}, 1 Es 8^{45f} (AV **Saddeus** and **Daddeus**, RV **Loddeus**). **2.** A son of Zechariah, captain of half the tribe of Manasseh in Gilead, 1 Ch 27^{21}; perhaps=**4**. **3.** One of those who had married foreign wives, Ezr 10^{43} (AV **Jadau**), 1 Es 9^{35} (AV **Edes**, RV **Edos**). **4.** Father of Abinadab, who was Solomon's officer in Mahanaim, 1 K 4^{14} (see **2**). **5.** A Gershonite Levite, 1 Ch 6^{21}; called **Adaiah** v.^{41}. **6.** A seer and prophet cited by the Chronicler as an authority for the reigns of Solomon (2 Ch 9^{29}), Rehoboam (2 Ch 12^{15}), and Abijah (2 Ch 13^{22}). **7.** Grandfather (Zec $1^{1, 7}$) or father (Ezr 5^{1} 6^{14}, 1 Es 6^{1} [AV, RV **Addo**]) of the prophet Zechariah. **8.** One of the priestly clans that went up with Zerubbabel, Neh $12^{4, 16}$.

IDOLATRY.—Two forms of idolatry may be distinguished in the Bible, according as idolatry is considered a breach of the first commandment or of the second. In the former case, it is the worship of other gods than the God of Israel; in the latter, it is the cultic use of material representations of Yahweh and *a fortiori* of any other god. In either case idolatry was a capital offence. Strictly speaking, the latter definition is the proper one (cf Gr. *eidōlolatreia*, 'the worship of *eidōla*, images'); but in practice the term is used more widely and the two senses cannot be completely dissociated. The idol or image was regarded as something in which the god's personality resided, so that it was charged with his power.

1. The worship of other gods.—The ancestors of the Israelites are said to have worshipped 'other gods' when they lived in Mesopotamia (Jos 24^{2}), but from the call of Abraham onwards the patriarchs worshipped one God—the God (or Shield) of Abraham, the God (or Fear) of Isaac, and the God (or Mighty One) of Jacob—whom they knew as El Shaddai, and who in Moses' time revealed Himself to the Israelites by His name Yahweh (Ex 6^{2f}). Their worship of Him did not carry with it the belief that other gods had no existence, but it did carry with it the belief that other gods were weak and negligible. Yahweh's triumph at the Exodus confirmed Israel's faith in Him (Ex 15^{11ff}) and was viewed as the execution of His judgment against all the gods of Egypt (Ex 12^{12}). Hence the decalogue, the constituent charter given to Israel on the morrow of the Exodus, opens with the words: 'I am Yahweh your God, who brought you out of the land of Egypt, out of the house of bondage: you shall have no other gods before me' (Ex 20^{2f}, Dt 5^{6f}).

But the Israelites, who had largely ceased to worship the God of their fathers during their Egyptian servitude (Ezk $23^{3, 8, 27}$), were constantly prone to pay homage to other gods, even in the wilderness and much more so after their settlement in Canaan. During their wilderness wanderings occurred the incident of the golden calf—which may, however, have been intended as a representation or rather pedestal of Yahweh, for when it was set up Aaron proclaimed 'a feast to Yahweh' (Ex 32^{5})—and their worship of the Baal of Peor in Moab (Nu 25^{1-5}).

After the settlement in Canaan there was a strong temptation to conform to the local fertility-cults, in which Baal, the fructifying rain-god, and his consorts (Asherah, Ashtoreth, or Anath according to the part of the country) played leading rôles. The desire to ensure rainfall and good crops inclined them to imitate the ritual of their Canaanite neighbours, which was calculated to promote these ends, rather than to follow the way of Yahweh who had gone before them as guide and defender in the wilderness. This did not necessarily mean a conscious renunciation of Yahweh-worship in favour of Baalism; sometimes Yahweh was simply baalized (and there is adequate evidence that the title *ba'al*, 'lord,' was given to him by such devout Yahwists as Saul and David, as the names of some of their sons, such as Eshbaal and Baaliada, indicate). But if Yahweh was thoroughly baalized so that He came to be regarded as a fertility-deity and little more, the practical effect was as complete an abandonment of essential Yahwism as if there had been deliberate apostasy from Him. This conformity to Canaanite worship loosened the covenant-bond that bound the tribes of Israel to Yahweh and to one another, and weakened them before their enemies: 'when new gods were chosen, then war was in the gates' (Jg 5^{8}). Not surprisingly, then, a return to covenant-loyalty was regularly attended by liberation and victory, as under Deborah (Jg 4, 5), Gideon (Jg 6–8), and Samuel; *e.g.* Samuel's command to the people to 'put away the foreign gods and the Ashtaroth' and return in heart to Yahweh resulted in their offering a successful resistance to the Philistines (1 S 7^{3ff}).

David's winning of national independence and extension of his power over foreign peoples brought prestige to the name of Yahweh as lord over all nations (cf Ps 18^{49} 47). Solomon's installation of private shrines for his heathen wives is reprobated (1 K 11^{1ff}) especially for the bad example that it showed; he himself, moreover, is said to have been influenced by his wives to pay some tokens of respect to their gods, while he remained essentially a Yahwist.

The greatest apostasy in the northern kingdom was the landslide in favour of Baal-worship which followed Ahab's marriage to Jezebel; Jezebel's devotion to the Tyrian god Melkart encouraged a revival of Canaanite Baal-worship, which no doubt had close similarities to the cult of Melkart. Even the triumph of Yahwism on Mount Carmel did not completely undo this apostasy; it had to be washed out in the bloodshed of Jehu's revolt.

The Assyrian domination of the 8th and 7th cents. B.C. involved the recognition of the Assyrian gods, in both the northern and southern kingdoms. In the southern kingdom Ahaz and Manasseh receive special condemnation because they introduced into Jerusalem the elaborate apparatus of Assyrian worship, as faithful vassals of the Great King; the religious reformations under Hezekiah and Josiah included the removal of this apparatus (a political as well as a religious act). One prominent feature of Assyrian worship was the cult of the planets, 'the host of heaven' (2 K 17^{16})—although astrolatry was nothing new in the 8th cent. B.C.; it had figured prominently in the religion of the earliest Semitic nomads. Among the planets the sun, Venus and Saturn receive special mention. Josiah abolished the horses and chariots dedicated to the sun-god (2 K 23^{11}); the women of Judah a generation afterwards remembered Josiah's reformation because it was then that they left off presenting incense, cakes, and libations to 'the queen of heaven,' *i.e.* Astarte or Venus (Jer 44^{19}; cf Jer 7^{18}, where the practice obtaining before Josiah's reformation is described). And over a century before Josiah's time

Amos assured the people of the northern kingdom that when they went into exile 'beyond Damascus' they would carry there with them the images of 'Sakkuth your king . . . Kaiwan your star-god,' *i.e.* Saturn (Am 5[26]).

Some of the idolatrous features of the religion of Judah before Josiah's reformation are mentioned in Zeph 1[4ff]—cf the denunciation of those 'who bow down and swear to Yahweh and yet swear by Milcom' (1[5]), Milcom being identified in 1 K 11[5] as the god of the Ammonites.

There was evidently a wholesale reaction after Josiah's death; to judge by Ezekiel's description of idolatrous practices in the Jerusalem Temple (Ezk 8[3ff]) the situation in the decade before the Babylonian exile was no better than it had been before Josiah's reformation. Tammuz-worship by the women and sun-worship by the men are among the 'abominations' which Ezekiel relates.

It is probably the relics of such 'unreformed' Jewish worship that are to be recognized in the Elephantine papyri of the 5th cent. B.C., where compound names like Anathyahu, Anathbethel, Ḥerembethel, and Ishum-bethel reflect, verbally at least, an earlier syncretism of Yahwism with Canaanite worship, although by this time they may have denoted little more than hypostatizations of Yahweh.

Tammuz (a name of Sumerian origin) was identical with the Syrian Adonis, whose worship is probably implied in the 'gardens which you have chosen' (Is 1[29]) and the 'sacrificing in gardens' (Is 65[3]). Other forms of false worship are mentioned in the latter context (vv.[4, 11]) where condemnation is pronounced on those 'who sit in tombs, and spend the night in secret places, who eat swine's flesh, and broth of abominable things is in their vessels . . . who set a table for Fortune (Gad) and fill cups of mixed wine for Destiny (Meni).' Even after the Exile idolatry was slow in being completely extirpated, especially (we may suppose) among those who had remained in Palestine.

The later Jewish horror of idolatry in any form finds expression in the transmission of the Biblical text, where 'Baal' (particularly when it appears as an element in compound proper names) is frequently changed to *bōsheth* or *besheth* ('shame') and a word like *shiḳḳûṣ* or *tô'ēbhāh* ('abomination') is used in the sense of 'false god' or 'idol.' Sometimes the consonants of a false god's name are retained, but the vowel-points accompanying them indicate that one of these substitute-words is to be pronounced in its place, since the taking of a false god's name upon one's lips was felt to be a defilement (cf Ps 16[4]). Thus Molech and Ashtoreth represent Melech and Ashtart with the vowels of *bōsheth*; Siccuth and Chiun (Am 5[26]) represent Sakkuth and Kaiwan with the vowels of *shiḳḳûṣ*.

The best known instance of the use of *shiḳḳûṣ* to denote a false god is in Dn 11[31] 12[11] (cf 1 Mac 1[54], Mk 13[14]), where 'the abomination that makes desolate' (*shiḳḳûṣ mᵉshōmēm, shiḳḳûṣ shōmēm*) is a derogatory pun on *Baʿal Shāmēm*, the Syrian deity identified with Olympian Zeus, whose altar was set up in the Jerusalem Temple by order of Antiochus IV. in 167 B.C. While the intention may have been syncretistic (Yahweh being assimilated to Olympian Zeus as *Baʿal Shāmēm* was), the new cult was repudiated as a sacrilege by all pious Jews, and the ill-conceived experiment was brought to an end after three years.

2. The worship of images.—In the OT no practical distinction is made between an idol and the god whom it represents. Whatever the character and purpose of the golden calf in the wilderness may have been, Moses confesses with horror that the people have made 'gods of gold' (Ex 32[31]). In later attacks on idolatry (*e.g.* Ps 115[4ff], Is 40[19f] 41[6f] 44[9ff]) the heathen gods have no existence apart from their images; they themselves are nonentities. When the images of Babylonian gods are loaded on to pack-animals to be carried off by the conqueror, it is Bel and Nebo themselves who are pictured as going into exile (Is 46[1f]).

The prohibition in the decalogue of the making and worshipping of any 'graven image' (Ex 20[4], Dt 5[8]) is paralleled by the ban on the making of 'molten gods' in Ex 34[17] (in an ancient ritual, possibly Kenite, code); cf the prohibition of 'gods of silver' and 'gods of gold' in Ex 20[23]. The aniconic principle is thus imposed from the earliest days of Israel's history as a people. It is perhaps significant that no representation of Yahweh has been found from any stage of Israel's history; the S. Palestinian coin (*c* 400 B.C.) in the British Museum formerly thought to bear his image as a 'solar Zeus' is now known to bear the superscription YHD (Judah), not YHW (Yahweh). In addition, representations of any male deity are conspicuous by their absence from Israelite territory. As for female deities, no plaques or figurines of Ashtoreth have been discovered in Early Israelite levels of Central Palestine, their absence from these levels contrasting remarkably with their frequency in corresponding deposits of the Late Bronze Age (16th–13th cents.) and Iron II (9th cent. onwards). It was different on the periphery of the Israelite area of settlement, where Yahwism was weaker and there was closer contact with the Canaanites.

The golden bull-calves which Jeroboam set up in the shrines of Dan and Bethel were probably intended as pedestals for Yahweh's invisible throne. In the Jerusalem Temple Yahweh sat 'enthroned upon the cherubim' (Ps 80[1]). The calves, however, were too closely associated with Canaanite fertility worship to be acceptable; the cherubim on the other hand, had no such association, being purely symbolical forms, representing the storm-winds on which Yahweh rode through the heavens (cf Ps 18[10]). The invisible throne of Yahweh which they supported becomes visible in Ezekiel's vision of the chariot-throne (Ezk 1[4ff]).

The *teraphim* which Rachel took from her father's house (Gn 31[19, 30ff]), and which were probably buried with other 'foreign gods' at Jacob's command under the oak at Shechem (Gn 35[2ff]), were evidently ancestral images conveying certain rights of inheritance to those who possessed them. Elsewhere the word appears as a general term for images (cf 1 S 19[13, 16]); in 1 S 15[23] it is translated 'idolatry.' In Hos 3[4] the *teraphim* are conjoined with the *ephod*. While the ephod is normally a priestly vestment, it appears occasionally to have been an image of some sort. Gideon's golden ephod (Jg 8[27]) was no doubt installed in the sanctuary at Ophrah in honour of Yahweh, but it apparently became an object of idolatrous devotion, so that 'it became a snare to Gideon and to his family.' Ephod, teraphim, and a graven or molten image, such as Micah made for his shrine (Jg 17[4f]), may have been popularly regarded as the proper furniture for a wayside sanctuary where travellers might consult the divine will.

Various forms of idol-worship are attested under the monarchy, *e.g.* the queen-mother Maacah's 'abominable image for Asherah' (1 K 15[13]). Sacred poles of Asherah and pillars (*maṣṣēbhôth*) of Baal are mentioned in both northern and southern kingdoms (1 K 16[33], 2 K 3[2] 10[26] 11[18] 17[10, 16] 18[4] 21[3] 23[4ff]). These were put down, along with the Assyrian cult-apparatus, by Hezekiah and Josiah. Special interest attaches to Nehushtan, the bronze serpent, which Hezekiah destroyed (2 K 18[4]); it had been worshipped with incense from time immemorial, and its identification with the bronze *śārāph* ('fiery serpent') which Moses had made (Nu 21[8f]) suggests some association with the *seraphim* of Isaiah's inaugural vision (Is 6[2]).

Ezekiel's vision of the idolatry in Jerusalem in the closing years of the southern monarchy includes references to the 'slab of jealousy' (the figured slab or orthostate depicting cultic and mythological scenes, which provoked Yahweh to jealousy) and to representations of reptiles and other animals (belonging possibly to a cult of Egyptian origin).

3. In NT.—Idolatry in NT is usually mentioned as a feature of paganism; *e.g.* Paul's indignation was stirred when he saw Athens 'full of idols' (Ac 17[16]). But even Christians may be tainted with idolatry if they have

fellowship in idol banquets, although they themselves know that 'an idol has no real existence' (1 Co 8^4 10^{14}). A subtler form of idolatry than bowing down to wood and stone is implied in the injunction 'Little children, keep yourselves from idols' (1 Jn 5^{21}); here the term covers all false and unworthy ideals which men may set before themselves, and by which their communion may be broken with Him who is 'the true God and eternal life' (v.^{20}). F. F. B.

IDUEL (1 Es 8^{43}) = Ezr 8^{16} **Ariel.** The form is due to confusion of Hebrew *d* and *r*.

IDUMAEA.—The Greek equivalent (in NT only in Mk 3^8) of the name **Edom,** originally the territory E. of the Jordan-Arabah valley and S. of the land of Moab. This country was inhabited, when we first catch a glimpse of it, by a primitive race known as Horites, of whom little but the name is known. The apparent meaning of the name ('cave-dwellers') and comparison with the remains of what seems to have been an analogous race discovered in excavations elsewhere, show that this race was at a low stage of civilization. They were partly destroyed, partly absorbed, by the Bedouin tribes who claimed descent through Esau from Abraham, and who were acknowledged by the Israelites as late as the date of the Deuteronomic codes as brethren (Dt 23^7). They were governed by sheikhs and by a non-hereditary monarchy whose records belonged to a period anterior to the time of Saul (Gn 36^{31-39}, 1 Ch 1^{43-54}). See EDOM.

After the fall of Babylon the pressure of the desert Arabs forced the Edomites across the Jordan-Arabah valley, and the people and name were extended westward. In 1 Mac 5^{65} we find Hebron included in Idumaea. Josephus, with whom Jerome agrees, makes Idumaea extend from Beit Jibrîn to Petra; Jerome assigns the great caves at the former place to the troglodyte Horites. The Herod family was by origin Idumaean in this extended sense. In the 2nd cent. A.D. the geographer Ptolemy restricts Idumaea to the cis-Jordanic area, and includes the original trans-Jordanic Edom in Arabia. See Maps 10, 15. R. A. S. M.—F. C. G.

IEDDIAS, 1 Es 9^{26} (RV).—See IZZIAH.

IEZER.—The form of the name **Abiezer** (q.v.) found in Nu 26^{30} (AV **Jeezer**). The patronymic **Iezerites** (AV **Jeezerites**) stands in the same verse.

IGAL.—1. The spy representing the tribe of Issachar, Nu 13^7. **2.** One of David's heroes, the son of Nathan of Zobah, 2 S 23^{36}. In the parallel list (1 Ch 11^{38}) the name is given as '**Joel,** the brother of Nathan.' **3.** Son of Shemaiah of the royal house of David, 1 Ch 3^{22} (AV **Igeal**).

IGDALIAH.—A 'man of God,' father of Haman, whose name is mentioned in connexion with Jeremiah's interview with the Rechabites, Jer 35^4.

IGEAL, 1 Ch 3^{22} (AV).—See IGAL, 3.

IGNORANCE.—It appears to be in accordance with natural justice that ignorance should be regarded as modifying moral responsibility, and this is fully recognized in the Scriptures. In the OT, indeed, the knowledge of God is often spoken of as equivalent to true religion (see KNOWLEDGE), and therefore ignorance is regarded as its opposite (1 S 2^{12}, Hos 4^1 6^6). But the Levitical law recognizes sins of ignorance as needing some expiation, but with a minor degree of guilt (Lv 4, Nu 15^{22-32}). So '**ignorances**' are spoken of in 1 Es 8^{75} (RSV 'mistakes'), To 3^3, Sir 23^{2f} as partly involuntary (cf He 5^2 9^7). The whole of the OT, however, is the history of a process of gradual moral and spiritual enlightenment, so that actions which are regarded as pardonable, or even praiseworthy, at one period, become inexcusable in a more advanced state of knowledge. In the NT the difference between the 'times of ignorance' and the light of Christianity is recognized in Ac 17^{30} (cf 1 Ti 1^{13}, 1 P 1^{14}), and ignorance is spoken of as modifying responsibility in Ac 3^{17}, 1 Co 2^8, Lk 23^{34}. This last passage, especially, suggests that sin is pardonable because it contains an element of ignorance, while Mk 3^{29} appears to contemplate the possibility of an absolutely wilful choice of evil with full knowledge of what it is, which will be unpardonable (cf 1 Jn 5^{16}). Immoral and guilty ignorance is also spoken of in Ro 1^{18ff}, Eph 4^{18}. For the question whether Christ in His human nature could be ignorant, see KENOSIS, KNOWLEDGE. J. H. Ma.

IIM.—A city of Judah, Jos 15^{29}; site unknown. For Iim, Nu 33^{45} (AV), see IYE-ABARIM.

IJE-ABARIM, Nu 21^{11} 33^{44} (AV).—See IYE-ABARIM.

IJON.—A town in the north part of the mountains of Naphtali, noticed in 1 K 15^{20}, 2 Ch 16^4, as taken by Benhadad. It was also captured and depopulated by Tiglath-pileser, 2 K 15^{29}. It is probably modern *Tell Dibbîn,* on the plateau *Merj 'Ayûn,* which preserves the name.

IKKESH.—The father of Ira, one of David's heroes, 2 S 23^{26}, 1 Ch 11^{28} 27^9.

ILAI.—One of David's heroes, 1 Ch 11^{29}; called **Zalmon,** perhaps the more correct form, in 2 S 23^{28}.

ILIADUN (1 Es 5^{58}).—Perhaps to be identified with **Henadad** of Ezr 3^9. AV has **Eliadun.**

ILLYRICUM.—The only Scripture mention is Ro 15^{19}, where St. Paul points to the fact that he had fully preached the gospel from the outer edge of Jerusalem, so to speak, round about (through various countries) as far as the border of Illyricum. These provinces in order are Syria, Cilicia, Galatia, Asia, and Macedonia, and a journey through them in succession describes a segment of a rough circle. The provinces Macedonia and Illyricum are coterminous, and the nearest city in Macedonia in which we know St. Paul to have preached is Beroea (Ac 17^{10ff}). *Illyricum* is a Latin word, and denotes the Roman province which extended along the Adriatic from Italy and Pannonia on the north to the province Macedonia on the south. A province Illyria had been formed in 167 B.C., and during the succeeding two centuries all accessions of territory in that quarter were incorporated in that province. In A.D. 10 Augustus separated Pannonia from Illyricum, and gave the latter a settled constitution. The government of this important province was difficult, and was entrusted to an ex-consul with the title *legatus Augusti pro praetore.* The northern half was called Liburnia and the southern Dalmatia (q.v.). The latter term gradually came to indicate the whole province of Illyricum. A. So.—E. G. K.

IMAGE.—In theological usage the term 'image' occurs in two connexions: (1) as defining the nature of man ('God created man in his own image,' Gn 1^{27}), and (2) as describing the relation of Christ as Son to God the Father ('who is the image of the invisible God,' Col 1^{15}). These two senses are not unconnected. Because man was created in God's image, it was not inappropriate for God to be pictured under 'the likeness as it were of a human form' (Ezk 1^{26}), or for the Son of God in due course to become incarnate as man ('it was fitting,' He 2^{10}); and as man is recreated in the image of God, obscured and defaced through sin (Col 3^{10}; cf Eph 4^{24}), it is the image of Christ which he bears in his renewed state (1 Co 15^{49}, 2 Co 3^{18}). These Biblical uses of the term 'image' claim further consideration.

1. As regards *man,* the fundamental text is Gn 1^{26f}. Here man is called into being, not, like the other creatures, by a simple fiat, but as the result of a solemn and deliberate act of counsel on the Creator's part: 'Let us make man in our image, after our likeness. . . . So God created man in his own image, in the image of God he created him, male and female he created them.' Attempts have been made from Irenaeus onward to distinguish between 'image' (*ṣelem*) and 'likeness' (*dᵉmûth*), but it is now generally accepted that no difference of meaning is intended. The two words combine to emphasize the idea of resemblance to God. In Gn 1^{27} (cf 9^6) the single word 'image' expresses the total idea, and in 5^1 the single word 'likeness.' The expression occurs repeatedly in NT; cf 1 Co 11^7, Col 3^{10} ('image,' Gr. *eikōn*); Ja 3^9 ('likeness,' Gr. *homoiōsis*). The termin-

ology in Genesis is indeed peculiar to the 'Priestly' narrative, but the *idea* underlies the view of man in the Yahwistic sections as well, for only as made in God's image is man capable of knowledge of God, fellowship with Him, covenant relationship to Him, and character conformable to God's own. To 'be like God'—a sham likeness in place of the reality—was the serpent's allurement to Eve (Gn 3^5).

Ps 8 echoes Gn 1^{26ff} without actually using the term 'image.' Man's status as 'little less than God' (Ps 8^5) is due to his being made in the Divine image; he does not possess equality with God (contrast Ph 2^6, where Christ possesses this equality but does not exploit it for His self-aggrandisement). But since man was made in God's image, no other image of God is necessary or indeed permissible.

In what, then, did this Divine image, this likeness to God, consist? Not in physical form, nor yet in some fancied analogy between man, viewed as a tripartite being, as spirit, soul, and body (1 Th 5^{23}), and the Holy Trinity. Since it was man, and not the lower animals, that God made in His image, the image of God in man has to do with those features which distinguish man from the lower creation: his dignity as God's representative, ruling over the rest of animate nature and over the earth in general; his endowment with the power of responsible moral choice; his capacity for communion with God. A good part of what is nowadays called 'personality' goes to make up the Divine image in man. In addition, there is the insight which finds expression in Wis 2^{23}: 'God created man for incorruption, and made him in the image of his own eternity'—carried even farther by Augustine at the beginning of his *Confessions*: 'Thou hast made us for thyself, and our heart is restless till it rests in thee.'

In the idea of the image, too, lies the germ of sonship: man responds freely to God's love by offering God his love, service, and obedience. To this must be added, in the light of such passages as Eph 4^{24} and Col 3^{10}, the conception of actual moral conformity, in knowledge, righteousness, and holiness, as pertaining to the perfection of the image. Sin has not destroyed the essential elements of God's image in man, but it has shattered the image in a moral respect; and grace renews it in Christ.

2. The presentation of *Christ*, the Son, as the image (*eikōn*) of God (*e.g.* 2 Co 4^4), is bound up with the Christian doctrine of the Godhead, and finds expression in various ways in NT, notably in He 1^3, where the Son 'reflects the glory of God and bears the very stamp of His nature' (cf Wis 7^{26}, where wisdom 'is a reflection of eternal light, a spotless mirror of the working of God'). This refers to a supra-temporal and essential relation between the Son and the Father; God, in His eternal being, reflects Himself, and beholds His infinite perfection and glory mirrored, in the Son (Jn 1^1 17^5). Accordingly the Son, as the Father's eternal Word or self-expression, becomes in incarnation His perfect revelation to the world (Jn $1^{14, 18}$ 14^9). And therefore those who bear Christ's image bear the image of God; being renewed in God's image, they are conformed to the image of His Son (Ro 8^{29}). J. O.—F. F. B.

IMAGES.—**1.** Representations of the deity or of the manifest power of the Holy are known from most ancient times among the peoples of the ancient Near East. Such representations were of various kinds: stone pillars (Heb. *maṣṣēbhôth*), wooden poles, plain or decorated (Heb. *ʾᵃshērîm*); clay figures representing the mother goddess (perhaps the Heb. *tᵉrāphîm*); small bronze images of the deity in human form; and larger images in animal or human form venerated at the great temples. In OT, approximately twenty terms are used to refer to images, the most important of which are *pesel* ('graven image'), *ṣelem* ('image,' 'statue'), *massēkhāh* ('molten image') and *dᵉmûth* ('likeness').

2. In OT, sharp strictures against the making of any image of God appear in quite early texts, perhaps from time of Moses (Ex 20^4, Dt 27^{15} etc.; see DECALOGUE).

In the centuries-long struggle with Canaanite worship and cultic practices, the Israelites often yielded to the natural pressures to represent the deity in human, animal, or other forms. Israelite cult objects such as the Ark, the ephod, the golden calf, and the serpent Nehushtan were no doubt popularly conceived by some Israelites to be actual representations of Yahweh (Nu 10^{35f} 21^{8f}, 1 S 21^9, 1 K 12^{28} etc.). Such cult objects are not properly understood to be images of the deity, however; Ark and golden calf were generally conceived to be the seat and the pedestal, respectively, upon which the invisible Yahweh was enthroned. The ephod refers to a variety of garments used in cultic practices, some of which were heavily ornamented with precious metals (Jg 8^{27}, 1 S 21^9; see Ex 28^{1-39}). The serpent Nehushtan was a cult object used in apotropaic medicine. The household gods (Heb. *tᵉrāphîm*), perhaps originally connected with ancestor worship, appear to have become identified with the representations of the mother goddess, employed by women as aids to fertility and child-bearing (Gn 31^{19}, 1 S 19^{13}).

3. The prohibitions in Israel against all forms of idolatry and image-making are one of the major distinguishing marks of OT religion. Yahweh could not be controlled nor His power manipulated by man. Even the anthropomorphic descriptions of the deity in OT are generally quite restrained (Ex 24^{9f} 33^{17-33}, 1 K 19^{11-13}, Is 6, Ezk 1). The imageless Yahweh cult of Israel conveyed the meaning of the deity's dealings with His people through representations of Yahweh's action in history: past, present, and future.

4. Nonetheless, image-making flourished at various times in Israelite history. The materials used in idol manufacture were clay (Wis 15^{13}, Bel ^{7}), wood (Is 44^{15}, Wis 13^{13}), silver and gold (Hos 8^4, Dn 3^1). They might be painted (Wis 13^{14} 15^4), dressed up (Jer 10^9, Ezk 16^{18}), crowned and armed (Bar $6^{9, 15}$). They were kept in shrines (Jg 17^5, Wis 13^{15} etc.), and secured from tumbling down (Is 41^7, Jer 10^4). Refreshments (Is 65^{11}, Jer 7^{18}) and kisses (Hos 13^2, 1 K 19^{18}) were offered to them, as well as sacrifice and incense. They figured in processions (cf ancient sculptures, and Is 46^7, Jer 10^5). See also IDOLATRY. H. F. B. C.—W. J. Ha.

IMAGINATION.—In the EV imagine always means 'contrive,' and imagination 'contrivance.' In the case of imagination a bad intention is always present (except in Is 26^3 AVm), as in Ro 1^{21} 'they . . . became vain in their imaginations' (RV 'reasonings'; RSV 'thinking'). 2 Co 10^5 'casting down imaginations and every high thing that exalteth itself' (RVm 'reasonings'; RSV 'arguments'). The Greek words have in these passages the same evil intent as the AV word. Coverdale translates Is 55^7 'Let the ungodly man forsake his wayes, and the unrightuous his ymaginacions, and turne agayne unto the Lorde.'

IMALCUE, 1 Mac 11^{39} (RV).—See IMALKUE.

IMALKUE.—An Arab prince to whom Alexander Balas entrusted his youthful son Antiochus, 1 Mac 11^{39} (AV **Simalcue,** RV **Imalcue**). After the death of Alexander, in 145 B.C., Imalkue reluctantly gave up the boy to Tryphon, who placed him on the throne of Syria as Antiochus VI. in opposition to Demetrius II.

IMLA, 2 Ch 18^{7f} (AV, RV).—See IMLAH.

IMLAH.—The father of Micaiah, a prophet of Y" in the days of Ahab, 1 K 22^{8f}, 2 Ch 18^{7f} (AV, RV **Imla**).

IMMANUEL.—The symbolic name of the child whose birth is foretold by Isaiah (Is 7^{14} 8^8). The spelling **Emmanuel** (AV, RVm, RSV, Mt 1^{23}) is based on LXX. The meaning of the name is 'God is with us' and its interpretation involves discussion of Is 7, especially vv.$^{10-17}$.

1. *Grammatical difficulties.*—A literal translation of Is 7^{14} is 'Therefore the Lord himself will give you a sign. See, the young woman is pregnant and will bear a son, and will call his name Immanuel.' An equally correct translation could be 'will be pregnant' (cf RSV)

but the close similarity to Gn 16[11] favours the present tense. For 'young woman' RSVm has 'virgin,' probably in deference to tradition. For the meaning of the word (*'almāh*) see VIRGIN; it is not the ordinary word for virgin (*bᵉthûlāh*), nor one which would be used if virginity was to be stressed. The definite article ('*the* young woman') may either indicate that the prophet had a particular woman in mind, or be generic, *i.e.* referring to a class, in which case the translation could be 'young women' in the sense of *any* young woman (RSV 'a young woman'). It has been argued that in 8[8] the translation should be '. . . . of the land, for God is with us' (cf v.[10]), but this would be nonsense in the context.

2. *Historical situation.*—In 734 B.C. Syria and Ephraim attacked Judah with the object of forcing her into an alliance against Assyria. Ahaz and his court were panic-striken (7[2]) and thought of appealing to Assyria for protection. This would have been to surrender both political and religious (cf 2 K 16[10–18]) independence. Isaiah offered Ahaz any miraculous sign he might ask from Yahweh as the assurance of Divine protection. The king declined to ask and cloaked his refusal in words of apparent piety (v.[12], cf Dt 6[16]). Whereupon Isaiah, addressing the whole court, stated that 'the Lord himself' (some MSS, including Dead Sea Scroll *a*, have 'Yahweh') would give them a sign. The sign was to be the birth of Immanuel.

3. *Was the sign a promise or a threat* ? This question is difficult to answer. Isaiah's pronouncement may have been enigmatical even to those to whom it was addressed. It may be that Is 7 was early expanded in attempts to interpret the sign, though there is little in it that is not in the vein of Isaiah, whose early pronouncements were mostly of impending judgment. Proposals to delete this or that verse have no text-critical support and have been dictated by the opinions of individual exegetes on how the question, promise or threat, should be answered. The only safe course is to take the text as it stands, except that 'the king of Assyria' (v.[17]) hangs loosely where it stands and is widely regarded as a later addition. It is clear that Isaiah was indignant with Ahaz (v.[13]). 'Therefore' (v.[14]) may preface a threat (cf 1[24] 5[13, 24]) but it could introduce a promise (cf Jer 16[14f]), and there is no exception to the rule that annunciations in the Bible are promises of good (Gn 16[11] 17[19], Jg 13[3], Mt 1[21], Lk 1[13f, 31f]). 'Curds and honey' (v.[15]) were luxury foods (Gn 18[8], Dt 32[14], Jg 5[25], 2 S 17[29], Job 20[17]; extra-biblical parallels could be quoted), though they do seem to indicate the breakdown of agricultural and a return to a pastoral economy (v.[22]). Syria and Ephraim are to be deserted (v.[16] 8[4]), and, if 'the king of Assyria' is omitted, the rest of v.[17] seems to anticipate prosperity unequalled since the disruption of Solomon's kingdom (cf Mic 5[3]). Finally, the refrain 'Yahweh of hosts is with us' occurs in a psalm in which exultation triumphs over desolation (Ps 46[7, 11]). We conclude that the sign was a promise but that Judah would suffer severe privation before what was good in it could be fully apparent (cf 8[8]).

4. *Who is the child* ?—(*a*) The traditional Christian interpretation is that the Immanuel pronouncement was nothing other or more than a prediction of the virgin-birth of Christ, and this seemed supported by the LXX rendering of *'almāh* by *parthenos*. But how could Ahaz be expected to act differently on a sign which was not to be fulfilled until seven centuries later ? Besides, it is clearly stated that by the time the child is weaned, Syria and Ephraim will be deserted (vv.[15f]). (That vv.[15f] refer to the weaning of the child is apparent from 2 S 19[35], where RSV rightly renders Hebrew 'know between good and evil' by 'discern what is pleasant [*sc.* to eat] and what is not.') And Damascus was destroyed in 733–732 B.C. (*b*) The Jewish view was that the *'almāh* was the wife of Ahaz, and the child Hezekiah. The Christian retort was that a comparison of 2 K 16[2] and 2 K 18[2] showed that Hezekiah must already have been nine years old. The Jews do not seem to have observed that the same passages would make Ahaz only eleven years older than his son, and that the chronology must be wrong somewhere. (*c*) Instead, they identified the *'almāh* with either the wife of Isaiah or another wife of Ahaz. But Isaiah calls his wife 'the prophetess' (8[3]) and it is unlikely that a woman who had already borne a child (Shear-jashub) would still be called *'almāh*. (*d*) Since the end of the 18th cent., Christians have largely abandoned the traditional interpretation. Many have taken the article with *'almāh* generically (see **1** above) and the import of the sign to be that by the time the children of women already pregnant have been born, the situation would be so improved that mothers would be calling their boys Immanuel. This makes Isaiah's solemn pronouncement little more than a note of time: 'before children shortly to be born grow up, certain things will have happened,' as if with the births of the Immanuel children all will be well; and that is not the overall impression which the pericope conveys. (*e*) Another version of this interpretation explains the *'almāh* as Zion personified, and 'Immanuel' as the coming generation. But the word for Zion and countries in such personifications is always *bᵉthûlāh*, not *'almāh* (see VIRGIN). (*f*) There have never been wanting scholars who have insisted that the passage must have a messianic reference of the kind implied in 2 S 7[12–16]. There must, it is said, to judge from Is 7[14] (*the 'almāh*) and Mic 5[3], have been an expectation of the birth of a 'wonder-child' to the house of David, one who would restore the tarnished fortunes of the dynasty. This would relate Is 7[14] once more to 9[1–7] and 11[1–9]. Babylonian and Egyptian parallels to such a wonder-child have been quoted. Whether we are impressed by them depends upon whether we are, or are not, convinced on general grounds that Israelite religion was influenced by Babylon and Egypt. Parallels from Greek religion are not very cogent, except insofar as they may indicate that certain ideas are common to nature religions everywhere; and Israelite religion is largely a protest against nature-(=Baal) worship. On the other hand, there is evidence enough in the OT that the Hebrews were influenced by their Canaanite neighbours and predecessors, especially in what concerned the kingship. And two passages from Râs Shamra texts have set the Immanuel problem in a new light. One is 'See! the *ġlmt* (=Heb. *'almāh*) will bear a son.' In the other, Danel cries 'for a son is born to me' (cf Is 9[6]). In both contexts the parents are of divine or at least royal dignity. Further, at Râs Shamra *ġlmt* and *btlt* (Heb. *bᵉthûlāh*) had a cultic rather than physiological signification. Of course, Is 7[14] and 9[6] cannot be direct quotations from tablets which had been buried for many centuries, but they do seem to indicate a survival of deeply-rooted expectations of an exceptional birth. While it is not certain, it is not impossible that the wife of king Ahaz, whose kingship had a sacral quality (see KING), could share something of his endowment, and be called 'the *'almāh*.' In that case the expected child might be Hezekiah, who, notwithstanding his faults, was a better king than his father (2 K 18[1–8]). The chronological difficulties are not decisive against this view: see (*b*) above. Not that Hezekiah, any more than Jesus (Mt 1[23f]), was actually named Immanuel. The name is symbolical and its meaning 'God is with us' (RSVm), not 'God-with-us.' How Isaiah could have known what, at the time, even Ahaz himself did not know, that the queen was pregnant and that her child would be a boy, it is perhaps vain to inquire; but there is every reason to believe that prophets were, on occasion, gifted with abnormal intuitive insight.

5. *Application to the Virgin-birth.*—The tentative conclusion that the proximate fulfilment of the Immanuel sign was the birth of Hezekiah does not rule out altogether the traditional interpretation of a longer range fulfilment in Christ, of which even Isaiah himself might have been quite unconscious. Christianity is the fulfilment not only of the higher religion of the OT but also of the twilight gropings of pagan nature religions.

When LXX translated '*almāh* by *parthenos* it was neither in ignorance nor with intent to deceive, but, as it now appears, because the translators were aware, whether fully or only vaguely, of the age-old tradition of a wonder-child. In that case they may have wished to make it clear that the '*almāh* was not any ordinary Hebrew wife and mother. In Mt 1^{23} *parthenos* has come to mean *virgo intacta*. But there is no evidence that the LXX interpretation of Is 7^{14} was sufficiently prominent or definite to give rise to the belief in the virgin-birth of Jesus. The text was quoted to illustrate the fact or the belief in the fact; the fact was not imagined to meet the requirements of the LXX reading. (Lk 1^{26-38} can hardly be read otherwise than as pointing to a virgin-birth and in it Is 7^{14} is not referred to.) Neither Is 7^{14} nor the LXX translation of it is *proof* of the Virgin-birth. Whether the nativity stories in Matthew and Luke are historical or not is therefore a question which must be decided on its merits; it lies outside the scope of the present article (see MARY, 4). C. R. N.

IMMER.—**1.** Eponym of a priestly family which returned to Jerusalem and sealed the covenant under Nehemiah, 1 Ch 24^{14}, Ezr 2^{37} 10^{20}, Neh 3^{29} 7^{40} 11^{13} (cf 1 Ch 9^{12}), 1 Es 5^{24} (AV **Meruth**, RV **Emmeruth**; cf Ezr 2^{37}) 9^{21} (AV, RV **Emmer**; cf Ezr 10^{20}); probably the same as **Amariah**, Neh 10^{3} $12^{2, 13}$. **2.** The father of a priest contemporary with Jeremiah, Jer 20^{1}. **3.** Apparently the name of a place in Ezr 2^{59}, Neh 7^{61}. The text is uncertain, however; cf 1 Es 5^{36} in RSV (AV, RV are quite different).

IMMORALITY.—See CRIMES AND PUNISHMENTS, 3.

IMMORTALITY.—The word 'immortality' is found five times in NT in AV and RSV, three rendering Greek *athanasia* (1 Co 15^{53f}, 1 Ti 6^{16}; so RV in both), and two rendering Greek *aphtharsia* (Ro 2^{7}, 2 Ti 1^{10}; RV 'incorruption' in both). The adjective 'immortal' is found in RSV in Ro 1^{23} and 1 Ti 1^{17} (AV, RV 'incorruptible' in both), where it renders Greek *aphthartos*, which is rendered 'imperishable' in 1 Co 15^{52} and 1 P 1^{23} (AV, RV 'incorruptible' in both). Immortality is ascribed to God (Ro 1^{23}, 1 Ti 1^{17}; cf Dt 32^{40}, Sir 18^{1}), to whom alone it belongs (1 Ti 6^{16}); it is desired by the Christian (Ro 2^{7}), brought to light through the gospel (2 Ti 1^{10}), promised to the believer (1 Co 15^{53f}), and attained through the resurrection by the Christian (1 Co 15^{52f}), who is born anew of imperishable seed (1 P 1^{23}).

In the book of Wisdom the idea of immortality or incorruptibility figures frequently. It is said to be the hope of the righteous (3^{4}), and attained through wisdom ($8^{13, 17}$ 15^{3}), and men are said to have been created for incorruptibility (2^{23}), through which they are brought near to God (6^{19}, where RSV has 'immortality'). It is there also declared that the incorruptible (RSV 'immortal') spirit of God is in all things (12^{1}).

See also LIFE and RESURRECTION.

IMNA.—An Asherite chief, 1 Ch 7^{35}.

IMNAH.—**1.** The eldest son of Asher, Nu 26^{44} (AV **Jimna**), 1 Ch 7^{30}. The gentilic **Imnites** stands in Nu 26^{44} (AV **Jimnites**). **2.** A Levite in the time of Hezekiah, 2 Ch 31^{14}.

IMPORTUNITY.—The Greek word so translated in Lk 11^{8} is literally 'shamelessness.' It is translated 'impudence' in Sir 25^{22}. These are its only occurrences in the Bible. It is probable, however, that it had lost some of its original force, and that 'importunity' is a fair rendering. The English word signified originally 'difficulty of access' (*in-portus*), hence persistence. It is now practically obsolete, and 'persistence' might have been used.

IMPOTENT.—This word, now obsolescent in common speech—it is not used in RSV—means literally 'without strength.' It is used in AV as the translation of Greek words which mean 'without power' (Bar 6^{28}, Ac 14^{8}) or 'without strength' (Jn $5^{3, 7}$, Ac 4^{9}). 'When religion is at the stake,' says Fuller (*Holy State*, ii. 19, p. 124), 'there must be no lookers on (except impotent people, who also help by their prayers), and every one is bound to lay his shoulders to the work.'

IMPRISONMENT.—See CRIMES AND PUNISHMENTS, 9.

IMRAH.—An Asherite chief, 1 Ch 7^{36}.

IMRI.—**1.** A Judahite, 1 Ch 9^{4}. **2.** Father of Zaccur, who helped to build the wall, Neh 3^{2}.

INCANTATIONS.—See MAGIC, DIVINATION, AND SORCERY.

INCARNATION.—The word is a non-biblical theological term to state the Christian conviction that in Jesus Christ God 'has visited and redeemed his people' (Lk 1^{68}). Christianity consists in faith in the person, Jesus Christ, who in consequence of the significance which He has acquired in the life and experience of His followers is believed to be more than man; He is believed to be in some genuine sense Divine, so that He can be described as being 'as human as any man, as Divine as God himself.' This article will consider the Biblical material which bears upon the Christian assertion, with a brief reference in conclusion to the development of christological thought in the early history of the Church.

1. OT intimations.—At one time it was thought that the OT contained 'prophecies' clearly pointing to the appearance of God incarnate in history. In more recent years, a somewhat sophisticated use of typology has often approximated this view. A critical study of the documents, in the light of modern historical science, can build little on such a foundation, however valuable it may be in some metaphorical sense. On the other hand, the OT conception of man as made in 'the image of God' (Gn 1^{26} 9^{6}), however this be interpreted, and the general Jewish notion of man's sharing, to some extent at least, in the moral attributes of God, suggest that man is made for communion with his Creator by the exercise of his freedom in obedience to the Divine purpose. Furthermore, the OT plainly emphasizes the Divine revelation through historical events as well as by prophets to whom the Word of God comes. The Jewish belief that history is moving to some great consummation, in which God will fulfil His object in creation, is also significant at this point. In this consummation Messiah would have an important rôle, although the interpretation of this rôle varied greatly.

The tendency in Jewish thought to distinguish somewhat between God and His actions and His attributes came at length to what amounted almost to an hypostatization of the latter; especially was this true for 'Word' and 'Wisdom.' In Proverbs (8^{22}) as well as in the Wisdom literature found among the apocryphal writings (*e.g.* Wis 7^{23}), the references to the Wisdom of God seem almost to make clear a distinct mode of existence of a personal sort for God's activity in the affairs of men. Hellenistic Judaism, as represented by Philo, went far beyond this, especially with respect to the Word of God. Finally, the messianic concept, already noted in connexion with the consummation of God's purposes, pointed to some figure who as the agent of God would be both on the Divine side of the action and also in some sense an historical and human figure.

Along these different lines, we have intimations that the religious experience and faith of the OT require for their fulfilment some further action on God's part in which God and man would be brought into a close unity, to be shared in by those whom God would make His people.

2. The NT material.—It should be understood that the historical figure of Jesus does not, as such, compel the interpretation of Him as Divine; that He is the incarnation of God is a religious judgment made on the basis of the total impression of His person and the consequences of His life, teaching, mighty works, death, and resurrection. Thus we see, in the first place, that the NT is clear on the true humanity of Christ. He was truly born, although the traditional legends about His birth imply a miraculous departure from normal

procreation. He developed gradually (Lk 2^{52}), shared the ordinary experiences of hunger (Mt 4^{2}), fatigue (Mk 4^{38}), and limitations in knowledge (Mk 13^{36}); he felt human emotion (Mk 14^{33}), a sense of compassion (Mk 8^{2}) and anger (Mk 8^{12}). This list could be extended if the evidence of the Fourth Gospel were cited. Furthermore, he underwent real death on the Cross. Thus it is clear that the gospels cannot be interpreted as presenting a Jesus who is less than full man.

On the other hand, the NT testifies to the conviction that He is more than man. In the Pauline epistles Jesus is taken to be the Christ of God, who in the fully developed Pauline interpretation, as in Colossians (1^{18}), is that one in whom 'all the fullness of God was pleased to dwell.' Even in earlier Pauline epistles (*e.g.* Galatians), there is no doubt of the unique relationship to God which Jesus is believed to have enjoyed, nor of His unique place in the effecting of God's purpose among men. The fact that He is the 'living Lord,' risen from the dead, is understood to mean that by God's mighty act His earthly ministry was vindicated and He was 'designated Son of God in power according to the Spirit of holiness by his resurrection from the dead' (Ro 1^{4}). In later Pauline thought He is the 'principle of concretion' of the whole creation, through whom all things have come into being and in whom they hold together (Col 1^{17}). The teaching of Hebrews and the Johannine literature (especially the prologue of the Fourth Gospel, Jn 1^{1-18}) similarly exalts Jesus to a place which is, in effect, fully Divine. Thus we can say that the primitive Christian evaluation of Jesus, as found in the NT itself, is such that He is not only man in the fullest sense but also in some genuine fashion at one with God and even (as in Jn 1^{1} and elsewhere in NT) Himself fully Divine.

An older reading of the gospels suggested that Jesus made such claims for Himself. It would appear impossible to maintain this to-day; but it can be said that He spoke 'with authority,' that His whole life appeared to those who knew Him to be so filled with creative goodness that a later interpretation could rightly say that He was 'without sin'; that He regarded Himself as integral to the accomplishment of the Divine purpose (either as the last of the Prophets or as Messiah Himself), that He demanded a kind of allegiance which no man before Him seems to have asked, and that His 'mighty works' of healing and exorcism manifested His close relationship with the source of all health and divine power. The impression which He made, coupled with the compelling quality of His teaching and His obvious intimate communion with the Father, was such that His rising from the dead appeared to be, in one sense, the most natural thing in the world. As an early writer credits Peter with saying, one such as He could not be held by death (Ac 2^{24}).

But whatever may be thought of the details of the gospels, the fact remains that the risen Lord was a present and effectual reality in the primitive Christian experience. He could not be contained within any set of ideas which made Him only the greatest of men; and the later NT literature shows that increasingly exalted claims were made for Him, until in the end He is acclaimed as 'the Word of God,' who 'became flesh and dwelt among us, full of grace and truth' (Jn 1^{14}). This is obviously a judgment of faith in the light of experience and the facts which were experienced; it contains, none the less, the unique differentia of Christianity from all other religions.

3. Purpose and results of the Incarnation.—These may be considered under four headings: (1) *The redemption of men.* This is the major emphasis in the Pauline teaching, in which Jesus Christ is affirmed to be the saviour from sin, who by an act of sacrifice reconciled men with God (see ATONEMENT). (2) *The supreme revelation of God.* Whatever may have been known of God otherwise—and the NT does not deny that there is such knowledge (cf Ac 14^{17}, Ro 1^{20})—in Him God has been revealed as perfect love, as 'Christ-like'; and this revelation has not been by word only but by a life lived on this earth. (3) The bringing of men into *fellowship with God.* Christ not only offers a perfect example of what man is intended to be, in the Divine purpose, by reason of His obedience to His Father (Jn 8^{29}); He makes it possible for His followers to share in His relationship with the Father. This occurs in Christ's Body the Church, about which Paul writes at length in Romans, 1 Corinthians, and Colossians (cf also Ephesians, where a Paulinist continues the theme). Thus the union of God and man achieved in Christ is one in which others may participate as they are made one body with the Lord. (4) *The consummation of the Divine plan*, both in humanity and in the cosmos. This conception, found in Colossians and Ephesians, suggests that Christ is the central fact of human history; he is also, in some sense, the embodiment of the Divine cosmic principle of unity by which all things are brought to their purposed fulfilment.

4. Later Christology.—It was on the basis of this NT material that the Church in later times worked out its doctrinal statement of the Incarnation. Through a period of controversy in which many suggested views were put forward and rejected as inadequate or misleading, the Church came finally to believe that the significance of the person of Jesus Christ is such that three things must be said concerning Him: (*a*) He is truly man, and man in the fullest sense; (*b*) He is truly Divine, although He is not *all* of God—He is, rather, the Word of God; or, more carefully stated, that in Him which is Divine is the second hypostasis of the triune God, the Son or Word; and (*c*) the humanity and the divinity are in Him united so closely that this union is appropriately called, not 'they' but 'he.' Alexandrine thought tended to speak of this union in such a fashion that the divinity in a sense engulfed the humanity; Syrian (Antiochene) thought sought to preserve more carefully the distinction between humanity and divinity, while yet insisting on the intimate and abiding reality of the union of the two in Christ. The former has tended to think of Jesus *as* God; the latter has rather thought of Jesus as that One *in whom* God lived as man.

The Christian faith is in the Incarnate Lord Himself, as a person, in whom God is known, worshipped, served; the doctrine of the Incarnation is an attempt to state the significance of this faith in terms which will preserve its fullness. Provided the basic facts of this faith are preserved, the Church has felt at liberty to continue its task of discovering human language which will not inadequately state the place which Jesus Christ holds in relation to God and man; the classical definitions are not so much stop-signs as pointers to indicate the right direction for all such interpretations of His significance. See CHRISTOLOGY. W. N. P.

INCENSE.—(1) *l^ebhônāh*, which should always be translated 'frankincense' (q.v.). It was white in colour, hence the Hebrew name. It was burnt with the cereal offering (Lv $2^{1,2,15f}$ 6^{15} etc.), and offered with the showbread (Lv 24^{7-9}). (2) *k^etôreth*, literally 'smoke.' In pre-exilic writings, the reference is to the smoke of the fire-offerings, but in post-exilic writings, it refers to incense: cf Is 1^{13} and Lv 10^{1}, Ezk 8^{11} etc. (3) The Greek *thymiama* (Lk 1^{10}, Rev 5^{8} 8^{3} 18^{13}) is strictly a spice used for incense, fumigation, or embalming. In the NT it means 'incense' generally. The holy incense (Ex 30^{34}) was made from spices and frankincense in equal portions. The spices were resin, aromatic shell, and galban. These were mixed, salted, and ground into a fine powder. The incense of later times was more complicated and had thirteen constituents (*BJ* v. v. 5 [218]). It was offered daily (Jth 9^{1}, Lk 1^{8-10}). N. H. S.

INCENSE, ALTAR OF.—See TABERNACLE, 6 (*c*), and TEMPLE, 9.

INCEST.—See CRIMES AND PUNISHMENTS, 3.

INDIA (Heb. *Hōddû*) is named as the E. boundary of the empire of Ahasuerus, Est 1^{1} 8^{9}. The Hebrew is contracted from *Hondu*, the name of the river Indus.

It indicated the country through which that river flows; not the great peninsula of Hindustan. So also in 1 Mac 8[8], Ad. Est 13[1] 16[1], 1 Es 3[2]. Possibly the drivers of the elephants (1 Mac 6[37]) were true Indians. If India proper is not named, there is little doubt that from ancient times Israel had relations with this country, by means of the caravan trade through Arabia. Many of the articles of commerce in the account given of this trade are of Indian origin; *e.g.* 'ivory and ebony,' 'cassia and calamus,' 'embroidered work,' and 'carpets of coloured stuff' (Ezk 27[15, 19, 24]). W. E.

INDITE.—This English verb is now somewhat old-fashioned. When it is used it means 'to write.' But formerly, and as found in AV, it meant to inspire or dictate to the writer. Thus St. Paul indited and Tertius wrote, Ro 16[22]. The word occurs in the Preface to the AV and in Ps 45[1] AV 'My heart is inditing a good matter.' In the Douai version (though this word is not used) there is a note: 'I have received by divine inspiration in my hart and cogitation a most high Mysterie.'

INFIDEL.—This word has more force now than formerly. In AV it signifies no more than 'unbeliever.' It occurs in 2 Co 6[15], 1 Ti 5[8] (RV and RSV 'unbeliever' in both). So 'infidelity' in 2 Es 7[44] is simply 'unbelief' (Lat. *incredulitas*).

INGATHERING.—See Tabernacles (Feast of).

INHERITANCE.—It is a remarkable fact that the Hebrew language fails to discriminate between the inheritance of property and its possession or acquisition in any other manner. The two words most constantly used in this connexion denote the idea of settled possession, but are quite indeterminate as to the manner in which that possession has been acquired. As might easily be inferred, from the historical circumstances of Israel's evolution, the words became largely restricted to the holding of land, obviously the most important of all kinds of property among a pastoral or agricultural people.

I. Inheritance in Law and Custom.—**1. Property.**—While land was the most important part of an inheritance, the rules for succession show that it was regarded as belonging properly to the family or clan, and to the individual heir only as representing family or tribal rights. Cattle, household goods, and slaves would be more personal possessions, which a man could divide among his sons (Dt 21[16]). Originally wives, too, as part of the property of the deceased, would fall to the possession of the heir-in-chief (cf 2 S 16[20–23], 1 K 2[13ff]).

2. Heirs.—(*a*) The *firstborn son*, as the new head of the family, responsible for providing for the rest, inherited the land and had also his claim to a double portion of other kinds of wealth (Dt 21[17]). To be the son of a concubine or inferior wife was not a bar to heirship (Gn 21[10], 1 Ch 5[1]); though a jealous wife might prevail on her husband to deprive such a son of the right of succession (Gn 21[10]). That a father had power to transfer the birthright from the firstborn to another is implied in the cases of Ishmael and Isaac (Gn 21[10]), Esau and Jacob (27[37]), Reuben and Joseph (1 Ch 5[1]), Adonijah and Solomon (1 K 1[11ff]). But this was contrary to social usage, and is prohibited in Dt 21[15–17]. Moreover, the exceptions to the rule are presented as examples of a Divine election rather than a human preference (Isaac, Gn 21[12]; Jacob, Mal 1[2f], Ro 9[13]; Joseph, Gn 49[24ff]; Solomon, 1 Ch 22[9f]), and can hardly be adduced as survivals of the ancient custom of 'Junior Right.' (*b*) At first a *daughter* could not succeed (the inheritance of the daughters of Job [Job 42[15]] is noted as exceptional)—an arrangement that has been referred either to the influence of ancestor-worship, in which a male heir was necessary as priest of the family cult, or to the connexion between inheritance and the duty of blood revenge. For unmarried daughters, however, husbands would almost invariably be found. In the case of the daughters of Zelophehad (Nu 27[1–11]) we see the introduction of a change; but it is to be noted that this very case is associated with the provision (Nu 36[1–12]) that heiresses should marry only within their father's tribe, so that the inheritance might not be alienated from it. (*c*) For the *widow* no immediate place was found in the succession. So far from being eligible as an heir, she was strictly a part of the property belonging to the inheritance. According to the levirate law, however, when a man died leaving no son, his brother or other next-of-kin (*gō'ēl*) must marry the widow, and her firstborn son by this marriage became the heir of her previous husband (Dt 25[6]). (*d*) For the *order of succession* the rule is laid down in Nu 27[8–11] that if a man die without male issue the right of inheritance shall fall successively to his daughter, his brothers, his father's brothers, his next kinsman thereafter. The provision for the daughter was an innovation, as the context shows, but the rest of the rule is in harmony with the ancient laws of kinship.

II. National and Religious Inheritance.—**1.** The possession of the land of Canaan was commonly regarded as the inheritance of the whole people. In this particular case the inheritance was won only as the result of conflict and effort; moreover, theoretically at any rate, it involved the annihilation of the previous inhabitants. Consequently the inheritance of Canaan was not entirely devoid of the idea of succession. But the extermination of the Canaanites was never effected; and although the conquest was achieved only by the most strenuous effort, yet the Israelites were so strongly impressed with a vivid sense of Yahweh's intervention on their behalf, that to subsequent generations it seemed as if they had entered into the labours of others, not in any sense whatever by their own power, but solely by Yahweh's grace. The inheritance of Canaan signified the secure possession of the land, as the gift of God to His people. 'The dominant Biblical sense of inheritance is the enjoyment by a rightful title of that which is not the fruit of personal exertion' (Westcott, *Heb.*, 168).

2. It is not surprising that the idea of inheritance soon acquired religious associations. The Hebrew mind invested all social and political institutions with a religious significance. As Israel became increasingly conscious of its mission *in*, and began dimly to apprehend its mission *to*, the world, the peaceful and secure possession of Canaan seemed an indispensable condition of that self-development which was itself the necessary prelude to a more universal mission. The threatening attitude of the great world powers in the eighth and subsequent centuries B.C. brought the question prominently to the front. Over and over again it seemed as if Jerusalem must succumb to the hordes of barbarian invaders, and as if the last remnant of Canaan must be irretrievably lost; but the prophets persistently declared that the land should not be lost; they realized the impossibility of Israel's ever realizing her true vocation, unless, at any rate for some centuries, she preserved her national independence; and the latter would, of course, be wholly unthinkable without territorial security. The career of Israel, as a nation, the influence, even the existence, of its religion, would be endangered by the dispossession of Canaan; moreover, it was recognized that as long as the people remained true to Yahweh, He on His part would remain true to them, and would not suffer them to be dispossessed, but would make them dwell securely in their own land, in order that they might establish on their side those conditions of righteousness and justice which represented the national obligations, if Yahweh's covenant with them was to be maintained.

3. The possession of the land, the inheritance of Canaan, symbolized the people's living in covenant with their God, and all those spiritual blessings which flowed from such a covenant. And inasmuch as the validity of the covenant implied the continuance of Divine favour, the inheritance of the Holy Land was viewed as the outward and visible sign of God's presence and power among His own. We know how the remorseless

logic of history seemed to point to an opposite conclusion. The Exile spelt disinheritance; and disinheritance meant a great deal more than the loss of a little strip of territory; it meant the forfeiture of spiritual blessings as a consequence of national sin. The more ardent spirits of the nation refused, however, to believe that these high privileges were permanently abrogated; they were only temporarily withdrawn; and they looked forward to a new covenant whose spiritual efficacy should be guaranteed by national restoration. In the reconstituted theocracy, the Messiah figured as the mediator both of temporal and of spiritual blessings. The idea of a restored inheritance suggested at once the glorious anticipations of the Messianic age, when the people, not by works which they had done, but by Yahweh's grace, should recover that which they had lost; and renew the covenant that had been broken.

4. In this sense 'the inheritance' became almost equivalent to the Messianic salvation; and participation in this salvation is not a future privilege, but a present possession. In the OT the secure inheritance of the Holy Land was the outward symbol of these spiritual blessings; under the New Dispensation they are assured by membership in the Christian body.

5. As every Jew regarded himself as an inheritor of the land of Canaan, so also is each Christian an inheritor of the Kingdom of heaven. He is not the heir, in the sense of enjoying an honorary distinction, or of anticipating future privileges; but as one who is already in a position of assured privilege, conferred upon him with absolute validity. As Lightfoot remarks, 'Our Father never dies; the inheritance never passes away from Him; yet nevertheless we succeed to the full possession of it' (*Galatians*[8], 165).

6. Three particular usages remain to be noticed. (*a*) The Jews never lost the conviction that Yahweh was the supreme overlord of the land, and of the people that dwelt in it. Accordingly Canaan is the Holy Land, and Yahweh's own inheritance; and Messiah when incarnate 'came to His own country, and His own people received Him not.' (*b*) The Jews also recognized that the possession of Canaan had value only in so far as it assured them of the free exercise of their religion, and all other spiritual blessings. This they strove to express by boldly declaring that Yahweh was Himself the inheritance of His people. (*c*) The Messiah, through whom the disinheritance should be brought to a close, and the covenant should be renewed, was naturally regarded as the supreme 'inheritor' or 'heir' of all the promises and privileges implied in the covenant. As, moreover, the Messiah's unique relation to the Father became more clearly defined, the idea of His inheritance, connoting His unique primogeniture and universal supremacy, became enlarged and expanded. It was, moreover, through the humanity which He restored that the Son proved and realized His heirship of all things: and thus His actual position is the potential exaltation of redeemed mankind. J. C. L. and E. A. E.

INIQUITY.—See Sin.

INJURIOUS.—In the language of the AV 'injurious' is more than hurtful; it is also insulting. It 'adds insult to injury.' It occurs Sir 8[11], 1 Ti 1[13]; and the Greek word used in these places is in Ro 1[30] translated 'despiteful' (RSV 'insolent').

INK is mentioned once in OT, Jer 36[18]. Ex 32[33] and Nu 5[23] are adduced as evidence that the old Hebrew ink (derived from lamp black [?]) could be washed off. From the bright colours that still survive in some papyri, it is evident that the ink used by the Egyptians must have been of a superior kind. Moreover, in Israel metallic ink is known to have been used as early as the fall of Jerusalem in 586 B.C., since the ink used in the Lachish Letters contained iron (cf *Lachish I*, pp. 188 ff). On the other hand, the ink used for the Dead Sea Scrolls was made of carbon (cf H. J. Plenderleith, *JTVI* lxxxii, 146 f). The *Letter of Aristeas* (176) says that the copy of the Law sent to Ptolemy II. was inscribed in gold, but later practice forbade the writing of Biblical works in anything but black, effaceable ink (cf *JE* viii. 303b). The NT term for 'ink,' occurring three times (2 Co 3[3], 2 Jn 12, 3 Jn 13) is *melan* (literally 'black'). See, further, under Writing.

INKHORN.—In one of Ezekiel's visions (Ezk 9[2f. 11]) a man appears with a scribe's inkhorn (RSV 'writing case') by his side (literally 'upon his loins'). The 'inkhorn' consisted of a case for the reed pens, with a cup or bulb for holding the ink, near the upper end of the case. It was carried in the girdle (hence the above expression).

INN.—See Hospitality.

INNER MAN.—The contrast implied by this expression is found in the Pauline correspondence and in the literature for the guidance of early churches. The author of 1 Peter points up the antithesis between the adorning of the visible body and 'the imperishable jewel of a gentle and quiet spirit,' 'the hidden person of the heart' (3[3f]). Paul sharpens the ethical contrast between the 'inmost self,' which delights in the law of God, and the 'members,' in which the 'law of sin . . . dwells' (Ro 7[22f]). On one hand is the law which passion blindly follows, on the other is the informed conscience which yields a reasoned and delighted obedience.

Different from this is the contrast in 2 Co 4[16f], where 'our outer nature,' decaying and dying, stands over against 'our inner nature,' which is in a constant state of renewal. Here is the antithesis of the 'transient' and the 'eternal' elements in man's complex personality. The author of Ephesians employs the phrase, 'the inner man,' to describe the entire basis of man's higher life, on which God's spirit works and in which Christ dwells (3[16f]). Correct moral and intellectual apprehension of the work of Christ depend upon the rootage of this 'inner man' in the Divine love which surpasses knowledge (cf Jn 3[16]). J. R. W.—H. H. H.

INSCRIPTIONS.—Ancient texts executed by a craftsman. They are the concern of **Epigraphy** (q.v.). The inscriptions in question may then be specified by language, people, or region of origin, or some other distinguishing characteristic. The interest in collecting Latin and Greek inscriptions is of long standing. Those in Italy and Europe were naturally collected first. Travel and exploration and finally excavation vastly increased the number. One of the greatest of inscriptions is that of Darius I. at **Behistun,** first copied by Sir Henry Rawlinson. The greatest inscription of the classical period is the *Monumentum Ancyranum*—the account of the stewardship of Caesar Augustus, composed as he approached death in A.D.14. Mystifying, of course, were the inscriptions in unknown languages that travellers copied in the East. The short Persepolis inscriptions in wedge-shaped writing were successfully deciphered by Grotefend. (1802), but their Old Persian language only became more thoroughly understood by Rawlinson's decipherment of the Behistun text (1846 f). Since that text was trilingual it also gave the key to the Babylonian-Assyrian and the Elamitic languages, though progress with the former was so rapid only because of the syllabaries found in the excavations at Nineveh. The famous **Rosetta stone,** discovered in trench-digging by Napoleon's soldiery, and giving a hieroglyphic and demotic Egyptian text with a Greek translation, furnished Champollion the key to deciphering the hieroglyphs (from 1821 on) and thus opened the world of ancient Egypt. Much effort and ingenuity was expended on the hieroglyphic writing that first was observed on the 'Hamath Stones,' and that was identified as 'Hittite,' when the historical rôle of that people became known. Great progress was made in recent years, and Bossert's discovery of a bilingual Phoenician and hieroglyphic-Hittite inscription at Karatepe in Cilicia assures full success. The oldest alphabetic inscriptions are the **Sinaitic** ones found by Petrie at *Serābîṭ el-Khādem* and first deciphered by Gardiner (1917). The Phoenician inscriptions were first dealt with in satisfactory manner in 1837 by W.

Gesenius, the father of Hebrew grammar and lexicography of the modern era. **Hebrew** inscriptions, found on coins and seals (see SEAL, SIGNET), were obviously written in the same script, if less gracefully executed, as the Phoenician. Actual Hebrew inscriptions apart from the brief ones just mentioned seem to begin with the calendar inscription discovered at Gezer, now held to be of the 10th cent. B.C. To the last third of the 9th cent. belongs the stela of king **Mesha** (q.v.) of Moab, which showed that the Moabites spoke a language identical with Hebrew. The Siloam inscription of Hezekiah's time (*c* 700 B.C.) found in the Siloam tunnel in 1880, and the short inscription that was cut out from over a rock tomb near Siloam village, commemorating a 'steward of the house' such as Shebna (Is 22^{14f}), are the leading examples of real pre-exilic Judaean inscriptions. The Samarian ostraca of the time of Jeroboam II. and the Lachish ostraca of *c* 589 B.C. provide important texts in old Hebrew writing, but are outside the definition of inscriptions. In post-exilic times the related Aramaic style of writing, which first became known to scholars through inscriptions and papyri from Egypt, supplanted the old Hebrew style. The present Hebrew 'square' script is descended from it. The name of 'Tobiah,' carved over a rock tomb at '*Arâq el-Emîr* in Transjordan, probably in the 3rd cent. B.C., and commemorating a successor of the Tobiah of Neh 2^{19} etc., is in this Aramaic type of writing. There were, however, revivals or conservative continuations of the old Hebrew script, as shown by Jewish coins of *c* A.D. 70 and of the Bar-Cochba revolt (as well as by some Dead Sea scroll texts). Aramaic not only in script but in language are ossuary inscriptions, and above all the plaque mentioning king Uzziah of Judah (cf Is 6^{1}) discovered in a Jerusalem collection by Sukenik in 1931.

Greek inscriptions naturally have great interest and importance for the student of the NT and of the early Church. The inscription from the Jewish temple, of the time of Herod, found by Clermont-Ganneau, warning Gentiles from entry into the hedge and *peribolos* around the sacred precincts, deserves outstanding mention. Important, too, is the Theodotus inscription found by Weill in his 1913–1914 excavations. For it necessarily antedates the fall of Jerusalem and was apparently set up in honour of a freedman, and may even mark the site of the synagogue of the Libertines of Ac 6^{9}. The Greek ossuary inscriptions from Palestine are naturally also of considerable interest for their personal names. Most Greek inscriptions, notably in the Roman *Provincia Arabia* are of later vintage (from the 5th cent. on). Those at Gerasa, city of the Decapolis, are illustrative of the life of this period. The Roman mile-stone inscriptions (bilingual) mention the name of the emperor under whom a road was built or repaired, the provincial officials and the distance to the next place.

Of greater interest, however, to the student of the Bible are such inscriptions as the one on the altar of Demeter at **Pergamum**, which the torch-bearer Kapiton dedicated to 'unknown gods.' as it must have been such a one that Paul saw at Athens (Ac 17^{23}). Important, too, is the Gallio inscription from Delphi, which helps to fix the date of the proconsul in whose time Paul came to Corinth (Ac 18^{12f}). On the theological side a considerable interest attaches to such inscriptions as those from Priene and Halicarnassus, in which the natal day of the emperor Augustus is viewed as bringing on the golden age and in which he is celebrated as Sōtēr or saviour, much as Jesus is in the Pastoral epistles and in the Gospel of John. A recently discovered inscription has helped to fix the site of **Derbe** (q.v.). There are thus innumerable points of contact between study of inscriptions and that of the Bible.

Inscriptions may be either of a public or private character. To the former class belong those recording laws, decrees, treaties, etc. Those of a private nature are chiefly mortuary, memorial or dedicatory. The Latin inscriptions have been collected most fully in the CIL (*Corpus inscriptionum Latinarum*, 1863–1899), the Greek inscriptions in the CIG (*Corpus inscriptionum Graecarum*, 1825–1877), and its successor IG (*Inscriptiones Graecae*, 1902 ff). Selected Greek inscriptions are conveniently given in the works of W. Dittenberger, *Sylloge inscriptionum Graecarum*, ed. 1898–1901, and *Orientis Graecae inscriptiones selectae*, 1903–1905; Latin in H. Dessau, *Inscriptiones Latinae selectae*, 1892–1916. For the Semitic inscriptions (exclusive of the cuneiform) the CIS (*Corpus inscriptionum Semiticarum*, 1888 ff) provides a great collection. The Hebrew inscriptions on seals, etc., will be found in D. Diringer, *Le iscrizioni antico-ebraiche palestinesi*, 1934. (See also references under EPIGRAPHY.) E. G. K.

INSPIRE, INSPIRATION.—In English the verb 'inspire' can be used in a wide variety of contexts, and this variety is reflected to some extent in the RSV, where the word appears thirteen times (it is absent from the AV). Besides the purely human efforts to inspire terror (Is 47^{12}) or to inspire horror (Jer 49^{16}), the Bible refers to the Divine activity in inspiring craftsmen to teach others (Ex 35^{34}) or in inspiring diverse spiritual gifts in the early Church (1 Co 12^{11}). Christians at Thessalonica experienced joy inspired by the Holy Spirit (1 Th 1^{6}), and Paul referred to the energy which Christ mightily inspired within him (Col 1^{29}). It was especially through prophets that God's Spirit operated, not only in the Old Testament days (Nu 24$^{2-4}$) when men moved by the Holy Spirit spoke from God (2 P 1^{21}), but also in the new dispensation when Simeon was inspired by the Spirit to recognize the identity of the child Jesus (Lk 2^{27}) and when prophetic utterances of persons in the early Church (Ac 11^{27f}, 1 Co 12$^{1-4}$, Eph 4^{11}) inspired fidelity of Christian testimony (1 Ti 1^{18}) and directed that the first missionaries be sent out (Ac 13^{1f}).

The noun 'inspiration,' which is absent from the RSV, appears twice in the AV. One of these passages (Job 32^{8}) declares that it is by Divine inspiration that man receives the capacity to discern what is right. The other passage (2 Ti 3^{16}), which makes an important predication regarding Scripture, is translated variously: AV, 'All scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness'; RV and ASV, 'Every scripture inspired of God is also profitable . . .'; RSV, 'All scripture is inspired by God and profitable for teaching . . .' Here Scripture (which in the context refers to the OT) is characterized as *theopneustic* (literally 'God-breathed'), that is, the product of the creative breath of God. The emphasis falls upon the first part of the Greek compound, '*God*-inspired,' calling attention to the Divine source of the authority of the OT. As God had breathed into man's nostrils the breath of life (Gn 2^{7}; cf Ps 33^{6}), so He breathed life-giving truth into the Jewish Scriptures. Nothing is said of *how* God inspired these writings; the author is concerned only to state that the fact of inspiration makes them profitable for religious purposes.

In accord with the implications of this classical passage, Jesus Christ and His apostles are consistently represented as recognizing the OT to be trustworthy history, true doctrine, and sure prophecy. Thus, Jesus acknowledges the authority of the prophets (Lk 24^{25}), states that the Holy Spirit had inspired David (Mk 12^{36}), and more than once bases arguments on the presupposition that Scripture cannot be broken (Mt 26^{54}, Lk 22^{37}, Jn 10^{35}). In a similar vein Peter (in Ac 1^{16}), James (Ja 4^{5}), Stephen (in Ac 7^{38}), and Paul (Ro 3^{2}) refer explicitly or implicitly to the OT as oracles of God which cannot be set aside. Even among the formulas with which NT authors introduce their quotations from the OT, several (*e.g.* 'It is written,' 'It says,' 'Scripture says,' and 'God [or He] says') indicate their high view of the authority of what is quoted. In fact, occasionally the last-mentioned formula is used to introduce words which are not ascribed to God in the OT passages, but are spoken of or even addressed to Him and can be considered God's words only because they are part of the Scripture text (*e.g.* Mt 19^{5}, Ac 4^{24f} 13^{35}, He 1$^{6-9}$ 4^{4}).

The doctrine of the inspiration of the NT grows out of the promise of Christ to His disciples that the Holy Spirit, whom the Father would send in His name, would teach them all things, and bring to their remembrance all that He had said to them (Jn 14[26]; cf 16[13]). The inspiration of Christ's own words is implied in His claim to be alone in knowing and revealing the Father (Mt 11[27]), and in His placing His own statements on a par with, or in some cases above, the revealed will of God in the OT (*e.g.* Mt 5[31-44]). In performing their work of proclaiming the Gospel, the apostolic authors are confident that they do so through the Holy Spirit (1 P 1[12]), to whom they attribute the content of their teaching (1 Co 2[13]). Therefore as spokesmen for God (1 Co 7[40], 1 Th 2[13]) they issue commands with the completest authority (1 Th 4[2, 15], 2 Th 3[6, 12]), and even make it the test of whether one has the Spirit that he should acknowledge that what they write are commandments of God (1 Co 14[37]). On the other hand, the fact that a NT writer occasionally quoted an OT passage out of its context (*e.g.* Mt 2[15] quoting Hos 11[1]) or altered its phrasing (*e.g.* He 10[5-7] quoting Ps 40[6-8]) shows that he did not consider himself bound by the literal form of the OT statement, but regarded his own interpretation to be a justifiable modification and/or application of the author's original meaning.

Throughout the history of the Church many theories of the nature and mode of inspiration have been elaborated. These have ranged from a theory of dictation which leaves no room for human effort and tends to overlook the stylistic idiosyncrasies of the several authors, making of them mere automata, to theories of varying degrees and kinds of inspiration, sometimes involving scarcely more than a general illumination and superintendence of God's Spirit. Amid all discussions of inspiration, it must not be overlooked that the primary question relates to the category of revelation—whether God has spoken. Only when it is acknowledged that God has disclosed His will is it meaningful to formulate a theory of how He has inspired the authors of Scripture. Whatever the formulation (verbal, plenary, dynamic, etc.), it is hard to conceive of an inspiration that does not pertain to the words of Scripture—for thought of necessity is expressed in words. That this, however, does not imply a mechanical, literalistic inspiration is evident from a consideration of the presence of divergent reports of sayings of Jesus in the Gospels. Not only in different Gospels (*e.g.* Mk 10[17ff] and Mt 19[16ff], Mt 9[9ff] and Lk 11[29ff]) but even within the same Gospel (*e.g.* Jn 3[3] and 3[7]; 8[51] and 8[52]; 13[10] and 13[11]) Jesus' words are found to vary in phraseology, though the idea conveyed in these divergent forms is usually the same. Furthermore, theories of inspiration must take account of the presence of occasional imperfections in the Bible as regards both style and statement. (Fortunately the religious conviction that the Scriptures are the only infallible rule of faith and life does not depend upon their formal inerrancy, otherwise no translation could be satisfactory.) Nor is it permissible to declare *a priori* what forms of literature it is appropriate for God to inspire; *e.g.* that He could inspire history, poetry, epistles, and prophecy to reveal His redemptive purpose, but not folk-sagas, legends, or myths. Such matters are to be determined inductively from the Scriptures themselves, not deductively from dogmatic presuppositions. A satisfying theory of inspiration will recognize that in the Scriptures *omnia ex Deo, omnia ex hominibus* ('all things are from God; all things are from men'), and that in some respects the relation of the human and the Divine in the written Word is analogous to the Incarnation of the living Word in human flesh. The testimony of the Church universal has been that the Bible is inspired in a sense in which no other book is inspired; that, having been produced by the effectual guidance of the Holy Spirit, it perfectly embodies the Divine revelation of God's saving will and work. See Revelation.

B. M. M.

INSTANT.—'Instant' and 'instantly' are now used only of time. In AV they have their earlier meaning of 'urgent,' 'urgently,' as in Lk 23[23] 'they were instant [RSV 'urgent'] with loud voices, requiring that he might be crucified'; Lk 7[4] 'they besought him instantly' (RSV 'earnestly'). Cf Erasmus, *Paraphrase*, i. 31, 'whoso knocketh at the doore instantly, to him it shal be opened.'

INSTRUMENT.—For musical instruments see Music. The word is also frequently used in AV (though only twice in NT, both times in Ro 6[13]) for any utensil, implement, or weapon; and in To 7[14], 1 Mac 13[42] for a legal document or deed (RSV 'contract'). RSV uses it frequently in OT and four times in NT.

INTERCESSION.—See Prayer.

INTEREST.—See Usury.

INTERMEDIATE STATE.—See Paradise, 3.

INTERPRETATION.—In general, in the Bible this means the clarification of obscure, uncertain or incomplete communication. But there is a considerable variety of particular connexions in which it is used.

1. Dreams were in ancient Israel commonly taken to be Divine communication. In many cases their sense was obvious and no explicit interpretation was needed (*e.g.* Gn 37[5-11]); but in others the meaning could not be known without interpretation. Such interpretation was recognized to be the province of the 'wise,' the class trained in the international polite learning, and of those skilled in magic. Dream interpretation is a central interest in the Joseph story, which has close connexions with the thought of Israelite 'wisdom' (Gn 40–41). The story dissociates interpretative skill from magic. Interpretation comes from God, and even where no skilled practitioner can be found God makes known the meaning to His humble but exemplary servant (40[8]). The wise of Egypt are seen to fail, while Joseph succeeds because the resource for interpretation is not his but God's (41[8, 15-16]). The dreams in the Joseph story are prophetic of the future. The same features occur in the Daniel stories, which belong to the same tradition in some respects as the Joseph story (Dn 2, 4). In Dn 2 the difficulty is heightened in that the king will not or cannot relate the dream which has to be interpreted.

Apart from the particular reference to dreams, the interest in the understanding and interpretation of the obscure remains a feature of Israelite wisdom down into late times, Pr 1[6], 2 Ch 9[1], Sir 47[17] (these two of Solomon), Ec 8[1], Wis 8[8].

2. Interpretation may also mean translation from one language to another. Such is the natural sense in Gn 42[23]; an Egyptian official would normally have an interpreter when dealing with Asiatic nomads. In modern English we use 'interpret' for this kind of immediate oral translation, but for written texts we tend to distinguish between 'translating' as literal rendering and 'interpreting' as a combination of exposition or commentary with translation. In the older English of the AV 'interpret' is often simply 'translate,' *e.g.* Mt 1[23], Mk 5[41]. But the boundaries between literal translation and interpretative rendering are not easily drawn. When the Jews came to translate their Scriptures from Hebrew, the results showed a wide range from literal accuracy to expository paraphrases; the LXX is quite literal in parts, while the Aramaic translation or Targum is often very free. It is probably the origin of this Targum that is narrated of Ezra in Neh 8[8]. Mention may be made at this point of the early Church tradition about the origin of the Gospels: Papias relates that Mark had been 'Peter's interpreter' and that Matthew 'put together the oracles in Hebrew, and each one interpreted (*i.e.* translated) them as he was able'; although there is considerable question how this latter statement is connected with the Gospels as we have them.

3. Once a recognized body of sacred tradition existed in Israel, a further kind of interpretation came to be needed and practised: the exposition of the tradition in

the sense of explanation of difficult passages and examination of their relevance and meaning for newer times. Going back a little farther, the shaping of the sacred tradition by its later redactions, the work of selecting, omitting, annotating and juxtaposing, is itself a kind of interpretation of the individual elements of material adopted. But with the consolidation of the tradition a new stage is reached. Daniel, a book which is much concerned with the interpreting of dreams and other supernatural communications, takes up in ch. 9 the interpretation of a difficult passage in Jeremiah. Here the solution is given by an angel (as normally in Dn 7–12); cf Job 33[23]. The problem exists for Daniel because he is trying to fit in the prophetic tradition with later history and the events of his own time, especially the desecration of the Temple under Antiochus.

Of great importance is the interpretative activity of the Qumrân community, which may reasonably be supposed to go back to before 100 B.C. Fragments have been found of numerous commentaries on prophetic and poetical passages, of which the most extensive is the Habakkuk commentary. The centre of the interpretative method is the attachment of the passages to the life of the Qumrân sect, so that the words of the prophet have their interpretation in incidents of its history, the work of its teacher, the machinations of its enemies, and features of its eschatological expectation. The Zadokite Document contains the same kind of interpretation. It is the conviction that the sect is living in the end of days and that the prophetic or obscure passages must now be in fulfilment which dominates the understanding of Scripture.

Jesus and the early Church likewise believed the eschatological promises to be coming to fulfilment in their time, and much of their sayings can be broadly stated to have dealt with scriptural interpretation. We do not, however, have from the NT period any verse-by-verse commentaries on the OT on the Qumrân pattern. But some broad surveys of Scripture appear, such as the Stephen speech (Ac 7). Curiously, however, the actual word 'interpretation' in this sense is hardly found, and much its most important occurrence is in Lk 24[27], where the risen Christ interprets to His disciples 'the things concerning himself in all the scriptures' (*i.e.* of the OT). For the Church with its entry into the Gentile world the problem of linguistic translation appears anew, but the story of the Day of Pentecost (Ac 2) sees in the making intelligible of the message to foreign ears the work of the Holy Spirit and a reversal of the baleful effects of the Tower of Babel incident.

4. From Corinth we hear of the activity in the Church of those who spoke with 'tongues,' unintelligible utterances (especially 1 Co 14). This is a good activity according to St. Paul and by no means to be prevented. But it is speaking to God and not to men; other members of the Church are not assisted by it, and therefore if some one speaks with tongues in the Church it should be interpreted (14[5, 27–28]) by himself or another, so that it may be understood and serve to the upbuilding of the Church. Such interpretation is a charisma or spiritual gift just as speaking with tongues is; the speaker should pray for it, for in the interpretation of the utterances the mind is exercised and becomes mature (1 Co 12[10] 14[13–15]).

5. A rather special case is 2 P 1[20], which asserts that scriptural prophecy is not a matter 'of one's own private interpretation.' It is possible that the contrast is between such personal interpretation and the interpretation of the Church as a whole, or of spiritually qualified persons in it. But nothing else is said about interpretation as such, and the rest of the argument is from the reliability of prophecy because of its *source*. It is therefore perhaps also possible that the contrast is between one's own interpretation, which is not the basis of the prophetic truth, and the intention, not of man but of God, which is the real origin and basis of prophecy (cf the treatment of the promises of the end in ch. 3). J. Ba.

INTREAT.—Besides the modern sense of 'beseech,' intreat (spelled also 'entreat') means 'deal with,' 'handle,' modern 'treat,' always with an adverb 'well,' 'ill,' 'shamefully,' etc. Coverdale translates Is 40[11] 'He shal gather the lambes together with his arme, and carie them in his bosome, and shal kindly intreate those that beare yonge.'

It is even more important to notice that when the meaning seems to be as now, viz. 'beseech,' the word is often in reality much stronger, 'prevail on by entreaty.' Thus Gn 25[21] 'And Isaac intreated (RSV 'prayed to') the Lord for his wife, . . . and the Lord was intreated of him,' *i.e.* yielded to the entreaty (RSV 'granted his prayer'). Cf Grafton, *Chron.* ii, 768, 'Howbeit she could in no wise be intreated with her good wyll to delyver him.'

In Jer 15[11] in AV and AVm the two meanings of the word and the two spellings are used as alternative renderings, 'I will cause the enemy to entreat thee well,' margin 'I will intreat the enemy for thee' (RV 'I will cause the enemy to make supplication unto thee'; cf RSV).

INWARDS, INWARD PARTS.—1. The former of these expressions is frequently found in AV and RV (Exodus and Leviticus), meaning the entrails (so RSV) or bowels of the animals to be sacrificed according to the Levitical institutions (Ex 29[13, 22], Lv 3[3, 9, 14] 4[8, 11] 7[3] 8[16, 21] etc.). The same idea is found in Gn 41[21], where EV has 'had eaten them up,' and LXX renders 'came into their belly' (see AVm which gives the alternative 'had come to the inward parts of them'; cf also 1 K 17[21] AVm). For the most part, however, the expression 'inward parts' (rare in RSV) is used in a metaphorical sense, to denote the contrast between the inward reality and the outward clothing of human character. Situated within the 'inward parts' is the capacity for wisdom (Job 38[36]; but RVm, RSV 'clouds'), truth (Ps 51[6]), ethical knowledge, and moral renovation (Jer 31[33] where 'inward parts' [AV, RV] is almost synonymous with 'heart,' cf Pr 20[30]). Here, too, lie hidden the springs of active wickedness (Ps 5[9]), and deceitful language (Ps 62[3] AVm). The power of deceiving as to character and motives comes from man's inherent ability to secrete, within the profound depths of the 'innermost parts,' his daily thoughts (Pr 18[8]; cf Ps 64[6]). At the same time, these hidden designs are as an open book, beneath the bright light of a lamp, to the Lord (Pr 20[27]; cf for a similar thought Ps 26[2] 7[9], Jer 11[20], Rev 2[23] etc.).

2. In the NT the expression is used only to denote the power of the hypocrites to deceive their fellow-men (Lk 11[39]; cf Mt 7[15] 23[28]). The curious phrase 'give for alms those things which are within' (Lk 11[41]) may be taken as an incidental reference by Jesus to the necessity and the possibility of man's inmost life being renewed and restored to a right relationship with God and men (cf Is 58[10]). At least it is permissible to take the word rendered 'the things which are within' as equivalent to 'the inward man,' or 'the inward parts' (see Plummer, *ICC, in loc.*; cf Mk 7[18f]). It is not enough to give alms mechanically; the gift must be accompanied by the spontaneous bestowal of the giver's self, as it were, to the receiver. J. R. W.

IOB.—See JASHUB, **1.**

IOTA.—See JOT AND TITTLE.

IPHDEIAH.—A Benjamite chief, 1 Ch 8[25] (AV **Iphedeiah**).

IPHEDEIAH, 1 Ch 8[25] (AV).—See IPHDEIAH.

IPHTAH.—A town in the Shephēlah of Judah, Jos 15[43] (AV **Jiphtah**); possibly modern *Taiqûmiya*.

IPHTAH-EL.—A ravine NW. of Hannathon, on the north border of Zebulun, Jos 19[14, 27] (AV **Jiphtah-el**); possibly modern *Sahl el-Baṭṭôf*.

IR.—A Benjamite, 1 Ch 7[12]; called **Iri** in v.[7].

IRA.—1. The Jairite who was *kōhēn* or priest to David, 2 S 20[26]. His name is omitted from the original (?) passage in 2 S 8[18], and from the passage in 1 Ch 18[17]. 'The Jairite' denotes that he was of the Gileadite clan

of the Jairites. The name probably means 'the watchful.' **2.** The Ithrite, one of David's heroes (2 S 23^{38}, where perhaps *Ithrite* should be *Jattirite*, from Jattir [q.v.]). **3.** The son of Ikkesh of Tekoa (2 S 23^{26}), another of David's heroes.

IRAD.—Son of Enoch and grandson of Cain, Gn 4^{18}.

IRAM.—A 'duke' of Edom, Gn 36^{43}, 1 Ch 1^{54}.

IR-HA-HERES.—In Is 19^{18} the name to be given in the ideal future to one of the 'five cities in the land of Egypt that speak the language of Canaan, and swear to Yahweh of hosts'; AV and RV 'one shall be called, The city of destruction'; RSV 'one of these will be called the City of the Sun.' The usually accepted explanation of the passage is that the name 'city of *heres*,' or 'destruction,'—or, more exactly, 'of tearing down' (the verb *hāras* being used of 'pulling' or 'tearing down' cities, altars, walls, etc., Jg 6^{25}, Is 14^{17}, Ezk 13^{14})—is chosen for the sake of a punning allusion to *heres*, in Hebrew a rare word for 'sun' (Job 9[7]), the 'city of *heres*,' or 'the sun' being a designation which might have been given in Hebrew to On (q.v.), the Heliopolis of the Greeks, a city a few miles NE. of the modern Cairo, in ancient times the chief centre of sun-worship in Egypt, and full of obelisks dedicated to the sun-god Re. The meaning of the passage would then be that the place which has hitherto been a 'city of the sun' will in the future be called the 'city of destroying,' *i.e.* a city devoted to destroying the temples and emblems of the sun (cf Jer 43^{13}). [The LXX have *polis hasedek*, *i.e.* 'city of righteousness,' a reading which is open to the suspicion of being an alteration based on 1^{26}.]

To some scholars, however, this explanation appears artificial; and the question is further complicated by historical considerations. The high priest Onias III., after his deposition by Antiochus Epiphanes in 175 B.C. (2 Mac 4^{7-9}), despairing of better times in Judah, sought refuge in Egypt with Ptolemy Philometor. He (or, according to some scholars, his son Onias IV.) conceived the idea of building there a temple dedicated to Yahweh, in which the ancient rites of his people might be carried on without molestation, and which might form a religious centre for the Jews settled in Egypt. Ptolemy granted him a site at Leontopolis in the 'nome,' or district, of Heliopolis, and there Onias erected his temple (Jos. *BJ* I. i. 1 [33], *Ant.* XIII. iii. 1–3 [62 ff], and elsewhere; Ewald, *Hist.* v, 355 f), not improbably at *Tell el-Yehūdîyeh*, about 10 miles N. of Heliopolis, near which there are remains of a Jewish necropolis (Naville, *The Mound of the Jew and the City of Onias*, pp. 18–20). In support of his plan, Onias had pointed to Is 19^{18} and its context as a prediction that a temple to Yahweh was to be built in Egypt (Jos. *Ant.* XIII. iii. 1 [68]). These facts have indeed no bearing on Is 19^{18}, supposing the passage to be really Isaiah's; but many modern scholars are of opinion that Is $19^{16\ (18)-25}$ are not Isaiah's, and even those who do not go so far as this would be ready to grant that 19^{18b} (from 'one shall be called') might be a later addition to the original text of Isaiah.

The following are the chief views taken by those who hold that this clause (with or without its context) is not Isaiah's. (1) Duhm and Marti render boldly 'shall be called Lion-city (*or* Leontopolis),' explaining *heres* from the Arabic *haris*, properly the 'bruiser,' 'crusher,' a poetical name for a lion. But that a very special and figurative application of an Arabic root, not occurring in Hebrew even in its usual Arabic sense, should be found in Hebrew is not probable. (2) Dillmann, while accepting the prophecy as a whole as Isaiah's, threw out the suggestion that $v.^{18b}$ was added after the temple of Onias was built, *heres*, 'sun' (so Symmachus, Vulgate, and some Hebrew MSS), being the original reading, which was altered afterwards by the Jews of Palestine into *heres*, 'destruction,' in order to obtain a condemnation of the Egyptian temple, and by the Jews of Egypt into *ṣedheḳ*, 'righteousness' (LXX), in order to make the prophecy more distinctly favourable to it. (3) Cheyne (*Introd. to Is.*, pp. 102–110) and Skinner, understanding $v.^{18}$ ('there shall be five cities,' etc.), not (as is done upon the ordinary view) of the conversion of Egyptian cities to the worship of Yahweh, but of Jewish colonies in Egypt maintaining their national language and religion, suppose $vv.^{16-25}$ to have been written in the latter years of the 1st Ptolemy (Lagi), *c* 290 B.C., when there were undoubtedly many Jewish settlements in Egypt. The original reading, these scholars suppose with Dillmann, was 'city of the sun,' the meaning that one of these colonies, preserving loyally the faith of their fathers, should flourish even in Heliopolis, the city of the sun-god. The reading was altered afterwards, when the Jews of Palestine began to show hostility towards the Egyptian temple, by the Jews of Egypt into 'city of righteousness' (LXX), and then further, by the Jews of Palestine, as a counter-blow, into 'city of destruction' (Hebrew text). S. R. D.—**R. J. W.**

IRI.—1. See IR. **2.** 1 Es 8^{62} (AV); see URIAH, **4.**

IRIJAH.—A captain who arrested Jeremiah on the charge of intending to desert to the Chaldaeans, Jer $37^{13f.}$

IR-NAHASH.—A city of Judah, 1 Ch 4^{12}; possibly modern *Deir Nakhkhâs*.

IRON.—1. Jos 19^{38} (AV, RV); see YIRON. **2.** See MINING AND METALS.

IRPEEL.—A city of Benjamin, Jos 18^{27}; possible *Rafât*, N. of Gibeon.

IRRIGATION.—Owing to the lack of a sufficient rainfall, Babylonia and Egypt have to be supplied with water from their respective rivers. This is conveyed over the country by canals. The water is conducted along these canals by various mechanical devices, and at a cost of great labour. In Palestine the need for artificial irrigation is not so great, as is indicated by the contrast with Egypt in Dt 11^{10}. As a rule the winter rainfall is sufficient for the ordinary cereal crops, and no special irrigation is necessary. The case is different, however, in vegetable and fruit gardens, which would be destroyed by the long summer droughts. They are always established near natural supplies of water, which is made to flow from the sources (either directly or raised when necessary, by a *sâkiyeh* or endless chain of buckets worked by a horse, ox, or donkey) into little channels ramifying through the garden. When the channels are, as often, simply dug in the earth, they can be stopped or diverted *with the foot*, as in the passage quoted. Artificial water-pools for gardens are referred to in Ec 2^{6}. A storage-pool is an almost universal feature in such gardens. R. A. S. M.

IR-SHEMESH.—See BETH-SHEMESH, **1.**

IRU.—The eldest son of Caleb, 1 Ch 4^{15}. The correct name is probably *Ir*, the -u being simply the conjunction 'and' coupling it with the following name Elah.

ISAAC.—Son of Abraham and Sarah. The meaning of the name is 'he laughs,' and several reasons for bestowing it are suggested (Gn 17^{17} 18^{12} 21^{6}). The narrative as it occurs in Scripture was derived from three principal sources, the hand of J being discernible in Gn 18^{9-15} $21^{1a, 2a, 7}$ 24 $25^{5, 11b, 21-26a, 27-34}$ 26^{1-33} 27^{1-45}, of E in 21^{6} 22^{1-19}, and of P in 17^{15-21} $21^{1b, 2b-5}$ $25^{11a, 19f, 26b}$ 26^{35} 27^{46}–28^{9} 35^{27-29}, although in some of these passages there are also indications of the JE redactor. Apparent discrepancies in the story, such as that Isaac, on his deathbed ($27^{1, 41}$), blessed Jacob, and yet did not die until many years afterwards (35^{27}), are evidently due to original differences of tradition, which later editors were not careful to remove. Viewed as coming from independent witnesses, they present no serious difficulty, and do not destroy the verisimilitude of the story. In outline the narrative describes Isaac as circumcised when eight days old (21^{4}), and as spending his early youth with his father at Beersheba. Thence he was taken to 'the land of Moriah,' to be offered up as a burnt-offering at the bidding of God; and if Abraham's unquestioning faith is the primary lesson taught (22^{12} 26^{5}, He $11^{17ff.}$), Isaac's child-like confidence in his father is yet conspicuous, with the associated sense of security.

His mother died when he was thirty-six years of age; and Abraham sent a servant to fetch a wife for Isaac from amongst his kindred in Mesopotamia, according to Gn 24, where the religious spirit is as noticeable as the idyllic tone. For many years the couple were childless; but at length Isaac's prayers were heard, and Rebekah gave birth to the twins, Esau and Jacob. Famine and drought made it necessary for Isaac to shift his encampment to Gerar (26[1]), where a story similar to that of Abraham's repudiation of Sarah is told of him (ch. 20, cf 12[10–20]). The tradition was evidently a popular one, and may have found currency in several versions, though there is no actual impossibility in the imitation by the son of the father's device. Isaac's prosperity aroused the envy of the Philistine herdsmen (26[20f]) amongst whom he dwelt, and eventually he withdrew again to Beersheba (26[23]). He appears next as a decrepit and dying man (27[1, 41]), whose blessing, intended for Esau (25[28] 27[4]), was diverted by Rebekah upon Jacob. When the old man discovered the mistake, he was agitated at the deception practised upon him, but was unable to do more than predict for Esau a wild and independent career. To protect Jacob from his brother's resentment Isaac sent him away to obtain a wife from his mother's kindred in Paddan-aram (28[2]), and repeated the benediction. The next record belongs to a period twenty-one years later, unless the paragraph (35[27–29]) relates to a visit Jacob made to his home in the interval. It states that Isaac died at Hebron at the age of 180. He was buried by his sons in the cave of Machpelah (49[31]).

Isaac is a less striking personality than his father. Deficient in the heroic qualities, he suffered in disposition from an excess of mildness and the love of quiet. His passion for 'savoury meat' (25[28] 27[4]) was probably a tribal failing. He was rather shifty and timid in his relations with Abimelech (26[1–22]), too easily imposed upon, and not a good ruler of his household—a gracious and kindly but not a strong man. In 26[5] he is subordinated to Abraham, and blessed for his sake; but the two are classed together along with Jacob (Ex 2[24] 3[6], Mt 8[11] 22[32], Ac 3[13] *et al.*), as the three leading patriarchs of Israel, and in Am 7[9, 16] 'Isaac' is used as a synonym for Israel. If therefore the glory of Isaac was partly derived from the memory of his greater father, the impression made upon posterity by his almost instinctive trust in God (Gn 22[7f]) and by the prevailing strength of his devotion (25[21]) was deep and abiding. Jacob considered piety and reverent awe as specially characteristic of his father (31[42, 53], where 'the Fear of Isaac' means the God tremblingly adored by him). The submission of Isaac plays a part, although a less important one than the faith of Abraham, in the NT references (He 11[17f], Ja 2[21]). It is, however, alluded to in the Messianic Hymn of Levi 18[1–14] (Test. 12 Pat.), where v.[6] appears to refer to Gn 22[8]; and the sacrificial obedience of Isaac is related in early Christian thought as a type fulfilled in that of the cross (*e.g.* Ep. Bar 7), and in medieval Judaism is representative of the submission of the whole race of Israel to God. R. W. M.—E. T. R.

ISAIAH.—It is not until relatively late in the history of Israel that a major prophet appears upon the scene in the southern kingdom of Judah. The prophets of the 9th cent.—Elijah, Elisha, and Micaiah—come from the north, as did the greatest of their successors, Hosea ben-Beeri. Amos, an earlier contemporary of Hosea, was born and reared in Judah, but his message is directed exclusively to Israel. Isaiah is the first of the great literary prophets to come from Jerusalem, to pursue his prophetic calling there, and to address himself primarily to the south. His name is associated more intimately with Jerusalem and the royal house of David than any of the other prophets, even more than Jeremiah, who remained throughout his life a loyal son of the tribe of Benjamin, and Ezekiel, who prophesied in exile. His life and prophetic activity are identified with the history of Judah and its capital in an extraordinary degree.

Like all the prophets of ancient Israel, Isaiah was acutely sensitive to the political and international events of his time. His prophecies must therefore be read against the background of the history of the Near East in the latter half of the 8th cent. B.C. The determining factor in this history is the military aggression of Assyria. Tiglath-pileser III. (744–727 B.C.) was the first of a succession of Assyrian monarchs to hold the lands of Western Asia under their sway for more than a century. He was followed by Shalmaneser V. (726–722 B.C.) and Sargon II. (721–705 B.C.), who pursued the same policy of military expansion. It was during their reigns that Samaria, the capital of the northern kingdom, was besieged and captured and its inhabitants carried into exile. They in turn were succeeded by Sennacherib (704–681 B.C.), who invaded Judah, destroyed its towns, and laid siege to Jerusalem. It was a stormy and turbulent time, and the little buffer state of Judah, between the Mesopotamian power and Egypt, the mistress of the Nile, lived in a constant state of nervous tension as campaign followed campaign. The little states of Western Asia strove in vain to stem the Assyrian tide, yet deluded themselves into thinking with the accession of each new monarch that the hour of liberation had arrived and the time for revolt was ripe.

It is impossible to construct a biography of the prophet Isaiah. The sources at our disposal have relatively little to say about his life. Moreover, his prophecies have not come down to us in chronological order, and many are without any clear indication of the date at which they were delivered. Nevertheless the essential facts of his life are known. He was born in Jerusalem presumably, and his father's name was Amoz, not to be confused with the prophet Amos. He was married and had two children, who bore symbolic names: Shear-jashub, 'A Remnant shall return,' and Maher-shalal-hash-baz, 'Speed spoil, haste prey.' The former name has been interpreted optimistically, but it is uncertain whether this was its primary intent. It may be a sentence of judgment, which is a major theme of Isaiah's message. The period of his ministry covers four decades, from the year of Uzziah's death *c* 738 B.C. until after Sennacherib's military campaign against Jerusalem in 701 B.C. Tradition has it that during the reign of Manasseh he was sawn in sunder (cf He 11[37]).

Isaiah's ministry may be conveniently divided into the following periods: his call in *c* 738 B.C. (ch. 6), the Syro-Ephraimitic war in 734–733 B.C. (7[1–8[18]] 17[1–6]), the siege and fall of Samaria in 724–722 B.C. (9[8–10[4]] 5[24–30]), the siege of Ashdod in 711 B.C. (ch. 20), and the invasion of Sennacherib in 701 B.C. (cf chs. 36–39). The last-mentioned narratives belong, however, to quite another tradition from Isaiah's own oracles and must be assessed independently. Isaiah's call left a profound impress upon his whole life and work. In the year of the death of Uzziah (Azariah) he beheld in the Temple a vision of Yahweh enthroned as king. He listens to the thundering trisagion of the seraphs, and is overwhelmed by his sense of unworthiness. But his lips are touched with a glowing stone from the altar, and his guilt is atoned. He hears a call to proclaim the terrible message of doom. The last clause of the chapter is absent from the LXX, but this is probably due to homoioteleuton. The causes of this judgment Isaiah found in the prevalent social and moral disorder of the time (see *e.g.* 2[6–4[1]] 5[8–24] for the kind of offences denounced), in the rebellion of the people against Yahweh (1[3] 5[1–7]), and in their failure to understand that the practices of the cult—sacrifice, festivals, prayer, etc.—were only instruments of profound corruption when they did not express inward contrition and repentance and moral transformation (1[10–17, 21–23]). But even more central is Isaiah's message of the holiness of God; Yahweh is the Holy One of Israel, *Ḳᵉdhôsh Yiśrā'ēl.* He is exalted in justice, and manifests His holiness in righteousness (5[16]); His holiness is an active personal power which destroys all those forces in civilization and culture, all the instruments of pride and self-sufficiency, which men substitute for trust in Him. Like Amos, Isaiah sees that Yahweh's Day is darkness and

not light (2$^{6-22}$; cf Am 5$^{18-20}$). The holy God is Israel's King, the One who sits enthroned on the Ark, the Lord of the covenant bond. The motif of Yahweh's sovereignty runs like a silver cord through all the prophecies of Isaiah. He is the prophet of the Divine majesty, the effluence of whose radiant glory fills the earth. Over a long period of years he confronted changing political conditions in Judah and international crises evoked by Assyria's aggression in the Near East, but ever and again he urged his people to place their faith and trust in Yahweh, not in political alliances, whether with Assyria, Egypt, or Ethiopia (cf *e.g.* 7$^{4-9}$ 20, and later in *c* 701 B.C. 30$^{1-5, 15}$ 31$^{1-3}$). When his appeal to the royal house was rejected in 734–733 B.C. and the people refused 'the waters of Shiloah that flow gently,' he gathered about him a band of disciples who would 'wait for Yahweh, who is hiding his face from the house of Jacob' and place their hope on Him (8$^{5-8, 16}$).

Although the imminence of judgment was the fundamental note of Isaiah's prophetic message, there was another note that marked it from the outset: a remnant would survive. While this message cannot with confidence be based upon the name of Isaiah's son, *Shear-jashub*, the closing line of the vision does contain this hope. Beyond judgment, he looked forward to a restored Jerusalem, 'the city of righteousness, the faithful city' (1^{26}). How much further was Isaiah's view of the future developed? While many scholars have rejected the authenticity of the so-called messianic oracles (2$^{2-4}$ 9$^{1-6}$ [He 8^{23}–9^{5}] 11$^{1-9}$ 32$^{1-8, 15-20}$), there has been a greater proclivity in recent years to accept them in whole or in part as the work of the prophet. Some have relegated them to the closing years of his ministry, but with our increased knowledge of Near Eastern royal ideology and terminology the likelihood has grown that at least some of them form an integral part of his prophetic message. After all, there is an interior consistency between Isaiah's deep concern for the Davidic royal house from the beginning to the end of his career and the hope in the coming of a king from the stump of Jesse. It is true that later passages of promise have in some instances been added to earlier prophecies of judgment—indeed, the alternation of doom and felicity is a major feature of the composition of chs. 1–35; but the doctrine of the remnant provides some basis for such an expectation and the language of the relevant texts cannot be said to be late in view of the parallels to the Ugaritic rituals. Nor do these poems of the coming king contradict the prophecies of judgment; they may be said indeed to confirm them, for in contrast to the present they look forward to a time when the sacral king of Judah will fulfil the obligations and functions that were expected of him as the Lord's 'messiah.'

We think of Isaiah as one of the great prophets of Israel, but he was also a poet of stature. Perhaps there is no one among the writers of ancient Israel to whom the adjective *classical* applies more appropriately. Despite the vigour and passion of his speech, he maintains an elevation, indeed a grandeur and prophetic eloquence, a restraint and rhythmic control, a kind of loftiness and elegance of speech, seldom if ever surpassed. He resorts to every manner of rhetorical device, yet never in a studied or awkward fashion. His refrains are perhaps the most powerful in the OT (cf 2$^{6-22}$ 9^{8}–10^{4} 5^{24ff}), his examples of paronomasia are not overdrawn (5^{7} 7^{9b}), his climaxes are sure, *i.e.* they seem inevitable. His imagery moves over a vast area, his descriptions are superb (1^{7f} 2$^{10, 13, 19}$ 5$^{1-6, 8, 10, 17, 24, 29}$ 6$^{11-13}$ 7^{4} 8$^{5-8}$ 9$^{3-5}$ 28$^{1-4, 7-8, 9-10, 20, 27-29}$). His literary forms and types are almost as varied as his images; invectives and threats are most common, but songs, dirges, laments, mocking songs, and hymns are also present. Like the prophets before and after him, Isaiah places all this extraordinary wealth of literary composition at the service of prophecy. His language impressed itself upon the ancient community at Qumrân, upon the writers of the NT, and, later, upon the synagogue and the Church. G. B. G.—J. Mu.

ISAIAH, ASCENSION OF.—See PSEUDEPIGRAPHA, 6.

ISAIAH, BOOK OF.—The Book of Isaiah is one of the four great collections of Hebrew prophecies. Like the book of 'The Twelve Prophets'—another of these great collections—it was formed by the compilation of a number of smaller collections, and contains prophecies of other prophets living at different periods; with the exception of Isaiah's own work, the prophecies contained in the collection are anonymous, the term Deutero-Isaiah' applied to chs. 40–55 (or 40–66) being nothing more than a modern symbol for one of the anonymous writers.

1. Composition and literary history of the present book.—The Book of Isaiah, substantially as we now have it, probably dates, like the 'Book of the Twelve Prophets,' from the post-exilic period. But the external evidence is scanty and some of it ambiguous; and the internal evidence of certain sections is differently interpreted. The earlier view held by Duhm, Marti, and others that certain sections of the book, like chs. 33 and 34 f, were written about the middle of the 2nd cent. B.C., and chs. 24–27 not until 128 B.C., is no longer held by scholars. Among the Dead Sea Scrolls discovered in the spring of 1947 is a complete manuscript of the Book of Isaiah dating from the close of the 2nd cent. B.C., and it is exceedingly probable that it had long been extant in this form.

The most important piece of external evidence is contained in Sir 48$^{23-24}$. In this passage the author, writing about 180 B.C., refers to Isaiah as one of the godly men of Israel, worthy of praise, and, as afterwards (49$^{6-8}$) in the case of Ezekiel and of Jeremiah, he cites, or alludes to, certain sections which now stand in the book that bears the prophet's name (48$^{22-25}$). He refers to the narrative of Is 38 (=2 K 20), and is familiar with the recurrent arguments from prophecy in Is 44–48 (see *e.g.* 41$^{21-24}$ 43^{9} 46^{9} 48^{4ff}), while v.^{24b} is clearly reminiscent of the phraseology of 40^{1} 61^{2f}. The most probable inference is that, by the beginning of the 2nd cent. B.C., some (if not all) of the prophecies of chs. 1–35 had already been brought into a book, and that to these had been appended, not necessarily at the same time, (*a*) chs. 36–39, (*b*) chs. 40–66, and that the whole book at this time was attributed to Isaiah. This is now substantiated not only by the presence of a number of actual manuscripts of Isaiah among the Dead Sea Scrolls but also by the frequency with which the prophecy is quoted in the extra-biblical texts and by several commentaries. It is of course frequently cited in the NT also: 1^{9} is cited in Ro 9^{29}; 6^{9f} in Mt 13^{14f}, Jn 12^{40}, Ac 28^{25f}; 9^{1f} in Mt 4^{14ff}; 10^{22} in Ro 9^{27f}; 11^{10} in Ro 15^{12}; 20^{13} in Mk 7^{6f}; 40$^{3-5}$ in Mk 1^{3}, Mt 3^{3}; 42$^{1-4}$ in Mt 12$^{17-21}$; 53$^{1, 4, 7f}$ in Ro 10^{16}, Mt 8^{17}, Ac 8$^{30, 32f}$; 61^{1f} in Lk 4$^{17-19}$; 65^{1f} in Ro 10^{20f}. The general considerations which, taken in conjunction with the proof offered in Sir 48$^{17-25}$ that chs. 40–66 ranked as Isaiah's as early as 180 B.C., make it probable that by about that time the book was substantially of the same extent as at present are (*a*) the history of the formation of the Canon (see CANON OF OT), and (*b*) the probability, created by the allusions in the prologue to Sirach (132 B.C.) to translations of the prophetic canon, that our present Greek version dates from before 132 B.C.

Turning then to the internal evidence, we note first the structure of the book: (*a*) chs. 1–35—prophecies, some of which are attributed to Isaiah (1^{1} 2^{1} etc.), interspersed with narratives by or about Isaiah (chs 6, 7, 8, 20); (*b*) chs. 36–39—historical narratives of the life and times of Isaiah, identical in the main with 2 K 18–20; (*c*) chs. 40–66—anonymous prophecies. Comparison with the Book of Jeremiah, which concludes with a chapter (52) about the times of Jeremiah derived from 2 K 24^{18ff}, suggests that our present book has resulted from the union of a prophetic volume, consisting (in the main) of prophecies by or attributed to Isaiah, with an historical appendix and a book of anonymous prophecies. This union, as we have seen above, took place before 180 B.C.

But, apart from internal evidence pointing to the different periods in which different sections originated, certain indications of the complexity of the literary process do exist, particularly in the case of chs 1–39; these we may consider. (1) The matter is not arranged chronologically: the call (cf Ezk 1, Jer 1) of Isaiah, which naturally preceded any of his prophecies, is recorded not in ch. 1, but in ch. 6. Similarly, in the Koran the record of Mohammed's call does not occur till *Sura* 96; in this case the reason is that the editors of the Koran followed the rather mechanical principle of arranging the *suras* according to their size. The cause of the order in the case of the Book of Isaiah may in part be found in the fact that (2) the occurrence of several titles and indications of different principles of editorial arrangement points to the fact that chs. 1–35 (39) is a collection of material, some of which had previously acquired a fixed arrangement; in other words, chs. 1–35 is a book formed not entirely, or perhaps even mainly, by the collection and free rearrangement of prophetic pieces, but rather by the incorporation of whole earlier and smaller books. Following these clues, we may first divide these chapters thus: (1) ch. 1 with title (v.^{1}), probably intended to cover the larger collection; (2) chs. 2–12 with title 2^{1}; (3) chs. 13–23 with title 13^{1} naming Isaiah, and corresponding sub-titles not mentioning Isaiah, in 15^{1} 17^{1} 19^{1} $21^{1, 11, 13}$; 22^{1} 23^{1} (cf elsewhere 30^{6}); (4) chs. 24–27, distinguished from the preceding sections by the absence of titles, and from the following by the absence of the opening interjection; (5) chs. 28–31 (33)—a group of woes; see 28^{1} 29^{1} (RV 'Ho' represents the same Hebrew word that is translated 'Woe' in 28^{1} etc.) 30^{1} 31^{1} 33^{1}; (6) chs. 34, 35, which, like chs. 24–27, are without title. Some even of these sections seem to have arisen from the union of still smaller and earlier booklets. Thus it is reasonable to suppose that ch. 6 once formed the commencement of a booklet; again, chs. 2–4 are prophecies of judgment enclosed between 'messianic' prophecies 2^{2-7} and 4^{2-6}; ch. 5 contains a brief group of 'Woes' (vv.$^{8, 11, 18, 20, 21, 22}$).

It is more important to appreciate the general fact, which is clear, that the Book of Isaiah is the result of a long and complex literary history, than to be ready to subscribe to any particular theory of this history. But two points may be briefly touched on. (1) Much of the literary process just referred to lies after the Exile. As will be shown below, chs. 40–55 were not written till the last years of the Exile; chs. 56–66 are certainly of no earlier, and probably of later, origin. The union of chs. 1–39 and 40–66 cannot therefore fall before the close of the Exile, and, as shown above, it need not, so far as the external evidence is concerned, fall much before 180 B.C. But even 1–39 was not a volume of pre-exilic origin; for the appendix 36–39 is derived from Kings, which was not completed till, at the earliest, 561 B.C. (cf 2 K 25^{27}), or even in what may be regarded as its first edition (cf Driver, *LOT*^{9}, 198) before about 600 B.C. On this ground alone, then, the completion of chs. 1–39 by the inclusion of the appendix 36–39, cannot be placed earlier than the Exile, and should probably be placed later. It must indeed be placed later, unless we regard all the sections in chs. 1–35 which are of post-exilic origin (see below) as interpolations rather than as what, in many cases at least, they probably are, original parts of the booklets incorporated in chs. 1–39. Thus chs. 2–12 and 13–23 (apart from subsequent interpolations or amplifications), as they lay before the editor who united them, probably owed their form to post-exilic editors. (2) The earliest stage of this long literary process was not uniform. In chs 6 and 8^{1-8} we have what there is no reason to question are pieces of Isaiah's autobiography; Isaiah here speaks of himself in the first person. Chs. 7 and 20 may have the same origin, the fact that Isaiah is here referred to in the third person being perhaps in that case due to an editor; or these chapters may be drawn from early biographies of the prophet by a disciple. Thus chs 1, 2–12, 13–23, and 28–33 consist in large part of prophetic poems or sayings of Isaiah; many of them were (presumably) written as well as spoken by Isaiah himself, others we not improbably owe to the memory of his disciples. There is no reason for believing that the present arrangement of this matter, even within the several booklets goes back to Isaiah himself; the division into chapters and verses is of course of very much later origin, and in several cases does violence to the original connexion, either by uniting, as in ch. 5, originally quite distinct pieces, or dividing, as in the case of 9^{8}–10^{4}, what formed an undivided whole. Justice can be done to the prophetic literature only when the brevity of the several pieces is recognized, instead of being obscured by treating several distinct pieces as a single discourse. The analogy of the diverse treatment of the same sayings in the different Gospels may well warn us that sayings which lie side by side (as *e.g.* in 5^{8-24}) in the Book of Isaiah were not necessarily spoken in immediate succession.

But how far, if not in the order in which he spoke or wrote them, have the words of Isaiah reached us substantially as he spoke them? The question is not altogether easy to answer, particularly in one respect. Isaiah was pre-eminently a prophet of judgment; but intermingled with his warnings are many passages of promise: see *e.g.* 2^{2-4} and 4^{2-6}, enclosing 2^{7}–4^{1}, 9^{1-6} concluding the warnings of ch. 8, and the constant interchange of warning and promise in chs. 28–31. Are these passages of promise Isaiah's, or the work of some later writers with which later editors sought to comfort as well as to exhort their readers?

2. Structure and contents of the Book of Isaiah.—The following outline of the contents of the book and of the periods in which its several parts appear to have been written must be used in the light of the foregoing account of the origin of the book. The captions are designed to call attention to the major themes to which the prophet addresses himself; in many cases, however, the materials are so diverse in character and form that no single topic can adequately describe the contents of the literary units subsumed under it. For detailed discussion of the critical questions involved—date, occasion, provenance, literary type, etc.—the commentaries or critical introductions should be consulted.

Superscription.—An editor or compiler here provides the essential information for the understanding of the book: the name of the prophet, the people addressed, and the period of his prophetic activity.

I. *Oracles of judgment and promises of felicity:* chs. 1–12.

A. *Rebellion, judgment, and assurances of a happy future:* 1^{2-31}.—The chapter contains four or five separate literary units which come from different times in Isaiah's ministry. We should expect his call (ch. 6) to open the book, as in Jeremiah (1^{4-10}) and Ezekiel (1^{1}–2^{10}), but the impressive opening verses (vv.$^{2-4}$) were possibly considered an appropriate introduction to the oracles of judgment which follow. The view once championed by Ewald that the chapter constitutes a single discourse, 'The Great Arraignment,' is now generally rejected.

(1) *A sinful nation:* 1^{2-9}.—It is possible that vv.$^{10-17}$ belong with this section. The references to Sodom and Gomorrah (vv.$^{9-10}$) in any event connect the two passages. The invective has four strophes and a conclusion (v.^{9}). The date is to be determined by the description in vv.$^{7-8}$, which suggests the time after Sennacherib's invasion in 705 or 701 B.C.

(2) *Not sacrifice, but obedience:* 1^{10-17}.—Three strophes of invective are followed by an exhortation. The date is probably the same as that of vv.$^{2-9}$.

(3) *The alternatives: obedience or rebellion:* 1^{18-20}.—Conceivably these lines belong with vv.$^{2-17}$. The assurance in v.^{18} is by no means unconditioned, so there is no contradiction involved. The language is determined by the terminology and form of the covenant demands in Ex 19^{5-6}.

(4) *The faithless city:* 1^{21-26}.—Invective and threat. The conclusion repeats the motifs of the introduction.

(5) *Judgment by fire:* 1^{27-31}.—No certain date can be assigned to the last two literary units.

B. *The day of Yahweh and a series of woes:* 2^{1}–5^{30}.—Superscription: 2^{1}.

(1) *Universal peace:* 2^{2-4} [5 ?].—The words are paralleled in Mic 4^{1-5}. It is difficult to determine to whom they belong. The literary form and structure of Micah is superior to that of Isaiah, but it is possible that both are derived from another source.

(2) *The day of Yahweh:* 2^{6-22}.—The text is mutilated and disturbed. The refrains are not in place, and the original opening is lost. It is nevertheless one of the most powerful and awesome of the prophet's poems. For the theme of the day, compare Am 5^{18-20}.

(3) *Misleading leaders:* 3^{1-15}.—A poetic invective describing the imminent social disintegration of Jerusalem. It contains three substantial strophes (vv.1–5, 6–8, 9–12) and a judicial encounter of Yahweh with His people vv.13–15). It belongs to the early period of Isaiah's ministry.

(4) *The humiliation of the patrician ladies:* 3^{16}–4^{1}.—An oracle of invective and threat. The prose section of vv.18–22 is generally considered late, but it may well be original. Literary form was employed with the greatest freedom and versatility by the Hebrew writers. The elaboration of female finery is not out of place here.

(5) *Zion, the covenant city:* 4^{2-6}.—Post-exilic.

(6) *Parable of the vineyard:* 5^{1-7}.—The folksong of four strophes with invective-threat motifs belongs to the prophet's early period.

(7) *Woes:* 5^{8-24}.—The original series of perhaps seven invectives and threats, certainly very early, have been thrown into disarray in the course of their transmission. Vv.25–30 belong with 9^{8}–10^{4}.

C. *Biographical episodes:* 6^{1}–97 (He 6^{1}–9^{6}).

(1) *The call of Isaiah:* 6^{1-13}.—Isaiah's own account of his call in the year of Uzziah's death (738 B.C.), written perhaps some years later.

(2) *The Syro-Ephraimitic war:* 7^{1}–8^{21}.—(*a*) Isaiah's interview with Ahaz: vv.1–17. Traditionist expansion: vv.18–24. (*b*) Maher-shalal-hash-baz: 8^{1-4}. (*c*) Waters of Shiloah: vv.5–8. Traditionist expansion: vv.9–10. (*d*) Yahweh is Israel's fear and dread: vv.11–15. (*e*) Signs and portents in Israel: vv.16–18. The obscure lines about necromancy are later expansion (vv.19–21), though their origin is Isaianic.

(3) *The birth and righteous rule of the coming king:* 8^{22}–97 (Heb. 8^{22}–9^{6}).—The passage forms the conclusion to the biographical section. Its genuineness is disputed, but it may well be original, belonging to the ideology of the sacral king of David's dynasty.

D. *Invectives against Judah, Israel, and Assyria and promises of a happy future:* 9^{8}–12^{6}.

(1) *The outstretched hand of judgment:* 9^{8}–10^{4} 5^{25-30}.—A carefully constructed poem of five strophes, each ending in a refrain ($9^{12, 17, 21}$ 10^{4} 5^{25}). It belongs to Isaiah's early period, and deals with the collapse of the northern kingdom before the Assyrians, who are vividly described in 5^{28-30}. Compare Amos 4^{6-11} for form and content.

(2) *Assyria, rod of Yahweh's anger:* 10^{5-34}.—Assyria will be punished for its pride and refusal to recognize that it is the instrument of Yahweh's purpose. Vv.16–23, while Isaiah's, seem to be an insertion here. It is one of the greatest of the prophet's poetic compositions, but belongs to a later period of his career, perhaps between 715 and 701 B.C.

(3) *The ideal reign of peace:* 11^{1-16}.—(*a*) The king of David's lineage: vv.1–9. A superbly constructed poem of three strophes, belonging to the same world of thought as 9^{1-7} (Heb. 8^{23}–9^{6}) and performing the same literary purpose at the close of a series of judgments. (*b*) The ensign to the peoples: vv.10–16. Probably late, but belonging to the same sphere of thinking as Isaiah's.

(4) *A song of thanksgiving:* 12^{1-6}.—Probably not the work of Isaiah; it has many affinities with the Psalms.

II. *Oracles against the nations:* chs. 13–23.—The untitled sections, 14^{24-26} (28–32) 17^{12-14} 18 20, which deal with Judah, as contrasted with most of the oracles, which are against the foreign nations, perhaps formed no part of the original book.

A. *The 'Burden' of Babylon:* 13^{1}–14^{23}.—The section contains two poems (13^{2-22} and 14^{4b-21}) in lamentation meter; between the poems and at the close of the second are short prose passages ($14^{1-4a, 22f}$). The section throughout presupposes conditions of a much later time, after 586 B.C. To the Assyrians, who play so large a rôle in Isaiah's prophecies, there is no allusion; with the fall of Nineveh in 612 B.C. they ceased to exist, and Babylon, which in Isaiah's time was subject to Assyria, here figures as possessed of world dominion. Restoration from exile is referred to in 14^{1f}.

(1) *The fall of Babylon:* 13^{2-22}.—A deeply moving poem in the manner of the day of Yahweh oracles of Zephaniah, Ezekiel, and Joel. The date is probably after 538 B.C. (cf 13^{17}).

(2) *A taunt song against the king of Babylon:* 14^{4b-21}.—The poem itself does not name the king or his land; some have therefore upheld the substantial authenticity of the passage, identifying the ruling monarch with the king of Assyria.

B. *Yahweh's plan and purpose:* 14^{24-27}.—A pregnant oracle, perhaps of the year 701 B.C., predicting the overthrow of the Assyrian invader.

C. *A warning to Philistia:* vv.28–32.—According to the title in the Hebrew text, the oracle was delivered in the year of the death of Ahaz (715 B.C.), but the original text may have simply referred to the death of the king, whom some have identified with Sargon II. in 705 B.C.

D. *The fate of Moab:* chs. 15–16.—The epilogue of 16^{13f} explains that the foregoing predictions will be fulfilled in three years. Much of the material of the poems appears to be a re-casting and revision of an older original. Compare the imitation of the poem in Jer $48^{5, 29-38}$. Both poems (15^{1-9} 16^{1-11}) are laments.

E. *The fall of Damascus, Syria, and Ephraim:* 17^{1-11}.—The poem belongs with the Syro-Ephraimitic prophecies of 7^{1}–8^{12} and is to be dated before 732 B.C.

F. *The uproar of the peoples:* 17^{12-14}.—The thunder of hostile nations (presumably in the Assyrian army) who are to be dispersed. It belongs to Isaiah, but the date is not certain.

G. *The Ethiopian avenger:* ch. 18.—A poem of highly poetic style, certainly original, to be dated after 715 B.C., the beginning of the 25th Dynasty.

H. *Oracle on Egypt:* 19^{1-15}.—Yahweh's judgment on Egypt, which will take the form of civil discord (v.2), foreign domination (v.4), and social distress. In vv.16–25 we have a remarkable account of the conversion of Egypt, which, together with Assyria, will worship Yahweh. The date of the chapter is much disputed. Vv. 16–24 are probably not from Isaiah.

I. *Isaiah, a sign and symbol:* ch. 20.—Naked and barefoot, in the guise of a captive, Isaiah symbolizes the Assyrian conquest of Egypt and Ethiopia.

J. *Three 'burdens':* 21^{1-16}.

(1) *The wilderness of the sea:* 21^{1-10}.—Babylon is conquered by the Medes and Elamites. It is a remarkable revelation of the interior of the prophetic mind. The date is probably near to 538 B.C. when Babylon fell before Cyrus II. of Persia.

(2) *Oracles on Edom* (21^{11f}) *and the caravans* (21^{13-15}).

K. *Oracle concerning the valley of vision:* 22^{1-14}.—A vivid poem, in the manner of the invective and threat, employing the motifs of the day of Yahweh (cf 2^{6-22}), to be assigned either to *c* 711 B.C., when Sargon's troops were at Ashdod (ch. 20) or to the time of revelry following Sennacherib's withdrawal from Jerusalem in 701 B.C.

L. *Oracle to Shebna:* 22^{15-22}.—Singular among Isaiah's prophecies in that it is addressed to an individual, the steward of the palace, who is threatened with disgrace. An invective and threat composed before 701 B.C. since at that time he had already been demoted (cf 36^{22} 37^{2}).

M. *Oracle concerning Tyre:* vv.1-14 (15-18).—It is possible that an original oracle against Sidon (vv.1-4, 12-14) has been united with an oracle against Tyre (vv.5-11). The date of the former is uncertain. Some refer the latter (or the whole oracle) to the siege of Tyre by Shalmaneser V. between 727 and 723 B.C., others to the destruction of Tyre by Artaxerxes III. Ochus in 348 B.C. The redactor of vv.15-18 evidently has the destruction of the city by Alexander the Great in 332 B.C. in mind and of its later revival in 274 B.C. under Ptolemy II. (so Eissfeldt).

III. *Apocalyptic oracles, songs, and hymns:* chs. 24–27.—The section is generally recognized as a special collection of the Book of Isaiah, containing, however, a variety of literary materials: eschatological predictions ($24^{1-3, 13, 17-23}$ 25^{6-8} $27^{1, 12-13}$) and hymns ($24^{4-6, 7-9, 10-12, 14-16}$ 25^{1-5}; cf 25^{9-12} 26^{1-6}). A prayer of lamentation is given in 26^{7-19}: vv.^{20f} are the Divine answer. A vineyard song is placed in the mouth of Yahweh in 27^{2-5} (cf 5^{1-7}). The following verses (27^{7-11}) describe the destruction of the apostate cult objects and the expiation of Israel's guilt. The work as a whole is post-exilic as the many later ideas suggest: cf *e.g.* resurrection from the dead (26^{19}; see also 25^{8}) and patron angels.

IV. *Prophecies of woe and promises of felicity:* chs. 28–33.—The prophecies have been compiled by an editor on account of the similar opening of the sections with 'Woe' (see 28^{1} 29^{1} 29^{15} 30^{1} 31^{1}; cf 32^{1}). It is probable that these invectives circulated independently at one time. In this section there is, however, a remarkable alternation between menace and denunciation of Judah, on the one hand, and of consolation, on the other. The booklet falls into the following sections (references to oracles of promise are given in parentheses): 28^{1-4} (28^{5-6}) 28^{7-22} (23-29) 29^{1-6} (7) (29^{8} and possibly parts of 29^{1-7}, according to the interpretation), 29^{9-16} (29^{17-24}) 30^{1-17} (30^{18-33}) 31^{1-4} (31^{5-9}) 32^{1-8} (32^{9-14}); 32^{15-20} (33).

A. *Threat and invective against Samaria:* 28^{1-22}.—Certainly the work of Isaiah, the early verses (vv.$^{1-4}$ or ^{6}?) during the last years of the northern kingdom, the rest somewhat later, the precise date being unclear.

B. *A prophetic 'instruction':* 28^{23-29}.

C. *Ariel, Ariel!:* 29^{1-8}.

D. *Three invectives and threats:* 29 $^{9-12}$, 13-14, 15.—The foregoing sections have sufficient claim to be original; 29^{16ff} is probably late.

E. *Egypt, a false support:* 30^{1-5} (7).

F. *Invectives and threats:* $30^{8-14, 15-17}$.

G. *The future felicity of Jerusalem:* 30^{18-26}.—The passage is generally recognized as late.

H. *Threat against Assyria:* 30^{27-33}.

I. *Invective against Egypt:* 31^{1-9}.

J. *The righteous king to come:* 32^{1-5} (8).—The sacral king will reign in a transformed land and over a wise and godly people.

K. *Oracle to the complacent ladies:* 32^{9-14} (20).—Compare 3^{16-41}.

L. *A prophetic liturgy:* ch. 33.—Since the time of Gunkel, this passage, which does not fall within the compass of the foregoing oracles, has been generally considered a liturgy: introductory invective (v.^{1}), popular lament (v.^{2}), prophetic word (vv.$^{3-6}$), popular lament (vv.$^{7-9}$), prophetic oracle (vv.$^{10-13}$), prophetic word (v.^{14a}), torah liturgy (vv.$^{14b-16}$), prophetic word (vv.$^{17-24}$). It is generally denied Isaiah.

V. *Eschatological prophecies:* chs. 34–35.—These chapters may have at one time formed the conclusion to the compilation of chs. 1–15. While they cannot claim the authorship of Isaiah, they form a great finale to his work and do justice to the major motifs of doom and felicity which are present throughout the preceding chapter. C. C. Torrey believes they belong with chs. 40–66 and form the introduction to that literary sequence.

A. *The day of Yahweh's vengeance on Edom:* 34^{1-17}.

B. *The redemption of Zion:* 35^{1-10}.

VI. *The Eschatological poems of Second Isaiah:* chs. 40–55.—Since the pioneering work of B. Duhm in his commentary of 1892, this section has been generally considered to constitute an independent literary unity. The historical situation; the literary style, vocabulary, and literary forms; and the theology of the poet separate them from the foregoing chapters. The poet and those whom he addresses are living in Babylonian exile. Cyrus II. is twice mentioned by name (44^{28} 45^{1}) and is quite clearly present in other contexts. He is pressing his military campaigns, and Babylon is at the eve of its downfall. The hill of Zion lies waste, but is about to be rebuilt (44^{28} 49^{14-21} $51^{3, 17-23}$ 52^{7-12} 54). It is clearly within the range of the middle of the 6th cent. B.C. that the poet is moving, though his vision surveys the election-covenant faith of Israel from its earliest beginnings to the glorious finale in which the people of God are to be redeemed and the nations will witness that it is in Yahweh alone that they are to be saved. A note of exulting triumph rings throughout the poems. Again and again the poet breaks out into ecstatic singing (42^{10-13} 44^{23} 45^{8} 49^{13}). He is the greatest poetic craftsman of ancient Israel. His theology profoundly influenced the NT as it did the holy men living at Qumrân before the dawn of the Christian era. See also *Servant of the Lord.*

VII. *Admonitions and promises:* 56^{1}–66^{24}.—While there are not a few similarities of a very striking nature between chs. 40–45 and chs. 56–66, especially in chs. 60–62, the differences between the two sections are so great that it is difficult to attribute them to the same writer. C. C. Torrey supports the literary integrity of the whole of chs. 34–35, 40–66, and others too have defended the unity of chs. 40–66. The character of the literary types, such as the Torah liturgy of 56^{1-8} or the liturgical composition of 56^{9}–57^{21}, the tendency to quote lines from chs. 40–55, and the imitative style in certain contexts all suggest that we have to do with followers of Second Isaiah. While some scholars have sought to assign the composition to the 5th cent., during the time of Nehemiah and Ezra, it is more likely, in view of the numerous affinities with chs. 40–55 and the very similar style of some of the poems, that we are dealing with the disciples of the great poet. A date towards the close of the 6th cent. would therefore seem more appropriate. Such a view is confirmed by the historical situation reflected in the poems of chs. 56–66. The emphasis upon the Temple and its cultic observances implies that it has been rebuilt. The writer is also much more interested in the Torah, in the keeping of the Sabbath, the observance of the fasts, etc., than Second Isaiah. His contrast between the character and destiny of the apostates and the true Israelites, his condemnation of the idolatrous cults, and his description of strange pagan rites—all this is alien to his great predecessor.

It is fortunate that recent translations such as the RSV have done justice to the poetic character of much of Is 1–39 and nearly all of 40–55 and 56–66 by a proper arrangement of the poetic and parallel lines. It is a great aid for our literary appreciation of the prophets, but more than that, it not infrequently helps to overcome the obscurity of the text when it is produced as prose. The Book of Isaiah is a compilation from different times and situations. The proper delineation of the literary units is therefore a matter of the first importance for their interpretation. G. B. G.—J. Mu.

ISCAH.—A daughter of Haran and sister of Milcah, Gn 11^{29}.

ISCARIOT.—See JUDAS ISCARIOT.

ISDAEL, 1 Es 5^{33} (AV, RV).—See GIDDEL, 2.

ISHBAH.—A Judahite, 1 Ch 4^{17}.

ISHBAK.—A son of Abraham by Keturah, Gn 25^{2}, 1 Ch 1^{32}. The tribe of which he is the eponym is somewhat uncertain.

ISHBI-BENOB.—One of the four Philistines of the giant stock who were slain by the mighty men of David, 2 S 21^{16f}.

ISHBOSHETH (' Man of Shame,' *i.e.* ' of Baal ').—**1.** The fourth son of Saul; at the death of his father and three brothers on Mount Gilboa he appears to have been young and inexperienced (both numbers in the chronological comment in 2 S 2^{10} appear to be unreliable), so that Abner acts as regent for him as successor to Saul's kingdom [minus the tribe of Judah who elect to follow David]. Ishbosheth's capital was at Mahanaim in Transjordan, perhaps to escape Philistine pressure. Skirmishing between the rival kings continued for up to seven years, but eventually Abner deserted to David, and Ishbosheth was murdered without issue, bringing the whole kingdom to David (2 S 5^{1}). His name is given its more original form **Eshbaal** (for Ishbaal), ' Man of Baal,' *i.e.* ' Yahweh,' in 1 Ch 8^{33} 9^{39}, either because Chronicles was so little read by those who refused even to enunciate the hated word Baal that it was not thought necessary to change it here to Ish-bosheth; or because, by the time of composition of Chronicles, Baalism was so dead that it was no longer dangerous (cf the similar cases of Mephibosheth/Meribbaal; Jerubbesheth/Jerubbaal; Beeliada/Eliada). The alternative form of his name **Ishvi** for Ishiah, ' Man of Yahweh ' (1 S 14^{49}), shows that at the commencement of the monarchy Yahweh was freely equated with Baal even by convinced Yahwists.

2. Ishbosheth or Ishbaal is probably the true reading for **Jashobeam** (1 Ch 11^{11}), which is further corrupted to **Josheb-basshebeth** (2 S 23^{8}). W. F. C.—**D. R. Ap-T.**

ISHHOD.—A Manassite, 1 Ch 7^{18} (AV **Ishod**).

ISHI.—**1.** A Jerahmeelite, 1 Ch 2^{31}. **2.** A Judahite chief, 1 Ch 4^{20}. **3.** A chief of East Manasseh, 1 Ch 5^{24}. **4.** One of the captains of the 500 men of the tribe of Simeon who smote the Amalekites at Mt. Seir, 1 Ch 4^{42}.

ISHI (' my husband ').—The name which Hosea (2^{16}; RSV translates ' my husband ') recommends Israel to apply to Y" instead of *Baali* (' my lord ').

ISHIAH, 1 Ch 7^{3} (AV).—See ISSHIAH, **1.**

ISHMA.—One of the sons of Etam, 1 Ch 4^{3}.

ISHMAEL.—**1.** The son of Abraham by Hagar. His name (' May God hear ') was decided upon before his birth (Gn 16^{11}). As in the history of his mother, three sources are used by the narrator. J supplied Gn 16^{4-14}, E 21^{6-21}, P adding such links as 16^{15f} 17^{18-27} $25^{7-10, 12-17}$. For the story of his life up to his settlement in the wilderness of Paran, the northern part of the Sinai peninsula, see HAGAR. At the age of thirteen he was circumcised on the same day as his father (Gn 17^{25f}). In Paran he married an Egyptian wife, and became famous as an archer (21^{20f}). No other incident is recorded, except that he was associated with his half-brother in the burial of Abraham (25^{9}) and himself died at the age of 137 (25^{17}). In view of the manifest association of Ishmael with folk-elements in North Sinai and Edom akin to the Hebrews, whose characteristics and habits he exhibited, it is difficult to accept the narratives of Ishmael as biography. It must, however, be admitted that there is much verisimilitude in these narratives. His birth, for instance, after Abraham's concubinage with Hagar by consent of Sarah, and his supersession by Isaac as Abraham's heir is known to be in accordance with regular social practice in Mesopotamia in the middle of the 2nd millennium B.C.

Ishmael is represented as the father of twelve sons (Gn 25^{12-16}, 1 Ch 1^{29-31}), and the phrase ' twelve princes according to their nations ' (cf Gn 17^{20}) suggests an attempt on the part of the writer at an exhibition of his view of racial origins. It is not possible to say whether at any time a religious confederacy of twelve tribes was formed under the name of Ishmael. The twelve-tribe amphictyony of Israel has analogies elsewhere, as has been pointed out by M. Noth, the number being possibly suggested by the twelve months of the year, so that it is quite possible that there was also a twelve-tribe amphictyony of Ishmael. On the other hand this may be an artificial schematization suggested to the author of P by the organization of Israel. Israel's racial affinity with these folk-elements is freely admitted, a significant fact in view of the hostile relation of the two in historical times. The Egyptian affinities of Ishmael through his mother and his wife probably reflect the political relationships of the North Sinai tribes with Egypt under the New Empire, when towns such as *Tell el-Ajjûl*, *Tell-Jemmeh*, and *Tell el-Fâr'ah* were fortified as frontier-posts along the line of the *Wâdî Ghazzeh* and the tribesmen of North Sinai were admitted in times of drought to water and grazing in the east of the Delta ' after the manner of their fathers from the beginning,' according to an inscription of Horemheb. Egyptian influence in language is still a feature of Arabic in that area.

There appears to be a certain confusion between **Midianites** and **Ishmaelites** (Gn 37^{28f}, Jg $8^{24, 26}$), though the two are distinguished in the genealogies of Gn $25^{1, 4, 13}$ (J). Midianites is clearly the geographic term and Ishmaelites the ethnic one. The Ishmaelites soon disappear from Scriptural history. A few individuals are described as of that nationality (1 Ch 2^{17} 27^{30}); but in later times the word could be used metaphorically of any hostile people (Ps 83^{6}).

2. A son of Azel, a descendant of Saul through Jonathan (1 Ch 8^{38} 9^{44}). **3.** Ancestor of the Zebadiah who was one of Jehoshaphat's judicial officers (2 Ch 19^{11}). **4.** A military officer associated with Jehoiada in the revolution in favour of Joash (2 Ch 23^{1}). **5.** A member of the royal house of David who took the principal part in the murder of Gedaliah (Jer $41^{1, 2}$). The story is told in Jer 40^{7}–41^{15}, with a summary in 2 K 25^{23-26}. It is probable that Ishmael resented Nebuchadrezzar's appointment of Gedaliah as governor of Judaea (Jer 40^{5}) instead of some member of the ruling family, and considered him as unpatriotic in consenting to represent an alien power. Further instigation was supplied by Baalis, king of Ammon (Jer 40^{14}), who was seeking either revenge or an opportunity to extend his dominions. Gedaliah and his retinue were killed after an entertainment given to Ishmael, who gained possession of Mizaph, the seat of government. Shortly afterwards he set out with his captives to join Baalis, but was overtaken by a body of Gedaliah's soldiers at the pool of Gibeon (Jer 41^{12}), and defeated. He made good his escape (41^{15}) with the majority of his associates; but of his subsequent life nothing is known. The conspiracy may have been prompted by motives that were in part well considered, if on the whole mistaken; but it is significant that Jeremiah supported Gedaliah (40^{6}), in memory of whose murder an annual fast was observed for some years in the month Tishri (Zec 7^{5} 8^{19}). **6.** One of the priests persuaded by Ezra to put away their foreign wives, Ezr 10^{22}, 1 Es 9^{22} (AV, RV **Ismael**). R. W. M.—**J. Gr.**

ISHMAIAH.—**1.** The ' ruler ' of the tribe of Zebulun, 1 Ch 27^{19}. **2.** One of David's thirty heroes, 1 Ch 12^{4} (AV **Ismaiah**).

ISHMERAI.—A Benjamite chief, 1 Ch 8^{18}.

ISHOD, 1 Ch 7^{18} (AV).—See ISHHOD.

ISHPAH.—The eponym of a Benjamite family, 1 Ch 8^{16} (AV **Ispah**).

ISHPAN.—A Benjamite chief, 1 Ch 8^{22}.

ISH-SECHEL.—In Ezr 8^{18} it is said: ' And by the good hand of our God upon us they brought us a man of discretion, of the sons of Mahli,' where RVm gives for ' man of discretion ' the proper name ' Ish-sechel.' That a proper name is required is certain, but whether Ish-sechel is that name is not so certain. *Issachar* has been suggested. W. F. C.

ISH-TOB, 2 S 10^{6ff} (AV).—See TOB.

ISHUAH, Gn 46^{17} (AV).—See ISHVAH.

ISHUAI, 1 Ch 7^{30} (AV).—See ISHVI.

ISHUI, 1 S 14^{49} (AV).—See ISHVI.

ISHVAH.—Second son of Asher, Gn 46^{17} (AV **Ishuah**), 1 Ch 7^{30} (AV **Isuah**).

ISHVI.—1. Third son of Asher, Gn 46[17] (AV **Isui**), Nu 26[44] (AV **Jesui**), 1 Ch 7[30] (AV **Ishuai**); patronymic **Ishvites**, Nu 26[44] (AV **Jesuites**). **2.** Second son of Saul by Abinoam, 1 S 14[49] (AV **Ishui**); called **Eshbaal** in 1 Ch 8[33] 9[39], and **Ishbosheth** (q.v.) in 2 S 2[10] etc.

ISLAND, ISLE.—The Hebrew word *'i* means primarily 'coastlands' (so usually in RSV), but sometimes lands in general, and in one passage (Is 42[15]) 'dry land' as opposed to water. In Is 20[6] Palestine is called 'this isle' (AV; but RV and RSV 'coastland'). The islands of the Gentiles or heathen (Gn 10[5], Zeph 2[11] AV; cf RV) are apparently the coasts of the W. Mediterranean; the 'isles of the sea' (Est 10[1], Ezk 26[18] etc. AV and RV) are also the Mediterranean coasts; 'the isles' (Ps 72[10] etc., Is 42[10] etc.) means the West generally as contrasted with the East. Tyre is mentioned as an isle in Is 23[2] (but RSV 'coast'), and here perhaps the term may be taken literally, as Tyre was actually at that time an island. The isle (RSV 'coasts') of Kittim (Jer 2[10], Ezk 27[6]) is probably Cyprus, and the isle (RSV 'coastland') of Caphtor, Crete. In the NT five islands are mentioned: Cyprus (Ac 4[36] 11[19f] 13[4] 15[39] 21[3, 16] 27[4]), Crete (27[7, 12f, 21]), Cauda (v.[16]), Malta (28[1]), and Patmos (Rev 1[9]).

E. W. G. M.

ISMACHIAH.—A Levite in the time of Hezekiah, 2 Ch 31[13]. See SEMACHIAH.

ISMAEL, 1 Es 9[22] (AV, RV).—See ISHMAEL, **6.**

ISMAERUS, 1 Es 9[34] (RV).—See AMRAM, **2.**

ISMAIAH, 1 Ch 12[4] (AV).—See ISHMAIAH, **2.**

ISPAH, 1 Ch 8[16] (AV).—See ISHPAH.

ISRAEL.—The name Israel designates in the Bible (*a*) the patriarch Jacob (Gn 32[29]); (*b*) several ethnic groups of heterogeneous origins which settled in the land of Canaan during the 13th cent. B.C.; (*c*) the northern kingdom which, under Jeroboam's leadership, seceded from the monarchic rule of Rehoboam soon after Solomon's death (922 B.C.) and was destroyed by the Assyrians (722 B.C.); (*d*) occasionally the southern kingdom of Judah (Is 5[7], Mic 3[1]); (*e*) the eschatological remnant; and (*f*) the religious and political community of the Judaeans' descendants commonly known as the Jews, from the fall of Jerusalem under the Babylonians (586 B.C.) to the fall of Jerusalem under the Romans (A.D. 70; see G. A. Danell, *Studies in the Name Israel in the Old Testament*, 1946).

I. HISTORY.—**1. Sources.**—Documentation for Israel's history during the Biblical period has been traditionally found in (*a*) the canonical books and the Apocrypha of the OT; (*b*) the Jewish Pseudepigrapha and other writings of the Greco-Roman times, especially those of Flavius Josephus; (*d*) the works of the Greek and Roman historians; (*e*) the Mishnah and Talmud. Information obtained from these sources was generally accepted at its face value, particularly that which was offered by the OT, and contradictions found therein were either artificially resolved or ignored. In modern times, however, three major developments have radically transformed the task of Israel's historians: (*a*) the rise of Biblical criticism; (*b*) the growth of near-eastern archaeology; (*c*) the emergence of anthropology, sociology, and comparative religion.

(*a*) *The Rise of Biblical Criticism.*—Ever since the middle of the 17th cent., scholars have inquired into the composition, date, authorship, and historical reliability of the Biblical books (see especially PENTATEUCH, PROPHETS, PSALMS, WISDOM LITERATURE). At the beginning of the 20th cent., a majority of students accepted the results of the Graf-Wellhausen school, according to which narratives and legal material now found in the Pentateuch were edited in about 400 B.C. from four previously written documents: (i) the Yahwistic source (J), composed in Judah in about 800 B.C.; (ii) the Elohistic source (E), written in Northern Israel in about 750 B.C.; (iii) the Deuteronomic code and sermons (D), redacted between 650 and 560 B.C.; and (iv) the Priestly source (P), compiled in about 450 B.C. and including the slightly earlier Holiness Code (H). Such a view of the composition and date of the Pentateuch, which became known as the Documentary Hypothesis, led the historians of Israel to exercise extreme caution not only toward those sources to which a late date was ascribed but also toward the earlier documents, since a considerable period of time—in fact, several centuries—separated the writing of all the documents from the events which they purported to relate. A similarly negative attitude prevailed on most of the data preserved in the book of Joshua, the composition of which was associated with the final stage of Pentateuchal editing (see PENTATEUCH, JOSHUA). With Judges, Samuel, and Kings, the case was considered to be different. Although the framework of Judges was assigned to Deuteronomic editorship, literary analysis of the book revealed the presence of poems and narratives, such as the Song of Deborah (Jg 5), the antiquity of which constituted a strong argument in favour of their historical reliability. The court memoirs which were utilized in a large section of Samuel and the manifold uses of royal and Temple archives which are manifest in Kings were deemed to offer a relatively valid kind of information, although the presence of legendary material, such as the Elisha cycle of stories, and the chronological difficulties produced by the synchronisms which tie together the reigns of the Judaean and Israelite kings, revealed the constant need for critical evaluation. The work of the Chronicler (see CHRONICLES, EZRA, NEHEMIAH) was considered to be late (around 300 B.C.) and generally unreliable, as it chiefly retold the stories of Samuel and Kings from a Levitical bias.

Since the beginning of the 20th cent., successors of Wellhausen have accepted the major results of the Documentary Hypothesis, with three important modifications: (i) literary analysis of the various documents no longer extends to the minute dissecting of phrases and words with the degree of confidence which was at first granted to it; (ii) dates of the documents tend to be pushed back in time (*i.e.* 950 or perhaps 1000 B.C. for J); (iii) the documents themselves are held to represent faithfully a large number of early traditions, orally preserved, which bring the historians much closer to the events than it was hitherto suspected.

Already in 1908, Eerdmans showed that the ancient Hebrews were not as 'primitive' as generally supposed. At the same time, the oral traditions which lay behind the documents were analysed by Gunkel for Genesis (1901) and Gressmann for Exodus (1910). Patterns and forms of 'literary' although 'unwritten' traditions were ascertained (see A. Lods, 'Le rôle de la tradition orale dans la formation des récits de l'Ancien Testament,' *RHR*, lxxxviii [1923], 51–64; E. Nielsen, *Oral Tradition*, 1954). Oestreicher in 1923 and Welch in 1924 pointed out that many laws of Deuteronomy reflected the situation of Israel during the conquest and the early monarchy rather than that of Judah under Manasseh. Eissfeldt in 1934 demonstrated that much of the priestly legislation, late as it may have been in its finally edited form, rested on pre-exilic practices. Kaufmann maintained in 1930 and 1937 the priority of P over D; Volz in 1933 and Rudolph in 1938 questioned the existence of E. Nevertheless, the general validity of the Documentary Hypothesis has survived these attacks (see R. H. Pfeiffer, *Introduction to the Old Testament*, 1941; A. Lods, *Histoire de la littérature hébraïque et juive*, 1945; C. R. North, 'Pentateuchal Criticism,' in H. H. Rowley, ed., *The Old Testament and Modern Study*, 1951, pp. 48–83; O. Eissfeldt, *Einleitung in das Alte Testament*, 1956; A. Weiser, *Einleitung in das Alte Testament*, 1957). Meanwhile, the narratives of Judges were investigated by Wiese in 1926, the traditions concerning Israel's election by Galling in 1928, the origin and growth of the twelve-tribe system by Noth in 1930, the Saul-David material by Rost in 1926 and von Rad in 1944. Cultic and civil-criminal laws were replaced in their respective 'life-situations' by Jirku in 1927, Alt in 1934, Begrich in 1936. The links of historiography to cultus were

recognized and investigated (see G. von Rad, *Das formgeschichtliche Problem des Hexateuchs*, 1938; *Das erste Buch Mose*, 1949–1953; M. Noth, *Ueberlieferungsgeschichtliche Studien*, I, 1943; E. Jacob, *La tradition historique en Israël*, 1946; cf G. E. Wright, 'Recent European Study in the Pentateuch,' *JBR*, xviii [1950], 216–220). Literary criticism of other books of the OT and of the Apocrypha has likewise provided Israel's historians with a largely re-evaluated documentation. Moreover, the testimony of the written sources has been considerably complemented and in some cases corrected or confirmed by the results of near-eastern archaeology.

(*b*) *The Growth of Near-Eastern Archaeology.*—Inaugurated by Bonaparte's scientific and artistic expedition which accompanied the military invasion of Egypt in 1799, archaeology of the ancient Near East has considerably increased the knowledge of Israel's historians. Data furnished by archaeological investigations include: (i) the identification of Biblical sites, ways of communication, topographic and hydrographic features of the soil which in turn provide valuable information on the geography, the climate and the economic resources with their political and cultural consequences (see G. E. Wright and F. V. Filson, eds., *The Westminister Historical Atlas to the Bible*, 1956; L. H. Grollenberg, *Atlas of the Bible*, 1956; E. G. Kraeling, *Bible Atlas*, 1956; D. Baly, *The Geography of the Bible*, 1957; N. Glueck, *Rivers in the Desert*, 1959); (ii) the recovery of architectural and technological remains, with all artifacts, including weapons, tools, and instruments, ornaments and jewels, statuary and cultic objects; of especial importance is the excavation of Biblical sites, with the stratification of ashes and of datable pottery, which offers chronological clues of relative accuracy (see I. Benzinger, *Hebräische Archäologie*, 1927; C. Watzinger, *Denkmäler Palästinas*, 1933–1935; A. G. Barrois, *Manuel d'archéologie biblique*, 1939, 1953; G. Contenau, *Manuel d'archéologie orientale*, 1927–1947; W. F. Albright, *The Archaeology of Palestine*, 1949; 'The Old Testament and the Archaeology of Palestine,' and 'The Old Testament and the Archaeology of the Ancient Near East,' in H. H. Rowley, ed., *The Old Testament and Modern Study*, 1951, 1–47; J. Vandier, *Manuel d'archéologie égyptienne*, 1952–1958; J. B. Pritchard, *The Ancient Near East in Pictures*, 1954; *Archaeology and the Old Testament*, 1958; G. E. Wright, *Biblical Archaeology*, 1957); (iii) the unearthing, publication, translation, and interpretation of monumental inscriptions and literary texts, which have been relatively scarce in Palestine proper (even when cognizance is taken of the Dead Sea Scrolls), but quite numerous in Egypt, Iraq, Iran, Syria, Lebanon, and Turkey. These documents have been of considerable value for the reconstruction of the life and history of the world in which Israel lived (see H. Gressmann, *Altorientalische Texte und Bilder zum Alten Testament*, 1926–1927; G. A. Barton, *Archaeology and the Bible*, 1937; J. B. Pritchard, ed., *Ancient Near Eastern Texts Relating to the Old Testament*, 1955).

(*c*) *The Emergence of Anthropology, Sociology, and Comparative Religion.*—Studies on primitive man and society, the international folklore and magical rites offer no direct sources of information for the recovery of Israel's past. Nevertheless, these sciences have provided many clues for the interpretation of the Biblical material and the evaluation of the archaeological data. Actually, some scholars ascribe to them an exaggerated importance by postulating the identity of psychological, sociological, cultural, and especially religious processes, in Israel and in all primitive societies of mankind, thereby ignoring the distinctiveness of Israel's history. For example, many features of the Scandinavian thesis on Hebrew communal rites have been derived from Norse mythology rather than from the OT record. However, a knowledge of anthropology, sociology, and especially of Semitic comparative religion is indispensable to the historian of Israel, since the Hebrews were heavily dependent upon the cultures of the Ancient Near East.

The study of the pre-Islamic Arabs as well as of modern Bedouin tribes received an impulse from Wellhausen in 1883 and Musil in 1908 (see M. F. von Oppenheim, *Die Beduinen*, 1939–1952). Robertson Smith in 1889 and Lagrange in 1905 attempted to recapture, each in his own way, the religion of the ancient Semites. Frazer's monumental study of magic and religion (1890–1915) and folklore (1918) on the one hand and Winckler and Zimmern's publication of Babylonian texts (1893–1906) on the other hand have paved the way for highly conjectural reinterpretations of Israel's religious and political history by Mowinckel (1922–1926) and Hooke (1927, 1938, 1956, 1958) in the light of the Babylonian New Year Festival. Pedersen's emphasis on corporateness in his studies of Israel's popular culture (1926–1940) was paralleled by stresses which sociologists like Weber (1921) laid on economic factors or historians like Causse (1937) on the conflict between nomadic and agrarian modes of living, while Baron (1937) recognized not only the part played by social forces but also the decisive influence of Israel's élite. In the middle of the 20th cent., historians tended to maintain the moderate position occupied by Kittel and by Sellin in 1921. They were aware of elements of continuity and discontinuity in Israel's cultural affinities with the other nations of the ancient Near East.

2. The Early Traditions.—The majority of scholars, while making allowance for legendary and mythical elements, are confident that important outlines of tribal history are revealed in the early books of the Bible. The tenth chapter of Genesis contains a genealogical table in which nations are personified as men. Thus the sons of Ham were Cush (Nubia), Mizraim (Egypt), Put (East Africa ?), and Canaan. The sons of Shem were Elam, Assyria, Mesopotamia, Lud (a land of disputed situation, not Lydia), and Aram (the Aramaeans). If countries and peoples are here personified as men, the same may be the case elsewhere; in Abraham, Isaac, Jacob, Esau, and the twelve sons of Jacob, we may be dealing not with individuals but with tribes. The marriages of individuals may represent the alliances or union of tribes. Viewed in this way, these narratives disclose to us the formation of the Israelite nation.

The traditions may be classified in two ways: (*a*) as to origin, and (*b*) as to content.

(*a*) (i) Some traditions, such as those concerning kinship with non-Palestinian tribes, the deliverance from Egypt, and those concerning Moses, were brought into Palestine from the desert. (ii) Others, such as the traditions of Abraham's connexion with various shrines, and the stories of Jacob and his sons, were developed in the land of Canaan. (iii) Still others were received from the Canaanites. Thus we learn from an inscription of Thuthmose III. (1490–1435 B.C.), that *Jacob-el* was a place name in Palestine, Genesis (48^{9ff}) tells how Joseph was divided into two tribes, Ephraim and Manasseh. Probably the latter are Israelite, and are so called because they settled in the Joseph country. Lot or Luten (Egyptian *Ruten*) is an old name of Palestine or of a part of it. In Genesis, Moab and Ammon are said to be the children of Lot, probably because they settled in the country of Luten. In most cases where a tradition has blended two elements, one of these was learned from the Canaanites. (iv) Finally, a fourth set of traditions were derived from Babylonia. This is clearly the case with the Creation and Deluge narratives, parallels to which have been found in Mesopotamian literature. It is probable, however, that even these traditions were received through the Canaanites.

(*b*) Classified according to their content, the narratives are: (i) ancestral sagas which embody the history and movements of tribes; (ii) cultic legends which grew around the various shrines, like Bethel, Shechem, Hebron, and Beersheba; (iii) aetiological legends and myths, intended to explain the origin of some custom or the cause of some physical phenomenon. Thus Gn 18, 19—the destruction of Sodom and the other cities of the plain—is a story which grew up to account for the Dead

Sea, with its asphalt and bitumen deposits and its desolate shore. Similarly Gn 22 is a story which was preserved in order to justify the principle of animal substitution in the firstborn sacrifices. (iv) Other narratives are devoted to cosmogony and primeval anthropology. Many scholars regard the patriarchal narratives as relating largely to tribes rather than individuals. Parts of the account of Abraham are local traditions of shrines, but the story of Abraham's migration is the narrative of the westward movement of a tribe or group of tribes from which the Hebrews were descended. Isaac is a shadowy figure confined mostly to the south, which possibly represents a south Palestinian clan afterwards absorbed by the Israelites. Jacob-Israel represents the nation itself. Israel is called an Aramaean (Dt 26^5), and the account of the marriage of Jacob (Gn 29–31) shows that Israel was kindred to the Aramaeans.

3. The Patriarchal Age.—While the Genesis traditions link Abraham with 'Ur of the Chaldaeans' (Gn 11^{31}) in Lower Mesopotamia, they also relate that Terah, his father, had moved northward to Haran and that it was from there that Abraham emigrated to Canaan (Gn 11^{31} 12^{1-9}). Archaeological excavations have brought to light no external evidence on the historical accuracy of these traditions but they have enabled us to picture the Mesopotamian and Syro-Palestinian background of the patriarchal age with remarkable vividness and precision (see F. M. T. Böhl, 'Das Zeitalter Abrahams,' *Der alte Orient*, xxix [1930], 1; E. Dhorme, 'Abraham dans le cadre de l'histoire,' *RB* xxxvii [1928], 367–385, 481–511; xl [1931], 364–374, 503–518; R. de Vaux, 'Les patriarches hébreux et les découvertes modernes,' *RB* liii [1946], 321–348; lv [1948], 321–347; lvi [1949], 5–36; H. H. Rowley, 'Recent Discoveries and the Patriarchal Age,' in *The Servant of the Lord and Other Essays on the Old Testament*, 1952, pp. 271–305). The Sumerians had established in Lower Mesopotamia during the 3rd millennium B.C. a flourishing civilization. After suffering defeat under the Akkadians of Sargon I. (24th cent. B.C.), they finally succumbed to the onslaught of Elamitic hordes from the north-east. Amorite semi-nomads moved in Lower Mesopotamia from the desert of north-central Arabia and created the First Amorite Dynasty of Babylon. Through the impulse of their most dynamic monarch, Hammurabi (1728–1686 B.C.), the Amorites extended their domination of the Tigris and Euphrates valley northward and pushed westward their control of the Fertile Crescent (S. Moscati, *The Semites in Ancient History*, 1959).

The migration of Terah and Abraham are considered by many scholars to be a part of the Amorite expansion. Names of Amorite towns like Peleg, Serug, Nahor, Terah, and Haran are found in the Biblical narratives as personal names ascribed to ancestors or relatives of Abraham (Gn 10^{25} $11^{20, 25}$). Names of Amorite individuals include 'Benjamin,' 'Jacob-el,' and 'Abamram' (Abram ?). The date of the Hebrews' march to the West remains uncertain. Some scholars have identified the Amraphel, king of Shinar, mentioned in Gn 14, with Hammurabi of Babylon, thereby situating Abraham in the 18th–17th cents. B.C. This identification remains hypothetical, however, since more than one individual appears to have borne the name of Hammurabi and the tradition of Abraham's military activities, although ancient, conflicts sharply with the pictures of a peaceful semi-nomad which emerges elsewhere in the patriarchal traditions.

Legal and other customs of the Hebrews during this period, far from reflecting the mores of Israel after the conquest, as Wellhausen maintained (*Prolegomena to the History of Israel*, 1885, pp. 318–319), are similar to those of the contemporary Hurrians (reflected in the Nuzu and Mari Tablets; see I. J. Gelb, *Hurrians and Subarians*, 1944), an ethnic group which migrated southward from the Caucasian mountains and formed in the 15th and 14th cents. B.C. the Mittani empire. Thus several Hebrew customs on adoption, marriage, and property (Gn 15^4 16^2 21^{10} 25^{29-34} 29^{2ff} $30^{3, 9, 25ff}$ 31^{19ff}) were strikingly similar to those of the 2nd millennium Hurrians, while they had become obsolete when the early traditions came to be written down. Many Hurrians (the Horites of Gn 14^6; cf 36^{20}) went to the land of Canaan (the Hurru of the Egyptian documents during the 18th Dynasty). The Hebrews' travels through Palestine in the patriarchal age may well have been a part of the Hurrian infiltrations.

In Canaan, the patriarchal Hebrews entered into close contacts with the local inhabitants (see, for example, Gn 34). The Phoenician-Canaanite culture has become in modern times quite well-known, not only through the excavation of Palestinian and Phoenician sites but also by the Tell el-Amarna tablets and the Râs Shamra (Ugarit) texts (see W. F. Albright, *The Rôle of the Canaanites in the History of Civilization*, 1942; B. Maisler, 'Canaan and the Canaanites,' *BASOR*, No. 102, April 1946, 7–12). The Hebrews also had economic and cultural relations with the Hittites (Gn 23^9 25^9 26^{34} etc.) who had expanded eastward and southward from their Asia Minor empire (see F. Sommer, *Hethiter und Hethitisch*, 1948; E. Cavaignac, *Les Hittites*, 1950; O. R. Gurney, *The Hittites*, 1952; R. Dussaud, *Prélydiens, Hittites et Achéens*, 1953). Archaeological evidence supports the view of many Biblical writers according to which Israel's ancestors consorted with foreign nations (for example, Ex 3^{17}; cf Ezk 16^3).

Many documents of the 2nd millennium B.C., scattered on a wide area from Mesopotamia to Egypt, refer to the Habiru or Hapiru, semi-nomadic groups which moved about the Fertile Crescent between the 20th and the 12th cents. B.C. The assumption that the 'Hebrews' were an ethnic community identical with the 'Habiru' has not been demonstrated (see H. H. Rowley, 'Râs Shamra and the Habiru Question,' *PEQ*, lxxii [1940], 90–94; J. W. Jack, 'New Light on the Habiru-Hebrew Question,' *ibid.*, 95–115; G. Posener et J. Bottéro, *Le problème des Ḫabiru . . .*, 1954; M. Greenberg, *The Ḫab|piru*, 1955).

4. The Origins of Israel.—In all probability, the Hebrews of the patriarchal age formed a number of distinct clans, as shown by the traditions concerning Abraham's descendants and their relatives (Gn 19, 22^{20-24} $25^{1-4, 12-18}$ 36) and especially the sons of Jacob (Gn 29^{14}–30^{36} 35^{16-20}). The patrilineal surname 'Israel' for Jacob (Gn 32^{28}, cf Hos 12^{12-13}, Is 41^8 etc.) clearly suggests that the tribes designated by the names of his sons felt among themselves a degree and a quality of close kinship while they were aware of a more distant affinity with the other 'descendants' of Abraham and Isaac. Some historians maintain that the twelve-tribe scheme (Gn 49, Dt 33, etc.) dates from the conquest rather than from an earlier age (see M. Noth, *Geschichte Israels*, 1956, pp. 54–104), but internal evidence requires a more confident appraisal of the traditions (see J. Bright, *Early Israel in Recent History Writing*, 1956; *A History of Israel*, 1959, pp. 60–127).

The sons of Jacob are divided into four groups. Six—Reuben, Simeon, Levi, Judah, Issachar, and Zebulun—are said to be the sons of Leah, a name which probably means 'wild cow.' Apparently these tribes were near of kin, and possessed as a common symbol the 'wild cow' or 'bovine antelope.' The tribes of Manasseh, Ephraim, and Benjamin traced their descent from Rachel, a name which means 'ewe.' These tribes, though kindred to the other six, probably traced their origin to a different ethnic and cultic stock, symbolized by the ewe. Judah was, in the period before the conquest, a far smaller tribe than afterwards, for it seems that many Palestinian clans were absorbed into Judah. Benjamin is said to have been the youngest son of Jacob, born in Palestine a long time after the others. The name means 'son of the south' or 'southerner' and historians used to think that it applied to the geographical location of the tribe of Benjamin, S. of Ephraim. Recent discoveries make this view doubtful (J. Muilenburg, 'The Birth of Benjamin,' *JBL*, lxxv [1956], 194–201). Four sons of Jacob—

Dan, Naphtali, Gad, and Asher—are said to be the sons of concubines. This less honourable birth possibly meant that they joined the confederacy later than the others. The original Israel probably consisted of the eight tribes —Reuben, Simeon, Levi, Judah, Issachar, Zebulun, Manasseh, and Ephraim—though perhaps the Rachel tribes did not join the confederacy until they had escaped from Egypt. These tribes, along with the other Abrahamidae—the Edomites, and Moabites—moved westward from the Euphrates along the eastern borders of Palestine. The Ammonites, Moabites, and Edomites gained a foothold in the territories afterwards occupied by them. The Israelites appear to have been compelled to move on to the less fertile steppe to the south, between Beersheba and Egypt, roaming at times as far as Sinai.

The end of the patriarchal age is of uncertain date. Some time during the 2nd millennium, perhaps during the Hyksos invasion of Egypt (*c* 1710 B.C.; see R. M. Engberg, *The Hyksos Reconsidered*, 1944), perhaps later, a few of the Jacob tribes entered the Nile Delta while others remained in the Fertile Crescent.

5. The Egyptian Slavery.—The firm and constant tradition of Hebrew enslavement in Egypt, running as it does through all of the Pentateuchal documents and forming the background of all Israel's religious and prophetic consciousness, must have some historical content. We know from the Egyptian monuments that at different times Bedouin from Asia entered the country on account of its fertility. The famous Hyksos kings and their people found access to the land of the Nile in this way. Probability strengthens the tradition that the Hebrews so entered Egypt. Ex 1^{11} states that they were compelled to aid in building the cities of Pithom and Raamses. Excavations have shown that these cities were either founded or rebuilt by Rameses II. (1292–1224 B.C.), although his father, Seti I. (1308–1292 B.C.) had already begun architectural renovations at Avaris (Tanis). It is known that both monarchs pressed into labour the semi-nomadic Asiatics who were living in that area, a fact which fits the stories of Ex 1 (see P. Montet, *Le drame d'Avaris: essai sur la pénétration des Sémites en Egypte*, 1940). The date of the Exodus presents a number of extremely complex problems because the data are quite contradictory (see H. H. Rowley, *From Joseph to Joshua*, 1950). Since Merenptah (1224–1216 B.C.) mentioned 'Israel' as a people (but not as a country) whom he crushed in Canaan in about 1220 B.C., it is probable that the bulk of Israel had only infiltrated the land at that date. This conclusion is confirmed by some of the archaeological evidence. Bethel, Eglon, Kiriath-sepher (Debir), and Lachish were violently destroyed during the 13th cent. B.C.; in the case of Lachish, the date may be more accurately determined as between 1240 and 1230 B.C. (cf Jos 10^{31ff}). Excavations at Jericho and Ai offer inconclusive results. Moreover, the memory of a forty-year wandering in the Sinai and Kadesh wilderness, at least for the Joseph tribes and the Levi elements led by Moses and Aaron, is so firmly established that the date of the Exodus would seem to be the first half of the 13th cent. (*c* 1275 B.C.).

6. The Exodus.—The J, E, and P documents agree in their main picture of the Exodus, although J differs from the other two in holding that the worship of Yahweh was known at an earlier time. Moses, they tell us, fled from Egypt and took refuge in Midian with Jethro, a Kenite priest (cf Jg 1^{16}). Here, according to E and P, at Horeb or Sinai, Yahweh's holy mount, Moses first learned to worship Yahweh, who, he believed, sent him to deliver from Egypt his oppressed brothers. After various plagues (J gives them as seven, E, five, and P, six) Moses led them out, and by Divine aid they escaped across the Red Sea. J presents this escape as the result of Yahweh's control of natural means (Ex 14^{21}). Moses then led them to Sinai, where, according to both J and E, they entered into a solemn covenant with Yahweh, to serve Him as their God. According to E (Ex 18^{12ff}), it was Jethro, the Kenite or Midianite priest, who initiated the covenant. After this the Rachel tribes probably allied themselves more closely to the Leah tribes, and, through the aid of Moses, gradually led them to adopt the worship of Yahweh.

The story of Moses is encumbered with folkloric details (*i.e.* Ex 2), but their legendary origin does not detract from the historical character of the Levi hero. His tribal ancestry called for valour (Gn 49^{6-7}). He and several of his companions had been exposed to Egyptian culture, as shown by their names (Moses, Aaron, Hophni, Merari, Miriam, Phinehas, Puti-el), and his leadership extended to non-Hebrew elements (Ex 12^{38}, Nu 14^{4}).

The route followed by the fugitives is a matter of controversy. There is evidence that Lake Timsah was during the 2nd millennium B.C. a shallow part of the Gulf of Suez (see C. Bourdon, 'La route de l'Exode . . .,' *RB*, xli [1932], 370–392, 539–549; cf H. Cazelles, 'Les localisations de l'Exode et la critique littéraire,' *RB*, lxii [1955], 321–364). The *yam sûph* of Ex 15^{4} is not 'the Red Sea' (LXX) but 'the sea of papyrus reeds,' and it may well have been in the Lake Timsah vicinity. The memory of a Divine deliverance at a time of utmost crisis became central to the faith of Israel and remained determinative, to a large extent, of her later history and religion. The antiquity of the victory song attributed to Miriam, the sister of Moses, offers strong literary support to the validity of the tradition (see F. M. Cross, jun., and D. N. Freedman, 'The Song of Miriam,' *JNES*, xiv [1955], 237–250.

7. The Wilderness Wandering.—For some time the *habitat* of Israel, as thus constituted, was the region between Sinai on the south and Kadesh—a spring some fifty miles S. of Beersheba—on the north. At Kadesh the fountain was sacred, and at Sinai there was a sacred mountain. Moses became during this period the sheikh of the united tribes. Because of his pre-eminence in the knowledge of Yahweh he acquired this paramount influence in all their counsels. In the traditions this period is called the Wandering in the Wilderness, and it is said to have continued forty years. The expression 'forty years' is, however, used by D and his followers in a vague way for an indefinite period of time. Nevertheless, the people remembered that all those who had left Egypt as adults died in the desert (Nu 14^{26-35} 26^{63-65}).

The region in which Israel now roamed was anything but fertile, and the people naturally turned their eyes to more promising pasture lands. This they did with the more confidence, because Yahweh, their God, had just delivered their fathers from Egypt in an extraordinary manner. Naturally they desired the most fertile land in the region, Canaan. Finding themselves unable, for some reason, to move directly upon it from the south (Nu 13, 14), perhaps because the hostile Amalekites interposed, they made a circuit to the eastward. According to the traditions, their detour extended around the territories of Edom and Moab, so that they came upon the territory N. of the Arnon, where an Amorite kingdom had previously been established, over which, in the city of Heshbon, Sihon ruled.

8. The Trans-Jordanic Conquest.—The account of the conquest of the kingdom of Sihon is given by E with a few additions from J in Nu 21. No details are included, but it appears that in the battles Israel was victorious. We learn from the P document in Nu 32 that the conquered cities of this region were divided between the tribes of Reuben and Gad. Perhaps it was at this moment that the tribe of Gad came into the confederacy. At least they appear in concrete history here for the first time. It is usually supposed that the territory of Reuben lay to the south of that of Gad, extending from the Arnon to Elealeh, N. of Heshbon; in fact, their territory interpenetrated (Nu 32^{34}). Thus the Gadites had Dibon, Ataroth, and Aroer to the south, Jazer N. of Heshbon, and Beth-nimrah and Beth-haran in the Jordan valley; while the Reubenites had Baal-meon, Nebo, Heshbon, and Elealeh, which lay between these. Probably the country to the north was not conquered until later. To be sure, D claims that Og, the king of Bashan, was conquered at this time, but

it is possible that the conquest of Bashan by a part of the tribe of Manasseh was a backward movement from the west after the conquest of Palestine was accomplished. During this period Moses died, and Joshua became the leader of the nation.

9. Crossing of the Jordan.—The conquests achieved by the tribe of Gad brought the Hebrews into the Jordan valley, but the swiftly flowing river with its banks of clay formed an insuperable obstacle. The Arabic historian Nuwairi tells of a land-slide of one of the clay hills that border the Jordan, which afforded an opportunity for the Arabs to complete a military bridge. A similar event may well have taken place at the time of Israel's military expedition westward. The stories which describe the crossing of the Jordan (Jos 3–5) explained the origin of a circle of sacred stones called *Gilgal*, which lay on the west of the river (see H. J. Kraus, 'Gilgal: ein Beitrag zur Kultusgeschichte Israels,' *VT*, i [1951], 181–199; J. Mauchline, 'Gilead and Gilgal: Some Reflections on the Israelite Occupation of Palestine,' *VT*, vi [1956], 19–33).

10. The Conquest of Canaan.—The first point of attack after crossing the Jordan was Jericho (Jos 6). As to the subsequent course of the conquest, the sources differ widely. The D and P strata of the book of Joshua, which form the main portion of it, represent Joshua as gaining possession of the country in two great battles, and as dividing it up among the tribes by lot. The J account of the conquest, however, which has been preserved in Jg 1 and Jos 8–10, $13^{1, 7a, 13}$ $15^{14-19, 63}$ $16^{1-3, 10}$ 17^{11-18} 19^{47}, while it represents Joshua as the leader of the Rachel tribes and as winning a decisive victory near Gibeon, declares that the tribes went up to win their territory singly, and that in the end their conquest was only partial. This representation is much older than the other, and is much more in accord with the subsequent course of events and with historical probability. (See W. F. Albright, 'The Israelite Conquest of Canaan,' *BASOR*, No. 74 [April, 1939], 11–23; G. E. Wright, 'The Literary and Historical Problem of Joshua 10 and Judges 1,' *JNES*, v [1946], 105–114; N. H. Snaith, 'The Historical Books,' in H. H. Rowley, ed., *The Old Testament and Modern Study*, 1951, pp. 84–95; M. Noth, *Das Buch Josua*, 1953; H. W. Hertzberg, *Die Bücher Josua, Richter, Ruth . . .*, 1953; Y. Kaufmann, *The Biblical Account of the Conquest of Palestine*, 1953.)

According to J, there seem to have been at least three lines of attack: (*a*) that which Joshua led up the valley from Jericho to Ai and Bethel, from which the territories afterwards occupied by Ephraim and Benjamin were secured; (*b*) a movement on the part of the tribe of Judah followed by the Simeonites, south-westward from Jericho into the hill-country about Bethlehem and Hebron; (*c*) lastly, there was the movement of the northern tribes into the hill-country which borders the plain of Jezreel. J in Jos $11^{1, 4-9}$ tells us that in a battle by the Waters of Merom Joshua won for the Israelites a victory over four petty kings of the north, which gave the Israelites a foothold there. In the course of these struggles a disaster befell the tribes of Simeon and Levi. They attempted to take Shechem, but the Shechemites practically annihilated Levi, and greatly weakened Simeon (cf Gn 34). This disaster was thought to be a Divine punishment for reprehensible conduct (Gn 49^{5-7}). J distinctly states (Jg 1) that the conquest was not complete, but that two lines of fortresses, remaining in the possession of the Canaanites, cut the Israelite territory into three sections. One of these consisted of Dor, Megiddo, Taanach, Ibleam, and Beth-shean, and gave the Canaanites control of the great plain of Jezreel, while, holding as they did Jerusalem, Aijalon, Har-heres (Beth-shemesh), and Gezer, they cut the tribe of Judah off from their northern kinsfolk. J further tells us distinctly that not all the Canaanites were driven out, but that the Canaanites and the Hebrews lived together. Later, the tradition says, Israel made slaves of the Canaanites. Although this latter statement is perhaps true for those Canaanites who held out in these fortresses, the are reasons for believing that by intermarriage a gradual fusion between Canaanites and Israelites took place.

The first event of major importance in the history of Israel as a nation took place at Shechem, where Joshua renewed the covenant (Jos 24; see E. Nielsen, *Shechem, A Traditio-historical Investigation*, 1955) and revived the memory of a common ancestry. He may have also created a tribal organization which some scholars have likened to the Greek amphictyony. It is possible that the Shechem covenant helped to seal a religious and political bond between those tribal elements which had settled in Canaan and Transjordania for several centuries and others which had sojourned in Egypt and the wilderness of Sinai. At what time the tribes of Naphtali and Dan joined the Hebrew federation we have no means of knowing. J tells us (Jg 1^{34f}) that the Danites struggled for a foothold in the Shephelah, where they obtained but an insecure footing. As they afterwards migrated from here (Jg 17, 18), and as a place in this region was called the 'Camp of Dan' (Jg 13^{25} 18^{12}), probably their hold was insecure. We learn from Jg 15 that they possessed the town of Zorah, where Samson was afterwards born (see H. H. Rowley, 'The Danite Migration to Laish,' *ET*, li [1939–1940], 465–471).

11. The Time of the Judges (*c* 1200–1020 B.C.).—For the first century of her occupation of the land, Israel learned agriculture and industrial technology from the Canaanites who lived there (see C. A. Simpson, *Composition of the Book of Judges*, 1957; W. F. Albright, *From the Stone Age to Christianity*, 1957; E. Taubler, *Biblische Studien: I. Die Epoche der Richter*, 1958). The chronology suggested by the Book of Judges is probably too long. The Deuteronomic editor, who is responsible for this chronology, may have reckoned forty years as the equivalent of a generation, and 1 K 6^{1} gives us the key to his scheme. He made the time from the Exodus to the founding of the Temple twelve generations. The so-called 'Minor Judges'—Tola, Jair, Ibzan, Elon, and Abdon (Jg 10^{1-5} 12^{8-15})—were not included in the editors' chronology. The statements concerning them were added by a later hand. As three of their names appear elsewhere as clan names (cf Gn 46^{13f}, Nu $26^{23, 26}$, Dt 3^{14}), and as another is a city (Jos 21^{30}), scholars are agreed that these were not real judges, but that they owe their existence to the evolution of the traditions. Some doubt attaches also to Othniel, who is elsewhere a younger brother of a Caleb. The Calebites were a branch of the Edomite clan of the Kenaz (cf Jg 1^{13} with Gn $36^{11, 13, 42}$) which had settled in Southern Judah. This doubt is increased by the fact that the whole of the narrative of the invasion of Cushan-rishathaim, king of Mesoptamia, is the work of the editor, and also by the fact that no king of Mesopotamia who could have made such an invasion is known to have existed at this time. Furthermore, had such a king invaded Israel, his power would have been felt in the north and not in Judah. If there is any historical kernel in this narrative, probably it was the Edomites who were the perpetrators of the invasion, and their name has become corrupted. It is difficult, then, to see how Othniel should have been a deliverer, as he seems to have belonged to a kindred clan, but the whole matter may have been confused by oral transmission. Perhaps the narrative is a distorted reminiscence of the settlement in Southern Judah of the Edomitic clans of Caleb and Othniel (see A. Malamat, 'Cushan Rishathaim and the Decline of the Near East around 1200 B.C.' *JNES*, xiii [1954], 231–242).

The major judges were Ehud, Deborah, Gideon, Jephthah, Eli, and Samuel. Samson was a kind of giant-hero, but he always fought single-handed; he was no leader and organizer of men, and it is difficult to see how he can justly be called a judge. The age was a period of great tribal restlessness. Others were trying to do what the Israelites had done, and gain a foothold in the relatively fertile land of Canaan. Each invader, coming from a different direction, affected a different

part of the territory, and in the region thus concerned a patriot would arouse the Hebrews of the vicinity and expel the invader. The influence he acquired from his exploit and the position which the wealth derived from the spoil of war gave him, made such a hero the sheikh of his district for a few years. Thus the judges were in reality great tribal chieftains. They owed their office to personal prowess.

Deborah and Barak delivered Israel, not from invaders, but from Canaanites, who still controlled, with the help of 'iron chariots,' the lowlands of Palestine, especially the plain of Jezreel (Jg 4–5). At the battle of Megiddo (*c* 1125 B.C.), Sisera's army was routed and the Hebrew elements which had settled on the Galilean hills were no longer separated from the bulk of the tribes which occupied the central mountain range.

The conquest of Canaan by the Hebrews was made possible by a conjunction of events rather unusual in the ancient Near East. Toward the end of the 13th cent. B.C., Egypt lost her grip upon Western Asia, and except during the reign of Rameses III. (*c* 1175–1144 B.C.) remained politically weak for several generations. At the same time, Assyria did not yet constitute an imperialistic threat. During the age of the Judges, the Israelites were able to survive and to overcome Canaanite resistance without risking interference from the larger powers of the world. At the same time, they were able to pass from a nomadic and pastoral mode of existence to a sedentary and agrarian civilization.

There were, however, four serious invasions from the outside: (*a*) that of the Moabites, which called Ehud into prominence; (*b*) that of the Midianites, which gave Gideon his opportunity; (*c*) that of the Ammonites, from whom Jephthah delivered Gilead; and (*d*) that of the Philistines, against whom Samson, Eli, Samuel, and Saul struggled, and who were not overcome until the time of David.

The first of these invasions affected the territories of Reuben and Gad on the east of the Jordan, and of Benjamin on the west. It probably occurred early in the period of the Judges. The second invasion affected the country of Ephraim and Manasseh, and probably occurred about the middle of the period. Gideon's son Abimelech endeavoured to establish in Shechem a petty kingdom (*c* 1100 B.C.) but the attempt at kingship was premature (Jg 9; see especially Jotham's fable, vv.$^{5-7}$; C. F. Whitley, 'The Sources of the Gideon Stories,' *VT*, vii [1957], 157–164). The Ammonite invasion affected only Gilead, while the Philistine invasion, at a later time, threatened the life of the entire territory, and constituted the most important factor in the establishment of a hereditary monarchy.

The struggles with these invaders increased the national solidarity. At the end of the 12th cent. B.C., as the song of Deborah shows, a sense of kinship existed 'in Israel' (Jg 5^{7f}). Although several tribes refused to join the coalition against Sisera (Jg 5$^{16-18}$) and the tribe of Judah is not even mentioned, the very fact that some tribes are blamed for their neutrality attests the reality of a consciousness of super-tribal solidarity. The existence of a twelve-tribe system is implied by the ritual act of the man from Ephraim (Jg 19^{29}) and by a similar gesture performed by Saul when he responded to a call of Jabesh-gilead at the time of a second Ammonite invasion (1 S 11^{7}). Some scholars maintain that throughout the period of the Judges, in spite of political anarchy, the idea of the nation 'Israel,' inherited from the Mosaic covenant, and renewed by Joshua at the Shechem shrine (Jos 24), was kept alive by yearly pilgrimages to the Ark at the central sanctuary of Shiloh (1 S 1$^{3, 7, 21}$). According to this view, military threats did not create national unity. It should be conceded, however, that they accelerated the trend toward political solidarity and governmental centralization.

During these years the process of amalgamation between the Israelites and the Canaanites went steadily forward. The tribe of Judah probably absorbed not only the Kenizzites and Calebites but also the Shuaites and the Tamarites (cf Gn 38). The Kenites also united with Judah (Jg 1^{16}), as did also the Jerahmeelites (cf 1 S 30^{29} with 1 Ch 2^{9}). What went on in Judah occurred to some extent in all the tribes, though probably Judah excelled in this political and ethnic proliferation. Perhaps it was a larger admixture of foreign blood that gave Judah its sense of aloofness from the rest of Israel. Certain it is, however, that the great increase in strength which Israel experienced between the time of Deborah and the time of David cannot be accounted for on the basis of population growth alone. There were elements in the religion of the Israelites which, notwithstanding the absorption of culture from the Canaanites, enabled Israel to absorb in turn the Canaanites themselves.

The age of the Judges ended with the fall of Shiloh under the onslaught of the Philistine invasions (*c* 1050–1020 B.C.). The Philistines belonged to the waves of immigrants from the isles of Greece and the coasts of Asia Minor whom the Egyptians called 'the Peoples of the Sea.' Rameses III. (1175–1144 B.C.) succeeded in restraining their efforts to conquer Egypt. As a result, they settled on the coastal plain of Canaan where they established a confederation of city-states. From there, they attempted to seize the whole of the mountain range and they nearly succeeded. Indeed, their own name has been thereafter used to designate the whole land of 'Palestine.'

At the request of the elders of Israel, the Ark was moved from the temple of Shiloh to lead the Hebrew armies against the Philistine invaders, but it fell into the hands of the enemy. After the defeat of Eben-ezer, most of the Hebrew cities, including the sanctuary of Shiloh, were destroyed—an event which has been confirmed by archaeological excavations. The nation was saved from extinction by the activity of the priestly prophet Samuel, of the shrine of Shiloh, who discerned that, in the face of foreign occupation, the hierocratic form of government (Eli and his sons, Samuel and his sons) was incapable of opposing effective resistance. He was instrumental in instituting a hereditary monarchy.

12. The Reign of Saul (*c* 1020–1000 B.C.).—There are two accounts of Saul's accession to kingship. The older of these (1 S 9^{1}–10$^{16, 27b}$ 11$^{1-15}$) tells how Saul was led to Samuel in seeking some lost asses, how Samuel anointed him to be king, and how about a month later the men of Jabesh-gilead, whom the Ammonites were besieging, sent out messengers earnestly imploring aid. Saul made a ritual declaration of national emergency. The various tribes of Israel raised an army which, under Saul's leadership, delivered the besieged city. He was then recognized as king at Gilgal. The other account (which is found chiefly in 1 S 7^{3}–8^{22} 10^{17-27a} 12) presents a different picture. In this tradition, Samuel is not a local seer but a judge with legal and military responsibilities (7$^{5-17}$) whose activity centres in the sanctuaries of Bethel, Gilgal, and Mizpah. Saul is elected king at Mizpah, in spite of Samuel's reluctance. Although this anti-royalist view may have been edited at a later date, there is valid reason to believe that it depends upon an ancient tradition (see I. Mendelsohn, 'Samuel's Denunciation of Kingship in the Light of the Akkadian Documents from Ugarit,' *BASOR*, No. 143 [October, 1956], 17–22).

While details of Saul's elevation as reported in both sources may not be reconciled in a satisfactory way, it is probable that Samuel, who represented the theocratic party, yielded to popular demands for a new regime on account of the Philistine emergency.

The Philistines, upon hearing that Israel had a king, naturally endeavoured to crush him. They penetrated as far as Michmash, within ten miles of Gibeah, Saul's fortress. Their camp was separated from that of Israel by the deep gorge of Michmash. Owing to the daring and valour of Jonathan, the king's son, a victory was gained for Israel which gave Saul for a time freedom from these enemies (1 S 13, 14). Soon, however, he was compelled to take up arms once more against the Philistines, whom he fought with varying fortunes until

they slew him in battle on Mount Gilboa. During the later years of his life, fits of insanity came upon him with increasing frequency. The tradition explained his disease as the evidence that Yahweh had abandoned him. There may be a kernel of historical accuracy in the story of Samuel's decision to repudiate Saul for a new leader, the young David of Judah (1 S 15–16), thereby insuring to the new dynasty the stamp of theocratic legitimacy.

Saul was the symbol of transition between the nomadic ways of the wilderness and the agrarian, industrial, and mercantile civilization of the Iron Age. The older source called him not 'a king' but 'a prince' (1 S 9^{16}) and described him as a charismatic leader sensitive to prophetic inspiration (10^{1-8}). His monarchy was of the constitutional kind, as indicated by the statement that Samuel wrote in a book the rights and duties of the kingship (1 S 10^{25}). Even after Samuel's death, the authority of the prophet remained for the king the source of his political and military decisions (1 S 28). With the ascent of David upon the throne, the concept of kingship evolved into the direction of absolute rule, which led, in due course, to Solomon's tyranny.

13. The Reign of David (*c* 1000–962 B.C.).—Before Saul's death, David, who had been expelled from the court, attached the men of Judah firmly to himself, and exhibited exceptional qualities of leadership. When Saul fell at Gilboa, David declared himself king of Judah at Hebron (2 S 2^{4}). As Jonathan, Saul's heir, had fallen in battle, Abner, Saul's faithful general, made Ish-baal, Saul's other son, king over Israel at Mahanaim in Transjordania. For seven and a half years civil war dragged itself along. Then Joab, David's general, removed Abner through treacherous murder, assassins disposed of the weak Ish-baal, and Israel and Judah were soon reunited under the rule of a single monarch, David. The statements of 2 S 5 show that the elders of Israel were hostile to him, but that they finally rallied to his leadership. David devoted his skill and energy to the consolidation of his kingdom. Just at the northern edge of the tribe of Judah, commanding the highway from north to south, stood the ancient fortress of Jerusalem. It had never been in the possession of the Israelites. The Jebusites, who had held it since Israel's entrance into Canaan, fondly believed that its position rendered it impregnable. This city David captured, and with the insight of genius made it his capital (2 S 5^{4ff}). This choice was a wise one in every way. Had he continued to dwell in Hebron, both Benjamin—which had been recently the royal tribe—and Ephraim—which never easily yielded precedence to any other group—would have regarded him as a Judaean rather than a national leader. Jerusalem was to the Israelites a new city. It not only had no associations with the tribal differences of the past, but, lying as it did on the borderland of two tribes, was neutral ground. Moreover, the natural facilities of its situation lent it a strategic and tactical significance. David rebuilt the Jebusite stronghold and took up his residence in it, and thus it became known as the city of David.

The Philistines, ever jealous of the rising power of Israel, soon attacked David in his new capital, but he gained such a victory over them (2 S 5^{18ff}) that he thereafter sought them out, city by city, and subdued them at his leisure (2 S 8^{1ff}). Having swept the Philistines out of the high land, he turned his attention to the Transjordanian territory. He attacked Moab, and after his victory treated the conquered with the greatest barbarity (2 S 8^{2}). Edom was also subdued (8^{13f}). Ammon needlessly provoked a war with Israel, and after a long siege their capital Rabbah, on the distant border of the desert, succumbed (12^{29}). The Aramaean state of Zobah was compelled to pay tribute (8^{3ff}). Damascus, whose inhabitants, as kinsfolk of the people of Zobah, tried to aid the latter, was finally made a tributary state also (8^{5ff}). Within a few years, David built up a considerable empire. This territory he did not attempt to organize in a political way, but according to the Oriental custom of the time he ruled it through submissive native princes. Toi, king of Hamath, and Hiram, king of Tyre, sent embassies to welcome David as a commercial partner. Thus Israel became a recognized power, for the first time in history, among the nations of the world.

This political success was made possible by the continuation of a state of weakness both in Mesopotamia and in the valley of the Nile. After Tiglath-pileser I. (*c* 1113–1075 B.C.), the Assyrians passed through a period of difficulties, from which they did not emerge until the middle of the 9th cent. B.C. Likewise, the 21st Egyptian Dynasty, divided by domestic intrigue, was unable to intervene in the affairs of the Fertile Crescent.

Upon his removal to Jerusalem, David organized his court on a scale hitherto unknown in Israel. Following Oriental mores, he married several wives. His fondness for his son Absalom and his paternal weakness produced dire political consequences. Absalom led a rebellion which drove the king from Jerusalem and nearly cost him the throne. David on this occasion, like Ish-baal before him, took refuge at Mahanaim, the east Jordanian stronghold. David's conduct towards the rebellious son was such that, without Joab's disregard of the royal command, the defeated Absalom would not have been put to death and might have triumphed in the end. The last days of David were further troubled by the attempt of his other son, Adonijah, to seize the crown (1 K 1). Having, however, fixed the succession upon Solomon, the son of Bathsheba, David probably left to him as an inheritance not only the kingdom but also the duty of taking vengeance upon Joab and Shimei (1 K 2^{1ff}). To the reign of David subsequent generations looked as the golden age of Israel. Never again did the boundaries of a united kingdom extend so far. These boundaries, magnified a little by fond imagination, became the ideal limits of the Promised Land. David himself, idealized by later ages, became the prototype of the Messiah.

14. The Reign of Solomon (962–922 B.C.).—Probably upon the accession of Solomon, certainly during his reign, two of the tributary states Edom and Damascus, gained their independence (1 K 11^{14-25}). The remainder of the empire of David was held by Solomon almost until his own death. While David had risen from the people, a simple shepherd who, not unlike Saul, had maintained fairly simple modes of living, Solomon imitated the conduct of the petty kings of the ancient Near East. He consummated a marriage with the daughter of the Pharaoh, probably one of the rulers of the Tanite branch of the 21st Dynasty. This marriage brought him in touch with the culture of Egypt. He developed a foreign service, with ambassadors who learned the methods of the international wise men, and probably on this account received at a later age a reputation for wisdom (1 K 3^{16-23} 4^{29-34} 10^{1-10}; see R. B. Y. Scott, 'Solomon and the beginnings of wisdom in Israel,' *Wisdom in Israel and in the Ancient Near East*, ed. by M. Noth and D. Winton Thomas [1955], pp. 262–279).

In order to equip his capital with public buildings suitable to the estate of an international monarch, Solomon hired Phoenician architects, and constructed a palace for himself, one for the Egyptian princess, and a royal chapel according to the design of Phoenician temples. This religious innovation was looked upon with disfavour by many of his contemporaries (1 K 12^{28b}), and his buildings, although the boast of a later age, were regarded with mingled feelings by those who were compelled to pay the taxes by which their erection was made possible. His expenditures forced him to cede to the king of Tyre a part of the Galilean territory.

Not only through his architectural projects but also in his whole establishment did Solomon depart from the simple ways of his father. He not only married the daughters of many of the petty kings who were his tributaries, but he also filled his harem with numerous beauties besides. Probably the statement that he had 700 wives and 300 concubines (1 K 11^{3}) is the exaggeration of popular legend, but, allowing for this, his harem

must have been quite extensive and constituted a drain on the public treasury. His method of living was, of course, in accord with the magnificent palaces which he had erected.

To support this splendour, the old system of taxation was inadequate, and a new method had to be devised. The whole country was divided into twelve districts, each of which was placed under the charge of a tax-gatherer, in order to furnish for the king's house the provision for one month in each year (1 K 4^{7-18}). It is noteworthy that in this division economic conditions rather than tribal territories were followed. Not only were the tribes unequal in numbers, but the territory of certain sections was much more productive than that of others, and it appears that Judah received a favoured treatment. Solomon is also said to have departed from the simple ways of his father by introducing horses and chariots for his army and for his personal use. To house his chariotry, he built stables at Megiddo and elsewhere. The stables of Megiddo, which have been excavated, could accommodate almost 500 horses. The royal wealth was increased by trade with South Arabia and possibly the east coast of Africa and the west coast of India. Solomon established a fleet of trading vessels on the Red Sea and perhaps on the Indian Ocean as well, manned with Phoenician sailors (1 K 9^{26ff}). In order to shelter goods in transit, he built a number of warehouses in fortified centres which were also of use for the storing of taxed goods. He traded horses on an international basis (1 K 10^{28-29}). Excavations at the site of the ancient port of Ezion-geber, on the gulf of 'Aqaba, have brought to light large installations, including furnaces for the smelting and refining of copper and iron ore which was mined in the vicinity and in the Sinai peninsula.

Towards the close of Solomon's reign the tribe of Ephraim, which in the time of the Judges could hardly bear to allow another tribe to take precedence of it, became restless. Economic and political resentment against Solomon found support among the prophetic circles which represented the old Yahwism of the desert and condemned the king's alliances with foreign nations as well as the idolatrous worship practised in Jerusalem by his wives. The prophet Ahijah supported Jeroboam, a young Ephraimitic officer to whom Solomon had entrusted the administration of the Joseph tribes (1 K 11^{28}). Jeroboam's plans for rebelling involved the fortifying of his native city of Zeredah, which called Solomon's attention to his plot. Forced to flee the country, he found refuge in Egypt. The 21st Dynasty, with which Solomon was allied by marriage, had been terminated by Shishak (Sheshonk), who founded the 22nd Dynasty, reunited Egypt under one sceptre and entertained ambitions to renew Egypt's colonization of the Fertile Crescent. Shishak accordingly welcomed Jeroboam and offered him asylum.

15. The Division of the Kingdom (922 B.C.).—Upon the death of Solomon, his son Rehoboam was proclaimed king in Judah without opposition, but as some doubt concerning the loyalty of the other tribes seems to have existed, Rehoboam went to Shechem to be anointed king at the traditional shrine of Ephraim (1 K 12^{1ff}). Having been informed of the development in his Egyptian retreat, Jeroboam returned to Shechem at once and prompted the elders of the tribes assembled there to exact from Rehoboam a promise that in case they accepted him as monarch he would relieve them of the heavy taxation which his father had imposed upon them. After considering the matter for three days, Rehoboam replied, 'My little finger shall be thicker than my father's loins.' All the tribes except Judah and a portion of Benjamin refused to acknowledge the descendant of David, and they made Jeroboam their king. Judah remained faithful to the heir of their old hero, and, because Jerusalem was on the border of Benjamin, the Judaean kings were able to retain a strip of the land of that tribe from four to eight miles in width. All else was lost to the Davidic dynasty.

The chief forces which produced this disruption were economic and ethnic. Israel proper was aware of the divergence of racial elements which separated her from Judah. Religious conservatism also did its share. Solomon had in many ways contravened the religious customs of his nation. Jeroboam was aware of this antagonism when he used as a rallying slogan, 'Behold thy gods, O Israel, which brought thee up out of the land of Egypt!' Since the history of the schism has been preserved only through the Deuteronomic editor of the book of Kings, who was a propagandist of the Jerusalem cultus in a later era, modern scholars are careful to view the attitude of Jeroboam with impartiality. He was not a religious and political innovator but rather a conservative.

When the kingdom was divided, the tributary states of course gained their independence, and Israel's empire came to an end. The time of her political glory had been less than a century, and her empire disappeared never to return. The nation, being divided and its parts often warring with one another, could not easily become again a power of importance (see S. Yeivin, 'Social, Religious and Cultural Trends in Jerusalem under the Davidic Dynasty,' *VT*, iii [1953], 163 ff).

16. From Jeroboam to Ahab (922–850 B.C.).—The kingdom of Judah remained loyal to the Davidic dynasty for three and a half centuries, but in Israel military *coups d'état* imposed frequent and violent interruptions of dynastic succession. Only one family furnished more than four monarchs, some only two, while several failed to transmit the throne at all. The kings during the first period after the schism were:

Israel		Judah	
Jeroboam I.	922–901	Rehoboam	922–915
Nadab	901–900	Abijam	915–913
		Asa	913–873
Baasha	900–877	Jehoshaphat	873–849
Elah	877–876		
Zimri	876		
Omri	876–869		
Ahab	869–850		

Jeroboam I. fortified Shechem (1 K 12^{25}), but Tirzah became the capital of his kingdom (1 K 14^{17}). He extended his patronage to two sanctuaries, Dan and Bethel, the one at the northern and the other at the southern extremity of his territory. There were, of course, hostile relations between him and Rehoboam as long as he lived. One might think that he was instrumental in bringing Shishak of Egypt to invade Judah (1 K 14^{25}). If so, his diplomatic intrigue turned against him as well as against the son of Solomon. For Shishak not only compelled Rehoboam to pay a tribute which stripped the Temple of much of its gold treasure and ornamentation but also marched northward as far as the sea of Galilee, captured the towns of Megiddo, Taanach, and Shunem in the plain of Jezreel, the town of Bethshean at the junction of Jezreel with the Jordan valley, and Transjordania as far as Mahanaim. How deep the enmity between Israel and Judah may have become is to be inferred from the fact that this attack of the Egyptian monarch did not effect between them a reconciliation.

Shishak's campaign seems to have been a mere plundering raid. It established no permanent Asiatic empire for Egypt. After this attack, Rehoboam strengthened the fortifications of his kingdom (2 Ch 11^{5-11}). His territory extended to Mareshah and Gath in the Shephelah, and southward as far as Hebron. No mention is made of any town N. of Jerusalem or in the Jordan valley.

The hostile relations between the two kingdoms were perpetuated after the death of Rehoboam, during the short reign of Abijam. In the early part of the reign of Asa, while Nadab was on the throne of Israel, active hostilities ceased sufficiently to allow the king of Israel to besiege the Palestine city of Gibbethon, a town in the

northern part of the coastal plain. The Israelite monarch felt strong enough to endeavour to extend his dominions by compelling these ancient enemies of Israel to submit once more. During the siege of this town, Baasha, an ambitious man of the tribe of Issachar, assassinated Nadab and had himself proclaimed king in his stead (1 K 15[27-29]). Thus the dynasty of Jeroboam came to an end in the second generation.

Baasha upon his accession determined to push more vigorously the war with Judah. Entering into an alliance with Benhadad I. of Damascus, he proceeded to fortify Ramah, 5 miles N. of Jerusalem, as a base of operations against Judah. Asa in this crisis collected all the treasure that he could, sent it to Benhadad, and bought him off, persuading him to break his alliance with Israel and to enter into one with Judah. Benhadad thereupon attacked some of the towns in north-eastern Galilee, and Baasha was obliged to desist from his Judaean campaign and to defend his own borders. Asa took this opportunity to fortify Geba, about 8 miles NE. of Jerusalem, and Mizpah, 5 miles to the NW. of it (1 K 15[16-22]). The only other important event in Asa's reign known to us consisted of the erection by Asa's mother of an *asherah* —a cultic object used in Canaanite worship—which so shocked the sense of the time that Asa was compelled to remove it (15[13]).

During the reign of Elah of Israel, an attempt was made once more to capture Gibbethon. The siege was being prosecuted by an able general named Omri, while the weak king was enjoying himself at Tirzah, which had been the royal residence since the days of Jeroboam. Zimri, the commander of his chariots, killed the king in a drunken brawl, and was then proclaimed king. Omri, however, upon hearing of this, hastened from Gibbethon to Tirzah, overthrew and slew Zimri, and himself became king. Thus, once more did the dynasty change. Omri proved to be one of the ablest rulers of the Northern Kingdom. His fame spread to Assyria, where even after his dynasty had been overthrown Israel was still called 'the land of Omri.' Perceiving the splendid military possibilities and political advantages of the hill of Samaria, he chose it for his capital, fortified it, and made it one of his residences, thus introducing to history a name destined to play in succeeding generations an important part (see E. L. Sukenik, *The Buildings at Samaria*, 1942). He appears to have made a peaceful alliance with Damascus, so that war between the two kingdoms ceased. He also formed an alliance with the king of Tyre, taking Jezebel, the daughter of the Tyrian king Ethbaal, as a wife for his son Ahab. The Moabite Stone shows that Omri conquered Moab, compelling the Moabites to pay tribute. Of the nature of the relations between Israel and Judah during his reign, nothing is known. Peace probably prevailed since the next two kings of these kingdoms were allies.

With the reign of Ahab, peace at last was sealed between Jerusalem and Samaria, when Jehoram, the son of Jehoshaphat of Judah, married Athaliah, the daughter of Ahab and Jezebel (1 K 22[44], 2 K 8[26]). Ahab rebuilt and fortified Jericho (1 K 16[34]). The first part of his reign seems to have been prosperous, although the Moabites soon gained their independence. In 853 B.C. Ahab joined a confederacy of twelve kings who were headed by Benhadad II. of Damascus, and who fought Shalmaneser III. of Assyria at Qarqar on the Orontes. Although Shalmaneser claimed victory, it is clear that the western coalition practically defeated him, for he made no further inroads southward. In the following year, Benhadad invaded Israelite territory in Transjordania and he seized Ramoth-gilead. Trying to regain it with the assistance of his ally, Jehoshaphat of Judah, Ahab was wounded in battle and lost his life.

Meanwhile in Judah Jehoshaphat had a prosperous and long reign. He made Edom tributary to him (1 K 22[47]) and rebuilt the fleet on the Red Sea (22[48]).

17. From Ahaziah to Jeroboam II. (849–746 B.C.).—The monarchs of the two kingdoms were the following:

Israel		Judah	
Ahaziah	850–849	Jehoram	849–842
Jehoram	849–842	Ahaziah	842
		Athaliah	842–837
Jehu	842–815	Jehoash	837–800
Jehoahaz	815–801	Amaziah	800–783
Jehoash	801–786	Azariah (Uzziah)	783–750
Jeroboam II.	786–746		

Of the short reign of Ahaziah of Israel, son of Ahab, nothing is known. His brother, Jehoram of Israel, another son of Ahab, became king in his place and attempted to resubjugate the Moabites (2 K 3). He besieged the king of Moab who, in his distress, offered his eldest son in sacrifice to Chemosh, the god of the Moabites. The siege was raised and the conquest of Moab abandoned.

Jehoram of Judah, the son of Jehoshaphat, lost control over Edom (2 K 8[20ff]). Ahaziah of Judah, Jehoram's son, who was also the son of Athaliah, and therefore the nephew of Jehoram of Israel, went to the help of his uncle in the siege of Ramoth-gilead, which was still in the possession of the Aramaeans of Damascus. Jehoram of Israel was wounded in battle, and the two monarchs returned to the royal residence at Jezreel while the wound was healing. The prophetic circles, opposed to syncretistic worship, determined to overthrow the house of Ahab. Elisha encouraged Jehu, a military officer employed in the siege of Ramoth-gilead, to return to Jezreel and to slay the king of Israel. This he did, and for good measure, he slew also the king of Judah, the queen-mother of Israel, Jezebel, and all the offspring of the royal family. Jehu then started for Samaria, called a solemn feast in honour of Baal, and when the worshippers were assembled, massacred them all (2 K 9, 10).

In the year that Jehu thus gained the throne (842 B.C.), Shalmaneser III. of Assyria marched into the West. This time, no powerful alliance was formed against him. Damascus and Israel, at war with each other, could not resist the Assyrian advance. Jehu hastened to pay tribute, an event which is recorded on the black obelisk of Shalmaneser. Jehu is there portrayed in the act of kissing the foot of the Assyrian monarch.

In Judah, Ahaziah's widow, Athaliah, who was also the daughter of Jezebel, seized the reins of government, put to death all the royal seed, and sat on the throne of David. One prince, however, had been rescued by the priest Jehoiada, and kept hidden in the Temple of Jerusalem for six years. Still a child, Jehoash was proclaimed king by the Temple hierarchy and the half-Phoenician queen was put to death (2 K 11).

In Israel, the young Jehoahaz succeeded his father Jehu. At first unable to gain victory against the Aramaeans, the new king finally imposed peace upon the new ruler of Damascus, Hazael, and a new era of prosperity began for the kingdom. Jehoash of Judah was not as successful and paid tribute to Hazael. Perhaps as a consequence of this national humiliation, a conspiracy rose against him. He was assassinated and his son Amaziah succeeded him.

Jehoahaz of Israel maintained the dynasty of Jehu on the throne of Samaria and his son Jehoash of Israel continued warfare with the Aramaeans and regained from them all the Transjordanian territory which had been previously snatched away from Israel (2 K 13[25]). In Judah, Amaziah executed the assassins of his father, reoccupied a part of Edom, but in a clash with Jehoash at Beth-shemesh lost the battle. Jerusalem itself was taken by the Israelites and part of its wall was dismantled. Amaziah, who had fled to Lachish, was slain there by conspirators. His son Azariah (Uzziah) became king of Judah in his place.

During the reigns of Jeroboam II. in Israel and of Uzziah in Judah, the ancient world passed through a new period of stability. While Adadnirari III. had made an incursion westward in 806 B.C. and had boasted receiving tribute not only from Tyre and Sidon but also

from the 'land of Omri,' no more menace was arising from Nineveh. The Aramaeans had lost their power. Egypt remained weak. Between them, Jeroboam II. and Uzziah restored the territory almost to the limits of the Davidic empire. Israel ruled as far as Hamath and Damascus (2 K 14[28]) while Judah returned to the shore of the Red Sea (2 Ch 26) and imposed a tribute over the Philistine cities in the south-west. A vigorous and profitable trade sprang up. Freed from the necessity of continual warfare, the nation enriched itself, but wealth was not evenly distributed. Palaces were built for the ruling class, but the conditions of the poor husbandmen did hardly improve. Some were sold into slavery. It was social injustice which led a man like Amos to condemn the policies of Jeroboam (750 B.C.) and to announce the end of the kingdom.

18. The Fall of Samaria (746–722 B.C.).—In a few years, events rushed one behind the other. The kings of the two countries were then the following:

Israel		Judah	
Zechariah	746–745	Jotham (regent)	750–742
		Jotham (king)	742–735
Shallum	745	Ahaz	735–715
Menahem	745–738		
Pekahiah	738–737		
Pekah	737–732		
Hoshea	732–724		

After Jeroboam II. died (746 B.C.), his son, Zechariah reigned for six months, but a conspiracy removed him and placed Shallum on the throne. With Zechariah, the dynasty came to an end. Another revolution in Samaria soon removed Shallum, and Menahem became king of Israel (745 B.C.).

Tiglath-pileser III. had just seized power in Assyria. He proved himself to be a successful administrator and a brilliant general, and he soon pursued the ancient policy of westward expansion. He was, however, occupied until the year 742 B.C. in reducing the East to his sceptre. When he turned his attention to the West, the siege of Arpad detained him for two years. Uzziah of Judah, who in his old age had become a leper, and had associated his son Jotham with him as regent, appears to have taken a leading part in the organization of a coalition of nineteen states, including Hamath, Carchemish, and Damascus, to oppose the progress of the Assyrians. Tiglath-pileser marched southward along the Coastal Plain as though to attack Uzziah himself. Upon his approach Menahem deserted the confederacy and hastened to pay his tribute to Assyria.

Menahem died in about 735 B.C. His son Pekahiah was soon removed by a revolution, and Pekah became king in Samaria (2 K 15[22–27]). In Judah, Jotham was succeeded in the same year by his youthful son Ahaz. Pekah of Israel and Rezin, the new king of Damascus, tried to form a new confederacy in order to throw off the yoke of Assyria. Into this coalition they attempted to draw Ahaz, and when he declined to engage in the hopeless enterprise they threatened to make war jointly on Judah, depose Ahaz, and place a certain Tabeel on the throne of David. Upon the receipt of this news, consternation reigned in Jerusalem, and it was at this juncture that the prophet Isaiah asked the young king Ahaz to have faith in Yahweh (7[9]). Soon, Tiglath-pileser returned to the West (734 B.C.), took Damascus after a long and difficult siege (a city which his predecessors had at various times for more than a hundred years tried in vain to capture), made it an Assyrian colony, put Pekah of Israel to death, carried captive to Assyria the principal inhabitants of the Galilean hills (2 K 15[29ff]), made Hoshea king over a truncated Israel, and imposed upon him a heavy war tax.

At the approach of Tiglath-pileser, Ahaz of Judah had renewed his allegiance to his Assyrian overlord. After the capture of Damascus, he went thither to do obeisance in person to the Assyrian emperor. In effect, the two kingdoms of Israel and Judah, while remaining nominally independent, passed under the control of Nineveh.

Soon after the death of Tiglath-pileser (727 B.C.), Hoshea refused to continue payment of the national taxes to Assyria, and the new emperor, Shalmaneser V. (727–722 B.C.), sent an expeditionary force which overran the Israelite territory, cut off Hoshea's lines of supplies, and isolated him in his fortified capital, Samaria. The military genius of Omri had selected the site wisely: it is a marvel of defensive warfare that the city, in the midst of a country occupied by the enemy, could resist a siege of three years (725–722 B.C.). Shalmaneser V. died and was succeeded by Sargon II. (722–705 B.C.). The Assyrian commanders who were prosecuting the siege of Samaria probably did not know of the regnal change until after the city had fallen. At any rate, Sargon boasted of the fall of the Israelite capital as one of the achievements of his first year. He deported to the eastern borders of the empire 27,290 inhabitants of Samaria and other cities of the Northern Kingdom, including no doubt the élite of the population. (See H. G. May, 'The Deportation of Israel,' *BA*, vi [1943], 57–60). He thereupon resettled the territory with ethnic groups from Cuthah and Sippar in Babylonia and from Hamath in Syria. These new settlers intermingled with the peasant classes of Israel that had been left upon the land (2 K 17[24]). Sargon's demographic policy was partly responsible for the origin of the Samaritans. The new-comers were, of course, polytheists. When they were attacked by lions, however, they petitioned to have a priest of Yahweh teach them how to worship the God of the land. Sargon granted their request and sent back to them a captive priest. In the course of time, the foreign settlers intermarried with the Israelites who had managed to remain in the mountains and their descendants became known as 'the Samaritans.'

19. Hezekiah (715–687 B.C.) **and the Siege of Jerusalem** (701 B.C.).—The kingdom of Judah escaped destruction when Samaria fell, no doubt because Ahaz maintained toward Assyria the submissive attitude which he had manifested toward Tiglath-pileser in 735 B.C. On the western borders of Judah, however, the city-states of Philistia were always plotting to throw off the Assyrian yoke, and endeavouring to secure the co-operation of the son of Ahaz, Hezekiah (715–685 B.C.). Such co-operation, the prophet Isaiah steadily opposed. In the year 711 B.C., the city of Ashdod succeeded in heading a coalition which she hoped would gain her freedom, but Sargon II. sent an army which soon brought her to terms (Is 20[1]). During those turbulent years, Hezekiah prepared for an eventual siege of Jerusalem by attempting to insure the water-supply of the city (709 B.C.; see G. E. Wright, *Biblical Archaeology* [1957], 164–172). His workmen dug a tunnel under the old city in order to by-pass the hitherto open-air and exposed canal which brought water to the sheltered Siloam pool, from the spring of Gihon (see SILOAM). It was perhaps on account of this feat of technology that the city survived the Assyrian onslaught which was to come within the next decade.

After the death of Sargon II. in 705 B.C., many subject states of the Fertile Crescent attempted to regain their independence before the new monarch could consolidate his power. Hezekiah yielded to the diplomatic entreaties of Merodach-baladan (Marduk-apal-iddin), the Babylonian prince whom Sargon II. had early in his reign driven from Babylon, and who now sought the opportunity to return to the throne (2 K 20[12ff], Is 39[1ff]). In this new coalition the Egyptians also, now under the stronger control of the 25th Dynasty, had a part. Although Isaiah still consistently opposed the move, Hezekiah accepted to join in the general revolt. Padi, king of Ekron, who remained faithful to the Assyrian

overlord, was placed under arrest in Jerusalem. Sennacherib, the new king of Assyria (705–681 B.C.), had to avenge this insult. Military problems in the East delayed him for a while, but in 701 B.C. he led an army westward, defeated the allies at Eltekeh, besieged and took Ekron, impaled many of the rebellious inhabitants, and invaded Judah. Forty-six of the smaller towns were captured, and Jerusalem itself was invested. Its inhabitants were panic stricken, but Isaiah came forward, declaring Zion to be inviolable in the eyes of Yahweh (Is 31[4]). In the meantime, Hezekiah sent to Sennacherib's headquarters in Lachish and offered to pay a war indemnity. The sequence of events is not clear, and many scholars believe that the story of Sennacherib's invasion in 2 K 19 represents a combination of a least two different campaigns into a single expedition (W. F. Albright, 'New Light from Egypt on the Chronology and History of Israel and Judah,' *BASOR*, No. 130 [April 1953], 8–11; 'Further Light on Synchronisms between Egypt and Asia in the Period 935–685 B.C.,' *BASOR*, No. 141 [February 1956], 23–26). The traditions gathered at a later age by Herodotus in Egypt (ii. 141) confirm the Biblical account of a plague which decimated the Assyrian forces (2 K 19[35]). In any case, it appears from the totality of the documentation that the siege of Jerusalem was lifted and that the city was saved from destruction. The memory of this unexpected deliverance played in the subsequent centuries a major part in giving to the Temple of Jerusalem or its site the pre-eminence of sanctity it has maintained in Judaism, Christianity and Islam.

According to 2 K 18[4], Hezekiah attempted to abolish the country shrines and to purify the worship of Yahweh in the temple of Solomon (H. H. Rowley, 'Zadok and Nehushtan,' *JBL*, lviii [1939], 113 ff). Some historians have doubted the historicity of this reform, but others have thought that it is confirmed by an older document quoted in 2 K 18[22]. The king may have been prompted by Isaiah in initiating some kind of cultic purification. He thereby demonstrated his political independence from the Assyrian yoke to which his father Ahaz had submitted.

20. Manasseh (687–642 B.C.), **Amon** (642–640 B.C.), **and Josiah** (640 B.C.).—The editors of Kings have pictured Manasseh as the most criminal monarch who ever sat on the throne of David. Pagan practices which had been eradicated by Hezekiah were restored throughout the kingdom as well as in the Temple of Jerusalem (2 K 23[7]). At the same time, prophetic opposition to the royal policies was ruthlessly repressed (2 K 21[16]). It is probable, however, that the king had little choice, for the Assyrian emperors, although in the grip of domestic upheavals, were slowly consolidating their power over the entire Near East. Manasseh apparently became a vassal of Sennacherib and during his entire reign remained the subject of Nineveh. The worship of Assyrian deities was a necessary concomitant of Judah's political subservience to Assyria.

Sennacherib was murdered in 681 B.C. and Esarhaddon (681–669 B.C.), having secured the throne from his competitors, led Assyria to the conquest of Egypt and seized Memphis in 671 B.C. His son, Ashurbanipal (669–633 [?] B.C.), advanced to Upper Egypt and destroyed Thebes (663 B.C.). For a short while, Assyria ruled over the largest territory ever conquered up to that time in that part of the world. Political rivalries in Babylonia, however, threatened the security of Ashurbanipal at home (652 B.C.). The new Pharaoh, Psammetichus I. (650–609 B.C.), founder of the 26th Dynasty, soon declared the independence of Egypt (650 B.C.). While the Assyrian armies marched up and down the coast of Philistia, Judah escaped direct invasion, no doubt on account of Manasseh's acceptance of vassalage. According to one tradition (2 Ch 33[10–13]), he was once brought in chains before the Assyrian emperor, presumably on charges of political insubordination, but eventually was allowed to resume his reign.

The Assyrian empire had reached its apogee. The loss of Egypt was followed by threats of invasion in northern and eastern Mesopotamia. The Scythians and the Cimmerians were pushing across the Caucasus and the Medes exerted a similar pressure from the Iranian plateau.

While Amon (642–640 B.C.) continued the policy of acquiescence, the young king Josiah (640–609 B.C.) soon hailed the death of Ashurbanipal (633 B.C.?) and witnessed the fall of the Assyrian power. In the eighteenth year of Josiah's reign (622 B.C.), when the king was only twenty-six years old, a copy of the law was found in the Temple of Jerusalem. Upon hearing its contents, the king was profoundly disturbed. He consulted the prophetess Huldah who confirmed its authority (2 K 22), and he therefore set himself to adjust to its standards the worship and the institutions of the kingdom. Josiah's reform swept away all local shrines except the Jerusalem sanctuary, all cultic pillars and statuary, and attempted to wipe out the practices of a pagan character (2 K 23). Modern criticism has shown that the core of the law which was found at that time has been subsequently edited and incorporated in what is now called 'Deuteronomy.' The reform of Josiah, no doubt inspired chiefly by religious considerations, was also motivated by political concern. The king saw his opportunity to claim back from Assyrian control the whole territory of the ancient kingdom of Northern Israel (see F. M. Cross, jun., and D. N. Freedman, 'Josiah's Revolt Against Assyria,' [*JNES*, xii [1953], 56–58).

Nineveh was tottering to its fall (612 B.C.). Babylon had regained its independence soon after the death of Ashurbanipal and was rapidly growing in power. Egypt, which under the 26th Dynasty possessed once more a line of native kings, was led on the path of renascence by Neco II., an able administrator and general, who discerned that the fall of Nineveh and the revival of Babylon necessitated the establishment of a new balance of power. He marched an army into Asia and in 609 B.C. proceeded northward along the coastal plain of Palestine. Josiah, probably because he determined to claim sovereignty over all the territory formerly occupied by Northern Israel, marched northward with an army, fought Neco at the ancient battlefield of Megiddo, and met with death (2 K 23[29ff]; see M. B. Rowton, 'Jeremiah and the Death of Josiah,' *JNES*, x [1951], 128–130). A greater calamity could scarcely have befallen the party of Yahwistic rigorism. Not only was their king killed ignominiously, but also their hope of a prosperous Judaean kingdom, faithful to Yahweh's law, was annihilated.

21. The End of Judah (609–586 B.C.).—When the news of the Megiddo defeat reached Jerusalem, the leaders of the people placed Jehoahaz, a son of Josiah, on the throne. Neco meantime moved northward, taking possession of the whole country, and established his headquarters at Riblah in the territory of Hamath. Thither he summoned Jehoahaz, threw him into bonds, sent him to Egypt as a prisoner, and made his brother Eliakim king of Judah, imposing a heavy tribute upon the country (2 K 23[31ff]). Upon his accession, Eliakim took the name of Jehoiakim (597–509 B.C.; 2 K 23[34]) and became a vassal of the Pharaoh.

The renewed Babylonian power was pushing westward to secure as much of the Fertile Crescent as possible. At the same time, Neco was ambitious to follow up his previous success and to check the Babylonian army at a strategically sound point, and far away from Egypt. In 605–604 B.C. he was met in battle at Carchemish by the Babylonian crown prince, Nebuchadnezzar, and was defeated. The Egyptian dream of a new Asiatic empire was crushed, and Judah soon thereafter passed into vassalage to Babylon. Nebuchadnezzar, on the border of Egypt, ready to invade and conquer it, was informed of the death of his father, Nabopolassar, in Babylon, and hastened home to secure his crown. The new ruler appears to have encountered difficulties in several parts of Western Asia. He established his headquarters at Riblah, and for a few years sent out bands of soldiers

whither they were needed. Jehoiakim, thinking to take advantage of this unsettled situation, withheld his tribute, and some of these bands, composed largely of men from the neighbouring states, were sent against Jerusalem (2 K 24^{1ff}). Jehoiakim continued obstinate, however, and Nebuchadnezzar finally, in 597 B.C., sent a large army. Before it arrived, the Judaean king died, and his young son, Jehoiachin, was occupying the throne. Nebuchadnezzar laid siege to Jerusalem, which after three months was compelled to capitulate, whereupon the Babylonian king took ten thousand of the prominent men, princes, warriors, priests, and craftsmen, and transported them to Babylonia. Another son of Josiah, who now took the name of Zedekiah, was placed upon the throne, subject of course to a heavy Babylonian tribute. Jehoiachin, a youth of twenty, was taken prisoner to Babylon, to languish in prison for many years (J. P. Hyatt, 'New Light on Nebuchadrezzar and Judean History,' *JBL*, lxxv [1956], 277–284; D. J. Wiseman, *Chronicles of Chaldaean Kings*, 1956).

It was now to be seen whether Judah would repeat the history of the Northern Kingdom or whether her king would have the wisdom to remain faithful to Babylon. Jeremiah, as he had done for years, steadily proclaimed that Judah's sole safety lay in obedience to the Babylonian emperor; such was the will of Yahweh. There was in Jerusalem, however, a strong party who advocated an alliance with Egypt as a means of securing freedom from Babylon. The king himself was weak and unwise. Finally, in 588 B.C., when Hophra, filled with ambitions for an Asiatic empire, ascended the Egyptian throne, he made such promises of aid to Judah that the standard of revolt was raised. Jeremiah did not, as Isaiah had done a century before, proclaim Jerusalem inviolate. In 587 B.C., the Babylonian army appeared and the final siege of Jerusalem began. Early in 586 B.C., Hophra marched an army into Palestine, and Nebuchadnezzar was obliged to raise the siege to send his full force against the Pharaoh. Jerusalem was then wild with joy, thinking deliverance had come. Jeremiah and his party were laughed to scorn. But Hophra was soon defeated, the siege of Jerusalem renewed, and pressed to its bitter end. In August 586 B.C., the city surrendered, its walls were broken down, its Temple was destroyed, another large body of captives transported to Babylonia, and Zedekiah, after being blinded, was taken there too (2 K 25). Thus Jerusalem suffered the fate of Samaria. Before its fall, however, the word of its prophets had so taken root, and such reforms had been instituted, that the Judaean exiles did not disintegrate sociologically and culturally as the Israelites of the Northern Kingdom had apparently done a century previously. Those who were deported in 586 B.C. were again the more prominent citizens among those who had been left behind in 597 B.C. Some of the poorer people and the peasantry were allowed to remain in the land. Gedaliah was made governor of the territory of Judah. Since Jerusalem was desolate, Mizpah, five miles to the north-west, was made the administrative seat of the province. Gedaliah had been in office only two months when he was assassinated (2 K 25^{25ff}).

22. The Babylonian Exile (586–538 B.C.).—Perhaps fifty thousand Judaeans, including women and children, had been transported to Babylonia in two deportations of Nebuchadnezzar. These, with the exception of a few political leaders, were settled in colonies, in which they were permitted to have houses of their own, to visit one another freely, and to engage in business (Jer 29^{5ff}). Ezekiel gives the picture of one of these colonies at Tell-abib (Ezk 3^{15} 8^{1} 20^{1ff} 24^{18} etc.), by the river Chebar (a canal near Nippur), in which the Palestinian organization of 'elders' was perpetuated. Thus, the Judaeans settled down in Babylonia. Many followed so thoroughly Jeremiah's advice (Jer 29) that they soon acquired economic security and social stability in a hitherto totally alien environment. From then on, they and their descendants may be called 'the Jews.'

The Judaean peasants who remained in Palestine kept up as best they could the old religion, in an ignorant and often superstitious way (cf Jer 41^{5ff}), while the priests and the more intelligent of the religious devotees who had been transported to Babylon cherished the laws of the past, and fondly framed codes and programmes for a future which they were confident would come. Such an one was Ezekiel, who lived and wrote among the captives till about 570 B.C. After the destruction of the city of Jerusalem, he elaborated a new religious polity for the nation, hoping it would form the basis of Israel's organization when the time for the reconstruction of the state came. He prepared even an architect's 'blue-print' for the rebuilding of the Temple which was so precise that several scholars have constructed from it realistic models (Ezk 40–48).

Some years later another writer of the Priestly School collated and published a body of cultic laws which have been preserved in Leviticus and are now designated as the Code of Holiness. Other priests were soon at work on a larger project: a history of the world from the time of its creation, together with a priestly version of the origins of Israel, destined to replace the earlier traditions, with a view to prepare the establishment of a priestly state in Jerusalem. This document became later the basis and the frame of the Pentateuch.

After the death of Nebuchadnezzar (562 B.C.), his son Amel-Marduk ascended the throne of Babylon. Two years later, Amel-Marduk was murdered by his brother-in-law, Neriglissar (560–555 B.C.) whose own son, Labashi-Marduk, was in turn put out of the way by Nabonidus (555–538 B.C.). Compelled to face invasions from the Arabs, Nabonidus left the administration of Babylon to his son Belshazzar and settled more or less permanently at the oasis of Tema, in Arabia. Babylonian society was soon demoralized and in no way could resist a new threat of unprecedented dimensions which was coming from the East.

Cyrus, a petty prince of Anshan, a small district of Elam, had rebelled against Astyages, his overlord, and became king of the Medes (550 B.C.). A few years later, Cyrus marched into Asia Minor and conquered Croesus, the fabulously wealthy king of Lydia (546 B.C.). It was probably at this juncture that one of the world's great poets and prophets appeared among the Jewish captives in Babylonia and taught them in most eloquent and poetic strain that Cyrus was the instrument of Yahweh (*māshîaḥ*, anointed one) and that he was conquering the world for the sake of Yahweh's people so that they would return and rebuild Jerusalem. The name of this prophet is lost, but his poems now form chs. 40–55 of the Book of Isaiah and he is referred to as 'Deutero-Isaiah.'

The hope of this prophet in Cyrus was justified, for in 538 B.C., the king of the Medes and Persians captured Babylon without waging a battle, overturned the Babylonian Empire and reversed the policy of mass deportations which Assyrians and Babylonians alike had pursued from the time of Tiglath-pileser III. Cyrus himself tells in his inscription that he permitted captive peoples to return to their lands and to rebuild their temples. This gave the Jews the opportunity for which Deutero-Isaiah had hoped. However, it was years before any considerable number of captives made use of their newly acquired liberty. They were interested in their religion, to be sure, but they had learned to practise it outside of Palestine without sacrificial ritual, and the opportunities in Mesopotamia and elsewhere for trade and the acquisition of riches were too good to be abandoned for the sterile soil of the land of their fathers. The Murashu tablets found at Nippur in Mesopotamia and the papyri discovered at Elephantine in Upper Egypt show the wide-spread character of the Jewish dispersion in the century following the Babylonian exile. In Mesopotamia, the Jews continued to live for fifteen hundred years. They frequently sent money contributions to those of their number who had returned to Jerusalem. Occasionally, a few of them joined the first 'Zionists.' Most of them, however, settled permanently and willingly

in the land of their exile. After a time, they chose Exiliarchs, or 'Princes of the Captivity.' Schools of Jewish learning developed in their midst. In due course, the Babylonian Talmud was compiled in these schools, and the Babylonian Massorah (tradition) came to be written down and constitutes an important witness of the Biblical text.

These communities survived the vicissitudes of Persian, Macedonian, Parthian, Sassanian, and Arabian rule, continuing to have their Exiliarchs till the 11th cent. A.D., when the oppressions to which they were subjected led them gradually to migrate to other parts of the world.

23. The Jerusalem Restoration (538–333 B.C.).—The book of Ezra tells that a large number of exiles returned to Jerusalem as soon as Cyrus issued his permission to all captives to return to their home lands. It is probable that the 'Zionist' movement was at first very slow. Zerubbabel, a grandson of the unfortunate king Jehoiachin, became governor of Jerusalem, and a high priest named Joshua was the head of the hierarchy. The altar of Yahweh had been rebuilt on the old site and the Temple was still in ruins. The tolerance of the Persian administration is shown in allowing the Jews a governor of the Davidic blood. He, with a small retinue, had no doubt returned from Babylonia, but we have no evidence that the bulk of the population had also come back.

The Jewish peasantry which had remained in Palestine during the Babylonian exile, equally with those Jews who had returned from Babylonia, expected at some time the reconstruction of the Jewish institutions. A prolonged famine led Haggai in the second year of Darius I. (522–486 B.C.), to persuade the people that Yahweh had withheld rain because he was displeased that the Temple had not yet been rebuilt. Another prophet, Zechariah, took up the same burden, and under their leadership and inspiration the Temple was reconstructed on a smaller scale and with cheap materials, but on the ancient site (516 B.C.). Contributions to aid this enterprise had been received from the Jews of Babylonia.

The first six years of the reign of Darius I. were troublous times. It became necessary for him to reconquer his empire, as many of the subject nations took the opportunity to rebel. Zerubbabel probably took part in this rebellious movement. Zechariah regarded him as the Messiah and expected him to be crowned and to reign jointly with the high priest Joshua (Zec 3).

Since Zerubbabel disappeared abruptly from the historical scene, it is probable that the Persian overlords quickly put an end to the Jewish attempt at political independence. During the latter years of the reign of Darius I. and the entire reign of Xerxes (486–465 B.C.), little is known of the history of the Jews, either in the communities which were scattered throughout the Persian empire or in the still struggling congregation which had returned to the ruined city of Jerusalem. Some information may be gleaned from the anthology now contained in Is 56–66, large parts of which appear to come from this period, as well as from some poems of Joel and Malachi, which may also have emerged in the early part of the 5th cent. B.C. (although several scholars now favour an earlier date). It seems that the Jerusalem Jews were in a semi-anarchic state, with a decadent élite and depressed labourers. Zerubbabel was probably succeeded by a foreign governor (Mal 1^{8}) who must have had little sympathy for the Jewish way of life. Moreover, pressure from the eastern and southern borders of Judah threatened the security of the tiny enclave. The Nabataeans had pushed the Edomites out of their old territory, S. of the Dead Sea, to Beersheba and Hebron, in southern Judah. The Samaritans, who had apparently spread to the valley of Aijalon, W. of Jerusalem, held many approaches to the city. The Jewish colony occupied but a small territory about Jerusalem, and some of the inhabitants in their distress, as their ancestors had done in the days of Manasseh, were seeking relief in the revival of Canaanite-Phoenician rites (Is 65^{11}). Early in the reign of Artaxerxes I. (465–424 B.C.), an attempt was made to rebuild the walls of the city (Ezr 4^{7-24}), and the Samaritans intervened at the Persian court. The reconstruction was abruptly interrupted, no doubt by imperial order.

Such a state of affairs profoundly moved Nehemiah, a young Jewish official at the court of Artaxerxes I. Having heard in 445 B.C. bad news from Jerusalem (Neh 1^{4}), he at once secured an appointment to the governorship of Judah and the permission to rebuild the walls of its capital (see H. H. Rowley, 'Nehemiah's Mission and Its Backgound,' *Bulletin of the John Rylands Library*, xxxvii [1954–1955], 528–561). The energy with which Nehemiah devoted himself to this task, the opposition which he encountered from the surrounding settlers or invaders, especially from the Samaritans (see H. H. Rowley, 'Sanballat and the Samaritan Temple,' *Bulletin of the John Rylands Library*, xxxviii [1955–1956], 166–198), and the success which attended his labours, are forcibly depicted in his memoirs, now partly incorporated by the Chronicler in the book of Nehemiah (chs. 1–7). After a return to Persia, Nehemiah filled a second term as governor of Jerusalem (*c* 428 B.C.). Through the zeal and thoroughness of his administration, the Jewish community was reorganized as distinct from the Samaritans (Neh 13^{28ff}) and mixed marriages were forbidden.

It is possible although not probable that Nehemiah was in Jerusalem at the same time as the scribe Ezra. According to that part of the work of the Chronicler which came to be known as the books of Ezra and Nehemiah, Ezra arrived in Jerusalem before Nehemiah in the seventh year of Artaxerxes I., namely in 458 B.C. (Ezra 7–8), but many scholars agree that his visit followed rather than preceded those of Nehemiah. Accordingly, the Persian king mentioned in Ezra 7^{7-8} is probably Artaxerxes II. (404–358 B.C.) and Ezra came to Jerusalem in 398 B.C. (see H. H. Rowley, 'The Chronological Order of Ezra and Nehemiah,' in *The Servant of the Lord* [1952], pp. 129–159). Facing a situation of political corruption and of religious assimilation to the surrounding cultures, Ezra pursued with vigour the reforming spirit inaugurated by Nehemiah. He not only applied the ban on mixed marriages but he also succeeded in imposing divorces for the sake of maintaining the purity of the faith (Ezr 10^{2-5}). Ezra's activity was more religious than political but it has its place in a general history of Israel for he became in effect the founder of legal Judaism (see H. Cazelles, 'La mission d'Esdras,' *VT*, iv [1954], 113–140). His ceremonial reading of the Pentateuch as the Law of Moses (Neh 8) and his part in the renewal of the covenant (Neh 9–10) exercised a major influence upon the development of Judaism in the subsequent centuries.

Information concerning the Jewish community during the last days of the Persian empire is almost entirely lacking. The Jewish historian Flavius Josephus tells (*Ant.* XI. vii. 1 [297]) that the Persian general Bagoas (whom he calls Bagoses) entered the Temple and oppressed the Jews for seven years, because the high priest John murdered his brother Joshua, a friend of Bagoas, for whom the latter had promised to obtain the high priesthood. Perhaps there was more underlying this than appears on the surface. Many have supposed, at least, that the action of Bagoas was the result of an attempt on the part of the Jews to regain their independence.

After the reign of Artaxerxes III. (358–338 B.C.) and that of Arses (338–336 B.C.), the Persian empire soon came to an end. Darius III. (336–331 B.C.) witnessed the meteoric rise of Alexander of Macedonia (336–323 B.C.).

24. The Hellenistic Rule (333–168 B.C.).—According to Flavius Josephus (*Ant.* XI. viii. 3 [318]), the high priest Jaddua was loyal to Darius III. During the siege of Tyre, Alexander in vain requested Jewish help. After the surrender of Gaza, he marched personally to Jerusalem to take vengeance. At his approach, the high priest, the priests, and the Levites, clad in ceremonial dress, walked in solemn procession toward Mount Scopus in order to welcome the world conqueror.

Alexander was so impressed that he forgot his wrath and refused to desecrate the Temple. This story is probably a legend. Arrian, for example, declares that the rest of Palestine had submitted before the siege of Gaza. Jerusalem was to Alexander simply one Syrian town among the others. It stood out of his route and probably was never visited by him. The chief element of truth reflected by this tradition, however, is that the high priest was then the head of the Jerusalem community. Another significance of the legend may lie in the fact that the Jews were soon to assimilate Hellenistic culture.

During the wars which followed the death of Alexander (323 B.C.), Judah endured her share of international disorder. The armies of Antigonus and Demetrius were at various times in the region. In 312 B.C., a great battle was fought near Gaza, and the political unrest which followed must have produced economic hardship for the Jews. For more than a century, Palestine remained under the rule of the Hellenico-Egyptian Ptolemies. The Seleucids, however, never gave up their claim upon it. Antiochus III, the Great (223–187 B.C.) briefly snatched the territory from Ptolemy IV. Philopator (221–203 B.C.) but failed to impose his presence for long. Twenty years later, however, after the battle of Paneion, the Jews passed under the Seleucid jurisdiction.

The chief connexion with the suzerain power during the Ptolemaic and the early years of the Seleucid rules was the payment of taxes. At one time, a Ptolemaic king became dissatisfied with the high priest's management of the finances, and he committed them to the care of one Joseph, son of Tobias, who with his sons led a life of spectacular adventures (*Ant.* XII. iv. 2 ff [160 ff]).

From the beginning of its existence, the metropolis of Alexandria seems to have included a prosperous Jewish community. Greek language became a convenient and even fashionable mode of exchange. Many Jews adopted not only the Greek tongue but also Greek ways which slowly were introduced in Jerusalem itself. Under the Seleucids, certain high priests even adopted Greek names. To court the favours of the kings at Antioch, they cultivated Greek habits. A Syrian garrison was stationed in Jerusalem. Gymnasia were popular. Some went so far as to attempt to remove artificially the signs of circumcision.

One curious aspect of this era of Hellenistic assimilation appears in the fact that one high priest, Onias III., deposed by the Seleucid authorites, went to Egypt and established at Leontopolis in the name of Heliopolis a dissident temple to Yahweh, which existed there for a hundred years.

The country towns of Palestine were more conservative than the capital, but even there Hellenistic culture would have found its way had not Antiochus IV. Epiphanes (175–163 B.C.) determined to impose by force upon all Jews not only Greek fashions and mores but also Greek religion.

25. The Maccabaean Revolt (168–135 B.C.).—Antiochus commanded in 168 B.C. that altars to Zeus be erected throughout the land, and especially in the Temple at Jerusalem. He also directed that swine flesh be offered in sacrifice upon them. The fear of the Syrian army secured wide-spread obedience to this decree. In the little town of Modin, however, an old priest, Mattathias, struck down the officiating traitor and raised the standard of revolt. The faithful soon rallied to his standard, and he made his son Judas captain over them. Unexpected victories speedily followed, and the successful Judas was surnamed *Makkab*, 'the hammer.' He has remained known as Judas Maccabaeus.

Mattathias died before the end of the first year of the revolt, but the struggle was continued by his sons. In the course of three years, the Syrian forces had been driven from the Temple, though they still held the fortress which overlooked it. Accordingly, in December, 165 B.C., a great feast was held for the purification and the rededication of the sanctuary—the Hanukkah. Up to this time, Judas had been aided by the Hasidim, or the pious, a set of religious devotees whose ideal was ceremonial puritanism. This party would have been satisfied to rest in what had already been achieved, but Judas and his brothers aimed at political independence. Although it estranged the Hasidim, Judas, with varying fortunes, maintained the struggle till 161 B.C. Antiochus IV. had died (163 B.C.), the forces of the young Antiochus V. (163–162 B.C.) were defeated, a great victory was won over Nicanor, whom Demetrius I. (162–150 B.C.) sent to Judah. This victory was long celebrated in a yearly festival, the day of Nicanor. Judas himself fell before the end of the year 161 B.C. in a battle with the forces which Demetrius had sent to avenge the death of Nicanor.

The leadership of the Jewish nation then passed on to Jonathan, one of the brothers of Judas, who for nearly twenty years maintained the struggle in heroic and desperate conditions (161–143 B.C.). At first Jonathan thought of taking refuge with the Nabataeans, but he was treacherously treated and his brother John was slain. After many unsuccessful attempts to capture him, the Syrians finally entered into a treaty with him whereby he was permitted to live at Michmash as a kind of licensed free-booter (153 B.C.). Not unlike David in his outlaw years, Jonathan ruled over such as came to him.

A little later Alexander Balas appeared in the field as a contestant for the Syrian crown. This proved a great help to the Maccabaean cause, as both parties were willing to bid high for the support of Jonathan. Demetrius was killed and Alexander secured the reins of government. Demetrius II., courting Jewish favour, recognized Jonathan as high priest and exempted the Jews from various taxes. The supporters of Alexander lured Jonathan to Ptolemais for a conference and treacherously put him to death (143 B.C.).

Another Maccabaean brother, Simon, assumed the leadership (143–135 B.C.). The star of Alexander Balas had set and Demetrius II. made with the Jews a treaty which once again recognized their independence. The event created the wildest joy. Never since the days of Josiah in the 7th cent. B.C. had the inhabitants of Jerusalem been politically free. It seemed like a new birth of the nation, and it stimulated the national genius in all directions. The whole civil and religious polity was reorganized. Simon was made both political head of the state and high priest, and it was ordained that these offices should continue in his house for ever, or until a faithful prophet should arise (1 Mac 14^{41ff}). Simon spent his energies in organizing his government and in consolidating his territory. He was successful in taking possession of Gezer, where he built a large castle, also Joppa, which he made his port, and on the other side of the mountain range, Jericho. At the latter place he was assassinated in 135 B.C. by his son-in-law, Ptolemy, who hoped to seize the government. Simon's son, John Hyrcanus, escaped, and maintained the Maccabaean family at the head of the nation. The dynasty became known as 'Hasmonaean' from the name of Mattathias' grandfather, Hashmoni.

26. The Hasmonaean Dynasty (135–63 B.C.).—During the early years of John Hyrcanus I. (135–105 B.C.), the vigorous Antiochus VII. Sidetes, who had gained the Syrian crown, pressed him so hard that the struggle for independence not only had to be renewed, but seemed for a time to end in failure. Weaker hands, however, soon came into possession of the Syrian sceptre, and Hyrcanus, his independence secure, set about consolidating the power of Judaea. He conquered the Edomites, who had centuries before been pushed up into southern Judah, and compelled them to accept Judaism. Later he conquered Samaria and lower Galilee, treating the latter country as he had treated Idumaea (*Ant.* XIII. x. 2 f [275 ff]). During the reign of John Hyrcanus I. (135–105 B.C.), the Pharisees and Sadducees began to emerge into well-defined and opposing parties. The former were developed out of the Hasidim of the earlier

time. They desired separation from foreigners in order that they might devote themselves to the keeping of the Law. The Sadducees consisted largely of the old priestly families, whose wealth and position prevented them from either the narrowness or the devotion of the Pharisees. Other sects also appeared at that time, among them the Essenes, with whom the sectarians of the Qumrân community, near the Dead Sea, have been tentatively identified.

Aristobulus I. (105–104 B.C.), upon his accession to power, assumed the title of king (*Ant.* XIII. xi. 1 [301]—a step which still further estranged the Pharisees. He conquered and Judaized in the one year of his reign the region of upper Galilee. His widow, Alexandra was released from prison and married her brother-in-law, Alexander Jannaeus (104–79 B.C.) who conquered and Judaized Transjordan. By conquest and forcible conversion, the opposition of the Pharisees became extremely bitter. It was probably during his reign that the mysterious 'Teacher of Righteousness' of the Qumrân community met with a violent end. At last, Alexander committed the government to Alexandra, advising her to make peace with the Pharisees (*Ant.* XIII. xv. 5 [401]. Alexandra ruled for ten years (79–69 B.C.) and made her son, John Hyrcanus II., the high priest, but left civil authority to Aristobulus II., the younger of her two sons. Civil war between the rivals dragged itself on for several years.

An extraordinary man from Idumaea, Antipater, attached himself to Hyrcanus and persuaded him to flee to Aretas, king of the Nabataeans, in order to secure arms. When Pompey appeared in 64–63 B.C., both brothers appealed to him. Aristobulus, however, shut himself up in Jerusalem. After a siege of three months, Pompey entered the city (63 B.C.), restored Hyrcanus as high priest but reduced considerably the territory of his jurisdiction. The dream of a Jewish state was ended.

27. The Roman Rule (63 B.C.–A.D. 66).—Hyrcanus II. came more and more under the influence of Antipater, the Idumaean. After the death of Pompey in 48 B.C., Hyrcanus and Antipater were able to render Julius Caesar material aid at Alexandria, thus winning his favour. Antipater, as a reward, received Roman citizenship and the procuratorship of Judaea. Many privileges of which Pompey had deprived the Jews were returned to them. The old powers of the Sanhedrin, or council, were revived. Religious customs of the Jews were guaranteed, not only in Judaea, but also in Alexandria and elsewhere, and their taxes were remitted in the Sabbatical years (*Ant.* XIV. x. 45 [201]).

Antipater proceeded to build up the fortunes of his family, making his son Phasaelus governor of Jerusalem, and Herod governor of Galilee. Herod proved an able administrator but narrowly escaped condemnation by the Sanhedrin for presuming to exercise the power of life and death without its consent.

After Antipater was murdered, Hyrcanus passed under the influence of Herod and Phasaelus. When Cassius and Brutus were defeated at Philippi (42 B.C.), Antony moved eastward to secure Syria. Although many Jews complained bitterly of the sons of Antipater, Antony made them tetrarchs with full political power, leaving to Hyrcanus only the high priesthood.

While Antony was in Egypt, Antigonus, a son of Aristobulus II., gained the aid of the Parthians, who sent a force which captured Jerusalem (40 B.C.), and made Antigonus both king and high priest. Herod journeyed to Rome where he besought Augustus and Antony to make Aristobulus, a grandson of Hyrcanus II., king of Judaea. The Roman government, however, made Herod king and sent him back to conquer his kingdom, which he did after Antony could spare some of his troops which were then engaged against the Parthians.

Herod became in fact king of the Jews in 37 B.C. But he had to contend with the whims of Antony and the caprices of Cleopatra. After the battle of Actium (31 B.C.), Herod convinced Augustus of his loyalty to the new ruler of the world and his throne became secure.

Herod had a passion for building, and he knew how to extract money for his purposes. He therefore founded or rebuilt many cities, adorning them with the beauty of Hellenistic architecture. His enlarging and embellishing the Temple of Jerusalem is perhaps the best known of these undertakings, but it is only one of many. The taxes necessary for his various enterprises fell heavily upon his subjects. His domestic life was tragic as he executed many of his relatives, for fear of their political aspirations. During his reign, Hellenistic culture made new inroads in Judaea. At the same time, sectarian opposition to foreign influence found great success among the masses, and Pharisaism influenced the schools of Hillel and Shammai.

When Herod died in 4 B.C., Augustus divided his dominions among his sons. Archelaus received Judaea and Samaria; Antipas, Galilee and Peraea; and Philip, Ituraea and Trachonitis. Herod Antipas held his territory until A.D. 39, and was the tetrarch of Galilee during the public life of Jesus. Archelaus proved such a bad ruler that Augustus removed him in A.D. 6 and banished him to Gaul (Josephus, *Jewish Wars*, II. vii. 3 [111]). Judaea was then placed under Roman procurators as a part of the province of Syria. The fifth of these procurators was Pontius Pilate.

Once more, the dominions of Herod the Great were united under one of his grandsons, Herod Agrippa I. (A.D. 41–44), who was a protégé of Caligula. After his death, the country returned to the administrative rule of Roman procurators.

Many Jews had never submitted to Rome, either through the Idumaean kings or the procurators. The Zealots expected that military Messianism would soon expel the invaders, and their nationalistic fervour gradually gained influence. In A.D. 66, the political passions took shape in open rebellion. The Roman general Vespasian was sent to quell the uprising. He had reduced Galilee and the outlying cities of Galilee when he heard of the death of Nero and withdrew to Egypt. During the year A.D. 69, Vespasian was fighting for the control of the empire, which he finally won. In the meantime, the Jews were consuming one another in civil war.

In A.D. 70, Titus appeared before Jerusalem, and after the most terrible siege in the history of the site, the city was destroyed, the Temple was ruined, and its sacred objects taken to Rome (*BJ* VII. v. 5 [148 ff]). The tenth Roman legion was left in charge. A small garrison of Jewish soldiers who had captured the fortress of Masada, on the shore of the Dead Sea, held out for three years, but was finally captured.

The surviving Sanhedrin moved to Jamnia, a town in the Philistine plain, S. of Joppa, where at the end of the 1st cent. A.D. its sessions became famous for the discussions concerning the authority of the Holy Writings, or Hagiographa.

Under the reign of Trajan, in A.D. 116, Jews in Cyprus and Asia Minor revolted in vain. In A.D. 132, a new Jewish leader, called Bar Cochba, 'Son of the Star,' led a new and heroic movement against Rome and some of his followers held out in the desert until A.D. 133. Hadrian determined to erase the name of Jerusalem from the map. A Roman colony, called Aelia Capitolina, was accordingly founded on the site of the ancient capital. Jews were banished from it, and a temple to Jupiter was erected on the site of the Temple of Yahweh.

II. RELIGION.—**1. The religion of the ancient Hebrews.**—In a sense, the religion of Israel is the history of the religion of Yahweh. The ancient Hebrews, however, preserved in their national traditions the memory of an event, at a definite time, when the God worshipped by their fathers revealed His name to Moses as Yahweh (Ex 3^{13ff}; but see Gn 4^{26}). Before Moses, the religion of Israel's ancestors may not have been substantially different from that of the proto-Phoenicians and Canaanites. The Ugaritic literature shows that *El* was the supreme god. Likewise, the Genesis traditions concerning Abram and his family mention *El Elyon*, or 'God Most High' (Gn 14^{18-20}), *El Shaddai*, or 'God

Almighty' (Gn 17[1]), *El Olam*, or 'God of Eternity' (Gn 21[33]), *El Roi* (Gn 16[13]). The stories of the conquest call the god of Shechem *El Berith*, or 'God of the Covenant' (Jg 9[4]; see H. G. May, 'The Patriarchal Idea of God,' *JBL* lx [1941], 113–128). Many features of the Canaanite religion have survived in the popular cult of Israel, and some of them are common to all the ancient Semites. There is little doubt that the Hebrews inherited them from their distant ancestors.

(1) Totemism. Traces of a belief associating ancestors with certain animals have been discerned by a number of historians in the names of Leah, 'wild cow,' Rachel, 'ewe,' Simeon, 'wolf' (?), Caleb, 'dog,' etc., but there is no evidence that the Hebrews during the patriarchal age worshipped animals.

(2) Fertility. A conception common to the peoples of the Ancient Near East was that the divine reality manifested itself especially in the process of reproduction. Thus, the organs of generation were the object of religious significance. Such a belief survived in Israel in the patriarchal practice, during the making of an oath, of putting one's hand under the thigh (Gn 24[2]).

(3) The *maṣṣēbhāh*. A cultic object appeared again and again in the worship of Israel and Judah until the reform of Josiah (621 B.C.). The *maṣṣēbhāh* was a pillar or phallic symbol which in pre-Mosaic times may have represented the deity (Gn 28[22], Hos 3[4], Dt 7[5], 2 K 23[14]).

(4) The *'ᵃshērāh*. There is no general agreement as to the nature and meaning of this object. It may have been a representation of a deity, corresponding to the Ugaritic Ashirat of the Sea. Such a symbol stood by the altar of Yahweh in the Jerusalem Temple at the time of the Reform of Josiah (2 K 23[6]).

(5) Circumcision is an institution which the Hebrews inherited from their Semitic ancestry, since it was not peculiar to Israel but a practice which was common among many peoples of the ancient Near East. Like many other religious customs, circumcision underwent different interpretations at different periods; but its origin is clearly connected with the sacredness of the reproductive organs.

(6) From the pre-Mosaic period came also the idea that spirits dwelt in certain objects of the natural world, such as trees, stones, and springs. Sacred trees existed in many parts of Palestine. There was Abraham's oak at Mamre near Hebron (Gn 13[18] 18[1]); at Shechem stood another (Jos 24[26]) and still another at Ophrah (Jg 6[11, 19]). The fountain at Kadesh was called En-mishpat (Gn 14[7]) or 'the spring of judgment,' probably because oracular decisions were obtained there. The well of Lahai-roi (Gn 16[14]) had a story to account for its sacredness, as had also the wells of Beersheba (Gn 21[29]). En-rogel (to-day known as 'Job's well') was a spring in the vicinity of Jerusalem near which Adonijah offered a sacrifice (1 K 1[9ff]). Solomon was anointed at Gihon (now called 'Virgin's fountain' on account of Is 7[14]). A sacred circle of stones called Gilgal existed on the W. of the Jordan (Jos 4[19ff]). Stones played a part in the lives of the patriarchs, especially Jacob (Gn 28[18]). The high places or *bāmôth* had stone altars dating from prehistoric times, including the foundation rock of the altar near the Jerusalem Temple.

(7) Sacrifice. In the historical period of Israel's religion, sacrifice was regarded mainly as a gift of food to the deity (cf Ps 50) and probably in earlier times this idea was already present. Sacrifice in the Semitic religions, however, was primarily a commensal feast, in which the god and the worshipper partook of the same food, and their kinship was consequently renewed. Whether this was the sole feature of sacrifice among the ancient Hebrews or not is an open question (see Ex 24[11]). Human sacrifice was widely practised by the Canaanites (*e.g.*, excavations at Gezer), and Israel resorted to the practice in times of crisis (Ahaz, Manasseh, *et al.*). It is not impossible that human sacrifice originated in the ritual of impersonating the dying deity in the seasonal cycle of nature celebration (Jephthah's daughter, Jg 11[40]). The story of Isaac's sacrifice (Gn 22) points to the Hebrew memory of a change from human to animal sacrifice.

(8) The *ḥērem*, or 'ban.' Even before a battle, all the population of the enemy country and their property could be devoted to destruction as a solemn obligation to the deity (Nu 21[2], Jos 6[17], 1 S 15[3ff]). It seems to have been the custom of the Moabites, for Mesha says, 'I killed all the people of the city—a pleasing spectacle to Chemosh' (Moabite Stone, 11 ff).

(9) Blood revenge. It was a religious duty, when one was injured, to inflict a like injury, and if the blood of one's kinsman was shed, to shed the blood of those who had committed the deed (Code of Hammurabi, 18th cent. B.C., 127, 195–197, etc.). Many references to this practice are found in the OT (Gn 4[14ff, 23ff] etc.).

(10) The Passover (*pesaḥ*), or spring festival. One of the survivals of the early Semitic worship appears in the tradition that the celebration of a spring feast was anterior to the time of Moses (Ex 5[1] etc.). It was probably related to the fertility god (The Song of Songs is still chanted in Judaism at the passover celebration). The festival underwent a radical transformation under the historical event of the Exodus (Ex 12), but its vernal origin has not been forgotten by a later age (Ps 114).

(11) It is probable that an autumn festival, combined with a new year festival, was borrowed by the Hebrews from ancient Semitic paganism and was later transformed in the ritual of the Day of the Atonement and in the feast of Tabernacles.

(12) While the ancient Hebrews were not exactly polytheistic like their Canaanite neighbours and mentors, there is evidence that their henotheism was strongly corrupted by the worship of ancestral or tribal deities. The god of the tribe of Gad has survived with a specialized function (Is 65[11]). The Shield of Abraham (Gn 15[1]), the Fear or Kinsman of Isaac (Gn 31[42, 53]), and the Mighty One of Jacob (Gn 49[24]) were in all probability clan gods, perhaps not unrelated to the *t^erāphîm* or household gods of the Laban family (Gn 31[19]; see A. Alt, *Der Gott der Väter*, 1929). The nature of the documents concerning the religion of the patriarchs does not allow a high degree of certainty concerning the historicity of the promise made to Abram (Gn 12[1ff] etc.). Nevertheless, there seems to be a core of memories which point to the consciousness of an election for a special purpose in the history of mankind.

2. The Mosaic Covenant.—The originality of Israel's religion lies primarily in the event of its origin, the deliverance from Egypt after many years of bondage, under the leadership of Moses who acted in the name of Yahweh.

(1) It is probable that Yahweh was the god of the Kenites before He became the God of Israel. The reasons for this conjecture are as follows: (*a*) Of the three documents which narrate the Exodus, E and P tell of the introduction of the name Yahweh as a new name. In early religion a new name usually means a new deity. E, on which P is dependent in this part of the narrative, was preserved in northern Israel and based on traditions of the Joseph tribes. (*b*) The account of the institution of the covenant (Ex 18[12ff]) makes it clear that Jethro, the Kenite priest, offers the sacrifice. He really initiates the Hebrews in the worship of Yahweh. This is confirmed by the underlying thought of all the documents that Moses first learned of Yahweh among the Midianites (of whom the Kenites formed a clan). (*c*) Centuries later than Exodus, Sinai was regarded as the place where Yahweh manifested His presence. From there He marched north to help His people in time of crisis (Jg 5[4ff], Dt 33[2]; see Hab 3[1], Ps 68[4]). Elijah made a pilgrimage to Horeb in order to seek Yahweh (1 K 19). (*d*) The Kenites during several succeeding centuries were the champions of the pure worship of Yahweh. Jael killed Sisera (Jg 5[24ff]). The Rechabites, who from Jehu to Jeremiah (2 K 10[15], Jer 35) championed Yahweh, were Kenites (1 Ch 2[55]). (*e*) Some of the Kenites joined Israel in her migration (Nu 10[29ff]), mingling with Israel both in the north (Jg 5[24]) and in the south (Jg 1[16]):

some of them remained on the southern border of Judah, where they maintained a separate existence till the time of Saul (1 S 15[6]) and were finally, in the days of David, incorporated into the tribe of Judah (1 S 30[26ff., 29ff.]). (*f*) It is this absorption of the Kenites by Judah which, if Yahweh were a Kenite deity, explains why the J document, written in Judah, regards the knowledge of Yahweh as immemorial (Gn 4[26]). The perpetual separateness of Judah from the other tribes tended to perpetuate this in spite of contrary currents from other quarters. It is therefore reasonable to maintain that Yahweh was originally the god of the Kenites, that some of the Hebrew tribes entangled in Egypt were ready to abandon their old gods for one that would deliver them, and that He became their god at the passage of the Sea of Reed (Ex 15).

(2) It is possible to define in broad outline the conception which the Hebrews had of their God at the time of Moses. Quite clearly, they conceived Him to be a God of war. The needs of the oppressed tribes demanded a warrior deity. The people are said to have sung after Miriam, Moses' sister, 'Yahweh is a man of war' (Ex 15[3]). A book of old epic poems was called 'the Book of the Wars of Yahweh' (Nu 21[14]), and the expression 'Yahweh of Hosts' (Lord Sabaoth) was afterwards one of His most constant names. There can be little doubt that this conception of Yahweh as a war-god had developed among the Kenites, and that it had a large influence in drawing the Hebrews into His worship.

There is reason also to believe that, as Yahweh had long been worshipped around Mount Sinai, where severe thunderstorms occur, He had come to be regarded as a God who manifested Himself especially in the phenomena of storms. He is usually represented in cultic poetry as coming in a thunderstorm (Ps 18, Ezk 1, Hab 3, Is 19[1], Job 38[1]) and the regular name for thunder was 'the voice of Yahweh' (Ps 29[3ff.], Job 37[4]). He is also said to have led His people under the appearance of a cloud (Ex 13, 14), and to have manifested His presence on Mount Sinai and later in the Temple of Jerusalem in a thick cloud or thick darkness (Ex 19, 1 K 8[10f.]); the cloud is furthermore used about forty times in the Pentateuch as a symbol of Yahweh's presence. Probably, then, the Israelites received Him from the Kenites as a god of war who manifested Himself in the storm-cloud and uttered His voice in thunder. At the same time, the importance of the thunder and lightning motif in the Ugaritic mythology should not prevent us from considering the proto-Phoenician or Canaanite influence upon this aspect of Hebrew theology.

These conceptions, however, did not exhaust the Hebrew thought of God. The Israelites were Semites, and they conceived Yahweh chiefly as a god of life. Had this not been so, circumcision would not have been his sign, the pillar and asherah would not have been symbolic instruments of His worship, the first born would not have been offered to Him in sacrifice, and the organs of generation would not have been the object of numinous attention.

(3) The name Yahweh, explained in Ex 3[14] as 'I cause to be whatever I cause to be' (the reading 'I am that I am' represents a late rabbinical interpretation, probably influenced by ontological speculations of Hellenistic philosophy), confirms the vitalizing and energizing quality of the God mediated to the people by Moses. Yahweh is the creator God, already in Mosaic theology, and the creator God is also the ruler of history. He can make a world and He can create a nation out of an amorphous gathering of uncouth slaves. Other theories explain the name Yahweh differently. Some think of the Arabic root *hawā*, 'to love passionately,' used in some forms especially of sexual desire. If this meaning were understood by the Hebrews at the time of Moses, it was lost as soon as the Israelites began to react against the magical aspect of Canaanite fertility cult.

(4) It is probable that the covenant between Yahweh and Israel involved at the time no more than that they would become His worshippers in return for deliverance, victory and continuing protection. In becoming His worshippers, however, it was necessary for them to gain knowledge of His ritual. Our oldest document seems to have been the lapidary form of the E decalogue (Ex 20, Dt 5), *i.e.*, the ten words without the elaboration which now accompanies a number of them. It is most remarkable that this primitive code is less concerned with ritual than with inward dedication and behaviour. The so-called J decalogue (Ex 34) represents not a nomadic and pastoral environment but a sedentary and agrarian situation. It reflects either the later period of the conquest, when Israel came in contact with its farming teachers, the Canaanites, or the patriarchal period, when the Hebrew fathers lived in a Palestinian milieu.

(5) The symbol of Yahweh's cultic presence in the time of Moses was the Ark. As the Egyptians, the Mesopotamians, and the pre-islamic Arabs possessed similar structures for carrying their gods, it is probable that the Ark was a kind of movable sanctuary for a nomadic people. A later tradition (1 K 8[9, 21]) says that it contained the ten words written on stone. At any rate, when the Ark was carried into the camp of the Philistines it was thought that Yahweh himself had come into the camp (1 S 8[4]).

In the J document the Ark plays a small part while it is prominent in the E document. J apparently thought much more of Sinai as the place of Divine self-disclosure. This peculiarity of the southern tradition may have come about from the fact that after the settlement in the land of Canaan the Ark was in the possession of the Joseph tribes and became their shrine.

(7) According to the oldest sources, there seems to have been no priesthood at the time of Moses, except that of Moses himself. J tells that when the covenant was ratified, Moses, Aaron, Nadab, Abihu, and seventy elders of Israel went up toward Yahweh's mountain, but only Moses was permitted to come before Him (Ex 24[1f., 9–11]), while E tells of a 'tent of meeting' which Moses used to pitch at a distance from the camp, and to which he would go to consult Yahweh (Ex 33[7–11]), and then return. In this tent, Joshua, Moses' minister, abode all the time (Ex 33[11]). It is clear that neither of these cultic story tellers had any conception of the choice of the tribe of Levi for the priesthood. Indeed, E makes no mention of the tribe of Levi anywhere. Moses was in this view apparently one of the Joseph tribes, and we do not know how the term 'Levite' for priest originated. One document tells of a Levite who belonged to the tribe of Judah (Jg 17[7]), so that here 'Levite' cannot have a tribal signification. J also tells of a tribe of Levi to which a calamity happened (Gn 34; see 49[5–7]). Another revealing incident is that of the men who in a crisis 'attached themselves' to Moses for the preservation of the religion of Yahweh, and were perhaps, accordingly, called *l*[*e*]*wîyîm* [*lāwāh* = 'join'], 'Levites' (Ex 32[26–28]). Many scholars think that the later priesthood was developed out of this band, and that its identification with the unfortunate clan of Levi is due to a later confusion of names.

(8) The covenant form, as it appears for instance in the asseveration which opens the E Decalogue (Ex 20[2]), may have been borrowed from legal treatises, like those of the Hittites, in the 2nd millennium B.C. (G. E. Mendenhall, *Law and Covenant in Israel and in the Ancient Near East*, 1955). In these and other parallels, a king addresses his vassals and reminds them of his acts, makes stipulations which binds their allegiance to him and which they solemnly promise to accept (Ex 19). The Hebrew amphictyony appears to have found its origin in the religious contract which was accepted by the people at the foot of Mount Sinai (see Jos 24, Jg 5). Such a covenant was not a legal document enacted between equals, but on the contrary a kind of sacramental marriage between a sovereign and the people. The birth of the nation appears therefore primarily as a religious event, with a religious structure and a religious hope.

The promise is made dependent upon the fulfilment of obedience to the Divine words. Israel is not just a nation but a holy people (*'am ḳādhôsh*) with a priestly mission. In the covenant mediated by Moses lies the seed of the whole theology of the OT (literally, 'old covenant'). The prophets' critique and eschatology, in a later age, are based upon the centrality of the covenant theme in the consciousness of Israel (Am 3^{1ff}, Hos 2, Is 1, Jer 31^{31} etc.). The covenant is the source of Hebrew solidarity, Hebrew law, and Hebrew standards of morality.

(9) Yahweh alone is God. He alone created the world (Gn 2^{4bff}), and He alone must be worshipped (Ex 20^{5}).

3. The religion of Israel before the great prophets.—(1) The conquest of Canaan strengthened the faith of the Israelite tribes in Yahweh as the lord of history as well as the sovereign of nature. A Semitic people upon entering a new land always felt it necessary to propitiate the god of the land. As this was the case as late as the 8th cent. (2 K 17^{24-34}), it would be all the more true at the end of the 13th. At first, therefore, the Israelites mingled the worship of Yahweh with the worship of the *baalim* or owners and lords of the soil. When under David Israel emerged victorious, Yahweh was more than ever the lord of history as well as the lord of the land. Little by little the cult of Yahweh which took place in the ancient Canaanite shrines was corrupted by Canaanite ritual and beliefs. By the time of Gideon the term 'baal' was applied to Yahweh, as Jerub-baal, Gideon's real name, seems to indicate. Ish-baal and Meri-baal, sons of Saul, and Beeliada, a son of David, bear names which suggest the same syncretistic trend.

(2) During this period it was not thought wrong to make images of Yahweh. Gideon made an ephod-idol at Ophrah (Jg 8^{27}), Micah made an image to Yahweh (Jg 17^{3ff}). Sometimes images were in the form of bulls, as were those which Jeroboam I. set up at Bethel and Dan after the schism of Israel from Judah. These symbolized Yahweh as the giver of life and the god of pastoral wealth.

(3) In the whole of this period, it was thought that Yahweh might appear and talk with a human being, undistinguishable from a human form until the moment of His departure (Gn 18^{2ff}, Jg 6^{11ff} 13^{3ff}). Sometimes, it was the angel of Yahweh that appeared but the difference between Yahweh and the messenger of Yahweh was not always clear.

(4) The people were deeply religious, but the religion existed as a help to secular life. It consisted largely of inherited customs, while the main interest of all was centred in physical prosperity. Certain practices were considered to be wrong, as offences against Yahweh (*e.g.* the crime of Jg 19 and David's murder and adultery (in 2 S 11), but the ethical content of the religion was of a very rudimentary character. Stealing (Jg 18) and treachery could be at times glorified (Jg 3^{15ff} $5^{24, 27}$). The religion of Moses was maintained only through a minority, while the masses appear to have compromised in large measure with the rites, beliefs, and *mores* of the Canaanites.

(5) In every village was an open-air 'high place' marked by a rock altar, pillars, and other cultic objects, and connected with caves and underground structures. In some of these, as at Gezer and in Jerusalem, serpent worship was practised. Soon, some of the sacred places like Shiloh had their sanctuary (1 S 1–3) built with solid blocks of stone and containing rooms with doors. Solomon erected in Jerusalem an elaborate structure in the style of a Phoenician temple, departing in many ways from the cultic habits of the ancient Hebrews. Jeroboam I. likewise built temples at Bethel and at Dan (1 K 12^{31}, Am 7^{13}). A wealthy citizen might possess a private chapel in connexion with his residence (Jg 17).

(6) The priesthood in this period was not confined to any tribe. There seems to have been the thought that it was better to have a Levite for priest (whatever the term may have meant; cf Jg 17^{10}), but Micah, an Ephraimite, made his son a priest (Jg 17^{5}); Samuel, a member of one of the Joseph tribes, acted as priest (1 S 9^{12ff}); and David made his sons priests (2 S 8^{18}). Jonathan, a grandson of Moses according to tradition, started life as an impecunious resident of Bethlehem in Judah; in seeking his fortune he became a priest in the shrine of Micah, the Ephraimite; then at the instigation of the Danites he robbed that shrine and fled with them to the north, becoming the founder of a line of priests in the temple of Dan. Even if his descent from Moses is not to be credited, the story gives evidence of the kind of irregularity in the priesthood at the time of the Judges. So far as Jerusalem was concerned, David improved this chaotic condition by regulating the priestly corps.

(7) The festivals of that period were of a simple and joyous character (1 S 1, 2). The priests killed the sacrificial animal, pouring out the blood no doubt to Yahweh, and then the flesh was cooked. While it was cooking, the priest obtained his portion by a kind of chance (1 S 2^{13ff}), after which the victim was consumed by the worshippers in a festive banquet. It is probable that considerable licence accompanied such social and religious gatherings. The feast described here occurred annually, but there were lesser celebrations at the time of the new moons and other occasions (1 S 20^{5ff}).

(8) A glimpse into the household worship of the time is obtained from the *teraphim* (Jg 18^{26}, Hos 3^{4}). These objects seem to represent household deities, similar to those found in Babylon (Ezk 21^{21}) and among the Aramaeans (Gn 31^{19}). Some of them were apparently large enough to be mistaken for a man (1 S 19^{13ff}). They may have played a part in family divination (Zec 10^{2}), but it is not possible to state whether they had taken the place of Yahweh worship at a public shrine.

(9) During the centuries of the settlement, a class of religious professionals appeared called seers or prophets. They were related to the diviners and fortune tellers of the ancient Near East. In the time of Saul, there were ecstatic prophets who lived in groups and used music and dancing in their techniques for collective inspiration. Their frenzy possessed an epidemic quality (1 S 10^{9-13} 19^{23f}). In all probability these prophets were of Canaanite origin. The Egyptian Wen-Amon while reporting in about 1100 B.C. about his experiences in Byblos, on the coast of Phoenicia, tells of a youth who was thrown into a trance and uttered prophecies which moved the king of Byblos to conclude a business transaction. It appears that this Phoenician ecstatic was not part of a group but acted as an individual. In Israel, likewise, Samuel appears in one tradition at least to have been a solitary seer, different from the prophets of the guilds which he later supervised (1 S 9, 19^{20f}). Such men were held in high regard and obtained their living by telling people what they wished to know. Their oracles were mostly about the future, but often no doubt they told a man whether this or that action was in accord with the will of Yahweh. The Phoenician Baal as well as Yahweh had prophets (1 K 18^{19}). Such men became necessary adjuncts of the government. In the 9th cent., Ahab kept 400 of them about him (1 K 22^{6}). David and Solomon had probably done the same in their own time. Both in Israel and in Judah, powerful individual prophets, not unlike Samuel, intervened in the affairs of state. Some were public officials. Gad advised David and organized sacred music as well as wrote a history of the reign (1 S 22^{5}, 2 S 24^{11-14}, 1 Ch 29^{29}) Nathan rebuked David and served him and Solomon as well (2 S 7^{2ff} 12^{1-15}, 1 K 1^{22ff}, 1 Ch 29^{29}, 2 Ch 9^{29}). Other prophets appear to have been 'laymen' or private individuals who suddenly appeared from time to time in order to make a special pronouncement of public interest. Ahijah (1 K 11^{29ff}) and Micaiah, the son of Imlah (1 K 22^{8ff}), seemed to belong to this type. Elijah was probably the most influential of them, a true forerunner of the Great Prophets of the eighth and later centuries. His significance lies in the fact that in his opposition to

Phoenician syncretism, he revived the Yahwism of the Mosaic times, and upheld sharply the ethical standards of the nomadic covenant (1 K 17–19). At the same time, he understood that it was not possible to return to the old ways of the wilderness, and that the work of Yahweh could be best accomplished in history less through thaumaturgical manifestations than in the quiet and direct transformation of individuals. His theology allowed him to consider a foreigner like the king of Damascus as the instrument of Yahweh's will. He also appears to have initiated the idea of a religious society, within the political nation, which later influenced the growth of the idea of a remnant and of a spiritual congregation (1 K 19).

Elisha hardly deserves to be reckoned in this great succession. Although the heir of Elijah, he was the head of professional prophets. When absent from the band of his associates, he found it necessary to call a minstrel to work up his ecstasy before he could prophesy (2 K 3^{15}). It was he, however, who prompted Jehu to undertake the purification of Israel from the taint of Phoenician worship, and this religious reformation was of extreme significance for the survival of Yahwism, although it was accomplished at the price of ruthless massacres.

4. The religion of Israel during the great prophets.— With the exception of Nahum and Obadiah, whose preserved utterances present a rather violent kind of religious nationalism, the great prophets, from Amos to Second Isaiah formed a remarkable succession of men, whose impact upon the religion of later centuries cannot be overestimated. They were different from the 'sons of the prophets' or prophetic guilds, for they were individuals with a compulsive sense of mission who spoke often against their own will in a way which endangered their own security. Their oracles, sermons, threats, and promises offer an interpretation of history which is unique in the ancient world. They did not represent the interests of a class or dynasty, or a nation. They hailed the sovereignty of the creator of the universe, even at the price of national extermination.

(1) Amos, the first of the great prophets, like Elijah, preached the universalism of Yahweh's jurisdiction. He traced the existence of all mankind to Yahweh's activity. Such a faith was certainly present in the Yahwist publisher of the patriarchal and covenantal traditions, but Amos applies it to concrete cases. Yahweh not only brought the Israelites out of Egypt, but also the Philistines from Caphtor and the Aramaeans from Kir (Am 9^{7}). More extraordinary still, even the distant Ethiopians are the object of His concern. Ethics, not ritual, was the basis of the covenant in the wilderness (Am 5^{21-25}). Covenant solidarity or righteousness must roll down as perennial waters, and religion must embrace the totality of life. Amos championed the cause of the poor, and rebuked the social impurities connected with the cult. Ritual cannot save Israel from her appointed doom.

(2) Hosea was a disciple of Amos and the burden of his message is likewise one of threat based on the highest sense of Divine justice. At the same time, Hosea developed the theology of Divine love, not the sexuality of the ancient Semitic religionists, by which man achieves communion with the Divine forces, thereby enlisting them for the fertility of nature and of mankind, but the self-sacrificing compassion of an anxious father or devoted husband, who would suffer in order to reclaim the fallen. Not less stern than Amos in his ethical standards, Hosea is less occupied with denouncing social oppression. He sees in the coming catastrophe not the extermination of Israel but a judgment of chastening and of purification 'in the wilderness.' While Amos concentrated on ethical corruption, Hosea understood that the root of social irresponsibility was to be found in idolatry.

(3) Isaiah continued in Judah the work initiated by Amos and Hosea in Northern Israel. He proclaimed the Holy God, whose holiness fills the earth. For forty years, in many crises and under varying figures, Isaiah set forth his interpretation of Yahweh's will for His people. Man is in the hand of God as clay in the hand of a potter. The powerful Assyrian is but the rod by which the ruler of history is chastising Israel: when God's will is accomplished, the rod shall be broken and discarded (Is 10^{5ff}). Isaiah was credited by his disciples as the initiator of Davidic messianism, looking forward to a new economy of history when a shoot of the house of Jesse would establish a kingdom described in terms of a reconciled humanity, living in a new paradise (Is 9, 11). Even if these poems were not to be credited to him, it seems clear that he believed in the raising of a remnant which would be converted by faith in Yahweh. His attitude toward the perenniality of Zion is not altogether clear, for he may have altered his views in the course of his long life. The sudden deliverance from the siege in 701 B.C. may have caused him to believe that Jerusalem would never be destroyed.

(4) Micah of Moresheth, Isaiah's contemporary, maintained the stern theology of doom proclaimed by Amos. He was profoundly concerned by the oppression of the poor and he announced irrevocably the destruction of the Temple in Zion (Mic 3^{12}). One of his disciples summarized the teaching of the three great prophets of the 8th cent. in a formula on the demands of Yahweh which has become symbolic of the whole theology of prophetism, 'nothing but to do [covenantal] righteousness, to love mercy and to walk humbly [in communion] with [one's] God' (Mic 6^{8}).

(5) The Deuteronomists attempted to incorporate the high level of the 8th-cent. prophets in a body of laws for civil, criminal, and religious reformation. They saw that ritual should be retained. But the high places were to be eliminated and the cult was to be purified and centralized in Jerusalem, the chosen place of Yahweh's real presence. The ancient Covenant Code (Ex 20^{21ff}) which had been adapted through the centuries to changing conditions was completely revised, with new emphasis laid both on humanitarian morality and cultic fidelity. The preachers of Josiah's reform reflected on the theology of the covenant, insisted on the gracious character of the election, and preached inward and total devotion to the giver of life (Dt 6, 7).

(6) Jeremiah, the true heir of Hosea and Micah, discerned the dangers of a new formalism in the Deuteronomic reformation. He saw clearly that Yahweh was independent of a temple, even that of Jerusalem (Jer 7, 26). He understood that the covenant had been annulled and looked forward to a new covenant, when the law will be written no longer in a book but at the very core of man's intellect and will (Jer 31^{31ff}). By composing his intimate confessions, he gave impulse to religious introspection and profoundly influenced the literature of spirituality, from the psalms of lament and Job to the meditations of later Jewish and Christian saints. More specifically, he enabled the Judaeans exiled in Babylon to maintain their faith and their corporate identity (Jer 29), and must therefore be credited with having engendered Diaspora Judaism and indirectly the Christian Church.

(7) Habakkuk meditated on the problem of evil in history and developed the Isaianic concept of faith as a principle for living (Hab 2^{4}). His concept of joy at all cost, without any hope of material reward (3^{17-18}), announced the 'pure religion' of Job and the Psalmists (especially Ps 73).

(8) Ezekiel occupies a peculiar position in the prophetic development. He stood, on one side, as a true disciple of Jeremiah, and on the other, being the son of a Jerusalem priestly family, prepared the restoration of ritual and legal Judaism. As a pastor in time of despair, he broke down the concept of collective guilt and proclaimed the dogma of individual responsibility (Ezk 18). He thought of the Messiah as primarily a shepherd, one whose chief function would be to save individuals. As a successor of the Deuteronomists, he endeavoured to adapt prophetic concepts to priestly institutions. He

accepted Isaiah's theme of Zion as the seat of Yahweh's real presence, and was instrumental in preparing a blueprint for the construction of a new Temple with an elaborate system of worship sharply distinguishing between the sacred and the profane and between clergy and laity (Ezk 40–48). His disciples composed the Code of Holiness (Lv 17–26) which revised ancient laws and adapted them to a new era.

(9) Second Isaiah (40–55) was the last of the great prophets. The anonymous poet of the exile proclaimed with a unique display of poetic and theological skill the certainty that Yahweh was the creator of the Universe, the ruler of the world, and the maker of history. Cyrus was hailed as the agent of deliverance. Israel is to be forever the servant of Yahweh, whose election is related to a universalistic mission. That mission was nothing less than to bring all the nations of the world to Yahweh. The path of this service was one of suffering and death. It is probable that Second Isaiah, on account of the Hebrew concept of collective personality, thought also of a lonely sufferer, the incarnation of Israel, whose death would be interpreted as an atoning sacrifice (Is 53).

The prophets have developed in the course of three centuries a unique interpretation of God, the world, man, and history. The Mosaic covenant, through their intervention, assumed a new meaning, which prevented the Judaean exiles from disintegrating and which created spiritual as well as ritual Judaism.

5. The religion of postexilic Judaism.—The rehabilitation of the Jewish community in Palestine during the Persian period was wholly due to a theology of cultic presence in Zion. If there were prophets, such as Haggai and Zechariah, Malachi and Joel, they uttered their visions to persuade the people to restore and maintain the sacred ceremonies. Nevertheless, the spirit of the great prophets had left a perennial trace.

(1) The Priestly Document became the cornerstone of restored Judaism and the framework of the written Pentateuch. From the prophets, the priests received and developed the lofty monotheism of Judaism. While the ritual which they proposed had been inherited largely from Semitic paganism, they transformed it to a remarkable degree in an attempt to inspire and transform the whole life of their community. They rewrote the history of the people, beginning with the myth of creation (Gn 1^{1ff}), in order to justify their sacramental experience of communion with the maker of heaven and earth. They related the ritual laws, such as sabbath and circumcision, to the whole scheme of universal existence and of Israel's peculiar mission in history. This latter consideration, however, led them at the same time to accelerate the trend toward separatism from the world. For example, the menial tasks in the sanctuary were no longer to be performed by foreigners. The Levites, or descendants of the provincial priests who have been centralized in Jerusalem at the time of Josiah's reformation, became the attendants of the Temple. Sacrificial theology, through the experiences of the exile and the widespread awareness of national sin, changed its character, from a joyous communion meal to a ritual of atonement. The effects of the priestly ritual, however, were not as deadening as one might suppose. Various factors prevented it from stifling the religious vitality of the congregation. The teachings of the prophets were cherished and taught to children. During the exile, the Jews had learned to live a life of intense spirituality without the benefits or the shackles of ritual.

(2) The Psalter testifies to the extraordinary complexity of religion in the postexilic period. There is little doubt that in its present form, the Psalter was the hymnal of the Second Temple, but it represented the growth of all the centuries of the religious history of Israel from the time of Moses and David. Ancient hymns, some of which were borrowed from Canaanite liturgies, were adapted to covenantal faith and the historical theme now completely transformed the ancient naturistic ceremonies of the festivals. The hard lessons from history were presented lyrically or epically in the light of the prophetic interpretation of history. The joy of Divine presence, the burden of sin-consciousness either on the national or on the individual level, together with the delight of deliverance were sung in a great variety of style and imagery. Paradoxically, the Psalms composed chiefly for cultic celebration, and edited by Temple musicians for Temple ceremonies, adopt a rather lofty attitude of detachment toward sacrificial duties and may reflect levitical bias against priestly privileges and arrogance. Above all, the Psalter is penetrated with eschatological fever, insisting that Yahweh will triumph at the end of history since in the context of the cultic act, He is king for ever and ever.

(3) Ritual and legal exclusivism was represented by the priests and reformers of the type of Nehemiah and Ezra, who advocated divorce of foreign wives for the sake of racial and ritual purity. However, other voices were raised by powerful nonconformists who used literature as a vehicle of protest. Jonah and Ruth, with their concerns for the Ninevites and the Moabites respectively, together with the universalism of some parts of Joel and Malachi, reveal that Judaism after the Exile was not a monolithic monument of ritual observance but included within its ranks dynamic elements which continued in their own way the work of the pre-exilic giants of prophecy.

(4) There was also a class of men who lived apart from the ceremonies of the Temple, seemingly untouched by the concerns of the priests. They were the successors of the ancient sages, public servants who from the time of Solomon had worked in the diplomatic corps of the nation and had been in close contact with the intelligentsia of foreign courts. They treated religious and ethical problems of living from that practical commonsense point of view which the Hebrews called *ḥokhmāh*, Wisdom. The books produced by this class exercised a profound religious influence on later generations. The oldest of these, the Poem of Job, discusses in some of the noblest poetry ever written, the problem of existence in the light of undeserved suffering. The poet appears to have borrowed an ancient folktale as a setting for a discussion in which he treats his theme with complete freedom of thought, untrammelled by priestly or legal concerns. In his conclusion, he is more than a wise man and proves to be a prophet. Job does not find satisfaction till he receives an immediate vision of God, and becomes willing, through contemplative participation in the mystery of creation, to trust the Divine person, although his intellectual problem remains unsolved.

The Book of Proverbs contains the sayings of the sages of the practical, every-day sort. Wisdom is good because it rewards, and the fear of Yahweh (awesome reverence without the extreme of cultic practices) is the beginning of wisdom. Ecclesiastes (Ḳoheleth) is the work of a wise man who has not lost his faith although his outlook on life's mystery is both blasé and serene. The fact that his book was preserved indicates the extent of the influence exercised by intellectual classes in the midst of Judaism.

(5) During the postexilic period, the religious life of the scattered communities was centred in the synagogues. These 'houses of prayer' became the most potent factor in the preservation and development of Jewish faith in an alien culture. The education of the young together with sabbath worship were thus insured and the heritage of the past was transmitted to future generations. As often as they could, the Jews of the dispersion made pilgrimages to the Temple in Jerusalem and took part, especially at the time of the great festivals, in the ritual worship of the priestly community. Contact with pagan culture, however, broadened the vision and the piety of the Jews of the Diaspora. They saw that many heathen were actually decent individuals. At the same time, they began to make proselytes. The translation into Greek of their sacred Law, and later of the books of the prophets, which began in the 3rd cent. B.C., was demanded not only for the use of the Greek-

speaking Jews, but also as an instrument in the hands of those who would fulfil the missionary conception of Second Isaiah and win the world to Yahweh. Towards the end of this period, a missionary literature began to be written. One portion of this, the Sibylline Oracles, the oldest part of which dates perhaps from the Maccabaean age, represented the Sibyl, who was popular in the Hellenistic world, as recounting in Greek hexameters the history of the chosen people.

6. The triumph of Legalism.—With the beginning of the Hasmonaean dynasty, the creative period of Biblical Judaism began to wane, and the leaders, gathering up the heritage of the past, were crystallizing it into permanent form. This did not come about all at once, and its beginnings went back to the early postexilic times. The writers of the priestly law were the real intellectual and spiritual ancestors of the Hasidim, or enthusiasts for the Law, out of whom the Maccabaean heroes emerged. Until after the Maccabaean struggle, however, the religious life was too varied, and the nation too creative, for the priestly conceptions to impose themselves in a sort of cultural conformism. The struggle of the Maccabees for the life of the faith greatly strengthened the Hasidim, who early in the Hasmonaean rule developed into the Pharisees. More numerous than the Sadducees, and possessing among the country people a much greater reputation for piety, they soon became the dominant party in Palestine. Some might split off from them, and the Essenes, either at Qumrân or elsewhere, would develop a full-fledged sect, within and apart from, the larger community of Judaism. The Pharisees' aim was to apply the Law to all the details of the daily life. Some of its provisions were disturbing. It called on the Jews not to work on the sabbath, but some work was necessary, if man would live. The Pharisees endeavoured, therefore, to define what was and was not work within the meaning of the Pentateuch. Similarly they dealt with other laws. These definitions were not, for some centuries, committed to writings. Thus there grew up an Oral Law side by side with the Written Law, and in due time the Pharisees regarded this as of special authority. There was development and growth, of course, but this was accomplished, not by creating the new, but by interpreting the old. In the rabbinic schools, which were developed in the Roman period, this system fully unfolded itself, and formed in due course Talmudic Judaism.

Beginning with the Maccabaean struggles, a new class of literature, the Apocalyptic, was called into existence. The eschatological fever which had inspired the prophets and many of the psalmists was now transformed, under the impact of national suffering and persecution, into a furious attempt to discover the date of the end of the world and of the advent of the reign of God. The Apocalypse of Daniel (165–164 B.C.) became the pattern of a vast body of documents in which visions of the last throes were elaborately described. No fewer than seven of these works were attributed to Enoch, and six to Baruch; one was ascribed to Moses, one to Isaiah, while each of the twelve sons of Jacob had his 'testament,' and Solomon his 'psalms.'

In this literature, the consciousness of Judaism, in conflict first with Syria and then with Rome, finds its expression. The apocalyptic hopes were quite consistent with the Law; they pointed forward to that time when the faithful should have ability to serve God completely, and when the tribulations of the present economy of existence would at last be ended. They enabled men to endure and to stand, in spite of trials and oppression. It was in the midst of this passionate expectation for the deliverance of Israel that the Gospel of Jesus of Nazareth was born. G. A. B.—S. L. T.

ISRAELITE (Jn 1^{47}).—This is the only instance of the use of the word 'Israelite' in the gospels. It has the particular significance, suggested by the story of Jacob in Gn 32^{28} 35^{10}, of one belonging to the Jewish people, with special reference to the privileges conferred by God on His people, to whom 'belong the sonship, the glory, the covenants, the giving of the law, the worship, and the promises, . . .' (Ro 9^{4}). Its use (as distinct from 'Jew' and 'Hebrew') became closely associated with belief in the messianic hope (cf Jn 1^{45}), and the expression 'Israelite indeed,' addressed to Nathanael, breathes that sense of tragedy so apparent in the Fourth Gospel, inasmuch as those who were specially 'his own' received Him not. One may compare the attitude of 'the Jews' in ch. 6, who are pictured as blindly claiming religious privileges, and yet were enemies of Christ, with Nathanael, who overcame the very same prejudice (stated in both cases as objection to the commonplace origin of Jesus), and readily responded to Philip's invitation, 'come and see' (cf Jn 1^{46} with 6^{42}). It is in this sense that Nathanael is one 'in whom is no guile.' He does not allow his devout sense of privilege to destroy openness of heart toward the claim of Jesus of Nazareth. His action shows that he is sincere, frank, and without sinister aim. From the viewpoint of the writer of the Fourth Gospel, therefore, Nathanael is an object of surprise.

ISSACHAR.—The fifth son of Jacob by Leah, born after Gad and Asher, the sons of Zilpah, and the ninth of Jacob's sons (Gn 30^{18}, E; cf $35^{22b\text{ff}}$, P). The name (Heb. *yiśśākhār*) is peculiar in form and of quite uncertain significance. J and E both connect the name with the root *śākhar*, 'to hire': J because Leah 'hired' Jacob from Rachel with Reuben's mandrakes; E because she gave Zilpah to Jacob. The difference shows that the traditions are of little value as linguistic guides. Gn 49^{14f} also appears to play upon the root *śākhar* in its description of Issachar as a 'servant under task-work,' though the reference to Issachar as 'a bony ass' and the obvious allusion to the riches of the sea indicates that the services of Issachar were hired as caravaneers rather than forcibly conscripted. The affinities of Issachar with the surrounding Hebrew tribes would guarantee the security of this traffic.

P's census at Sinai gives the tribe 54,000 (Nu 1^{29}), and at Moab 64,300 (26^{25}); cf 1 Ch 7^{5}. For the clans see Gn 46^{13} and 1 Ch $7^{1\text{ff}}$.

The original seat of the tribe appears to have been S. of Naphtali and SE. of Zebulun. On the NW. it touched upon Mount Tabor, on the S. upon Mount Gilboa. P's lot (Jos 19^{17-23}) assigns to the tribe sixteen cities and their villages, scattered throughout the eastern end of the Plain of Esdraelon and the Valley of Jezreel. The tribe participated in the war against Sisera (Jg 5^{15}), and Deborah may have belonged to it. The 'with' before Deborah might be read 'people of'; but the verse is evidently corrupt. Baasha, the son of Ahijah, who succeeded Nadab, was 'of the house of Issachar' (1 K 15^{27}); and possibly also Omri, whose family property was probably at Jezreel. The Blessing of Jacob (Gn 49^{14f}) refers to the geographical situation of Issachar at the bottleneck between the ridge of Gilboa and the hills of Lower Galilee, 'a bony ass crouching between converging fold-walls,' but indicates that by the early monarchy Issachar had lost its martial spirit. The Blessing of Moses (Dt 33^{18f}), which refers to Issachar's share in commercial prosperity through the trade from the coast which passed through her district, associates Issachar with Zebulun in the cult at a mountain sanctuary. This is doubtless Tabor (cf Hos 5^{1}), which may have served as an amphictyonic shrine for the older, or Leah, tribes in the north, which may be the 'Israel' mentioned in connexion with localities in this neighbourhood on Merneptah's stele (1223 B.C.). One of the minor Judges, Tola, the grandson of Dodo, perhaps a hereditary law-giver and interpreter, was a man of Issachar (Jg 10^{1}). According to the Talmud, the Sanhedrin drew from Issachar its most prominent intellectuals. See also TRIBES OF ISRAEL.

J. A. C.—J. Gr.

ISSHIAH.—**1.** One of the heads of the tribe of Issachar, 1 Ch 7^{3} (AV **Ishiah**). **2.** A Korahite who

joined David at Ziklag, 1 Ch 12[6] (AV **Jesiah**). **3.** The son of Uzziel, 1 Ch 23[20] (AV **Jesiah**), 24[25]. **4.** A Levite, 1 Ch 24[21].

ISSHIJAH.—One of those who agreed to put away his foreign wife, Ezr 10[31]; perhaps the **Asaias** of 1 Es 9[32] (AV, RV **Aseas**).

ISSUE.—See MEDICINE.

ISTALCURUS.—See ZAKKUR.

ISUAH, 1 Ch 7[30] (AV).—See ISHVAH.

ISUI, Gn 46[17] (AV).—See ISHVI.

ITALIAN COHORT (AV, RV **band**).—See BAND.

ITALY.—This word varied in sense from time to time. It first signified only the Southern (the Greek) part of the peninsula; when Rome rose to power it appropriated the name to cover also its own territory up to the Rubicon; and finally, before the time of Christ, it had come to bear the meaning which it has now. Its central position in the Mediterranean, the conformation of its coast, and the capabilities of its soil under proper cultivation, fitted it to be the home and centre of a numerous and powerful people. In the 1st cent. A.D. there was constant communication between the capital Rome and every part of the Empire, by well-recognized routes. Among the routes to the E., which mainly concern the NT student, was that from Rome along the W. coast of Italy to Campania, where it crossed the country and eventually reached Brundisium. From the harbour there the traveller either sailed across the Adriatic to Dyrrhachium, and went by the Egnatian road to Thessalonica and beyond, or sailed across to the Gulf of Corinth, trans-shipped from Lechaeum to Cenchreae (q.v.), and from there sailed to Ephesus or Antioch or Alexandria, as he desired. A good account of the opposite journey is in Ac 27–28. The Jews poured into Italy, especially to Rome, and had been familiar to the people of Italy as far north as Rome long before Christianity arrived. A. So.—**E. G. K.**

ITCH.—See MEDICINE.

ITHAI.—See ITTAI, 2.

ITHAMAR.—The fourth and youngest son of Aaron and Elisheba (Ex 6[23] etc.); consecrated priest (Ex 28[1ff]); forbidden to mourn for Nadab and Abihu (Lv 10[6]), or to leave the Tent of Meeting (v.[7]); afterwards entrusted by Moses with priestly duties (Lv 10[12ff]) and rebuked by him for neglect (v.[16ff]); set over the Gershonites and the Merarites in connexion with the service of the Tent of Meeting (Nu 4[21–33] 7[7f]; cf also Ex 38[21]); ancestor of Eli (cf 1 K 2[27] with 1 Ch 24[3]; Jos. *Ant.* VIII. i. 3 [11]). The family in David's time was only half the size of Eleazar's (1 Ch 24[4]). It was represented among the returned exiles (Ezr 8[2]).

W. T. S.

ITHIEL.—1. A Benjamite, Neh 11[7]. **2.** One of two persons to whom Agur addressed his oracular sayings, the other being **Ucal,** Pr 30[1]. Neither LXX nor Vulgate recognizes proper names here, and most modern commentators point differently and translate 'I have wearied myself, O God, I have wearied myself, O God, and am consumed.' So RVm.

ITHLAH.—A town of Dan, near Aijalon, Jos 19[42] (AV **Jethlah**). The site is unknown.

ITHMAH.—A Moabite, one of David's heroes, 1 Ch 11[46].

ITHNAN.—A city in the Negeb of Judah, Jos 15[23]. The LXX combines with the preceding name, **Hazor-ithnan.** The site is uncertain.

ITHRA.—The father of Amasa, and husband of Abigail (so 1 Ch 2[16f]; Abigal in 2 S 17[25] RV, RSV), David's sister; called **Jether** in 1 K 2[5, 32], 1 Ch 2[17]. He is described as an Israelite in 2 S 17[25] (AV, RV), but an Ishmaelite in 1 Ch 2[17], 2 S 17[25] (RSV).

ITHRAN.—1. Eponym of a Horite clan, Gn 36[26], 1 Ch 1[41]. **2.** A man of Asher, 1 Ch 7[37]; called **Jether** in v.[38].

ITHREAM.—The sixth son of David, born to him at Hebron, 2 S 3[5], 1 Ch 3[3].

ITHRITE, THE.—A gentilic adjective applied to the descendants of a family of Kiriath-jearim (1 Ch 2[53]), amongst whom were two of David's guard (1 S 23[38], 1 Ch 11[40] Ira and Gareb). Possibly, however, the text of 2 S 23 and 1 Ch 11 should be pointed 'the **Jattirite,**' *i.e.* an inhabitant of Jattir (mentioned in 1 S 30[27] as one of David's haunts) in the hill-country of Judah (Jos 15[48] 21[14]). See JATTIR.

ITS.—It is well known that this word occurs but once in AV, Lv 25[5], and that even there it is due to subsequent printers, the word in 1611 being 'it'—'that which groweth of it owne accord.' The use of 'it' for 'its' is well seen in Shakespeare's *King John,* II. i. 160,

> 'Go to it grandam, child:
> Give grandam kingdom, and it grandam will
> Give it a plum, a cherry, and a fig.'

The form 'its' was only beginning to come into use about 1611. The usual substitutes in AV are 'his' and 'thereof.' Thus Mt 6[33] 'But seek ye first the kingdom of God, and his righteousness,' where Tyndale has 'the rightwisnes thereof' (RV and RSV take the pronoun to be masculine, referring to God, not kingdom, and retains 'his').

ITTAH-KAZIN, Jos 19[13] (AV).—See ETH-KAZIN.

ITTAI.—1. A Gittite leader who, with a following of 600 Philistines, attached himself to David at the outbreak of Absalom's rebellion. In spite of being urged by David to return to his home, he determined to follow the king in his misfortune, affirming his faithfulness in the beautiful words 'As the Lord lives, and as my lord the king lives, wherever my lord the king shall be, whether for death or for life, there also will your servant be' (2 S 15[21]). He therefore remained in the service of David, and soon rose to a position of great trust, being placed in command of a third part of the people (2 S 18[2]). **2.** A Benjamite, son of Ribai, who was one of David's mighty men (2 S 23[29], 1 Ch 11[31] [in the latter **Ithai**]).

W. O. E. O.

ITURAEA.—This region, with Trachonitis, constituted the tetrarchy of Philip (Lk 3[1]). But whether 'Ituraea' is employed by the Evangelist as a noun or an adjective is a disputed point. Epiphanius and Eusebius seem to have been the first writers to use the word as the name of a country. The Ituraeans as a people were well known to classical writers. According to Cicero (*Philipp.* II. 112), they were a 'predatory people'; according to Caesar (*Bell. Afr.* 20), they were 'skilful archers'; according to Strabo (XVI. ii. 10 etc.), they were 'lawless.' They seem to have migrated originally from the desert to the vicinity of Southern Lebanon and Coele-Syria. Both Strabo and Josephus (*Ant.* XIII. xi. 3 [318]) locate them in these parts. The Romans probably caused them to retreat toward the desert again shortly before the Christian era. Lysanias the son of Ptolemy is called by Dio Cassius (xlix. 32) 'king of the Ituraeans.' He was put to death by Mark Antony in 34 B.C. Zenodorus his successor died in 20 B.C., whereupon a part of his territory fell into the hands of Herod the Great; and when Herod's kingdom was divided, it became the possession of Philip (Jos. *Ant.* XVII. xi. 4 [319]). Whether Ituraea and Trachonitis overlapped, or were two distinct districts, is uncertain. The passage in Luke seems to favour a distinct and definite district, which was probably somewhere NE. of the Sea of Galilee.

G. L. R.—**F. C. G.**

IVAH.—The AV spelling of **Ivvah** (q.v.) in 2 K 18[34] 19[13], Is 37[13].

IVORY (*shēn,* literally 'tooth'; and *shenhabbîm,* 'elephants' teeth,' 1 K 10[22], 2 Ch 9[21]).—Ivory has been valued from the earliest times, witness the well-designed ointment-boxes of ivory found at Ugarit. Solomon imported it by sea (1 K 10[22]), probably from Ophir; it was used in the decorations of palaces (22[39]), as also in

ships (Ezk 27[6]) decks of pine were 'inlaid with ivory.' Archaeological finds at Samaria include ivory carvings, which were inlaid in the woodwork of the palace or its furniture. The 'ivory tower' (Ca 7[4]) may also have been a building decorated with ivory. Solomon had a throne of ivory (1 K 10[18–20]). 'Beds of ivory,' such as are mentioned in Am 6[4], were, according to a cuneiform inscription, included in the tribute paid by Hezekiah to Sennacherib. E. W. G. M.—R. A. B.

IVVAH.—A city named in 2 K 18[34] 19[13], Is 37[13] (AV all **Ivah**), along with Sepharvaim and Hena, as conquered by the Assyrians; probably to be identified with **Avva** (q.v.). It is probably modern *Tell Kefr 'Ayā*, on the Orontes.

IVY.—This plant (*Hedera helix*) grows wild in Palestine and Syria. It is mentioned in 2 Mac 6[7]. See DIONYSIA.

IYE-ABARIM.—The station mentioned in Nu 21[11] as 'in the wilderness which is opposite Moab toward the sunrise,' and in Nu 33[44] as 'in the territory of Moab'; possibly modern *Maḥaiy* (AV **Ije-abarim** in both). In Nu 33[45] it is called **Iyim** (AV **Iim**). This place is to be distingusihed from **Iim** (q.v.) of Jos 15[29].

IYIM ('ruins').—See IYE-ABARIM.

IYYAR.—See TIME.

IZEHAR, Nu 3[19] (AV).—See IZHAR.

IZHAR ('he is tawny').—**1.** Son of Kohath the son of Levi, Ex 6[18, 21], Nu 3[19] (AV **Izehar**) 16[1], 1 Ch 6[2, 18, 38] 23[12, 18]; patronymic **Izharites,** Nu 3[27] (AV Izeharites), 1 Ch 24[22] 26[23, 29]. **2.** A Judahite, 1 Ch 4[7] (RV, RSV); AV **Jezoar**). See ZOHAR, 3.

IZLIAH.—A Benjamite chief, 1 Ch 8[18] (AV **Jezliah**).

IZRAHIAH.—A chief of Issachar, 1 Ch 7[3]. The same name is rendered **Jezrahiah** in Neh 12[42].

IZRAHITES.—Gentilic name in 1 Ch 27[8], possibly another form of **Zerahites,** vv.[11, 13] (AV **Zarhites**). See ZERAH.

IZRI.—Chief of one of the Levitical choirs, 1 Ch 25[11]; called **Zeri** in v.[3].

IZZIAH.—One of those who had married a foreign wife, Ezr 10[25] (AV **Jeziah**), 1 Es 9[26] (AV **Eddias,** RV **Ieddias**).

J

JAAKAN.—A descendant of Esau, 1 Ch 1[42] (AV **Jakan**); in Gn 36[27] called **Akan.** See also BEEROTH-BENE-JAAKAN.

JAAKOBAH.—A Simeonite prince, 1 Ch 4[36].

JAALA.—See JAALAH.

JAALAH.—The name of a family of 'sons of Solomon's servants' who returned with Zerubbabel, Ezr 2[56], 1 Es 5[33] (AV, RV **Jeeli**); called **Jaala** in Neh 7[58].

JAALAM.—The AV form of **Jalam** (q.v.).

JAANAI, 1 Ch 5[12] (AV).—See JANAI.

JAAR.—A Hebrew word meaning 'wood,' 'forest,' thicket,' occurring about fifty times in the OT. It occurs once as a proper name, Ps 132[6] (so RVm, RSV; AV, RV 'the wood'). Here it is probably a shortened form of **Kiriath-jearim,** whence the Ark was brought to Jerusalem (cf 1 Ch 2[50] where Kiriath-jearim is connected with Ephrathah, as here).

JAARE-OREGIM.—According to 2 S 21[19], the father of Elhanan, but according to 1 Ch 20[5] his name was **Jair.** See ELHANAN.

JAARESHIAH.—A Benjamite chief, 1 Ch 8[27] (AV **Jaresiah**).

JAASAI, Ezr 10[37] (RVm).—See JAASU.

JAASAU, Ezr 10[37] (AV).—See JAASU.

JAASIEL.—The leader of Benjamin, 1 Ch 27[21], probably identical with the **Mezobaite** of 11[47].

JAASU.—One of those who had married foreign wives, Ezr 10[37] (AV **Jaasau**; RVm **Jaasai,** following *Ḳ^erê*); called **Eliasis** in 1 Es 9[34].

JAAZANIAH ('Yahweh hears').—**1.** A Maacathite military commander, contemporary with Gedaliah (2 K 25[23] = **Jezaniah** Jer 40[8]). **2.** A faithful Rechabite chieftain (Jer 35[3]). **3.** An elder, the son of Shaphan, an idolater (Ezk 8[11]). **4.** A prince of the people, son of Azzur, opposed by Ezekiel (Ezk 11[1ff]). The name appears on a number of seals, and later, in Aramaic form, in the Elephantine papyri. It has been suggested that the Jaazaniah of a seal from *Tell en-Naṣbeh* is identical with **1** above. P. R. A.

JAAZER, Nu 21[32] 32[35] (AV).—See JAZER.

JAAZIAH.—A son of Merari, 1 Ch 24[26f].

JAAZIEL.—A Levite skilled in the use of the harp, 1 Ch 15[18]; his name is abbreviated to **Aziel** in v.[20].

JABAL.—Son of Lamech by Adah, and originator of the nomadic way of life, Gn 4[20].

JABBOK.—A river now called *Nahr ez-Zerqā* ('the Blue River,' and it has been suggested that it was given this name because its water, from a distance, appears to be grey-blue in colour). It is one of the main streams which flow from the east into the Jordan. Its source is near *'Ammân,* the ancient Rabbath-ammon, and after running first NE., then N., NW., W., finally bends SW. to enter the Jordan at a point about 25–30 miles N. of the Dead Sea. On almost the whole of its curved course of 60 miles it runs through a deep valley, and forms a natural boundary. On its curved upper reaches it may be said practically to bound the desert, while the deep gorge of its lower, straighter course divides the land of Gilead into two halves. The first reference, and probably the most famous, is Gn 32[22ff], the incident of Jacob's wrestling with the Angel, where there is an attempt at an assonance between the Hebrew word for 'to wrestle' and the name of this river. Elsewhere, Nu 21[24], Dt 2[37] 3[16], Jg 11[13, 22], it is mentioned as a boundary or frontier. E. W. G. M.—E. R. R.

JABESH.—Father of Shallum, who usurped the kingdom of Israel by the assassination of king Zechariah, 2 K 15[10, 13f].

JABESH, JABESH-GILEAD.—A town which appears in Jg 21[1–14], 1 S 11, 31[11–13], 2 S 2[4–7] 21[12] and 1 Ch 10[11f]. According to Eusebius, *Onomasticon,* it was a village on high ground 6 miles from Pella. It lies in the Jabesh (modern *Yabis*) valley which runs into the Jordan valley from the east. It is chiefly, if not solely, associated with the story of Saul. It was rescued by him from the Ammonites and thereby spared the disgraceful terms which Nahash their king would have imposed on its inhabitants (1 S 11). In gratitude the men of Jabesh-gilead rescued Saul's body from the Philistines (1 S 31[11–13] 2 S 21[12], 1 Ch 10[11f]), an act which earned the commendation of David (2 S 2[4]).

Jg 21[1–14] tells of an attack on Jabesh-gilead by the Israelites to provide wives for the Benjamites. It is thought to be a late story and to have included Jabesh-gilead because of the town's strong links with Saul. R. A. S. M.—L. H. B.

JABEZ.—**1.** A city in Judah occupied by scribes, the descendants of Caleb, 1 Ch 2[55]. The site is unknown.

2. A man of the family of Judah noted for his 'honourable' character, 1 Ch 4^{9f}; called *Ya'bēṣ*, which is connected by a word play *'ōṣebh*, 'pain.' In his vow (v.^{10}) there is again a play upon his name.

JABIN ('[God] perceives').—A Canaanite king who reigned in Hazor, a place near the Waters of Merom, not far from Kedesh. In the account in Jg 4, of the defeat of the two tribes of Zebulun and Naphtali of Jabin's host under Sisera, the former takes up quite a subordinate position. In another account (Jos 11^{1-9}) of this episode the victory of the two tribes is represented as a conquest of the whole of northern Canaan by Joshua. Both accounts, Jos 11^{1-9}, Jg 4, are fragments taken from an earlier, and more elaborate source; the Jabin in each passage is therefore one and the same person.

W. O. E. O.

JABNEEL.—1. A town on the N. border of Judah, near Mt. Baalah, and close to the sea (Jos 15^{11}). In 2 Ch 26^{6} it is mentioned under the name **Jabneh,** along with Gath and Ashdod, as one of the cities captured from the Philistines by Uzziah. Although these are the only OT references, it is frequently mentioned (under the name **Jamnia**) in the Books of Maccabees (1 Mac 4^{15} 5^{58} 10^{69} 15^{40}, 2 Mac $12^{8, 9, 40}$) and in Josephus. Judas is said to have burned its harbour; it was captured by Simon from the Syrians. It is mentioned in Jth 2^{28} (AV, RV **Jemnaan**). After various vicissitudes it was captured in the war of the Jews by Vespasian. After the destruction of Jerusalem, Jamnia became the home of the Sanhedrin. At the time of the Crusades the castle *Ibelin* stood on the site. To-day the village of *Yebnā* stands on the ruined remains of these ancient occupations. It stands 170 feet above the sea on a prominent hill S. of the *Wâdī Rubin*. The ancient *Majumas* or harbour of Jamnia lies to the west. 'The port would seem to be naturally better than any along the coast of Palestine S. of Caesarea' (Warren). **2.** A site on the N. boundary of Naphtali, Jos 19^{33}; possibly modern *Kh. Yemmā*.

E. W. G. M.

JABNEH.—See JABNEEL, **1.**

JACAN.—A Gadite chief, 1 Ch 5^{13} (AV **Jachan**).

JACHAN, 1 Ch 5^{13} (AV).—See JACAN.

JACHIN.—1. Fourth son of Simeon, Gn 46^{10}, Ex 6^{15}, Nu 26^{12}; called **Jarib** in 1 Ch 4^{24}. The patronymic **Jachinites** occurs in Nu 26^{12}. **2.** Eponym of a priestly family, 1 Ch 9^{10}, Neh 11^{10}.

JACHIN AND BOAZ.—These are the names borne by two brazen, or more probably bronze, pillars belonging to Solomon's Temple. They evidently represented the highest artistic achievement of their author, Hiram of Tyre, 'the half-Tyrian copper-worker, whom Solomon fetched from Tyre to do foundry work for him,' whose name, however, was more probably Huram-abi (2 Ch 2^{13}, RSV). The description of them now found in 1 K 7^{15-22} is exceedingly confused and corrupt, but with the help of the better preserved Greek text, and of other OT references (viz. 7^{41f}, 2 Ch 3^{15-17} 4^{12f}, and Jer 52^{21-23} =2 K 25^{17}), scholars have restored the text of the primary passage somewhat as follows:—

'And he cast the two pillars of bronze for the porch of the temple; 18 cubits was the height of the one pillar, and a line of 12 cubits could compass it about, and its thickness was 4 finger-breadths (for it was) hollow [with this cf Jer 52^{21}]. And the second pillar was similar. And he made two chapiters [*i.e.* capitals] of cast bronze for the tops of the pillars, etc. [as in RV]. And he made two sets of network to cover the chapiters which were upon the tops of the pillars, a network for the one chapiter and a network for the second chapiter. And he made the pomegranates; and two rows of pomegranates in bronze were upon the one network, and the pomegranates were 200, round about upon the one chapiter, and so he did for the second chapiter. And he set up the pillars at the porch of the temple,' etc. [as in v.^{21} RV].

The original description apparently consisted of three parts: the pillars, their capitals, and the ornamentation of the latter. The pillars themselves were hollow, with a thickness of metal equal to 3 inches of our measure; their height, on the basis of the larger cubit of 20½ inches (see Hastings' *DB* iv. 907^{a}), was about 31 feet, while their diameter works out at about 6½ feet. The capitals appear from 1 K 7^{41} to have been globular or spheroidal in form, each about 8½ feet in height, giving a total height for the complete pillars of roughly 40 feet. The ornamentation of the capitals was twofold: first they were covered with a specially cast **network** of bronze. Over this were hung festoon-wise two wreaths of bronze pomegranates, each row containing 100 pomegranates, of which it is probable that four were fixed to the network, while the remaining 96 hung free (see Jer 52^{23}).

As regards their position relative to the Temple, it may be regarded as certain that they were structurally independent of the Temple porch, and stood free in front of it—probably on plinths or bases—Jachin on the south and Boaz on the north (1 K 7^{21}), one on either side of the steps leading up to the entrance to the porch (cf Ezk 40^{49}). Such free-standing pillars were a common feature of temples in Syria, Phoenicia, and Cyprus, and beyond these areas east to Assyria, and west to the Phoenician colonies in the Mediterranean. The statements of classical authorities on this point have been confirmed by representations on Phoenician, Punic, and Etruscan seals, coins, and monuments.

Many proposals have been made concerning the original significance and purpose of the pillars. W. F. Albright has assembled a mass of evidence to support W. Robertson Smith's suggestion that the pillars were huge cressets or fire-altars, in which the 'suet of the sacrifices' was burned. Cf his *RS* (1894), pp. 487–490; Albright, *ARI*, pp. 144 ff. As to the names 'Jachin' and 'Boaz,' R. B. Y. Scott has offered a convincing explanation of their meaning, in *JBL*, lviii (1939), 143–149. He interprets the names as the first words of dynastic oracles inscribed in whole or part on the pillars, thus linking the Temple with the widely attested royal cult in Jerusalem. We may note the many passages in the historical and poetical books (including Prophets and Psalms) dealing with the special relationship between David and his house and Yahweh; moreover the Temple functioned both as national cult centre and more particularly as the royal chapel (cf the description of the Temple at Bethel in Am 7^{13}). Scott suggests the following wording for the oracles: Jachin—'Yahweh will establish (*yākhîn*) the throne of David and his kingdom to his seed forever' (*op. cit.*, p. 148); while Albright reads, 'Yahweh will establish thy throne for ever' (*ARI*, p. 139); Boaz—'In the strength (*bᵉ'az*) of Yahweh shall the king rejoice (Scott, *op. cit.*, p. 149; likewise Albright, *ARI*, p. 139).

A. R. S. K.—D. N. F.

JACINTH.—See JEWELS AND PRECIOUS STONES.

JACKAL.—The Bedouin of Palestine, though aware of the differences between jackals and foxes, habitually confused them in speech; and the Hebrew and Arabic names were apparently used indiscriminately. **1.** The Arabic *thaʿᵃla* 'was numerous, formed a numerous party; had an excess of teats, teeth' might apply to either beast; for the jackal normally hunts in packs, while the vixen has six pairs of teats against from three to five in the female jackal. Contrariwise the Arabic *thaʿalala* 'was cowardly; turned quickly away to right or to left' is especially applicable to the fox (cf Lat. *vulpinari* 'to follow a tortuous course'). Both the jackal (*canis aureus*) and the fox (*vulpes flavescens* in the north and *vulpes niloticus* in the south) are common in Palestine. The Hebrew *shûʿāl*=Arabic *thuʿâlu* 'fox' (cf Pers. *šaǧâl* 'jackal') is generally translated in the EV 'fox,' but also occasionally 'jackal' (RVm at Jg 15^{4}, Neh 4^{3}, Ps 63^{10}, La 5^{18} and RSV at Ps 63^{10}, La 5^{18}) and ought probably always to be rendered **'jackal,'** which alone suits all passages. Both animals feed on grapes and other fruit (Ca 2^{15}), occupy burrows (Mt

8^{20}), haunt ruins and waste places (La 5^{18}), make their way through holes into walled cities (Neh 4^{3}; cf Tristram *Natural History of the Bible*[2], 110–111), and are proverbially cunning and sly (Ezk 13^{4}, Lk 13^{32}); but only the jackal hunts in packs (Jg 15^{4}) and preys on dead bodies (Ps 63^{11}), so that Bedouin still talk of throwing an enemy's dead body to the jackals as a final insult.

2. An obvious onomatopoeic root for howling (Egyptian ʒw 'lamented' and ʒwʒw 'wailed'; Arabic *'awā* 'moaned') underlies the Hebrew *'îy* '**jackal**' (Egyptian ʒw and ʒwʒw, kind of dog; Arabic *ibn 'âwā* 'son of howling' and *wâwî* 'howler'='jackal'), so that the meaning is philologically well established; and the secondary Arabic *'awā* I 'resorted' (whence the Heb. *'îy* 'coast-land; island' is derived) and VI 'congregated together' confirms the identification, since jackals hunt in packs. The ancient translators did not understand the word, and modern translators offer various renderings, *e.g.* 'wild beasts of the island(s)' (AV), 'wolves' (RV) or 'howling creatures' (RVm); all are as unsatisfactory as a recent attempt to revive the LXX's 'demons' (Is 34^{14}) and translate it 'goblins' as the *jinn* populating unknown coasts and islands (Torrey, *Second Isaiah*, 290–291) is unconvincing, if the accompanying beasts are taken as real, not mythical, creatures. The habits of the *'îy*, too, are those of the jackal; it haunts desolate Edom (Is 34^{14}) and the ruins of Babylon (Is 13^{22}, Jer 50^{39}), just as packs of jackals still haunt the desolate ravines of the Dead Sea and howl all night in the ruins of Baʿalbek (Tristram *op. cit.* 109). RSV renders by 'jackal' in Jer 50^{39} and '**hyena**' in Is 13^{22} 34^{14}.

3. The root *tnn* 'to coil, be spiral' seems to lie behind the Hebrew *tannîn* '(poisonous) serpent; (mythical) dragon, sea-monster; water-spout'; but what the Hebrew *tan*, which must be carefully distinguished from *tannîn* (though often confused with it in the MT), means is hard to say. The Greek translators had no tradition, having 'siren,' 'dragon,' 'bird,' 'ostrich,' and once 'lion' (Theodotion at Mic 1^{8}); Jerome has 'goblins' (La 4^{3}, *lamiae*), 'sirens,' and 'dragons,' while the Peshitta and Targum almost always have *yārôrâ*, of which the meaning is uncertain. The AV has 'dragons,' for which the RV and RSV generally substitute 'jackals.' The *tan* haunts desolate places (Is 34^{13} 35^{7} 43^{20}, Jer 9^{10} 10^{22} 49^{33} 51^{37}), of which it is a symbolical denizen (Ps 44^{20}, Job 30^{29}), and mourns or wails like the desert owl (Mic 1^{8}). If the Arabic *tînânu* 'wolf' could be compared, this might be accepted as the meaning of the Hebrew word (Pococke); but the comparison is philologically inadmissible (Torrey, *op. cit.* 288–289). If the basic sense of the root *tnn* is pressed, either the jackal or fox from its tortuous course or the owl from its wavy flight may be meant; but the fact that only the plural form of the word occurs is against a solitary creature like the fox. Further, both it and the jackal have other names (*v. supra*). If however the Arabic *tinnu* 'companion' is any guide, the Hebrew *tannîm* 'companions' may designate '**wolves**'; these in search of prey *procedunt gemini ceu foedere iuncto hiberna sub nocte lupi* (Statius, *Achilleis* i. 704–705). This habit is recorded also of the large Syrian wolf (Tristram, *Natural History of the Bible*[2], 153–154; cf *Fauna and Flora of Palestine*, 20–21) and tells at the same time against the jackal, which hunts not in pairs but in packs of 200 or 300 beasts. The wolf by day lurks amongst rocks in desolate plains and wild ravines and by night comes out to prowl round the sheepfolds; and it howls in characteristic fashion. That 'the jackals give the breast' (La 4^{3}, RV and RSV) is absurd, and *tannîm* must be an error for *tannînîm* 'sea-monsters' (AV), *i.e.* whales or porpoises, whose two teats are hidden in a subcutaneous pouch from which, when swollen with milk, they are extruded and uncovered, so that the young can suck them (Aharoni).

4. Clearly the Hebrew *'ōaḥ* '**doleful creature**' (AV, RV) is an onomatopoeic term denoting some creature which makes a coughing, raucous, or rustling sound (cf Heb. *'āḥ* 'ah!,' Arab. *'aḥâḥa* 'cried alas!', and *'aḥḥa* 'coughed'; also *'aḥîḥu* 'rustling noise' made by water-fowl passing through parted reeds). It is mentioned only once in connexion with ruined Babylon (Is 13^{21}), but its meaning has long been lost; the versions have 'echoes' or 'cries' (LXX, Theodotion, Aquila) or 'dragons' (Vulgate) or 'wild beasts' (Peshitta; cf Targum), which throw no light on it. Also 'owl' possibly 'eagle-owl' has been suggested; but enough names for owls are already known (see OWL), and the name does not seem to indicate anything that hoots. It equally does not suggest 'jackal, wolf' (Delitzsch, *Hebrew Language*, 33–34) or '(laughing) hyaena' (Houghton in *TSBA* v, 328), which howl; and an Assyrian *aḫû* 'wolf, jackal, hyaena' cited in support of them rests on a misunderstanding. If coughing is pressed, the proverb that 'the cough of the fox leads to the grave' (Bochart & Rosenmüller, *Hierozoicon*, ii, 190–191) springs to the mind; but this alone is hardly enough to support the identification. The 'leopard,' too, coughs as it springs on the prey; but it like the fox does not haunt ruins, and 'their houses are full of foxes' or 'leopards' is an unlikely figure of speech. Further, several other words for both fox (see FOX) and leopard (see LEOPARD) occur. Alternatively, the '**porcupine**' may be meant; for this may have got its name from its habit of rustling or rattling its quills and vibrating its tail *rauco fragore* (Claudian, *de hystrice*, 25–26). It emerges from its hole only at night and shuns man, so that it will easily have become a symbol of desolation; also, as the prophet says that 'Babylon . . . shall be as when God overthrew Sodom and Gomorrah' (Is 13^{19}), it is singularly suitable in the picture, inasmuch as it abounds round the Dead Sea, being one of the few mammals which do not require water (Tristram, *Natural History of the Bible*[2], 125–126). The only other possibility is that the word describes not a living creature but 'weird noises' as some versions suggest (Zorell).

5. The Hebrew *ṣîyîm*, if connected with *ṣîyāh* 'parched land,' may *a priori* denote 'inhabitants of the wilderness' or the like (AV, RV, RSV); but a particular rather than a general term is required for a creature regarded as a symbol of desolation (Is 13^{21} 23^{13} 34^{14}, Jer 50^{39}). The VSS have various unsatisfactory renderings, including 'sirens' (LXX at Jer 50^{39}) and 'demons' (LXX at Is 23^{13}), which though equally unsuitable has recently been revived (Torrey, *op. cit.* 289); clearly the ancient translators had no tradition of its meaning. Bochart's 'wild cat' (cf Arabic *ḍaiwanu*, 'wild cat') is philologically impossible, although this is common enough in Palestine. Possible roots for the Hebrew word may be found in the Arabic *ṣawā* 'squeaked' (cf Aramaic *ṣawwe* and Arab. *ḍauḍā* 'shrieked') and *ṣawiya* 'was strong,' *ḍawâ* 'came by night' and *ḍawiya* 'was slender.' Ewald's 'jackal,' as a beast that howls, is unlikely, since it already has other names. Possibly the '**marmot**' (*spermophilus xanthoprimnus*) may be meant; this when alarmed emits a loud shrill whistling sound or shriek and is exceedingly abundant in the stony uplands of Gilead and Moab, burrowing often in the neighbourhood of ruins (Tristram, *Fauna and Flora of Palestine*, 15; cf Jerome *ap.* Migne, *Patrologia Latina* xxii, 861–862). Whether the Assyrian *ṣîtu*, the name of a creature which injures crops and fruit, is the same word is not clear.

In Ps 74^{14} *ṣîyîm* is rendered by 'people inhabiting the wilderness' in AV and RV, but the statement that Leviathan was given 'to be meat to the people inhabiting the wilderness,' which is a grammatically impossible translation, may be corrected to read 'to the monsters of the sea,' *i.e.* the sharks (Löw, *DLZ* [N.F.] xxii, 1055, reading *lᵉʿamlᵉṣê yām* for *lᵉʿam lᵉṣîyîm*). In Ps 72^{9} *ṣîyîm* again is not 'they that inhabit the wilderness' (RV, RSVm), but 'Ethiopians' (so LXX, Vulgate), the 'tallest and most beautiful' of men (Herodotus, *Hist.* iii. 20; cf Is $18^{2,7}$), as the Arabic verb quoted above (**5**) suggests.

G. R. D.

JACOB.—1. Son of Isaac and Rebekah. His name is probably an elliptical form of an original *Jakob'el*,

'God follows' (*i.e.* 'rewards'), which has been found both on Babylonian tablets and on the pylons of the temple of Karnak. By the time of Jacob this earlier history of the word was overlooked or forgotten, and the name was understood as meaning 'one who takes by the heel, and thus tries to trip up or supplant' (Gn 25^{26} 27^{36}, Hos 12^{3}). His history is recounted in Gn 25^{21}–50^{13}, the materials being unequally contributed from three sources. P supplies but a brief outline; J and E are closely interwoven, though a degree of original independence is shown by an occasional divergence in tradition, which adds to the credibility of the joint narrative.

Jacob was born in answer to prayer (25^{21}), near Beersheba; and the later rivalry between Israel and Edom was thought of as prefigured in the strife of the twins in the womb (25^{22f}, 2 Es 3^{16} 6^{8-10}, Ro 9^{11-13}). The differences between the two brothers, each contrasting with the other in character and habit, were marked from the beginning. Jacob grew up a 'quiet man' (Gn 25^{27}), a shepherd and herdsman. Whilst still at home, he succeeded in overreaching Esau in two ways. He took advantage of Esau's hunger and heedlessness to secure the birthright, which gave him precedence even during the father's lifetime (43^{33}), and afterwards a double portion of the patrimony (Dt 21^{17}), with probably the domestic priesthood. At a later time, after careful consideration (Gn 27^{11ff}), he adopted the device suggested by his mother, and, allaying with ingenious falsehoods (27^{20}) his father's suspicion, intercepted also his blessing. Isaac was dismayed, but instead of revoking the blessing confirmed it (27^{33-37}), and was not able to remove Esau's bitterness. In both blessings later political and geographical conditions are reflected. To Jacob is promised Canaan, a well-watered land of fields and vineyards (Dt 11^{14} 33^{28}), with sovereignty over its peoples, even those who were 'brethren' or descended from the same ancestry as Israel (Gn 19^{37f}, 2 S $8^{12, 14}$). Esau is consigned to the dry and rocky districts of Idumaea, with a life of war and plunder; but his subjection to Jacob is limited in duration (2 K 8^{22}), if not also in completeness (Gn 27^{40f}, which points to the restlessness of Edom).

Of this successful craft on Jacob's part the natural result on Esau's was hatred and resentment, to avoid which Jacob left his home to spend a few days (27^{44}) with his uncle in Haran. Two different motives are assigned. JE represents Rebekah as pleading with her son his danger from Esau; but P represents her as suggesting to Isaac the danger that Jacob might marry a Hittite wife (27^{46}). The traditions appear on literary grounds to have come from different sources; but there is no real difficulty in the narrative as it stands. Not only are man's motives often complex; but a woman would be likely to use different pleas to a husband and to a son, and if a mother can counsel her son to yield to his fear, a father would be more alive to the possibility of an outbreak of folly. On his way to Haran, Jacob passed a night at Bethel (cf 13^{3f}), and his sleep was, not unnaturally, disturbed by dreams; the cromlechs and stone terraces of the district seemed to arrange themselves into a ladder reaching from earth to heaven, with angels ascending and descending, whilst Yahweh Himself bent over him (28^{13} RSVm) with loving assurances. Reminded thus of the watchful providence of God, Jacob's alarms were transmuted into religious awe. He marked the sanctity of the spot by setting up as a sacred pillar the boulder on which his head had rested, and undertook to dedicate a tithe of all his gains. Thenceforward Bethel became a famous sanctuary, and Jacob himself visited it again (35^{1}; cf Hos 12^{4}).

Arrived at Haran, Jacob met in his uncle his superior for a time in the art of overreaching. By a ruse Laban secured fourteen years' service (29^{27}, Hos 12^{12}, Jth 8^{26}), to which six years more were added, under an ingenious arrangement in which the exacting uncle was at last outwitted (30^{31ff}). At the end of the term Jacob was the head of a household conspicuous even in those days for its magnitude and prosperity. Quarrels with Laban and his sons ensued, but God is represented as intervening to turn their arbitrary actions (31^{7ff}) to Jacob's advantage. At length he took flight whilst Laban was engaged in sheep-shearing, and, re-crossing the Euphrates on his way home, reached Gilead. There he was overtaken by Laban, whose exasperation was increased by the fact that his *teraphim*, or household gods, had been taken away by the fugitives, Rachel's hope in stealing them being to make Jacob the heir of her father. The dispute that followed was closed by an alliance of friendship, the double covenant being sealed by setting up in commemoration a cairn with a solitary boulder by its side ($31^{45f, 52}$), and by sharing a sacrificial meal. Jacob promised to treat Laban's daughters with special kindness, and both Jacob and Laban undertook to respect the boundary they had agreed upon between the territories of Israel and of the Syrians. Thereupon Laban returned home; and Jacob continued his journey to Canaan, and was met by the angels of God (32^{1}), as if to congratulate and welcome him as he approached the Land of Promise.

Jacob's next problem was to conciliate his brother, who was reported to be advancing against him with a large body of men (32^{6}). Three measures were adopted. When a submissive message elicited no response, Jacob in dismay turned to God, though without any expression of regret for the deceit by which he had wronged his brother, and proceeded to divide his party into two companies, in the hope that one at least would escape, and to try to appease Esau with a great gift. The next night came the turning-point in Jacob's life. Hitherto he had been ambitious, steady of purpose, subject to genuine religious feeling, but given up almost wholly to the use of crooked methods. Now the higher elements in his nature gain the ascendancy; and henceforth, though he is no less resourceful and politic, his fear of God ceases to be spoilt by intervening passions or a competing self-confidence. Alone on the banks of the Jabbok (*Wâdī Zerkā*), full of doubt as to the fate that would overtake him, he recognizes at last that his real antagonist is not Esau but God. All his fraud and deceit had been pre-eminently sin against God; and what he needed supremely was not reconciliation with his brother, but the blessing of God. So vivid was the impression, that the entire night seemed to be spent in actual wrestling with a living man. His thigh was sprained in the contest; but since his will was so fixed that he simply would not be refused, the blessing came with the daybreak (32^{28}). His name was changed to *Israel*, which means etymologically 'God perseveres,' but was applied to Jacob in the sense of 'Perseverer with God' (Hos 12^{3f}). And as a name was to a Hebrew a symbol of nature (Is 1^{26} 61^{3}), its change was a symbol of a changed character; and the supplanter became the one who persevered in putting forth his strength in communion with God, and therefore prevailed. His brother received him cordially (33^{4}), and offered to escort him during the rest of the journey. The offer was courteously declined, ostensibly because of the difference of pace between the two companies, but probably also with a view to incur no obligation and to risk no rupture. Esau returned to Seir; and Jacob moved on to a suitable site for an encampment, which received the name of Succoth, from the booths that were erected on it (33^{17}). It was east of the Jordan, and probably not far from the junction with the Jabbok. The valley was suitable for the recuperation of the flocks and herds after so long a journey; and it is probable, from the character of the buildings erected, as well as from the fact that opportunity must be given for Dinah, one of the youngest of the children (30^{21}), to reach a marriageable age (34^{2ff}), that Jacob stayed there for several years.

After a residence of uncertain length at Succoth, Jacob crossed the Jordan and advanced to **Shechem**, where he purchased a plot of ground which became afterwards of special interest. Joshua seems to have regarded it as the limit of his expedition, and there the Law was promulgated and Joseph's bones were buried (Jos $24^{25, 32}$; cf Ac 7^{16}); and for a time it was the centre

of the confederation of the northern tribes (1 K 12[1], 2 Ch 10[1]). Again Jacob's stay must not be measured by days; for he erected an altar (33[20]) and dug a well (Jn 4[6, 12]), and was detained by domestic troubles, if not of his own original intention. The troubles began with the seduction or outrage of Dinah; but the narrative that follows is evidently compacted of two traditions. According to the one, the transaction was personal, and involved a fulfilment by Shechem of a certain unspecified condition; according to the other, the entire clan was involved on either side, and the story is that of the danger of the absorption of Israel by the local Canaanites and its avoidance through the interposition of Simeon and Levi. But most of the difficulties disappear on the assumption that Shechem's marriage was, as was natural, expedited, a delight to himself and generally approved amongst his kindred (34[19]). That pressing matter being settled, the question of an alliance between the two clans, with the sinister motives that prevailed on either side, would be gradually, perhaps slowly, brought to an issue. There would be time to persuade the Shechemites to consent to be circumcised, and to arrange for the treacherous reprisal. Jacob's part in the proceedings was confined chiefly to a timid reproach of his sons for entangling his household in peril, to which they replied with the plea that the honour of the family was the first consideration.

The state of feeling aroused by the vengeance executed on Shechem made it desirable for Jacob to continue his journey. He was directed by God to proceed some twenty miles southwards to Bethel. Before starting, due preparations were made for a visit to so sacred a spot. The amulets and images of foreign gods in the possession of his retainers were collected and buried under a terebinth (35[4]; cf Jos 24[26], Jg 9[6]). The people through whom he passed were smitten with such a panic by the news of what had happened at Shechem as not to interfere with him. Arrived at Bethel, he added an altar (35[7]) to the monolith he had erected on his previous visit, and received in a theophany, for which in mood he was well prepared, a renewal of the promise of regal prosperity. The additional pillar he set up (35[14]) was probably a sepulchral stele to the memory of Deborah (cf 35[20]), dedicated with appropriate religious services; unless the verse is out of place in the narrative, and is really J's version of what E relates in 28[18]. From Bethel Jacob led his caravan to Ephrath, a few miles from which place Rachel died in childbirth. This Ephrath was evidently not far from Bethel, and well to the north of Jerusalem (1 S 10[2f], Jer 31[15]); and therefore the gloss 'the same is Bethlehem' must be due to a confusion with the other Ephrath (Ru 4[11], Mic 5[2]), which was S. of Jerusalem. The next stopping-place was the tower of Eder (35[21]) or 'the flock'—a generic name for the watch-towers erected to aid in the protection of the flocks from robbers and wild beasts. Mic 4[8] applies a similar term to the fortified southern spur of Zion. But it cannot be proved that the two allusions coalesce; and actually nothing is known of the site of Jacob's encampment, except that it was between Ephrath and Hebron. His journey was ended when he reached the last-named place (35[27]), the home of his fathers, where he met Esau again, and apparently for the last time, at the funeral of Isaac.

From the time of his return to Hebron, Jacob ceases to be the central figure of the Biblical narrative, which thenceforward revolves round Joseph. Among the leading incidents are Joseph's mission to inquire after his brethren's welfare, the inconsolable sorrow of the old man on the receipt of what seemed conclusive evidence of Joseph's death, the despatch of his surviving sons except Benjamin to buy corn in Egypt (cf Ac 7[12ff]), the bitterness of the reproach with which he greeted them on their return, and his belated and despairing consent to another expedition as the only alternative to death from famine. The story turns next to Jacob's delight at the news that Joseph is alive, and to his own journey to Egypt through Beersheba, his early home, where he was encouraged by God in visions of the night (46[1–7]). In Egypt he was met by Joseph, and, after an interview with the Pharaoh, settled in the pastoral district of Goshen (47[6]), afterwards known as 'the land of Rameses' (from Rameses II. of the 19th Dynasty), in the eastern part of the Delta (47[11]). This migration of Jacob to Egypt was an event of the first magnitude in the history of Israel (Dt 26[5f], Ac 7[14f]), as a stage in the great providential preparation for Redemption. Jacob lived in Egypt seventeen years (47[28]), at the close of which, feeling death to be nigh, he extracted a pledge from Joseph to bury him in Canaan, and adopted his two grandsons, placing the younger first in anticipation of the pre-eminence of the tribe that would descend from him (48[19], He 11[21]). To Joseph himself was promised, as a token of special affection, the conquered districts of Shechem on the lower slopes of Gerizim (48[22], Jn 4[5]). Finally, the old man gathered his sons about him, and pronounced upon each in turn a blessing, afterwards wrought up into the elaborate poetical form of 49[2–27]. The tribes are reviewed in order, and the character of each is sketched in a description of that of its founder. The atmosphere of the poem in regard alike to geography and to history is that of the period of the judges and early kings, when, therefore, the genuine tradition must have taken the form in which it has been preserved. After blessing his sons, Jacob gave them together the directions concerning his funeral which he had given previously to Joseph, and died (49[33]). His body was embalmed, convoyed to Canaan by a great procession according to the Egyptian custom, and buried in the cave of Machpelah near Hebron (50[13]).

Opinion is divided as to the degree to which Jacob has been idealized in the Biblical story. If it be remembered that the narrative is based upon popular oral tradition, and did not receive its present form until long after the time to which it relates, and that an interest in national origins is both natural and distinctly manifested in parts of Genesis, some idealization may readily be conceded. It may be sought in three directions—in the attempt to find explanations of existing institutions, in the anticipation of religious conceptions and sentiments that belonged to the narrator's times, and in the investment of the reputed ancestor with the characteristics of the tribe descended from him. All the conditions are best met by the view that Jacob was a real person, and that the incidents recorded of him are substantially historical. His character, as depicted, is a mixture of evil and good; and his career shows how, by discipline and grace, the better elements came to prevail, and God was enabled to use a faulty man for a great purpose.

2. Father of Joseph, the husband of Mary (Mt 1[15f]).

R. W. M.

JACOB'S WELL.—See SYCHAR.

JACUBUS, 1 Es 9[48] (AV, RV).—See AKKUB, **4.**

JADA.—A Jerahmeelite, 1 Ch 2[28, 32].

JADAU, Ezr 10[43] (AV).—See IDDO, **3.**

JADDUA.—**1.** One of those who sealed the covenant, Neh 10[21]. **2.** A high priest, Neh 12[11, 22]. He is doubtless the Jaddua who is named by Josephus in connexion with Alexander the Great (Jos. *Ant.* XI. viii. 4 [326]).

JADDUS.—A priest whose descendants were unable to trace their genealogy at the return under Zerubbabel, and were removed from office, 1 Es 5[38] (AV **Addus**). He is said to have married Agia (AV, RV Augia), a daughter of Barzillai (AV Berzelus, RV Zorzelleus). In Ezr 2[61], Neh 7[63] he is called **Barzillai.**

JADON.—A Meronothite (q.v.), who took part in rebuilding the wall of Jerusalem, Neh 3[7]. According to Josephus (*Ant.* VIII. viii. 5 [231], ix. 1 [241]), Jadon was the name of the man of God sent from Judah to Jeroboam (1 K 13). Rabbinic tradition identifies the prophet from Judah with Iddo, **6** (cf 2 Ch 9[29]).

JAEL.—The wife of Heber, the Kenite (Jg 4[11, 17] 5[24]), is celebrated both in prose (Jg 4[17–22]) and in poetry (Jg 5[24–27]) as the heroine who disposed of Sisera, the commander of Jabin's Canaanite forces, when he fled

after his army was defeated by the Israelites under Barak at the R. Kishon.

The prose version gives details lacking in the poem where there is no mention of Sisera's going inside Jael's tent (Jg 4^{18ff}), nor of his murder taking place while he is asleep (4^{21}), nor of Barak arriving and being asked inside to see the result of Jael's action.

The poetical version (part of the 'Song of Deborah,' and so probably contemporary) concentrates on the two main actions, viz. the giving of special hospitality, and Jael's adroit seizing of the tent-peg and mallet to give the blow that brings Sisera to his knees to meet his death, as she shattered his head, 'pierced, spilled out his brains' (so C. A. Simpson for the RSV 'and pierced his temple,' v.^{26b}). The fall of Sisera was complete at Jael's feet (literally 'between her feet').

The question of whether the scene of the murder was inside the tent or outside; or whether Sisera is lying asleep or standing drinking, as the poem seems to suggest, is not readily solved. In the poem (v.^{24}) Jael is described as 'of tent-dwelling women' (literally 'from women in the tent'; RV 'above women in the tent'), and it may be that this phrase 'in the tent' has determined the later prose writer's account.

The ascription of Jg 5^{24} 'most blessed of women be Jael' is in keeping with the tense emotional enthusiasm of victory evident in the rest of the poem, that Israel was released from 'being oppressed cruelly' by Jabin (Jg 4^{3}).

In Jg 5^{6} the words 'in the days of Jael' are clearly a gloss intended to act as a preface to the later verses about Jael whose tent was possibly some 5 or 6 miles from the scene of the battle, cf Jg 4^{11}. The Kenites had been traditionally friendly to the Israelites, cf Jg 1^{16}.

R. A. B.

JAGUR.—A town in the extreme south of Judah, Jos 15^{21}. The site is unknown.

JAH.—Short form of Yahweh (see GOD, **4** [*c*]), found in Ps 68^{4} (AV, RV) 89^{8} (RV), and Ex 15^{2}, Is 12^{2} 26^{4} (all RVm).

JAHATH.—**1.** A grandson of Judah, 1 Ch 4^{2}. **2.** A great-grandson of Levi, 1 Ch $6^{20, 43}$. **3.** A son of Shimei, 1 Ch 23^{10}. **4.** One of the 'sons' of Shelomoth, 1 Ch 24^{22}. **5.** A Merarite Levite in the time of Josiah, 2 Ch 34^{12}.

JAHAZ.—A town at which Sihon was defeated by Israel, Nu 21^{23}, Dt 2^{32}, Jg 11^{20}. After crossing the Arnon, messengers were sent to Sihon from 'the wilderness of Kedemoth,' Dt 2^{26}, and he 'went out against Israel to the wilderness and came to Jahaz,' Nu 21^{23}. Jahaz is mentioned in connexion with Kedemoth, Jos 13^{18} (AV **Jahaza**) 21^{36f} (AV **Jahazah**). These passages indicate a position for Jahaz in the SE. portion of Sihon's territory. Jahaz was one of the Levitical cities of Reuben belonging to the children of Merari, Jos 13^{18} 21^{36} (see note in RVm), 1 Ch 6^{78} (here called **Jahzah**). According to the Moabite Stone (ll. 18–20), the king of Israel dwelt at Jahaz while at war with king Mesha, but was driven out, and the town was taken and added to Moabite territory. It was later in the possession of Moab, Is 15^{4}, Jer 48^{21} (AV **Jahazah**; RV, RSV **Jahzah**),^{34}. Various identifications have been proposed, but the location is uncertain.

JAHAZA.—Jos 13^{18} (AV).—See JAHAZ.

JAHAZAH.—Jos 21^{36}, Jer 48^{21} (AV).—See JAHAZ.

JAHAZIEL.—**1.** A Benjamite who joined David at Ziklag, 1 Ch 12^{4}. **2.** One of the two priests who blew trumpets before the Ark when it was brought by David to Jerusalem, 1 Ch 16^{6}. **3.** A Kohathite Levite, 1 Ch 23^{19} 24^{23}. **4.** An Asaphite Levite who encouraged Jehoshaphat and his army against an invading host, 2 Ch 20^{14}. **5.** The ancestor of a family of exiles who returned, Ezr 8^{5}, 1 Es 8^{32} (AV, RV **Jezelus**).

JAHDAI.—A Calebite, 1 Ch 2^{47}.

JAHDIEL.—A Manassite chief, 1 Ch 5^{24}.

JAHDO.—A Gadite, 1 Ch 5^{14}.

JAHLEEL.—Third son of Zebulun, Gn 46^{14}, Nu 26^{26}; patronymic, **Jahleelites**, Nu 26^{26}.

JAHMAI.—A man of Issachar, 1 Ch 7^{2}.

JAHZAH.—See JAHAZ.

JAHZEEL.—Naphtali's firstborn, Gn 46^{24}, Nu 26^{48}; called **Jahziel** in 1 Ch 7^{13}; patronymic, **Jahzeelites**, Nu 26^{48}.

JAHZEIAH.—One of four men who are mentioned as opposing (so RV, RSV) Ezra in the matter of the foreign wives, Ezr 10^{15}. The AV regarded Jahzeiah and his companions as supporters of Ezra, rendering 'were employed about this matter.' This view is supported by LXX, 1 Es 9^{14} (RSV; AV **Ezechias**, RV **Ezekias**); but the Hebrew phrase here found elsewhere (cf 1 Ch 21^{1}, 2 Ch 20^{23}, Dn 11^{14}) expresses *opposition*.

JAHZERAH.—A priest, 1 Ch 9^{12}; called **Ahzai**, Neh 11^{13} (AV **Ahasai**).

JAHZIEL.—See JAHZEEL.

JAIR.—**1.** Eponym of a clan of Manasseh who lived on the E. of Jordan, Nu 32^{41}, Du 3^{14}, Jos 13^{30}, 1 K 4^{13}. The settlement of this clan marks a subsequent conquest to that of the W. of the Jordan. The gentilic **Jairite** is used for Ira, 2 S 20^{26}. **2.** One of the minor Judges, Jg 10^{3ff}. The 'villages of Jair' (see HAVVOTH-JAIR), which are said to have been taken by **1**, were occupied by his sons, who equalled them in number. It is possible that there is some confusion between **1** and **2**. **3.** The father of Mordecai, Est 2^{5}. **4.** The father of Elhanan, 1 Ch 20^{5}. See ELHANAN, JAARE-OREGIM.

JAIRUS (=**Jair**).—This Greek form of the name is used in the Apocrypha (Ad. Est 11^{2}) for Mordecai's father **Jair** (Est 2^{5}); and in 1 Es 5^{31} (RV; AV **Airus**, RSV **Reaiah**; see REAIAH, **3**) for the head of a family of Temple servants. In NT it is the name of the ruler of the synagogue whose daughter Jesus raised from the dead (Mk 5^{22}, Lk 8^{41}). In || Mt (9^{18}) he is not named.

A. J. M.

JAKAN, 1 Ch 1^{42} (AV).—See JAAKAN.

JAKEH.—Father of Agur, the author of the proverbs contained in Pr 30.

JAKIM.—**1.** A Benjamite, 1 Ch 8^{19}. **2.** A priest, head of the 12th course, 1 Ch 24^{12}.

JALAM.—A 'son' of Esau, Gn $36^{5, 14, 18}$, 1 Ch 1^{35} (AV **Jaalam** in all places).

JALON.—A Calebite, 1 Ch 4^{17}.

JAMBRES.—See JANNES AND JAMBRES.

JAMBRI.—The name of an Arab group near Medeba who slew John the Maccabee and took as booty the cattle he was leading for safety into Nabataean territory, an outrage which was avenged by Simon and Jonathan, who slaughtered these 'sons of Jambri' (probably *Banu Amri*) as they were returning from a wedding celebration (1 Mac 9^{35-42}).

A. J.

JAMES.—**1. James, the son of Zebedee**, one of the Twelve, the elder brother of John. Their father was a Galilaean fisherman, evidently in a thriving way, since he employed 'hired servants' (Mk 1^{20}). Their mother was Salome, and, since she was apparently a sister of the Virgin Mary (cf Mt 27^{56}=Mk 15^{40} with Jn 19^{25}), they were cousins of Jesus after the flesh. Like his brother, James worked with Zebedee in partnership with Simon and Andrew (Lk 5^{10}), and he was busy with boat and nets when Jesus called him to leave all and follow Him (Mt 4^{21f}=Mk 1^{19f}). His name is coupled with John's in the lists of the Apostles (Mt 10^{2}=Mk 3^{17}=Lk 6^{14}), which means that, when the Twelve were sent out two by two to preach the Kingdom of God (Mk 6^{7}), they went in company. And they seem to have been men of like spirit. They got from Jesus the same appellation, 'the Sons of Thunder' (see BOANERGES), and they stood, with Simon Peter, on terms of special intimacy with Him. James attained less distinction than his brother, but the reason is not that he had less devotion or aptitude, but that his life came to an untimely end. He was martyred by Herod Agrippa (Ac 12^{2}).

2. James, the son of Alphaeus (sometimes identified with **Clopas** of Jn 19[25]), styled 'the Little' or 'the Younger' (not 'the Less'), probably on account of the shortness of his stature, to distinguish him from the other Apostle James, the son of Zebedee. He had a brother Joses, who was apparently a believer. See Mk 15[40], Jn 19[25], Mk 16[1].

3. James, the Lord's brother (see BRETHREN OF THE LORD). Like the rest of the Lord's brethren, James did not believe in Him while He lived, but acknowledged His claims after the Resurrection. He was won to faith by a special manifestation of the risen Lord (1 Co 15[7]). Thereafter he rose to high eminence. He was the head of the Church at Jerusalem, and figures in that capacity on three occasions. (1) Three years after his conversion Paul went up to Jerusalem to interview Peter, and, though he stayed for fifteen days with him, he saw no one else except James (Gal 1[18f]). So soon did James's authority rival Peter's. (2) After an interval of fourteen years Paul went up again to Jerusalem (Gal 2[1-10]). This was the occasion of the historic conference regarding the terms on which the Gentiles should be admitted into the Christian Church; and James acted as president, his decision being unanimously accepted (Ac 15[4-34]). (3) James was the acknowledged head of the Church at Jerusalem, and when Paul returned from his third missionary journey he waited on him and made a report to him in presence of the elders (Ac 21[18-19]).

According to extra-canonical tradition, James was surnamed 'the Just'; he was a Nazirite from his mother's womb, abstaining from strong drink and animal food, and wearing linen; he was always kneeling in intercession for the people, so that his knees were callous like a camel's; he was cruelly martyred by the Scribes and Pharisees; they cast him down from the pinnacle of the Temple (cf Mt 4[5], Lk 4[9]), and as the fall did not kill him they stoned him, and he was finally despatched with a fuller's club.

4. James, the father of the Apostle Judas (Lk 6[16] RSV), otherwise unknown. The AV 'Judas the *brother* of James' is an impossible identification of the Apostle Judas with the author of the Epistle (Jd [1]).

D. S.—O. J. F. S.

JAMES, THE EPISTLE OF.—1. The author is described as 'James, a servant of God and of the Lord Jesus Christ' (1[1]). Since the name (in Gr. *Jakōbos*) was common among Jews, appearing twice in lists of the Twelve (Mt 10[2f], Mk 3[17f], Lk 6[14f], Ac 1[13]), and 'servant of God' is capable of general application, this description suffers from ambiguity which the Epistle fails to relieve. However, since the 3rd cent., ecclesiastical tradition has tended to assign it to the Lord's brother (see JAMES, 3). Origen (*c* 185–254), the earliest writer to quote it by name, according to the Latin version of his *Homilies* referred to its author as both Apostle and brother of the Lord. In spite of such attributions the Epistle was still disputed in the 4th cent. (Eusebius, *HE* ii. 23. 25, iii. 25. 3). According to Jerome it had at one time been asserted that the Epistle was published by some one else in the name of James (*de viris illustribus*, ii). In support of the traditional authorship it has been argued that if the Epistle had been pseudonymous, the writer would have defined the position of the James whose authority he wished to claim, and that the same objection holds good against any theory of interpolation. Again, it has been urged that if it had been written by a later James under his own name, he would have distinguished himself from his better known namesakes.

Quite different conclusions have been drawn from the address 'To the twelve tribes in the dispersion.' Since Christ is mentioned only twice by name (here and 2[1]), the suggestion was made by F. Spitta (1896) that we have really a Jewish document which has been adapted by a Christian writer, as happened, *e.g.* with 2 Esdras and the *Didache*. To this it is objected that no editor would have been satisfied with so slight a revision. Arnold Meyer (1930) sought to solve what he termed 'the riddle' of this Epistle by positing a basic document addressed 'Jacob to the twelve patriarchs,' similar in character to the *Testaments of the Twelve Patriarchs*, a moralistic work composed near the end of the 2nd cent. B.C. In it the dictum of our author in 4[7] 'the devil . . . will flee from you' is repeated at least four times with variations; other similarities to the thought of this Epistle are recognized. There seems to be nothing against the view that our author was familiar with the *Testaments* and freely appropriated some of their leading ideas. Indeed affinities between the Epistle and such works as 1 Clement and the Shepherd of Hermas may be accounted for by their authors' independent use of the same sources (see **4**). The 'scripture' cited in 4[5] may have been one of the lost apocrypha, but the quotation in the next verse from Pr 3[34] conforms to the LXX against the Hebrew (cf 1 P 5[5]), as does the quotation from Gn 15[6] in 2[23] (cf Ro 4[3], Gal 3[6]). Such dependence on the Greek version, together with the idiomatic rhetorical style, which is that of the Hellenistic diatribe, tends to exclude any theory of translation from Aramaic and to cast doubt on the traditional authorship. To this its defender may reply that we really know very little of the scope of Jewish education and that there was every opportunity for contact with Greeks in Galilee. Attention is also called to the remarkable coincidence in language between this Epistle and the speech of James in Ac 15.

On the other hand, it is no less remarkable that the Epistle contains no reference whatever to the central issues raised in Ac 15, viz. a demand for the circumcision of Gentile converts and a counter-proposal by James that they abstain from 'blood,' defined in most MSS as 'things strangled' (cf Lv 17[10]). Paul, too, indicates that James was more conservative than Peter in this controversy (Gal 2[12]), reminding his readers that if they accept circumcision they become obligated to keep the whole law with all its ritual observances (*ib.* 5[3]). But when our author says that 'the whole law' must be kept, he refers only to ethical demands of the Decalogue (2[10-12]), as if the debate over ceremonial and dietary regulations were long forgotten. [See further, **2** (*a*).]

2. Date.—The only indications of date are derived from indirect, internal evidence, the interpretation of which depends on the view taken of the main problems raised by the Epistle. It is variously put, either as one of the earliest of NT writings, or among the very latest. At one time it could be reported that an early date was given by 'most English writers,' limiting late dating to 'the general German opinion.' But among the authors of leading NT introductions and commentaries published in England and the U.S. during the past fifty years, such scholars as J. Moffatt, J. H. Ropes, and other commentators support a comparatively late date (A.D. 75–125), against J. B. Mayor, for example, who argued for the decade A.D. 40–50, or prior to the controversy of Ac 15. B. S. Easton, who adopted in modified form the views of Arnold Meyer (see above, **1**), placed the date of the Christian edition of James somewhere between A.D. 80 and 100 (*IB* xii, 14 ff). The chief problem is *the relationship to other writings of the NT*. The Epistle has striking resemblances to several books of the NT, and these resemblances have received various explanations.

(*a*) Most important is its *relation to St. Paul*. It has points of contact with Romans: 1[22] 4[11] and Ro 2[13] (hearers and doers of the law); 1[2-4] and Ro 5[3-5] (the gradual work of temptation or tribulation); 4[11] and Ro 2[1] 14[4] (the critic self-condemned); 1[21] 4[1] and Ro 7[23] 13[12]; and the contrast between 2[21] and Ro 4[1] (the faith of Abraham). Sanday and Headlam (*Romans*, p. lxxix) see 'no resemblances in style sufficient to prove literary connexion'; Mayor, on the other hand, supposes that St. Paul is working up hints received from James. But, as Montgomery notes (Hastings, *DAC*, i, p. 630) our author's exegetical *tour de force* in appealing to Gn 15[6], which is more favourable to Paul's argument than to his own, is not the procedure of a writer choosing his illustrations freely. This suggests that the priority belongs to Paul rather than to this Epistle.

The main question turns upon the apparent opposition between James and Paul with regard to '*faith and works*.' The chief passages are ch. 2, especially vv.[17, 21ff], and Ro 3[28] 4, Gal 2[16]. Both writers quote Gn 15[6], and deal with the case of Abraham as typical, but they draw from it apparently opposite conclusions—St. James that a man is justified, as Abraham was, by works and not by faith alone; St. Paul that justification is not by works but by faith. It is generally recognized that there is no real contradiction between the two. The writers mean different things by 'faith.' W. H. P. Hatch points out that while for Paul 'faith' is at once belief, trust, and loyalty, it is particularly the means whereby the believer comes into mystical union with Christ and receives the gift of the Spirit (see *The Pauline Idea of Faith in Its Relation to Jewish and Hellenistic Religion*, 1917). For the writer of this Epistle, 'faith' means primarily intellectual acceptance of the proposition that 'God is one,' shared even by demons (2[19]), and, in contrast to doubt, the necessary condition for receiving any request from God (1[6–7]). Similarly, for Paul the term 'works' is applicable only to human activity for which 'wages' are due, in contrast to the divine gift of grace; more specifically Paul speaks of 'works of the law,' including such ritual requirements as circumcision (Ro 3[21]–4[12]). For our author 'works' appear as the natural accompaniment of a vital faith, in contrast to one which he pronounces 'barren' or 'dead' (2[20, 26]). Careful reading of the whole argument in 2[8–26] suggests that the Epistle was written, not only after Paul's views on 'justification by faith' had been put forward, but to correct misunderstandings of his teaching, which no doubt easily arose (2 P 3[16]).

(*b*) The *points of contact with* 1 *Peter* (1[10] 5[20] with 1 P 1[24] 4[8]) and *Hebrews* (2[25] with He 11[31]), though striking, are inconclusive as to date. If direct literary dependence is to be considered, comparison of the crisp aphorism of 4[7] with the more diffuse sentiment of 1 P 5[8f] suggests that priority should be assigned to the former. However, the theory advanced by P. Carrington (in *The Primitive Christian Catechism*, 1940), that a common pattern of catechetical instruction may account for this and numerous other parallels in 1 Peter and James, as well as Colossians and Ephesians, has much to commend it.

(*c*) It will be convenient to treat here *the relation to the Gospels and particularly to the Sermon on the Mount*, though this too is not decisive as to date. While the variations are too strong to allow us to suppose direct literary reference to the written text, familiarity with teaching epitomized in *Matthew* is evident. Among the chief parallels are the condemnation of 'hearers only' (1[22, 25], Mt 7[26]), of critics (4[11], Mt 7[1–5]), of worldliness (1[10] 2[5–6], Mt 6[19, 24]); the teaching about prayer (1[5], Mt 7[7]), concern for 'tomorrow' (4[13], Mt 6[34]), references to 'moth and rust' (5[2–3], Mt 6[19]), humility (4[10], Mt 23[12]), the tree and its fruit (3[12], Mt 7[16]). In relation to the injunction against swearing, it is pointed out that 5[12] has a remarkable agreement with Justin (*Ap.* i. 16), as against Mt 5[37]. But Ropes rejects the theory that James and Justin here show traces of oral tradition independent of *Matthew* as 'unlikely and unnecessary.' M. H. Shepherd, likewise, attributes the parallels to our author's familiarity with the Gospel and suggests a Syrian provenance for the Epistle (*JBL*, lxxv, 1956, pp. 40–51). In any case, such familiarity as its author shows with the teaching of Jesus can hardly be said to lend weight to his traditional identification as the Lord's brother.

3. The type of Christianity implied in the Epistle.—Opinions on this point are closely related to the foregoing questions, and vary accordingly. Upholders of the traditional authorship emphasize that the general tone of the Epistle is Judaic. The type of organization implied is said to be primitive, described mainly in Jewish phraseology: synagogue (2[2] RV), elders of the church (5[14]), anointing with oil and the connexion of sin and sickness (*ib*). Abraham is 'our father' (2[21]), and God bears the OT title 'Lord of Sabaoth' (5[4]) [here only in NT]. To this it may be replied that the term 'synagogue' was still applied to a Christian assembly for worship by 2nd cent. writers like Ignatius (*ad Polyc.* 4[2]) and Hermas (*Mand.* xi. 9, 13–14). Hermas too speaks of presiding elders of the church (*Vis.* ii. 4. 2). Abraham is called 'our father' in 1 Clem 31[2] and 'father of Gentiles who believe' in *Ep. Barn.* 13[7] (cf Ro 4[11f]). Even the title 'Lord of Sabaoth' occurs in 1 Clem 34[6] citing Is 6[3]. None of these expressions, therefore, furnishes compelling evidence either of Jewish Christian origin or of early date.

On the other hand, many critics see in the conditions with which the Epistle deals the description of a later age, when Christianity had had time to become formal and secularized, and moral degeneracy was disguised by intellectual orthodoxy. We may indeed believe that the Epistle has not yet yielded its full secret. It cannot be denied that it omits much that we should expect to find in a Christian document, and that its close is very abrupt. It is scarcely surprising that its epistolary address (1[1]) has been suspected as a later addition to a homily originally intended for oral delivery.

4. Early quotations and canonicity.—Classifying James among the 'disputed' books of the NT, Eusebius observed 'not many of the ancients have mentioned it' (*HE* ii. 23. 25). Among the 'ancients' who were formerly thought to have shown familiarity with the Epistle are Clement of Rome and Hermas. A leading example is the use of the Greek term *dipsychos*, 'double-minded' (1[8] 4[8]), which our author was supposed to have coined (Moulton and Milligan, *Vocab. of the Greek Testament*, p. 166). However, this term occurs in a quotation from an unnamed apocryphal 'scripture' in 1 Clem 23[3], 2 Clem 11[2], apparently alluded to also by Hermas in *Mand.* ix. 5. Evidence suggests that James derived the term from the same source (*JBL* lxiii, 1944, pp. 131–140; lxvi, 1947, pp. 211–219). A rival view is that James shows indebtedness to 1 Clement (*JBL* lxvii, 1948, pp. 339–345). In the Muratorian fragment, James, along with Hebrews, 1 and 2 Peter, and at least one of the Johannine epistles, failed to receive any mention among the canonical books. Other evidence also indicates that it was acknowledged earlier in the East than in the West. The scarcity of early quotations from it has suggested that others before Luther may have found it 'an epistle of straw.' Yet when the author's purpose is understood, such a verdict must appear manifestly unfair.

5. Style and teaching.—While much of the thought of the Epistle can be illustrated from the OT and documents of late Judaism, the author's vocabulary and literary style, as indicated above (**1**), is Hellenistic. As in Hebrew wisdom literature, its subject-matter consists of a rather miscellaneous collection of moral maxims and exhortations loosely strung together, one idea suggesting another often by the mere association of a single word. Many of these ideas, *e.g.* endurance under trial, or humiliation; wisdom as a gift to be sought from God; the need for faith and avoidance of a divided heart in approaching God; God's mercy toward those who love Him, etc., are found in similarly close association in Ecclesiasticus (chs. 1–2). It is probable, therefore, that our author was well-acquainted with the Wisdom of Jesus the son of Sirach in its Greek version. Evidence of his familiarity with the Wisdom of Solomon is less extensive. The concept of double-mindedness, or as the Hebrew puts it literally 'a heart and a heart,' *i.e.* a double heart, has been detected in some of the recently discovered Dead Sea Scrolls (*ATR* xxxviii, 1956, pp. 166–175). But there is no sufficient reason to assume direct influence of any of these documents on our author's teaching, since the expression is found in 1 Ch 12[33], Ps 12[2]. Later rabbinic exegesis developed the idea more fully in connexion with the two impulses of man's heart, tending toward good or evil. Our author's analysis of the origin of sin and temptation (1[14]) is similar to the Jewish notion of the evil impulse, but he expresses it in characteristically Hellenistic phraseology, for which parallels can be found in 2 P 2[18] and in Philo (*Quod omn. prob. liber* 22). Throughout the Epistle,

the author displays a fondness for pithy proverbs, rhetorical questions, and picturesque metaphors and similes. His main purpose was to encourage endurance under trials, together with consistency of life; and his leading ideas are the dangers of careless speech, of riches, of envious strife, and of worldliness, contrasted with the value of true faith, prayer, wisdom, and humility. The Epistle is essentially 'pragmatic': *i.e.* it insists that the test of belief lies in its 'value for conduct.' The writer's main interest lies in ethics, and he presents with sharp emphasis a side of Christianity which is always in danger of being forgotten. The practical mind will always feel the force of his message.

C. W. E.—O. J. F. S.

JAMES, PROTEVANGELIUM OF.—See Apocryphal New Testament, B 1.

JAMIN.—**1.** A son of Simeon, Gn 46^{10}, Ex 6^{15}, Nu 26^{12}, 1 Ch 4^{24}. The gentilic name **Jaminites** occurs in Nu 26^{12}. **2.** A Judahite, 1 Ch 2^{27}. **3.** A priest (? or Levite) who took part in the promulgating of the Law, Neh 8^{7}, 1 Es 9^{48} (AV **Adinus**, RV **Iadinus**).

JAMLECH.—A Simeonite chief, 1 Ch 4^{34}.

JAMNIA (1 Mac 4^{15} 5^{58} 10^{69} 15^{40}, 2 Mac $12^{8f, 40}$).—The later name of **Jabneel** (q.v.). It is also known as **Jabneh** (2 Ch 26^{6}). Here was held the famous council of Jewish rabbis which settled the OT Canon (q.v.). For its location, near the coast, see Map 10 or 15. The gentilic name **Jamnites** occurs in 2 Mac 12^{9} (AV, RV).

JANAI.—A Gadite chief, 1 Ch 5^{12} (AV **Jaanai**).

JANGLING.—'Jangling,' says Chaucer in the *Parson's Tale*, 'is whan man speketh to moche before folk, and clappeth as a mille, and taketh no kepe what he seith.' The word is used in AV in 1 Ti 1^{6} 'vain jangling' (RV 'vain talking,' RSV 'vain discussion'); and in the heading of 1 Ti 6 'to avoid profane janglings,' where it stands for 'babblings' in text (1 Ti 6^{20}); RSV has 'godless chatter.'

JANIM.—A town in the mountains of Hebron, near Beth-tappuah, Jos 15^{53} AV **Janum**); possibly modern *Benī Na'îm*.

JANNA, Lk 3^{24} (AV).—See Jannai.

JANNAI.—An ancestor of Jesus, Lk 3^{24} (AV **Janna**).

JANNES AND JAMBRES (or MAMBRES).—These names appear in 2 Ti 3^{8} as those of two of the Egyptian magicians who opposed Moses, and so were symbolic of all who resisted and opposed the truth. In the Exodus story ($7^{11f, 22}$ $8^{7, 18f}$ 9^{11}) no names are mentioned, but these two names appear in various forms in the Talmud, Targums, and Rabbinic writings. Attempts to explain the names have so far remained guesses, and the probability is that they are meant to represent Egyptian names. Since in this letter to Timothy and in the literature of the Qumrân community they are referred to as familiarly known, it would seem that some Jewish apocryphon concerned with their story was in circulation in the 1st cent. B.C. This, or a Christian version of it, was known in the early Christian centuries. Theodoret (iii, 689, ed. Schultze) knew it as an oral tradition, but the references in Origen (*C. Celsum*, iv, 51; *Comment. in Matt.* xxvii, 8), in Ps.-Ambrose's commentary on 2 Timothy (*PL* xvii, 521), and the Ps.-Gelasian *Decretum de libris recipiendis et non recipiendis* (ed. von Dobschütz, p. 303) seem to be to a written work. The story was known to such pagan writers as Pliny, *Nat. Hist.* xxx, 11, Apuleius, *Apologia*, 90 and Numenius *Fragm.* 18, but is not mentioned by either Philo or Josephus in their accounts of Moses. Rabbinic tradition regarded them as sons and assistants of Balaam, famous for their power of flying through the air, who came to Egypt to be Pharaoh's magicians, opposed Moses in Egypt and at the Red Sea crossing, and distressed the Israelites during their desert wandering, where they were responsible for the incident of the golden calf. One tradition, which Muhammad later adopted into the Qur'an, told how the power of Moses and Aaron induced them to become proselytes. Christian tradition, both eastern and western, is largely dependent on 2 Timothy, and has used them as figures symbolic of Satanic arts and opposition to the truth. By the 5th cent. what were supposed to be their tombs were being visited by the curious.

A. J.

JANOAH.—**1.** A town in the northern mountains of Naphtali, near Kedesh, 2 K 15^{29}, possibly modern *Yānûḥ*. **2.** A place on the border of Ephraim, Jos 16^{6} (AV **Janohah**); situated where the present *Kh. Yānûn* now stands, with the supposed tomb of Nun.

JANOHAH, Jos 16^{6f} (AV).—See Janoah, **2.**

JANUM, Jos 15^{53} (AV).—See Janim.

JAPHETH (Heb. *Yepheth*).—**1.** One of the sons of Noah. The meaning of the name is quite uncertain. Japheth and Shem acted modestly on the occasion of their father's drunkenness, and were in consequence blessed by Noah, $9^{23, 27}$. In Gn 9^{27} there is a play on the name—'God enlarge (*yapht*) Japheth [*i.e.* make room for him] and let him dwell in the tents of Shem.' The peoples connected with Japheth (10^{2-4}) occupy the northern portion of the known world, and include the Madai (Medes) on the E. of Assyria, Javan (Ionians, *i.e.* Greeks) on the W. coast and islands of Asia Minor, and Tarshish (? Tartessus) on the W. coast of Spain. On the two traditions respecting the sons of Noah see Ham. **2.** An unknown locality mentioned in Jth 2^{25}.

A. H. McN.

JAPHIA.—**1.** King of Lachish, defeated and slain by Joshua, Jos 10^{3ff}. **2.** One of David's sons born at Jerusalem, 2 S 5^{15}, 1 Ch 3^{7} 14^{6}. **3.** A town on the south border of Zebulun, Jos 19^{12}; probably the modern *Yâfā*, near the foot of the Nazareth hills.

JAPHLET.—An Asherite family, 1 Ch 7^{32f}.

JAPHLETI, Jos 16^{3} (AV).—See Japhletites.

JAPHLETITES.—The name of an unidentified tribe mentioned in stating the boundaries of the children of Joseph, Jos 16^{3} (AV **Japhleti**).

JAR.—See House, **9.**

JARAH.—A descendant of Saul, 1 Ch 9^{42}; called **Jehoaddah** in 8^{36} (AV **Jehoadah**).

JAREB.—The name of a King, according to AV and RV, Hos 5^{13} 10^{6}. It is not safe to pronounce dogmatically on the text and meaning. But our choice lies between two alternatives. If we adhere to the current text, we must regard **Jareb** (or *Jarib*) as a sobriquet coined by Hosea to indicate the love of conflict which characterized the Assyrian king. Thus 'King Jarib'='King Warrior,' 'King Striver,' 'King Combat,' or the like; and the events referred to are those of 738 B.C. (see 2 K 15^{19}). Most of the ancient versions support this, as, *e.g.* LXX 'King Jareim'; Symmachus and Vulgate 'King Avenger.' If we divide the Hebrew consonants differently we get 'the great king,' (so RSV) corresponding to the Assyrian *sharru rabbu* (cf 2 K $18^{19, 28}$, Is 36^{4}). It has even been thought that this signification may be accepted without any textual change. In any case linguistic and historical evidence is against the idea that Jareb is the proper name of an Assyrian or an Egyptian monarch. Other, less probable, emendations are 'king of Arabia,' king of Jathrib *or* of Aribi' (both in North Arabia).

J. T.

JARED.—The father of Enoch, Gn $5^{15f, 18-20}$, 1 Ch 1^{2} (AV **Jered**), Lk 3^{37}.

JARESIAH, 1 Ch 8^{27} (AV).—See Jaareshiah.

JARHA.—An Egyptian slave who married the daughter of his master Sheshan, 1 Ch 2^{34f}.

JARIB, 1 Mac 14^{29} (AV).—See Jehoiarib.

JARIB.—**1.** The eponym of a Simeonite family, 1 Ch 4^{24}; called **Jachin** in Gn 46^{10}, Ex 6^{15}, Nu 26^{12}. **2.** One of the leading men who were sent by Ezra to Casiphia in search of Levites, Ezr 8^{16}, 1 Es 8^{44} (AV **Joribas**, RV **Joribus**). **3.** A priest who had married a foreign wife, Ezr 10^{18}, 1 Es 9^{19} (AV, RV **Joribus**).

JARIMOTH, 1 Es 9[28] (AV, RV).—See JEREMOTH, 7.

JARMUTH.—1. A royal city of the Canaanites, Jos 10[3] etc., in the Shephēlah, assigned to Judah, Jos 15[35]. It is probably identical with 'Jermucha' of the *Onomasticon* 10 Roman miles from Eleutheropolis, on the Jerusalem road. This is now *Khirbet Yarmûk*, about 8 miles N. of *Beit Jibrîn*. **2.** A city in Issachar, allotted to the Gershonite Levites, Jos 21[29] (LXX[B] *Remmath*). It corresponds to **Ramoth** in 1 Ch 6[73], and **Remeth** appears in Jos 19[21] among the cities of Issachar. Albright suggests *Kôkab el-Hawâ*, but the site remains uncertain. W. E.—H. H. R.

JAROAH.—A Gadite chief (1 Ch 5[14]).

JASAEL, 1 Es 9[30] (AV).—See SHEAL.

JASAELUS, 1 Es 9[30] (RV).—See SHEAL.

JASHAR, BOOK OF (*sēpher hay-yāshār*, 'Book of the Righteous One').—An ancient book of national songs, which most likely contained both religious and secular songs describing great events in the history of the nation. In the OT there are two quotations from this book—(*a*) Jos 10[12f]; the original form must have been a poetical description of the battle of Gibeon, in which would have been included the old-world account of Yahweh casting down great stones from heaven upon Israel's enemies. (*b*) 2 S 1[19-27]; in this case the quotation is a much longer one, consisting of David's lamentation over Saul and Jonathan. In each case the Book of Jashar is referred to as well known; one might expect therefore, that other quotations from it would be found in the OT, and perhaps this is actually the case with, *e.g.* the Song of Deborah (Jg 5) and some other ancient pieces, which originally may have had a reference to their sources in the title (*e.g.* 1 K 8[12f]). W. O. E. O.

JASHEN.—The sons of Jashen are mentioned in the list of David's heroes given in 2 S 23[32]. In the parallel list (1 Ch 11[34]) they appear as the sons of **Hashem,** who is further described as the **Gizonite** (q.v.).

JASHOBEAM.—One of David's mighty men, 1 Ch 11[11] 12[6] 27[2]. There is reason to believe that his real name was **Ishbosheth** (q.v.), *i.e.* Eshbaal ('man of Baal'). Cf JOSHEB-BASSHEBETH.

JASHUB.—1. Issachar's fourth son, Nu 26[24], 1 Ch 7[1]; called **Iob** in Gn 46[13] (AV **Job**); patronymic **Jashubites,** Nu 26[24]. **2.** A returned exile who married a foreigner, Ezr 10[29], 1 Es 9[30] (AV, RV **Jasubus**).

JASHUBI-LEHEM.—The eponym of a Judahite family, 1 Ch 4[22] (AV, RV). The text is manifestly corrupt, and RSV renders 'and returned to Lehem.'

JASON.—This Greek name was adopted by many Jews whose Hebrew designation was Joshua (Jesus). **1.** The son of Eleazar deputed to make a treaty with the Romans, and father of Antipater who was later sent on a similar errand unless two different persons are meant (1 Mac 8[17] 12[16] 14[22]). **2.** Jason of Cyrene, an author, of whose history 2 Maccabees (see 2[23, 26]) is an epitome (written after 160 B.C.). **3.** Joshua the high priest, who ousted his brother Onias III. from the office in 174 B.C. (2 Mac 4[7ff]), but was himself driven out three years later, and died among the Lacedaemonians at Sparta (2 Mac 5[9f]). **4.** In Ac 17[6ff] a Jason was St. Paul's host at Thessalonica, from whom the politarchs (RSV 'city authorities') took bail for his good behaviour, thus (as it seems) preventing St. Paul's return to Macedonia for a long time (see article PAUL THE APOSTLE). The Jason who sends greetings from Corinth in Ro 16[21], a 'kinsman' of St. Paul (*i.e.* a Jew), is probably the same man. A. J. M.

JASPER.—See JEWELS AND PRECIOUS STONES.

JASUBUS, 1 Es 9[30] (AV, RV).—See JASHUB, 2.

JATAL, 1 Es 5[28] (AV).—See ATER, 1.

JATHAN.—Son of Shemaiah 'the great,' and brother of Ananias the pretended father of Raphael, To 5[15] (AV **Jonathas**).

JATHNIEL.—A Levitical family, 1 Ch 26[2].

JATTIR.—A Levitical city of Judah, in the southern mountains, Jos 15[48] 21[14], 1 Ch 6[57]. It was one of the cities to whose elders David sent of the spoil from Ziklag, 1 S 30[27]. Its site is *Kh.* *'Attîr*, NE. of Beersheba, on a hill spur close to the southern desert.

JAVAN, the Hebrew rendering of the Greek Iaōn, 'Ionian,' is a general term in the Bible for Ionians or Greeks; very similar forms of the name occur in the Assyrian and Egyptian inscriptions. In the genealogical table in Gn 10[2, 4] and 1 Ch 1[5, 7] Javan is described as a son of Japheth and the father of Elishah, Tarshish, Kittim, and Dodanim (or better, Rodanim, *i.e.* Rhodes); from the reference to **Kittim** (Kition) as his son, it is possible that the passage refers particularly to Cyprus. In Is 66[19] Javan is included among the distant countries that will hear of Yahweh's glory. In Jl 3[6] the sons of the Javanites (Greeks) are referred to as trading in Jewish captives with the Phoenicians and Philistines; in Ezk 27[13] Javan, with Tubal and Meshech, is described as trading with Tyre in slaves and vessels of brass. In all three passages the references are to the Ionian colonies on the coast of Asia Minor. In Ezk 27[19] (AV, RV) Javan appears a second time among the nations that traded with Tyre; clearly the Ionians are not intended, and, unless the text is corrupt (as is very probable; RSV renders 'wine'), the reference may be to an Arab tribe, or perhaps to a Greek colony in Arabia. See UZAL, 2. In Dn 8[21] 10[20] 11[2], where 'the king,' 'the prince,' and 'the kingdom' of Javan (Greece) are mentioned, the passages have reference to the Graeco-Macedonian empire. L. W. K.

JAVELIN.—See ARMOUR, ARMS, 1 (*b*).

JAZAR, 1 Mac 5[8] (AV).—See JAZER.

JAZER (Nu 21[32]; AV **Jaazer**).—An Amorite town N. of Heshbon, taken by Israel, Nu 21[32]; allotted to Gad (Jos 13[25] etc.), and made a Levitical city (Jos 21[39], 1 Ch 6[81]). It was fortified by Gad, Nu 32[35] (AV **Jaazer**). It lay on the Ammonite border (Nu 21[24], where RSV reads 'Jazer was the boundary of the Ammonites' for AV, RV 'the boundary of the Ammonites was strong'), and was in a district rich in vines, Is 16[8] etc., Jer 48[32]. Judas Maccabaeus took the city which was then in the hands of the Ammonites, 1 Mac 5[8] (AV **Jazar**), Jos. *Ant.* XII. viii. 1 [329]). It is probably modern *Kh. Jazzir*, near *es-Salt*. W. E.—H. H. R.

JAZIZ.—A Hagrite who was 'over the flocks' of king David, 1 Ch 27[31].

JEALOUSY.—Hebrew root *ḳ-n-'* (become dark-red, *i.e.* with emotion) is normally translated by LXX *zēloō* and derivatives. Both words indicate an intensity of emotion which may be directed towards a right or wrong exclusiveness. They are therefore sometimes translated in AV, RV by 'envy' (Ac 7[9]) or 'zeal' (2 S 21[2]) instead of 'jealousy.' In Biblical English 'jealous' retains a good sense as well as the bad sense which has largely dominated in modern English (but cf 'jealous for his country's honour'). Thus Elijah is 'jealous' for Yahweh (1 K 19[10]) and Yahweh Himself is 'jealous' (Ex 20[5]), and Paul has a 'divine jealousy' for the Corinthian Christians (2 Co 11[2]); yet he himself can also say that love is not 'jealous' (RSV, 1 Co 13[4]; AV 'envieth not'). Yahweh's own 'jealousy' is a strong emotion for what is right, especially with regard to the exclusive convenant-relationship of Israel with Himself alone (Ezk 8[3]). He cannot brook any rivals in Israel's affections, and must punish Israel's defections from the covenant-relationship, and also those who seek to destroy that relationship from without (Nah 1[2]). Thus 'jealousy' is often linked with marriage-bond metaphors (Nu 5[11f], Ezk 16[38], 2 Co 11[2]).

The '**water of bitterness**' in Nu 5 was used in an instance of trial by ordeal, to determine whether a husband's jealous suspicions were rightly grounded or not. No doubt its efficacy lay in the state of the accused wife's mind, whether she knew herself to be guilty or innocent. The water itself, though decidedly unhygienic, was otherwise harmless, but a consciousness of guilt often produces somatic symptoms, and would do so

more readily when the accused believed in the potency of the means enjoined. S. B. F.

JEARIM, MOUNT.—Mentioned only in Jos 15[10], where it is identified with **Chesalon** (q.v.).

JEATERAI, 1 Ch 6[21] (AV).—See JEATHERAI.

JEATHERAI.—An ancestor of Asaph, 1 Ch 6[21] (AV **Jeaterai**); called **Ethni** in v.[41].

JEBERECHIAH.—The father of Zechariah, a friend of Isaiah, Is 8[2].

JEBUS, JEBUSITES.—The Jebusites occur in numerous lists as one of the (mostly six) pre-Israelitish nations of Palestine (Ex 3[8, 17] 23[23] 33[2], Dt 7[1], Jos 3[10] etc.). Repeatedly they are mentioned as the population of Jerusalem (Jos 15[63], Jg 1[21]) for which reason Jerusalem occasionally is called 'Jebus' (Jos 18[28], Jg 19[10]) or 'city of the Jebusites' (Jg 19[11]). From the Egyptian execration texts (19th–18th cent. B.C.) and the Amarna Letters (14th cent. B.C.) it is evident that the official name of the city before the Hebrew conquest was Jerusalem (*Urusalim*). Hence, Jebus was used either merely as a popular name or officially only between the Amarna Age and the conquest of the city by David (Simons, *Jerusalem*, 1952, p. 247, n. 1). The Table of Nations declares the Jebusites to be descendants of Ham (Gn 10[16]), but their ethnical origin is uncertain. The Jebusite Araunah (2 S 24[16]) has a Hurrian name, while other pre-Hebrew kings of Jerusalem have either Amorite (Melchizedek = *Malki-ṣaduqa*, Gn 14[18]; Adonizedek = *Aduna-ṣaduqa*, Jos 10[1]) or Hittite names (*Abdu-Ḫeba* of the Amarna Letters). Ezekiel's claim that Jerusalem's aboriginal population had consisted of Amorites and Hittites (16[3, 45]) is of interest in this connexion, indicating perhaps that the Jebusites had drawn their stock from these nations. Jebusites, like Araunah, remained in Jerusalem after David's conquest and were probably absorbed by the Israelites in the course of time. They are then lost from view. S. H. Hn.

JECAMIAH, 1 Ch 3[18] (AV).—See JEKAMIAH, **2.**

JECHILIAH, 2 Ch 26[3] (RV).—See JECOLIAH.

JECHOLIAH, 2 K 15[2] (AV).—See JECOLIAH.

JECHONIAH.—See JEHOIACHIN.

JECHONIAS.—1. The Greek form of the name of the king **Jeconiah** or **Jehoiachin** (q.v.). **2.** 1 Es 8[92] (AV, RV); see SHECANIAH, **5.**

JECOLIAH.—The mother of King Uzziah, 2 K 15[2] (AV **Jecholiah**), 2 Ch 26[3] (RV **Jechiliah**).

JECONIAH.—1. See JEHOIACHIN. **2.** A Levite, 1 Es 1[9] (RSV; AV, RV **Jeconias**); called **Conaniah** in 2 Ch 35[9]. **3.** 1 Es 1[34] (RSV; RVm **Jeconias**; AV, RV **Joachaz**); see JEHOAHAZ, **2.**

JECONIAS.—1. 1 Es 1[9] (AV, RV); see JECONIAH, **2.** **2.** 1 Es 1[34] (RVm); see JECONIAH, **3.**

JEDAIAH.—1. A priestly family, 1 Ch 9[10] 24[7], Ezr 2[36], 1 Es 5[24] (AV, RV **Jeddu**), Neh 7[39] 11[10] 12[6f, 19, 21]. **2.** One of the exiles sent with gifts of gold and silver for the sanctuary at Jerusalem, Zec 6[10, 14]. **3.** A Simeonite chief, 1 Ch 4[37]. **4.** One of those who repaired the wall of Jerusalem, Neh 3[10].

JEDDU, 1 Es 5[24] (V, ARV).—See JEDAIAH, **1.**

JEDEUS, 1 Es 9[30] (AV, RV).—See ADAIAH, **6.**

JEDIAEL.—1. The eponym of a Benjamite family, 1 Ch 7[6, 10f]. **2.** One of David's heroes, 1 Ch 11[45]; probably identical with the Manassite of 12[20]. **3.** The eponym of a family of Korahite porters, 1 Ch 26[2].

JEDIDAH.—Mother of Josiah, 2 K 22[1].

JEDIDIAH ('beloved of Y^{e}'). —The name given to Solomon by the prophet Nathan (2 S 12[25]) 'because of the Lord.' See SOLOMON.

JEDUTHUN.—An unintelligible name having to do with the music or the musicians of the Temple. According to 1 Ch 25[1] etc., it was the name of one of the three musical guilds. *Jeduthun* occurs in the headings Pss 39, 62, 77, and appears to refer to an instrument or to a tune. But in our ignorance of Hebrew music it is impossible to do more than guess what Jeduthun really meant. See PSALMS, **2.**

JEELI, 1 Es 5[33] (AV, RV).—See JAALAH.

JEELUS, 1 Es 8[92] (AV, RV).—See JEHIEL, **8.**

JEEZER, Nu 26[30] (AV).—See IEZER.

JEGAR-SAHADUTHA ('cairn of witness').—The name said to have been given by Laban to the cairn erected on the occasion of the compact between him and Jacob, Gn 31[47]. It is the Aramaic equivalent of **Galeed** (q.v.).

JEHALELEEL, 1 Ch 4[16] (AV).—See JEHALLELEL, **1.**

JEHALELEL, 2 Ch 29[12] (AV).—See JEHALLELEL, **2.**

JEHALLELEL.—1. A Judahite, 1 Ch 4[16] (AV **Jehaleleel**). **2.** A Levite, 2 Ch 29[12] (AV **Jehalelel**).

JEHDEIAH.—1. The eponym of a Levitical family, 1 Ch 24[20]. **2.** A Meronothite (q.v.), who was one of David's officers, 1 Ch 27[30].

JEHEZEKEL, 1 Ch 24[16] (AV).—See JEHEZKEL.

JEHEZKEL ('God strengtheneth,' the same name as Ezekiel).—A priest, the head of the twentieth course, 1 Ch 24[16] (AV **Jehezekel**).

JEHIAH.—The name of a Levitical family, 1 Ch 15[24].

JEHIEL.—1. One of David's chief musicians, 1 Ch 15[18, 20] 16[5]. **2.** A chief of the Levites, 1 Ch 23[8] 29[8]. **3.** One who 'attended the King's sons,' 1 Ch 27[32]. **4.** One of Jehoshaphat's sons, 2 Ch 21[2]. **5.** One of Hezekiah's 'overseers,' 2 Ch 31[13]. **6.** A chief officer of the house of God in Josiah's reign, 2 Ch 35[8], 1 Es 1[8] (AV **Syelus**, RV **Esyelus**). **7.** The father of Obadiah, a returned exile, Ezr 8[9], 1 Es 8[35] (AV, RV **Jezelus**). **8.** Father of Shecaniah, Ezr 10[2], 1 Es 8[92] (AV, RV **Jeelus**). **9.** One of those who had married foreign wives, Ezr 10[26], 1 Es 9[27] (AV **Hierielus**, RV **Jezrielus**). **10.** A priest of the sons of Harim who had married a foreign wife, Ezr 10[21], 1 Es 9[21] (AV, RV **Hiereel**). **11.** 2 Ch 29[14] (AV); see JEHUEL.

JEHIELI.—A patronymic from **Jehiel, 2** (q.v.), 1 Ch 26[21f].

JEHIZKIAH.—An Ephraimite who supported the prophet Oded in opposing the bringing of Judaean captives to Samaria, 2 Ch 28[12ff].

JEHOADAH, 1 Ch 8[36] (AV).—See JEHOADDAH.

JEHOADDAH.—A descendant of Saul, 1 Ch 8[36] (AV **Jehoadah**); called **Jarah** in 9[42].

JEHOADDAN.—Mother of Amaziah, king of Judah, 2 K 14[2] (AV; RV, RSV **Jehoaddin**, with *K^{e}thibh*), 2 Ch 25[1].

JEHOADDIN.—See JEHOADDAN.

JEHOAHAZ.—1. Johoahaz of Israel (**Joahaz** in 2 K 14[1]) succeeded his father Jehu. Our records tell us nothing of him except the length of his reign, which is given as seventeen years (2 K 13[1]), and the low estate of his kingdom, owing to the aggressions of Syria. A turn for the better seems to have come before his death, because the forces of Assyria pressing on the N. of Damascus turned the attention of that country away from Israel (vv.[3–5]).

2. Jehoahaz of Judah (**Joahaz** in 2 Ch 36[2, 4] in RV, following Hebrew; **Joachaz** in 1 Es 1[34] [AV and RV] and **Jeconiah** in 1 Es 1[34] [RSV; cf RVm]) was the popular choice for the throne after the death of Josiah (2 K 23[30]). But Pharaoh Neco, who had obtained possession of all Syria, regarded his coronation as an act of assumption, deposed him in favour of his brother Jehoiakim, and carried him away to Egypt, where he died (v.[34]). Jeremiah, who calls him **Shallum**, finds his fate sadder than that of his father who fell in battle (Jer 22[10–12]).

3. 2 Ch 21[17] = **Ahaziah, 2.** He is called **Jehoahaz** also in 2 Ch 25[23] in AV and RV, following Hebrew, but RSV substitutes **Ahaziah.** H. P. S.

JEHOASH, in the shorter form **JOASH,** is the name of a king in each of the two lines, Israel and Judah.

1. Jehoash of Judah was the son of Ahaziah. When an infant his brothers and cousins were massacred, some of them by Jehu and some by Athaliah. After being kept in concealment until he was seven years old, he was crowned by the bodyguard under the active leadership of Jehoiada, the chief priest. At his accession, he was invested with a sacred diadem and the testimony, the latter referring, apparently, to a document containing the Davidic Covenant (cf 2 S 23$^{1-7}$, Ps 132^{12}). In his earlier years he was under the influence of the man to whom he owed the throne, but later he manifested his independence. Besides an arrangement which he made with the priests about certain moneys which came into their hands, the record tells us only that an invasion of the Syrians compelled him to pay a heavy tribute. This was drawn from the Temple treasury. Jehoash was assassinated by some of his officers (2 K 11 f).

2. Jehoash of Israel was the third king of the line of Jehu. The turn of the tide in the affairs of Israel came about the time of his accession. The way in which the Biblical author indicates this is characteristic. He tells us that when Elisha was about to die Jehoash came to visit him, and wept over him as a great power about to be lost to Israel. Elisha bade him take bow and arrows and shoot the arrow of victory towards Damascus, then to strike the ground with the arrows. The three blows which he struck represent the three victories obtained by Jehoash, and the blame expressed by Elisha indicates that his contemporaries thought the king slack in following up his advantage. Jehoash also obtained a signal victory over Judah in a war wantonly provoked, it would seem, by Amaziah, king of Judah (2 K 13^{10ff}). H. P. S.—A. S. H.

JEHOHANAN.—1. A Korahite doorkeeper, 1 Ch 26^{3}. **2.** One of Jehoshaphat's five commanders, 2 Ch 17^{15}. **3.** A high priest, Ezr 10^{6}, 1 Es 9^{1} (AV **Joanan,** RV **Jonas**); called **Johanan** in Neh 12^{22f} and **Jonathan** in Neh 12^{11}. He is called son of Eliashib in Ezr 10^{6}, Neh 12^{23}, but was probably his grandson, Joiada being his father, Neh 12$^{11, 22}$. Josephus relates how Jehohanan slew his brother, to whom Bagoas had promised the high priesthood, in the Temple precincts (*Ant.* XI. vii. 1 [298 f]). **4.** One of those who had married foreign wives, Ezr 10^{28}, 1 Es 9^{29} (AV **Johannes,** RV **Joannes**). **5.** Son of Tobiah the Ammonite, Neh 6^{18}. **6.** A priest in the days of Joiakim, Neh 12^{13}. **7.** A priest present at the dedication of the walls, Neh 12^{42}.

JEHOIACHIN, king of Judah, ascended the throne when Nebuchadrezzar was on the march to punish the rebellion of Jehoiakim. On the approach of the Chaldaean army, the young king surrendered and was taken captive to Babylon (2 K 24^{8ff}). This is confirmed by fragments of 'The Babylonian Chronicle,' which state that Nebuchadrezzar 'in the seventh year mustered his troops and marched into the land of Hatti (*i.e.* Syria and Palestine), besieged the city of Judah, and on the second day of the month of Adar (*i.e.* mid March 597 B.C.) captured the city and took the king prisoner.' His reign had lasted only three months, but his confinement in Babylon extended for thirty-seven years, until the death of Nebuchadrezzar. At the accession of Evil-merodach he was freed from prison, and received a daily allowance from the palace (2 K 25^{27f}). This also has been confirmed by the discovery of a number of tablets on the site of the palace in ancient Babylon. His name and rank as the king of Judah are inscribed on these, and they indicate the supplies of oil which are to be provided to him and his five sons by the royal stewards. Jeremiah gives his name in 24^{1} 27^{20} 28^{4} 29^{2} as **Jeconiah,** and in 22$^{24, 28}$ 37^{1} as **Coniah.** He is mentioned in 1 Es 1^{43} (AV **Joacim,** RV **Joakim**), Ad. Est 11^{4} (AV, RV **Jechonias**; RSV **Jeconiah**), Bar 1$^{3, 9}$ (AV, RV **Jechonias**; RSV **Jeconiah**) and Mt 1^{11f} (AV **Jechonias**; RV, RSV **Jechoniah**). H. P. S.—E. R. R.

JEHOIADA.—1. Father of Benaiah, the successor of Joab, 2 S 8^{18} 20^{23} etc. It is probably the same man that is referred to in 1 Ch 12^{27} 27^{34}, where we should probably read 'Benaiah the son of Jehoiada.' **2.** The chief priest of the Temple at the time of Ahaziah's death (2 K 11^{4} etc.). The Book of Chronicles makes him the husband of the princess **Jehosheba** (or Jehoshabeath, 2 Ch 22^{11}), by whose presence of mind the infant prince Jehoash escaped the massacre by which Athaliah secured the throne for herself. Jehoiada must have been privy to the concealment of the prince, and it was he who arranged the *coup d'état* which placed the rightful heir on the throne. In this he may have been moved by a desire to save Judah from vassalage to Israel, as much as by zeal for the legitimate worship **3.** Neh 3^{6} (AV); see JOIADA, **1.** **4.** Neh 13^{28}; see JOIADA, **2.**

JEHOIAKIM.—1. Son of Josiah, originally named **Eliakim,** who was placed upon the throne of Judah by Pharaoh Neco, who deposed the more popular Jehoahaz. His reign of eleven years is not well spoken of by Jeremiah. The religious abuses which had been abolished by Josiah seem to have returned with greater strength than ever. At a time when the kingdom was impoverished by war and by the exactions of Egypt, Jehoiakim occupied himself in extravagant schemes of building to be carried out by forced labour (2 K 23^{34}–24^{7}). Things were so bad that in the fourth year of his reign Jeremiah dictated to Baruch a summary of all his earlier discourses, and bade him read it in public as though to indicate that there was no longer any hope. The king showed his contempt for the prophetic word by burning the roll. Active persecution of the prophetic party followed, in which one man at least was put to death. Jeremiah's escape was due to powerful friends at court (Jer 22$^{13-19}$ 36$^{1-26}$ 26$^{20-24}$). It was about the time of the burning of the Book of Jeremiah that the Egyptian supremacy was ended by the decisive battle of Carchemish. The evacuation of Palestine followed, and Jehoiakim was obliged to submit to the Babylonians. His heart, however, was with the Pharaoh, to whom he owed his elevation. After three years he revolted from the Babylonian rule. Nebuchadrezzar thought to bring him into subjection by sending guerilla bands to harry the country, but as this did not succeed, he invaded Judah with an army of regulars. Before he reached Jerusalem, Jehoiakim died, and the surrender which was inevitable was made by his son. Whether Jeremiah's prediction that the corpse of the king should be denied decent burial was fulfilled is not certain. **2.** A priest, son of Hilkiah, to whom the captives are said to have sent money for the purchase of offerings and incense, Bar 1^{7} (AV **Joachim,** RV **Joakim**).
H. P. S.

JEHOIARIB.—One of the twenty-four courses of priests, 1 Ch 9^{10} 24^{7}; called **Joiarib** in Neh 11^{10} 12$^{6, 19}$; called **Joarib** in 1 Mac 2^{1} 14^{29} (AV **Jarib**). It was the first in David's time (1 Ch 24^{7}), but seventeenth in the time of Zerubbabel, Neh 12^{6}, and of the high priest Joiakim, 12^{19}. The name is omitted, probably by accident, in the list of the priests that 'sealed the covenant,' Neh 10. The clan is mentioned among those that dwelt in Jerusalem in the time of Nehemiah, 11^{10}.

JEHONADAB.—See JONADAB, **2.**

JEHONATHAN.—A more exact rendering of the name usually represented in English as **Jonathan.** In RV and RSV this form occurs twice. **1.** 2 Ch 17^{8}, one of the Levites sent out by Jehoshaphat with the Book of the Law to teach the people in the cities of Judah. **2.** Neh 12^{18}, the head of the priestly family of Shemaiah in the days of Joiakim the son of Jeshua. In AV it is found also in **3.** 1 Ch 27^{25}, an overseer of David's treasuries (RV, RSV **Jonathan**). See JONATHAN, **12.**

JEHORAM, with a shorter form **Joram,** is the name of two kings in the OT.

1. Jehoram of Israel was the son of Ahab (2 K 3^{1}), and came to the throne after the brief reign of his brother Ahaziah, who had no sons to succeed him

(2 K 1[17]). Early in his reign Moab rebelled, and Jehoram appealed for help to Jehoshaphat, king of Judah, but it does not appear that they were successful in their efforts to suppress the rebellion. At the crisis of the conflict the king of Moab sacrificed his son to his god Chemosh. The invading army was discouraged, and the allies retreated without having accomplished their purpose (2 K 3[4ff]). The success of Moab was commemorated by Mesha the king by the erection of the **Moabite Stone** (see MOAB), which was discovered in Dibon, the Moabite capital, in 1868. The prophet Elisha was active during the reign of Jehoram, and it is probable that the siege of Samaria, of which we have so graphic an account in 2 K 6 and 7, also belongs to this period. Jehoram engaged in the siege of Ramoth-gilead, and was wounded there (2 Ch 22[5ff]). His reign ended with the revolt of Jehu, by whom he was killed. See JEHU.

2. Jehoram of Judah, son of Jehoshaphat (1 K 22[50]), came to the throne during the reign of the other Jehoram in Israel. He was married to Athaliah, daughter of Ahab and Jezebel (2 K 8[18]). He was thirty-two when he became king, and reigned eight years (2 K 8[17], 2 Ch 21[5]). One of his first acts was to kill all his brothers and some of the princes in Judah (2 Ch 21[4]). During his reign Edom revolted successfully from Judah. In endeavouring to subdue this revolt Jehoram was in great danger, but with a few of his men he cut his way through the troops that surrounded him (2 K 8[21]). He is described as one who walked in the ways of the kings of Israel, and at his death, it is stated that he was not buried in the tombs of the kings (2 Ch 21[20]).

3. A priest sent by Jehoshaphat to teach the Law (2 Ch 17[8]). H. P. S.—E. R. R.

JEHOSHABEATH.—See JEHOSHEBA.

JEHOSHAPHAT ('Y″ judges').—**1.** The 'recorder' in the reigns of David and Solomon (2 S 8[16] etc., 1 K 4[3]); see ASAPH, **1.** **2.** One of Solomon's commissariat officers (1 K 4[17]). **3.** Father of king Jehu (2 K 9[2, 14]). **4.** The son of Asa king of Judah. He receives a good name from the compiler of the Book of Kings (1 K 22[43]). This is clearly because he carried out the religious reforms of his father. The important thing in his reign was the alliance of Judah with Israel (v.[44]), which put an end to their long hostility. Some suppose the smaller kingdom to have been tributary to the larger, but on this point our sources are silent. The alliance was cemented by the marriage of the crown prince Jehoram to Ahab's daughter Athaliah (2 K 8[18]). Jehoshaphat appears as the ally of Ahab against Syria, and himself went into the battle of Ramoth-gilead (1 K 22). He also assisted Ahab's son against the Moabites (2 K 3). He seems to have had trouble with his own vassals in Edom, and his attempt to renew Solomon's commercial ventures on the Red Sea was unsuccessful (1 K 22[48]). **5.** 1 Ch 15[24] (AV); see JOSHAPHAT, **2.** H. P. S.

JEHOSHAPHAT, VALLEY OF (Jl 3[2, 12]).—The deep valley to the E. of Jerusalem, between the city and the Mount of Olives, has since the 4th cent. A.D. been identified by an unbroken Christian tradition with the Valley of Jehoshaphat. Moslems and Jews have also for centuries looked upon this valley as the scene of the Last Judgment. The Jews especially consider this of all places on earth the most suitable for burial, as it is taught that all bodies buried elsewhere must find their way thither at the last day. The valley was the ordinary place for graves in pre-exilic times (2 K 23[6] etc.). In spite, however, of these traditions, it is quite probable that the name of this valley was at one time *Wâdī Sha'fât*, from the neighbouring village of *Sha'fât*, and that this suggested to early Christian pilgrims, in search of sites, the Biblical name *Jehoshaphat*. The so-called 'Tomb of Jehoshaphat,' which lies near the traditional 'Tomb of Absalom,' is an impossible site, for in 1 K 22[50] and 2 Ch 21[1] it is stated that he was buried in the city of David. The valley, moreover, does not suit the conditions, in that it is a *naḥal* (wady)—the *naḥal* Kidron (q.v.)—whereas the Valley of Jehoshaphat was in Hebrew an *'ēmeḳ* (a wide, open valley). It has been suggested that the valley (*'ēmeḳ*) of Beracah, where Jehoshaphat returned thanks after his great victory (2 Ch 20[26]), may be the place referred to by Joel. It is, however, at least as probable that the prophet did not refer to any special locality and gave the name *Jehoshaphat, i.e.* 'Jehovah judges,' to an ideal spot. In this connexion it has been observed by A. S. Kapelrud, *Joel Studies*, 1948, 147, who points to an ancient valley-tradition with possible cultic affiliations (*e.g.* Jer 7[30–34], Is 22[1–8, 12–14], Ezk 39[11–29], Zec 14[1–15]), that this valley 'cannot be located on any map . . . belongs to the sphere of mythology. And yet, it was perhaps conceived as a valley in the vicinity of Jerusalem, for it was out from Zion and Jerusalem that Yahweh was to thunder,' Jl 3[16f] (Heb. 4[16f]). The name 'simply means . . . "Yahweh's valley of judgment."' E. W. G. M.—E. T. R.

JEHOSHEBA.—Daughter of Jehoram of Judah, 2 K 11[2]; called **Jehoshabeath** in 2 Ch 22[11]. On the death of her half-brother Ahaziah, she was instrumental in preserving the Davidic stock, by concealing the infant Jehoash in a bedroom of the Temple. According to the Chronicler, she was wife of Jehoiada.

JEHOVAH.—See GOD, **4** (*c*).

JEHOVAH-JIREH.—The name given by Abraham (Gn 22[14] AV, RV) to the spot where he offered a ram in place of his son. The name means 'Y″ sees,' and probably also (with reference to Gn 22[8]) 'Y″ provides' (cf RSV 'The Lord will provide'). The proverb connected in v.[14] with the name clearly relates to the Temple hill, 'the mount of Y″.' But it is not easy to see the exact connexion between the name and the proverb. The most obvious translation is 'in the mount of Y″ one appears' (referring to the festal pilgrimages to Jerusalem), but in that case the connexion can be only verbal. Other possible translations are: (1) 'In the mount of Y″ it is seen,' *i.e.* provided; this is a possible translation in the context; but it appears to be suggested that the proverb had an existence independently of the tradition of Abraham's sacrifice; in which case the meaning assigned to the verb is not a natural or obvious one. (2) 'In the mount of Y″, Y″ is seen.' The significance of the phrase would then be that, as Y″ sees the needs of those who come to worship Him, so as a practical result He is seen by them as a helper. Other translations have been suggested which do not, however, alter the general sense. Driver decides that, unless the connexion be regarded as purely verbal, the last suggestion quoted above seems the most satisfactory. In any case, the point lies in the relation between the name which Abraham gave to the place of his sacrifice and some popular proverb dealing with the Temple at Jerusalem. A. W. F. B.

JEHOVAH-NISSI ('Y″ is my banner').—The name given by Moses to the altar he erected after the defeat of Amalek, Ex 17[15] (AV, RV; RSV 'The Lord is my banner'). God is considered the centre or rallying-point of the army of Israel, and the name of God as their battle-cry (cf Ps 20[7f]). The interpretation of v.[16] is somewhat doubtful. Literally it means 'A hand upon the throne (*kēs*) of Yah' (which AV and RV interpret 'the Lord hath sworn'). But *kēs* (for *kissē'*) is found nowhere else, and many scholars read *nēs*, 'banner' (so RSV). The meaning is probably that Moses took an oath of war against Amalek, in token of which he laid his hand on the banner.

JEHOVAH-SHALOM.—The name given by Gideon to the altar he erected in Ophrah, Jg 6[24] (AV, RV). The name means 'Y″ is peace' (*i.e.* well-disposed) and is translated in RSV 'The Lord is peace,' in allusion to Y″'s words in v.[23] 'Peace be to you.'

JEHOVAH-SHAMMAH ('Y″ is there').—The name to be given to the restored and glorified Jerusalem, Ezk 48[35] (AVm, RVm; but translated 'The Lord is there' in AV, RV, and RSV; cf Is 60[14–22] 62[2], Rev 21[2f]).

The prophet beheld the Lord forsake His Temple (ch. 11), and he beheld Him again enter it (ch. 43); now He abides in it among His people for ever.

JEHOVAH-TSIDKENU ('Y" is our righteousness,' or 'Y" our righteousness').—The title of the Branch, the perfectly righteous King, who is to rule over the people on their return from captivity, Jer 23^6 33^{16} (AVm; but translated in AV, RV, and RSV).

JEHOZABAD ('Y" has bestowed').—**1.** One of the servants of king Joash, who conspired against his master and joined in his assassination, 2 K 12^{21}, 2 Ch 24^{26}. **2.** A Benjamite chief, 2 Ch 17^{18}. **3.** A Levitical family, 1 Ch 26^4. A shortened form of the name is **Jozabad** (q.v.).

JEHOZADAK.—Father of Joshua the high priest, 1 Ch 6^{14f}, Hag $1^{1, 12, 14}$ $2^{2, 4}$, Zec 6^{11} (AV in Haggai and Zechariah **Josedech**). The name is shortened to **Jozadak** in Ezr $3^{2, 8}$ 5^2 10^{18}, Neh 12^{26}, 1 Es $5^{5, 48, 56}$ 6^2 9^{19}, Sir 49^{12} (AV **Josedec** and RV **Josedek** in 1 Esdras and Sirach).

JEHU.—**1.** A prophet, the son of Hanani (1 K 16^1 etc.). **2.** A Judahite (1 Ch 2^{38}). **3.** A Simeonite (1 Ch 4^{35}). **4.** One of David's heroes (1 Ch 12^3). **5.** A king of Israel. Like the other founders of dynasties in that country, he obtained the throne by the murder of his monarch. It is evident that a considerable party in Israel had long been dissatisfied with the house of Ahab. This was partly on account of its religious policy, but perhaps even more for its oppression of its subjects—so emphatically illustrated by the story of Naboth. The leader of the opposition was Elijah, and after him Elisha. Jehu, when in attendance upon Ahab, had heard Elijah's denunciation of the murder of Naboth (2 K 9^{25f}). Later he was general of the army, and commanded in the operations at Ramoth-gilead in the absence of king Jehoram. The latter had gone to Jezreel on account of wounds he had received. Elisha saw this to be the favourable moment to start the long-planned revolt. His disciple anointed the general, and the assent of the army was easily obtained. The vivid narrative of Jehu's prompt action is familiar to every reader of the OT. The king was taken completely by surprise, and he and his mother were slain at once (2 K 9, 10).

The extermination of Ahab's house was a foregone conclusion. The skill of Jehu is seen in his making the chief men in the kingdom partners in the crime. The extermination of the royal house in Judah seems uncalled for, but was perhaps excused by the times on account of the close relationship with the family of Ahab. It has been suggested that Jehu purposed to put an end to the independence of Judah, and to incorporate it fully with his own kingdom. But we have no direct evidence on this head. Hosea saw that the blood of Jezreel rested upon the house of Jehu, and that it would be avenged (Hos 1^4).

Elisha's activity extended through the reign of Jehu, but the narrative of the prophet's life tells us little of the king. From another source—the Assyrian inscriptions—we learn that Jehu paid tribute to Shalmaneser in the year 842 B.C., which must have been the year of his accession. He probably hoped to secure the great king's protection against Damascus. But he was disappointed in this, for after a single expedition to the West in 839 B.C. the Assyrians were occupied in the East. The latter portion of Jehu's reign was therefore a time of misfortune for Israel. H. P. S.

JEHUBBAH.—An Asherite, 1 Ch 7^{34}.

JEHUCAL.—A courtier sent by king Zedekiah to entreat for the prayers of Jeremiah, Jer 37^3; called **Jucal** in 38^1.

JEHUD.—A town of Dan, named between Baalath and Bene-berak, Jos 19^{45}. It is probably the modern *el-Yehûdiyeh*, 8 miles E. of Joppa.

JEHUDI ('a Jew').—An officer of Jehoiakim, at whose summons Baruch read to the princes of Judah the roll of Jeremiah's prophecies, and who was afterwards himself employed to read the roll to the king, Jer $36^{14, 21, 23}$.

JEHUDIJAH, 1 Ch 4^{18} (AV).—See HAJEHUDIJAH.

JEHUEL.—A Hemanite in Hezekiah's reign, 2 Ch 29^{14} (AV **Jehiel**).

JEHUSH, 1 Ch 8^{39} (AV).—See JEUSH, **3.**

JEIEL.—**1.** A Reubenite, 1 Ch 5^7. **2.** An ancestor of Saul (1 Ch 8^{29}, supplied in RV and RSV from 9^{35}). **3.** One of David's heroes, 1 Ch 11^{44}. **4. 5.** The name of two Levite families: (*a*) 1 Ch $15^{18, 21}$ 16^5, 2 Ch 20^{14}; (*b*) 2 Ch 35^9; called **Ochiel** in 1 Es 1^9 (RV **Ochielus**). **6.** A scribe in the reign of Uzziah, 2 Ch 26^{11}. **7.** One of those who had married foreign wives, Ezr 10^{43}. **8.** 2 Ch 29^{13} (AV); see JEUEL, **2.** **9.** Ezr 8^{13} (AV); see JEUEL, **3.** In **2**, **3**, **6**, **7**, *K^{e}thîbh* has JEUEL.

JEKABZEEL.—See KABZEEL.

JEKAMEAM.—A Levite, 1 Ch 23^{19} 24^{23}.

JEKAMIAH.—**1.** A Judahite, 1 Ch 2^{41}. **2.** A son of king Jeconiah, 1 Ch 3^{18} (AV **Jecamiah**).

JEKUTHIEL.—A man of Judah, 1 Ch 4^{18}.

JEMIMA, Job 42^{14} (AV).—See JEMIMAH.

JEMIMAH.—The eldest of Job's daughters born to him after his restoration to prosperity, Job 42^{14} (AV **Jemima**).

JEMNAAN, Jth 2^{28} (AV, RV).—See JABNEEL, **1.**

JEMUEL.—A son of Simeon, Gn 46^{10}, Ex 6^{15}; called **Nemuel** in Nu 26^{12}, 1 Ch 4^{24}.

JEPHTHAE, He 11^{32} (AV) = **Jephthah** (q.v.).

JEPHTHAH.—The story of this 'judge' is given in Jg 11 f, to which Jg 10^{17f} is the introduction. He was a Gileadite, *i.e.* he belonged to the trans-Jordanic Israelites, was well known for his military skill, and was the 'son of a harlot.' The latter phrase may indicate no more than that he was, unlike his half-brothers, not of pure Israelite stock, cf Abimelech Jg 8^{31}. He was therefore excluded from the family inheritance and became a freebooter in the land of Tob, an Aramaean state to the N. of Gilead. But the Gileadite clan was threatened by the Ammonites, and the elders of the clan appealed to him to lead them against the attackers. He agreed on condition that he became the permanent head of the clan, a condition which the elders accepted.

The section which follows (11^{4-11}) presents difficulties, since while it is addressed to the Ammonite king, it appears to relate to the Moabites, and refers specifically to Chemosh, the Moabite god. It is possible that we have here a similar story of strife between Israelites and Moabites which has been assimilated to the Jephthah story.

Jephthah is then possessed by superhuman energy (the spirit of the Lord) and attacks the Ammonites. He makes a vow that on his return with victory from the battle, he will offer as a burnt-offering to God whoever first comes from his house to welcome him; that is one in whom the *nephesh* of Jephthah is, thus representing Jephthah himself. He is victorious in the battle and on his return home is met by his daughter, an only child. Distressed and grieved though he is, neither he nor his daughter contemplate any evasion of the vow. She asks for two months' delay in order to 'bewail her virginity,' after which she returns for the fulfilment of the vow. Then follows, 12^{1-6}, an incident which recalls 8^{1-3}, in which the Ephraimites again show their resentment to any challenge to their leadership in the tribal confederacy. The dispute leads to a battle in which the Ephraimites are defeated. It is in this instance that the dialect difference in pronunciation of Shibboleth/Sibboleth is noted as a means of distinguishing between Gileadite and Ephraimite. Jephthah's leadership lasted six years, but the tradition did not preserve the name of his place of burial.

The precise significance of the sacrifice of Jephthah's daughter is obscure, and is perhaps deliberately so in the interests of true Yahweh worship which appears to

have been from an early period opposed to human sacrifice and intolerant of rites associated with pagan deities. In general the features of the story are: (1) The vow which, having once been uttered, has a concrete existence and must be carried into effect (Nu $30^{2ff.}$, Ps $66^{13ff.}$, Pr 20^{25}). (2) The sacrifice was a burnt offering, that is a gift whereby relationship is maintained; and the suggestion that it was expected to be a member of Jephthah's household may mean that it was thought of as a self-offering, since the 'soul' of the head of the house extends to all its members. (3) Jephthah's daughter led the company of maidens who came to meet the victor with a song of triumph, cf Ex 15^{20}, 1 S 18^{6}, Ps 68^{25}. (4) The mourning of her virginity which, as the story is presented, is a matter for lamentation that she died unmarried and childless. (5) The story lies at the heart of some religious custom of lamentation which was celebrated annually by Israelite women for four days. Nothing further is known of this custom in the OT. Since not even the time of the year is given, we can only regard as possible the attempt to relate this to the 'weeping for Tammuz' (Ezk 8^{14}) or some local Canaanite fertility rite. A. S. H.

JEPHUNNEH.—1. The father of Caleb, Nu 13^{6} etc. **2.** A son of Jether an Asherite, 1 Ch 7^{38}.

JERAH.—Mentioned in the genealogies of Gn 10^{26} and 1 Ch 1^{20} as a son of Joktan. Probably, in analogy with other names in this connexion, Jerah is to be taken as the designation of an Arabian tribe. The Arabic geographers refer to places named *Warâkh*, *Yurâkh*, *Yarâh*, with any one of which it might be identified. On the other hand, in Hebrew the word signifies 'new moon'; it may therefore be the translation of a totemic clan-name. In fact, Bochart pointed out that 'sons of the moon' is a patronymic still found in Arabia. W. M. N.

JERAHMEEL ('May El have compassion!').—**1.** A non-Israelite clan in the extreme S. of Palestine, with which David cultivated friendly relations during his exile (1 S 27^{10} 30^{29} **Jerahmeelites**). After Saul's death the Jerahmeelites formed part of the little principality over which he reigned in Hebron. How indistinct the recollection of them was appears from the various forms assumed by their name in MSS of the LXX: **Jesmega, Israelei, Aermon, Israel, Jeramelei.** Subsequently they were considered to have been a Judahite clan (1 Ch $2^{9, 25ff. 35-42}$: here Jerahmeel is Caleb's elder brother; the list of his descendants in vv.$^{35-42}$ is of later origin than vv.$^{9, 25-27}$ and brings them down to the Chronicler's day). We have no historical or other records connected with these names, save that Molid is a town mentioned by the name Moladah elsewhere (Jos 19^{2}, Neh 11^{26}). **2.** LXX and Old Latin read 'Jerahmeel' at 1 S 1^{1} as the name of Samuel's grandfather. In all probability the **Jeroham** of MT is an abbreviated form, like *Jacob* for *Jacob-el*, or the *Yarkhamu* found in a Babylonian list of Hammurabi's time. **3.** One of the three men ordered by Jehoiakim to arrest Jeremiah and Baruch, Jer 36^{26}. AV follows Vulgate (*filio Amelech*), calling him 'son of Hammelech'; RV and RSV, with LXX, 'the king's son.' He was a scion of the royal house, but not necessarily a child of Jehoiakim. **4.** In a list of Levites, 1 Ch 24^{20-31}, drawn up considerably later than that in $23^{6ff.}$, Jerahmeel's name is added (v.^{29}) as a son of Kish. There must at the time have been a division of Levites called after him, and not, as previously, after Kish. J. T.

JERECHU, 1 Es 5^{22} (RV)=**Jericho** (RSV; cf Ezr 2^{34}, Neh 7^{36}).

JERECHUS, 1 Es 5^{22} (AV).—See JERECHU.

JERED.—1. 1 Ch 1^{2} (AV); see JARED. **2.** A Judahite, 1 Ch 4^{18}.

JEREMAI.—A Jew of the family of Hashum who had married a foreign wife, Ezr 10^{33}, 1 Es 9^{34} (AV, RV **Jeremias**).

JEREMIAH.—1. A warrior of the tribe of Gad, fifth in reputation, 1 Ch 12^{10}. **2.** The tenth in reputation, 1 Ch 12^{13}, of the same Gadite band. **3.** A bowman and slinger of the tribe of Benjamin, 1 Ch 12^{4}. **4.** The head of a family in E. Manasseh, 1 Ch 5^{24}. **5.** A man of Libnah, whose daughter Hamutal was one of the wives of Josiah, and mother of Jehoahaz, 2 K 23^{31}, and Zedekiah, 2 K 24^{18}, Jer 52^{1}. **6.** The son of Habazziniah and father of Jaazaniah, the head of the Rechabites, Jer 35^{3}, in the time of the prophet Jeremiah. **7.** A priest who returned with Zerubbabel, Neh 12^{1}. His name was given to one of the twenty-two courses of priests (Neh 12^{12}). **8.** A priest who sealed the covenant, Neh 10^{2}, and took part in the dedication of the wall of Jerusalem, 12^{34}. **9.** The prophet. See next article.

JEREMIAH.—1. The times.—Jeremiah was born during the closing years of Manasseh's long reign (687–642 B.C.). In the thirteenth year of Josiah (640–609 B.C.) he was called to be 'a prophet to the nations' (1^{5}). His prophetic career extends from 627/626 B.C. to the fall of Jerusalem in 586 B.C. ($12^{ff.}$) and for some time after this until he vanishes from sight among his fugitive fellow countrymen in Egypt (chs. 40–44). These four decades are among the most fateful in the history of the ancient Near East. A great Semitic empire came to a disastrous end, and another rose from its ashes. It was a turbulent and revolutionary time in which new vitalities asserted themselves, of rising empires and reviving nationalisms, of a new awakening—and yet of nostalgia for the past, of cultural change and literary activity.

(*a*) THE NEAR EAST.—Assyria had long ruled the East. From the time of the military campaigns of Ashur-nasir-pal II. (884–858 B.C.) and of his successor, Shalmaneser III. (858–824 B.C.), until its decline during the reign of Ashur-bani-pal (668–633 B.C.) it had been the dominant power in Western Asia, particularly since the accession to the imperial throne of the usurper Tiglath-pileser III. (744–727 B.C.). The zenith of its prestige was attained under Esarhaddon (680–669 B.C.) and the early years of Ashur-bani-pal, but it then entered a period of rapid decline. The latter's victory over Egypt at the Battle of Thebes in 663 B.C. was the turning point of Assyrian power (cf Nah 3^{8}). Invasion from without and intrigue from within, the rise of revolutionary movements throughout the empire, and seething resentment of Assyrian tyranny brought about widespread disintegration and finally collapse. Ashur-bani-pal consoled himself by collecting the literary monuments of the past in his great library at Nineveh. Egypt revived under Psammetichus I. (663–609 B.C.), the able monarch of the 26th Saïtic dynasty. Hordes of Cimmerians and Scythians from the north, probably the Umman-manda of the inscriptions, threatened the security of the empire (Herodotus, *History*, Book I, 103–106), and the Bedouin tribes along its fringes grew increasingly restive and revolutionary. While the foe from the north referred to in Jer 4^{5}–6^{30} and elsewhere cannot be simply identified with these invaders, it is probable that the international situation reflected in these movements lies behind them.

Ashur-bani-pal died in 631 B.C., and by 626 B.C. Nabopolassar, the Chaldaean governor, was in full revolt. The long period of conflict which followed is illuminated for us in the Babylonian Chronicle for the years 626–623 and 616–594 B.C. (see D. J. Wiseman, *Chronicles of the Chaldaean Kings*, 1956). In 616 B.C. Nabopolassar was campaigning in Assyria; shortly thereafter the Medes intervened under Cyaxares. In 614 B.C. the city of Ashur was besieged and captured. Finally, in 612 B.C., under the combined assault of the Chaldaean and Median armies with the aid of the Umman-manda, the city of Nineveh fell. The event is memorialized in the exultant poem of the prophet Nahum (ch. 3). Two years later the remnants of the Assyrian armies were defeated at Harran. The next year Pharaoh Neco (609–593 B.C.) on his way to come to the aid of the remnants of the Assyrian army stopped at Megiddo where he was met by Josiah, king of Judah,

whom he forthwith put to death. The details of the episode are far from clear. Whether there was an actual military encounter or not, is uncertain. It may well be that Josiah sought to hinder the advance of the Egyptian army and so prevent the resuscitation of Assyria. In 605 B.C. the Egyptian garrison troops were routed at Carchemish by the Chaldaean army under Nebuchadrezzar, son of Nabopolassar. The Chaldaean Chronicle observes laconically, 'Nebuchadrezzar conquered the whole of Hatti.' The history of the Near East for the next half century lay in the hands of the Chaldaeans. Jeremiah seems to have been well aware of the significance of the event for the future of Western Asia.

(*b*) JUDAH.—Manasseh's subservience to Assyria brought about a long period of syncretism with the astral cults and a revival of Canaanite fertility worship on the high places. But already during his reign revolutionary forces were at work in Judah. With the end of Josiah's minority these came to a head. We are informed by 2 Chronicles (34^3) that already in his youth Josiah began to seek the God of David, 'and in the twelfth year began to purge Judah and Jerusalem.' This may well preserve an authentic reminiscence. If so, we may regard the Reformation of 621 B.C. as the culminating achievement of prophetic and priestly groups within the kingdom of Judah. It found expression not only in many humanitarian and religious reforms but also in nationalistic action. The king sought to re-establish the kingdom of David, and to bring it to something of its ancient prestige. Albrecht Alt (*PJB* XXI, 1925, 100 ff) and Martin Noth (*History of Israel*, pp. 271–274) believe that the boundaries given in Jos 15^{21-62} and 18^{21-28} reflect the limits of Josiah's kingdom. But more significant for the future was the religious Reformation. In protest against the plethora of nature cults of Assyria and Canaan, Josiah instituted a vast programme of reform. It was a time when Israel needed to be called back to her true origins in the Mosaic age. Although he was king of Judah, Josiah undid many of the practices of the royal cult, and called Israel back to its ancient heritage as a chosen, holy, and responsible people, bound by covenantal ties to Yahweh, the Lord of history. The reforms described in 2 K 23^{4-25}, probably an extract from the royal annals (so Noth), were designed to return Israel to the cultic life and ethical requirements of the old twelve-tribe amphictyony whose centre once lay at Shechem and later at Shiloh. The Book of the Covenant found by Hilkiah in the Temple (2 K 23^{2f}) is incorporated into our present Book of Deuteronomy, and it is now generally held that it had its provenance in the northern kingdom, as is suggested *inter alia* by its affinities with the Elohist and with Hosea and Jeremiah. The nature cults must be exterminated root and branch, the syncretistic rites and celebrations at the high places must cease, and the Temple at Jerusalem be recognized as the national centre for true worship. Israel is a holy people consecrated to the service of Yahweh. What this service implied is elaborated in great detail. The Reformation of 621 B.C. is the greatest event in the history of Israel's religion since the Mosaic age, and it was destined to exert a profound influence on its subsequent development. But it must be remembered that it was a *reformation*, a return to the election-covenant faith of Israel's beginnings and that even the style and language of the Book of the Covenant has its sources in ancient recital, rituals, and legal requirements.

The period from 621 B.C. to the death of Josiah at Megiddo in 609 B.C. is to all intents and purposes a blank in the prophetic career of Jeremiah, but, as we have seen, it is well documented so far as the history of the Near East is concerned. The tragic end to Josiah's prosperous and peaceful reign (Jer 22^{15b-16}) was a grievous blow to the reforming movement. Jehoahaz was anointed king over his older brother Eliakim, but was ordered by Neco to Riblah (22^{10-12}), and Eliakim was appointed by the latter as his successor and given the regnal name of Jehoiakim. Three years later, at the Battle of Carchemish, Nebuchadrezzar triumphed over his Egyptian foe (Jer 46^{1-12}; cf 25^1 36^1 45^1). In 603–602 B.C. Jehoiakim withheld tribute from his Chaldaean overlord. Bands of marauding Chaldaeans, Syrians, Moabites, and Ammonites invaded the land (2 K 24^2). A few years later, in 598 B.C., Jehoiakim again refused tribute. Jerusalem was subjected to siege. Many of its foremost citizens and skilled artisans were taken into captivity. Jehoiachin, was taken to Babylon with his family, where, according to inscriptions published by E. F. Weidner, he was given the preferential treatment of a captive monarch ('Jojachin, König von Juda, in Babylonischen Keilinschriften,' *Mélanges Syriens*, 1939, ii, 923–927). The following years were confused and troubled. Jerusalem was split between pro-Egyptian and pro-Chaldaean factions; the young king Zedekiah was too immature to assume leadership, and the prophets were at odds. The biographical narratives of the Book of Jeremiah give us a vivid account of the prophet's activity during these years. Zedekiah (597–586 B.C.), uncle of the lamented Jehoiachin, was under suspicion as the appointee of Nebuchadrezzar. He was insecure and timid, and proved unable to stem the tide of perfervid nationalism. He failed more through weakness than through evil intent; he sought Jeremiah's advice, but lacked decision to follow it. Early in his reign a conspiracy was on foot in Palestine against the Chaldaeans, which he was tempted to join (Jer $27^{1-11, 12-15}$. In v.^{1} read *Zedekiah*; MT *Jehoiakim*; cf 28^1). The leaders in Judah, instead of being cowed by the disastrous siege and conquest of Jerusalem in 598–597 B.C., were eager for revolt. Both in the city (chs. 27–28) and among the exiles (ch. 29) the popular prophets were urging them on by their optimistic assurances. At last Zedekiah yielded to the tide, breaking his oaths of allegiance to Nebuchadrezzar—conduct sternly condemned by Ezekiel (17^{11-21}) as well as by Jeremiah, and Judah was launched on a struggle which was to end not only in national disaster, the destruction of the Temple, and the termination of the Davidic dynasty which had continued unbroken for more than four hundred years, but also in a profound modification of Israelite faith and understanding of history. The siege of Jerusalem was prolonged for a year and a half (587–586 B.C.). The Egyptians, under the new and ambitious Pharaoh Hophra (Apries, 588–569 B.C.), effected a diversion of the Chaldaean troops (Jer 37^{5-10}, Ezk 17^{15}), but as so often before Pharaoh proved 'a broken reed to those who trusted in him.' Reduced by famine, Jerusalem was stormed, Zedekiah was captured in his attempt to escape, his sons were slain before his eyes, he was blinded and then taken as a captive to Babylon (2 K 25^{1-7}). This time Nebuchadrezzar showed little mercy, having learned his lesson from his liberal treatment of the city in 597 B.C. The city was razed, the Temple destroyed, and the survivors of the siege and the executions that followed were carried into exile. Judah was made a province of the empire with its capital at Mizpah. Gedaliah, a member of the old family of Shaphan, was appointed its governor. The little remnant suffered more reverses. Gedaliah was slain as were many of his compatriots. In despair the survivors went to Egypt. Jeremiah, who had in vain resisted this migration, was carried with them; he had the distress of seeing his companions relapse into open idolatry, protesting that they had fared better when worshipping 'the queen of heaven' than under Yahweh. Jewish tradition relates that he died at the hands of his incensed fellow-exiles.

2. The life of Jeremiah.—The four decades of Jeremiah's prophetic ministry, from the Chaldaean declaration of independence in 626 B.C. to the fall of Jerusalem in 586 B.C., must be counted among the great international periods of human history. Not since the New Empire had the Near East suffered such profound political convulsion and ferment. The literature from Mesopotamia is richer in astrological omen texts from this period than from any other time of which we have knowledge.

In Israel it was pre-eminently an age of prophecy. Just as the history and daily life of the other peoples of the Near East are abundantly documented with annals and incantation texts, so the OT is richer in its documentation for this period than for any other equivalent time in Israel's history. For not only do we have such prophetic books as Zephaniah, Nahum, Habakkuk, Jeremiah, and Ezekiel, but also the substantial Deuteronomic literature whose true origin must be discerned primarily in the recrudescence of the prophetic movement. Moreover, both Jeremiah and Ezekiel refer to many other prophets who were active in their time. In all this literature the prophet Jeremiah occupies a position of central importance. He more than any other of the men of Israel was called to speak to his age, and his own life was a profoundly interior response to the Word of God as it was addressed to the men of Judah in the closing decades of the southern kingdom. Of no other prophet do we have so full and detailed and varied a record. His poetry, of which we have a substantial deposit, is unrivalled in the records of Semitic antiquity in the intensity of its lyricism, its dramatic power, its abundance of memorable images, its sensuousness and passionateness, its immediacy of response to every mood of nature and every nuance of the soul of man. His intimate self-disclosures in the so-called 'confessions' expose to us the very depths of his soul; only in Job and the Apostle Paul and Augustine and Luther and Kierkegaard do we encounter anything similar. Yet, in striking contrast to Jeremiah's own words, we are in possession of a number of biographical narratives from a writer of quite a different temper and spirit. Thus we are permitted to see the man not only through his own eyes but through the eyes of one who could record his observations in straightforward and circumstantial prose. In addition we have a third source where the style is strongly reminiscent of the so-called Deuteronomic school of writers. It is not too much to say that we know more about Jeremiah as a person than about any figure in the Bible, with the possible exception of the Apostle Paul. Of David too we have an ample record, but not of the kind we possess for Jeremiah. Here we are permitted to view a portrait in all its light and dark shadows.

It is clear that in Jeremiah we are looking into the face of a poet of extraordinary sensitivity, a man with a seeing eye and a hearing ear, quickly responsive to all that went on about him, with a rare ability to express in moving language all that he observed and felt and suffered, all that he had heard from Yahweh, even though it might offend his proclivities toward self-centredness and hostility. Yet, despite all his self-preoccupation, he was a man of the out-of-doors; he is a *Hebrew* Wordsworth in his feeling for the hidden mystery within the world of created things, but profoundly different from the English poet in his apprehension of the historical revelation which centred in the election-covenant events in Egypt and at Sinai (cf 2^{2b-13}), which for him was always prior to every manifestation in the world of nature. While he could observe the blossoming almond in early spring (1^{11-12}), the hot air of the sirocco (4^{11}), the migratory impulse within the stork and the times of the turtledove, swallow, and crane (8^{4}), the inchoate drive of the young camel and the sexual urge of the wild ass (2^{23-24}), and even the *pathos* of the heavens and the earth (2^{13} $4^{23-26, 28}$), they were but sign and symbol of Yahweh's active sovereignty. He needed the sustaining comfort and joys of family life, but they were denied him (16^{1-2}). He was consoled and strengthened by the awareness of Yahweh's presence, but he knew the spiritual torment of His absence ($1^{8, 19}$ 15^{20} 14^{8-9}); he could sense Yahweh's contending in his behalf like a dread warrior (20^{11}), live by faith in the power of His Word (1^{9} $15^{16, 19}$), though he could reel like a drunken man, utterly shaken and convulsed by its holy drive (23^{9}) and be consumed by its holy fire ($20^{8f.}$). He was destined to be a separated man, separated from every area of normal human life it would seem, but worse, he was afflicted by a sense of alienation from God (14^{7-9} 15^{18} 17^{17} 20^{7}). This sensitive and passionate man was called to be a prophet to the nations (1^{5}), an intercessor for the people, yet denied this rôle when he deemed it most necessary (7^{16} 11^{14} 14^{11-12}), Yahweh's itinerant through the streets (5^{1-6}), a gleaner of the vines (6^{9}), a tester and refiner (6^{27-30}), a living parable (13^{1-11} 18^{1-3} $19^{1-2, 10-11}$), a 'fortified city, an iron pillar, and bronze walls against the whole land' (1^{18} 15^{20}). Ridiculed, rejected, persecuted, and denounced, he nevertheless gave expression to a faith which made it possible for Israel to transcend the collapse of the nation, the destruction of the Temple, and the end of the Davidic dynasty. Little wonder that the features of his portrait can be recognized in Second Isaiah's description of the Servant of the Lord (*e.g.* Is 49^{1-6} 50^{4-9} 53^{1-12}).

Jeremiah was born in the little village of Anathoth, modern *Râs el-Kharrûbeh*, about two and a half miles NE. of Jerusalem, a son of Hilkiah the priest whose lineage may be traced to Abiathar, whom Solomon expelled to Anathoth upon his accession to the throne (1 K 2^{26}). The town lay in Benjamin, for which Jeremiah seems to have had an enduring affection (6^{1} 11^{18-23} 32^{15}). Of his early years we know nothing, but it is clear that he was reared in the faith and traditions of his fathers. Already his earliest oracles reveal a firm grasp of his election-covenant heritage (2^{2b-3}) and an intimate familiarity with his prophetic predecessors, above all with Hosea, and perhaps with the reforming movement which was to eventuate in the great Reformation of 621 B.C. His call came in 626 B.C. Before his birth Yahweh had ordained that he should be His prophet and be set apart for His service. Like Moses, Jeremiah shrinks from the task that is laid upon him, but finally he yields to the power of Yahweh's Word. He is then commissioned 'over nations and over kingdoms, to pluck up and break down, to build and to plant' (1^{9b-10}). Two visions follow, one of an almond rod (*shāḳēdh*) a sign that Yahweh will watch over (*shōḳēdh*) His Word to bring it to realization; the other of a boiling pot or cauldron 'facing away from the north,' a portent of the imminent invasion.

Jeremiah's prophetic career may be ordered as follows:

A. From the call in 626 B.C. to the Reformation of 621 B.C.
B. From the Reformation to Josiah's death in 609 B.C.
C. From 609 B.C. to the Battle of Carchemish in 605 B.C.
D. From Carchemish to the first deportation in 597 B.C.
E. From 597 B.C. to the destruction of Jerusalem in 586 B.C.

A. From 626–621 B.C.—The prophet's activity during this period is addressed to two major themes: (1) Judah's syncretism with the nature cults and (2) the imminent coming of the foe from the north. He opens his oracles with a succinct summary of Israel's covenant life with Yahweh in the days of her origins (2^{2b-3}), and then contrasts with them existing conditions. Rulers, priests, prophets, and people have all abandoned their God and have gone after Canaanite Baal. 'Where are the gods you have made for yourself?' In a long oracle he calls upon his people to return to their God (3^{1}–4^{4*}; * indicates that the passage is composite). The following section is devoted mainly to the northern foe (4^{5}–6^{30}). Here the prophet rises to the heights of lyrical feeling. The foe has been identified with the Scythians, the Babylonians, and the Medes; some believe that the poems were first addressed to the Scythians, but upon their failure to appear were altered to suit the Chaldaeans. While a definitive solution has not been reached, it is probable that Jeremiah had no one power in mind, but was motivated by a deep presentiment of imminent disaster. Ch. 5 reflects the shocking impression made by his journey through the streets of Jerusalem. Later

experience (ch. 6) eloquently confirmed his conviction that the people were one and all destined for judgment.

B. From 621–609 B.C.—Jeremiah's attitude towards Josiah's reformation is the enigma of his prophetic career. In 11^{1-8} we receive the impression that he first responded favourably to the words of the covenant. Although the language is Deuteronomic, it may well preserve an authentic reminiscence. Surely there was much in the Reformation to which he could give hearty assent, for it was based upon the election-covenant faith which was the heart of his own message. Moreover, the stress upon Israel's uniqueness as a holy people, upon Yahweh's abiding love for His people and a responding love on their part, upon the destruction of the high places, and upon moral reforms—all this surely had his approval. Yet the period after 621–609 B.C. is, so far as Jeremiah is concerned, one of silence. The Reformation may have been so successful during these years that Jeremiah did not feel it incumbent upon him to prophesy, or the experience of rejection and failure during his early ministry so acute that he was prompted to withdraw from prophetic activity, though there is no evidence for such a supposition. Be that as it may, the death of Josiah at Megiddo awakened the nation to its perilous state. When Jehoahaz was carried off to Riblah by Neco three months later Jeremiah lamented for him (22^{10}).

C. From 609–605 B.C.—Judah was in despair. At the beginning of Jehoiakim's reign, on the occasion of a national gathering at the Temple, perhaps the festival of the New Year associated with the coronation of Jehoiakim, Jeremiah preached a sermon denouncing the false reliance upon the Temple as a place of refuge, calling the people to amend their conduct, and reminding them of the evil fate that had befallen Shiloh, the centre of the twelve-tribe amphictyony in the days of the Judges (Jg 21, 1 S 1). The speech in 7^{1-15} is paralleled by the account of ch. 26, which describes the outrage of the priests and princes, how Jeremiah almost lost his life, the prophet's eloquent defence, and the verdict of the people. A false religion had entrenched itself within the forms of the Covenant, armed with the weapons of institutionalism and power. Jehoiakim proved to be a tyrannical and oppressive king, and the reforming movement suffered a sharp reversal during his reign ($7^{17-19, 30f}$ 11^{9-13}). Jeremiah's activities in support of the Reformation were deeply resented, even by his own townsmen and relatives at Anathoth, who now sought to dispose of him (11^{18-23}). Moreover, Judah compensated for her faithlessness to the covenant bond and her disobedience to its demands by sacrificial offerings and cultic acts, which Jeremiah attacked with great rigour (7^{21-24} 11^{15f} 17^{1}). Insistently he warned the people of their peril, exhorted them to obedience ($7^{23-26, 27-29}$ 22^{1-5}), and demanded a change of mind and heart (8^{4-7} 9^{5}), even though he had come to believe that they were incapable of true repentance. He launched a bitter invective against Jehoiakim and reminded him of the good deeds of his father Josiah (22^{13-19}). In the year of the Battle of Carchemish (605 B.C.) he was commanded to dictate all his words up to that time to Baruch, his amanuensis (36^{1-3}). The words were read on the occasion of a national fast (36^{9}) in the hearing of the people. The indictment was so serious that it was called to Jehoiakim's attention, and when the scroll was read aloud to him, he proceeded to cut off the columns and throw them into the fire. Jeremiah was forced into hiding and his fellow-prophet, Uriah, lost his life. Ch. 46 preserves a poem on the Battle of Carchemish, which may be the prophet's own composition. About this time, too, after he had again proclaimed the imminent doom of Jerusalem, Pashhur the priest put him in stocks for the night. When he returned to release Jeremiah, the prophet delivered a bitter denunciation of the priest and accompanied it with his original words (19^{14}–20^{6}).

D. From 605–597 B.C.—It is perhaps to this period we are to assign most of Jeremiah's 'confessions' (11^{18}–12^{6*} 15^{10-21*} 17^{12-18} 18^{18-23} 20^{7-18}). Such experiences as the furor aroused by his Temple address and the Pashhur episode doubtless exacted a heavy toll. In the confessional laments we hear him bewailing his birth, grieving that it is his fate always to stand in opposition, 'a man of strife and contention against the whole land' (15^{10}). He recalls times when God's Word was a delight (15^{16}), but he is afflicted by his sense of alienation: 'I sat alone because thy hand was upon me' (15^{17}). He even approaches blasphemy in accusing Yahweh of deceiving him (20^{7}; cf 14^{8}), and cries out in the bitterness of inward agony (15^{18}). But what is remarkable in these cries is that Jeremiah is able to hear YahEeh cancelling his protestations and calling upon him to return. In this same period Jeremiah brings the Rechabites to the Temple as an example of obedience to their vows (ch. 35). When Jehoiachin was taken to Babylon in 597 B.C. he gave no hope of his return.

E. From 597–586 B.C.—Nebuchadrezzar had dealt liberally with Judah. He permitted her to retain her own king, another son of Josiah and an uncle of the lamented Jehoiachin, whose regnal name was Zedekiah. But he was equipped neither by temperament nor by ability to direct the nation along a stable course. The fires of nationalism continued to blaze even after that terrible siege and the exile of many of the leaders and artisans, and the priests and prophets added fuel to the flames by encouraging the people to believe that Chaldaea would be defeated and that the exiles would soon return. From the beginning of his ministry Jeremiah had opposed their apostasy, but now the issue was crucial, and he did not hesitate to denounce their ungodliness and their slippery counsels (23^{9-12}). He urged the people not to listen to their optimistic predictions; their 'visions' were but fabrications of their own minds. None of them had stood in Yahweh's council or had heard His Word. When the representatives of the smaller nations gathered in Jerusalem, doubtless for the purpose of creating a common front against Chaldaea, he appeared before them as they were leaving the council chamber, with thongs and yoke-bars on his neck (27^{1ff}). He proclaimed Yahweh's sovereignty over the whole earth and asserted that it was He who determined the fate of nations. To Nebuchadrezzar His servant He had given all the lands; resistance was therefore futile. The prophets, diviners, soothsayers, and sorcerers were lying. Some time later, in the presence of a crowd of priests, prophets, and people gathered in the Temple, Hananiah, a prophet from Gibeon, proclaimed the imminent return of the exiles and of Jehoiachin. Jeremiah shared Hananiah's wish, but reminded him that the prophets 'of ancient times' prophesied only of doom and that the prophet who proclaimed 'peace' would be justified only by the event. Thereupon Hananiah took the yoke-bars from Jeremiah's neck and broke them, declaring that even so Yahweh would break the yoke of Nebuchadrezzar from the necks of the nations. Jeremiah departed, but later returned with bars of iron and told Hananiah that he had been sent by Yahweh and that within a year he would die (chs. 27–28). Perhaps it was about this time that Jeremiah wrote a letter to the exiles admonishing them not to be deceived by the dreams of the diviners and prophets. The exile would be long, and he urged them to seek the welfare of their captors, 'for in its welfare you will find your welfare' (29^{1-14}).

The demand for resistance grew more and more insistent, and Zedekiah was no longer able to withstand its pressure. Jeremiah had sought to uphold the hands of the young and unstable monarch by counselling him in season and out not to be deterred by all the pro-war propaganda, for to yield was only to invite destruction. But his efforts were unavailing. Nebuchadrezzar came with his army and besieged Jerusalem for a year and a half. The city was surrounded and the towns of Judah systematically destroyed. The Lachish ostraca which come from this time show a number of interesting affinities with the Book of Jeremiah (see J. B. Pritchard,

ANET, 321–322). During the siege Jeremiah went to the king to tell him that Yahweh had given the city to Nebuchadrezzar and that he would be carried off to Babylon (34$^{1-6}$). As the siege continued Zedekiah made a covenant with the people that they should emancipate their slaves; at first the people held to their agreement, but in a short time took them back again. Jeremiah rebuked them severely for this breach of faith (34$^{8-22}$). The siege was lifted some time later at the approach of the Egyptian army. Zedekiah asked the prophet to pray for the city, but the Word of the Lord which came to him was that the city would certainly be destroyed (37$^{1-10}$). Jeremiah sought to take advantage of the temporary relief by going to his home at Anathoth, but was met at the Benjamin gate of the city by a sentry who forthwith arrested him. He was accused of desertion to the enemy which he heatedly denied. He was then taken to the princes, who were enraged. He was beaten and imprisoned. After he had languished there for some time Zedekiah sent for him to inquire whether there was any word from Yahweh. Jeremiah replied there was: 'You shall be delivered into the hand of the king of Babylon.' He then implored the king not to return him to prison; his request was granted, and he was committed to the court of the guard (37$^{16-21}$). While here he received a word from Yahweh that he should purchase a field from his cousin Hanamel since the right of redemption was his. He interpreted the word as a sign that normal commercial actions would be resumed in the city (32$^{1-15}$). Jeremiah continued to urge capitulation to the Chaldaeans, even by individual citizens: it was a choice between life or death. His words evidently had some effect, for he was accused of weakening the morale of the troops. The princes demanded his death, and Zedekiah admitted that he could no longer resist their demands. So Jeremiah was confined to a cistern of the court of the guard. He was later rescued by Ebed-melech (38$^{1-13}$). Zedekiah received him at the entrance to the Temple, and a poignant interview followed. The king was desperate, and begged Jeremiah to withhold nothing from him. Jeremiah urged him to surrender, the only alternative being the destruction of the city. Zedekiah, however, feared the revenge of those who had already deserted. He then besought the prophet not to disclose the contents of the interview, even to deny what had taken place, and Jeremiah acceded to his request (38$^{14-28}$).

The Chaldaeans entered the city on the ninth of Ab, (39$^{1-2}$, 2 K 25$^{8-21}$). Nebuchadrezzar was evidently informed as to Jeremiah's activities and instructed the captain of the guard to show him special consideration. He was released from prison and went to Mizpah to join Gedaliah, the governor of the newly created Babylonian province appointed by the Chaldaean king. The little remnant suffered great reverses. Gedaliah and his attendants were slain. The leaders who were left turned to Jeremiah for counsel. After ten days he came with the Word of the Lord. They should remain in Palestine, entrust themselves to the Chaldaeans, and forget all plans of leaving the land. The leaders were incensed, and accused him of being instigated by Baruch. Then they set out for Egypt, taking Jeremiah and his amanuensis with them. While there Jeremiah performed a symbolic act, designed to show that Nebuchadrezzar would devastate Egypt. It may have been in Egypt that Baruch compiled Jeremiah's prophecies with his own prose narratives. It included a special collection known as 'The Little Book of Comfort' (chs. 30–31), much of which has the style and manner of the prophet's early poems. But more important was the prophecy of the new covenant (31$^{31-34}$), based upon forgiveness of all of Judah's transgressions, a covenant in which the Torah would be engraved on men's hearts, so that all men might know him, from the least to the greatest. It was a fit finale to the prophet's long and tortuous career, which had opened with his account of Yahweh's memories of Israel's days of faithfulness to the covenant at Sinai.

3. The book.—The book of Jeremiah is a fabric woven out of several strands. It is a compilation of compilations, containing a great variety of literary forms. While there are many indications of systematic ordering, especially within the collections, it is just as clear that the book as a whole has passed through an involved literary process, that intrusive elements disturb the literary and historical sequence, and that the final edition of the book was prepared long after Jeremiah's death. It is probable that the first edition of the book was the work of Baruch. In the year 604 B.C. Jeremiah dictated to Baruch 'all the words' he had spoken from the beginning of his prophetic ministry in 626 B.C., and later after the burning of the scroll by Jehoiakim (ch. 36) he added many other similar words. Many attempts have been made to reconstruct this scroll. It is probable that it is contained within 1^{5}–25^{13}, though much of this material cannot with propriety be assigned to it, *e.g.* the prophet's personal disclosures and some of the prose accounts. Yet it is in this section that we have by far the greatest amount of authentic Jeremianic prophecy. The second division of the book (chs. 26–45) is composed almost entirely of prose narratives, presumably from Baruch (chs. 30–31 are intrusive). The prophecies against the foreign nations (chs. 46–51) appear to have a different literary history from the rest of the book. Whether any of it stems from Jeremiah it is difficult to say. The vivid oracle on the Battle of Carchemish in 46^{3ff} may be his, and it is possible that his hand may be traced elsewhere. The final chapter of the book is derived from 2 K 24^{18}–25$^{21, 27-30}$, but fortunately includes the important record of the numbers carried into captivity in 597, 586, and 581 B.C. (52$^{28-30}$).

The most influential study of the composition of the book is the monograph by Sigmund Mowinckel, *Zur Komposition des Buches Jeremia* (1914). In this work Mowinckel recognized three major sources or strands: (A) the prophet's *ipsissima verba*, which are to be found exclusively within the compass of chs. 1–25; (B) the work of the author of the book as a whole, a personal-historical composition, present for the most part in chs. 26–45, but containing also 19$^{1-2, 10-11a, 14}$ 20^{6}; (C) a third source, already recognized by B. Duhm, of Deuteronomic style, with the characteristic introduction, 'The Word which came to Jeremiah from Yahweh.' Mowinckel denied that Baruch had any hand in the composition of the book, and assigned Source B to the period between 580–480 B.C. It is doubtful whether this position can be sustained, however, since much of this material has strong claim to be historical, and it may well have been composed during Jeremiah's own lifetime, probably during the years of exile in Egypt. Yet Mowinckel has properly discerned the major strata of the book, and his study forms a good foundation for the critical understanding of its composition.

The first major division of the book is devoted in the main to prophecies against Judah and Jerusalem (chs. 1–25). The superscription is the work of the compiler (1$^{1-3}$), presumably Baruch. Three episodes are associated with the call (1$^{4-10, 11-12, 13-19}$), the third a possible duplicate of the first, which certainly preserves an authentic record stemming from Jeremiah. The early oracles are genuine, though 3^{6-12a} and 15^{-18} are intrusive. In ch. 4, vv.$^{9-10}$ and $^{11-12}$ belong to Jeremiah though they disturb the sequence. The poems on the foe from the north (4^{5}–6^{30}) are authentic. 7^{1}–8^{3} is in prose, but its historicity cannot be questioned. The same applies to 11^{1}–12^{6}. The confessional laments (11^{18}–12^{6}* 15$^{10-21}$* 17$^{12-18}$ 18$^{18-23}$ 20$^{7-18}$) are generally recognized as Jeremiah's. The invectives against the kings in 21^{11}–23^{8}* and against the popular prophets in 23$^{9-40}$ are also original. In its present form ch. 24 does not belong to Jeremiah, but it is based upon an authentic report. 25$^{1-13}$ is Deuteronomic in style, but it witnesses to a crucial stage in the prophet's career.

The biographical narratives of chs. 36–45 (omitting late elements such as 33$^{14-26}$) give us Baruch's memoir of Jeremiah's activity and trials from the beginning of

Jehoiakim's reign (cf 26^1) to his exile in Egypt. The account of the uproar following the Temple speech is a duplicate of 7^{1-15}. The poems in chs. 30–31 do not belong in their present context. They contain both early and late elements. The following passages in all probability belong to Jeremiah: $30^{5-7, 12-17, 23-24}$ $31^{2-6, 7-9, 15-22}$. Some original material may have been reworked in other parts, but in the main the rest is late, bearing the stamp of later writers like Second Isaiah. The oracles against the foreign nations (chs. 46–51) have another history than the foregoing sections. Hans Bardtke ('Jeremia der Fremdvölkerprophet,' *ZAW* liii, 1935, 209–239; liv, 1936, 240–262) has argued for the authenticity of most of these poems. While there is much that is attractive in his view, it is doubtful whether his position can be sustained as he has stated it. Yet the possibility of Jeremianic elements in the prophecies cannot be summarily dismissed.

The Greek translation (LXX) of *Jeremiah* departs from the Massoretic text in two main respects. (1) The oracles against the foreign nations (chs. 46–51) are inserted after 25^{13} and appear in an entirely different order:

MT: Egypt (ch. 46), Philistines (ch. 47), Moab (ch. 48), Ammonites (49^{1-6}), Edom (49^{7-22}), Damascus (49^{23-27}), Kedar and Hazor (49^{28-33}), Elam (49^{34-39}), Babylon (50^{51-58}).

LXX: Elam, Egypt, Babylon, Philistines, Edom, Ammonites, Kedar, Damascus, Moab.

(2) The LXX also differs from MT in its length, being about one-eighth shorter. The subtracted matter usually represents individual verses or parts of verses. At least two omissions may be explained by homoioteleuton (39^{4-13} and $51^{44b-49a}$). Others are probably intentional, since they represent doublets in the Hebrew text (8^{10-12} 30^{10f} 48^{10f}). Still others may be plausibly explained by their omission from the Hebrew *Vorlage* employed by the translators, as in 33^{14-26}. Stylistic and cultic interests may also have played a rôle in some of the omissions. In assessing the value of one text over the other, it must be said that the LXX should be used with circumspection and that each case of divergence should be considered independently.

OUTLINE OF THE BOOK

I. Prophecies Against Judah and Jerusalem: chs. 1–25
  A. Superscription: 1^{1-3}.
  B. The call: $1^{4-10, 11-12, 13-19}$.
  C. Oracles and poems of the early ministry: 2^1–6^{30}.
    1. Against the prevailing syncretism with alien cults: 2^2–4^4.
    2. Poems on the foe from the north: 4^5–6^{30}.
  D. Oracles against cultic practices: 7^1–8^3.
    1. The Temple sermon: 7^{1-15}.
    2. The queen of heaven: 7^{16-20}.
    3. Against sacrifice: 7^{21-28}.
    4. The rites in the valley of Hinnon: 7^{29}–8^3.
  E. Invectives, threats, exhortations, and laments: 8^4–10^{25}.
  F. Jeremiah's support of the covenant reforms: 11^1–12^6.
  G. Parables, laments, and warnings: 12^7–13^{27}.
  H. Liturgy of the great drought: 14^1–15^9.
  I. Confessions and judgments: 15^{10}–20^{18}.
  J. Invectives against kings and prophets: 21^1–23^{40}.
  K. Vision of the baskets of figs: 24^{1-10}.
  L. Summary and conclusion: 25^{1-13}.
  M. The cup of wrath for the nations: 25^{15-38}.

JEREMIAH, LETTER (EPISTLE) OF.—See APOCRYPHA, 9.

JEREMIAS, 1 Es 9^{34} (AV, RV).—See JEREMAI.

JEREMIEL.—The archangel who in 2 Es 4^{36} answers the questions of the righteous dead. AV has *Uriel*, the angel sent to instruct Esdras (2 Es 4^1 5^{20} 10^{28}).

JEREMOTH.—1. 2. Two Benjamites, 1 Ch 7^8 (AV **Jerimoth**) 8^{14}. **3. 4.** Two Levites, 1 Ch 23^{23} 25^{22}; the former called **Jerimoth** in 24^{30}. **5.** A Naphtalite, 1 Ch 27^{19} (AV **Jerimoth**). **6. 7. 8.** Three of those who had married foreign wives, Ezr 10^{26}, 1 Es 9^{27} (AV, RV **Hieremoth**); Ezr 10^{27}, 1 Es 9^{28} (AV, RV **Jarimoth**); Ezr 10^{29} (AV 'and Ramoth' following *Kᵉrê*), 1 Es 9^{30} (AV, RV **Hieremoth**).

JEREMY.—The form in which the name of the prophet *Jeremiah* appears in both AV and RV of 1 Es $1^{28, 32, 47, 57}$ 2^1, 2 Es 2^{18}, as well as in AV of 2 Mac $2^{1, 5, 7}$, Mt 2^{17} 27^9. In the last three passages RV has *Jeremiah*. The form *Jeremy* is used also in both AV and RV in the title of the Epistle ascribed to the prophet in Bar 6^1. RSV consistently uses Jeremiah. See APOCRYPHA, 9.

JERIAH.—The chief of one of the Levitical courses, 1 Ch 23^{19} 24^{23}; called **Jerijah** in 26^{31}.

JERIBAI.—One of David's heroes, 1 Ch 11^{46}.

JERICHO.—A city situated in the Jordan Valley about 5 miles from the north end of the Dead Sea. It is chiefly famous in the Bible as the first city conquered by the Israelites after their passage of the Jordan (Jos 1–7). During the period covered by the OT, it does not thereafter appear as an important town, but is mentioned on a number of occasions during the periods of the United and Divided Kingdoms. The final defeat of Zedekiah, the last king of Judah, by the Babylonians took place at Jericho (2 K 25^5, Jer 39^5 52^8). Josephus records events here in the Maccabaean and early Roman periods. In the Gospels, Jericho figures in the stories of Bartimaeus (Mt 20^{29}, Mk 10^{46}, Lk 18^{35}), Zacchaeus (Lk 19^1), and the Good Samaritan (Lk 10^{30}).

Three major archaeological expeditions have investigated *Tell es-Sulṭân*, usually accepted as the site of OT Jericho, which lies at the source of *'Ain es-Sulṭân* or Elisha's spring. The most recent excavations, sponsored by the British School of Archaeology in Jerusalem, have shown that the settlement is the oldest yet found in Palestine, and indeed anywhere in the Near East. The first evidence is provided by a structure which is probably a sanctuary established near the stream by Mesolithic hunters, *c* 7800 B.C. The descendants of these hunters settled down beside the stream, living at first in a small

settlement, in flimsy huts. Eventually they started to build solid houses, still round in plan like the huts, and these houses spread over an area of nearly ten acres. A population of this size indicates that an efficient agriculture had been evolved, and probably a system of irrigation. By about 7000 B.C. the settlement was defended by a massive stone wall, attached to which was at least one great stone tower. After a period of occupation which produced a large number of house levels one on top of another, this settlement, which can be claimed to be the earliest known town in the world, was destroyed, and the site was occupied by newcomers with a different equipment, still not including pottery. Their houses also were different and were of a more advanced rectilinear plan, with characteristically plastered floors. About 5800 B.C. this settlement also was surrounded by a wall.

The second Neolithic town was in turn destroyed, and the site was occupied by newcomers who brought the use of pottery with them but who had none of the attributes of town dwellers. A second wave of similarly backward people can be equated with a stage which represents the first beginnings of village life so far traced in the East or the Near East, *c* 4500 B.C.

It was not until the beginning of the Early Bronze Age, *c* 2900 B.C., that Jericho again became a town. Numerous rebuilds of the town walls during this period indicate the dangers to Jericho from its position on the route into the fertile Mediterranean countries for invading nomads from the semi-desert to the east, *c* 2300 B.C. Nomads finally overcame the civilization of the Palestinian Early Bronze Age, destroying Jericho and many other towns. These nomads can with great probability be identified with the Amorites, and evidence of their tribal character was found at Jericho. A fresh civilizing wave entered the country *c* 1900 B.C., coming from the Phoenician coastal area, and representing the Canaanites as found by the Patriarchs. The Jericho of this time was defended by a great bank, revetted at the foot with stone, the slope faced with plaster, and crowned by a wall. Small portions of the town with close-built houses flanking cobbled streets have been found, and also remarkable examples of the wooden furniture with which the houses were equipped.

About 1580 B.C. the town was destroyed, probably by the Egyptians, and there was a period of abandonment until *c* 1400 B.C. Of the succeeding town, which must be that of the period of the entry of the Israelites into Palestine, almost nothing has survived the erosion by weather to which this ancient mound has been subjected. The identification of town walls as those of the period of Joshua by the 1930–1936 expedition has been shown to be erroneous. What little evidence there is points to a date in the second half of the 14th cent. for the destruction of the town of this period.

Archaeology confirms the Biblical evidence of the abandonment of the site after this period. It does not however confirm a reoccupation by Hiel the Bethelite as early as the time of Omri (1 K 16[34]). There is a considerable Iron Age occupation, but probably not earlier than the 7th cent., and ending at the time of the Second Exile.

From this time, *Tell es-Sulṭân* ceases to represent the site of the town of Jericho. Little evidence has been found concerning the settlement in the Hellenistic or Maccabaean period, but it may have been on the site of the Herodian town, which was centred on the waters of the *Wâdī Qelt* and not those of *'Ain es-Sulṭân*. There parts of a grandiose building, with a great terrace-facade in Roman style *opus reticulatum*, have been excavated, which may be Herod's palace. Traces of Roman occupation are spread over a wide area of the valley round about.

Arab remains often succeed the traces of Roman and Byzantine buildings in the area, and the Arab ruler Hisham (A.D. 724–743) built a magnificent palace about a mile N. of *Tell es-Sulṭân*. But during the Arab and Turkish rule, cultivation and irrigation decayed, until at the beginning of this century the site was only represented by the miserable village of *er-Riḥa*. Since 1948, however, great progress has been made, and *er-Riḥa* is now a thriving municipality, and the centre of a growing area of cultivation. R. A. S. M.—K. M. K.

JERIEL.—A chief of Issachar, 1 Ch 7[2].

JERIJAH.—See JERIAH.

JERIMOTH.—**1. 2.** Two Benjamites, 1 Ch 7[7] 12[5]. **3. 4. 5.** Three Levites, 1 Ch 24[30] (called **Jeremoth** in 23[23]), 25[4], 2 Ch 31[13]. **6.** A son of David and father of Rehoboam's wife, 2 Ch 11[18]. **7.** 1 Ch 7[8] (AV;) see JEREMOTH, **1. 8.** 1 Ch 27[19] (AV); see JEREMOTH, **5.**

JERIOTH.—One of Caleb's wives, 1 Ch 2[18]; but almost certainly the MT is corrupt.

JEROBOAM is the name of two kings of Israel.

1. Jeroboam I. was the first king of the northern tribes after the division. His first appearance in history is as head of the forced labourers levied by Solomon. This was perhaps because he was hereditary chief in Ephraim, but we must also suppose that he attracted the attention of Solomon by his ability and energy. At the same time he resented the tyranny of the prince whom he served, and plotted to overthrow it. The design came to the knowledge of Solomon, and Jeroboam fled to Egypt. On the king's death he returned, and although he did not appear on the scene when the northern tribes made their demand of Rehoboam, he was probably actively enlisted in the movement. When the refusal of Rehoboam threw the tribes into revolt, Jeroboam appeared as leader, and was made king (1 K 11[26ff] 12[1–14][20]). Jeroboam was a warlike prince, and hostilities with Judah continued throughout his reign. His country was plundered by the Egyptians at the time of their invasion of Judah. It is not clearly made out whether his fortification of Shechem and Penuel was suggested by the experiences of this campaign or not. His religious measures have received the reprobation of the Biblical writers, but they were intended by Jeroboam to please the God of Israel. He embellished the ancestral sanctuaries of Bethel and Dan with golden bulls, in continuance of early Israelite custom. It is fair to assume also that he had precedent for celebrating the autumn festival in the eighth instead of the seventh month.

2. Jeroboam II. was the grandson of Jehu. In his time Israel was able to assert its ancient vigour against its hereditary enemy Syria, and recover its lost territory. This was due to the attacks of the Assyrians upon the northern border of Damascus (2 K 14[23–29]). The temporary prosperity of Israel was accompanied by social and moral degeneracy, as is set forth distinctly by Amos and Hosea. H. P. S.

JEROHAM.—**1.** The father of Elkanah and grandfather of Samuel, 1 S 1[1], 1 Ch 6[27, 34]; see JERAHMEEL, **2. 2.** A Benjamite family name, 1 Ch 8[27] 9[8]. **3.** A priestly family, 1 Ch 9[12], Neh 11[12]. **4.** 'Sons of Jeroham' were amongst David's heroes, 1 Ch 12[7]. **5.** A Danite chief, 1 Ch 27[22]. **6.** The father of Azariah, who helped Jehoiada in the overthrow of Athaliah, 2 Ch 23[1].

JERUBBAAL.—A name given to Gideon, Jg 6[32] 7[1] 8[29, 35] 9[1f, 5, 16, 19, 24, 28, 57], 1 S 12[11]. It means 'Baal strives,' Baal being a name for Y", as in *Ishbaal*, *Meribbaal*; it cannot mean 'one who strives with Baal,' as Jg 6[32] would suggest. This name was altered to **Jerubbesheth** (*besheth*='shame') when Baal could no longer be used of Y" without offence (2 S 11[21]); cf *Ishbosheth*, *Mephibosheth*.

JERUBBESHETH.—See JERUBBAAL.

JERUEL.—The part of the wilderness of Judaea that faces the west shore of the Dead Sea below En-gedi. It was here that Jehoshaphat encountered a great host of the children of Moab, Ammon, and other trans-Jordanic tribes, 2 Ch 20[16].

JERUSALEM.—I. SITUATION.—Jerusalem is the principal city of Palestine, situated in 31° 46′ 45″ N.

latitude and 35° 13′ 25″ E. longitude. It owes its importance to the command that its situation gives it of the central mountain ridge, forming the natural north-south highway.

1. The old city is built on two ridges which run south from an eastward spur of the central ridge. The southern ends of these spurs form steep promontories. On the east, the Valley of **Kidron,** or **Jehoshaphat,** has at its south end a slope of almost one in two, and the eastern spur, of which the southern end is known as **Ophel,** is flanked on its western side by the **Tyropoeon** Valley, of which the slope was originally almost equally steep; both these valleys originate well to the north of the city, and enclose a narrow spur which was the site of what was probably the oldest settlement and of the extension occupied by the Temple. The western spur is broader, and is bounded on the west by the **Valley of Hinnom,** with a slope of about one in four, originating some 600 metres south of the other two valleys, at a point where a lateral valley running down into the Tyropoeon nearly isolates the southern end of the western spur. The eastern spur is also cut into by a lateral valley running down into the Kidron, at a point slightly north of the last mentioned valley. Both spurs, therefore, have great natural advantages as defensive sites.

2. The chief drawback to the site is that it is not well provided with water. The only natural source is the spring **Gihon,** or the Virgin's Fountain, on the west slopes of Ophel, from which the waters naturally flow down the Kidron Valley. At all ages down to-day, the city has largely depended upon cisterns storing the winter rains, but **conduits** of many ages have been engineered to bring in water from springs in the mountains to the west. An aqueduct traditionally ascribed to Solomon brought water from reservoirs beyond Bethlehem; others are of Roman date, and in the days of the Mandate the springs at *Râs el-ʿAin* were tapped.

II. History.—**1. Sources.**—For the history of the site before the 14th cent. B.C., we are entirely dependent upon archaeology. In the early 14th cent. the city enters the written record in the Amarna letters, and soon afterwards appears in the Biblical record. But it is not until *c* 1000 B.C., after its capture by David, that the Bible gives many details about Jerusalem. From then on, as the capital, first of the United Monarchy, and then of Judah, its history is of supreme importance, but for the translation of this history in territorial terms, the aid of archaeology is most necessary. The Biblical account after the 6th cent. return from the Babylonian exile is again most full, but once more cannot be fully interpreted without archaeological evidence. For the succeeding period, the written account becomes increasingly sparse, and it is only when the periods dealt with by Josephus are reached, culminating in the destruction of the city by Titus in A.D. 70, that we have a full account, with the aid of which the topography can be studied. For the next six hundred years, and again at the time of the Crusades, there are at intervals literary sources to provide a key to the topographical and structural history of the site.

But for all these periods, the literary account requires the confirmation of archaeology in the identification of the lines of the city walls, and indeed of the actual area occupied by the city. For this reason, the site has attracted the attention of archaeologists from the very beginnings of the attempts to reconstruct history by the examination of the surviving material remains. The results have been tantalizingly inconclusive. The earlier excavations, particularly those carried out for the Palestine Exploration Fund by Captain (later Sir Charles) Warren between 1864 and 1867, and by Messrs. Bliss and Dickie between 1894 and 1897, were models for their period. But though in both cases the records are so ample and exact that much can be deduced from them, the excavators of the period had not at their service the detailed knowledge of pottery chronology on which all archaeology must be based, which only became reliable in the decades between 1920 and 1940, nor of the stratigraphical technique which must be associated with it. It was only when excavations at various points on the city walls began to be carried out by the staff of the Department of Antiquities of the Mandate, notably by Mr. C. N. Johns at the Citadel and Mr. R. W. Hamilton against the existing north wall, that any exact criteria were established for dating masonry styles by stratigraphical association with pottery and coins. In 1961 the British School of Archaeology and the École Biblique began a new series of excavations, which produced important results.

2. The earliest periods.—It is now generally agreed that the nucleus of the first settlement was on Ophel, the southern extremity of the eastern ridge. This is the site most strongly defended by nature. Even to-day, its eastern slopes are so steep as to render the site almost inaccessible, and the Tyropoeon valley to the west was originally also as steep. It is the only part of the site, moreover, adjacent to a good natural spring, Gihon. The earliest objects found come from rock-cut tombs on the eastern slopes. They consist of the pottery of the period best described as Proto-Urban, for it is the period in which were laid the foundations of the growth of the towns of the Early Bronze Age, brought into Palestine by newcomers round about 3300 B.C. It is very probable that the site developed into a town, as so many places did, in the ensuing Early Bronze Age, covering much of the 2nd millennium. Excavators of the site have in fact claimed to identify evidence of this period, but the published details are not conclusive. In 1961 the first traces were found of the town wall of the Middle Bronze Age.

3. The town of the Jebusites.—Jerusalem first appears in written history in the Amarna letters of the first third of the 14th cent. B.C., when its ruler Abdi-Khiba was one of the princelings in correspondence with Egypt. Various fragments of rough walling have been ascribed to the town of the period. The 1961 excavations, however, disproved the identification of a tumbled mass of masonry on the crest of Ophel as a bastion of the Jebusite defences. Further work is required to discover what existing remains there are of this period, for stylistic grounds are inadequate when such rough masonry is involved; similar masonry may appear over a period of some two thousand years.

It is as a town of the Jebusites, a Canaanite clan, that Jerusalem first appears in the Biblical record. In the theoretical and obviously anticipatory division of Palestine among the Israelite tribes, it was assigned to Benjamin (Jos 18^{28}), and in Jg 1^{8} it is claimed that it was captured by Judah immediately after the death of Joshua. There is, however, no doubt that this is an interpolation. All archaeological evidence goes to show that the Israelite ascendancy was only very gradually achieved, as an infiltration rather than a mass immigration and over-running. The Biblical record is in fact explicit that Jerusalem was not captured, and that it remained a Jebusite stronghold (Jg 1^{21} 19^{11}). Its capture was the culminating point of David's campaign, which on the shortest chronology must be more than two hundred years later, and the importance of its position is emphasized by the fact that it was only by its capture that the north and the south could be united; the division that this Canaanite enclave had enforced on the growing Israelite nation was to have its permanent effect when the two halves once more fell apart after the death of Solomon.

The strength of the site is vividly illustrated by the account of David's attack. The Jebusites within the walls jeered at the Israelites assembled against it (2 S 5^{6}). David promised that whoever 'getteth up the gutter' (2 S 5^{8}) should become the captain of his armies, and apparently Joab succeeded in accomplishing this feat. 'The gutter' has been with great probability identified by Père L.-H. Vincent as the water-shaft which gave access to the spring Gihon from within the city. The whole complex of shafts and tunnels connected with this spring, the one source of water in Jerusalem, was

revealed by the Parker excavations in 1911, and Père Vincent demonstrated that a shaft, part vertical and part oblique, was at least pre-Israelite, and as such could provide a means of penetrating the city and taking the defenders of the wall in the rear.

4. Jerusalem as capital under the United Monarchy and of the kingdom of Judah.—Having captured Jerusalem, David proceeded to fortify it. It is nowadays presumed that the site which he fortified was that of the preceding Jebusite stronghold on the eastern ridge. Archaeological evidence of this began to emerge in the 1961 excavations. The key point in his defences was **Millo**, from which he built round about and inward (2 S 5[9]). Millo was probably a tower, perhaps, from the probable Hebrew meaning of a filling, one built on a solid infilling of stone, but for its situation many suggestions have been made, and no archaeological evidence has been recovered. One of the difficulties is that there is no certain evidence of the position of the northern boundary of the original settlement. A ditch and fragments of a wall some 100 metres S. of the present city wall have been suggested as part of the line of the Jebusite defences, but they do not carry conviction.

Jerusalem was established as David's capital, and his plan was to make it a religious centre by providing a permanent home for the Ark of the Covenant (2 S 6). The actual construction of the **Temple** was, however, only carried out by his successor Solomon. The site of the Temple, with the adjoining royal palace, was on the northern portion of the eastern ridge, bounded on the north by the lateral valley mentioned in **1, 2.** It is probable that the site lay outside the original city wall, for the Biblical account describes it as the threshing-floor of Araunah the Jebusite (2 S 24[16]). The Biblical account shows that Solomon built the Temple and his palace with much magnificence. Excavations at Samaria, Megiddo, and Hazor have shown something of the sophisticated masonry and lavish decoration that the Israelites employed when for a short period they used the services of craftsmen from adjacent Phoenician lands. But though a few fragments beneath the subsequent Herodian Temple have been claimed as Solomonic work, there are no certain remains. On Ophel itself, there is nothing in this style surviving.

The summit of **Ophel** is exiguous in the extreme. A line of walls, exhibiting a number of building periods, has been traced along the southern crest, and parts of this have been ascribed to the period of David and Solomon. The 1961 excavations, however, showed that the so-called Davidic tower is in fact Maccabaean, and that great sub-structures to level up the ground, dating from the period of the Monarchy, extend far down the slope in front of it. The position of the town wall has not yet with certainty been identified, but it is at least 160 feet E. of the position hitherto suggested. The date at which occupation spread to the western ridge is uncertain. The literary evidence (2 K 14[13]) that Jehoash of Israel destroyed a length of 400 cubits (about 200 metres) suggests a north wall extending across the Tyropoeon Valley, for the defences of the narrow ridge of Ophel would not be of this length. Pottery of the 7th cent. B.C. has been found at the Citadel, probably the NW. corner of the expanded city, and at Bishop Gobert's School near the SE. angle of the western ridge.

The line traditionally ascribed to the north wall of the expanded city runs from the Citadel at the head of the Valley of Hinnom along a line just south of the present David Street, to meet the wall of the Temple enclosure about three-fifths of the way along its presumed contemporary length; the Temple would thus have formed a marked salient in the line of the city boundary. Along this line, suggestive fragments of wall have been found, though without dating evidence. The identification of this northern wall is however probable; that of the southern wall of the extended Israelite city is much less satisfactory. A wall crosses the Tyropoeon Valley between the points of the two spurs, but, as will be seen, the surviving remains belong to a much later period. Evidence of very considerable weight came from the excavations carried out in 1927 (*APEF* V.) that at a point 450 metres north of this wall there was no occupation in the bed of the Tyropoeon until the Maccabaean period. Moreover, in the 1961 excavations a number of soundings were made along the eastern slopes of the western ridge, in which no traces were found of occupation earlier than the 1st cent. A.D. Worth considering as the line of the southern wall (though it is only a hypothesis beside those proposed by many other writers) is a massive scarp with external fosse, and a wall in a style which is probably pre-Maccabaean, which runs down the western side of the western spur and turns north-eastward to follow the contours of the eastern side of the spur, onto which the Maccabaean wall crossing the valley was added. It need not necessarily render the line unworthy of consideration that further to the north-east its probable continuation was followed by a very much later, probably post-Crusader, wall, for the physical configuration of the site results time and time again in the return by later builders to the lines of their predecessors. The town-plan of Jerusalem in the time of the Divided Monarchy may thus have had a two-pronged outline to the south, following the contours of the two ridges.

That the history of the town when the United Monarchy fell apart after the death of Solomon in 935 B.C., and it became the capital of Judah, was eventful is shown only too clearly by the Biblical record. It fell to Shishak of Egypt *c* 925 B.C. in the reign of Rehoboam, to a coalition of Philistines and Arabs in the reign of Jehoram (*c* 850 B.C.), to Jehoash of Israel (796–781 B.C.), and was attacked by the kings of Syria and Israel in the reign of Ahaz of Judah (734–720 B.C.). The rebuildings and strengthenings of the walls of Jerusalem during these times were therefore innumerable, but archaeologically unidentifiable amongst the complex of rough walls revealed on the sides of Ophel. A still greater threat developed in the reign of Hezekiah (720–685 B.C.). The struggles between Judah, Israel, Syria, the Philistines, Edom, and Moab were struggles between petty powers of not unequal calibre. To all of them the revival of the great Mesopotamian empire under the Assyrians threatened annihilation. In 730 B.C. Megiddo and Hazor fell, and in 720 B.C. Samaria was destroyed by Sargon II., and the kingdom of Israel obliterated. Hezekiah realized that the next wave of advance was liable to engulf Judah. It is to his preparations to withstand the Assyrians that one of the few fragments of material evidence can be ascribed. In the Biblical account, Hezekiah stopped the waters (' that were without the city ' (2 Ch 32[3–4]), so as to deprive the enemy of access to them. This was done by the remarkable engineering feat of blocking external access to Gihon, on the east slope of Ophel, and carrying the water in a tunnel right through the spur to the pool of Siloam, within the walls of Ophel towards the south-western extremity. The course of this famous **Siloam tunnel** is curiously winding, and it has been suggested that its line was designed to avoid some tombs, unfortunately robbed, which it is suggested were the Tombs of the Kings of Israel, and its level required some adjustment after it was pierced, but it was nevertheless a triumphant achievement, well celebrated by the inscription recording the meeting of the gangs working from each end. The epigraphy of the inscription and the surviving archaeological evidence would fit a dating of *c* 700 B.C., and the Biblical historical evidence confirms the probability of ascribing the operation to Hezekiah. Hezekiah also repaired the walls and added ' another wall without ' (2 Ch 32[5]), perhaps to enclose the *mishneh* or ' redoublement ' of the town which had grown up. This may be the much debated ' second wall ' (see **6**). In the event, Jerusalem was saved by a mysterious calamity that befell the Assyrian army (2 K 19[35]).

Astute diplomacy enabled the kingdom of Judah to survive for another century, aided by the fact that Assyria was menaced at home, and eventually fell to

Babylon. The expansionist policies of Assyria were however inherited by Babylonia, and Judah's efforts to play off Egypt against Babylonia were of little avail. Jerusalem first fell to Nebuchadnezzar in 597 B.C. For a short time she was allowed to remain in existence, but intrigues with Egypt brought down Nebuchadnezzar's wrath on her again in 586 B.C. This time Jerusalem was utterly destroyed and all the people except the 'poor of the land' (2 K 25^{12}) were taken away into captivity.

5. From the Return from Exile to the end of the Maccabaean period.—The destruction of Jerusalem was undoubtedly severe; though one need not suppose that it was razed to the gound. The walls were broken down, though probably breached in numerous places rather than completely levelled, and the Temple, the palace, the houses and specifically, all the houses of the great men were burnt (2 K 25^{6-7}). Roofs and doors would thus be destroyed, but probably much of the stone-built walls remained standing. Still more disastrous would be the removal of all the inhabitants.

Jerusalem remained substantially in this state for fifty years. It is probable, however, that a faithful remnant carried on services of prayer and lamentation amidst the ruins of the Temple, for on the evidence of the Apocryphal Book of Baruch, the exiles in Babylon sent them vessels from the Temple that had been carried away as loot, and the wherewithal to perform sacrifices (Bar 1^{6-14}). Similarly, no doubt, some reoccupation of the ruins took place.

But the revival of Jerusalem did not come till 537 B.C. The liberal policy towards subject peoples inaugurated by Cyrus when Babylonia fell to Persia in 538 B.C. enabled a group of the exiles to return with the specific purpose of rebuilding the Temple, which was accomplished by 516 B.C. Simultaneously, no doubt, they rebuilt their own houses. The great difference of this new Jerusalem from the old is that the Temple was the only focal point; no longer was it rivalled by an adjacent royal palace. It was now a holy city with the High Priest as the first citizen. The struggles between the priesthood and emergent temporal rulers forms the theme of much of the history for the next five hundred years.

The original royal edict allowed the re-establishment of the religious centre, but Jerusalem remained an unwalled city, a dangerous condition with jealous enemies no further away than Samaria and Ammon. There were, however, still Jews at the Persian court, and one of them, Nehemiah, persuaded King Artaxerxes to appoint him governor for the period, probably of 445–433 B.C., with the express purpose of rebuilding the walls.

The rebuilding was undertaken with much energy, various groups being allocated a set section, and accomplished in the remarkably short time of fifty-two days (Neh 6^{15}). The course is described in much detail by Nehemiah (Neh 3, 12), but unfortunately there are too few fixed points in those parts of the circuit which are in doubt to establish what line was followed. This short period and the description of each gang that 'repaired' (Neh 3) its section, suggests that much of the work consisted of repairing breaches and gates, not of building a new wall. Much of Nehemiah's wall thus probably followed the course of the wall destroyed 150 years earlier. But the 1961 excavations on Ophel showed that this was not the case there. The destroyed buildings on the steep slope had been reduced to a tumble of stones by the winter rains. No attempt was made to restore them, and the town here shrank to the narrow summit of the ridge. The actual wall built by Nehemiah has not yet been identified, but it was probably approximately on the line of the Maccabaean wall. No evidence as to how this line ran to the south has so far been found, but it certainly did not cross the valley to the tip of the western ridge, as has hitherto been believed.

The next century was for Jerusalem a peaceful period under Persian rule; the governor appointed by the Persians was often a Jew, and real power was in the hands of the High Priest. The effect on the town of the struggles of the successor states of Alexander the Great's Empire is not certainly known, though Ptolemy Soter captured the town in 320 B.C., and the High Priest Simon the Just refortified both town and Temple about 300 B.C. (Sir 1^{1-4}). But a major effect on the life of the Jews was the spread of Hellenization amongst them, bitterly opposed by the orthodox. This reached a climax in 168 B.C., and Antiochus IV. Epiphanes took the opportunity to intervene and to sack Jerusalem with a great massacre. He then established a fortress 'Acra of the Syrians' which for thirty years dominated the town and the Temple; the site is usually considered to be that subsequently occupied by Antonia to the north of the Temple.

It is at this stage that the Hasmonaean family of the Maccabees emerge as the champions of Jewish nationalism. The story of their rise, with the intrigues between their party and the Hellenizing one, and of the playing off of the Seleucid and Ptolemaic kingdoms one against another is not a pretty one, but brought success. In 142 B.C. Simon was granted autonomy, and at last succeeded in capturing the Acra. His successor John Hyrcanus survived an attack in 135 B.C. by Antiochus Sidetes, in which the walls were breached, being subsequently repaired, and thereafter had a long and successful reign until 107 B.C. The Hasmonaean dynasty had come to power as high priests, but the ideal of a theocratic state was dying, and John's sons Aristobulus (107–105 B.C.) and Alexander Jannaeus (105–79 B.C.) assumed the title of king. The final tragedy of the Hasmonaean dynasty came with the struggles of the latter's sons for power, which brought the Romans on the scene. In 63 B.C. Pompey besieged and captured the city. He respected the Temple, but according to Strabo (xvi) he entirely demolished the city walls.

During these two and a half centuries of struggles between the Hellenistic kingdoms, and then of the emergent nationalistic Jewish power, Jerusalem was the scene of many bitter battles. It is unlikely that archaeology will ever be able to trace minutely the history of building, destruction, and rebuilding of the city walls that the historical record suggests, for it is seldom that dating evidence is exact enough to distinguish between a succession of events within a few decades.

This is the period, however, within which we have for the first time reliable evidence for dating some part of the fortifications. In excavations extending between 1934 and 1948, Mr. C. N. Johns carried out an extensive examination of the present Citadel (*QDAP* xiv). The Citadel lies approximately in the centre of the west side of the present walled city, at the point at which the original wall turned east to join the western ridge to the eastern (4). He found here a line of wall curling round towards the east-west line, with on it three towers. In the structures three distinct building styles could be recognized, in chronological succession a style of roughly squared blocks, a style of stones with rough bosses and margins either comb-picked or chisel-dressed and thirdly a style with beautifully-squared stones with much slighter bosses and comb-picked margins. This third style is undoubtedly Herodian, and was found in the tower recognized as being Phasael, which Josephus says that Herod built as one of three at the north-west angle of the town. The other two styles were dated stratigraphically by the associated deposits. The second belongs to the period of Alexander Jannaeus, at the climax of the Hasmonaean rule. The first style could be dated less closely, but was certainly not earlier than the early Hellenistic or early Hasmonaean period.

These three styles can, as Johns showed, be recognized, from existing remains and from the admirable record, in the earlier of the two walls traced by Bliss and Dickie across the Tyropoeon Valley at the S. end of the western ridge. It was, however, probably not prolonged across to join the eastern ridge, as has hitherto been suggested, for the 1961 excavations found no trace of occupation of

this period in the area concerned. Confirmation that the base of the Tyropoeon Valley was still not enclosed in the Maccabaean period is provided by the excavation of J. W. Crowfoot and G. M. Fitzgerald in 1927 (*APEF* v), in which a massively-built gateway, almost certainly part of a town wall, was found on the western side of Ophel at a distance of some 350 metres north of the point of the ridge, which was certainly in use down to the Maccabaean period. On the eastern side of the eastern ridge, the 1961 excavations confirmed work on the defences in the early Maccabaean period, for the town previously ascribed to the period of David can now be dated to *c* 150 B.C.

6. From the Herodian period to the destruction by Titus.—The Romans exercised considerable clemency after their victory. The Hasmonaean dynasty was allowed to retain sacerdotal power, and in 47 B.C. Caesar permitted the reconstruction of the city walls. This state of affairs was brought to an end by the characteristic internecine struggles of the members of the Hasmonaean dynasty, and eventually the Idumaean Herod, who had married into the Hasmonaean family, established himself in power and in 37 B.C. captured Jerusalem with Roman aid.

The Herodian period rivals the Solomonic in the external glories it conferred on Jerusalem. As in the Solomonic period, the artistic style was foreign. Herod was firmly Romanophil, and his buildings were in the Graeco-Roman tradition. Typical buildings, bitterly disliked by orthodox Jews, were a theatre and amphitheatre; the site of these is unknown. As far as is known he did not add to the circuit of the city, but he strengthened its fortifications by a great fortress, to which he gave the name Antonia, at the north-west angle of the Temple enclosure, and which he made his first abode, and by three great towers, Phasael, Hippicus, and Mariamne, at the north-west corner, beneath the present Citadel, in which the base of Phasael survives to a considerable height. On the archaeological evidence described in the last section, he also repaired and strengthened the southern circuit. By about 25 B.C. he had built himself a magnificent palace in the north-west corner of the city. But he was throughout distrusted and disliked by the Jews as a foreigner and as an introducer of atheistic Hellenistic innovations. It was in part as an attempt to combat this antipathy that he undertook his most grandiose construction, the complete rebuilding of the Temple. The description of this, involving massive new terrace walls, survives in Josephus' account, and portions of his foundation walls are still visible beneath the Haram esh-Sherif.

Herod died in 4 B.C. Complaints against the iniquities of his successor Archelaus brought in Roman intervention, and from A.D. 6 Judaea was annexed to the Roman province of Syria. The earlier years of direct Roman rule were peaceful, but when Pontius Pilate was appointed procurator in A.D. 26, he caused much offence to orthodox Jews. Under the Emperor Claudius comes the last period of relative Jewish autonomy. Herod Agrippa I., a grandson of Herod, was made king of Judaea, and his reign represents almost a golden age for Jerusalem. The expansion of the city was so great that he built a new wall to enclose the new northern quarter, the 'Third Wall' to be discussed below. The 1961 excavations showed that he also built a wall right across the Tyropoeon Valley to join the eastern and western ridges. After his death in A.D. 44, Judaea was ruled by Roman procurators.

This is the beginning of one of the darkest periods in Jewish history. The cruelties and excesses of the Roman procurators, unfortunately ill-selected, stimulated the fervent nationalism and messianic expectations of the Jews. This nationalistic fervour was fatally marred by bitter factional struggles amongst the Jews themselves; up to the very eve of the Roman retaliation for the revolt they were slaughtering one another.

The final attack by the Romans on Jerusalem came in A.D. 70, led by Titus after his father Vespasian had become Emperor. The events of the terrible siege and ensuing destruction are vividly described by Josephus. One by one the defences of the city fell, and finally the Temple was devastated.

It is with the description of the city by Josephus that the archaeological evidence is mainly concerned. Titus' attack was from the north, and Josephus describes three successive lines of wall, in addition to the defences of the Temple, which he had to storm. The Third Wall was built by Herod Agrippa. The First Wall, the old wall, which Josephus believed to have been built by David and Solomon, is probably that running east from the Citadel, just south of David Street, built, as has been shown in **4**, in the 8th or 7th cent. B.C. It is the line of the Second Wall which is of supreme importance to students of the Bible, for this is the wall which would have been the city wall at the time of the Crucifixion. The site of the Church of the **Holy Sepulchre**, identified as such some three hundred years later by Queen Helena, and of the adjacent rock of Calvary, lies on a knoll of rock on the north side of the lateral valley that cuts into the western ridge (**1, 2**). Any wall including a northern quarter of the city, and linking with the north-west corner of the Temple area, would have had to make a curious re-entrant angle to exclude this site. Portions of walling, on a scale which would agree with that of a town wall, have however been found following this line. Military experts have declared the line to be impossible strategically, and suggested a line curving considerably further to the north and enclosing the site of the Church (*e.g. PEQ* 1944), but no convincing archaeological proof of their theories has been adduced; on the opposing side, military reasons have been produced (*PEQ* 1946) to show that the artillery of the period mounted on the strong points undoubtedly built by Herod at Antonia and the three towers beneath the present Citadel could dominate the north-south and east-west stretches of the angular wall, and the high ground from which any attack on the blind ground of the re-entrant angle must be mounted, but would be largely useless if that high ground were within the city. But it must be admitted that there is absolutely no archaeological proof.

The position of the Third Wall is almost equally vehemently debated. For long it was accepted that this was on the line of the present north wall of the city. In support of this theory, it was shown in the excavations carried out by Mr. R. W. Hamilton (*QDAP* x) in 1937–1938 that there had been a Herodian-style tower on the site of the Damascus Gate, and other possible traces further east; these might belong either to the Second or Third Wall. On the other hand, remains of an exceedingly massive wall, including stones in a generally Herodian style, were traced in 1925–1927 by Professor E. L. Sukenik and Dr. L. A. Mayer at a distance of about 400 metres to the north of the present walls. The wall is imposing, and would agree with an expansion in the time of Herod Agrippa, but no archaeological evidence was provided to prove the dating.

A regrettable summary must be that archaeological evidence cannot yet prove the line of any of the north walls of Jerusalem.

7. Roman, Byzantine, and Islamic Jerusalem.—Jerusalem was devasted by Titus, and a garrison of Legion X Fretensis established on the western hill, to protect which the Herodian towers and a portion of the western wall were left standing. A fragment of a building of the legionary fortress was discovered in the excavations of 1934–1948 (*QDAP* xiv). There is reasonable evidence to suggest that the Jews soon filtered back into portions of the ruined city, and probably carried on trade with the Roman soldiers (*Jérusalem de l'Ancien Testament*, pp. 756–758). The complete obliteration of Jewish Jerusalem only came some forty years later. Irreconcilable Jewish nationalism brought about a series of disturbances, culminating in the Second Revolt, which was crushed by Hadrian in A.D. 135. Jewish Jerusalem

was then abolished, and **Aelia Capitolina** took its place, a forbidden ground for Jews. It is usually considered that the lines of Aelia are approximately those of the present city walls. Hamilton (*QDAP* x) showed that it was very probable that the original building of the **Damascus Gate** belongs to this period, and the columned street running south from it, shown on the Madeba Map, may have originated at this period; beneath it was a great sewer of Roman date which remains in use to-day. A rebuilding of the walls belonged to *c* A.D. 300.

In the Byzantine period, with the official acceptance of Christianity, a great period of prosperity began, with religious buildings such as the Church of the **Holy Sepulchre** springing up. The excavations of 1927 showed that the town was then once more expanding along Ophel. It is probable however that this area was not walled again until the time of the Empress Eudocia in the 6th cent. The church built by the Empress over the Pool of Siloam was explored by Bliss in 1897.

In the 7th cent., Jerusalem fell to the infidel. After an occupation by the Persians from A.D. 614–628, it fell to the invading Moslems in A.D. 637. Hamilton has shown (*QDAP* x) that the lower course of the present north wall for the most part belongs to an early Islamic build, and it is very probable, from the description of style, that the later wall found by Bliss and Dickie at the furthest south extent of the city between the tips of the two ridges belongs to this period. The supreme example of the early Arab work is the great sanctuary of the Dome of the Rock, on the site of the Jewish Temple.

The ephemeral Crusader occupation left many relics in Jerusalem, mainly in the churches, such as that of the Holy Sepulchre, but also at the Citadel, where the tower Phasael, the 'Tower of David', was transformed into both citadel and royal residence. Of the period when Jerusalem fell once more to the Moslems, there are few relics, but fragments of a wall found by Bliss and Dickie on the east slope of the western ridge suggest that parts of the southern ridges were included at this time. The present walls, bounding the Old City of Jerusalem, and excluding the southern spurs, were constructed by Suleiman the Magnificent after the Turkish conquest in A.D. 1517.

8. Modern Jerusalem—The city bounded by the wall built by Suleiman the Magnificent remained the essential Jerusalem down to the time of the British Mandate. Though a Moslem city, dominated by the great sanctuary of the Dome of the Rock, a remarkable tolerance enabled aliens to live there, and the Old City had its Christian, Armenian, and Jewish quarters. With the establishment of the British Mandate in 1919, Jerusalem became the headquarters of the Mandatory Power. A considerable expansion took place, and a New City grew up outside the walls, mainly to the west and north-west. When the division of Palestine between Arabs and Jews took place after the end of the Mandate in 1948, Jerusalem became the frontier point at the end of a Jewish salient into the hill-country. The western and half the northern walls of the Old City form to-day the boundary between the two. The New City is now entirely Jewish, and has expanded enormously. A new Arab city is rapidly growing up to the north of the old walls.

K. M. K.

JERUSALEM (GATES OF).—The following gates of Jerusalem are mentioned in the Bible: **1. Ephraim Gate** 2 K 14^{13}, 2 Ch 25^{23}, Neh 8^{16} 12^{39}. **2. Corner Gate,** 2 K 14^{13}, 2 Ch 25^{23} 26^{9}, Jer 31^{38}, Zec 14^{10}. **3. Gate between the two walls,** 2 K 25^{4}, Jer 39^{4} 52^{7}. **4. Gate of the Foundation,** 2 Ch 23^{5}. **5. Horse Gate,** 2 Ch 23^{15}, Neh 3^{28}, Jer 31^{40}. **6. Valley Gate,** 2 Ch 26^{9}, Neh 2$^{13, 15}$ 3^{13}. **7. Fish Gate,** 2 Ch 33^{14}, Neh 3^{3} 12^{39}, Zeph 1^{10}. **8. Dung Gate,** Neh 2^{13} 3^{13f} 12^{31}. **9. Fountain Gate,** Neh 2^{14} 3^{15} 12^{37}. **10. Sheep Gate,** Neh 3$^{1, 32}$ 12^{39}. **11. Old Gate,** Neh 3^{6} 12^{39}. **12. Water Gate,** Neh 3^{26} 8$^{1, 3, 16}$ 12^{37}. **13. Muster Gate,** Neh 3^{31} (AV 'gate **Miphkad**'; RV 'gate **Hammiphkad**'). **14. Benjamin Gate,** Jer 17^{19} (so RSV) 20^{2} 37^{13} 38^{7} Zec 14^{10}. **15. Potsherd Gate,** Jer 19^{2} (AV 'east gate'; RV 'gate **Harsith**').

Other features of the walls of Jerusalem mentioned are: **1. Broad Wall,** Neh 12^{38}. **2. Tower of Hananel** (AV **Hananeel**), Neh 3^{1} 12^{39}, Jer 31^{38}, Zec 14^{10}. **3. Tower of the Hundred** (AV 'tower of **Meah**'; RV 'tower of **Hammeah**'). **4. Tower of the Furnaces,** Neh 3^{11} (RSV **ovens**) 12^{38}.

It will be seen that many of these gates and other features of the walls figure mainly, if not exclusively, in the account of Nehemiah's rebuilding of the walls. The determination of the situation of all these gates is complex and difficult, and scholars who have examined the question on the ground of biblical and archaeological evidence are not agreed. The fullest examination of the question in recent years has been undertaken by H. Vincent, *Jérusalem de l'Ancien Testament*, 1954–1956, and J. Simons, *Jerusalem in the Old Testament*, 1952. In Map 13 the reconstruction of Vincent has been followed.

In addition certain gates of the Temple are named: **1. Gate Sur,** 2 K 11^{6}. **2. Gate of the Guard,** 2 K 11^{19}, Neh 12^{39} (AV 'prison gate'). **3. Gate of Shallecheth,** 1 Ch 26^{16}. **4. East Gate,** 2 Ch 31^{14}, Neh 3^{29}, Ezk 11^{1}. **5. New Gate,** Jer 36^{10}. **6. Beautiful Gate,** Ac 3^{10}.

JERUSHA.—Mother of Jotham king of Judah, 2 K 15^{33}; called **Jerushah** in 2 Ch 27^{1}.

JERUSHAH.—See JERUSHA.

JESAIAH.—1. 1 Ch 3^{21} (AV); see JESHAIAH, **1.** **2.** Neh 11^{7} (AV); see JESHAIAH, **6.**

JESHAIAH.—1. A grandson of Zerubbabel, 1 Ch 3^{21} (AV **Jesaiah**). **2.** One of the sons of Jeduthun, 1 Ch 25$^{3, 15}$. **3.** A Levite, 1 Ch 26^{25}. **4.** The chief of the sons of Elam who returned, Ezr 8^{7}, 1 Es 8^{33} (AV **Josias,** RV **Jesias**). **5.** Chief of the Merarites, Ezr 8^{19}, 1 Es 8^{48} (AV, RV **Osaias**). **6.** A Benjamite, Neh 11^{7} (AV **Jesaiah**).

JESHANAH.—A town taken from Jeroboam by Abijah, 2 Ch 13^{19}; mentioned also with Mizpah in 1 S 7^{12} (RSV; AV, RV **Shen**). It is usually identified with *Burj el-Isâneh*, N. of Jerusalem, or alternatively with *'Ain Sinyā*, N. of Bethel.

JESHARELAH.—An Asaphite, 1 Ch 25^{14}; called **Asharelah** in v.^{2} (AV **Asarelah**).

JESHEBEAB.—A Levite, the head of the fourteenth course, 1 Ch 24^{13}.

JESHER.—A son of Caleb, 1 Ch 2^{18}.

JESHIMON.—This word, derived from a Hebrew root meaning 'to be waste *or* desolate,' is used either as a common noun (='desert,' 'wilderness') or (with the article '*the* Jeshimon') as a proper name, Nu 21^{20} 23^{28}, 1 S 23$^{19, 24}$ 26$^{1, 3}$ (RSV translates in Nu 21^{20} 23^{28}, and RV in all these cases).

JESHISHAI.—A Gadite family, 1 Ch 5^{14}.

JESHOHAIAH.—A Simeonite family, 1 Ch 4^{36}.

JESHUA (another form of **Joshua,** 'Yahweh is salvation').—**1.** Joshua the son of Nun (Neh 8^{17}) **2.** The head of the ninth course of priests (1 Ch 24^{11}). **3.** A Levite in the time of Hezekiah (2 Ch 31^{15}). **4.** A man of the house of Pahath-moab (='governor of Moab'), whose descendants returned from exile, Ezr 2^{6} =Neh 7^{11}=1 Es 5^{11} (RV **Jesus**). **5.** The high priest, son of Jehozadak (Jozadak). In Ezra and Nehemiah he is called **Jeshua**; in Haggai and Zechariah **Joshua.** He took a leading part in the erection of the altar of burnt-offering and the laying of the foundations of the Temple (Ezr 3^{2ff}). In Haggai and Zechariah, he is associated with Zerubbabel in the undertaking of building operations (cf Ezr 5^{2}), and appears in two important symbolic actions in Zec 3 and 6 (Hag 1$^{1, 12, 14}$ 2$^{2, 4}$, Zec 3^{1ff} 6^{11}). His family is mentioned in Ezr 10^{18}, Neh 12$^{1, 7, 10, 26}$ and he is eulogized in Sir 49^{12} (AV, RV **Jesus**). **6.** A priestly family, Ezr 2^{36}=Neh 7^{39}=1 Es 5^{24} (AV, RV **Jesus**). **7.** The head of a Levitical family mentioned in connexion with the building of the Temple, Ezr 3^{9}, cf 2^{40}=Neh 7^{43}=1 Es 5^{26} (AV **Jessue,** RV **Jesus**).

8. A Levite, mentioned in connexion with Ezra's reading of the Law (Neh 8^{7}), and the sealing of the covenant (Neh 9^{4f} 10^{9}), and in lists (Neh 12$^{8, 24}$), probably of the same family as **7. 9.** A Levite, whose son was concerned with the receiving of gold and silver brought from the exiles by Ezra, Ezr 8^{33}=1 Es 8^{63} (AV **Jesu**, RV **Jesus**), possibly connected with **7** and **8. 10.** The ruler of Mizpah, father of one of builders of the wall under Nehemiah (Neh 3^{19}). **11.** A town in South Judah (Neh 11^{26}), possibly *Tell es-Sa'wī*, E. of Beersheba.

JESHURUN.—A poetic or a pet-name for Israel which occurs four times in the OT, Dt 32^{15} 33$^{5, 26}$, Is 44^{2}. It is found in the later writings, and represents a patriotic feeling that Israel was=*y^{e}shar-'El*, 'the upright of God.' If this be so then we may accept the rendering of *Jeshurun* as 'the righteous little people.' In Balaam's elegy, 'Let me die the death of the righteous' (Nu 23^{10}) seems to refer to the Israel of the preceding clause, and in Ps 73^{1} the thought which underlies *Jeshurun* appears, if we adopt the tempting reading: 'Truly God is good to the upright.' W. F. C.

JESIAH, 1 Ch 12^{16} 23^{20} (AV).—See Isshiah, **2, 3.**

JESIAS, 1 Es 8^{33} (RV).—See Jeshaiah, **4.**

JESIMIEL.—A Simeonite family, 1 Ch 4^{36}.

JESSE (more correctly *Jishai*, cf as regards formation, *Ittai*; perhaps an abbreviated form; the meaning of the name is quite uncertain).—A Bethlehemite, best known as the father of David. The earliest historical mention of him (1 S 17^{12}; see David, **1**) represents him as already an old man. On this occasion he sends David to the Israelite camp with provisions for his brothers; this was destined to be a long separation between Jesse and his son, for after David's victory over the Philistine giant he entered definitely into Saul's service. There are two other accounts, each of which purports to mention Jesse for the first time: 1 S 16^{1ff}, in which Samuel is sent to Bethlehem to anoint David; and 1 S 16^{18}, in which Jesse's son is sent for to play the harp before Saul. Nothing further is heard of Jesse until we read of him and his 'house' coming to David in the 'cave' of Adullam; David then brings his father and mother to Mizpeh of Moab, and entrusts them to the care of the king of Moab (1 S 22^{3f}). This is the last we hear of him. In Is 11^{1} the 'stock of Jesse' is mentioned as that from which the Messiah is to issue; the thought probably being that of the humble descent of the Messiah as contrasted with His glorious Kingdom which is to be. W. O. E. O.

JESSUE, 1 Es 5^{26} (AV).—See Jeshua, **7.**

JESU, 1 Es 8^{63} (AV).—See Jeshua, **9.**

JESUI, Nu 26^{44} (AV).—See Ishvi.

JESUS, the Greek form of the name Joshua or Jeshua.—**1.** In AV in 1 Mac 2^{55}, 2 Es 7^{37}, Sir 46^{1}, Ac 7^{45}, He 4^{8}=**Joshua** (so RV, RSV), the son of Nun. **2.** 1 Es 5^{11} (RV); see Jeshua, **4. 3.** 1 Es 5^{24} (AV, RV); see Jeshua, **6. 4.** In AV and RV in 1 Es 5$^{5, 8, 48, 56, 68, 70}$ 6^{2} 9^{19}, Sir 49^{12}; see Jeshua, **5. 5.** 1 Es 5^{26}(RV)^{58} (AV, RV) 8^{63} (RV) 9^{48} (AV, RV); see Jeshua, **7. 6.** 1 Es 8^{63} (RV); see Jeshua, **9. 7.** An ancestor of our Lord, Lk 3^{29} (AV **Jose**). **8.** Jesus, son of Sirach. See Apocrypha, **7. 9.** Jesus, called **Justus**, a Jewish Christian residing in Rome, saluted by St. Paul in Col 4^{11}. **10.** In 2 Es 7^{28}, where AV and RV have 'my son Jesus,' following the Latin, RSV has 'my son the Messiah,' following the Syriac. **11.** See next article.

JESUS CHRIST.—The influence of Jesus Christ ranks with Greek culture and Roman law as one of the three most significant elements in the heritage of Western civilization, and no historical task could be more important than to set forth the life and teaching of the Lord of the Church. At the same time, this superlative undertaking has its peculiar difficulties. We are virtually limited to the NT for source material, and within the NT in the main to the Gospels. The Gospels were composed in the first instance to assist in converting unbelievers and in confirming the faithful, and therefore leave us in the dark about many matters of capital interest to the biographer. Interpreters tend to impose their own beliefs and practices, or those of the branch of the Church to which they belong, on the Jesus of history and His religion, and we need to be warned against the peril of finding in the NT records what we set out to discover. On the other hand, the techniques of historical, textual, and literary research in modern times enable us to undertake the task in the confidence that we can learn more of the mission and message of Jesus than could have been recovered by any other generation since the Apostolic Age.

1. Sources.—(A) Canonical: (1) *The Gospels.*—It is now generally recognized that the Gospel according to Mark is the earliest of the four that ultimately found a place in the NT canon. It opens with a brief account of John the Baptist and of Jesus' baptism, and then goes on to give a sketch of Jesus' own ministry, culminating in His arrest, trial, crucifixion, and burial in Jerusalem. It ends in ch. 16^{8} with the story of the discovery by some faithful women of the empty tomb. (At various times in the early centuries attempts were made to provide Mark with a more appropriate conclusion, and there has been much speculation in recent years about a so-called 'lost ending' of the Gospel. All this appears to be beside the point. The Gospel ends abruptly, but no more abruptly than it begins or when it makes a transition from one block of tradition to another.) While this Gospel is the source of most of our knowledge of the life of Jesus, its purpose was not historical nor biographical. It was a record of the tradition of the Church that missionaries had found useful in proclaiming God's saving purposes for mankind in Christ Jesus and was intended to be read aloud in gatherings for worship. The central section on 'the way of the Cross' (8^{27}–10^{45}) and the climactic Passion narrative (14–15), in particular, were also calculated to encourage a community enduring persecution and threatened with martyrdom.

The Gospel according to Matthew is best described as a revised and enlarged edition of Mark. It incorporates more than 90 per cent of the earlier Gospel and expands it with new material, mostly didactic, by more than 40 per cent. To the whole the editor prefixed a genealogy of Jesus and a number of birth and infancy narratives (1^{1}–2^{23}) and appended a cycle of resurrection stories and the missionary commission of the Risen Christ (28^{8b-20}). The new edition of Mark was intended to serve as a catechism for Christian faith and practice and as a demonstration that the Christ of the Church was the fulfilment of messianic predictions in the OT. (A feature of the Gospel is its frequent citation of OT passages taken from some early Christian collection of *testimonia*, possibly Matthew's *logia*, to which Papias refers [Euseb. *HE* iii. 39]). Matthew is frequently described as the Gospel of the Jewish Christians, but this description is based on inferences drawn, not from the Gospel as a whole, which is clearly the work of a Hellenist and a universalist, but from some of the special matter incorporated by the editor, which may have been collected and preserved in the first instance by Christian Jews in Jerusalem (the M source).

The Gospel according to Luke is completely independent of Matthew, but, like Matthew, is also dependent on Mark for the general framework of the gospel story. (The 'Proto-Luke' hypothesis, first suggested by B. H. Streeter and then worked out in detail by Vincent Taylor, has been widely accepted in recent times but falls short of demonstration at crucial points.) It supplements Mark with about two hundred and fifty verses, mostly didactic matter, drawn from a source known also to Matthew (the Q source), and also with a wealth of preaching, teaching, narrative, and parabolic tradition, approximating two hundred and eighty verses in all, derived from some special source or sources (L). Luke's story begins, as does Matthew's, with a cycle of birth and infancy narratives, although

these are quite different from their counterparts in our First Gospel, and it ends with a variant and independent resurrection cycle. Luke approached his task in a more consciously historical spirit than his predecessors (see 1[1-4]) and recognized an obligation to supply dates and to sketch in the political background of some events (2[2] 3[1, 23]). But for him also the main concern of an Evangelist was to emphasize the religious significance of his story, especially by exhibiting Jesus as the friend of outcasts and sinners and as the Saviour of the world. He is especially interested in incidents and sayings that illustrate the graciousness and the universality of the gospel. Prominence is given to the rejection of Jesus by Nazareth and Jerusalem (4[16-30] 19[41-44]) and to His discovery among the Gentiles of the faith for which He sought (17[18f]). It is also characteristic of the author of the Third Gospel that he gives a full account of the missionary activity of the Church (10[1-21]). These and other interests, notably a concern to demonstrate that Christianity is not a religion that should be condemned by the Roman state as subversive, are even more apparent in the Book of Acts, the second and concluding volume of Luke's account of the early Church.

The author of the Fourth Gospel appears to have been familiar with Mark. He may also have known Luke, but there is no indication that he had any acquaintance with Matthew. While Mark would have us believe that Galilee was the exclusive scene of Jesus' ministry until shortly before the end, John declares that Jesus began His work in Judaea and Jerusalem and made at least three journeys from Galilee to Jerusalem (2[13] 5[1] 7[10]) prior to His final visit (the only one that Mark records). According to Mark, Jesus cleansed the Temple at the very end of His ministry; according to John, at the very beginning. According to Mark, Jesus was crucified on the Passover day; according to John, on the day before the Passover (13[1] 18[28] 19[14, 31, 42]). Although neither Mark nor John was primarily concerned with chronology, the divergencies in their accounts are real, and the historian, at least in the second and third of the instances cited, must choose between his authorities. To decline to do so on the ground that 'theology' has completely sublimated 'history' in all early Christian tradition is an irresponsible aberration on the part of some NT scholars in recent times. There is theology in the Synoptic Gospels as well as history; there is history as well as theology in the Gospel according to John, and the historian cannot evade the duty of attempting to distinguish fact from interpretation in the two accounts. There is a marked difference, however, in the degree of theological interest as between John and the Synoptists. John has reworked the historical stuff of his tradition more thoroughly, and his presentation of the gospel, as he himself declares, was written primarily to induce the belief that 'Jesus is the Christ, the Son of God' and to enable believers to have 'life in his name' (20[30-31]).

(2) *Paul's Epistles.*—While Paul's letters are earlier than the Gospels, and earlier than most of the literary sources of the Gospels that we can distinguish, they serve only to confirm a few salient facts of the gospel tradition. The Risen Christ filled Paul's thought to the virtual exclusion of the Galilaean Jesus. Nevertheless, the few scattered notices that are found in his letters make it certain that the apostle's Christ was no purely mythological figure. Jesus Christ was an Israelite by race (Ro 9[5]); descended from David according to the flesh (1[3]); and born of a woman and subject to the law (Gal 4[4]). He had several brothers (1 Co 9[5]), one of whom was called James (Gal 1[19]). His ministry had been among Jews (Ro 15[8]); He had a circle of disciples known as 'the twelve' (1 Co 15[5]); and He was betrayed on the night that He instituted the Lord's Supper (1 Co 11[23-26]). He was crucified (2 Co 13[4]) and the Jews were responsible for His death (1 Thes 2[14-15]). He was buried and then, on the third day, was raised from the dead (1 Co 15[4]). Furthermore, on two occasions Paul appears to cite sayings of Jesus recorded in the Gospels (1 Co 7[10] = Mk 10[9]; 1 Co 9[14] = Lk 10[7]), and a few other passages, possibly a dozen, may reasonably be held to be echoes of additional sayings familiar to us from the Synoptics.

(3) *Other NT Writings.*—There is an allusion to the Agony in He 5[7] and to the Transfiguration in 2 P 1[17]. He 13[12] locates the site of the Crucifixion "outside the gate" (*i.e.* of Jerusalem). Rev 5[5] and 22[16] reflect the early Christian tradition of Jesus' Davidic descent. Ja 5[12] may be a more primitive form of the words of Jesus than that in Mt 5[37], and Ac 20[35] preserves an otherwise unrecorded saying.

(B) Extra-Canonical Sources: (1) *Christian*; (*a*) *Patristic and other references.*—The Fathers make only trifling additions to our knowledge of the facts of the life of Jesus. There is nothing more important than Eusebius' statement (derived from Hegesippus) that grandsons of Jude, a brother of Jesus, were members of the Christian community (presumably at Rome) during the reign of Domitian (*HE* iii. 19–20). More valuable are the so-called *Agrapha* (q.v.), non-canonical sayings purporting to come from Jesus that are found in some NT MSS, in the Early Fathers, and in papyri discovered in Egypt, especially at Oxyrhynchus. According to J. Jeremias (*Unknown Sayings of Jesus*, 1957), twenty-one of these have some claim to authenticity. Among the more interesting are the following:

(i) 'On the same day, seeing a man working on the Sabbath, Jesus said to him: "Man, if thou knowest what thou doest, blessed art thou; but if thou knowest not, thou art accursed and a transgressor of the law"' (added to Lk 6[5] in Codex Bezae).

(ii) 'He that is near me is near the fire, but he that is far from me is far from the kingdom' (Origen, *Hom. in Jer.* xx. 3).

(iii) 'Show yourselves tried money changers' (Clem. Alex. *Strom.* i. 28, *et al.*).

(iv) 'Ask for the big things, and the little shall be added unto you. Ask for the heavenly things, and the earthly shall be added unto you' (Origen, *de Orat.* 2).

(v) 'Raise the stone, and thou shalt find me. Cleave the wood, and there I am' (*Oxyr. Pap.* i. 4).

(*b*) *Non-canonical Writings.*—Fragments of the Gospels according to the *Hebrews*, the *Egyptians*, and *Peter* have been preserved in quotation, and numerous apocryphal Gospels and Acts have survived (see M. R. James, *The Apocryphal New Testament*, 1924). The former reflect early gnostic and docetic influences and appear to depend on our canonical Gospels for any history they contain. The latter fall into three groups according as they deal with the history of Joseph and Mary (*e.g. Protevangelium of James*), the Infancy (*e.g. Gospel of Thomas*), and Pilate (*e.g. Acts of Pilate*). Their fancies are frequently grotesque and repulsive and are of no value.

In 1946 Egyptian *fellahin* at Nag-Hamadi, a village in Upper Egypt, happened upon a cache of twelve volumes of Coptic Gnostic scriptures, including a document entitled *The Secret Words Which Jesus the Living Spoke and (Which) Didymus Judas Thomas Wrote* (R. M. Grant, D. N. Freedman, W. R. Schoedel, *The Secret Sayings of Jesus*, 1960). Of the 114 sayings credited to Jesus in this *Gospel of Thomas*, about one-half consists of variants of (or combinations of) logia familiar to us from the canonical Gospels; many are *agrapha* already known to us from other sources (the Oxyrhynchus papyri fragments referred to above appear to have been part of an earlier Greek version of this Coptic Gospel); and the remainder is made up of sayings hitherto unknown (most of them characteristically Gnostic in content and with little or no claim to authenticity).

(2) *Jewish sources.*—Although Josephus does refer to the martyrdom of James the brother of Jesus (*Ant.* xx. ix. 1 [200]), there is general agreement that the famous passage that discusses Jesus himself (xviii. iii. 3 [63 f]) is a Christian interpolation. According to Joseph Klausner, of the Hebrew University in Jerusalem, the few reliable

statements about Jesus in the Talmud are modified reflections of Christian tradition, and their only historical value is to confirm the fact that Jesus was a historical figure and that the general character of His works and His words is adequately depicted in the Gospels (*Jesus of Nazareth*, 1925).

(3) *Classical sources.*—There is evidence in classical authors for the historical existence, approximate date, and death of Jesus, but little else (Tac. *Ann.* xv. 44; Suetonius, *Life of Claudius*, xxv. 4, and *Life of Nero*, xvi. 2; Pliny the Younger, *Epp.* x. 96; cf J. Stevenson, *A New Eusebius*, 1957, pp. 1–4, 13–15).

2. Presuppositions.—Complete objectivity in the study of anything outside the field of the exact sciences is unattainable. Perhaps it is also undesirable, for absence of what some call 'bias' or 'prejudice' usually means either ignorance or indifference. The contributor of this article writes as a Christian. At the same time he makes an honest attempt, with the tools of historical research at his disposal, to differentiate history from interpretation in his source material, and he is particularly concerned to practice historical exegesis in sensitive areas where his conclusions may run counter to *a priori* assumptions on the part of some of his readers. (For a history of the study of the life of Jesus, see C. C. McCown, *The Search for the Real Jesus*, 1940, and J. M. Robinson, *A New Quest of the Historical Jesus*, 1959.)

3. Conditions in Palestine.—(1) *The political situation.*—From the age of the Exile, the Jews in Palestine were subject to one alien power after another—Persian, Greek, Egyptian, and Syrian. Following upon a century of independence under the Maccabees, the country was incorporated in the Roman Empire as a division of the province of Syria. In certain circumstances the Romans recognized a feudatory king, and it was with this status that Herod the Great ruled over Palestine. At his death in 4 B.C., his dominion was divided among three of his sons; but on the deposition of Archelaus in A.D. 6, Judaea and Samaria were placed under a Roman procurator. Herod Antipas and Philip continued to govern as vassal princes, with the title of tetrarchs, over Galilee and Ituraea (and other contiguous areas) respectively. The pressure of Roman rule was felt in the stern measures which were taken to suppress any dangerous expressions of national feeling, and also in the exactions of the publicans to whom the taxes were farmed. Internal administration in Judaea was largely an affair of the Sanhedrin. To a high-spirited people like the Jews, with memories of former freedom, the loss of national independence was galling; and their restlessness under the foreign yoke, combined as it was with the messianic hopes that formed a vital element of their religion, was a source of anxiety not only to the Roman authorities but also to their own leaders.

(2) *The religious situation.*—Judaism survived the debacle of A.D. 66–70 (the war of the Jews against Rome) because the real focus of its life had already become the Torah and the Synagogue. In Jesus' day, however, the religion of the people still appeared to centre about the Temple and the sacerdotal cult. Herod the Great had begun the construction of the Second Temple *c* 19 B.C., and the complex of Temple buildings and courts, while not actually completed until *c* A.D. 64—only to be destroyed by Titus and his legions after the capture of Jerusalem in A.D. 70—had long been a source of much pride to Jewry. Pilgrimages brought loyal Jews to Jerusalem at the time of the great festivals from the far corners of the earth. Tithes, taxes, and innumerable sacrificial offerings, both public and private, enriched the Temple treasury, and the priestly hierarchy enjoyed wealth, authority, and prestige. The Sadducees (q.v.) were the party of the priests, the great landowners, and the aristocracy. They controlled the Sanhedrin, the highest court of appeal in Judaism, and were entrusted with considerable political responsibility by the Roman state. Profiting from the political and economic stability maintained by Rome, they were opposed to all revolutionary movements and tendencies. They acknowledged the authority of the Torah, but not of the other parts of what we call the OT nor of the oral tradition of the Scribes. As a consequence they refused to accept doctrines, such as that of the resurrection (Mk 12^{18}, Ac 23^{9}), that were not to be discovered in the Pentateuch. The Pharisees (q.v.) were a smaller but more popular and influential party and were more receptive to new ideas. They undertook to be familiar with both the written and the oral law and to govern their lives in accordance with this legislation. There were, to be sure, differences between various schools. The followers of Shammai, for example, were often severe in their interpretation of the Jewish laws, while those of Hillel were usually lenient. But disagreement in matters of detail was overshadowed by a broad measure of agreement in theology and in practice. The Scribes (q.v.) belonged in the main to the party of the Pharisees. They were the learned doctors of the law whose recognized task it was to relate the Torah to new situations as they emerged and to transmit to their students the oral tradition that had accumulated since the time of Ezra. Philo, Pliny the Elder, and Josephus all speak of a monastic order known as Essenes (q.v.). The Covenanters of Qumrân, whose monastery and library (the 'Dead Sea Scrolls,' q.v.) were discovered in 1947, appear to have been a related sect. Their peculiar tenets and practices may have been familiar to Jesus, although no reference is made to them or to the Essenes in the Gospels. The Zealots (q.v.) were the party of extremists who fomented the revolution against Rome in A.D. 66. While there were, no doubt, many in Jesus' day who hoped for the overthrow of Rome by violence, it is not clear that they were known as 'Zealots' before the time of Herod Agrippa I. Most of the Jews in Palestine stood outside all such organized or semi-organized groups and are referred to in Rabbinic literature as 'the people of the land.' They appear to have held the Pharisees in high regard and to have attempted to fulfil the regulations of Pharisaic legalism as far as they were familiar with them and as the exigencies of earning a livelihood made their observance practicable. The larger towns in Palestine, with the single exception of Jerusalem, were predominantly non-Jewish, and Jesus, like most Palestinian Jews of His day, must have had some knowledge of Koine Greek and must have been exposed to some influence from the dominant Hellenistic culture of the Mediterranean world.

4. Date of Jesus' Birth (see CHRONOLOGY).—Since the Evangelists were not concerned with such matters as the date of Jesus' birth, modern biographers, depending on the Gospel narrative, which they have taken as a point of departure, have been able to reach at least four different conclusions. (1) According to Lk 3^{1-3}, John the Baptist began to preach in the fifteenth year of Tiberius Caesar—*i.e.* A.D. 28–29. If we were to allow a year or so for John's ministry before Jesus' baptism, this would place the latter event *c* A.D. 30. Luke says (3^{23}) that Jesus at that time was 'about thirty years of age,' from which it can be concluded, with Dionysius Exiguus in the 6th cent., that He was born *c* A.D. 1. (2) In 2^{1-7} Luke dates Jesus' birth at a time when Quirinius was governor of Syria and when Caesar Augustus ordered an imperial census. There is no evidence that Quirinius was governor before A.D. 6 nor that there was any earlier census than the one we know to have been taken in that year. According to this point of departure, Jesus was born in A.D. 6. (3) In Jn 8^{57} certain Jews are said to have referred to Jesus in the course of His ministry as 'not yet fifty years old.' If Jesus were in His early thirties at the time, it would seem that, even speaking in round numbers, they would have said 'not yet forty years old.' It may be that the author of the Fourth Gospel thought of Jesus during the period of His ministry as between forty and fifty years of age and as having been born as early as 20–15 B.C. (4) In the birth and infancy narratives of the Gospel of Matthew, Jesus is said to have been born towards the end of the reign of Herod the Great. Since

Herod died in 4 B.C., it would appear from the Matthaean tradition that Jesus could not have been born much earlier or much later than 9–6 B.C. This dating is the one that has been commonly accepted by the Church. It may be said also to have some Lucan support, for Luke implies in 1^5 that John the Baptist was born during Herod's reign and in 1^{26-38} that Jesus was conceived before John's birth.

5. Birth and Infancy.—(1) *The birth narratives.*—Mark's Gospel opens with an account of Jesus' baptism, but both Matthew and Luke begin with a cycle of birth and infancy narratives. The sharp divergence of the two post-Markan Gospels at this point is frequently overlooked because the reader has in mind a composite narrative. Matthew's story is told in 2^{1-23}. Joseph and Mary were residents of Bethlehem in Judaea, and Jesus was born there, presumably in His parents' home. Wise men from the East were led by a star to the place where the child was, and there offered Him gifts. Joseph was warned in a dream to flee to Egypt to avoid Herod's intended act of violence, and in another vision he was persuaded after Herod's death to settle with his family in Nazareth of Galilee rather than to resume residence in Bethlehem. Luke's story is told in 2^{1-39}. Joseph and Mary were residents of Nazareth rather than of Bethlehem and were brought to the city of David at the time of Jesus' birth by the exigencies of the census. Jesus was born in a manger because there was no room for His parents in the inn. Then follow the stories of the angelic chorus, the visit of the shepherds, Jesus' presentation in the Temple in Jerusalem, and the return of Joseph and Mary with their newborn son in due course to Nazareth. So far as form is concerned, Matthew's narratives are legends, but Luke's are more properly classified as poetry. Since the two Evangelists differ so greatly on all other points, the fact that they agree in stating that Jesus was born in Bethlehem leads many to believe that this is an historical datum. More probably the stories in Matthew and Luke are independent attempts at harmonizing two traditions: that Jesus was known to have been associated from infancy with Nazareth in Galilee; and that as Davidic Messiah He must have been born in Bethlehem.

(2) *The tradition of Jesus' Davidic descent.*—It was a commonly accepted element of Jewish expectation that the Messiah would be a descendant of the house of David, and both Matthew and Luke include genealogies to prove that Jesus fulfilled the Messianic hope. This belief was a matter of apologetic concern for the early Church, but soon lost importance once Christianity became predominantly a Gentile religion. Paul knew of the tradition that Jesus 'was descended from David according to the flesh' (Ro 1^3), but he never developed it, for it had little or no bearing on his Christology. The only other references in the NT outside the Gospels to Jesus' Davidic descent are in Rev 5^5 and 22^{16}, where they are stereotyped phrases inherited from the past rather than items of any consequence to the author of the Apocalypse. Even in the Gospels there is one passage (Mk 12^{35-37} ||) in which Jesus Himself is said to have broached the question and (it would appear) to have disclaimed Davidic lineage. The presence of the genealogies in Mt 1^{1-16} and Lk 3^{23-38} must be due to the respect the Evangelists had for earlier beliefs, for they themselves hold that Jesus was conceived by the Virgin Mary of the Holy Spirit, and they resort to awkward apologies (Mt 1^{16}, Lk 3^{23}) for a doctrine they no longer find tenable. The two 'proofs' of Jesus' Davidic descent are mutually independent and incompatible. Matthew's traces Jesus' descent from Abraham (the father of the Jewish people) through Solomon to Jacob and Joseph, while Luke's reconstructs a line of descent from Adam (the father of mankind) through Nathan to Heli and Joseph. These and related differences defy the most ingenious attempts at harmonization. See GENEALOGY OF JESUS CHRIST.

(3) *The Virgin Birth.*—The doctrine of the Virgin Birth was not part of the primitive kerygma as we know it from references in Paul's letters and the early sermons in the book of Acts. There is no hint of the doctrine in Mark's Gospel nor in the tradition common to Matthew and Luke (Q). It has no place in the birth and infancy narratives in Lk 2^{1-52}, which assume throughout that Joseph was one of Jesus' parents ($2^{27, 33, 41, 43, 48}$). It must have been known to the Fourth Evangelist, but he makes no appeal to it. For him, Jesus Christ had appeared in time but did not have a beginning in time. As the Divine Word He had been with God from all eternity (1^1). The doctrine is implied in the parenthesis with which Luke introduces his version of the genealogy (3^{23}), but it is explicit in his Gospel only in $1^{34f.}$ If these verses were omitted, no one would suspect that the doctrine of the Virgin Birth lay behind the narrative in 1^{26-38}. Some scholars have held that evidence based on one Old Latin MS supports the hypothesis that vvs.$^{34-35}$ are an interpolation. More probably they were added by Luke himself to the source he was employing at this point. In the NT it is only in Matthew's birth narratives that the doctrine is basic to the proclamation of Jesus Christ, and even Matthew recognizes that it is at variance with the earlier belief that Jesus was descended from David (cf the awkward gloss in 1^{16}). In his account Matthew supports belief in the Virgin Birth by declaring that Jesus' supernatural conception fulfills the prediction of Is 7^{14}, a proof text taken from a narrative that had no messianic connotations for Isaiah and that loses all relevance when it is observed that the Greek word for 'virgin,' which Matthew took over from the LXX text, is a mistranslation of a Hebrew noun meaning nothing more specific than 'young woman.' The belief in the Virgin Birth among Christians of Matthew's time had a theological or apologetic rather than a historical origin. It was one means of articulating for non-Jews—the doctrine would have been utterly repugnant to Jews—the faith of the Church from the beginning, and the faith that is still the faith of the Church, that in Jesus Christ God had come into human life for our salvation.

6. Years of Preparation.—Of the Evangelists only Luke records an incident out of Jesus' boyhood (2^{40-52}), a visit that Jesus paid with His parents, when He was twelve years of age, to the Temple in Jerusalem. The point of the story is that even as a boy Jesus thought of God as Father and of God's house as His true sphere of work. Luke's narrative was originally independent of the Virgin Birth cycle, for it speaks of Joseph and Mary as Jesus' parents. It is in sharp contrast to the revolting tales of Jesus the boy wonder and magician that fill the later so-called 'Infancy Gospels,' and its very naturalness vouches for its authenticity. The child is represented as listening and asking questions rather than 'teaching.'

Since Nazareth was only a few short miles from Sepphoris, the second largest centre of population in Palestine (after Jerusalem) and a predominantly Gentile city, it is probable that the rural and pastoral setting of Jesus' early years has been overstressed in many 'lives of Jesus' and in some hymns. From Mk 6^3 we learn that Jesus' family at the time He began His public ministry included His mother, four brothers, and at least two sisters. The fact that Joseph is not mentioned in this passage or in Mk 3^{31-35} lends some support to the conjecture that Jesus' father had died before the point at which the Gospel narrative of Jesus' ministry begins. One of Jesus' brothers, James, was among the first to be convinced, after the Crucifixion, that Jesus had risen from the dead (1 Co 15^7); soon thereafter he became the recognized leader of the church in Jerusalem (Gal 2^{12}, Ac 12^{17}). In our sources he is commonly referred to as 'the Lord's brother.' His character as delineated by references both in the NT and in Josephus (*Ant.* XX. ix. 1 [200]) throws some light on the nature of the home in which Jesus also was reared—a home devoted to orthodox Jewish piety. Jesus, furthermore, was no 'unlettered Galilaean peasant.' In His home and in the synagogue school He would have been thoroughly grounded in the Jewish Scriptures, and His recorded

sayings show that He had caught not only the literary charm of the OT but also an understanding of its highest religion. In addition, as His parables reveal, He had acquired an intimate and sympathetic knowledge of unater and of rural and village life in Palestine: the fisherman with his boat and nets; the sower scattering his seed on his field; the shepherd herding his flock; the father caring for his children; the housewife baking bread or sweeping a one-roomed house; boys and girls playing in the market place; the lightning flashing from the sky; a cloud in the West or a wind from the South portending a change in the weather; the flowers of the field, the birds of the air; the growing grain; a crop ready for the harvest—and much else of a like character. To the discipline of the home, of the school, and of the world of man and of nature was added the discipline of work. In His early years Jesus learned the trade of a carpenter—apparently also His father's trade—and appears to have practised it until He reached the threshold of middle age (Mk 6^3).

7. Jesus and John the Baptist.—The accounts of John the Baptizer in our various Gospels can be supplemented with information derived from Josephus' *Ant.* XVIII. v. 2 [116 ff], a source that serves at several points (viz. the purpose of John's baptism, the cause of his arrest and execution, the place of his imprisonment) to correct the Markan tradition. Much speculation in recent years about John's possible connexion at one time with the Covenanter sect at Qumrân goes far beyond any actual evidence. According to all the Synoptic Gospels, John dressed and acted the rôle of a prophet and proclaimed (in conventional apocalyptic imagery) the near advent of the Messiah; according to Matthew, he anticipated Jesus' message of the kingdom of God (3^2) and may have implied that Jesus was the Messiah (3^{14}); according to the Fourth Gospel, he explicitly referred his disciples to Jesus as the Messiah ($1^{29, 35-36}$). The passage in Mt 11^2 (Lk 7^{18-19}), however, appears to indicate that John heard of Jesus only after his own ministry had been terminated by arrest and imprisonment, and therefore also appears to suggest that Jesus when He was baptized was but one among the many who had presented themselves to him at the Jordan river. The fact that Jesus was baptized by John caused the later Church some embarrassment. How could the sinless Son of God have submitted to a baptism for the remission of sins? The Gospel of John omits any direct account of the incident, and even Matthew appears to have been aware of the theological difficulty involved (3^{14-15}). Mark's account (1^{9-11}) is clearly the source of Matthew's and Luke's, and the earliest Evangelist reports the baptismal experience as one personal to Jesus Himself. (In Matthew the baptism becomes a public attestation of Jesus' Messiahship, and in Luke the descent of the dove is objectified as a physical miracle.) While the precise nature of Jesus' experience at the time is no longer recoverable, it is clear that contact with the Baptist's ministry was instrumental in bringing Him face to face with His prophet's task and that His baptism had for Him the character of a prophetic call or commission.

8. The Temptation.—According to the Synoptic Gospels the sequel to Jesus' baptismal experience was a period of withdrawal during which Jesus' new-found consciousness of Divine mission was put to test. Mark says only that 'he was in the wilderness forty days, tempted by Satan; and he was with the wild beasts; and the angels ministered to him' (1^{13}). Matthew and Luke supplement Mark's narrative at this point with an account taken from their common non-Markan source. Matthew's version (4^{1-11}) differs from Luke's (4^{1-13}) only in the order in which the three temptations are introduced, and many feel that the former arrangement works up to a more effective climax. Jesus is tempted to demonstrate His messianic dignity by ushering in an era of material abundance; by thrusting Himself into peril and compelling God to intervene by miracle on His behalf; and by assuming sovereignty over all the kingdoms of the world; tempted, that is to say, to assume the messianic rôles which popular thought of the time would have acclaimed. In each instance He is represented as putting the temptation aside. As we have them, the narratives are a commentary by the later Church, couched in mythological imagery, on the entire course of Jesus' ministry as believers recalled it. The story puts at the beginning of His public mission, in vivid and imaginative form, the temptations with which Jesus must often have had to contend. (John, for instance, reports that on one occasion certain of Jesus' followers wished to 'take him by force to make him king' [6^{15}] and that He would have none of it.) The OT tradition of Israel's forty years of testing in the wilderness, particularly as it is related in Dt 6 and 8 (from which all Jesus' answers to Satan are taken), has influenced the construction of the Q account. But it does not follow from this that the temptation stories are wholly mythological. The fact that the tradition of a sojourn in the wilderness and of a period of trial is preserved in two independent narratives—Mark and Q—makes it probable that these incidents have some basis in fact. However that may be, it is clear that the details of the narratives as we have them in Matthew and in Luke have been filled in and worked over by the piety of early churchmen.

9. Duration of the Ministry (see CHRONOLOGY).—According to all our sources Jesus was crucified by order of the Procurator Pontius Pilate, who (as we know from Josephus) held office in Judaea from A.D. 26–36. According to all our Gospels the Crucifixion took place on a Friday during a Passover season. According to the Synoptics this Friday was the Passover day itself, while according to John it was the day before the Passover day. If John's dating be accepted—reasons for doing so are adduced in **15** (6)—astronomical reckoning enables us to fix the date of Jesus' death on April 7, A.D. 30, or on April 3, A.D. 33. Since Luke, who was concerned with the relation of the Christian story to secular history, dates the emergence of John the Baptist as a prophet in the fifteenth year of the reign of Tiberius Caesar (3^1)—*i.e.* A.D. 28–29—we can scarcely assume that Jesus began His public ministry much earlier than A.D. 30. It is therefore probable that it covered a span of three years, from A.D. 30–33. It has been maintained that such a period may also be inferred from John's references to three Passovers during the course of Jesus' public mission (2^{13} 6^4 11^{55}); but it may properly be objected to this that the Fourth Evangelist speaks of Passover feasts for symbolical and typological rather than historical reasons. The Synoptic tradition was preserved and transmitted in Christian circles that had no interest whatsoever in chronology. To argue that the incident of plucking heads of wheat (Mk 2^{33}) points to the spring of one year, as the Passover of the Crucifixion does to that of another, and to conclude from this that Mark and the other Synoptists assume that Jesus' ministry lasted for a period of from twelve to eighteen months, is (in the judgment of this writer) an unwarranted deduction from the Synoptic source material.

10. Course of the Ministry.—According to Mark, Jesus began His ministry in Galilee after John the Baptist's arrest (1^{14}) and spent the early (and apparently much the greater) part of it exclusively in that northwestern province (1^{14}–7^{23}). Then, for what the reader gathers was a briefer stay, He went to the Phoenician area about Tyre and Sidon and, by a circuitous route that avoided Galilee, to the Decapolis and to those areas ruled over by the tetrarch Philip (7^{24}–9^{50}). (This extra-Galilean period in Jesus' ministry was interrupted, according to Mark, by an almost clandestine visit by boat to 'the district of Dalmanutha' [$8^{10, 13}$]—presumably in Galilee—and ended with a return to Capernaum.) The third division in the structure of the earliest Gospel is concerned with the journey to Jerusalem (10^{1-52}), and the final section (11^1–16^8) with Jesus' last week in the capital city.

According to John, Jesus' ministry began in Peraea with the choice of His first disciples (1^{40-42}) and then

alternated between Galilee and Judaea (1^{43}–12^{11}), with several visits at the time of great festivals (2^{13} 5^{1} 7^{10}) to Jerusalem and with interludes in Samaria (4$^{4-42}$), the tetrarchy of Philip (6$^{1-21}$), and Peraea (10^{40}–11^{16}). The latter part of the Gospel (12^{12}–20^{13}, the point at which the Gospel appears originally to have ended) is the Fourth Evangelist's account of Jesus' last visit to His nation's capital, beginning with the entry and ending with the Passion and Resurrection.

There are indications in Mark's Gospel that Jesus was no stranger to Jerusalem when He went there for the visit that ended with His arrest and crucifixion. He had friends in Bethany, for instance, who extended Him hospitality during His stay. It may well be, then, that John's tradition of a ministry at various times in Judaea and of several visits to Jerusalem prior to the only one Mark records serves to correct the Markan outline. But typological and symbolical interests rather than historical concern seem to have determined John's discussion of the years during which the Word that became flesh dwelt among men, and the biographer is compelled in the main to depend on the account in Mark.

In recent times there have been many who have denied that Mark's chronology is of any value. They have pointed out that our earliest Evangelist employs a number of stereotyped references to place and time: in a synagogue; by the Sea of Galilee; in a boat anchored offshore; in a house; on a mountain; on a highway; in the morning; when evening had come; on that day; in those days; after some days. It is maintained that Mark, when he set out to compose a Gospel, had at his disposal a number of pericopes—units of tradition—that had circulated with little or no chronological or geographical reference. The Evangelist provided them with settings and arranged them in an arbitrary sequence, much as a maid might string a handful of pearls. The student of the Gospels may grant that there is much to be said for this contention, without therewith abandoning the general framework of Mark's Gospel as historically valueless. The Evangelist need not have been completely ignorant of, or utterly indifferent to, the course of Jesus' ministry. In broad outline his account carries conviction. Jesus' choice of disciples, for instance, was obviously made towards the beginning of His ministry, and the Passion and Resurrection mark its end. No historian is likely to insist that any given intervening event necessarily occurred in the particular setting and sequence that Mark has given it, but this admission does not justify an attitude toward our sources of unrelieved scepticism. We can reconstruct with a measure of confidence at least an outline of the ministry of the Church's Lord.

11. The Galilaean Ministry.—Because of the special concerns that characterize the portrayal of Jesus Christ in the Gospel of John, the extent to which Jesus may have carried on His ministry in Judaea prior to His last visit to Jerusalem can no longer be determined. But the Johannine account agrees with that of Mark in regarding Galilee as at least a major centre of Jesus' initial activity.

(1) *The opening of the ministry.*—Whatever may have been the nature of His experience in the wilderness, it persuaded Jesus to undertake a public mission. He detached Himself from His home and His former interests and devoted Himself to the new work to which God had called Him. According to the temptation narratives, His retirement in the wilderness had lasted for forty days. No doubt the figure of forty was suggested to the early narrators by OT analogy, but the period must have been of some duration—perhaps even longer than forty days—for it allowed for an event of the utmost consequence to Jesus and His ministry, the arrest and imprisonment of John the Baptist by Herod Antipas. According to Mk 6$^{17-18}$, the reason for this was a personal one: Herod was angry at John for denouncing his adulterous marriage. Josephus, on the other hand, tells us that John's arrest was due to Herod's political apprehensions. Galilee was in a state of turmoil, and the tetrarch was afraid that the excitement aroused by John's ministry might lead to armed insurrection (*Ant.* XVIII. v. 2 [118]). At any rate, when Jesus returned from the wilderness it was to find that John had been imprisoned and that the field was open for a new kind of ministry. At the same time it must have been made evident to Him that His mission would be fraught with danger. He could gather from the fate that had overtaken John a warning of what lay in store for Himself.

Mark tells us that when Jesus came into Galilee He began His ministry with the proclamation, 'The time is fulfilled, and the kingdom of God is at hand; repent and believe in the gospel' (1^{15}). According to Mt 3^{2}, this had also been the burden of John's message. But Jesus' manner of preaching was quite different from John's. The Baptist had modelled himself on OT prophets as to dress, habits, and figures of speech. He had lived in the wasteland and had required the people to go there to hear him. Jesus, on the contrary, went to the people, travelling from village to village. He affected no prophetic pose, but ate and drank and dressed as other people did, worked with ideas familiar to the people of His time, and employed ordinary forms of speech.

We gather from Mark's account that Jesus carried on His work for some little time without attracting much attention. Luke was disturbed by the absence in Mark of an impressive opening to Jesus' ministry. At the time he was composing his Gospel, Christianity was bidding fair to turn the world upside down (Ac 17^{6}). Surely its programme must have been inaugurated in some dramatic fashion! So Luke took an incident that in Mark's order had occurred late in the Galilaean ministry (6$^{1-6}$) —the story of Jesus' rejection by His fellow townsmen at Nazareth—and transposed it to the beginning (Lk 4$^{16-30}$). By elaborating the narrative he made it prefigure the later Gentile mission of the Church (cf Ac 28$^{25-28}$) and serve as a vivid frontispiece to the whole story in Luke–Acts.

All our accounts agree that Simon and Andrew were the first to join Jesus as disciples. John locates their call in Peraea (1$^{35-42}$), while Mark declares that it, as well as that of James and John the sons of Zebedee (who are not mentioned in the Fourth Gospel), was issued at the Sea of Galilee (1$^{16-20}$). Mark narrates the call as though nothing had preceded it. The Evangelist was not concerned with how Jesus came to be by the Sea of Galilee or with how His first followers had come to be impressed by His person and mission. It may be taken for granted that facts which the early gospel story ignored had prepared the way for these two pairs of brothers to throw in their lot with Jesus.

Mark's Gospel implies that Capernaum, the modern *Tell Ḥûm*, was Jesus' headquarters throughout His Galilaean ministry. Its choice may have been due to the fact that Simon had a house there (1^{29}) and put it at his Master's disposal. But quite apart from this, Capernaum was admirably situated as a base of operation, for it was a centre from which a network of Roman roads radiated to all parts of the province and from which ready access could be had by water to other parts of Palestine.

(2) *The disciples.*—Simon, Andrew, James, and John formed the nucleus of a group of intimate followers. As we learn from Mark's story of the man who rejected Jesus' call to discipleship (10$^{17-22}$||), not all who received an invitation to join this circle were willing to accept it. The NT tradition that this group came to number twelve has been called in question by some scholars in modern times. The argument against its historicity is as follows: After the Resurrection the Church came to think of itself as the true Israel. Just as Moses had proclaimed the old law to the twelve tribes, so Jesus as the new Moses must have given the new law to twelve representatives of the new Israel. It was known that Jesus had three or four intimate followers and a wider circle (Luke says it included certain faithful women) that fluctuated in size. Simon and Andrew, James and John

were declared to have been the initial members of a closed group, and the blank spaces in the list were filled out (so to speak) with names that remain mere shadows. This is an attractive hypothesis, but one that runs into serious difficulties. Paul's use of the name 'the twelve' in 1 Co 15^5, itself based on tradition the apostle had received from the Church before him, shows that the title was current at a very early date. Furthermore, if 'the twelve' were an invention of the early Church, would Judas have been included in the list? Jesus' selection of a disciple who proved unworthy of His choice later posed a problem that the Church would scarcely have created for itself. It seems to this writer that the number twelve could have been both historical and symbolical; that it was Jesus Himself who intended the intimate group of His followers to symbolize the purified Israel that would enter the new age of God's rule. In Luke 10^{1-12} the Third Evangelist tells us that Jesus, in addition to the inner circle of twelve, also appointed a larger group of seventy, but this Lukan story appears to be literary rather than historical in origin. Both Mark and Q had accounts of the sending out of the Twelve. Matthew used the Q narrative to supplement Mark's in his version, but Luke used it as the basis of a separate account. In the OT 'seventy' is a round number used with reference to Gentile nations, and possibly Luke intended the story of the mission of the seventy to prefigure the later Christian mission to non-Jews.

Greek teachers in Jesus' time had their circles of students, and in Palestine each noted Rabbi had his band of disciples. (It has been estimated that in some rabbinical schools 'disciples' were expected to remember as many as 30,000 oral rules in addition to the precepts of the written Torah [by Talmudic enumeration, 365 prohibitions and 248 commands, totalling 613 rules in all]). But Jesus was neither a Greek philosopher with a body of formal instruction to convey, nor a professional Jewish Rabbi with a deposit of tradition to impart, and such analogies are not exact. Probably we cannot improve on Mark's observation (3^{14}) that Jesus appointed twelve (1) 'to be with him' (for companionship); (2) 'to be sent out to preach' (as on the one occasion recorded in the Synoptic tradition); and (3) to 'have authority to cast out demons' (to participate in their Master's ministry of exorcism).

Mark's list of disciples (3^{16-19}) appears to be that employed by the other Synoptists (including the enumeration which Luke gives in Ac 1^{13}, where Judas Iscariot, of course, is omitted). In all the listings Simon comes first and Judas Iscariot last. Mark arranges the names in four groups of three each, apparently in order of their importance. (1) Simon was the earliest convert and enjoyed a special relationship with Jesus. The significance of the nickname he was given, *Cephas* in Aramaic and *Petros* (Peter) in Greek, remains a puzzle. Mark speaks of him as Simon to the point of his enumeration in the list of the Twelve (3^{16}), and as Peter throughout the rest of the Gospel. According to Matthew, Simon received the surname 'Peter' as a reward for his perspicacity in confessing Jesus as Messiah at Caesarea Philippi (16^{18}). According to Jn 1^{42}, Jesus gave him the name on the occasion of their very first meeting. The only conclusion to be drawn from this is that the early Church was not certain why or when Simon got the name 'Peter.' The disciple's nature does not appear to have been so resolute and unbending as to warrant comparison to a 'rock.' The traditional Protestant interpretation of Mt 16^{18}, that 'the rock' on which Jesus said He would build His Church was Peter's faith, seems to this writer to depend on violent exegesis. Probably the Matthaean passage dates from a time when the Church at Antioch, which regarded Peter as its leader, asserted its precedence over the Church at Jerusalem headed by James the Lord's brother. It is possible that Jesus gave Simon the name Cephas (Peter) because, as His first convert and disciple, he could be regarded as the foundation stone of the new community. It is also possible that the name comes from the early days of the Church, when Simon Bar-Jona was known to have been the first to be convinced of the Resurrection (1 Co 15^5, Lk 24^{33-34}). (2, 3) Mark says that Jesus gave the sons of Zebedee the surname 'Boanerges,' which he translates as 'sons of thunder.' This nickname, like that of Simon, remains enigmatical. It has been suggested that it is explained by the incident in Lk 9^{54}, where James and John wish Jesus to bid fire come down from heaven on the heads of inhospitable Samaritans. Since Luke does not refer to the nickname—or Matthew, for that matter—this explanation must be deemed improbable. James suffered martyrdom during the latter part of the reign of Herod Agrippa (*i.e.* A.D. 43–44; cf Ac 12^{1-2}). The last we hear of John in the NT is in Gal 2, where we learn that in the controversy preceding the Apostolic Council he had thrown in his lot with the Jewish wing of the early Church. (For the tradition that John was the author of the Johannine cycle of literature, and for the conflicting tradition that he, like James, suffered early martyrdom [cf Mk 10^{35-40}, especially v.^{39}], see JOHN, GOSPEL OF.) (4, 5) Andrew and Philip are pure Greek names, and this fact prompts several questions: Did they speak Greek? Could Jesus speak Greek? In what language did Jesus converse with the centurion from Capernaum? the Syrophoenician woman? Pontius Pilate? Andrew is elsewhere identified as Simon's brother. Philip the disciple is not to be confused with Philip the Evangelist, who (according to the early chapters of the book of Acts) played a significant rôle in the life of the later Church. (6) Bartholomew (Son of Ptolemy), (7) Matthew (Gift of God), and (8) Thomas (Twin) are all names from Aramaic roots. In the Gospel of Matthew the disciple Matthew has been confused with Levi the son of Alphaeus (cf Mt 9^9 and Mk 2^{14}), a disciple who was not one of the Twelve. (9) James, who *is* listed as one of the Twelve, is identified as another 'son of Alphaeus.' (10) 'Thaddaeus' is the name of the tenth disciple in all texts of Mark and in the 'Neutral' texts of Matthew, while 'Lebbaeus' appears in the 'Western' texts of Matthew, and 'Judas the son [brother?] of James' in the texts of Luke and Acts. (11) 'Simon the Cananaean' in Mark and Matthew is 'Simon who was called the Zealot' in Luke and Acts. It is generally supposed that *kananaios* is the transliteration and *zēlotēs* the translation of the Aramaic *ḳan'ānâ*, a noun derived from a verb which means 'to be zealous.' If this is the case, Mark's and Matthew's 'Cananaean' means the same as Luke's 'Zealot.' Zealots (q.v.) were the revolutionary extremists among the Jews during the period preceding the outbreak of the war against Rome, but it is doubtful that the party was known by this name as early as the time of Jesus' ministry. Probably Simon's nickname denoted only a distinctive trait in his character. (12) Judas Iscariot is mentioned last in all the lists. 'Iscariot' is usually interpreted as 'man of Kerioth,' *i.e.* a native of a town in Judaea near the Idumaean border. Others believe it is derived from 'sicarius' (assassin); and still others from an Aramaic word meaning 'false.' By the 2nd cent. the fact that Jesus had chosen Judas as a disciple raised several thorny problems for theologians. How could a man have lived under the influence of Jesus and have acted as Judas did? Was Jesus' foreknowledge at fault? The Fourth Evangelist seems to have had the latter question in mind, for he represents Jesus as aware from the beginning that Judas would betray Him (Jn 6^{70}). In much modern literature, following a suggestion made early in the 19th cent. by Thomas De Quincey, Judas is pictured as a passionate, impulsive, high-minded individual who, distressed at the slow progress made by Jesus, betrayed his Lord in order that, by compelling Him to declare Himself as Messiah, he might hasten the coming of the Kingdom. There is not a shred of evidence for this conjecture. The Evangelists indicate that Judas acted simply out of motives of greed. Matthew, however, made an attempt to mitigate the enormity of Judas' crime. He declares that Judas repented of his treachery and committed

suicide in remorse (27$^{3-5}$). But Luke knew of an entirely contradictory sequel. Judas, far from repenting, 'bought a field with the reward of his wickedness,' only to be visited with a punitive miracle. 'Falling headlong [or *swelling up*, RSVm] he burst open in the middle and all his bowels gushed out' (Ac 1^{18}).

In the Gospel of John we are told that two of Jesus' disciples had formerly been followers of John the Baptist (1$^{35-37}$ [Andrew is identified as one of the two in v.^{40}]). No doubt Jesus' preaching made a special appeal to men who had already been aroused by John's message, but there is no indication in the Synoptics that any of Jesus' followers had previously been disciples of John in any special sense.

(3) *The mighty works.*—Every stratum of the Synoptic tradition, Mark, Q, L, and M, contains narratives of the mighty works of Jesus, and sooner or later the student of the NT must reflect on the historical and theological problems they raise. In this connexion several facts should be kept in mind: (*a*) In the Gospel of John the miracles are referred to as 'signs.' It is asserted that Jesus performed them in order to demonstrate that He was the Son of God. But there is little of this apologetic in the first three Gospels. From their records we gather that Jesus healed the sick as an outflow of His great compassion for suffering people. The one exception to this is the indication in the Synoptics that Jesus thought of His powers over demons as evidence that the new age of God's rule had already broken in upon history. Lk 10^{18} appears to be Jesus' reflection on some visionary experience: 'I saw Satan fall like lightning from heaven.' The prince of demons had been dethroned! In similar vein Matthew (12^{28}) quotes Jesus' words in the Beelzebul controversy: 'If it is by the Spirit of God that I cast out demons, then the kingdom of God has come upon you.' (*b*) According to the Biblical world-view, what we call a 'miracle' was just something out of the ordinary. All things took place as acts of God, and normally they followed a familiar pattern. But there was no reason why God should not choose to have things happen in unfamiliar and abnormal ways. When an individual stepped into a lake, his feet sank at once to the bottom. But there was no reason why God should not empower him to walk on its surface. It was all a matter of God's volition. No intellectual problem—no problem of 'natural law'—was involved. (*c*) Disease, whether somatic or psychic, was believed to be caused by demon possession. A mild illness was due to the inhabitation of a victim by one demon. The more severe the malady, the more the demons who had taken control. Mary Magdalene had been possessed by seven, and the Gadarene demoniac, a case of violent lunacy, by a legion. (*d*) In the Gospels as in other traditions, both sacred and secular, once belief in the extraordinary or supernatural had been established, there was a tendency at later levels to heighten the miraculous element for purposes of effect. The simplest form of the miracle narratives in the Gospels is usually to be found in Mark. The accounts are ordinarily more elaborate and embellished in Matthew and in Luke. They are incapable of any natural explanation in John, and they become a tissue of impossibilities in the apocryphal gospels. (*e*) Occasionally it can be demonstrated that the 'miraculous' element in a later version of a gospel story did not belong to it at the beginning. According to Mark's narrative of Jesus' baptism, as we have seen, it was Jesus alone who 'saw the heavens opened and the Spirit descending upon him like a dove' (1^{10}). In Matthew what had been an experience personal to Jesus (in Mark) became a public attestation of the Messiah (3$^{16-17}$). In Luke 'the Holy Spirit descended . . . *in bodily* form, as a dove' (3^{22}). In Mark's account of Jesus' arrest we are told only that 'one of those who stood by drew his sword, and struck the slave of the high priest and cut off his ear' (14^{47}). In Luke the event became a miracle: 'But Jesus said, "No more of this!" And he touched his ear and healed him' (22^{51}).

Students of the patterns into which miracle stories were cast during the oral stage of their transmission point out that they usually begin with comments on the nature and severity of the malady, include a description of the methods of exorcism employed, reach a climax in some striking utterance of Jesus, and end with a reference to the effect of the miracle on bystanders. No classification of the miracle stories in the Gospels will appeal to every reader as a happy one—and it must be admitted that forms tend to be 'mixed'—but the following may be of assistance to some:

(*a*) *Miracles of healing in the realm of mental and nervous disease.*—Various neurotic and psychotic disturbances were at least as common in the ancient world as they are to-day and, because their victims were not confined to hospitals or other institutions, were much more in evidence. Most of the healings ascribed in the Synoptic Gospels to Jesus fall into this category, and they are also the mighty works for which there is best attestation in our sources. Modern progress in the science of psychology and its related disciplines enables us better to understand the conditions under which these healings were performed, even if we disclaim any ability to 'explain' them. (*b*) *Miracles of bodily healing.*—Stories in the Gospels about the healing of the blind, the deaf, the dumb, the epileptic, the paralytic, etc., are perhaps the most difficult for the historian to evaluate. That they have often undergone legendary embellishment is clear. That many had a basis in fact is just as indubitable. Advances in the art of psychosomatic therapy in modern times again are of some assistance to the student as he reflects on this strand of the tradition. (*c*) *Nature miracles.*—Stories in the Gospels of miracles in the realm of nature—the walking on the water, the stilling of the storm, and so forth—do not constitute a large group. There is reason to believe that some became attached to the Christian tradition from Jewish or pagan sources. Others may conceivably have arisen from the heightening in narration of an originally purely natural event. (*d*) *Miracles that may have developed out of parables.*—It is probable that occasionally, perhaps very occasionally, there has been a confusion between what Jesus said and what He did. It is at least possible that the difficult miracle story of the fig tree that withered at Jesus' curse (Mk 11$^{12-14}$||) goes back to the parable of the fig tree that we have in Lk 13$^{6-9}$. (*e*) *Symbolic miracles.*—The Johannine 'signs' are to be included in this category. One of the most illuminating is the story in Jn 21 of the miraculous catch of fish, with its apparent moral that men without Christ can do nothing. It is probable also that at least some of the miracle stories in the Synoptics were told in the first instance for their symbolic value—one thinks, for example, of the story of the feeding of the multitude, with the impression that the reader gets from it that in some sense it prefigures or anticipates the Eucharist.

(4) *Early opposition to Jesus.*—Opposition to Jesus arose early in His Galilaean ministry. From the beginning the Pharisees (q.v.) appear to have been antagonized by His preaching and practice. As guardians of the Torah they had 'built a hedge' of exact interpretation about it, and they feared with some reason that He was impairing its authority. His disregard of the oral *halachah*, His impatience with the letter of regulations governing food, fasting, and sabbath observance, all undermined the legalistic basis of what they stood for in Judaism. In Mk 3^{6} we are told that almost at the outset of Jesus' ministry they entered into some sort of conspiracy against Him with the 'Herodians,' and there is a later reference to this alliance in Mk 12^{13}. Herodians appear to have been Jews who were political supporters of Herod Antipas, possibly royalists who wished to re-establish the Herodian monarchy. No doubt such secularist Jews would be indifferent to any religious consequences of Jesus' ministry but would be fearful of possible political repercussions.

On at least one occasion Jesus' opponents—identified by Mark as 'scribes who came down from Jerusalem'—tried to discredit Him with His public by insinuating that

He was 'possessed'—*i.e.* that He was in league with Satan (Mk 3^{22}). This was an insidious and dangerous charge in a superstitious age, and the report that Jesus was a demoniac appears to have come to the ears of members of His family. Mk 3^{21} declares that they became apprehensive for His safety and even came to Capernaum in an abortive attempt to break off His public ministry. 'And when his friends [relatives] heard it, they went out to seize him, for they said [*i.e.* for people were saying], "He is beside himself."'

(5) *Jesus' rejection at Nazareth.*—Towards the close of His Galilaean ministry Jesus paid a visit to His home village of Nazareth and taught in its synagogue (Mk 6^{1-6}). Luke's account (4^{16-30}), as we have already noted (see above (1)), is put at the beginning of Jesus' Galilaean activity and is much more detailed and dramatic than Mark's, but the latter appeared to be the source the Third Evangelist is using, and the special emphases in Mark's story are probably due to his artistic and apologetic concerns. There is no suggestion in Mark of any attempt on the part of Jesus' fellow townsmen to destroy Him or of any miraculous escape of Jesus from their toils (as in Lk 4^{28-30}), but the earlier account also admits that the mission was a failure. Those who had known Jesus and other members of His family had no pride in the man whose wisdom and whose mighty works had been bruited abroad. Mark adds the comment that Jesus 'could do no mighty work there . . . because of their unbelief (vv.$^{5-6}$). Faith, the Evangelist implies, was an indispensable condition for the exercise of Jesus' healing powers. Matthew, loath to admit that anything could limit Jesus' ability to work miracles, alters Mark to read, 'And he did not do many mighty works there' [13^{58}]).

(6) *The mission of the Twelve.*—According to Mk 3^{14}, one of the purposes that Jesus had in mind when He chose His twelve disciples was that they should 'be sent out to preach,' but there is only one account in the Gospels of an independent mission in which His followers engaged (Mk 6^{7-13} ||). It must be kept in mind, however, that Jesus' ministry was prematurely interrupted, and He may have intended to use the Twelve more extensively in the proclamation of the gospel of the Kingdom than events permitted. According to Mark, Jesus sent out His disciples in six companies of two each to traverse the province. While Matthew used a parallel narrative in Q to supplement the account in Mark, Luke reserved the bulk of the material in that source for his account of the sending out of the Seventy (Lk 10^{1-11}; see above (2)). According to the Q narrative, the use of a staff and sandals was forbidden, but Mark's version (perhaps with the rigours of the Hellenistic mission in mind) permits it. The missioners were not to accept hospitality from more than one host in any one centre and were not to waste time on any who would not receive their message. (The urgency of Jesus' charge is to be understood, of course, against the eschatological background of His message.) In 10^{17-22} Matthew enlarges Mark with material taken in part from Mk 13^{9-13} (itself a late deposit in the earliest Gospel) and reflecting the persecution that was the experience of the later apostolic Church. It is clear that even Mark's narrative has been affected at points by the experience of early Christian evangelists, but there is no reason to doubt the historicity of the mission or of the general character of Jesus' instructions as they have been preserved.

12. Period of Withdrawal from Galilee.—According to Mk 7^{24}–9^{29}, Jesus interrupted His Galilaean ministry and withdrew for a period from the territories ruled over by Herod Antipas, travelling north to sparsely settled areas in Phoenicia and then, by a circuitous route, to parts of Palestine to the east and the north-east of the Galilaean lake. Matthew adheres to Mark's outline. Jn 6^{1-21} also preserves the tradition of a brief ministry in the tetrarchy of Philip. By omitting Mk 6^{45}–8^{26}, Luke gives the impression that Jesus went directly from Galilee to the district in Philip's tetrarchy about Caesarea Philippi.

Some scholars believe that most of this section in Mark was originally absent from the Gospel. They point to the confused and hazy geographical setting of the material and to the fact that much of it raises questions of critical concern. Several paragraphs in this Markan section look like doublets, like parallel versions of incidents already narrated. (1) The story of the feeding of four thousand in 8^{1-9} looks like a repetition of the earlier account of the feeding of five thousand in 6^{31-43}. (2) Both stories of the miraculous multiplication of loaves and fishes are followed by accounts of a voyage across the Sea of Galilee in which the failure of the disciples to understand the significance of the miracle is stressed (6^{52} 8^{17}). (3) The story of the cure of a blind man by means of spittle (8^{22-26}) looks like a doublet of the earlier narrative of the cure of a deaf-mute by similar means (7^{32-37}). (These two miracle stories are the only ones in the gospel tradition to assert that Jesus ever employed physical means in effecting His works of healing.)

It is one thing to suspect that in this section of his Gospel Mark has woven together two parallel versions of a period in Jesus' ministry in which He withdrew to the north and the north-east, and quite another to argue that the particular part of Mark missing from Luke at this point is an interpolation. Various other hypotheses could account even better for the lacuna in Luke. The Third Evangelist could have used a mutilated copy of Mark. More probably the explanation is that He deliberately omitted the material, partly because some of it (*e.g.* the story of the Syrophoenician woman) gave uncertain support to his interest in emphasizing the universal implications of Jesus' message, and partly in order to conserve manuscript space for the large amount of new matter that he wished to work into Mark's framework.

(1) *Reason for the withdrawal.*—If the tradition be accepted that Jesus for a period left Galilee for territories outside the jurisdiction of Herod Antipas (Mark refers to one brief re-entry [8^{10-13}]), the biographer looks for a reason to account for the withdrawal. Again it must be admitted that our sources give no unequivocal answer. It is improbable that Jesus went outside Galilee merely to extend the scope of His mission. Mark suggests that He wished to remain incognito. 'And he entered a house, and would not have any one know it; yet he could not be hid' (7^{24}).

The most plausible hypothesis (in the judgment of this writer) is that Jesus left Galilee in order to avoid arrest and incarceration by Herod—in order to avoid the fate that had overtaken John the Baptist. In 3^{6} Mark mentions an alliance of Herodians and Pharisees against Jesus. In 6^{14-16} he tells his readers that Herod had heard of Jesus and His work and suspected that He might be John the Baptist risen from the dead. In 8^{15} Jesus is quoted as warning His disciples against 'the leaven of the Pharisees and the leaven of Herod.' There may have been some crisis in Jesus' relations with the political authorities in Galilee, of which we learn nothing from Mark, that accounts for His departure 'to the region of Tyre and Sidon' (Mk 7^{24}).

Luke has preserved an interesting little passage (13^{31-33}) that lends this hypothesis some support. Certain friendly Pharisees warned Jesus: 'Get away from here, for Herod wants to kill you.' The pericope is included in a long section in Luke (9^{51}–18^{14}) into which the Evangelist put undated material derived from various non-Markan sources. It may well be that the passage in question belongs to the Galilaean period of Jesus' ministry.

(2) *The confession at Caesarea Philippi.*—The most striking incident of this extra-Galilaean period in Jesus' ministry, an incident that serves as a virtual prelude to Mark's passion narrative, was the confession by the disciples, through Peter as their spokesman, of Jesus' Messiahship (8^{27-30} ||). The scene is located by Mark (or his source) in the neighbourhood of Caesarea Philippi, a new city that had formerly been known as

Paneas and that had been rebuilt by Herod Philip and renamed in honour of the emperor. To the question, 'Who do men say that I am?' the disciples answered, '"John the Baptist"; and others, "Elijah"; and others, "One of the prophets."' To the question, 'But who do you say that I am?' Peter replied, 'You are the Christ.' The whole matter of Jesus' interpretation of His mission is the subject of discussion at a later point in this article (see **21**). Suffice it for the time being to say that this narrative rests, in the judgment of the present writer, on a sound historical recollection.

(3) *The Transfiguration.*—The sequel to Peter's confession of Jesus' Messiahship, according to Mark, was Jesus' declaration that 'the Son of man must suffer many things' (8^{31}). Then follows the story of the Transfiguration (9$^{2-8}$ ||). Some scholars believe that there is a core of historical reminiscence to this puzzling pericope. Others hold that it originally belonged to a resurrection cycle of tradition and has been moved forward by the Evangelist into his account of Jesus' earthly ministry. However that may be, what Mark means the story to indicate is clear. The Evangelist wishes to say: Jesus had tacitly admitted that He was Messiah but had coupled that admission with the prophecy that as Messiah He would have to suffer and die. To His three most intimate followers it was revealed that, despite the sufferings He would have to endure, He was nevertheless God's beloved Son. What all believers knew after the Resurrection had already become their secret before the Crucifixion.

13. The Journey to Jerusalem.—The direct route from Capernaum to Jerusalem led through Samaria, but it was often avoided by Jewish travellers because of Samaritan hostility. The longer route involved crossing the Jordan below the Sea of Galilee, journeying through the Decapolis and Peraea, and recrossing the river into Judaea at fords near Jericho. It would appear from Mk 10^{1} that Jesus chose this latter route for His last journey to the capital city. (It is often inferred from Luke's story of Jesus' rebuff at a Samaritan village after He had begun His journey [9$^{51-56}$] that the Third Evangelist followed at this point a tradition at variance with Mark's, but the fact that Luke also agrees that Jesus and His company arrived in the end at Jericho [18^{35}] seems to demonstrate that his Markan source was still his main reliance.) The Third Evangelist gives the impression that Jesus did more teaching during the course of this journey than during any previous period, but this is due entirely to the author's method of composition. (Lk 9^{51}–18^{14} is a block of non-Markan didactic matter inserted into the framework of Mk 10.) However, we gather also from Mark that 'the Way of the Cross' was a leisurely one, and Jesus may have found an unusually receptive and responsive audience in the territory in which John the Baptist had preached and baptized. It is clear that Jesus intended His arrival at Jerusalem to coincide with the ensuing Passover season. He must have been aware that the growing opposition to Him would come to a head in the Jewish capital, and both Mk 10^{32} and Lk 9^{51} emphasize the seriousness with which He and His disciples viewed the venture on which He had embarked.

14. The Week of the Passion.—Mark's chronology of the Passion week is as follows:—

Sunday: The triumphal entry into Jerusalem (11$^{1-11}$).

Monday: The cleansing of the Temple (11$^{12-19}$).

Tuesday: Debates with chief priests and scribes and some teaching (11^{20}–13^{37}).

Wednesday: The anointing at Bethany; Judas' agreement with the chief priests to betray his Lord (14$^{1-11}$).

Thursday: Preparation for the Passover; the Last Supper; the Agony; the betrayal and arrest; the trial before the Sanhedrin; Peter's denial (14$^{12-72}$).

Friday: A second meeting of the Sanhedrin; the trial before Pilate; the Barabbas interlude; Jesus' condemnation, crucifixion, and burial (15$^{1-47}$).

Those who discount the value of Mark's chronology regard it here also as arbitrary and artificial, and even more cautious scholars believe that the events of the Passion Story, the earliest and most important 'sermon' of the early Church, have been telescoped in narration. Jesus' protest at the time of His arrest, 'Day after day I was with you in the temple teaching, and you did not seize me' (Mk 14^{49}), points to a longer period than the two or three days that Mark's Gospel would allow. There is also some Talmudic evidence that money changers had to be out of the Temple by Nisan 1, and if this were the case the incident of the cleansing of the Temple must have taken place at least two or three weeks before the Crucifixion.

15. Events Preceding the Passion.—(1) *The entry into Jerusalem.*—The road from Jericho to Jerusalem rises 1300 feet by a long and sometimes precipitous ascent of 17 miles. (It was on this road that Jesus in His parable of the Good Samaritan put the man who 'fell among robbers,' Lk 10^{30}.) Following this route Jesus and the caravan with which He was travelling (including many who were not His immediate followers) in due course reached the outskirts of Jerusalem. Entrance to the city was made by way of Bethphage (according to Mt 21^{1}), a suburb that appears to have been located on the southern slope of the Mount of Olives. According to Mark the people who had travelled with Jesus hailed Him on His entry as the herald who had proclaimed 'the kingdom of our father David that is coming' (10^{10}). Matthew and Luke reinterpreted the tradition as an acclamation of Jesus as Messiah, and Matthew emphasized the fact that the entry was in literal fulfilment of the messianic prophecy in Zec 9^{9} (Matthew misunderstood the poetic parallelism of his OT proof text and consequently gave his readers an absurd picture of Jesus mounted on 'an ass, *and* a colt, the foal of an ass,' 21^{5}). In 12^{12} John represents the welcomers as pilgrims who had already been in the city for some time; in v.^{13} he substitutes 'branches of palm trees' for Mark's 'leafy branches' as the carpet of homage; and in v.^{15} he agrees with Mark and Luke that the event was a messianic welcome and with Matthew that it was a fulfilment of Zec 9^{9}.

(2) *The cleansing of the Temple.*—According to Mk 11^{11} the procession of which Jesus was a part went directly to the Temple on its arrival in the city. Jesus 'looked round at everything' and then, because of the lateness of the hour, proceeded to Bethany with the twelve, postponing any action until the following day. Matthew and Luke omit any reference to this preliminary reconnaissance. In their Gospels the purification of the Temple follows immediately upon the triumphal entry. John transposes the whole incident to the beginning of Jesus' ministry (2$^{13-17}$), presumably in order to portray the Lord of the Church as asserting His Divine authority from the very first.

In Jesus' day the Temple had become grossly commercialized. Provision had been made within the Temple precincts (the outer 'court of the Gentiles') for the purchase and slaughter of sacrificial victims. Mark makes specific mention only of 'pigeons,' but John adds 'sheep' and 'cattle,' and doubtless they also were for sale. Facilities had also to be provided for the payment of the annual Temple tax. Jews came from all parts of the Dispersion with Roman coins. Since these were stamped with the head of Tiberius or the deified Augustus, they could not be accepted by the Temple treasury (because of the Jewish law against 'images'), and money-changers were permitted in the Temple grounds for the purpose of converting pagan coinage, for a fee, into Jewish currency.

The priests had encouraged the commercialization of the Temple courts as one means of maintaining the sacerdotal system, and even Jewish scholars admit that there may have been 'occasions on which indignation such as that of Jesus would have been justified' (C. G. Montefiore). It is interesting to note that it is only in the Fourth Gospel that Jesus is expressly said to have used violence to achieve His ends. The implication in

Mark is that He relied on His moral authority. His prestige would be great, and in all probability He had the support of public sentiment. The Temple authorities (the Sanhedrin) would regard His interference as a direct challenge to their vested interests. Mark (v.18) says that His action accentuated their opposition to Him. If not the immediate cause of the Crucifixion, this clash with the Sanhedrin was at least a contributing factor.

(3) *Opposition to Jesus in Jerusalem.*—The Pharisees may have been the real power behind the opposition to Jesus in Jerusalem, as they had been in Galilee, but the Romans had delegated official authority in Judaea only to the Sanhedrin, the High Court of Jewry, and it was the Sadducees, the party of the priests and the landed aristocracy, who controlled that body. In Jesus' day the Sadducees (q.v.) were staunch supporters of the Roman regime. It can hardly be doubted that they had been observing Jesus and His activities for some time. In Galilee He was under the jurisdiction of Herod Antipas, and they could only take official action against Him when He entered Judaea and Jerusalem. No doubt their opposition to Him was mainly political and ecclesiastical. As a teacher He would appear to them to be of little consequence. As one whose ministry might lead to a political disturbance or become a threat to their exploitation of the Temple, however, He would become to them an object of suspicion and distrust.

The ultimate authority with which Jesus came into conflict, of course, was the Roman government, represented in Judaea by the procurator, Pontius Pilate. There is a tendency in the Gospels to throw as much blame as possible for the Crucifixion on the Jews and to absolve the Romans of responsibility. Some scholars have concluded from this that Rome had much more to do with Jesus' death than any of the Evangelists admit, but there is no reason to doubt the Gospel evidence that Rome intervened only at the end. It was Roman policy not to interfere in matters of purely religious concern and to give free rein to national and local authorities until there was some open act of violence or disorder.

(4) *Controversies with opponents.*—Much of the matter in Mk 11^{20}–13^{37} (‖) has to do with attempts by Jesus' opponents to involve Him in an incriminating utterance. In 11^{27-33} (‖) we are told that members of the Sanhedrin challenged Jesus in the Temple with the question, 'By what authority are you doing these things, or who gave you this authority to do them?' This challenge may well belong to the moment immediately after the cleansing of the Temple, although Mark in his chronology locates it on the following day. Perhaps, as Mark seems to imply, Jesus wished to evade His opponents' plot by involving them in a dilemma with His counter-question: 'Was the baptism of John from heaven or from men? Answer me' (v.30). More probably He intended by His question to suggest that there was a real connexion between John's ministry and His own.

Mk 12^{13-17} (‖) relates that a deputation of Pharisees and Herodians endeavoured 'to entrap [Jesus] in his talk.' 'Is it lawful to pay taxes to Caesar, or not?' (v.14). The question was a crafty and clever one. If Jesus were to answer 'No,' He would gain favour with nationalist extremists among His countrymen but would at the same time lay Himself open to a charge of treason. Jesus' famous reply, 'Render to Caesar the things that are Caesar's, and to God the things that are God's' (v.18) has frequently been interpreted as evasive and non-committal. This can hardly be correct. Jesus declares that the tax is to be paid, but insists that obedience to the state is subordinate to man's higher loyalty to God.

(5) *The anointing of Jesus.*—According to Mark and Matthew, Jesus withdrew each evening from Jerusalem to Bethany, presumably to the home of friends in that village. Lk 21^{37} preserves a different tradition (to which Jn 18^{1-2} lends some support): 'And every day he was teaching in the temple, but at night he went and lodged on the mount called Olivet.'

Mk 14^{3-9} records a beautiful little incident that took place in Bethany at the home of one 'Simon the leper.' An unnamed woman brought an alabaster jar of costly ointment, broke it, and poured the 'pure nard' on Jesus' head. According to one improbable hypothesis, the whole occasion was prearranged as a formal anointing of Jesus as Messiah, and it was the fact of this messianic anointing that Judas later betrayed to the authorities. There is no support for this interpretation of the incident in any of our sources. Mark represents the woman's action as a spontaneous, generous, impulsive gesture of love and faith. The Lukan parallel to Mark's story has a Galilaean rather than a Judaean setting, and we are told that the incident occurred early in Jesus' ministry in the home of a Pharisee called Simon (7^{36-50}). The woman who showed Jesus honour is described as a sinner, and it is said that she anointed His feet (rather than His head) and wiped them with her tresses. In the Fourth Gospel (12^{1-8}) the scene of the incident, as in Mark, is in Bethany in Judaea, but it takes place in the home of Lazarus and his two sisters and belongs to the days before Jesus' triumphal entry into Jerusalem. The woman who anointed Jesus is identified as Mary, and we are told (as in Luke) that she anointed Jesus' feet. (Lazarus is not mentioned in the Synoptic tradition, and according to Lk 10^{38-42} Martha and Mary were Galilaeans, not Judaeans.)

(6) *The Last Supper.*—Various attempts have been made to account for the Christian rite of the Lord's Supper as a sacramental meal borrowed by the Church after the Resurrection from the practice of Oriental mystery cults, many of which celebrated stated sacred meals. Such a hypothesis, however, is untenable. It may well be that the Lord's Supper came to be interpreted as a sacrament under the influence of ideas associated with pagan cultic meals, but it is certain that it was celebrated in the early Church as a re-enactment of the Last Supper, and the Last Supper is one of the best attested incidents in the life of Jesus. We have St. Paul's account of it in 1 Co 11^{23-26}, a report that comes from a time not much more than twenty years after the event and that Paul declares he himself had 'received.' (This declaration may mean that the apostle's account came to him by direct revelation from the risen Lord, but more probably that it was transmitted to him from Christ through the medium of Church tradition.) And in the Synoptic Gospels we have two apparently independent narratives, that in Mk 14^{22-25} (closely followed by Mt 26^{26-29}), and that in Lk 22^{15-19a}. (Lk 22^{19b-20}, in the AV but omitted by the RSV, is an addition to the earliest Greek texts under the influence of 1 Co 11^{24b-25}.) See EUCHARIST.
